"He left Newport, R. I., in June, 1804, and traveled on horseback (at that day almost the only conveyance west of the Alleghany Mountains) to Vincennes, in the Territory of Indiana, where he arrived in due time. Finding that the civil laws of our government had not yet been extended over Upper Louisiana, he remained at Vincennes until the fall of that year (1804), when he accompanied the Governor of Indiana Territory, Gen. William H. Harrison, to St. Louis, who visited that district or portion of Upper Louisiana to organize the civil government, courts, etc. This province had just before that time been attached by act of Congress to the Territory of Indiana for governmental and judicial purposes. Mr. Hempstead's arrival at St. Louis was but a few months after the formal transfer of the sovereignty of Upper Louisiana from France to the United States had taken place.

"Mr. Hempstead first settled at St. Charles, on the Missouri River, where he opened an office and practiced his profession for about one year. Here he devoted himself to the acquisition of the French language, and to the study of the French and Spanish laws. Though his residence at St. Charles was only a brief one, yet during that time he was appointed to hold several offices of high trust and importance connected with the courts. In the fall of 1805 he removed to and established himself at St. Louis, the seat of Upper Louisiana. There he at once entered into a most extensive and laborious and successful practice of his profession, not only in the courts of law, but before the tribunal established for the purpose of adjusting land claims and titles derived from the Spanish and French governments in Upper Louisiana. Thoroughly studied in this branch of his profession, he was rewarded with corresponding success. He not only practiced in the courts of St. Louis, but in the adjacent districts on the west side, and those in the 'Illinois country,' as it was then called, on the east side of the Mississippi River. In 1806 he was appointed deputy attorney-general for the districts of St. Louis and St. Charles, in the Territory of Upper Louisiana. In March, 1809, he received from Governor Meriwether Lewis the appointment of attorney-general for that Territory, which he accepted and held until 1812, and the duties of which highly important office he performed with eminent ability, firmness, and efficiency.

'I quote from a memoir of Mr. Hempstead, written by his friend, Col. Benton, in 1818: 'Soon after his settlement in St. Louis, Mr. Hempstead married into one of the most respectable families of the place, but left no surviving issue. His private life was an example of all that is desirable in the character of husband, father, and neighbor. In that of son and brother he has had but few parallels. No sooner did he find himself established in his new residence in Missouri than his filial affections went in search of his parents and relatives, whom he had left in Connecticut when setting out to lay the foundation of his own fortunes in a country so remote and so little known. He brought them to Missouri, established his aged parents in a comfortable home, and extended the assistance of a father to his brothers and sisters. Traits of this kind display the heart; they show the material of which it is made, and speak a higher eulogy than the tongue or pen of friendship can confer.'

"The act of Congress of June 4, 1812, provided for the representation of this new Territory of Missouri in Congress by one delegate. Governor Howard ordered an election for delegate on the second Monday of November, 1812.

"At this election Edward Hempstead was elected delegate to Congress. On the 4th of January, 1813, he took his seat, as shown by the following entry in the journal: 'Monday, Jan. 4, 1813, Edward Hempstead, returned to serve as the delegate to this house from the Territory of Missouri, appeared, produced his credentials, was qualified, and took his seat.' A question arose whether the delegate thus elected could remain a delegate after the expiration of the Twelfth Congress on the 4th of March, 1813.

"The first official act of Mr. Hempstead was a motion to raise a committee of the house to inquire into the matter. Of that committee Mr. Hempstead was chairman. The practice of the House of Representatives of that date was different from that of the present time. Under the present rules and practice of the House of Representatives the Territorial delegates cannot sit on the committees of the house. On the 15th day of January, Mr. Hempstead introduced into the House certain resolutions, instructing the Committee on Public Lands to inquire into the expediency of legislation in regard to the adjudication of land claims, etc., in the Territory of Louisiana (then Missouri), and also instructing the same committee to inquire into the expediency of granting the right of pre-emption to actual settlers on public lands in the Territory of Missouri.

"On the 29th of January, 1813, Mr. McKee, from the committee appointed on the motion of Mr. Hempstead to inquire into the question of further legislation in regard to election of delegate from the Territory of Missouri, reported that no legislation was necessary, for the reason that the delegate having been elected for two years under the provision of the law organizing the Territory, he could hold his seat for that term—that is to say, from the second Monday in November, 1812, to the second Monday in November, 1814; that the delegate elected in pursuance of law and for the term of two years could not be deprived of his seat by any subsequent law.

"Mr. Hempstead appears to have been on other committees than the one I have referred to. He was on a committee to whom was referred the petition of Daniel Boone and the resolutions of the Legislature of Kentucky in his behalf, and made a report thereon.

"The second session of the Thirteenth Congress convened on the 6th of December, 1813, and Mr. Hempstead was present as delegate from the Territory of Missouri. He had given his attention to a subject of vast importance to the Territory that he represented. It was the question of the final adjustment of land titles upon the bill which had been presented in the House in accordance with resolutions therefore introduced by him. It was on this bill that he made what appears to be his only speech during his term of service. As reported in the 'History of Congress,' it is an able one. He treats of the questions presented with great clearness, evincing a thorough knowledge of his subject and of the questions of international law which were involved. He contended that the title to lands in Louisiana Territory, before Spain ceded it to France in 1800, should be recognized and confirmed by the United States: that the acts of the Spanish government in granting titles to lands in Louisiana Territory from the time of the cession to France in 1800, and up to the time France ceded it to the United States

Hunt, Jacob Harry, Joseph Brasau, Antoine Vincent, Silvestre Labbadie, Joseph M. Papin, Jean Baptiste Trudeau, Francis M. Benoit, Boyd Denny, Pierre Didier, Calvin Adams, Emilien Yosti, Yancient (Hyacinthe) St. Cur, Andrew Andreville, Benito Baskes (Vasquez), Gerome Hebert, Patrick Lee, Yacinte Egliz, Joseph Ortes, Louis Brazeau, and Joseph Perkins, twenty-four, which being severally called, there

in 1803, should be recognized and confirmed by the United States. France had never taken possession of the country ceded by Spain in 1800, but had left the latter country in the full exercise of its sovereignty up to the time of the cession to the United States in 1803. Former acts of Congress had cut off all of these grants made by the Spanish government, violating, as he contended, not only the treaty with France, but the well known principles of international law. Mr. Hempstead characterized this law as 'the violation of every principle either of law or equity; it declared that which had been legally commenced under another government to be null and void; it made void the lawful proceedings of a power in the just exercise of its sovereignty. Instances have often occurred where what had been lawfully begun, but not completed, has been sanctioned and acknowledged, especially when it depended on the performances of conditions which subsequent events had made it impossible to perform, but never could a lawful act be made unlawful. A right once vested could not, without any fault of the claimant, be either at law or in equity divested; such a principle changed the nature of things, and was therefore odious. Would,' asked Mr. Hempstead, 'the Spanish government have sanctioned the grants made by its officers? If so, they ought now to be sanctioned; without the solemn stipulations of the treaty to support it, policy alone would dictate such a course.' He appealed in behalf of his constituents. 'Liberality will secure the affections of those you have made a part of your family; it will root old attachments, while a more rigid plan will occasion distrust and dissatisfaction, and the change will be regarded as injurious. No national benefit can result from this rigor; a few acres of land to the United States are nothing, but taken away from individuals may cause distress and ruin. Many of them are strangers to your language and unacquainted with your laws; their affections ought not to be estranged when extending justice to them will secure their confidence.'

"Mr. Hempstead then showed the injustice of other laws which had been passed on this subject: 'They had been so amended and altered by so many different statutes that difficulties had been increased instead of diminished. It could not be denied that the people of this Territory were in a worse situation in that respect than others. It now remains for me, Mr. Speaker, to consider very briefly whether the present bill will do full and complete justice to the claimants. During the ten years of scrutiny and investigation, few have made improvements. Many families, despairing of obtaining their equitable claims, and tired of the uncertainties attending their titles, have abandoned a country which cannot prosper without the fostering aid of the government, and if the delay of justice has not in all cases been equal in its consequences to an absolute denial of it, still it has caused much distress and injury. The present bill will quiet the apprehensions of most of the claimants, and although it will neither satisfy nor do justice to all, yet it will restore that confidence which has been much impaired, and will do what the national faith is pledged to do.' The act of Congress which Mr. Hempstead had introduced, and so ably and strenuously advocated, became a law on the 12th day of April, 1814. It was a law of transcendent importance to the people of the Territory of Missouri, for it confirmed the incomplete Spanish grants or conceptions, or any warrant or order of survey for lands lying within the Territory of Missouri prior to March 10, 1804,' which was the date when the sovereignty of France over Upper Louisiana passed to the sovereignty of the United States. The act also provided for giving to the settlers of Missouri Territory the right of pre-emption to public lands, a beneficent act which extended the principle which had been applied to other Territories.

"Mr. Hempstead's name does not further appear in the proceedings of this session of Congress, which adjourned on the 18th day of April, 1814, to meet on the last Monday of the following October. Mr. Madison, however, called an extra session of Congress to meet on the 19th of September, 1814. Mr. Hempstead seems not to have taken his seat at this extra session of Congress, and probably for the reason that the term of two years for which he was elected would expire in about six weeks after the meeting of the said extra session.

"Mr. Hempstead, having successfully accomplished the objects for which he was sent to Congress, declined a re-election, and returned to the practice of his profession, and to the performance of all the duties of a good citizen. In this latter capacity he showed his disposition to be useful to his country by accepting inferior stations after having retired from the highest which the vote of his fellow-citizens could confer on him. He went on several expeditions to protect the frontiers from the Indians during the war which followed, and afterward served in the General Assembly of the Territory, of which he was elected Speaker in the popular branch."

This, however, is by no means the sum of Mr. Hempstead's services, nor the greatest of them. The public schools of St. Louis hold property worth a million and a half of dollars, and yielding an annual income of over fifty thousand dollars. This is due to Mr. Hempstead and Mr. Thomas F. Riddick. The latter began to urge the matter upon Congress before the act organizing the Territory was passed, and Mr. Hempstead secured the favorable action of that body by his personal influence and urgent appeals. The act of the Twelfth Congress, Chapter XCIX., by which this valuable interest was secured and perpetuated, recites that "the rights, titles, and claims to town and village lots, out-lots, common-field lots, and commons in, adjoining, and belonging to the several towns and villages of Portage des Sioux, St. Charles, St. Louis, St. Ferdinand, Village à Robert, Little Prairie, and Arkansas, in the Territory of Missouri, which lots have been inhabited, cultivated, or possessed prior to the 22d of December, 1803, shall be and the same are hereby confirmed to the inhabitants of the respective towns and villages aforesaid according to their several rights in common thereto. . . . All town or village lots, out-lots or common-field lots included in such surveys which are not rightfully owned or obtained by any private individuals, or held as commons belonging to such towns or villages, or that the President of the United States may not think proper to reserve for military purposes, shall and the same are hereby reserved for the support of schools in the respective towns or villages aforesaid." This is the origin of the endowment of the St. Louis public schools.

Hempstead declining re-election, Rufus Easton succeeded him in Congress, and John Scott succeeded Easton.

"Mr. Hempstead was the friend and supporter of Mr. Scott, and entered warmly into the canvass in his behalf. In returning from St. Charles to St. Louis, a day or two before the election, which was on Monday, Aug. 4, 1817, he was thrown from

were absent four,—Joseph Brazeau, John B. Trudeau, F. M. Benoit, and Patrick Lee. The absent jurors were fined five dollars each. The court licensed John Boly to keep a ferry across the Maramec for three years, and laid down the following rates for ferry fees and constables' fees:

"Ferry rates: For a man, 25 cents; horse, 25 cents; cart and team, 50 cents; yoke of oxen, 25 cents; cow and calf, 25 cents; and the following rates over the Mississippi and Missouri: Man, 25 cents; man and horse, 62½ cents; wagons, $1 each; horse, 50 cents; cart and oxen, $1.50; first cow or ox, 50 cents; additional ones, 25 cents each; hogs and sheep, 12½ cents each; merchandise, 12½ cents 100 pounds; marketing, 6¼ cents; constables' fees, serving a writ, 37½ cents; a summons, 25 cents; an execution, 25 cents.

(Signed) "CHARLES GRATIOT.

"RUFUS EASTON, *Prothonotary*."

There was at first no post-office at St. Louis, but one was established some time before the regular frame of a government was fixed on; Rufus Easton, the clerk of the Court of Sessions, as above, serving as postmaster.[1] The mail was sent to Cahokia from St. Louis once a week. It was during this year that Lewis and Clark started on their expedition up the Missouri River, from which they did not return until 1806. They had performed a brilliant exploit, and they were not only *fêted*, but rewarded when they came back. Both Clark and Lewis, as will be seen, were appointed to prominent positions in Missouri, and the men likewise were compensated with liberal land grants by a special act of Congress to that end.[2]

In the primitive village of that day there were no paved streets, and locomotion was sometimes difficult. The only road from the river in 1804 was Market

his horse and received what was supposed to be a slight injury on his head. He was able, however, to continue his journey home, and afterwards to attend to his usual business. The injury he received was, however, far more serious than was at first supposed. In arguing a cause in court on the 9th of August he was stricken down with congestion of the brain, the undoubted result of his being thrown from his horse; falling senseless, he lingered until half-past twelve o'clock Sunday morning, when he expired. I copy a mournful entry made by his venerable father, Stephen Hempstead, in his diary, dated Aug. 9, 1817: 'Went into St. Louis this afternoon and found my son Edward in a fit of apoplexy and not able to speak. Every medical aid was used to restore his system again, but to no purpose. He continued until 12.30 o'clock, and expired in the bloom of life, at the age of thirty-seven years and three months.' His funeral took place on Monday, the 11th of August, on the farm of his father, five miles from town, which now constitutes the Bellefontaine Cemetery. I copy another entry made in the same diary, dated Monday, August 11th, in relation to the funeral: 'The funeral was attended by a very numerous collection of people of every description, whose faces were uniformly wet with the tears of sorrow for their departed friend. The neighbors in the country were generally collected at my house for the funeral. Mr. Giddings made a prayer and committed to the grave the remains of a beloved son, cut down suddenly in the prime of life and usefulness, a great loss to my family, but much greater to the Territory and public in general.'"

The following obituary notice appeared in the *Missouri Gazette* of Aug. 16, 1817: "Died on Sunday night last, after a short illness, Edward Hempstead, Esq., counselor and attorney-at-law, and formerly a delegate from this Territory to Congress. In the dear relation of husband, son, and brother, the deceased is believed to have fully acted up to his duty. The sorrow of his widow and relations offered the most eloquent expression of his worth. On Monday the corpse of the deceased was attended to the place of interment (at the plantation of his father, Stephen Hempstead, Esq.) by a greater number of respectable citizens than we have ever witnessed here on a similar occasion."

[1] *Letters from Gideon Granger, Postmaster-General under President Jefferson, to Judge Rufus Easton, of St. Louis:*

"WASHINGTON CITY, March 16, 1803.

"MY DEAR FRIEND,—I have just received yours of the 17th of January, together with sundry communications in regard to the Territory of Louisiana, which I have forwarded to the President of the United States at his seat. Congress has created your Territory into a new government of the first grade. It goes into operation on the 4th of July next. The President has appointed James Wilkinson, commander-in-chief of the United States, Governor of the Territory. He is one of the most agreeable, best informed, most genteel, moderate, and sensible Republicans in the nation. Dr. Browne, of New York, is appointed secretary, upon the special and single recommendation of Aaron Burr; J. B. Lucas, of Pennsylvania, chief justice; *my friend Rufus Easton one of the assistant judges, the other judge I know not.*" . . .

April 4, 1805. "SIR,—Yours of the 25th is received; you can not be allowed anything for letters sent, or office rent; for a desk you will be allowed to charge this office ten dollars.

"Yours affectionately,

"GIDEON GRANGER.

"HON. RUFUS EASTON,

"*St. Louis, Territory of Louisiana.*"

These letters are quoted from "The Bench and Bar of Missouri."

[2] The following is the record of one of these warrants in favor of Patrick Gass, an old soldier of several wars, resident of West Virginia, and who wrote a very interesting, homely book of his own personal adventures and reminiscences, including his account of the Lewis and Clark expedition

"No. 6. Pursuant to an act of Congress, passed the 3d day of March, 1807, entitled 'An Act making compensation to Messieurs Lewis and Clark and their companions,' Patrick Gass is entitled to three hundred and twenty acres of land, to be located, agreeably to said act, at the option of the holder or possessor, with any register or receiver of the land office, subsequent to the public sales in such office, on any of the public lands of the United States lying west of the Mississippi, then and there offered for sale, or may be received at the rate of two hundred dollars per acre in payment of any such land.

"Given at the War Office this 6th day of March, in the year one thousand eight hundred and seven.

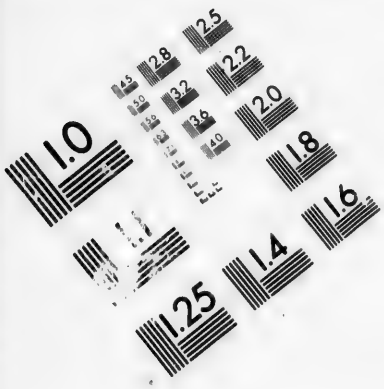
"HENRY DEARBORN,

"*Secretary of War.*

"Registered, H. G. ROGERS.

"Recorded Nov. 15, 1808, M. P. LEDUC, *Recorder*."

Street, quarried out rudely through the limestone rock. This was rather a footway than a road, and was of more service to the inhabitants in enabling them to get water than in any other respect. The river was relied upon principally for water, and there were but few pumps and wells, owing to the difficulties presented by the bed-rock underlying the city. Where there were no springs and spring branches, the river was almo. the sole source of supply, though there were some pu ps, and a few years later St. Louis supported a pump-maker.[1] It was this general use of the river water which induced the inhabitants to build so close to the banks.



"The water was hauled up from the river in a barrel laid across two sapling poles, which served for shafts, called a drag. After a time a few wells were sunk, back on the second and third streets, but as they had to bore through the limestone bed-rock of the village in their excavation they cost much money, and but few undertook them. Col. Chouteau, who lived on his block almost sixty-five years, had made two attempts at different parts of the same; one of them was unsuccessful, the other after going to the depth of one hundred feet, at great cost, procured a little water, but a very inadequate supply. Besides, it was only in the summer-time that a little cold water was needed for drinking purposes, there being then no ice put up, but the river water was universally preferred, as more wholesome and palatable."

The fuel of the townspeople was either such as could be got from the different prairie edges and commons, or else drift-wood brought down the Missouri and lodged against the different bars and islands in the river near the town. In every case it was dead-fall wood. The people used no green wood at that time; and later, when they began to look to Carondelet for their supplies, they got all seasoned wood. The gathering of drift-wood from the river was quite an industry among the poorer inhabitants. It was cut and split into cord-wood, dried and seasoned, and then retailed in small lots through the town. Coal was not used as fuel until after the incorporation of St. Louis, and then none was dug either in Missouri or Illinois. It was brought on rafts from a distance, often from as far as Pittsburgh, and in 1825 was sold, by *the cord*, for from one dollar and twenty-five cents to one dollar and fifty cents. The French families preferred charcoal, as they do in France to-day, and the smiths used no other fuel. Charcoal-burning was a regular industry among the French rural classes around St. Louis.

The act of March 3, 1805, reorganizing the government and Territory, did not go into effect until July 4th, and up to that day Harrison was still Governor and Hammond his deputy and acting commandant. Wilkinson, however, knew that Jefferson meant to commission him as Governor of the newly-organized Territory, and he was on the spot in St. Louis quite early in the year. He had a house in the village, and kept great state as commander-in-chief. In the spring he received a visit from Aaron Burr, then his confidential friend and intimate. Burr wished to go to Louisiana to consult with Daniel Clarke and Casa Calvo about his mysterious plans and projects, and Wilkinson not only gave him letters to them, but, to expedite the voyage, fitted out his ten-oar barge and sent him down the river gayly with a sergeant and ten men for escort and oarsmen. Burr reached New Orleans June 26, 1805. Ten days later Wilkinson was Governor of Missouri, or "Louisiana District."

Under this act (the effects of which are fully discussed elsewhere) the district of Upper Louisiana was separated from Indiana, with Wilkinson Governor. A Superior Court was created for the district, the judges being John B. C. Lucas, John Coburn, and Rufus Easton. This court sat in St. Louis, and these judges, with the Governor, all of them appointed by the President, constituted the Legislature of the Territory or district. Before the government under Wilkinson was organized, however, the Court of Common Pleas had had another session, its March term. At this there were eight justices present, Charles Gratiot presiding. The judges additional to those already named were Alexander McNair from St. Louis, and Richard Caulk, James Richardson, and John Allen from the country. Rufus Easton had been commissioned attorney-general for the district. John B. Belan was licensed to keep a ferry across the Missouri at St. Charles; same ferry rates allowed him as had been established before by the court. There was a special session of this court on April 15, 1805, to regulate licenses, its functions indeed being those of a levy court or board of county commissioners, in addition to its jurisdiction in jail delivery and the commission of the peace. It was determined that each ferry across the Mississippi should pay ten dollars a year license; that at St. Charles, ten dollars; that at Hensley, across the Missouri, six miles above St. Louis, five dollars. The license for billiard-tables was put at one hundred dollars each (the French citizens must have rebelled at this), and taverns five dollars. It was provided that shaved deer-skins were a legal tender for taxes at the rate of three pounds to the dollar in the winter months (October to April), but in the other months the payments must be made in cash. On April 29th

[1] His name was Victor Hab. John Mullanphy refused to pay his bill of seven dollars for boring a pump-stock, and Hab sued him. Mr. Darby, who tells the story, was Mullanphy's counsel. However, Mullanphy owned a brewery, and this pump was for service about the tubs and vats and not to bring up water.

there was another special session, at which Calvin Adams, André Andreville, and William Sullivan, of St. Louis, were licensed to keep tavern. At this session Sheriff Rankin was fined six dollars for "insolence and contempt of court." He appears also to have been removed, for when the June term arrived Josiah McLanahan presented his commission as sheriff, and Edward Hempstead was deputy attorney-general. It was also announced in court that the new Governor and judges for the Territory of Louisiana were expected to "arrive" on July 4th. Lucas and his associates did not in fact arrive until September.

Joseph Browne, who had served with Wilkinson and Claiborne in New Orleans, was appointed Secretary of the Territory. There was not much done by the Governor and his judge-legislature during that year. Lucas had other work to do besides his work on the bench and in the Legislature. Here his first associate was Return Jonathan Meigs, one of the Indiana judges, and prominent in Territorial organization with Harrison and others in the Northwest. Afterwards his associate was Otho Strader. He was also a commissioner of land titles, in association with Clement B. Penrose and James L. Donaldson, the board transacting much important business in 1806. In the mean time, acting in their legislative function, the Governor and the judges provided for an attorney-general for the Territory, to be appointed by the Governor. They separated the "Arkansas District" from New Madrid in 1806, June 27th, and provided for a "General Court" to be holden in St. Louis twice a year, May and October terms. After that date Wilkinson went South, to look after Burr and find a convenient opportunity to betray him, and in his absence Secretary Browne acted as Governor,—in fact, Wilkinson never resumed the Governorship, though appointed for three years (under the act of Congress), and the secretary for four years. Wilkinson did one good thing before he left. Jefferson was anxious to conciliate the French people of Louisiana and St. Louis in every way, and it was in pursuance of his wishes in this respect that Wilkinson recommended and the President appointed some of the sons of the leading French inhabitants to positions in West Point and the United States army. Charles Gratiot's son, afterwards Gen. Charles Gratiot, of the engineer corps, was one of these appointees, and a son of Auguste Chouteau was another. A son of Louis Lorimier, commandant and Indian agent at Cape Girardeau, was likewise appointed. In connection with the judges, provision was made for a clerk of the General Court,—a sort of Supreme Bench, or Court of Appeals, meeting twice a year. In 1807, when Frederick Bates had become secretary and acting Governor, the Legislature, consisting of Bates, Lucas, and Strader, adopted an important general judiciary act, reconstructing the courts and conferring new powers upon them. This act, bearing date July 3d, provided that the Governor should appoint for each district of the Territory five judges of the Court of Common Pleas and Quarter Sessions, to hold office for four years. Two judges were to constitute a quorum capable of holding court, and there were to be three terms per year in each district,—in St. Louis, the first Monday in March, July, and November. A Court of Oyer and Terminer and general jail delivery was also established, consisting of one of the judges of the General Court (of Appeals) and a justice of the Common Pleas for each district. The Quarter Sessions was given jurisdiction in all criminal cases save those which involved the penalty of death. These could only be tried in a General Oyer and Terminer, presided over by one of the General Court judges. There was to be one clerk for each district, appointed by the Governor. The General Court, or Supreme Court of Record, sat twice a year at St. Louis, meeting on the first Monday of May and October.

On July 4, 1807, the court-legislature took steps to have the districts divided into townships, and commissioners were appointed for that purpose. The next year, Meriwether Lewis being Governor, and Judge John Coburn sometimes acting as a legislator in conjunction with his colleagues Strader and Lucas, an "act concerning towns" was passed, under which St. Louis was first incorporated. Under the provisions of this act, two-thirds of the voters in any of the villages applying therefor could be incorporated by the Court of Common Pleas, the court reserving to itself the right to appoint two commissioners to superintend the election of five trustees to serve for one year. At this same session of the Legislature an act was passed to lay out a road from St. Louis to Ste. Genevieve, thence to Cape Girardeau, and thence to New Madrid. Acting Governor Browne had appointed Joseph W. Garnier clerk of the General Court Oct. 28, 1806.

While the Legislature was shaping the courts in this way, the Common Pleas had not been inactive. At December term, 1805, James L. Donaldson, a Baltimorean, was commissioned attorney-general of the Territory. The court agreed with Emilien Yosti to rent from him, for the next year, three rooms in his tavern for a rent of one hundred and seventy dollars. At the March term, 1806, we find Joseph Browne presiding justice, with Chouteau, Delaunay,

and Mackay associates. Browne had been commissioned presiding justice by Wilkinson. This Governor had also commissioned Andrew Steel as prothonotary of the court. The court had asked and obtained leave of the Governor to make use of the military guard-house (the old stone Martello tower) in the fort on the hill as a jail until a better one could be provided. James Smirl was, in 1806, licensed to keep a ferry across the Maramec at the mouth of Defend Creek, for ten dollars a year, and a road was ordered to be built from Carondelet to that point. There was a special term of the Quarter Sessions Oct. 8, 1806, at which Jacques Clamorgan, Bernard Pratte, and William Christy attended. Jeremiah Conner was now sheriff, and he protested to the court

"that the jail of said district in its present state is insufficient to secure prisoners, either those committed on criminal process or those committed on civil, as has been proved by the breaking of the prison twice within a short period back. He therefore prays this honorable court to take such measure in the premises as the necessity of the case and the safety of the district requires.

"The court having considered the same, and being convinced that the safety of the district requires that a guard be called of the militia of this district, for the purpose of securing the prisoners confined in the jail, do order that the commanding officer of the militia of this district be required to furnish a guard sufficient for the purpose above specified, until the jail be made sufficient to secure the prisoners, and that a copy of this order be sent to the commanding officer aforesaid without delay.

"Court then adjourned *sine die*."

At the December term of the court this year William Christy was licensed to keep tavern, and paid twenty-five dollars fees,—perhaps he paid for five years in a lump. The court, tired of inadequate accommodations, "ordered the houses in the garrison to be repaired for the use of the courts, and that a stove and wood should be furnished the jail." At the March term, 1807, secretary and acting Governor Browne made William Christy clerk of the Quarter Sessions, and the court granted a license to Nathaniel Carpenter to keep a ferry across the Mississippi opposite St. Louis, at twenty dollars per annum. At the June term, Silas Bent produced a commission from Frederick Bates (new secretary and acting Governor of the Territory), appointing him presiding justice of the Common Pleas. This was the first public act of Bates. Bent was also licensed to keep the "old ferry" to Cahokia, below the town, at twenty-five dollars. On July 1, 1807, the courts were reorganized, with Bent, chief justice; Chouteau, Pratte, and Labeaume, associates; Thomas F. Riddick, clerk; and Jeremiah Conner, sheriff. Bernard Pratte and Riddick were the commissioners assigned to divide the several districts into townships, and the taxable inhabitants of St. Louis township were returned at 257; St. Ferdinand, 205; Bonhomme, 126; and Joachim, 141.

The Court of Common Pleas now did not do much outside of regular business of the bench, equity, and the like, but its justices were associated with the judges of the General Court in several important cases in Oyer and Terminer. At the March term, 1809, Judge Bent presiding, the Secretary of the Territory returned into court a survey and plat of that part of the St. Louis and Genevieve road which lay in St. Louis County, and it was approved, and the road ordered to be "cut out." (Appropriate term for a road surveyed in great part through the primeval forest.) The licenses granted were, for taverns, at eighteen dollars each, to Rezin Webster, Joseph Leblanc, Charles Busro (Bosseron), Batiste Lebeau, Elijah Smith, André Andreville, and Emilien Yosti; Samuel Solomon to keep his ferry across the Mississippi at St. Louis for fifteen dollars, and Batiste Belan at St. Charles, twenty dollars.

On Aug. 14, 1809, there was a special term of Oyer and Terminer. A year before there had been a trial of two Indians for murder, but the court had acquitted them upon the ground of want of jurisdiction. They were now to try a white man for the same capital crime. On Monday, June 26th, at Lang's Mill, in Bonhomme township, St. Louis Co., John Long, the younger, shot and killed with a rifle George Gordon, his stepfather. The crime was a premeditated one, the assassin lying in wait. The court met on Monday, August 14th, J. B. C. Lucas presiding; Silas Bent and Auguste Chouteau, associates; Edward Hempstead, bearing the commission of attorney-general from Capt. Meriwether Lewis, now Governor of the Territory. The grand jury at once brought in an indictment against Long, and he was tried on the following Monday. The jury which tried him consisted of John Brown (of Coldwater), foreman; Daniel Hodges, Alexis Lalande, Antoine Barèda, Jacques Clamorgan, Michael Honoré, Benjamin Jilkinson, Thomas R. Music, Joseph Moore, Henry H. Shreeve, Peter Primm, and Joseph Philipson. They brought in a verdict of guilty of murder in the first degree, and the fact Lalande afterwards admitted on oath that he could neither speak nor understand a word of English did not prevent Long from being sentenced to be hung, and the sentence from being duly executed on Saturday, Sept. 16, 1809, —the first man ever hung in St. Louis, although the town had been in existence forty-five years. In 1811 there was another Indian tried for murdering his wife, but Henry Brackenridge successfully defended

him upon the ground of no jurisdiction, the Indians, in offenses against one another, being *feræ naturæ* in the contemplation of the law.

At the November term of the Court of the Common Pleas, 1809, under the rule of law granted this court by the Governor and judges of the general term acting as a legislature, a petition of sundry inhabitants of the town of St. Louis, asking that said town within certain specified limits should be incorporated, was received and examined. The court finding the petition to be signed by two-thirds of the taxable inhabitants residing in the said town, ordered the same to be incorporated, and the metes and bounds to be surveyed and marked, and a plot filed for record in the clerk's office. Under the charter so granted the town was to have five trustees, who were to act as commissioners in municipal concerns, and the court appointed David Delaunay and William C. Carr to be commissioners to supervise the election of the first five trustees.

This petition must have borne the names of about two hundred persons, for the assessors, more than a year before, had returned two hundred and fifty-seven taxables in St. Louis, the total number in the county being seven hundred and twenty-nine. These assessors were Bernard Pratte and Thomas F. Riddick, officially styled "Commissioners of Rates and Levies." The rates and levies are curious in themselves. We have already, in a previous chapter, given an assessment return of taxables and their estates for the year 1811. We present herewith a return of receipts and disbursements for the years 1807, 1808, and 1809,—a complete account of revenue and expenditures, as exhibited in the audited report of Jeremiah Connor, sheriff, collector, and treasurer of the district of St. Louis:

"*Jeremiah Connor, Collector and Treasurer of the District of St. Louis, in account current with said district.*

Dr.		Cr.	
To amount of tax-list for 1806, reserving to myself the right of receiving credit for taxes of insolvents and defaulters when the same can be accurately ascertained...	$1561.42	1807, June 1, by amount of disbursements for district, as per account and vouchers furnished, passed board commissioners and assessors this day.....	$1504.65
To amount of tax-list for 1807 with the above reservation.	1522.13	1808, June 22, by 20 per cent. for Territory on $1160, on amount of licenses for merchants, taverns, and ferries from July, 1806, to this date.....	232.00
To amount of tax-list for 1808 with the above reservation.	1060.71	" June 22, 20 per cent. from Territory on $2149.28, taxes collected for 1807 and 1808.....	429.85
1806, July 8, to amount of license money for merchandise, taverns, and ferries from 18th October, 1805, to 8th July, 1806.....	731.25	" June 22, 10 per cent. to collector on $1286.37, taxes collected for 1806.....	128.63
1808, June 23, to amount of license money for merchandise, taverns, and ferries from July, 1806, to date.....	1160.00	" June 22, 8 per cent. to collector on $1719.42, on district taxes, 1807 and 1808.....	137.55
1809, Feb. 1, to cash received from Bernard Pratte, Esq., treasurer.....	230.94	1807, June 1, 10 per cent. to same on $1358, amount of licenses for merchandise, taverns, and ferries from 18th October, 1805, to date.....	135.80
		1808, June 22, 8 per cent. to same on $518, for licenses on merchandise, taverns, and ferries from 1st June, 1807, to date.....	41.64
		" July 5, cash paid Bernard Pratte, Esq., treasurer, as per account passed.....	1342.37
		" July 6, cash paid Bernard Pratte, Esq., treasurer, as per account passed.....	397.00
		" Nov. 9, cash paid Bernard Pratte, Esq., treasurer, as per account passed.....	520.00
		" Nov. 10, cash paid Bernard Pratte, Esq., treasurer, as per account passed.....	188.00
		1807, Sept. 1, compensation as sheriff in lieu of such fees as are chargeable to the district from 18th October, 1805, to Sept. 1, 1807, at $50 per annum.....	93.46
		1809, July 1, by balance of taxes remaining uncollected for 1806, 1807, and 1808, including delinquencies by insolvents and defaulters.....	708.61
		" July 1, amount of auditor's certificate accompanying this and redeemed by said collector and treasurer.....	351.17
		" July 1, balance in collector's hands, to be accounted for when required.....	55.32
	$6266.45		$6266.45
1809, July 1, to amount on creditor side for taxes uncollected for the years 1806, 1807, and 1808 of date this day.....	$708.61		
" July 1, to amount of certificate of auditor on creditor side of this day.....	351.00		
" July 1, to amount of cash on hand on creditor side of this day.....	55.32		
	$1114.93		

"I have examined the above account, and find that Jeremiah Connor, Esq., is chargeable with eleven hundred and fourteen dollars and ninety-three cents, by and in favor of the district of St. Louis, on the accounts existing between him and the district prior to the 1st of January, 1809, and it appears that sum was due to the said district at that date.

"SILAS BENT,
"*Auditor for the District of St. Louis.*

"Nov. 1, 1809."

The figures are not formidable,—less than $2000 a year collected as revenue. The tax-lists for the three years aggregated only $4084, of which $708.71 was unpaid, net $3376. The receipts from licenses for merchandise, ferries, and taverns were $1891 for two years, so that nearly as much revenue came from licenses as from direct taxation. The economies of administration, in the light of the modern scale of expenditures, are simply bewildering. The idea of a sheriff, tax collector, and treasurer serving so cheaply as Mr. Connor did, and a court hiring three rooms in a tavern for $180, when it made a single billiard-table pay $100 for its license! This, however, was the rule in everything in the affairs of this still primitive people, who did not tax themselves severely because the public expenses were small. Appropriation bills were not too small, however, to be closely scrutinized and carefully audited, and we find the Territorial Legislature of 1815–16, sitting in St. Louis (William Clark, Governor; James Caldwell, Speaker of the House, and John Rice Jones, president of the Senate), tacking to their appropriation bill the proviso that "No moneys shall hereafter be drawn out of the Territorial treasury except by the order or warrant of the Territorial auditor and for which appropriation is made." At this time the pay of the entire Territorial judiciary (Circuit Court judges) only amounted to $2400 a year. Joseph Charless did all the public printing, including the laws, for $300. (In 1808 he had printed the first edition of the laws of the Territory of Louisiana, the first book ever printed in St. Louis, a volume of three hundred and seventy-two pages.) That session the Legislature rented two rooms from Madame Susannah Dubreuil to sit in, paying her $105 rent, and Peter Chouteau, Jr., rented it a furnished room for its sessions for nine days, only charging $27,—$3 a day. John S. Russell furnished the Territory with two dozen chairs for $69,—$2.87½ each.

Property, however, was not very high yet, and people could not have stood up against any very heavy taxation. An old deed, a curiosity in itself, as illustrating the obsolete forms of ancient conveyancing, proves this. It is given to secure title in a sale of a lot on the northwest corner of Pine and Main Streets, and is translated from the original French, as follows:

"Know all who these presents shall see, that we, Charles Bosseron, and Thérèse Brazeau, my wife, on the one part, and Louis Letourneau, *dit* Lafleur, and Marie Bissonette, my wife, on the other part, have stipulated and do rest agreed upon the conditions, exchange, and trade as it is hereafter mentioned, to wit: That we, Charles Bosseron, and Thérèse Brazeau, my wife, make over to the said Letourneau, *dit* Lafleur, all our rights and claim upon a certain lot of ground acquired by us of Master Jemien Beauvais at the date of the 30th of March, in the year one thousand eight hundred and seven, such as it is, together with the house thereon, and in the same manner as we acquired it of the said Jemien Beauvais, reserving nothing thereof; and we promise to warrant the said lot unto Louis Letourneau, *dit* Lafleur, against any disturbance in general whatsoever, intending that the said Louis Letourneau, *dit* Lafleur, his heirs and legal representatives, shall enjoy the same as a property with full title. And we, Louis Letourneau, *dit* Lafleur, and Marie Bissonette, in consideration of the trade hereinabove mentioned, do make over to the said Bosseron, his heirs and legal representatives, all our rights of property on a certain lot of ground situated in the town and district of St. Louis, Territory of Louisiana, sixty feet front by one hundred and fifty feet in depth, which lot is bounded on the south by a cross street, on the north by Pierre Ladoucer, on the east by the great street, and on the west by Louis Provenche, upon which is located an old post-and-mud house, and which lot we sell and make over to the said Bosseron, reserving to ourselves nothing thereof, and intending that he shall enjoy the same as a property to him, his heirs and legal representatives, belonging, and so that neither we, nor our heirs, may ever act contrary thereunto; and we warrant unto the said Bosseron, his heirs and legal representatives, the said lot and house, against every debt, hypothecation, and other incumbrance generally whatsoever, and the said lot to relinquish in consideration of the trade hereinabove mentioned; and in consideration further of the sum of one hundred and fifty dollars in deer-skins, at the rate of two and a half pounds to the dollar, which we acknowledge to have received to our satisfaction, and for which sum we acquit the said Bosseron, and give him full and complete discharge. In faith of which we have signed and fixed our usual marks to this contract, in presence of two witnesses.

"(Signed) his
"LOUIS ⋈ LETOURNEAU DIT LAFLEUR.
mark
her
"MARIE ⋈ BISONETTE.
mark
"THÉRÈSE BRAZEAU [Seal].
"CHARLES BOSSERON [Seal].
"Done in duplicate, and signed and sealed in presence of
"ANTOINE DANJEN,
"PIERRE LADOUCER."

The acknowledgment was before Bernard Pratte, and is similar in diction to the acknowledgments of the present day.

It is said that old Madame Lafleur (Marie Bissonette) would not sign this deed and abandon her dower-rights in her old homestead until Charles Bosseron had agreed to give her and had made actual delivery to her of eighty pounds of coffee,—fragrant and mild coffee of Santo Domingo, such as the French *habitans* delighted in, but which now, alas! is no longer more than a tradition upon the most fertile and the most neglected of islands.

On Oct. 11, 1809, Governor Meriwether Lewis killed himself, in the Chickasaw country, while following the "Tennessee trace" on his way to Washington. He was subject to melancholy, was suffering at the time from malarial fever, and appears to have had

a presentiment of his death before leaving St. Louis. At any rate, before starting upon his journey, he executed the following very full power of attorney,—a deed of trust, in fact, which made it unnecessary for him to leave a will:

"Know all men by these presents, that I, Meriwether Lewis, of the town of St. Louis and Territory of Louisiana, have nominated, constituted, and appointed, and do nominate, constitute, and appoint William Clark, Alexander Stuart, and William C. Carr, all of the same place, my true and lawful attorneys, for me, and in my name to satisfy, pay, and discharge all debts and demands which I may owe or which may be presented to them against me, of the accuracy and justness of which they or a majority of them shall be satisfied; and generally to arrange, adjust, and liquidate all demands, both for and against me, during my absence from the said Territory, and the same when so arranged, ascertained, or liquidated, to receive and grant receipts and acquittances therefor in my name, or to pay and discharge and to accept and take receipts and discharge therefor in my name. To effect which purpose more fully and completely, I do hereby authorize and empower my said attorneys or a majority of them to sell and convey by legal deed all or any part or parts of my property, real or personal, within the said Territory of Louisiana, and therefor to execute a deed or deeds to the purchaser or purchasers, either at public or private sales, as my said attorneys or a majority of them may think most conducive to my interest, hereby ratifying and confirming whatever my said attorneys or a majority of them shall do or cause to be done for me in the premises.

"In testimony whereof I have hereunto set my hand and affixed my seal, at the town of St. Louis, this nineteenth day of August, eighteen hundred and nine.

"(Signed, sealed, and delivered),

"Meriwether Lewis [Seal].

"Jeremiah Conner,

"Samuel Solomon.

"Recorded this 18th day of December, 1809.

"M. P. Leduc, *Recorder*."

Lewis was the successor of Wilkinson (with the interregnum during Wilkinson's absences, when the affairs of the executive were administered by the Territorial secretaries, Joseph Browne and afterwards Frederick Bates). He was succeeded by Benjamin Howard, who came to St. Louis in 1810.[1] William Clark was Governor after Howard received his command in the army, and he continued in office until Missouri was admitted as a State in the Union and elected its own Governor.

As soon as the Territorial Legislature had passed the law concerning towns, in 1808, July 23d, an election had been held for trustees for St. Louis, and Auguste Chouteau, Bernard Pratte, Edward Hempstead, and Pierre Chouteau and Alexander McNair were elected. This was decidedly premature, as the court did not grant a charter to the town until more than a year afterwards, and the trustees did not go into office in fact until January, 1810.

It is unfortunate that the little of these old court records which has come down to us is fragmentary and defective. The record appears sometimes to be touching upon the edge of a romance, or about to disclose a series of facts and figures of value in politico-economical respects, when, presto! the curtain drops, and the subject is dropped with it. To seek to supply the lacking record by an exercise of the imagination is as useless as the task of the poet who tried to call up "him who left half told the story of Cambuscan bold." We know that the courts, General and Superior and Circuit, as well as Common Pleas, sat in St. Louis from 1804 to December, 1806, in the house of Emilien Yosti, southwest corner of Main and Locust Streets, and that after that, for at least ten years, they occupied different rooms in the old stone house in the "garrison" "on the Hill." The jail was just in front of this, in the old stone martello tower in the fort, which had before that been used as a guard-house for the confinement of both Spanish and United States soldiers. The first jail was in an old stone house belonging to Jacques Clamorgan, at the upper end of Main Street, but this was so insecure, and so many prisoners escaped from it, that a part of the militia had to be called out to aid the sheriff in doing guard duty. Then it was that Wilkinson, always generous, lent the old guard-house tower to the town for a jail. He could do this the more easily because he was already removing his garrison to his newly-bought cantonments at Bellefontaine. When that removal was completed, the officers' quarters, the old stone house in the fort, became vacant, and the courts asked and received permission to convert it into a court-house.

We know that these courts contained many eccentric characters, for example, Judge Beverly Tucker, of the St. Louis Circuit Court, resident of Florissant, who established his law-office in the hollow of a sycamore-tree, with a knot-hole for a window, and with

[1] Benjamin Howard was a man of prominence in a day of giants. He was born in Lexington, Ky., the son of a pioneer, John Howard, who had moved to Boonesborough, the second settlement in that State, as early as 1774. John Howard was a Virginian, possessed an estate in Bedford County, and was himself a man of education, having been a pupil under the teaching of the famous Dr. Samuel Davies, afterwards president of Princeton College. Howard took an active part in the war of the Revolution, fought at Guilford Court-House, and was charged and left for dead on the field by Tarleton's troopers, who succeeded in giving him five wounds without killing him. He lived to be one hundred and four years old. His son Benjamin entered public life early, serving in the Kentucky Legislature in 1800, an almost immediate predecessor of Henry Clay. He was Governor of Indiana Territory, member of Congress from Clay's district in Kentucky, Governor of Missouri Territory, and general in the United States army, dying suddenly in St. Louis in 1814 while still in the service.

his books arranged honeycomb fashion on shelves inside and around the stump. But how little of this oddity do we get from the record of proceedings! We know the quick, impulsive character of these people of the West, and how some of their brightest and bravest men went upon the bench. No one could expect John Smith T. to efface himself because he happened to be a judge, as he indeed became. But very little of all this appears upon the records. The nearest approach to facetiousness we have found is in the fully-reported examinations of a witness suspected and brought up for contempt, and this it is worth while to give in full:

"1809, June 1st, Court of Oyer and Terminer, held by Judge John B. C. Lucas and Silas Bent.

"A case against one Samuel Nugent, for assault, came on for trial, but owing to the absence of one Nancy West, an important witness, the trial was deferred until the following day, and the sheriff ordered to bring in the witness on an attachment. On the next day the sheriff had his witness in court to purge herself of the contempt, when the following colloquy took place between the court and the witness:

"*Q.* What was your reason for disobeying the summons served on you to appear yesterday?

"*A.* I thought that having appeared once before the grand jury, and given in my testimony, that I needn't appear any more.

"*Q.* Did you know or did you not know the contents of that summons?

"*A.* I did not know the contents, and thought once appearing was enough.

"*Q.* Did the sheriff inform you of the contents of the summons?

"*A.* The sheriff served a summons on me.

"*Q.* Did any person advise you not to appear?

"*A.* No person advised me. When I went away from Mr. Kinney's, Mrs. Kinney asked me where I was going. I said I was going to Mr. Webster's but I didn't go to Mr. Webster's, but went away to some other place, and didn't return until evening.

"*Q.* Did you or did you not hear that Samuel Nugent was to be tried on yesterday for a capital crime, and that your testimony would be wanted?

"*A.* I did hear that Samuel Nugent was to be tried.

"*Q.* On what day did you hear that said Nugent was to be tried?

"*A.* I don't know.

"*Q.* Did you or did you not know that your testimony would be wanted when said Nugent should be tried?

"*A.* I had given in my testimony once, and I thought that that was enough.

"*Q.* Did you or did you not go away from Mr. Kinney's yesterday morning with an intention of avoiding the process of the court?

"*A.* If I had had an intention of keeping out of the way, I would not have come back in the evening.

"The court for the present postponed further examination, and ordered that Nancy West remain in the custody of the sheriff. The trial of Nugent then proceeded, and he being found 'not guilty' by the jury, was discharged.

"Nancy West was then called up a second time, and then saying she did not go away from Mr. Kinney's to avoid the process of the court, that she intended to return this day if her testimony should be wanted, that she had never been a witness before in a court of justice, and therefore felt an embarrassment,

"Therefore the court discharged her from the attachment.

"JOHN B. C. LUCAS,
"*Presiding Justice.*"

But Judge Lucas appears to much greater advantage in the lively pages of Mr. Darby, as, for instance, in Judge Peck's court, where, when he came forward at the judge's own suggestion, as *amicus curiæ*, to give an outline of proceedings such as held in the courts in St. Louis, matters of which Judge Peck had no knowledge, Mr. Lawless challenged his right to speak in the court at all, as he was not a licensed attorney at the St. Louis bar. Judge Lucas turned upon him (he himself had admitted Lawless to practice, not because of his acquaintance with the law, but as a friendless Irish exile) and said, "If the court please, I *am* licensed. I am licensed by the God of heaven. He has given me a head to judge and determine, and a tongue to speak and explain." Then this excellent scholar and gentleman did speak and explain his various qualifications and numerous public services, as well as his opponent's deficiencies and the mistaken cause of his animosity against him, concluding with, "May it please the court, I did not come to this country as a fugitive and an outcast from my native land. I came as a scholar and a gentleman upon the invitation of Dr. Franklin."[1]

On the 18th of June, 1812, war was declared by the United States against Great Britain, and the reception of the news in St. Louis was naturally the occasion of great excitement. A number of military companies were formed for the defense of the town, and some of them, it is said, fought against the Indians as part of the expedition under Gen. Harrison. Being so distant from the theatre of war, however, St. Louis was not seriously threatened by the British military operations, except from the disaffection among

[1] Lucas and Lawless hated one another, and they had reason to do so, for Lawless had been second to Thomas Hart Benton in the malignant duel in which the judge's son, Charles Lucas, was slain. This was an act which the Lucases never forgave, nor could they be expected to do so, for the manner in which Benton pursued Charles Lucas was malevolent in the extreme. Mrs. Hunt, Charles Lucas' sister, relates that she made her father change her place of residence after this duel for fear she might chance to encounter Col. Benton in some of her walks, and it is reported that among the last acts of the veteran senator's busy life was that of destroying all papers in his possession relating to the duel. The encounter made such a profound and painful impression upon the elder Lucas that he prepared a statement concerning the affair, as if he thought it incumbent upon him to vindicate his son's memory. This statement will be found elsewhere under the head of "Duels."

the Indians fomented by English agents. In Missouri there were a number of isolated murders by hostile Indians, but no regular invasion, owing to the failure of the English emissaries to excite the Missouri tribes. Their want of success was due in large measure to the close relations which had long existed between the St. Louis merchants and the tribes of the Missouri River, and only the more desperate savages could be induced to commit depredations on the whites. Near Florissant and Côte sans Dessein a number of murders were committed, and similar outrages occurred in other portions of the Territory; but neither at St. Louis nor in the immediate vicinity was any organized attempt made to murder or to pillage.[1]

Considerable loss, however, was inflicted on the merchants of St. Louis by the interruption of their trade of the Mississippi, caused by the Indian outbreaks, the value of the traffic of the Mississippi valley above the mouth of the Missouri in lead, furs, and peltry having amounted in 1812 to one hundred thousand dollars.

The following announcement appeared in the *St. Louis Republican* of July 26, 1808:

"It is with heartfelt pleasure we announce the patriotism displayed by the St. Charles troop of horse, a few days ago. They offered their services to accompany Gen. Clark up the Missouri, in order to protect and assist in the building of the intended fort at or near the Osage River."

On the 13th of July, 1812, Capt. William O. Allen, United States infantry, opened a recruiting rendezvous in Ste. Genevieve.

[1] . . . "In Missouri so well was the Indian character understood that there would have been very little trouble had not the English, on the declaration of war in 1812, according to their custom, sent their emissaries into the country of the savages and used every artful and mercenary motive to incite them against the Americans. Yet on the Missouri their efforts were nearly fruitless, only some of the reckless belonging to some of the tribes consenting to take part in the English cause. This was owing in a great measure to the fact that the whole trade of the Missouri was under the control of merchants in St. Louis, and the supplies furnished by them, which served at first as a qualification of luxury, by habitual continuance became a necessity. The Indians could no longer do without their powder, ball, guns, blankets, vermilion, etc., since they had been furnished so long with these articles that their natures appeared to have undergone a change, had adapted themselves to their uses and demanded a continuance. They were careful, then, not to commit themselves by any approved act of hostility towards the American government, and were not to be moved by the artful persuasions and presents of the British emissaries. Whenever it was known that any of the tribe had committed murder among the whites, they were immediately given up to the ruling chiefs, and this summary mode of expressing their disapprobation intimidated the young warriors, who were anxious on every pretext to sound the war-whoop and enter on the war-path."—*Edwards' Great West*, p. 307.

The President's proclamation declaring war against Great Britain was received in St. Louis early in July, and on the 11th a town-meeting was held, at which Charles Gratiot presided, and James B. Hull acted as secretary. At this meeting, "convened pursuant to adjournment and by public notice at the court-house," the following preamble, with the accompanying resolutions, were unanimously adopted:

"With sensations of profound satisfaction in the conduct of the constituted authorities of our country, with feelings in perfect unison with those of our brethren throughout the United States, we, the citizens of the town and district of St. Louis, hail the tidings announced from the seat of the general government on the 19th of the last month. The grand, the all-important crisis has at length arrived,—a crisis invoked by the ardent expectation, the longing wishes of an injured people, hallowed by the voice of patriotism and the pledges of honor. We are at war with the most powerful nation on earth, yet we rejoice! Posterity will consider as fabulous, contemporary powers will call it infatuation and insanity that a people should hail with acclamation and joy that event which is in general considered as the scourge of nations and the curse of God. In the history of our intercourse with England, however, we find the solution of this moral enigma, the analysis of this strange sensation. From British outrage and wrong, deep, damning, and discrediting, we derive motives for our acquiescence, reasons for our exultation. The proffered cup of reconciliation has been indignantly dashed to the earth. The voice of honest expostulation, nay, that of whining entreaty has been contemptuously spurned. Under circumstances of continued offense and degradation, aggravated by every refinement of cruelty and treachery, beset by artifice which it was impossible to evade, charged with an ambition that was never indulged, and with practices that were never countenanced, having our institutions belittled by derision and menaced by destruction, the gauntlet of warfare has been thrown down, and we rejoice that our government has taken it up. The sacred citadel of our nation's honor has been violated, the unwarrantable breach must be repaired, the foul stain must be wiped away ere our indignation ceases or our vengeance slumbers. The past wrongs of England from this day cease to recount. Against her future we hurl haughty defiance!

"In the spirit of this declaration, we consider that we owe to our beloved country to meet the dangers which menace its existence; that we owe it to the government of our choice and approbation to furnish our proportion of that support which may enable it to meet every emergency and chastise every insult; that we owe it to the shades of our murdered, and to the sufferings of our imprisoned fellow-citizens to avenge their deaths and their wrongs; that we owe it to ourselves and our children to preserve inviolate the charter of our liberties, and to transmit it as unsullied as unimpaired to posterity.

"*Resolved, therefore, unanimously*, That we warmly participate in the feelings, and highly approve of the proceedings of our government on this awful and important occasion. That we repose entire confidence in the Executive Magistrate of this Union. That, elevated as he is to the most enviable station of the world, enjoying and supported by the voice of a free and high-minded people, we entertain no doubt that he will terminate that gloriously which he has commenced so auspiciously.

"*Resolved, unanimously*, That since the appeal has been made to war, we do hereby offer whatever sacrifice may be required of us of blood and treasure to heal the wounded honor and regain the ravished rights of our injured country.

"*Resolved, further, unanimously,* That the thanks of this meeting and of this Territory are due to our enlightened, patriotic, and justly popular magistrate, Governor Howard. That we gladly recognize in him the capacity to discern and the zeal to execute his duty; and that we consider that it is to his judicious circumspection and vigilant forecast we are indebted for our security from the merciless savages hovering on our frontiers. That our confidence in his future plans of protection and defense is complete, and that our co-operation will be prompt, as we trust it will be successful.

"*Resolved, unanimously,* That as one object of this meeting was to devise some plan of protection, and to procure some munitions of war for the defense of the town, and having understood from the brigade quartermaster that our faithful and alert Chief Magistrate had himself taken the subject into consideration, and was maturing a plan for that purpose, our further attention to this subject is at present unnecessary, and that we hold ourselves in readiness to execute whatever he may project, to perform whatever he may recommend.

"*Resolved, unanimously,* That having learned that several companies of volunteers belonging to the State of Kentucky have generously offered their services to the Governor for the protection of this territory, the thanks of this meeting be offered to the said volunteers. The evils of our exposed situation are alleviated by the assurance that we have in our neighborhood hearts to feel for our possible sufferings, and hands to relieve them.

"*Resolved, unanimously,* That the proceedings of this meeting be published in the paper of this place, and in one of the gazettes of Lexington, Ky., and that a copy of them be transmitted by the chairman to the President of the United States.

"CHARLES GRATIOT, *Chairman.*

"JAMES F. HULL, *Secretary to the Meeting.*"

During the summer of 1812 St. Louis was seriously alarmed at the prospect of an attack by the Indians, and on the 26th of September the following announcement appeared in the *Gazette:*

"In our last we announced information received of the movements of the Illinois Indians, communicated by our spies. Upwards of four hundred moved to the borders of the Mississippi about twenty miles from this place, and a party of them crossed the river to the neighborhood of the village of Portage des Sioux, and shot and wounded a man and his wife, stole eight or ten horses, killed a cow, and took off the beef. In the interim our spies fell in with the trails of the main body on the east side, and shot two Indians.

"Governor Howard having placed the volunteers in such positions as to be able to act at any point, and Capt. McNair being stationed near, he crossed over to reconnoitre with forty-eight men, who having some spies in advance, discovered the number of the enemy too great to justify the pursuit, and the party returned and kept a good lookout. Capts. Musick and Price ascended the Illinois, and captured a number of canoes, in one of which was some of the beef the Indians stole from our side of the river. Upwards of seventy canoes escaped up the Illinois.

"Since the above was put in type we have received a letter from Dr. Farrar, who acts in the double capacity of surgeon and soldier, as follows: 'The country on the opposite side of the river swarms with savages; a party of them crossed over within a few miles of this place, and burned one house and robbed another. Fortunately none of the inhabitants were killed; sixty men are gone in pursuit.'"

On the 10th of October the following was published:

"Some days ago a body of Indians, supposed to be about four hundred, and believed to have had an English chief at their head, descended the Illinois in canoes within twenty-five miles of the mouth, left them and crossed over to the Mississippi, but a few miles distant, but fortunately the most of our troops in actual service had been drawn to the settlements which these savages intended to attack. Spies were kept out east of the Mississippi in Illinois Territory. They met the spies of the Indians, killed and scalped one, and wounded another. Our spies crossed to camp, and a party pursued, but found that the Indians had crossed the Illinois River. The armed boat at the mouth, commanded by Capt. Price, ran up the Illinois, and found that the Indians had embarked in canoes. The captain followed them so closely that they abandoned eight of them, and left some provisions. The river being too low he returned. The Governor upon the receipt of this news went immediately up, in the expectation of the Indians being near our frontier, and that our troops would be brought to bear upon them at once, but finding that they had gone he dispatched two hundred fine men under the command of Maj. Dodge, to cross the Mississippi high up, and endeavor to intercept those who retreated by water."

A dinner was given by a large number of citizens on the 21st of November, 1812, to Governor Howard, as a mark of their appreciation of his efficacy in the measures taken by him for the defense of the Territory. Maj. C. P. Penrose presided, and Maj. George Wilson was vice-president.

Many citizens of St. Louis besides Gen. Howard entered the army at this time. Conspicuous among them was John O'Fallon.

St. Louis has been fortunate in many respects; in none, perhaps, more fortunate than in her leading citizens, the men who, with loyalty, enterprise, and skilled judgment all equally unsurpassed, nay, unequaled, have united to direct the city's undertakings as if they were their own personal ventures. In such men, brief as is the chronicle of the city's life, St. Louis has been particularly rich,—so rich that when we come to select the one who should be crowned without cavil as the first citizen, doubt and embarrassment inevitably arise. St. Louis has had so many leading citizens that none can be declared conspicuously and in every particular the first, yet it seems likely that if a ballot were to be taken to-day, or could have been taken in 1860, in 1850, or in 1840, or in 1830 even; a majority of suffrages, indicative of the public esteem and the popular affections, would have fallen into the box bearing the name of Col. John O'Fallon. Nor would such a result from such a ballot have implied any injustice either to the Chouteaus or to John B. C. Lucas, or to the Gratiots, to Hempstead or Ashley, or Darby or Benton. The worth of all these citizens, their benefits to the community, the remarkable advantages it derived from

their generous, unselfish, and intelligent co-operation in the promotion of what was good for the city, and in the suppression of what might have been injurious, we believe to be well understood, and fully and heartily appreciated. As respects civic qualities simply, that rare co-ordination of intelligent purpose, strong will, and generous control of large means to a single end of the advancement of home interests upon straight and prudent lines, we suspect that the majority of persons who read and reflect will agree with us that John B. C. Lucas was the first citizen of St. Louis. But where Lucas compelled a general appreciation and a universal respect and esteem, O'Fallon went further and gained love and affection. The people were anxious to have him lead them because they trusted him; they were glad to see him lead because they loved him. The matter and substance of John O'Fallon's gifts to and work for St. Louis had a positive magnitude of their own not surpassed except by one thing, but that was the manner, the grace, the single-hearted purpose of the donation in every instance. He not only gave to but for St. Louis, and in no instance can it be justly said that in these beneficent acts was there a single recurrence of the afterthought, "I am giving back to John O'Fallon." On the contrary, no matter how full the pocket might be, the heart was always fuller.

John O'Fallon was born near Louisville, Ky., Nov. 17, 1791. His mother was Frances ("Fanny," as she was commonly known) Clark, youngest sister of Gens. George Rogers and William Clark. His father was an educated Irish gentleman of ancient lineage and high social standing in his own country and prominent official rank in that of his adoption,—a surgeon in the Continental army during the Revolutionary war and under Gen. Washington. From some memoranda made by Col. O'Fallon in 1836 and found among his papers after his death we extract the following: "My father, Dr. James O'Fallon, died in Louisville in 1793. . . . Previous to his death he prepared for his children the genealogy of his family. He was the son of William and Anne Eagan O'Fallon, of Ballyna House, and had two elder brothers, Malachi and Redmond. James O'Fallon was descended from Malachi O'Fallon, prince of the Desies, who, with O'Ryan of Idrone, commanded the Irish in the year 1170, the time of the Anglo-Norman invasion, and made the attack upon Earl Strongbow on his arrival at Waterford.[1] The O'Fallons afterwards moved to Roscommon, and were chiefs of an ancient territory called 'O'Fallon's Country.' My father was born near Athlone. . . . In the year 1790 he was married to Frances Clark." He left two sons, John and Benjamin, dying, as we have seen, in 1793, when his elder son was but two years old.

John O'Fallon was born at Mulberry Grove, near Louisville. The second son appears to have been born at Lexington, Ky. Not long after Dr. O'Fallon's death his widow married Charles M. Thruston, and upon his death took for her third husband her cousin, Dennis Fitzhugh, of the well-known Virginia family of that name. She survived all three of her husbands. As soon as John was old enough he was sent away to school at Danville, to an academy there which later became the nucleus of Centre College. The orphan boy was much and carefully looked after by his uncles, William Clark and Maj. Croghan. A son of the latter, who entered the army with O'Fallon and distinguished himself greatly by the defense of the fort at Sandusky against Proctor and Tecumseh, was at school with John O'Fallon.[2]

[1] Col. O'Fallon refers to Smith's "History of Ireland." But, in fact, O'Donovan, in his curious and valuable researches into Irish genealogy, traces the O'Fallons back to the memorable battle of Clontarf, in 1014 A.D., at which Brian Boru (ancestor of the O'Briens of Thomond, and king of Ireland) was slain. Among the chieftains who fought under Brian's standard against the Danes in that contest was Mothla, son of Faolan, chief of the Desii of Munster. Mothla led his father's clan in the fight, and afterwards they were called the O'Faelans or Phelans, later O'Fallons.

[2] There are some pleasing evidences in Col. O'Fallon's correspondence of the esteem and concern of these uncles for the two boys. We append a letter from each of these gentlemen to John while they were at school:

William Clark to John O'Fallon.

"LOUISVILLE, Aug. 25, 1807.

"MY BOY,—I received your two letters, the first as I was about setting out from St. Louis, and the last on the 12th of July, by yesterday's mail from the westward. I am much pleased to receive a letter from you, particularly when I observe in them the progression you are making in your education; you inform me that you are left quite alone, deprived of your relations, John, and George Croghan; this change was no doubt disagreeable to you at first, but by this time you most probably have found young gentlemen in whom you can confidently rely. Be cautious in the choice of your friends; let them be characters suited to do you both justice and honor. You are now of age, and look forward to a future day, and estimate the value of your respectable friends and a good education. You inform me that your studies are Latin, Greek, and geography. I shall leave your education to Mr. Priestly. My wish is for you to prepare yourself for some profession, which cannot be determined on at your present age. I shall send up the money due for your board and schooling by the first safe hand. Your Uncle George will send Kitt up for you in September, at which time I shall see you and have some conversation on the subject of your education.

"Your brother Benjamin, and Charles, William and George Clark, and a boy I brought with me from the Illinois will go shortly to Mr. Fay's school.

"Your relations in this quarter are well; your sister Ann has

school.

"Your relations in this quarter are well; your sister Ann has

Jno. O. Fulton

r sister Ann has

After John O'Fallon left school at Danville, his brother Benjamin went to St. Louis to school, under the guardianship of his uncle, William Clark, while John went to Lexington (in 1810), probably to "finish off" in the nascent college there. The letters of his brother to him here show a great affection between the two lads.[1] In the fall of 1811, John O'Fallon marched with the mourted volunteers from Lexington and Louisville under Joseph Hamilton Daviess to join in the campaign against the Indians. It was at this time that O'Fallon met Gen. Harrison, and made an acquaintance which probably shaped his destinies through life. In the desperate battle of Tippecanoe, in which Tecumseh was defeated and Col. Daviess and many another valuable officer killed, O'Fallon was severely wounded. He probably went from the battlefield to St. Louis, at least he was there in the early part of 1812. For some reason or other O'Fallon

had sore eyes; they are nearly recovered. Do not fail to write me frequently, and inform me every particular respecting your situation, and believe me to be your affectionate uncle,

"WILLIAM CLARK."

William Croghan to John O'Fallon.

"LOCUST GROVE, March 31, 1808.

"DEAR JOHN,—I am sorry it is not in my power to send another Horse for you and your cousins to Ride home, but I hope the three I send will Carry you home; they are Strong and Carry Double, and by Changing places and Horses it would not be tiresome to any of you.

"George Informs me the Vacation will take place to-morrow; to-morrow Evening James will be with you, that you may Start on Saturday Morning. We Shall expect to see you and your Cousins, George and William, on Sunday Evening. Don't disappoint us.

"I am with great esteem,

"Dear John, your affectionate uncle,

"W. CROGHAN.

"Mr. Fitzhugh Sends you Ten Dollars by James, which is with the money I send to George."

Maj. Croghan had the greatest esteem for John O'Fallon; read his letters during the war with close attention, and consulted the youth even about the most delicate matters. Thus, after the brilliant defense of Lower Sandusky, his son George, who appears to have been not more of a penman than his father, wrote no word about the proud achievement to the old gentleman. The latter, greatly worried, wrote to O'Fallon about it, saying that he feared there might be some reason for his son's silence, something discreditable to him in the action. If so, he wanted to know the truth. O'Fallon, to settle the matter, sent Col. Croghan his son's first official report to Gen. Harrison of the battle, and consequently that precious paper appears among the O'Fallon manuscripts. It is as follows:

"LOWER SANDUSKY, August, 1813.

"GEN[l] HARRISON: *D[r] Sir*,—I have the honour to inform you that the combined force of the Enemy, amounting to 600 Regulars & about a 1000 or 1500 Indians, under the immediate command of Gen[l] Proctor, made its appearance before this place early on Sunday evening last; and so soon as the General had made such a disposition of his troops as could cut off my Retreat, should I be disposed to make one, he sent Col[o] Elliott, accompanied by Maj. Chambers, with a flag to demand the surrender of the Fort, as he was anxious to spare the effusion of blood, which he should probably not have it in his power to do should he be reduced to the necessity of taking the place by storm. My answer to the summons was that I was determined to defend the place to the last extremity, and that no force, however large, should induce me to surrender it.

"So soon as the flag had returned a brisk fire was opened upon us from the Gunboats in the River & from a 5½ Inch Howitzer on shore, which was kept up with little intermission throughout the night. At an early hour the next morning three sixes (which had been placed during the night within 250 y[ds] of the Picketts) began to play upon us, but with little effect. About 4 o'clock P.M., discovering that the fire from all his guns was concentrated against the North Western angle of the Fort, I became confident that his object was to make a breach, and an attempt to storm the work at that point. I therefore ordered out as many men as could be employed for the purpose of strengthening that part, which was so effectually secured by means of bags of flour, sand, etc., that the picketting suffered little or no injury. Notwithstanding which the enemy, about 5 o'clock, having formed in close column, advanced to the assault of our works at the expected point, at the same time making two feints on the front of Capt. Hunter's lines. The column which advanced against the N. Wes[n] angle, consisting of about 450 men, was so completely enveloped in smoke as not to be discovered until it had approached within 15 or 20 paces of the lines; but the men being all at their posts and ready to receive it commenced so heavy & galling a fire as to throw the column a little into confusion; being quickly rallied, it advanced to the outer works & began to leap into the ditch; just at that moment a fire of grape was opened from our six-pounder (which had been previously arranged so as to rake in that direction), which, together with the musquetry, threw them into such confusion that they were compelled to retire precipitately to the woods.

"During the assault, which lasted about half an hour, an incessant fire was kept up by the enemy's artillery (which consisted of five sixes and a howitzer), but without effect. My whole loss during the siege and assault was one killed and seven slightly wounded. The loss of the enemy in killed, wounded, and prisoners must exceed two hundred and fifty; one lieutenant-colonel, a lieutenant, and fifty rank and file were found in and about the ditch; those of the remainder who were not able to escape were taken off during the night by the Indians. Seventy stand of arms and several brace of pistols have been collected near the works. About three in the morning the enemy sailed down the river, leaving behind them a boat containing clothing and a considerable quantity of military stores. Too much praise cannot be bestowed on the officers, non-commissioned officers, and privates under my command for their gallantry and good conduct during the siege.

"Yours, with respect,

"G. CROGHAN,

"*Major 17th Inf., Com'd L. S.*"

[1] We are in the debt of Mr. Benjamin O'Fallon, of St. Louis, Col. O'Fallon's son, for the opportunity of examining a part of Col. O'Fallon's correspondence, from 1807 down to a short time before his death. This includes all his letters to his mother and Mr. Fitzhugh while he was in the army, together with his intimate correspondence with President Harrison and other public men, and this fund of original matter has enabled us to enrich the present sketch in a way which readers will appreciate.

was deeply hurt at some harsh treatment received by him at the hands of Col. Davless,—an injury which somehow he could not forget, and for which he seems to have been accorded the warm sympathy of his friends.

O'Fallon was now associated with his uncle, Gen. William Clark, the Indian agent for Missouri. He was sent on various errands of importance,—up the Illinois River to escort a band of Indians whom Clark was going to take on to Washington with him, and to Louisville and Pittsburgh by water to convey twenty thousand dollars' worth of deer-skins belonging to the United States. At this time already he had the army in view, and he writes (April 26, 1812) to his mother to say that "Governors Howard and Edwards have such confidence in my military turn of mind and other requisite properties thereto that they have forced me to permit them to apply for a captaincy for me in the new-raised army, assuring me that the present late period will not be out of season for me." The application was made, the war broke out, but O'Fallon's captaincy dwindled to an ensign's appointment (as from Kentucky) in the First United States Infantry. This was received Sept. 12, 1812.[1] The young man was greatly chagrined at being commissioned in so low a grade, the more so from the fact that his cousin Croghan received a captain's rank. He was compensated, however, by the confidence in him shown by his fellow-officers, and by being received into Gen. Harrison's military family. O'Fallon had a large share in very important military events. Just as he went into active service the surrender of Hull had been supplemented with the disaster of Winchester at the river Raisin; the enemy and his Indian allies were across the frontier in every direction, and Harrison had a heavy task before him. O'Fallon went through the siege of Fort Meigs, and accompanied Harrison to Detroit, and to the battle of the Thames. After an interval at Newport Barracks and Lexington he returned to the frontier, and was in command at Malden (Amherstsburg) until the end of the war. Then he was sent to Mackinaw, and sent in his resignation from this fort.[2]

After the victory of the Thames, O'Fallon was very ill. However, he accompanied Harrison to Washington in December, and fancied that his general was going to be the coming man in the war. "The

[1] In January, 1813, Ensign John O'Fallon was advanced to the grade of second lieutenant, but in May, same year, he was honored by being made aide-de-camp and acting assistant adjutant-general during the siege of Fort Meigs; August, 1813, promoted to first lieutenant Twenty-fourth United States Infantry; captain Second United States Rifle Regiment, March, 1814; given command in Rifles in May, 1815, after the war; and resigned July 31, 1818.

[2] O'Fallon's letters give a good inside history of the war of 1812, so far as Harrison's operations are concerned. He was always a partisan of this officer, who made him his most confidential friend, but he undoubtedly shows that Harrison was very badly treated. In 1837, and again in 1840, the Democrats irritated the old general very much by impeaching his credit and courage, and circulating reports that he was not even on the field in the battles which had given him distinction. Many letters passed between Harrison and O'Fallon on this subject, and the latter came out in a public letter in 1840, of which we here give the secret history.

I.—*Gen. Harrison to John O'Fallon*—(*Private*).

"North Bend, Feb. 14, 1840.

"My dear Sir,—I think that Dr. Thornton will soon go on to St. Louis again, to endeavor to secure the land on the Mississippi.

"The object of this is of a different character. The friends of the administration, believing that their cause is desperate, are resorting to every and basest means to prop it up. A continued stream of abuse is poured upon me in their infamous papers; but it is not confined to them. What do you think of assertions made in our House of Representatives that I was not in the battle of the Thames, but having skulked somewhere, and not to be found, Col. Johnson made all the arrangements for the fight, won the battle, and then had magnanimity enough to let me have the credit of it, and that thus it comes that the histories make me the commander, when it was in fact Col. Johnson, I having not actually been in the battle? Finding that the more authentic documents are rejected, my friends in the Legislature have written to me for testimony from some living witnesses. I have named to them yourself, Col. Todd, Maj. Chambers, and John Spear Smith. A letter accordingly will be addressed to you from Moses B. Corwin, Esq., of the House of Representatives of Ohio, asking you questions calculated to show by your evidence what I did in relation to the arrangements for the battle and drawing up the army, and what Col. Johnson did, what was the position of the troops, the order of battle, and where I was with my staff during the conflict. As you were with me at Tippecanoe and Fort Meigs also, you may insert some remarks upon my conduct on those occasions. If rank cowardice is not attributed to me at both places it comes as near it as possible. The Speaker of the House doubted whether I had ever been in any danger in any battle in my life. As Mr. Corwin's letter cannot reach you by at least six days as soon as this, I wish you to prepare your answer immediately, and send it to him without waiting for his letter. You can begin by saying that, agreeably to his request, etc., and in a note inclosed to him inform him that the request was made through me. Time is of great importance, as it is necessary that the answers to these vile slanders should be made in the House where they were uttered, and the Legislature will not long continue its session.

"Bitter and humiliating as it is to be obliged to resort to such means (procuring testimony) to show that I was not a very recreant, the evil times in which we have fallen makes it necessary. You may give your letter to Mr. Corwin the shape of a deposition at the conclusion or not, as you please.

"I receive every day information from all parts of the Union stating the triumphant progress of our cause. Mr. Clay says that so great a change of public sentiment in so short a period was never known. Letters received from Mr. Webster and

general sentiment is," he wrote, Dec. 17, 1813, "that Wilkinson, Hampton, Lewis, and Dearborn should be so disposed of as to preclude their having a command of importance; and the eyes of all appear to be placed upon Gen. Harrison as the only officer in whom confidence can be safely placed. I should not be surprised if he should be the lieutenant-general spoken of as in contemplation." In less than a year Harrison

Governor Everett declare that I will receive from ten to fifteen thousand majority in their State.

"My wife is in bad health at this time. She joins me in best regards to you and Mrs. O'Fallon.

"Truly your friend,

"W. H. HARRISON.

"P.S.—I have heard your speech at the Tippecanoe Club highly extolled.

"COL. JOHN O'FALLON,

"Near St. Louis, Mo."

III.—*M. B. Corwin to John O'Fallon—(Public).*

"COLUMBUS, O., Feb. 17, 1840.

"GEN. J. O'FALLON:

"*Dear Sir*,—I am instructed you was in the battle of the Thames, and near the person of Gen. Harrison from the commencement to the termination of that engagement, and that you personally know what part Gen. Harrison took in it. It has been openly avowed on the floor of the House of Representatives in session here by members in their places that Gen. Harrison was at no time in the battle nor within ten miles of the battle-ground; that the entire plan of operations was projected by Col. R. M. Johnson; that he led the troops to the conquest, and that Gen. Harrison had no part nor lot in the matter. I am a member of the Legislature, and feel much solicitude on the subject. If what I have already heretofore understood in regard to that battle be correct, the operations so timely and emphatically proclaimed here by the enemies of Gen. Harrison are without foundation. Will you please have the goodness, my dear sir, on the reception of this, to give me a brief statement from the commencement to the termination of that battle, that the truth may be known and justice meted out to an honest and brave man?

"Respectfully your obt. servt.,

"MOSES B. CORWIN."

"JOHN O'FALLON, Esq."

III.—*Col. O'Fallon to M. B. Corwin.*

"ST. LOUIS, Feb. 26, 1840.

"HON. MOSES B. CORWIN:

"*Sir*,—Your favor of the seventeenth is just received, and I lose no time in giving it acknowledgment. You request me to communicate the information I possess in relation to the military conduct of Gen. Harrison at the battle of the Thames, the arrangements for the battle, the position of the troops, as well as of the general during the engagement, together with any other knowledge I have touching his military character.

"In reply I submit the following statement: At the battle of the Thames, Col. Charles S. Todd, afterwards inspector-general of the Northwestern Army, and myself were the regular aides-de-camp of Gen. Harrison. Majs. John Chambers and John Speed Smith were the volunteer aides. The battle, as is well known, took place on the right bank of the river Thames, near the Moravian village. A short distance from the place, and whilst our troops were in rapid pursuit of the enemy, Gen. Harrison received information from an advanced party that British and Indian forces had halted, and seemed to be awaiting us for battle. When within half a mile of the enemy, after the American forces were formed in the order of battle, Gen. Trotter's brigade in front, Col. Paul's regulars with the artillery near his right, Col. Johnson's mounted regiment on the left of Trotter as a reserve, and the residue of the Kentucky volunteers covering the left flank and rear, Col. Wood, of the engineer corps, who by order of Gen. Harrison had approached, unobserved by them, sufficiently near the front line of the enemy to ascertain their position and the order in which they were drawn up, reported that the British troops, in order to occupy the high ground between the river and the swamp parallel to it, were drawn up in extended or open order between these points, the Indians on their right occupying the swamp and ground beyond it. Gen. Harrison, without one moment's delay or the slightest embarrassment, formed his purpose. I was within a few feet of him when the report of Col. Wood was made, and he *instantly* remarked that he would make a novel movement by ordering Col. Johnson's mounted regiment *to charge the line of the British regulars*, which, thus drawn up contrary to the habits and usage of that description of troops, always accustomed to the touch, could be easily penetrated and thrown into confusion by the spirited charge of Col. Johnson's regiment. With a view to this intended charge, Col. Johnson's command was ordered to the front, supported in his rear as a reserve by Gen. Trotter's brigade. I know that all the arrangements and every movement of the troops during the battle were made by order of Gen. Harrison, whose position at the commencement of the action was just in rear of Col. Johnson's command, and mainly afterwards near the crotchet formed by the junction of Johnson's left with the Kentucky volunteers, drawn up on the edge and in front of the swamp, a position considered by all as the most exposed and dangerous within the lines of our army, and where the battle was warmly contested by the Indians until they discovered the surrender of the whole British regular force, the happy result of the novel and skillful movement most gallantly performed by Col. Johnson and his brave associates, but conceived, planned, and directed by Gen. Harrison, whose superior military judgment and ready skill neither needed nor received any aid.

"After the return of the army to Detroit, that brave veteran, that just, good, and pure citizen, the late Governor Shelby, on hearing read Gen. Harrison's report of the battle, remarked in my presence and with much emphasis that the report did him (Governor Shelby) more than justice, and that to Gen. Harrison alone was due the credit of the order of battle, the whole of the arrangements and plans which he (Governor Shelby) had contributed to carry out to the best of his abilities.

"At the commencement of the battle of Tippecanoe, when the first gun was fired at our advanced picket, I was at the tent of Gen. Harrison, who was then up at the fire. I had an opportunity to observe his manner: he was cool and collected, and every movement of countenance and every word he uttered at that trying moment—perhaps the most embarrassing in the life of a soldier—denoted the highest order of personal courage. He mounted his horse instantly and, accompanied by his staff, hastened in the direction of the line first attacked. A part of this line, unable to withstand the fierce and desperate onset of the Indians, the general met retiring within our lines in some disorder and confusion, closely pressed by the Indians, some of whom were in the midst of them. Gen. Harrison led in person a company of the Fourth Infantry to the breach; and such was the effect of his bold and fearless behavior, and so great was the confidence of his army in his ability to conduct them to victory, that his presence and voice at once rallied the retreat-

had resigned his command, unable to get along with the War Department! O'Fallon did not leave the service with Harrison, but, going off the staff, took active command of a company. This was better for him, and the following letter shows what a good field-officer he must have been:

"CAMP NEAR FRANKLINTON, OHIO,
"January, 1815.

"DEAR MOTHER,—I came here about four weeks since, and finding my company in a very exposed situation, possessing no other means of comfort but their tents and fires before them, on assuming its command I immediately proceeded to the selection

ing detachment, and they took position at a point equally exposed, where half of their number, if not more, were either killed or wounded. The battle commenced at three o'clock in the morning during a slight rain, and the attack became general within five minutes afterwards, and continued until the dawn of day, when by an almost general charge the Indians fled and broke before our bayonets. The dragoons afterwards proceeded to their village and burnt it. During the battle Gen. Harrison was seen wherever danger was most imminent, wherever the fight was the thickest. His aide, Col. Owen, was killed by his side, and almost at the same moment a ball passed through the general's hat, grazing his head. There was not a spot within our lines secure from the shot of the enemy. On this, as on every other occasion within my observation, Gen. Harrison's conduct was that of a brave and skillful commander,—always calm and cool in his manner, and wholly indifferent to his personal safety, possessing the peculiar faculty of at once discerning whatever was wanting, and of promptly applying the remedy. A single instant of vacillation or uncertainty of purpose, the slightest tremor of nerve or hesitation in mind in the critical and appalling periods of the battle would have been disastrous to his army. After the action there seemed to be a universal admission by the officers and soldiers of the army that there was not another officer in the battle capable of having prevented a defeat and general massacre. All seemed to regard Gen. Harrison as their deliverer from the Indian scalping-knife.

"According to my best recollection, Fort Meigs was cannonaded day and night, with but little intermission, for about eleven days. Shortly after its commencement, Maj. Chambers, of the British army, was admitted into the stockade, the bearer from Gen. Proctor of an invitation to surrender the garrison with the honors of war, on the ground that so small a force, about one thousand men, could not sustain themselves against *four times their number*, the estimated British and Indian force. Gen. Harrison at once rejected indignantly this proposition, replying to the insult in terms worthy of his high character. Both day and night during the siege Gen. Harrison was most active, observing every movement of the enemy, and evincing his usual coolness, dauntless courage, and his happy readiness to perceive and apply every incident to his advantage. He succeeded in accomplishing *every plan* and *movement* where his orders *were obeyed*. I recollect not one instance to the contrary. The detachment under Col. Dudley effected in part the object intended in driving the British troops from their position; but they disobeyed orders in not spiking the enemy's cannon, destroying their ammunition, and thereupon immediately recrossing the river to the main army. The two sorties on the south side of the river, and on the same day, planned and *executed* under orders from Gen. Harrison, were eminently successful, resulting in the objects designed, forcing the British to raise the siege of Fort Meigs. That conducted by the brave and accomplished officer, *then* Col. John Miller, now a representative in Congress from Missouri, intended to destroy a sunken battery that had annoyed us very seriously by enfilading our rear line of pickets, as well as to prevent the almost entire Indian force, then investing the fort on that side of the river, from co-operating with the British against Dudley's attack, made at the same time on the opposite side, considering the very great disparity between our force and that of the enemy, being as four

to one, was, I must be allowed to say, one of the most brilliant affairs of the last war.

"Gen. Winchester's movement to the river Raisin, where he was defeated, was in disobedience of Gen. Harrison's order, which required him to proceed to the rapids of the Maumee of the Lakes, and to remain there for further orders.

"I have extended my remarks beyond what I designed when I commenced, but you will perceive my object was to give a full and satisfactory answer to your interrogatories. I aver that on every occasion when Gen. Harrison commanded he ever disregarded personal danger and sacrifice in the performance of duty, exhibiting all the fine qualities of a dauntless soldier, combined with those of a talented, skillful, and able general. Why, at this remote period, when death has swept away so many memorials of Gen. Harrison's intrepidity and excellence, should the poisoned spirit of political envy attempt thus to tarnish the hard-earned laurels of the veteran soldier, who, in public as well as private life, has lived '*without fear and without reproach*'?

"This, sir, is what I have to say of Gen. Harrison. I doubt whether there is another living who has possessed equal opportunities with myself of forming a correct opinion of Gen. Harrison's military character. I served under him during the greater part of the period he was in active service, near his person, commencing with the Tippecanoe expedition and continuing to its termination; rejoining his army in the fall of 1812, at Franklinton, Ohio, where immediately on my arrival I became a member of his military family as secretary, in the winter of 1812 and 1813 was appointed his acting deputy adjutant-general, and in May, 1813, immediately after the siege of Fort Meigs, his aide-de-camp, which station I held to the close of his military service. And, in conclusion, I can safely say that I never in my life saw a braver man in battle, one more collected, prompt, and full of resources than Gen. William Henry Harrison.

"I have the honor to be, with great respect, your most obedient servant,

"J. O'FALLON."

O'Fallon was a shrewd observer, and a good military critic. He was first stationed at Franklinton, and his health seems to have suffered severely until he became acclimated to the service. Harrison made him private secretary as well as aide-de-camp, and this gave him great insight into what was going on. He writes from Franklinton that "the people here charge the most exorbitant prices for every article furnished either the public or soldier; every species of produce of any demand have risen 50 per cent. It appears as if they calculated to enrich themselves by the circumstance of this campaign." His connection with the quartermaster's department at once revealed to O'Fallon what was the fatal weakness of the army along the lakes,—the impossibility of rapid or sustained movements in consequence of the lack of supplies,—and he shows in his first letter that the transportation service was inadequate. He also notes the want of subordination and other disobedience of orders which led to Winchester's defeat and the massacre of his men, and to the annihilation of Gen. Clay's and Col. Dud-

of a suitable encamping position, whither I removed my encampment, and had chimneys erected before the mouths of the tents, in which condition we now are. It is probable that I shall remain here some weeks longer, if not the winter, in consequence of the scarcity of provisions at Detroit, from whence nothing of consequence has been received, of which I feel surprised, it having been my calculation that the safety of that place would have been menaced ere this. I am getting sea-

ley's forces coming to the relief of Fort Meigs. Jan. 17, 1813, he writes to his mother, "I find that a camp-life in tents agrees with me as well as with most of the officers, which is a source of great gratification to me, thus enabled to sustain a winter's campaign, which requires a degree of fortitude and resolution not easily calculated. I live with Gen. Harrison, who manifests a strong attachment to me, and expresses every confidence. Although now in a low station, do not feel uneasy about my future prospects,—their promotion depends upon the continuance of Gen. Harrison in the army. I think he duly appreciates my merits." In March he was in camp at Fort Meigs, which from the first was infested with Indians, so that it was not safe for any one to venture abroad. Capt. Croghan was now made major, and O'Fallon only raised to a third lieutenancy. He was deeply mortified. He said, "It is not reconcilable to my acute feelings to be placed in a rank below numbers whose qualifications, it is universally admitted, shrink before mine. Great have been my exertions to qualify myself for any rank that I might expect when my merit can be known. . . . In any event, your son pledges himself to regard the feelings and the high sense of honor entertained by his family and connections."

In the midst of the excitements and perils of the siege of Fort Meigs he finds time to write: "Dear mother, be composed and not over-anxious after the fate of your son, for thus far he can call to mind or conscience not one instance of remissness of duty. If he falls, assure yourself that it will be in an honorable manner. If fortune is so favorable as to preserve him, you may ascribe it to her." His letter giving the result of the siege is as follows:

"Franklinton, May 17, 1813.

"Dear Mother,—The enemy began to disappear from their batteries early on the morning of the 9th inst., having given us no annoyance after the action of the 5th inst., but were industriously employed from then till the 9th in removing their cannon and other property from their batteries to their vessels. We were informed by deserters that the Indians commenced their dispersion immediately after the action of the 5th, much disappointed and dissatisfied, not till then despairing of the reduction of Fort Meigs. They were induced to upbraid the British with the charge of making false promises in having assured them that the post would be an easy conquest, in which event the rest would fall without opposition, and yielding to them immense spoils. Our loss in the fort and several sorties is eighty killed and one hundred and ninety wounded, fifteen only having fallen within the fort. On the 11th, the day before we left the fort, a large detachment was sent across the river to examine the battle-ground of our unfortunate for the purpose of finding and burying the killed, and after a very careful search but forty-five bodies were found. Among them was that of Col. Dudley. Hence it is to be supposed that fifty killed is as correct a calculation upon that side as can yet be made. My conduct on the occasion, as far as I am able to judge, was highly satisfactory to the general. He has promised me the appointment of aide-de-camp as soon as Maj. Graham resigns, which will take place ere long. But for my low rank, I would now be one of his aides.

"I am in very great want of clothes, summer clothes, cravats, shirts, etc. My regards to Mr. Fitzhugh and family.

"Your affectionate son,

"John O'Fallon.

"Mrs. Fanny Fitzhugh."

The following is about the second siege of Fort Meigs:

"Camp Seneca Towns,

"Sixteen miles from Lower Sandusky,

"July 26, 1813.

"On the 22d inst. there arrived at Lower Sandusky, within thirty minutes of each other, two couriers, one from Cleveland, bringing information of the blockading of our fleet at Erie by the British fleet of the upper lakes, and one from Fort Meigs, announcing the investment of that place by the enemy, the garrison receiving the first notice of their situation by the Indians' attack upon the picket-guards while taking their post on the morning of the 20th. Another express arrived on the 23d that left the fort at twelve o'clock in the night of the 22d, who states that the Indians had fired considerably on that day into the fort, but without injuring materially any one; that the British had debarked from their boats, apparently in considerable force, on the opposite bank of the Miami. Gen. Clay writes as his opinion that there are not left more than two thousand British, and the number of Indians incalculable. If proper steps are taken for the safety of the fort by its commanding officers, the additional strength it has received in the accession of Col. Audubois' regiment should remove all apprehensions on that subject. Some Indians and white men, that were sent for the purpose, approached within half a mile of the fort on the 24th, where they saw signs of a number of Indians made by their walks around the fort, and heard frequent firing of small-arms. On the same day they heard the report of four cannon in quick succession. The general [Harrison], on the first information of the situation of Fort Meigs, removed to this place from Lower Sandusky, with all the troops that were there except what was necessary to give it a strong garrison, in the command of Maj. Croghan. This place is the same distance to Fort Meigs that Lower Sandusky is, and nine miles nearer to the settlements and that far more remote from the enemy. If the militia should turn out in sufficient numbers as to justify an attempt to relieve Fort Meigs, there is no position better suited to assemble, organize, and adventure from. Col. Owen's regiment is expected here this day, as well as Col. Ball's squadron of dragoons. Col. Johnson's regiment of Maryland volunteers has been sent for. We have here a considerable number of regulars. But with these several detachments we will be comparatively so much smaller than the enemy as to render it proper for us to continue upon the defensive, and await the arrival of reinforcements of militia and volunteers before we assume an offensive position. No artillery has as yet been discovered to be in the possession of the enemy, and the object of this enterprise, from their conduct since the investment, is the most problematical. Perhaps Fort Winchester, Wayne, or Lower Sandusky is the object of their attraction. If so, and the Ohio militia join us in sufficient number, Gen. Proctor will run no small risk on his return. We have about sixty friendly Indians here, some of whom the general has constantly out upon scouts in every direction, thus rendering the most essential service. There are several parties of them now out, some of whom must return this evening with more intelligence with respect to the movements of the enemy at Fort Meigs. July 24th, Capt. McCune, who went from here with a Frenchman and two friendly Indians with the purpose of getting into Fort Meigs, effected this object yesterday morning; left the fort last night with dispatches from Gen. Clay to Gen. Harrison, and this moment arrived, bringing the pleasing

soned to the region of this climate very fast, so as to resist the exposures that I have necessarily to sustain without being affected by them. I employ my hours very pleasantly, in bestowing upon my company my undivided attention. Its state of health is astonishingly good. Of one hundred and four men composing the company, I am satisfied there is not a man unfit to march; such a state of things, I am disposed to flatter myself, is produced by proper attention being given to their comfort, food, cleanliness, etc. I have the assurances of receiving the appointment of adjutant-general to this district; my attachment to my company has almost decided me not to accept. Feeling convinced that should I have the fortune I might reasonably expect, it will be my policy to continue in the line of the army. In active service, for the commandant of such a company as mine to do his part, distinction must ensue. As the winter has set in, and my company being in very good winter quarters, I would prefer continuing here until the first of April next, in which I think it probable that I will be gratified. If the army is increased, I will most probably be promoted, to effect which I know that efforts will be made at Washington. Being immersed in camp, and upon the frontier, have consequently nothing else to write you that concerns myself. I am very anxious to hear from you at home, and shall expect a letter from yourself or some of the family in a short time. Letters directed to me at this point, if not received here, would be sent after me. Remember me most affectionately to Mr. Fitzhugh, brothers and sisters and friends.

"Your affectionate son,

"JOHN O'FALLON.

"MRS. FANNY FITZHUGH."

Before the war ended, O'Fallon knew that he was one of four captains selected to remain in the peace establishment. When peace came he was in command at Amherstsburg (Malden). He was, however, sent to Mackinac; after that to Prairie du Chien and to Fort Crawford, on Green Bay. O'Fallon had made up his mind from the first not to stay in the army. The life did not suit him. He looked with yearning to domestic quiet and retirement. But pride and prudence both kept him from resigning without a certainty of income from elsewhere. He sought influence and support to get a civil appointment under government,—that of Indian agent or factor. He felt convinced that his real interests should make him resign his commission, but he was withheld by "a certain pride with which I have always more or less contended, and which I admit is a foolish one, but, nevertheless, it influences my nature not to yield to comparative humbleness." As an officer in the army, in other words, he was the peer of any one; as a civilian, his wealth would determine his position, and he was very poor. This was a sore subject with O'Fallon. "My pride," he wrote, "cannot brook dependence or apparent want. My situation must be as respectable and independent as those with whom I associate."

In August, 1818, Col. John O'Fallon resigned his commission in the army, there being no field to invite his military aspirations, and after that time turned his attention to the more solid business avocations of life, and always resided either in St. Louis or its vicinity. In 1821 he was engaged as contractor of the army, and traded extensively with the Indians. He was elected to the Legislature in the same year, and served with honor and usefulness in that body for four years, the last two years being a member of the Senate. Whilst at Jefferson City he took an active part in the passage of the celebrated loan bill.

It was while still troubled with his pride and his determination to associate with none except upon entirely equal terms that O'Fallon received the following letter from Maj. Zachary Taylor, U.S.A., afterwards President. It is very characteristic of the blunt, honest gentleman who called himself O'Fallon's friend through life:

Maj. Taylor to Capt. O'Fallon.

"LOUISVILLE, KY., 25th Oct., 1818.

"DEAR CAPT.,—I reached St. Louis the last of September, on my way to this place; I was greatly disappointed in not meeting you there. I was several days longer on the way than I calculated on, owing to the low state of the water, which prevented my reaching St. Louis ere your departure for Yellowstone, as you had set out only a few days previous to my arrival. I should have written you from that place, but hearing on my arrival there that my wife was very much indisposed, which I know will be a sufficient apology for my not doing so, I remained only long enough at St. Louis to procure a horse. I reached home in less than seven days; I was so fortunate as to find Mrs. Taylor nearly recovered, my children, relatives, and friends in good health. I have been with them near a month, and after so long a separation I have given myself entirely up to pleasure. I have seen all your relatives; they are all in good health with the exception of your worthy friend and neighbor, Maj. Croghan, who is rapidly declining, and I am fearful, unless a change for the better takes place shortly, he cannot stand it long. I have visited him several times since my return: the young ladies look quite enchanting; they are both single, nor do I know or hear of their having a single admirer at this time, at which I am much astonished. During each of my visits you were mentioned; you are a great favorite with the whole family, and rest assured, my friend, I did not fail on every occasion to do, so far as I was able, ample justice to your good and amiable qualities, but have no hesitation in saying that I fell very far short in doing them justice. The family informed me that they expected you in this winter, and in that case, if you do

intelligence of the safety of the fort and that the enemy, although yet around the fort in considerable force, have as yet done no injury to the garrison. The Indians keep up a firing on the fort from a point of safety nearer to it. Yesterday enemy's whole force was collected on this side of the river on the road to that place. A quarter of a mile from this they got up a sham battle to decoy our troops out of the fort; but fortunately the captain was able to apprise them that it was impossible that a reinforcement was approaching, and they baffled the enemy's designs. The troops are in fair health and spirits, and nothing should be apprehended.

"Your friend,

"JOHN O'FALLON."

not succeed, it will, so far as I am capable of judging, be your own fault: in my opinion, you belittle yourself if you think for a moment—if you ever think so—that you aren't a full match for any woman in Kentucky. I find very few changes in the matrimonial way among our acquaintances, with the exception of the three Miss Boothes. A number of deaths have taken place, which has greatly changed the neighborhood in this quarter in the course of two years. Louisville has greatly improved, and property has risen of every kind beyond my conception: town property and land in the vicinity of Louisville, in my opinion, rates much beyond its real value. I approve of your leaving the army. I think your prospects for acquiring wealth are flattering, and I sincerely wish they may come up to your most sanguine wishes. Gen. —— visited us shortly before I left there; he was quite astonished at the order in which he found the troops at the place; he appeared very much disposed to reconcile all differences. I treated him politely, but we parted as we met; he ordered me to this place to superintend the barracks for the Third Regiment, which duty I shall be employed on, I expect, for at least one year, at the expiration of which time I contemplate retiring to civil life. Col. Croghan is expected at his father's, on his way from New York to New Orleans, in the course of three or four weeks. The Doctor has lately gone to Philadelphia. I. Gwathmey and E. Anderson are to be married in a few days. Wishing you every success and happiness through life, I remain, dear sir,

"Very truly your friend,

"Z. TAYLOR."

O'Fallon, however, did not marry in Louisville nor among his kinswomen. His first wife was an Englishwoman, a sister to Wm. Stokes, a rich Englishman, who came to St. Louis in 1819 or 1820, with a fortune and a divorce case. The latter ate up his fortune and killed the man. O'Fallon married his sister in 1821, and helped him in all his troubles, finally administering on the insolvent estate after his death.

On March 15, 1827, Col. O'Fallon married his second wife, Miss Caroline Scheetz (Schütz originally), of Maryland. This lady, born in Baltimore, was a descendant on the mother's side of some of the leading old families of Maryland. Her mother was half-sister to Mr. Frederick Dent, Gen. Grant's father-in-law. Mrs. Scheetz's mother was a Miss Owings, her grandmother a Miss Laurence, and her great-grandmother a Miss Howard. The Laurences were a "first family" of Western Maryland, connected on the one side with the English "Wests" (the family of Lord De la Warr and the present British minister at Washington), and on the other with Jonathan Hager, from whom Hagerstown gets its name. The Owings, originally Welsh, settled in Anne Arundel County, Md., thence branched off into Frederick County, and thence all through the West. From the time of his first marriage Col. O'Fallon became a leading and prominent citizen of St. Louis. He made money rapidly, he gave it liberally; he gave his services and advice still more liberally, until his name became a synonym through the West for enterprise, liberality, and benefaction.

The local historian Edwards, writing eight years before his death, said,—

"Perhaps there is no man as much identified with St. Louis as is Col. O'Fallon,—not on account of his immense wealth, but for the useful purposes which he has made it to subserve the city and adorn it. With a charity unparalleled in its munificence, he has already bestowed more than a million of dollars to advance the cause of education and science, and to relieve the wants of suffering humanity. He gave the ground where St. Louis University now stands, and also the site where the first Methodist Church stood on Fourth Street, now occupied by Clarke's buildings. He gave the five acres of land on which the water-works of the city are erected, and endowed the O'Fallon Polytechnic Institute with property valued at one hundred thousand dollars. He gave most liberally to Washington University, and built the dispensary and medical college over which Dr. Pope so efficiently presides. He gave fifteen acres of land to the 'Home of the Friendless,' and his private charities are 'legion.'

"Liberality, so rarely found in the possession of wealth, forms one of the dominant traits of Col. O'Fallon's character, and he once offered to make the city of St. Louis a present of a hundred acres of land, if Peter Lindell, Esq., would do the same, each one of the gifts to be laid out into two magnificent parks; but the condition of the offer was not acceded to.

"Col. O'Fallon was president of the Branch Bank of the United States Bank during its existence in St. Louis, and under his superior and honorable management it was wound up with the loss only of one hundred and twenty-five dollars, while tens of thousands and hundreds of thousands dollars were lost in the various places the branches were located, in consequence of the frauds committed by the unprincipled officers connected with them; and he was also agent for the United States Bank of Pennsylvania from 1836 to 1841.

"The possession of unbounded wealth, the high and responsible positions which he has filled in the military, civic, and business relations of life, have never generated pride and arrogance in his character and made him forgetful of his duties to his Creator and his fellow-beings. He was the first man who organized a Sabbath-school west of the Mississippi River, and is a regular attendant of the Episcopal Church. Unostentatious in his bearing, he can be approached by all, and his manner possesses much of that freedom and frankness which lend a charm to conversation, and is characteristic of the early settlement of the West.

"When Col. O'Fallon first saw St. Louis it was but little more than a village of log houses, containing but a few thousand inhabitants. Its commerce consisted only of the furs and peltries which were brought by the hunter and trader from the Missouri, the Mississippi, and the Illinois; and on their waters a few canoes and flat-boats were sufficient to carry all of the required trade. Col. O'Fallon has seen the Mound City through all of its progressive stages of advancement, from his first advent in 1812 to the present time, and has contributed more liberally to all public and private enterprise than any man now living. He has won the respect and love of every class of society, and in 1849, when the great fire threatened to reduce the whole city to ashes, such was his popularity and such his claim on public gratitude, that the firemen, knowing that some property must be destroyed, encircled his, and saved it on many occasions from the devouring element.

"Col. O'Fallon has been identified with the great railroad enterprises of Missouri, which like a network will soon thread

every portion of the State and develop its vast resources. At the first meeting of some of the prominent citizens to create a company to form the plan of the Pacific Railroad, Col. O'Fallon was chosen president, and after a charter was obtained from the Assembly of Missouri, he was nominated as a candidate for the presidency, but declined, and at the same time nominated Mr. Thomas Allen, who was duly elected.

"Col. O'Fallon was the first president of the Ohio and Mississippi Railroad, and also of the North Missouri. He was a director of the State Bank of Missouri, and subscribed liberally to the building of the Planters' House, and more recently to the building of the Lindell Hotel." Among his late contributions to the city of St. Louis was O'Fallon's Park, estimated now to be worth two hundred and twenty-three thousand one hundred and seventy-four dollars.

"The noble and generous-hearted John O'Fallon," as Mr. John F. Darby calls him, was "a great and good man, to whom St. Louis owes much." "He possessed," says Mr. Darby, "one of the most acute and vigorous understandings that any man was ever armed with. His quickness was not accompanied with the least temerity; on the contrary, he was as sure as the slowest of mankind. But his nobleness of heart was far above all the qualities of his mind. He was beyond all doubt the most open-handed and liberal man the city of St. Louis ever produced, the leader in every noble undertaking, and the foremost and largest contributor in every public enterprise. He sprang to every business man's assistance without waiting to be called upon. He has done more to assist the merchants and business men of St. Louis than any man who ever lived in the town."[1]

[1] Perhaps Col. O'Fallon was too liberal, too generous. We have the suspicion that adventurers sometimes imposed upon his forbearance and good nature, and this seems to be confirmed by the following letter, found among his papers, and written to him by one of his slaves:

Letter of J. C. Carter to his Master.

"St. Bt. 'Langmon,' Jany. 25, 1834.

"Colonel J. O.Fallan:

"*Dear Master*,—I shipped on this Bt. at Natchez to supply the place of the Sick who are now recovered and I leave the boat at the Mth. of Ohio. And on the 14 opportunity I shall start for St. Louis, Clinton, or Orleans. I hope that you and your family are in the pomp of health and my dying companion and I desire that if it is your wish that you will send her to me to the Mth. Ohio & my clothes that I may take her to the Rheumatism to recover her Orleans. I am in the pomp of the enjoyment of health and hope my dear Master that you will send me a pass to go on any boat. I will pay any sum to cure my wife Rumattick I hope that she is well at the present time. My dying respects to her that she is well and hearty perhaps my well beloved Master I may return home as quick as the moderate Case will admit, thank you dear Sir that you will send your unprofitable servant papers to pass as he has done. My Dear Master will you be so kind as to send Sally down to the Mth. of Ohio to of Ohio to Mr. Buds, that I may take my dear beloved to orleans to be cured of Rumatiz, and it shall cost you nothing.

"My bed and clothes I want and I will try to be home 1st March or last of April without circumstances should alter cases and I will try and make refuse for payment.

"Grand asylum of the universe
"May I be your sacrifice
"Your ill begotten Varlet
"And unprofitable servant
"I resp. your
"J. C. × Carter
(his mark)."

The local influence of Col. O'Fallon was at least equaled by what might be called his national influence. He was a well and widely known public man, and public men everywhere not only sought him, but seemed to like to consult him. Probably their feeling towards him was that with which he inspired Harrison when they were in the army together: "Whenever O'Fallon is on duty," he said, "I can sleep sound and secure." He was anything but a Democrat, but Benton wrote to and consulted him. At the time of the Missouri Compromise agitation Benton wrote to O'Fallon: "Missouri will be taken up on the 23d inst. I shall expect that she will come in, but some think otherwise. There is no doubt but that all the leaders of the restriction interest are for breaking up the Union, and are laboring to make this poor question the veil for their treacherous designs."

Gen. Harrison was always consulting Col. O'Fallon, and among his correspondence we find letters from Henry Clay, John C. Calhoun, Lewis Cass, Gen. Albert Sidney Johnston, Gen. Edmund Pendleton Gaines, Edward Bates, Gen. Atkinson, Gen. Winfield Scott, Gen. Jessup, Col. I. A. Hamilton (son of Alexander), Gen. Anderson, Senator Lewis F. Linn, President U. S. Grant.[2] O'Fallon always had some public post, not of profit, but of honor and responsibility. He was the first adjutant-general of Missouri, commissioned before the State had a seal. He was director in half the companies in St. Louis. The United States appointed him visitor and examiner at West Point. He was always giving. We find among his papers a simple half-page announcement of Henry O'Reilly's, the electrician, that he owes O'Fallon five thousand dollars, money advanced. If O'Reilly's patent did not succeed, O'Fallon's money was gone; if it did succeed, the chances were not so certain that O'Fallon would get his money. Here is a voice from one of his benefactions,—they did not always speak:

[2] Gen. Grant's note is almost enigmatic in its brevity; it simply asks, will Mr. O'Fallon send check to pay a note due by other parties at O'Fallon's bank on a certain day, and which, presumably, they could not meet. To judge by the marks on the back of this letter the note was not satisfactorily settled at a late day.

"ST. LOUIS, March 18, 1846.

"COL. JOHN O'FALLON:

"SIR,—Under instructions of the Board of Trustees of the Fourth Street Methodist Episcopal Church, I have the pleasure of handing you the following resolution, passed unanimously by said board at their last meeting:

"*Resolved*, That the Board of Trustees of the Fourth Street charge, Methodist Episcopal Church South, express the high sense they feel of gratitude and admiration for the magnanimity and noble liberality of their friend, Col. John O'Fallon, seen in his continued beneficence to the church they represent, from its commencement to the present time, especially his last act of generosity (as communicated in his note to the Rev. Joseph Boyle), which is alike creditable to the name and nature of a public benefactor of his race.

"With sentiments of the highest regard, I am sir,

"Respectfully yours, etc.,

"JAMES C. ESSEX."

But sometimes they inspired others to speak with eloquence. Thus wrote to him in 1851 Abel Rathbone Corbin, Gen. Grant's brother-in-law: "Your late noble benefaction, an account of which was borne to us in recent St. Louis papers, has attracted much attention here [Washington], especially with Missourians. Such acts are creditable to a city having such citizens, as well as to the doer of the good deed. . . . From my heart I thank you for it, and hope and pray that God will bless you for it, and long spare your valuable life, and make you as happy as you have been active, wise, and useful. The fact is you have done so much for religion, scientific and public purposes that it is difficult to make out a list of beneficiaries; not a fire company, not a library association, not a church, not anything but appeals to the liberality of Col. O'Fallon in their hour of need. And as to individuals, public and private, who have in multitudinous ways been assisted by you, who can number them? I question whether you could do it yourself. I know a prodigious number myself during the seventeen years of my acquaintance with you, and yet I am conscious that but few, comparatively, fell under my observation. Some men you helped outright, like the sons of —— ——; for others, you liberally indorsed; and for others, you furnished lots on long time, that, by their increased value, they might retain half or two-thirds by selling the balance for the small sum due you. May all these good deeds rise up in your old age, and, like the fragrance of the well-preserved flower of summer, bless you with their sweet and grateful odor."

When Col. O'Fallon died, Dec. 17, 1865, a whole city, an entire State, mourned him. There was a general suspension of business, and many striking demonstrations of the respect, esteem, and affection in which the citizen was held whose long and useful life had just closed. At the funeral ceremonies at St. George's Church the mayor, members of the Council and city officers, the members of the Chamber of Commerce, the professors and students of the St. Louis Medical College, the directors of the "O'Fallon Polytechnic Institute," and other public bodies were present, with a vast multitude of sorrowing citizens, hundreds of whom were unable to obtain admission to the church.

The pall-bearers were Gen. Harney, Col. Turner, and Messrs. Robert Campbell, John F. Darby, Henry Shaw, George McGunnegle, Walker R. Carter, William McPherson, L. Levering, and H. I. Bodley.

The impressive funeral services prescribed by the ritual of the Episcopal Church were performed by the Right Rev. Bishop Hawks, assisted by the Rev. Drs. Schuyler and Berkley.

Some of the things which the venerable prelate said of John O'Fallon could not truly be said of many men. The munificence of his public charities, "lithographed in your very streets," was yet far exceeded by the extent of his private charities and benevolence. Said the bishop,—

"But one particular feature in this good man was this, a more forgiving man I never knew. You could not wrong him but he would blot it out. You could not do an injury so intense (and few men did it) but what that gentle nature of love and forgiveness would blot it all out; and then to those who acted strangely he became a benefactor in after-times, in lifting them up from their troubles and pointing them onward to the way of honor, usefulness, and duty. I speak, perhaps, to some who know these things, and who have felt this forgiveness in his nature.

"Of his childhood, we learn that he was never known to possess even one bad habit. He never made use of an oath in his life. He never went to bed without prayers, nor rose without them. Always a child pure in heart, he at last culminated in the upright, just, honorable, and truthful man.

"Then, again, there was this as regards Col. O'Fallon, that he was emphatically the architect of his own fortune. In early life he seems, in the bloom of manhood, to have been carried away with the tide of war in behalf of his country, and having nobly served that country on the field of battle, bearing on himself the scars received in that service, he then, finding himself unemployed, conceived that his country no longer required his services and retired to civil life. But he was always patriotic to the land that gave him birth, and therefore loyal to the government that protected him, and he lived and died actuated by a noble spirit of patriotism and loyalty for his native land.

"To the city of his adoption I say, his public memorial is everywhere around you. You see, then, how that correct principles, embodied at the home fireside, bred even in earliest childhood, how they give promise of future good, and finally bring out the nobility of manhood, and how in manhood they make the individual still more lofty in his conception of duty, and raise him higher and higher in the way of truth and duty, till by common sympathy they make him a leader, because Col. O'Fallon was a man to be a leader in all the walks of citizenship.

"Then, my beloved friends, another thing connected with this man was this: Most men who have gathered together the

accumulations of a life lie down and die, and all their life long cherish narrow feelings, doing nothing to elevate humanity, only leaving to posterity to know what they are by some memorials that follow them. But Col. O'Fallon was, to a large extent, his own executor. He waited not till death, but in his own life saw the great works of his own goodness multiply and bear fruit. He did not wait to die before he gave, but in his own long life, I say, he was himself carrying out his will, which will was executed largely by himself."

The danger from the Indians continued to increase, and a meeting of citizens was held on the 15th of February, 1813, to devise measures of defense. Maj. William Christy was nominated chairman, and William C. Carr secretary, and it was

"*Resolved*, That a committee of five persons be appointed to take into consideration the situation of the town of St. Louis, and report thereon to a subsequent meeting of the inhabitants.

"*Resolved*, That Col. A. Chouteau, C. B. Penrose, William Christy, B. Pratte, and B. G. Farrar be the committee.

"*Resolved*, That the said committee report on Wednesday next, at three o'clock P.M."

On the 17th another meeting was held, at which the following report was presented by the committee appointed by the meeting of the 15th:

"Your committee, in pursuance of the resolution entered into and your instructions given on the 15th inst., beg leave to report that they waited on the acting Governor of this Territory, and were informed by him that he had no official information as respected the reports in circulation of Indians and British embodying to attack this Territory, but that he had taken the precautions to have accurate information on the subject and expected to hear shortly; that he had no power to make any immediate defense for this town, not being authorized to draw for money, but had used every means in his power to protect the Territory, and hoped his arrangements would be effectual.

"Finding that we had nothing to anticipate from this source, we made application to the board of trustees of this town, expecting they might use their authority, if such they had, but our expectations were doomed to receive another disappointment. Their answer was 'that no power was by law vested in the trustees that would enable them to compel the inhabitants to erect or repair fortifications, or cause them to be erected or repaired.'

"We do not think it prudent to report the exact situation of the munitions of war, but beg leave to observe that after diligent search we have ascertained that we are amply supplied with lead, that the number of men and arms are respectable, that there are several great guns, but unmounted, that the quantity of powder and flints is very small, but that there is of these articles sufficient among Mr. Johnson's factory goods, which we have no doubt, in case of necessity on proper application, would be delivered to us.

"After having made every inquiry in our power, seeing the forlorn hope we have to expect from the authorities in this place of any aid, viewing that whatever protection the government may intend to provide for us will be so retarded from the distance that any troops are from us, and from other causes will render it impossible for them to afford us prompt assistance, that the recent deplorable events in a part of Gen. Harrison's army may have considerable influence on our safety, your committee make bold to give it as their unanimous opinion that there is sufficient danger to make it necessary that some immediate arrangement should be made for the defense of the town, and seeing the little hope we have of assistance from any quarter, it now, therefore, rests with the people to afford the Territory and town, our wives and children, from the merciless savages the best protection in our power.

"All of which we respectfully submit.

"AUG. CHOUTEAU,
"*Chairman.*"

The following resolutions were thereupon adopted by the meeting:

"*Resolved*, That it is the unanimous opinion of this assembly that the town of St. Louis ought to be fortified, or put in a state of defense as speedily as practicable, and in order that the objects embraced by these resolutions, equally dear and desirable to us all, may be the more conveniently effected, it is furthermore

"*Resolved, unanimously*, That a committee of seven be appointed, to be called and styled the Committee of Safety for the town of St. Louis, vested with absolute power not only to adopt and devise the best measures for our defense or fortification, but also to have the same carried into effect.

"*Resolved also, unanimously*, That as soon as those measures of defense or fortification shall be adopted and made known by the said committee to the citizens of this place, and those of its vicinity who may wish to be associated with them, the present assembly pledge themselves to support them and to aid in carrying them into immediate operation.

"*Resolved*, That the said committee shall apportion as justly and equally as may be, according to the property and means possessed by each person, the proportion of work that may be necessary for them to perform; and forasmuch as this is a free and voluntary association for objects common for us all, to wit the defense of our property and lives, and the protection of our wives and children, it is therefore

"*Resolved*, That if any person shall refuse or neglect to perform the portion of work requested of them as aforesaid, they shall and ought to be considered as enemies to their country.

"*Resolved*, That Col. A. Chouteau, George Wilson, Wm. Christy, François Gavol, Robert Lucas,[1] C. B. Penrose, and William Smith be and they are hereby appointed the Committee of Safety for this town of St. Louis.

"*Resolved, lastly*, That these proceedings be presented to the Committee of Safety, to each inhabitant of St. Louis and its environs for their signature.

"WM. CHRISTY,
Chairman.
"WM. C. CARR,
"*Secretary.*"

On the 6th of March the following orders were announced:

[1] Among the citizens of St. Louis who took an active part in the war of 1812 was Maj. Robert Lucas, son of John B. C. Lucas. He was educated at West Point, and after graduating from that institution received a commission as an officer in the artillery corps, but tiring of the inactivity of military life in time of peace he resigned from the army and engaged in trade. On the declaration of war with Great Britain, however, he immediately offered his services to the government, and at the head of a company of volunteers proceeded to the Indian frontier. He was subsequently promoted major, and died Feb. 6, 1814, at French Mills, St. Lawrence River.

"TERRITORY OF MISSOURI,

"GENERAL ORDERS, ST. LOUIS, March 1, 1813.

"The usual orders for the musters of the battalions in the spring will now be given. The threatened invasion of our settlements by the Northern Indians requires arrangements of another character. To repel and if possible to chastise these inroads, if they should be attempted, the acting commander-in-chief orders

"That the volunteer companies commanded by Capts. Dodge, McNair, Callaway, Ashley, Young, Hughes, Millard, Ramsay, and Rankin muster for inspection at their respective parade-grounds on Saturday, the 20th of the present month, and hold themselves thenceforth in readiness to be called into active service at a moment's warning.

"That no citizen-soldier may be ignorant of the manner in which the law requires him to be equipped, he is reminded that it is his duty to provide himself with a good musket, with bayonet and belt, or a fusil, two spare flints, a knapsack and pouch, with the box therein, to contain not less than twenty-four cartridges, or a good rifle, knapsack, powder-horn and pouch, with twenty balls and a quarter of a pound of powder.

"FREDERICK BATES.

"By order of the acting commander-in-chief.

(Signed) "WILL. C. CARR,
"Aide-de-Camp."

Governor Howard arrived at St. Louis in April, 1813, with an appointment as brigadier-general. He continued to act as Governor for a few weeks, until the expiration of his commission as such, and was succeeded by Governor William Clark, who arrived on the 1st of July. Gen. Howard, during the spring, collected some regulars and marched through that portion of the country which was threatened by the Indians. In the mean time the troops at the outposts had been concentrated and Fort Osage evacuated. Gen. Howard established Fort Clark, in the Indian country, afterwards the site of Peoria. At that time great apprehension of an Indian attack was felt at St. Charles, and also at St. Louis.

On the 26th of June it was stated that upwards of twenty horses had been stolen from the opposite settlements, near Shoal Creek, by the Indians. No murders, it was added, have been lately committed by them; the Rangers are on the alert, and we hope some of the savages will be discovered in their marauding excursions.

A block-house at Portage des Sioux was intrusted to the command of Capt. Lewis Bissell; and early in July, 1813, Capt. David Musick's company of United States Rangers had a skirmish with a party of Winnebago Indians "on the frontier of St. Charles, near Fort Mason on the Mississippi," in which John M. Duff, a soldier, was fatally wounded.[1]

[1] His remains were interred with military honors at St. Louis on the 10th, the following being the order of procession:

1. A guard from the regular troops of one sergeant and ten rank and file.
2. Military music with muffled drums.
3. The priest of the Catholic Church in his sacerdotal robes, with attendants.
4. The corpse, borne by four privates of Capt. Lucas' company, and supported by six pall-bearers from same company.
5. Two privates of the company of the deceased as mourners.
6. Capt. Lucas' company of volunteer militia, two and two.
7. The judges and officers of the Court of Common Pleas, then in session, two and two.
8. The members of the Legislature and Legislative Council of the Territory of Missouri, two and two.
9. Speakers and clerks of both Houses.
10. The adjutant-general of the militia of the Territory, and assistant adjutant-general of the troops.
11. The officers of the army in town.
12. The Governor of the Territory, and brigadier-general commanding the district.
13. Citizens, two and two.

On the 10th of September, 1813, Gen. Howard started from Portage des Sioux with a force of fourteen hundred men on an expedition against the Indians of the Illinois.

The following appeared in the *Republican* of November 13th:

"In the treaty which will, no doubt, shortly be held with the Illinois and Wabash Indians, every citizen in the Western country expects, and the Indians expect nothing less, than that they will lose every pretension to that tract of country which they formerly claimed as theirs by right of conquest from the Peorians, a warlike people who could, seventy or eighty years ago, boast of two thousand fighting men, but are now reduced to ten or fifteen heads of families, and reside near Ste. Genevieve."

In the spring of 1814, Capt. Bissell's regiment was ordered to the Northern frontier.[2]

[2] Capt. Lewis Bissell is one of the prominent figures in the early history of St. Louis, and for many years was closely identified with the interests of the city and State. He was born on his father's farm in Hartford, Conn., Oct. 12, 1789, and resided there until about nineteen years of age. On the 12th of December, 1808, he was appointed an ensign in the First Regiment United States Infantry, commissioned by President Jefferson, and was soon after ordered to the Western frontier. He left Middletown, Conn., in company with the late Gen. Daniel Bissell (then a colonel), the last week in February following. In twelve days they reached the then village of St. Louis. This was on the 10th of May, 1809, about two and a half months from the time of leaving Connecticut. After remaining a few weeks at the "Cantonment Bellefontaine," about eighteen miles above St. Louis, he started for his final destination, Fort Osage, about three hundred miles up the Missouri, then far into the Indian country, where he arrived by keel-boat some time in July. Here he joined his company, and performed garrison duty. In June, 1812, war was declared by this country against England, and in 1813 Fort Osage, the present site of the town of Sibley, was evacuated. The troops engaged in an expedition against the Illinois Indians, under the command of Gen. Howard, established the post of old Fort Clark, the present site of the city of Peoria. In that year Capt. Bissell received the appointment of regimental quartermaster. In the spring of 1814 his regiment was ordered to the

In May of the same year five barges manned with about fifty or sixty regular troops and about one hundred and forty volunteers left St. Louis for Prairie du Chien, under the command of Governor William Clark.

Northern frontier (Upper Canada), and it left Bellefontaine in the latter part of May, in keel-boats, arriving at Pittsburgh after incessant toil about the 1st of July. Here they left their boats and marched across the country to Erie, in Pennsylvania, where they took a government vessel and crossed the lake to the old British "Fort Erie," which Gen. Brown had captured on the 4th of July. Marching from thence to Chippewa, where Brown gained the battle on the 5th, Bissell's regiment crossed from Erie to Black Rock, and marched down to Schosser (just above Niagara Falls), where it arrived on the 25th of July, opposite where Gen. Brown's army lay, when it again crossed to the British side, a little above. It had scarcely commenced its march before the firing of Scott's brigade began, when the whole army—Bissell's regiment among the number—hurried into the conflict, which lasted from about five or six o'clock P.M. till midnight, when our forces were masters of the field.

Gens. Brown and Scott were badly wounded in this important battle, and the command devolved on Gen. Ripley. Bissel's regiment lost in killed and wounded one-fourth of its number, and he received a severe wound himself, though it did not disable him from performing duty. He continued to serve with distinction under Gens. Brown and Gaines till on the celebrated *sortie* of the 17th September he received public thanks on parade from the late Gen. G. M. Brooke for the manner of collecting and marching his regiment. His name was also honorably mentioned in the general order of Gen. Brown. Soon after this he was ordered to join Brig. Gen. Bissell as one of his staff, then with Gen. Izard, who commanded the army on Lake Ontario, and in a short time received the appointment of brigade major, which he held to the close of the war.

In 1815 the army was reduced to a peace establishment, and Capt. Bissell was retained a captain in the Third Regiment of infantry, having been previously promoted to second and first lieutenants, and subsequently transferred to the Eighth Regiment. He had command of the gunboat "Governor Clark" during the great council with the Indians at Portage des Sioux in 1815, and was subsequently placed in command of Fort Clark, where he resigned from the army in the spring of 1816, and engaged in the sutler's business with Col. O'Fallon at Bellefontaine. He remained here until 1819, when the "Yellowstone expedition" (consisting of the Eighth Regiment of infantry and the Rifle Regiment) ascended the Missouri River under command of Gen. Atkinson. He then engaged in the sutler's business at Council Bluffs (the site of the present city of Omaha), where, by order of the government, the expedition halted and built a fort. He remained at Council Bluffs until 1822, when he traveled about a year to improve his declining health, and in 1824 was married in Manchester, Conn., and again engaged in merchandising, which he continued there until 1830. He then returned with his family to St. Louis, having purchased a farm in the neighborhood of the city in 1823, to which he removed, and there remained until his death, the place subsequently being within the chartered limits of this city, and known as Bissell's Point. He married the second time in 1837.

Capt. Bissell was badly bruised at the "Gasconade bridge disaster" in 1855, being in the last car that took the fatal leap. He died in St. Louis on the 25th of November, 1868.

On the 21st of January, 1815, the following notice was published:

"The subscribers are anxious to raise an infantry company of young men between fourteen and eighteen years of age, to do duty when called upon south of the Missouri. Those who wish to join, first obtaining the consent of their parents, will apply to

"EDWARD CHARLESS,
"JOHN RUSS."

On the receipt in St. Louis of the news of Gen. Jackson's victory at New Orleans on the 8th of January, 1815, a Federal salute was fired, and the houses illuminated February 18th, and on the 2d of March following a solemn mass and *Te Deum* were celebrated in the Catholic Church, and a sermon was preached by Father Savigne. On the 11th of the same month the conclusion of peace with Great Britain was announced in St. Louis. After the close of the war the following persons were recommended (in August, 1816) as commissioners for the county of St. Louis, to take testimony in cases arising under the "Act authorizing the payment for property lost, captured, or destroyed while in the military service of the United States, and for other purposes," to wit, M. P. Leduc, Matthias McGirk, Joseph Charless, Joshua Barton, Henry S. Geyer.[1]

The organization of Missouri Territory, under the act of 1812, terminated the sessions and business of the old Court of Common Pleas. Rufus Easton was the first prothonotary of this and the preceding court, Thomas F. Riddick the second, and Andrew Steele the third. There were many other officers in and around the court, and a summary of its different appointments and the various officials connected with it will give the outline of no small part of its business and its functions. The presiding justices were Charles Gratiot, appointed by Governor Harrison, and serving from December, 1804; Joseph Browne, appointed by Governor Wilkinson, and serving from March, 1806; Silas Bent, appointed by Secretary and acting Governor Browne, and serving from June, 1807; and William Christy, appointed by Governor Howard, and serving from March, 1813. (But Mr. Christy was

[1] On the 1st of May, 1872, the death at Manchester of Maj. Charles Clarkson, "one of the oldest and most estimable citizens of St. Louis County," was announced. Maj. Clarkson was a native of Kentucky, and served with credit in the war of 1812. He subsequently removed to St. Louis County, and "devoted himself to the breeding of choice stock on his farm near Manchester." Gordon Robinson, another veteran of the war of 1812, died at the residence in St. Louis of his son-in-law, James W. Rosebrough, on the 11th of November, 1877. He was a native of Belfast, Ireland, but emigrated to the United States in 1797.

presiding judge of the Court of Missouri Territory, an entirely new organization, under a new act of Congress, which greatly enlarged the opportunities of the people for self-government.) The clerks of the Court of Common Pleas were (in addition to those named above, of whom Easton was Governor Harrison's appointment, as was Riddick likewise, and Steele was Wilkinson's appointment) were William Christy, appointed by Secretary Browne, and Thomas F. Riddick again, reappointed by Secretary Frederick Bates. The first sheriff, as has already been told, was James Rankin; the next was Josiah McClenahan, appointed by Governor Harrison and in office fifteen months; the third was Jeremiah Connor, Wilkinson's appointment; the fourth, Alexander McNair, afterwards the first Governor of the State of Missouri; the fifth, John W. Thompson, was appointed by Governor Clark; and the sixth, Joseph C. Browne, was also appointed by Governor Clark, but not until his predecessor had been six years in office.

The deputy attorney-generals were Edward Hempstead, from December, 1804, an appointee of Governor Harrison's; Rufus Easton, appointed by the same Governor, from March, 1805; Edward Hempstead, Governor Harrison's third appointment, from June, 1805; James L. Donaldson, December, 1805, by Governor Wilkinson; Edward Hempstead once more, May, 1809, by Governor Lewis; Thomas T. Crittenden, November, 1810, by Governor Howard; Robert Wash, November, 1811, by Secretary Bates; and David Barton, from March, 1813, appointed also by Secretary Bates.

William Sullivan was coroner and constable as early as 1804, by appointment of Governor Harrison, and he also served as jailor and jail warden. The tavern licenses granted between 1804 and 1813 show that local writers have regularly understated the number and the need for these places of entertainment. It must be remembered, moreover, that the charge for licenses to taverns increased from five dollars in 1804 to thirty dollars in 1813. The list is as follows:

Calvin Adams, April, 1805; André l'Andreville, April, 1805; William Sullivan, April, 1805; William Christy, December, 1806; Resin Webster, March, 1809; Joseph Leblond, March, 1809; Charles Bosseron, March, 1809; Batiste Lebeau, March, 1809; Emilien Yosti, March, 1809; Joseph Bissonnette, November, 1809; F. Jourdain Labrosse, July, 1810; Henry Capron, July, 1810; Charles Schewe and Frederick Weber, March, 1811; Lambert Lajoie (Sallé), March, 1811; Joseph Philibert, July, 1812; Michel Marli, July, 1812.

Ferries:

George Boly, December, 1804, Maramec; John B. Belland, March, 1805, St. Charles; George Smirl, September, 1806, Maramec; Nathaniel Carpenter, March, 1807, St. Louis; Silas Dent, June, 1807, Cahokia; Samuel Solomon, March, 1809, St. Louis.

Under the act of Congress of June, 1812, the people of St. Louis for the first time began to taste the fruits of something like "home rule." The President appointed the Governor and selected the "Legislative Council," but the House of Representatives was elective, and the Territory became entitled to its delegate in Congress. The first Territorial court met on the first Monday in March, 1813, with William Christy presiding. The associate justices were David P. Walker, Auguste Chouteau, and George Tompkins, and the grand jury had Horace Austin for its foreman, the members being Julius de Mun, John McKnight, James Irwin, Francis M. Benoit, Charles Davis, Peter Primm, Matthew Primm, Charles Sauguinet, Joseph Bush, John A. Bright, James Thomas, James Anderson, Benjamin Quick, Samuel Solomon, and Judathan Kendall. David Barton made his first appearance as deputy attorney-general.

The first act of the elective Legislature was to fix a standard of weights and measures, the next to provide for a census. A sheriff was to be appointed for each county every two years; the Court of Common Pleas was reorganized, with three judges for each county, appointed for four years each, and three terms to be held each year,—in St. Louis on the third Monday in February, the first Monday in June, and the third Monday in September,—the clerk, or prothonotary of the county, to be likewise recorder of deeds.

This Legislature further proceeded to incorporate the Bank of St. Louis, with a list of notable names, headed by Auguste Chouteau, as corporators. It set a regular day for elections, instituted county courts, arranged for judicial circuits, and provided for proceedings in appeal and equity. In subsequent proceedings of the Legislature, now fairly launched in business, the courts were further reconstructed, and in 1816 steps were taken to secure a suitable site and build a jail for the city and county. A market-house had been constructed some years before, engine companies started, and several municipal regulations established to prevent fires. One of the earliest lotteries in St. Louis was permitted to assist in raising three thousand dollars or under for the equipment of a fire company. Of this lottery, Auguste Chouteau, Wm. C. Carr, Theodore Hunt, Henry Von Phul, and Thomas F. Riddick were the commissioners. In the same year (1817) another lottery was instituted to provide money to build a Masonic Hall.

About the middle of July, 1815, Portage des

Sioux, in St. Charles, was the scene of some stirring and important events. At that time and place a large number of deputies or delegates from the Northwestern tribes of Indians met the commissioners of the United States government for the purpose of negotiating treaties of peace. The commissioners were Governor Clark, of Missouri Territory, and superintendent of Indian affairs west of the Mississippi River, Governor Edwards, of Illinois, and superintendent of Indian affairs in that Territory, and Hon. Aug. Chouteau, of St. Louis; Robert Wash being secretary of the commission, and Brig.-Gen. Dodge being present with a strong military force to preserve the peace and guard against surprise or treachery. One of the old citizens of St. Charles once consulted a lawyer as to whether he was entitled to bounty land under the laws of the United States, he having been engaged in the service of the government about two weeks at that time in driving a cart for some purpose. He well remembered the occasion of this conference, in connection with which his hauling was done. The time from July to October, 1815, was consumed in making treaties with the several tribes, treaties being made with the Pottawattamies, Piankeshaws, Sioux or Dakotahs, Mahas, Kickapoos, Sacs, Foxes, Great and Little Osages, Iowas, and Kaws. These treaties pacified these tribes for many years afterwards.

Among those who helped to promote the growth of St. Louis at this time by legitimate enterprise and honorable industry was Antoine Chenier, who was born at La Pointe Claire, Canada, on the 14th of April, 1768; the house in which he was born is still standing on a portion of the family estate. His ancestors were settled in Quebec in 1651. He was one of seven children, and was sent at the age of eleven years to the College of Montreal. On leaving school he engaged in active business, entering the Canadian fur company known as "L'Étoile du Nord." In later years Mr. Chenier often related many interesting incidents happening while he was trading with the Indians at Niagara Falls.

The spirit of adventure so characteristic of the Canadians prompted him to go West and explore its wilds. Arriving in St. Louis in 1795, he soon after entered the service of the leading Missouri fur-traders, and made many trips to the Rocky Mountains. He spoke fluently several Indian languages, and was a man of great influence among the savage tribes.

In 1806 he married Marie Thérèse Papin, daughter of Jean Marie Papin and Marie Louise Chouteau (sister of Pierre Chouteau).

Antoine Chenier's residence was on the north side of Market Street, between Main and Second. He was of a genial disposition, and his home was proverbial for its hospitality. He left seven children,—Antoine Leon Chenier (married to Miss Julia de Mun), Jules Chenier (married to Miss Josephine Lane), Mrs. Gen. Bernard Pratte, Mrs. Dr. Auguste Masure, Mrs. Joseph S. Pease, and Mrs. Gourd. Mrs. Pratte and Mrs. Gourd alone survive; the latter has been a resident for many years of Lyons, France.

Antoine Chenier was of a distinguished family, being descended from the Cheniers of France. This circumstance did not prevent his taking a lively interest in the prosperity of the infant settlement of St. Louis. It is related that in the early history of the place, when not one brick had been placed upon another in the form of a human habitation, his friends, knowing him to possess large capital, suggested to him the need of a bakery for the town. Consequently he sent to Canada and imported a baker and established him in the baking business, which was conducted a long time without a competitor, and proved very lucrative. Later the establishment was sold to Daniel D. Page, who afterwards became a prominent banker. Thus may Mr. Chenier be regarded in a certain sense as a pioneer in one of the largest and most necessary industries of which St. Louis can now boast.

Mr. Chenier was cousin of Dr. Jean Olivia Chenier, of Quebec, distinguished during the Canadian Revolution of 1837. Dr. Chenier was killed at the church-door of St. Eustache, which he was defending. The Canadians have erected a monument to him in the churchyard as one of their heroes.

Mr. Chenier died May 26, 1842, leaving a handsome estate. He passed away beloved and respected as one of the oldest and most esteemed French residents of St. Louis. His descendants are connected with some of the most prominent families of the city.

The town had now begun to grow very rapidly. Land speculations occupied the attention of every one, and attracted the attention of many strangers, but legitimate business attracted many likewise. A newspaper of the day remarks that

"since our roads have become dry and traveling is rendered agreeable, our towns and villages are crowded with strangers in pursuit of land, etc. We are rejoiced to learn that capitalists are now in search of a place to erect iron-works. Rich iron ore has been found on the Maramec and its tributary waters, the banks of all our rivers and creeks indicate the possession of various minerals; indeed, we only want men of science, industry, and enterprise to develop the mighty resources of this interesting country. A fertile soil, valuable mines, a fur and peltry trade calculated to employ a capital to an immense amount are only a part of the inducements which must give this country a decided preference to any of her sister Territories.

was an *attaché* o

year: very few have arrived, nor can we yet quote the price of furs. Provisions continue high,—superfine flour $10, bacon from $12 to $15 per cwt. Groceries rate as usual, very high, viz.: common Orleans sugar retails at 25 cents per pound, coffee 50 cents per pound. Boards and scantling continue extravagantly high and in great demand. Nine-inch and eighth boards sell briskly at $4 to $4.50 per 100 feet. There is no doubt, and we venture to assert, that a steam saw-mill established at this place would yield a greater profit than half a dozen large stores."

Edwards, in his "Great West," furnishes a retail price current of the same period, viz.:

Beef, on foot, per cwt	$4.00
Bread, ship, none	.....
Butter, per pound	25
Beeswax, "	25
Candles, "	25
Cheese, "	12½
" common, per pound	.....
Boards (none in market)	.....
Cider (none in market)	.....
Coffee, per pound	50
Cotton, "	40
" yarn No. 10	1.25
Feathers, per pound	50
Flour, per barrel, superfine, in demand	16.00
" horse-mill, fine, per cwt	6.00
Grain: Wheat, per bushel	1.00
Rye, "	62½
Barley, "	75
Corn, "	35
Oats, "	37
Gunpowder, per pound	1.00
Hides, per piece	2.75
Hams, per pound	12
Hogs' lard, per pound	12
Bears' lard, "	1.50
Honey, "	1.00

The growth of population was remarkable when the city did once begin to grow. The census of 1810 gave to the district of St. Louis (town and county) a population of 5667 in all. In 1815, Sheriff John W. Thompson took a census of St. Louis for purposes of taxation, and found 7395 persons in the county, and 2000 in the town of St. Louis, a growth of 1200 in the county in two years. The United States census of 1820 gave 9732 as the population of the county, of whom about 4000 are estimated to be townsmen of St. Louis. In 1828 the sheriff's census gave 11,880 people to the county, and 5000 to the city.

There is but little more to add. St. Louis became a city all at once, and the history of the municipality must be separately treated. The steamboat and the tide of immigration revolutionized the place and people, nay, they transformed even the wild savages in the plains and mountains to the westward.[1]

[1] In 1818 the government of the United States projected the celebrated Yellowstone expedition, the objects of which were to ascertain whether the Missouri River was navigable by steamboats, and to establish a line of forts from its mouth to the Yellowstone. The expedition started from Plattsburgh, New York, in 1818, under command of Col. Henry Atkinson. Gen. Nathan Ranney, a well-known citizen of St. Louis, not long ago deceased, was an *attaché* of this expedition; also Capt. Wm. D. Hubbell, afterwards a citizen of Columbia, Missouri. It arrived at Pittsburgh in the spring of 1819, where Col. S. H. Long, of the topographical engineers of the United States army, had constructed the "Western Engineer," a small steamer to be used by him and his scientific corps in pioneering the expedition to the mouth of the Yellowstone.

In 1874, Gen. Ranney presented to the Missouri Historical Society the following historical memorandum for incorporating in the scrap-book of the association: In 1818–19, Maj. Long, of the United States topographical engineers, built a steamboat at Pittsburgh for exploring the Western waters to the Yellowstone River. The boat was christened the "Western Engineer." On its stern (other authorities, and we believe them correct, say the image of the serpent's head projected from the prow instead of the stern of the vessel), running from the keel, was the image of a huge serpent painted black, with mouth red and its tongue the color of a live coal. The steam exhausted from the mouth of the serpent, which led the Indians to look upon it with astonishment and wonder. They saw in it the power of the Great Spirit, and thought the boat was carried on the back of the great serpent. Many were afraid to go near it, and looked upon the machinery of the craft with especial awe. The boat was in command of Lieut. Swift, though his name was in no wise applicable to the traveling capacity of the steamer. As a means of exploration she proved a success. She was a side-wheeler, and the first boat to ascend the upper Missouri.

The boat arrived in St. Louis June 8, 1819, and on the 21st of the same month, in company with the government steamers "Expedition," Capt. Craig, "Thomas Jefferson," Capt. Orfort, and "R. M. Johnson," Capt. Colfax, and nine keel-boats (the keel-boats had been fitted out with wells and masts by Aaron Sutton, the father of Richard D. Sutton, a well-known citizen of St. Louis) left on their long and perilous voyage. Their entrance into the mouth of the Missouri River was signalized by music, waking the echoes of the forest wilds, and by the streaming of flags in the breeze. It was the intention of those in charge of the expedition, out of respect to ex-President Jefferson, who had done so much to acquire Louisiana, to award the honor of the first entrance to the steamer bearing the name; but an accident to her machinery caused a temporary delay, and therefore the entry was made by the "Expedition," which slowly steamed her way to Fort Bellefontaine, situated about four miles from the entrance of the river. Afterwards they proceeded on their voyage, the "Jefferson," however, near Côte sans Dessein, being wrecked on a snag and lost.

We have given several lists of tax-payers in the course of this volume. We give here a selection from the leading names on the list of 1821, just preceding the incorporation of the city. The list includes in all four hundred and twenty-nine tax-payers; of these the principal eighty-five are here given, with the amounts for which they were assessed:

Bosseron, Charles	$6,225
Berthold, Bartholomew	7,600
Bates, Edward	1,000
Bob, John	2,800
Benoist, Toussain & Seraphin	1,200
Chenier, Antoine	9,175
Clark, Governor William	9,930
Chambers, William	1,200

We find that for the year 1821 the total taxes levied on property situated within the town limits and precincts is three thousand eight hundred and twenty-three dollars and eighty cents.

In 1821, the first directory ever published in St. Louis came out. The editor, Mr. John A.[1] Paxton, who was not without experience in the conduct of such publications, did his work conscientiously and well, and we cannot conclude the present chapter better than by giving a brief extract from Paxton's "The St. Louis Directory and Register, containing the names, professions, and residences of all the heads of families and persons in business, together with descriptive notes on St. Louis."

"In St. Louis," says Mr. Paxton, "are the following mercantile, professional, mechanical, etc., establishments, viz.: forty-six mercantile establishments, which carry on an extensive trade with the most distant parts of the republic in merchandise, produce, furs, and peltry; three auctioneers, who do considerable business, each pays two hundred dollars per annum to the State for a license to sell, and on all personal property sold is a State duty of three per cent., on real estate one and a half per cent., and their commission of five per cent.; three weekly newspapers, viz., *St. Louis Inquirer*, *Missouri Gazette*, and *St. Louis Register*, and as many printing-offices, one book-store, two binderies, three large inns, together with a number of smaller inns or taverns and boarding-houses, six livery-stables, fifty-seven grocers and bottlers, twenty-seven attorneys and counselors-at-law, thirteen physicians, three druggists and apothecaries, three midwives, one portrait-painter, who would do credit to any country, five clock- and watch-makers, silversmiths, and jewelers, one silver-plater, one engraver, one brewery, where are manufactured beer, ale, and porter of a quality equal to any in the Western country, one tannery, three soap- and candle-factories, two brick-yards, three stone-cutters, fourteen bricklayers and plasterers, twenty-eight carpenters, nine blacksmiths, three gunsmiths, two copper and tinware manufactories, six cabinet-makers, four coach-makers and wheelwrights, seven turners and chair-makers, three saddle and harness manufacturers, three hatters, twelve tailors, thirteen boot and shoe manufacturers, ten ornamental sign- and house-painters and glaziers, one nail-factory, four hair-dressers and perfumers, two confectioners and cordial distillers, four coopers, block-, pump-, and mast-makers, four bakers, one comb-factory, one bell-man, five billiard-tables, which pay an annual tax of one hundred dollars each to the State and the same sum to the corporation, several hacks or pleasure-carriages and a considerable number of drays and carts, several professional musicians, who play at balls, which are very frequent and well attended by inhabitants, more particularly by the French, who in general are remarkably graceful performers, and much attached to so rational, healthy, and improving an amusement; two potteries are within a few miles, and there are several promising gardens in and near to the town."

[1] In the title-page of the reprint the name is spelled thus, but in the preface the name is John *E.* Paxton.

"Such was St. Louis," says Mr. Edwards, in his "Great West," after quoting Paxton extensively, "in 1821, just before the season of emerging from a town to a city existence. In the place of bateaux and unwieldy barges, the Mississippi and other western waters have become freighted with steamboats, which at once superseded the oar and the *cordelle*. This new improvement bringing distant points in close connection and facilitating every avenue of trade to St. Louis, steamboats from the hour of their advent became invaluable; and so great was their acquisition to the commerce that in despite of the breaking of the banks, the depreciation of loan-office money, the general derangement of the currency, and the injurious operation of the stop laws, they gave a vitality to the business current which had otherwise stagnated from the opposing obstacles and barriers. Agriculture, after Missouri had become admitted as a State, began to receive considerable attention, and still further to increase the interest. A meeting was held in the town of St. Louis in May, 1822, for the purpose of organizing an agricultural society. At this meeting a committee was appointed to draw up a constitution for the government of the society, which consisted of the following respectable citizens, viz.: William C. Carr, Richard Graham, Robert Simpson, Joseph C. Brown, and Henry Watson. The society remained in existence many years, and did much for the improvement of agriculture.

"It is worthy of remark that the health of St. Louis at this early period, if the number of deaths be a criterion, would compare very favorably with that of the present day, when the city is subject to sanitary laws; and from the cultivation of the soil many marshes and ponds have been removed which then exhaled poisonous miasma. The number of interments from the 17th March, 1822, to the 29th of October of the same year was one hundred and three. The population of the town at that time was four thousand and eight hundred souls.

"On the 9th of December, 1822, an act was passed by the Legislature of Missouri to incorporate the inhabitants of the town of St. Louis, and in April, 1823, an election took place to elect the mayor and nine aldermen, in whom the act specified should vest the corporate powers of the city."

CHAPTER XV.

THE WAR WITH MEXICO.

On the 27th of February, 1845, the United States Senate passed what is called the "joint resolution" consenting that the territory "rightfully belonging to the republic of Texas" might be erected into a new State called the State of Texas; subject, however, to the adjustment by the United States government of "all questions of boundary that may arise with other governments." On the next day the resolution was concurred in by the House of Representatives, and on the 1st of March was approved by the President.

Texas assented to the terms of the joint resolution by her ordinance of July 4, 1845, and having formed her Constitution, became virtually a State in the American Union. Three days after this, on July 8th, the Texas convention requested the President of the United States to occupy the ports of Texas, and send an army to their defense. This request President Polk immediately complied with.

Mexico, which still claimed Texas as a portion of the republic, to which she had never relinquished her title, considered and treated the act of the United States in annexing and taking possession of Texas as an act of war, and accordingly Gen. Almonte, the Mexican minister to the United States, on the 6th of March, 1845, demanded his passports and returned to his government. On the arrival of news of the annexation at the City of Mexico, all diplomatic relations between the two governments were abruptly terminated, and the proceedings of the Mexican Congress manifested a highly belligerent spirit.

Neither Mexico nor the United States appeared to shrink from the issue; on the contrary, troops were ordered by both governments to march to the disputed frontier for the avowed purpose of defending the territory they respectively claimed. As a portion of that territory, the tract lying between the river Nueces and the Rio Grande, or Rio Bravo del Norte, was claimed by both nations, nothing less than a forbearance to set foot on the disputed territory could prevent collision between the two armies; and such forbearance was the more difficult, as a portion of the disputed territory was then actually in the occupation of citizens of Mexico.

As if in anticipation of a difficulty with Mexico, in consequence of the annexation of Texas, Gen. Zachary Taylor, then in command at Camp Jessup, was ordered to move his forces into Texas several weeks before the War Department had received information of the Texan ordinance. On the 28th of June, Mr. Donelson, then minister to Texas, and to whom Gen. Taylor was referred for advice as to his movements, wrote him that he had best move his forces "without delay to the western frontier of Texas," and also informed him that Corpus Christi, on Aranzas Bay, was the best point for the concentration of his troops. Gen. Taylor proceeded immediately with the forces under his command to Aranzas Bay, and in the beginning of August, 1845, had taken the position assigned him by the government. All the troops in the West, Northwest, and the Atlantic States which could be spared were ordered to join him, and in November, according to the report of the adjutant-general, his force numbered four thousand and forty-nine men.

On the 13th of January, 1846, the President ordered the Army of Texas to advance from Corpus Christi and take position on the left bank of the Rio Grande, and a strong fleet to assemble in the Gulf of

Mexico. On the 8th of March the advance column of the army, under Col. Twiggs, commenced its march from Corpus Christi, and on the 20th crossed the river Arroyo Colorado. On the 25th it established its position at Point Isabel, and on the 28th of March Gen. Taylor took position within cannon-range of Matamoras.

No actual violence was committed until April 10th, when Col. Trueman Cross, of Maryland, assistant quartermaster-general of the army, rode out of camp for exercise and was murdered by the enemy. The Mexicans continued their depredations until the 24th of April, when Gen. Arista, who had succeeded to the command of the army, communicated to Gen. Taylor that "he considered hostilities commenced and should prosecute them." On the same day he attacked a reconnoitering party of sixty-five American dragoons, and killed and wounded sixteen, and surrounded and captured the remainder. This skirmish roused Gen. Taylor to action. After reinforcing Point Isabel, the chief depository of his military supplies, he returned to his camp opposite Matamoras, and on May 8th met the main force of the enemy, advantageously posted near Palo Alto. After an engagement lasting from two o'cloc' in the afternoon until night, the Mexicans were driven from the field with great loss. On the following day, when within four miles of the Rio Grande, Gen. Taylor again encountered the Mexicans, strongly posted at the pass of Resaca de la Palma, and was again victorious. The Mexicans lost many prisoners, much valuable baggage and arms, and ceased not their flight until they either crossed or were overwhelmed in the waters of the Rio Grande. Besides these battles, the Mexican republic lost all power, either present or future, of retaining the vast territorial empire which it had once held east of the Rio Grande.

The intelligence of hostilities on the Rio Grande created the greatest excitement throughout the country. Congress was then in session, and the President immediately (May 11, 1846) sent in a message, in which he declared that the Mexican government had at last "invaded our territory, and shed American blood upon American soil. She has proclaimed that hostilities have commenced, and that the two nations are now at war." In the same message he "invokes the prompt action of Congress to recognize the existence of the war, and to place at the disposition of the Executive the means of prosecuting the war with vigor, and thus hastening the restoration of peace."

Congress, after less than two days' deliberation, declared "that by the act of the republic of Mexico a state of war exists between that government and the United States." At the same time Congress authorized the President "to employ the militia, naval, and military forces of the United States, and to call for and accept the services of any number of volunteers not exceeding fifty thousand, to serve twelve months after they shall have arrived at the place of rendezvous, or to the end of the war, unless sooner discharged."

The President, with the view of securing to the citizens of each State and Territory the privilege of participating in the war, apportioned the volunteer force under his call among the several States and Territories, and made a requisition upon the Governor of Missouri for one regiment of infantry, to rendezvous at Fort Leavenworth, as the quota of this State.

The Rio Grande was assumed by the government as the base-line of military operations, but the Mississippi became the true and real base of supply and movement, and New Orleans and St. Louis the great depôts for provisions and armament. Quartermaster and commissariat departments became at once very active; wagons, horses, provisions, and supplies of all sorts were to be found and purchased chiefly in the valley of the Mississippi, while military equipments were to be furnished from the Atlantic coast arsenals.

From the first St. Louis took a leading and active position for a vigorous and successful prosecution of the war. Upon the first outbreak of hostilities her sons volunteered and were eager to be placed in active service. As we shall see, in this, as in every other war in which they were engaged, they did their whole duty and were not wearied.

The people of St. Louis were already in a state of patriotic excitement in regard to the dangers surrounding Gen. Taylor's army in Mexico, when intelligence was received that hostilities had begun. The news was brought to the city from New Orleans by the steamboat "Pride of the West" on May 11, 1846. Judge Mullanphy, bearer of dispatches from Governor Edwards to his aid, Col. Robert Campbell, was a passenger on the vessel. Immediately on his arrival Col. Campbell placed the following *requisition* from Gen. Gaines and *order* from Governor Edwards in the hands of Gen. Milburn, who promptly issued them:

"HEADQUARTERS, WESTERN DIVISION,
"NEW ORLEANS, May 4, 1846.

"SIR,—Recent events in Mexico, and more especially on the Rio Grande, where hostilities against our pioneers and reconnoitering parties have commenced on the part of the troops of that nation, convince me that the government of the United States will no longer hesitate to authorize the concentration of a respectable force of Western volunteers upon that important portion of our national frontier.

"Having solicited the President's authority to concentrate upon that border fifty battalions,—each battalion to consist of six hundred men, to be accepted as volunteers into the service of the United States for six months, unless sooner discharged,—I take this occasion to say that Your Excellency will contribute much to the interest of the service, and anticipate a requisition from the War Department, by authorizing two battalions—one of infantry and one of riflemen,—of the chivalric volunteer corps of the State of Missouri to organize and repair to this city as soon as practicable, where they shall receive arms, with every requisite supply to render them *ready for action*; and from this place they will go by good steamers to Point Isabel.

"I have the honor to be, with great respect, your obedient servant,

"EDMUND P. GAINES,[1]
"*Major-Gen'l U. S. Army,*
"*Commanding the Western Division.*

"To His Excellency JOHN C. EDWARDS,
"*Governor of the State of Missouri.*"

[1] This unauthorized requisition of Gen. Gaines greatly embarrassed Gen. Taylor in his operations against Mexico, and was the subject of much correspondence between Gen. Taylor, the Secretary of War, and other officials. On April 26th, after hostilities had begun, Gen. Taylor had deemed it necessary to call upon the Governors of Texas and Louisiana for four regiments of volunteers, to enable him to prosecute the war with energy. Gen. Gaines in executing this requisition exceeded his authority by calling out, mustering into service, and sending to the Army of Occupation troops from Alabama, Mississippi, and Missouri. The difficulty arose from the fact that Gen. Gaines had mustered these volunteers into service for *six months*, although there was no law to give validity to his proceedings. To relieve Gen. Taylor of any embarrassment in the matter, the President in a letter to him dated May 23d recognized the call of Gen. Gaines to the extent of the number of troops already furnished under it, and requested Gen. Taylor to "receive them in the same manner as those embraced" in his requisition. Notwithstanding the efforts of the President to give validity to the proceedings of Gen. Gaines, there still remained the question as to the period for which the troops mustered in by him could be held for service. As they did not come within the provisions of the act of Congress of the 13th of May, 1846, the conclusion at which the War Department arrived was that they should be regarded as in service by virtue of the act Feb. 28, 1795, which limited their term of service to three months. The Secretary of War in a letter to Gen. Taylor, dated June 26th, gives his decision in the matter as follows: "A considerable body of troops beyond those embraced by your requisitions and the President's sanction have been mustered into service for six months by order of Gen. Gaines, and have before this time reported themselves to you. It is in relation to these six months' volunteers that the greatest embarrassment has been felt. They have yielded to invitations which they thought were authoritatively made or would be sanctioned, and have in most instances made personal sacrifices to obey the impulses of patriotism, and gone forth in the hope of having an opportunity of rendering valuable services to their country. To decline to receive them, to send them back to their homes without giving them employment, will undoubtedly cause regret, disappointment, and mortification; yet, after mature consideration, the government does not discover that there is any other alternative. They are not legally in the public service under any existing law, and the President cannot receive them as volunteers unless they should tender their services for twelve months, or during the war with Mexico." He suggested to Gen. Taylor to tender to them the alternative of becoming volunteers under the act of May 13, 1846, and if they declined he had no other course to pursue but to cause them to be returned to their respective homes. In conclusion he said, "This is truly a painful alternative, and most gladly would the government here avoid it if it could be done consistently with official obligations and a due regard to existing laws."

"TO THE PEOPLE OF THE STATE OF MISSOURI:

"FELLOW-CITIZENS,—Our frontier is in danger. The Mexicans invade our territory. War has commenced; the blood of our friends has been shed, and our army is menaced by superior numbers. Our country needs the services of her defenders at Point Isabel and near Matamoras. A new emergency offers, in which the soldiers of our country can further distinguish themselves for patriotism and bravery. TWELVE HUNDRED VOLUNTEERS ARE REQUIRED FROM MISSOURI. Let them be speedily raised. Every good citizen will lend his aid in concentrating a force to repel the attack of the Mexicans, and to procure by arms redress for the attempt to prevent the United States from asserting her claims within her own territory. As an inducement to enter the service promptly, the Missouri volunteers may be assured that those who reach the seat of war at an early period may be employed in active and hard service. Be prepared to fight. Expect no light work. A brave soldier has no reason to underrate his adversary. *Meet in St. Louis.* All necessaries will be furnished at that point. You will be armed in New Orleans, and shipped thence to the seat of war.

"JOHN C. EDWARDS,
"*Commander-in-Chief Mo. Militia.*"

In accordance with the requisition of Governor Edwards, Gen. Milburn issued the following brigade order:

"HEADQUARTERS, 1ST BRIGADE,
"2D DIVISION, MISSOURI MILITIA.
"ST. LOUIS, 11th May, 1846.

"The Governor of the State of Missouri, upon the requisition of Gen. Gaines, U. S. army, has called for TWELVE HUNDRED VOLUNTEERS from the State of Missouri, to proceed forthwith to Point Isabel, for the relief of Gen. Taylor. The Governor expects that five hundred can be raised in St. Louis, and, doubtless, that number, or near it, can be obtained from the regiments of the Legion and the 64th Regiment of the Missouri militia, commanded by Cols. Easton and Bogy, who are hereby required to assemble their respective regiments at the usual parade-ground, near the Park, at twelve o'clock tomorrow, the 12th instant.

"Other citizens who may in the mean time organize themselves into companies will also assemble at the time and place above named, when the services of the requisite number, not exceeding the limit of the call upon the State, will be accepted and organized.

"WILLIAM MILBURN,
"*Brigadier-General.*"

Upon receipt of the Governor's proclamation a number of the most prominent citizens thought it advisable to issue a call for a public meeting to be held in the rotunda of the court-house, "to consider measures necessary to be taken in relation to our present position with regard to Mexico." In response to the call an immense gathering took place on the

evening of May 11th. On motion of Samuel Treat, Maj. Thomas H. Harvey was made chairman, and Maj. A. I. Dorn secretary. The meeting was addressed by Messrs. Wetmore, Johnson, Ranney, Holt, Eager, and Treat, after which the following resolutions were adopted:

"*Resolved*, That, as it is characteristic with Missourians in all times of trial to their country to come forward *en masse* to its rescue, and as it appears from the recent news from the Rio Grande that the foe is upon our soil, we hereby pledge ourselves that the requisition of Gen. Gaines upon the Governor of our State for volunteers shall be fully and gallantly responded to, and that we will not turn back so long as a hostile foe presses our virgin soil.

"*Resolved*, That, in accordance with the call of Brig.-Gen. Milburn, we will meet at twelve o'clock to-morrow on the parade-ground, near the Park, to rally under the banner of our country, and with the firm determination that the Stars and Stripes shall never be disgraced whilst intrusted to our charge."

The military and citizens promptly responded to the call of Gen. Milburn. At an early hour on the following day (May 12th) the military companies were in motion, and in some places the officers were seen drilling their newly-enrolled men in the streets, disregarding the want of uniform. Gen. Milburn and several others appeared in their military dress. Between twelve and one o'clock the several companies of infantry, cavalry, and artillery had arrived at the Park, and during the council of the officers composing the Legion and Sixty-fourth Regiment the citizens and members of the companies amused themselves as they thought best. At a late hour in the afternoon, Gen. Milburn announced to the immense multitude that had assembled that the officers of the Legion had unanimously resolved to respond to the call of Gen. Gaines forthwith, and that such companies as had not already their full complement of men would be filled up by the reception of volunteers as speedily as possible. He further stated that the Sixty-fourth Regiment had reported two hundred and twenty-five men as ready for service, and that the requisite number would be obtained as soon as practicable. It was also stated, as the result of communications with the proper officers of the United States army, that the volunteers would be mustered into service in St. Louis; that transportation to New Orleans would be provided for them by the United States, and also commissary's stores; that they would be armed and equipped at New Orleans, on their reporting to Gen. Gaines; and that after serving their time of duty, six months, they would be transported to St. Louis and discharged, after receiving their pay, seven dollars per month. The St. Louis volunteers at this time went on the theory of a little pay and a good deal of glory.

Papers were presented by persons eager to form independent companies for the enrollment of such persons as desired to become members, and many signatures were obtained. During the day the several volunteer companies also received very considerable additions to their ranks. Indeed, in all sections of the State volunteers were organizing and pressing forward for active service, and such was the enthusiasm of the citizens of St. Louis that they alone could have supplied the full quota of troops required from Missouri under the President's requisition of May 13th. The *Republican* of May 14, 1846, referring to this generous enthusiasm, says,—

"The work of enrolling volunteers goes bravely on. There seems to be a deep and proper spirit pervading the community on the subject, and from present appearances a regiment will be ready for service in a few days. From a list taken at sundown we learn that the five companies of the St. Louis Legion had enrolled the following numbers: The St. Louis Grays, 55; Boone Infantry, 45; Montgomery Guards, 50; Morgan Riflemen, 93; Native American Rangers, 103; Total, 344."

In the mean time the commander of the St. Louis Legion had issued the following order:

"HEADQUARTERS
"FIRST REGIMENT OF THE LEGION,
"ST. LOUIS, May 12, 1846.

"At a meeting of the officers of the First Regiment of the Missouri Legion at St. Louis, it was unanimously

"*Resolved*, That the regiment responds to the call of Governor J. C. Edwards, commander, etc., of Missouri militia, for volunteers to be mustered into the service of the United States, and will proceed forthwith to recruit for said regiment, and be mustered as aforesaid at St. Louis.

"In accordance with the foregoing resolution the commandants of the several companies composing said regiment are directed forthwith to establish rendezvous for recruits, to complete the complement of eighty men, rank and file, for their respective companies, and report for service.

"New organizations of companies, completed as above, will be received into the regiment.

"By order of A. R. EASTON,
"*Colonel commanding First Regiment Legion.*
"J. C. SMITH, *Adjt.*"

At a meeting of Germans held at the Washington engine-house, on Second Street, on May 12th, fifty-six enrolled themselves immediately. The meeting then adjourned, to reassemble on the following day at the Oregon House, on Franklin Avenue, where many more were enrolled. On the 15th three companies of the Legion—the Native American Rangers, Montgomery Guards, and the Morgan Riflemen—went into camp on an open field, near where the Lucas Market now stands, west of the city as it then was, which was called "Camp Lucas." Here the commanding officers actively engaged in drilling their recruits and

supplying them with provisions and quarters. A large number of volunteers from Alton and from the Missouri River joined the command immediately upon its going into camp. On the 16th the steamer "Galveston" dropped down the river from Jefferson Barracks, having on board the United States troops from the barracks and two pieces of artillery. At the barracks three companies of volunteers had been sent on board the steamer, composed of the Grays, under Capt. Breedlove, Capt. J. F. Stockton's company, and Capt. Glenn's company. The "Galveston" started on her trip for New Orleans on the following morning. Three other companies of volunteers left on the same day in the steamer "James L. Day."

Before the St. Louis volunteers left for the South, a large sum of money had been raised by Col. Robert Campbell and a few other philanthropic citizens, to provide them with necessaries for the campaign. Bryan Mullanphy applied to the State Bank of Missouri for an advance of five thousand dollars on the pay of the volunteers; but this being declined, he asked a loan of that sum on his individual note at four months, renewable, offering good collateral security. This was also rejected, in accordance with the regulations of the bank, the vote standing: For the loan, Messrs. Christy, Campbell, Filley, Walsh, Helfenstein, and Kennett; against it, Messrs. Barnes, Collier, and Sarpy. Notwithstanding the vote in its favor, the loan was rejected for some unknown reason. The money, however, was forthcoming by private subscription, and over five thousand dollars was raised before evening of the 16th of May. On the next day a meeting of the citizens of St. Louis was held in the rotunda of the court-house for the same purpose. On motion of R. S. Blennerhasset, Judge Krum was called upon to preside, and Col. Thornton Grimsley appointed secretary. Mr. Blennerhasset, in an able and forcible manner, explained the object of the call, and on motion of I. A. Hedges the following committee was appointed to draft a preamble and resolutions expressive of the sense of the meeting: I. A. Hedges, Robert Campbell, S. Treat, Dr. Jacobson, and N. Paschall. The committee reported the following preamble and resolutions, which were adopted:

"WHEREAS, A number of citizens who are heads of families have responded to the call of the Governor of this State by volunteering to proceed to the relief of Gen. Taylor opposite Matamoras; and whereas, it is the duty of those who remain behind to aid all in their power in this general work of patriotism; therefore,

"*Resolved*, That the president of this meeting be requested to appoint a committee of five from each ward, whose duty it shall be to ascertain the names, residences, and conditions of the families of those volunteers who have families dependent on their exertions for support; and that said committee be empowered to receive and solicit donations for the benefit of said families which may need assistance hereafter.

"*Resolved, further*, That said committee appoint a treasurer and take all other steps which may be deemed proper to carry out the general object in view, the relief of the families of those volunteers which may need such aid."

On motion of Mr. Campbell, Col. Grimsley, Mr. Blennerhasset, and A. P. Ladew were appointed a committee to ascertain from the officers of the companies the names of the men having families who were leaving the city for the seat of war.

Three companies, composed of Germans from the Sixty-fourth Missouri Militia, paraded on the morning of the 16th at their encampment west of the city, and at noon marched on board the "Alleghany" and proceeded to Jefferson Barracks. On the morning of the 17th, William Palm, on behalf of a number of patriotic Germans, presented to the companies, but more especially to the *Texas Freischaar* (Texas Free Corps), commanded by Capt. H. Koch, a handsome national flag.[1] Capt. Koch received the flag on behalf of his company in a patriotic speech.

Soon after the presentation the company officers of the St. Louis Legion arrived, and in conformity with previous arrangements they, with the company officers of the Sixty-fourth Missouri, proceeded to constitute a regiment and to elect the field-officers. Gen. William Milburn was called to the chair, and Capt. Philip Salisbury and Lieut. Kayser were appointed secretaries. The companies represented were:

St. Louis Grays.—Capt. S. O. Coleman, 1st Lieut. G. W. West, 2d Lieut. George Knapp.

Boone Infantry.—1st Lieut. John Knapp, 2d Lieut. G. W. Davis.

Montgomery Guards.—Capt. P. Gorman, 1st Lieut. Degan, 2d Lieut. Mara.

Native American Rangers.—Capt. P. Salisbury, 1st Lieut. William A. Barnes, 2d Lieut. Henry L. Ross.

Morgan Riflemen.—Capt. McKellops, 1st Lieut. J. S. Moore, 2d Lieut. G. N. Miller.

Missouri Fusileers.—Capt. Nicholas Wochner, 1st Lieut. Alexander Kayser, 2d Lieut. Breidecker.

Missouri Riflemen.—Capt. Schaefer, 1st Lieut. Stoewner, 2d Lieut. Riseck.

Texas Free Corps.—Capt. Henry Koch, 1st Lieut. Geis, 2d Lieut. Kroeschell.

On motion of Lieut. Kayser, it was agreed that the consolidated regiment should be known as the "St. Louis Legion," and an election of officers being held *viva voce*, Alton R. Easton was unanimously elected colonel; Ferdinand Kennett, lieutenant-colonel; and Godfrey Shœnthaler, major. On the following day

[1] In his presentation speech Mr. Palm said, "Of all the sons of Missouri this battalion has the honor of being the first to get ready and take the field at the call of our country."

Col. Easton assumed command of the Legion, and announced to the companies in the city that he had informed Col. Davenport, at Jefferson Barracks, that he was ready to muster his command into service. On the 19th, Col. Davenport complied with his request, and in the morning mustered into the service of the United States the three companies of the Legion then at the barracks, and in the afternoon the five companies that were encamped near the city at Camp Lucas. The companies at the barracks numbered over two hundred and fifty men, and the companies at Camp Lucas about four hundred. The Legion was composed chiefly of the officers and some of the privates of the St. Louis Legion and the volunteer companies of the Sixty-fourth Regiment. The residue was made up of recruits, who were taken from the young men and citizens mostly of St. Louis, and the whole was as fine-looking a body of men as were ever mustered into the service. They were mostly young, ardent in their feelings, and zealous in the cause for which they enrolled themselves.

The captain of the Boone Infantry not being able to accompany his company, at an election held on the 18th of May, First Lieut. John Knapp was elected captain; Thomas H. McVicker, first lieutenant; and James Brown, second lieutenant. Capt. P. Gorman, of the Montgomery Guards, also being unable to leave with his company, resigned, and on the same day First Lieut. John Watson, Jr., was elected captain; P. Deegan, first lieutenant; and T. Mara, second lieutenant. While Capt. Schaefer, of the Missouri Riflemen, was going to Jefferson Barracks the same day his carriage upset, and his collar-bone and two of his ribs were broken.

On the 20th a beautiful flag was presented to the St. Louis Legion, at Camp Lucas, by Mrs. J. M. White and her daughter, Mrs. Ferdinand Kennett, through Col. F. Kennett, who delivered an address, which was enthusiastically received. The flag bore on one side the coat of arms of Missouri, and on the reverse the American eagle, with the inscription, "Success to the brave. May your trust be in God." Col. Easton received the flag in the name of his command with a few stirring remarks. Speeches were also made by T. H. Holt and Col. Davenport, United States army. Another handsome flag was presented to the Boone Guards by A. B. Chambers, one of the editors and proprietors of the *Republican*. May 21st the Montgomery Guards were presented with a banner by the Union Fire Company, with whom they had long been associated. Samuel Hawkins made the presentation speech, to which Capt. Watson replied, and Samuel Treat added a few "animated remarks."

In the mean time all was bustle and stir at Camp Lucas in preparation for the departure of the troops to the South. The subscriptions which had been raised in the city were sufficient to permit the advance of one month's pay to each member of the corps that desired it. Besides these a number of patriotic citizens made many useful and acceptable presents to the companies.[1]

To afford further assistance to the wives and children of those who had enlisted in the army, an adjourned public meeting of the citizens was held in the rotunda of the court-house on Tuesday evening, May 19th, which was presided over by Hon. John M. Krum, with John Simonds as secretary. The meeting adopted the following resolution:

"*Resolved*, That the president of this meeting be requested to appoint a committee of five from each ward, whose duty it shall be to ascertain the names, residences, and condition of the families of those volunteers who have families dependent on their exertions for support; and that said committee be empowered to receive and solicit donations for the benefit of said families which may need assistance hereafter."

The chair thereupon appointed the following gentlemen to constitute the committee named in the resolution, with Hon. Bryan Mullanphy as treasurer:

"*First Ward.*—James G. Soulard, J. McHose, John Dunn, R. S. Blennerhasset, Henry Helgenberg, and for physician, Dr. Campbell.

"*Second Ward.*—D. D. Page, Wilson Primm, Doctor King, Fred. Lenkemeyer, W. D. Oruch, and for physician, Dr. Engleman.

"*Third Ward.*—Fred. Jacoby, R. McO. Blenis, L. A. Benoist, A. Billings, Charles Meier, and physician, Dr. McMartin.

"*Fourth Ward.*—J. B. Brant, H. R. Moreland, M. Leslie, Samuel Staley, R. Barth, and physician, Dr. Hardinge Lane.

"*Fifth Ward.*—Archibald Carr, J. W. Ormsby, Thomas J. Meier, William Branigan, Charles Bierman, and physician, Dr. Carpenter.

"*Sixth Ward.*—D. Childs, Hugh Rose, John Brockman, David Dixon, Capt. Case, and physician, Dr. Jennings.

Each man of the command was provided with a blanket, and the officers procured clothing of a uni-

[1] The *Republican* of the 19th says, "Mr. H. Bay, hardware merchant, on Third Street, opposite the new market, presented the Native American Rangers with twelve dozen of knives suitable for their use. Mr. T. Campbell and Mr. H. Shaw presented to the companies a large and very acceptable supply of tobacco. Thus far many of the recruits who are without the present means of subsistence have been supported by the officers."

Again, on the 23d, the same paper said, "The Morgan Guards request us to return their thanks to Mrs. J. M. White, for a large lot of bread, butter, and provisions; to Messrs. Child, Farr & Co., for seven dozen knives; to Bird, Rucker & Co., for a lot of tinecups; to Andrews & Beakey, for a lot of tinware; to Mr. Newberry for same; to Mr. T. Campbell for tobacco; and to others for provisions."

form color, style, etc., suitable for the season and climate. For arms and accoutrements they relied upon the United States government to supply them at New Orleans. On the 20th all the companies had their complement of men, but volunteers were daily added to them. According to the muster-roll at this time the companies at Camp Lucas were officered as follows:

St. Louis Grays, S. O. Coleman, captain; George W. West, first lieutenant; George Knapp, second lieutenant; sixty-eight men.

Native American Rangers, Philander Salisbury, captain; William A. Barnes, first lieutenant; Henry L. Ross, second lieutenant; one hundred and three men.

Boone Guards, John Knapp, captain; Thomas H. McVicker, first lieutenant; James Brown, second lieutenant; sixty-five men.

Montgomery Guards, John Watson, Jr., captain; Patrick Deegan, first lieutenant; Thomas Mara, second lieutenant; sixty-seven men.

Morgan Riflemen, H. J. B. McKellops, captain; J. T. Moore, first lieutenant; George N. Miller, second lieutenant; eighty-three men.

On Saturday morning, May 23d, the Legion broke up their camp and embarked on the steamer "Convoy" for the seat of war. As we have before stated, the five American companies had been encamped at Camp Lucas, in the rear of the city; and as they marched through the streets, at ten o'clock in the morning, on their way to the boat, they were greeted with the greatest enthusiasm. They presented a really martial appearance, and it is not unmerited praise to say that no finer body of men—young, stout, active, and capable of enduring hardship—was ever mustered into any service. The parting of friends, the separation of relatives, the roll of drums, the rush of baggage-wagons, and the striking of the tents in the camp gave their departure an appearance not often witnessed in this country, and seldom before in St. Louis. Along the route of march the excitement was intense, and the crowd in the streets was so great that it was with difficulty a passage could be kept open for the troops. On Front Street there was an immense concourse of people. Every window was lined with ladies waving their handkerchiefs, and every boat in port was crowded with enthusiastic spectators.

The companies marched on board the "Convoy" in the order of their seniority,—first, the St. Louis Grays; second, the Boone Guards; third, the Montgomery Guards; fourth, the Morgan Riflemen; fifth, the Native American Rangers, bearing the flag of the Legion. About one o'clock the "Convoy," accompanied by the "Luella," on board of which a large number of distinguished citizens had gathered to see the Legion off, proceeded to Jefferson Barracks, where the three German companies, composing the residue of the command, were to embark.[1] When the two steamers arrived at Jefferson Barracks the three German companies were drawn up in line on the shore, and sang "Faderland" with fine effect, and then embarked on the "Convoy." Before the boats separated Hon. Trusten Polk addressed the Legion from the hurricane deck of the "Luella," on behalf of the citizens of St. Louis.[2]

On May 24th the Legion reached Cairo in good spirits. Two accidents, however, occurred during the night of the 23d. James Regan, belonging to the Morgan Riflemen, and Ludwig Heller, a German from the St. Louis arsenal, bound for Baton Rouge, fell overboard and were drowned. On the 28th the Legion reached New Orleans, but was not permitted to land, with the exception of two officers, who reported to Gen. Gaines. The troops were disembarked at the barracks about three miles below the city and went into camp. On June 4th the Legion sailed in the "Galveston" for Point Isabel. The distinguished honor was awarded to the St. Louis Legion of being the first regiment to report at New Orleans from any State north of Louisiana, and from this circumstance the precedence was accorded of sailing first for the seat of war, as well as some other privileges. The Legion arrived at its destination on the 7th, and landed on the same day on the west bank of the Brazos.

Having thus given the movements of the St. Louis Legion to Mexico, we will now retrace our steps and note the movements of other military commands in the order in which they occur.

Col. Thornton Grimsley, on May 19, 1846, gave notice through the newspapers of St. Louis that it was his intention to raise a regiment of one thousand mounted men to join the force that was to accompany

[1] It was an encouraging incident that, just before the boat left St. Louis with the volunteers, news was received of the first battles fought between the American and Mexican armies on the 8th and 9th of May, which resulted in victories for Gen. Taylor. The boats with the troops on board passed up in front of the city, and as they turned down stream the boatmen commenced firing a small cannon by way of salute. At the second discharge, which was premature, one man was killed and another mortally wounded.

[2] In his address Mr. Polk stated that the Legion was going to the war "as the representatives of Missouri, one of the youngest of the sisterhood of the States, who, as a proud mother, has warmly adopted you all—for very few of you were born upon her soil—as her children equally beloved. You go as the representatives of St. Louis, the Queen City of the West,—as the representatives of her gallant sons and the champions of her fair daughters." He concluded with the words, "Let your trust be in God, and cursed be he who turneth his back upon the enemy."

Col. Kearney on his expedition to New Mexico. He established his headquarters over C. F. Hendry & Co.'s store at the corner of Market and Second Streets. The regiment recruited rapidly, and on May 25th it was announced that he had nearly six hundred men enrolled. Col. D. D. Mitchell also made efforts to raise a mounted regiment.

In the mean time volunteers continued to pour into St. Louis, eager to be mustered into the service of the government. On the 21st three companies arrived on the steamer "Wapello," one of fifty-one men, from Gasconade County, under the command of Capt. Samuel Parham, and one of sixty-three men, from Franklin County, under the command of Capt. John D. Stevenson, both of the Second Brigade of Missouri militia. The third company consisted of seventy-three men, from Osage County, and was under the charge of Capt. Augustus Rainey.

Adjt.-Gen. Parsons, of the State militia, on the same day issued general orders directing the enrollment of fifty volunteers in each of the counties of St. Charles, Montgomery, Warren, Callaway, Cole, Osage, Cooper, Boone, Saline, and Gasconade, one hundred in Franklin, and one hundred and fifty in Howard and Chariton, making seven hundred and fifty in all. The volunteers were to elect their own officers, and rendezvous at St. Louis, "where," it was stated, "they will be furnished with supplies and transportation to the city of New Orleans, at which place they will be armed and equipped complete and transported to the seat of war in Texas." The companies thus organized were not to receive pay unless they were mustered into active service. In response to this order volunteers flocked into St. Louis without any organization, relying confidently on being taken into service and receiving subsistence. As a consequence the citizens had to provide for their support by voluntary subscriptions. On the 25th of May it was estimated that there were at least three hundred volunteers in the city from the vicinity of the Missouri River. On the 24th the steamer "Lewis F. Linn" brought down two companies of volunteers, one from Booneville, consisting of sixty-nine men, under the command of Capt. Joseph L. Stevens, of Cooper County, and the other from Jefferson City, numbering seventy-eight men, commanded by Capt. Lucius Easton, of Cole County. In a few days these were joined by one company from Gasconade County, numbering fifty-one men, under the command of Capt. S. Parham; one from Franklin County of sixty-three men, J. D. Stevenson commanding; one from Osage County of seventy-eight men, Capt. Augustus Rainey commanding; one from Monteau County of sixty-two men, Capt. Hammond commanding; and one from Saline County of seventy men, Capt. John W. Reid commanding. Immediately upon the arrival of the companies from Gasconade, Franklin, and Osage Counties they reported to Col. Robert Campbell, aid to the Governor, who supplied quarters for them in the State tobacco warehouse. On the arrival of the companies from Cole and Cooper Counties the "Lucas Market," just finished, but not yet opened for public purposes, was promptly offered for their use by the proprietors, but it was finally determined to take the rotunda in the court-house, which had been placed at their disposal by A. Gamble, acting as one of the judges of the county court. Orders were given for provisions to be furnished them, and they were complied with. On the 25th, Col. Campbell waited upon Col. Davenport, at Jefferson Barracks, and urged upon him the necessity for the concentration of additional forces at the South, and begged that the several companies be mustered into service immediately. Col. Davenport declined the request, on the ground that the application of Gen. Gaines for authority to make requisitions for volunteers had not met with the approval of the government, and added that he did not feel authorized to muster them into the service of the United States, nor at liberty to act further in the premises. In consequence of this decision of the government mustering officer, the only alternative left Col. Campbell was to make arrangements for the return home of the several companies, which he did at once. Provisions were purchased and transportation provided by Col. Campbell, and the companies were sent back without delay.

While Gen. Taylor was operating on the Rio Grande, the War Department at Washington determined to send two columns against the northern provinces of Mexico, under the command respectively of Gen. Wool and Col. Stephen Watts Kearney. The movements of these corps, if less important in a military point of view, were vastly more extensive in their geographical scope and relations. It was their fortune to traverse magnificent plains, perform rapid and, in modern history, unprecedented marches, and conquer for the United States lands unsurveyed and almost uninhabited. The origin of these expeditions seems to have been an idea entertained by the government that the States of New Mexico—Chihuahua, Durango, and others in the upper portion of Mexico—stood ready to declare themselves independent, and that by this movement they would be at once detached from the central government. With such views the War Department determined to organize a corps called the "Army of the West," which was intended to conquer

New Mexico by marching into Santa Fé. This place, though very unimportant as a town, was a point of concentration for the extensive trade which flowed through it from Chihuahua on the southwest, and St. Louis on the northeast. Vast as were the plains and the uninhabited regions through which this trade was carried on, it had grown within a few years to be one of great magnitude and value. On the 16th of May, 1846, at the very time Congress recognized the existence of the war, and troops were being fitted out in St. Louis for Mexico, a company of Mexican traders arrived at St. Louis, through Santa Fé, from Chihuahua, with no less than three hundred and fifty thousand dollars in specie, to expend for wares and merchandise in St. Louis. The annual trade from Santa Fé with St. Louis and some other Eastern cities was estimated to amount at this time to from one to two millions of dollars. One of the results of the war was the loss of most of this trade to St. Louis.

Col. Kearney, of the First Dragoons, United States army, a very able and skillful officer, early in May received orders to organize the Army of the West, and made a call on Governor Edwards for State volunteers to join the expedition. Immediately on the receipt of this requisition the following order from the adjutant-general of the State was addressed to Col. Robert Campbell, through the hands of Capt. T. B. Hudson:

"MISSOURI.

"HEADQUARTERS OF THE MILITIA,
"OFFICE OF ADJ.-GENERAL, CITY OF JEFFERSON,
"May 24, 1846.

"SIR,—You are commanded to raise forthwith, in the county and city of St. Louis, four hundred volunteers of mounted men. You will receive no man who is in years apparently over forty-five or under eighteen, or who is not in physical strength and vigor; nor the horse of any volunteer not apparently sound and effective, with the necessary horse equipments or furniture. You will be particular in not receiving more men than the number here ordered.

"These volunteers are destined for the frontier, and they will immediately proceed with all possible dispatch to Fort Leavenworth, reporting themselves, by their officers, to the commanding officer at that point. They will there be organized into regiments of cavalry, mounted men, or light artillery, and be mustered into the service of the United States. You will report promptly to this office your proceedings under this order.

"I have the honor to be, sir, very respectfully, your obedient servant.

"By order of the Commander-in-Chief.

"G. A. PARSONS,
"*Adjutant-General Mo. Militia.*

"ROBERT CAMPBELL,
"*Aide-de-Camp to the Commander-in-Chief, 2d Division.*"

Corps of mounted volunteers speedily organized in various counties of the State in conformity with the Governor's requisition, and company officers were elected. In St. Louis there was no lack of volunteers, as the city responded as promptly to this call as she had to the call for troops for the South. On the 28th of May the St. Louis Mounted Rangers were organized by the election of John C. Dent, captain; John W. McDonald, first lieutenant; and J. Le Roy, second lieutenant. The Laclede Mounted Rangers were organized on the same day by the election of Thomas B. Hudson, captain; Richard S. Elliot, first lieutenant; and Louis T. Labeaume, second lieutenant. At the same time the St. Louis Horse Artillery organized at Union Hall, corner of Third and Pine Streets, by the election of the following officers: Richard H. Weightman, captain; Andrew J. Dorn, first first lieutenant; Edmund F. Chouteau, second first lieutenant; John O. Simpson, second lieutenant; John R. Gratiot, first sergeant; Davis Moore, second sergeant; A. V. Wilson, third sergeant; Wm. H. Thorpe, fourth sergeant; Wm. C. Kennerly, first corporal; Clay Taylor, second corporal; T. F. Anderson, third corporal; J. R. White, fourth corporal.

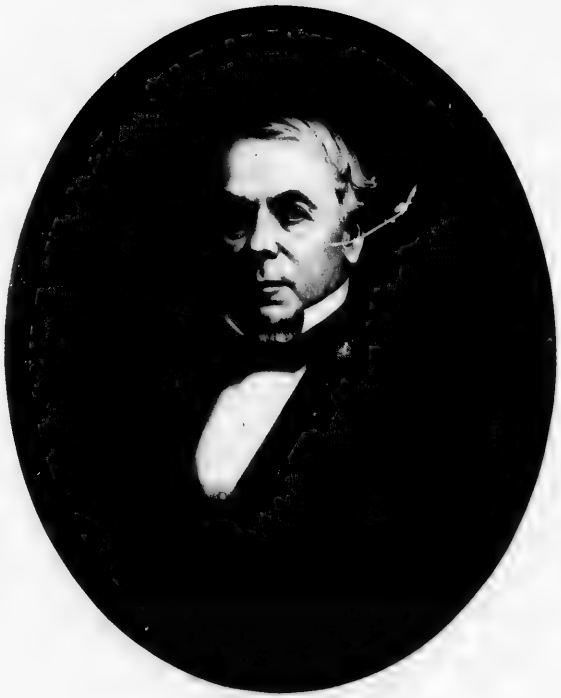
Another artillery company was organized, with Frederick Kretschmar, captain, and Messrs. Kumsler, Ausog, and Gibson, lieutenants.

On the 30th all the companies of volunteers that had been organized for the Army of the West paraded in Lucas Park, and Col. Campbell inspected and accepted the services of the following companies: The German troop of horse, under command of Capt. Fischer; the Laclede Rangers, under Capt. Hudson; a company from Florissant, under Capt. Edmonson; and the company of horse artillery, commanded by Capt. Weightman. Capt. Kretschmar tendered his company of artillery, but insisted that they should be specially accepted for artillery service. The company not being quite full, and there being some doubt as to the power of the authorities to receive it with such a condition, it was not accepted.

The four companies inspected and accepted had each their full complement of one hundred men and fourteen officers, etc., and filled the requisition which had been made on the county. There were two companies from the country, which united, and elected Mr. Edmonson captain, and J. C. Dent (the captain of the other) first lieutenant. The intelligence of their acceptance was received with repeated cheers by the members of the respective companies. In the evening Col. Campbell gave the officers of the various companies a banquet at the Planters' Hotel.

As has already been seen in these pages, Col. Campbell was exceedingly active, and did more, perhaps, than any other man in St. Louis in fitting out troops for the war in Mexico. In many respects he was one

of the most remarkable of the many conspicuous figures in the early history of St. Louis, and, as the companion of the intrepid Ashley, Sublette, and other traders and explorers, assisted in building up the great fur trade which at one time gave St. Louis a peculiar prominence and importance in the eyes of the commercial world. It was, however, in connection with his services in the Mexican war, as aid to Governor Edwards, that Col. Campbell appeared most conspicuously before the public, and to his indefatigable labors in organizing and directing the great volunteer movement of 1846, St. Louis and Missouri are chiefly indebted for the fact that they now occupy so proud a place in the annals of that conflict. Immediately upon the receipt of the declaration of war Col. Campbell tendered his services to the State government, and was appointed a member of the Governor's staff, with the rank of colonel, and inspector-general of the Missouri troops. He displayed the greatest energy and enthusiasm in the laborious work of organizing the various regiments and raising them to an effective military standard, and to him more than any other single individual was due the promptitude with which the troops were disciplined, equipped, and forwarded to the seat of hostilities, which, however, as elsewhere stated, many of them never reached. Years before, however, Col. Campbell had gained an enviable reputation for great energy of character, rare administrative ability, and dauntless courage, in connection with his fur-trading operations in the Indian country, in conducting which he did as much perhaps as any other single individual to give St. Louis her early fame in the far West. After achieving prominence in the fur trade, he was for nearly half a century a conspicuous figure in St. Louis business and social circles, and in every relation of life was eminently worthy of the regard in which he was universally held.



He was born at Aughlane, near Plumbridge, County Tyrone, in the north of Ireland, of Scotch descent, in 1804. In the year 1824 he immigrated to St. Louis, and at once engaged in an active business life; but about a year later was prostrated with congestion and bleeding at the lungs, and on the advice of his physician, the well-known Dr. Bernard G. Farrar, he visited the Rocky Mountains for his health, which becoming greatly improved, he was induced to remain in that section, and soon became intimately engaged with a number of the enterprising men who prosecuted the fur trade in those wild and almost inaccessible regions. He was first associated with Gen. Ashley, and accompanied him to the banks of the Green River, or Colorado of the West, known by the Indian name of Seeds-ke-dee-agie. On this expedition a footing was secured and a complete system of trapping organized beyond the Rocky Mountains. In this hardy school a number of leaders sprang up, among whom were Campbell, Smith, Sublette, Fitzpatrick, and Bridger, and in endurance, courage, and sagacity Campbell was second to none of those named. Gen. Ashley retired in 1830, having amassed a fortune, and then Campbell rose from being merely a leader of expeditions to the position of a prominent partner in the Rocky Mountain Fur Company, which was organized upon the withdrawal of Gen. Ashley, the leading spirits in its formation being Robert Campbell and Col. William Sublette. The American Fur Company, represented by Chouteau & Co., was an energetic rival in the field, and the vastness of the operations of these competitors appears from the fact that when, in order to prevent ruinous rivalry on the same ground, a division of the territory was agreed upon, there fell to Mr. Campbell's company all the immense region west and south of a line commencing on the Arkansas River at a point south of the Platte, on the twenty-fourth meridian, up to the forks of the Platte, thence to the dividing line of the waters emptying into the Platte and the waters emptying into the upper Missouri, thence to the Rocky Mountains, and thence to the forks of the Missouri.

Mr. Campbell remained thus employed until 1835, when he sold his interest, and in the fall of that year returned to St. Louis, and his life on the plains was ended. His experience and adventures during the ten years of his absence from the comforts of civilization would, if written out, add an interesting chapter to the fast-fading history of that romantic episode in the career of St. Louis, the quest of many of her daring sons after the furry wealth of the wild West. Great names are associated with the fascinating annals of this epoch. John Jacob Astor had a house in St. Louis, and there were also engaged in the trade Gen. Ashley, Campbell, Sublette, Manuel Lisa, Capt. Perkins, Hempstead, William Clark, Labadie, the Chouteaus, and Pierre Menard,—"mighty hunters before the Lord,"—all of whom either lived in St. Louis or made it their headquarters. At one period, indeed, a considerable portion of the population of St. Louis was composed of hunters and trappers.

Campbell's experiences in the fur trade were as stirring as those of any of the famous men whom we have mentioned. There were wild scenes of daring adventure, privations from cold and hunger, and deadly conflicts with the savage tribes, including the battle with the Blackfeet Indians, in which Capt. Sublette and Mr. Campbell displayed intrepid bra-

very, and which forms an interesting chapter in Washington Irving's "Adventures of Capt. Bonneville."

While in the West, Mr. Campbell made St. Louis his headquarters, and, as we have intimated, the great fur-trading interest of the country centred here, and, more than any other interest in those days, contributed to build up the town and give it reputation abroad. For many years after he had retired from the fur trade, Mr. Campbell's name was echoed throughout the West, from the Yellowstone to Santa Fé, and was good for any amount, however large. An army officer once related, as an evidence of the estimation in which Col. Campbell was held in the trading regions, the fact that while traveling on the Upper Missouri in 1855, he was robbed by the Indians of his animals, etc., and desiring to purchase a new traveling outfit, he endeavored to raise money from the traders at Fort Pierre, offering them drafts on the government of the United States, but they refused them; they, however, without hesitation accepted drafts on Robert Campbell at St. Louis, for they knew him and could trust him.

Campbell's straightforward and truthful dealings made a similarly happy impression on the Indians. He never deceived or cheated them, as many white men had done, and therefore enjoyed their perfect confidence and friendship.

He acquired a large fortune in the fur trade, and upon returning to St. Louis engaged in mercantile and other pursuits, and became an extensive owner of real estate. He always interested himself in public enterprises, and generally aided largely in carrying them on. He was president of the old State Bank and of the Merchants' National Bank; but perhaps his most important investment was the purchase of the old Southern Hotel immediately after its completion. Col. Campbell was at first a partner in this enterprise and afterwards sole proprietor. When the Mexican war broke out, as previously stated, he at once took a leading place among the citizens of St. Louis in the work of organizing and equipping the troops. About the same time a movement was organized in St. Louis for the relief of sufferers by the famine in Ireland, and such were the services of Col. Campbell in aid of this laudable object that, upon visiting that country many years later, the people of Plumbridge, his native place, honored him with a public reception, the erection of triumphal arches, the firing of cannon, etc., and at night illuminated the town, lit bonfires, and held a mass-meeting in compliment to their guest.

Col. Campbell was a man of great generosity and warm, benevolent impulses, but always shunned publicity in his benefactions. Privately he gave much and gave continuously, but always with thoughtful discrimination and to good purpose, and accomplished an amount of good that will never be known. His services in connection with the Indian problem were peculiarly valuable and important, not only to the Indians themselves, but to the country at large. His intimate knowledge of the Indian character, gained by ten years' residence among the savages, was made use of more than once by the government on important occasions. In 1851, accompanied by the famous Father De Smet, he assisted in a great council attended by ten thousand Indians at Horse Creek, near Fort Laramie, where a treaty was formed, from which for some years excellent results accrued. In 1869, although of a different political party, President Grant appointed him a member of the celebrated Indian commission, selected on "peace principles" "from men eminent for their intelligence and philanthropy," as the law instituting the commission prescribed, to bring about more amicable relations than then existed between the government and the Indians. Col. Campbell was third on the list of appointees, all of whom served without compensation. The commission visited all the prominent Indian reservations, and no doubt accomplished a large amount of good. In most of the councils Col. Campbell took a leading part, and though not much accustomed to public speaking, his remarks on these occasions were clear, short, incisive, practical, and carried great weight. From his long experience with the Indians, he probably contributed as much to the success of this undertaking as any member of the commission.

In private life, Col. Campbell was a genial, hospitable gentleman, and his residence was a place endeared to his friends by an atmosphere of cordial welcome and unaffected kindliness. Here his estimable wife, the daughter of Hazlett Kyle, of Raleigh, N. C., presided with rare grace and tact. Mrs. Campbell was educated in a thorough manner in Philadelphia, where Mr. Campbell made her acquaintance. She was noted for beauty and intelligence, but much more for her kind and amiable disposition, and was remarkable for her singular devotion to her husband and children. In all the years that this happy couple lived in St. Louis, they dispensed hospitality on the largest scale. Many of the most distinguished personages of the times, not only of America but from abroad, were their guests, and upon such occasions Mrs. Campbell demeaned herself with a grace and dignity that won the hearts of all who received her attentions. She survived her husband about two and a half years.

Mr. Campbell's honest and earnest qualities brought him many friends; and yet he was not lavish of his friendship. Where he could not feel respect he never professed to be a friend. But if slow to admit strangers to his intimacy, he never forgot the claims of those whose worth he had proved. To use Shakespeare's striking figure, he grappled such to his soul with hooks of steel, and his friends were the friends of a lifetime. Their attachment for him rested on the solid basis of respect for all that is valuable in human nature. If such ever did him a favor his gratitude knew no bounds.

And so for over fifty years he lived, a most conspicuous citizen of St. Louis, and yet during that long period, detraction never once ventured to bring a colorable charge against him. He died on the 16th of October, 1879, full of years and honors, the work of his life finished; and his friends and the community mourned the loss of one whose name, even to strangers, was the equivalent of unblemished integrity, and to his friends the pledge, in addition, of loyalty to truth, hospitality, kindness, courtesy, and generosity. By his family he was mourned as one who, as husband, brother, and father, was a loving example to all.[1]

The Laclede Mounted Rangers, on the 6th of June, 1846, embarked on the steamer "Pride of the West," and at an early hour on the following morning took their departure for Fort Leavenworth.[2]

After the company, numbering over a hundred men, had embarked, they were paraded on the upper deck of the boat, inspected, and mustered into service by Gen. Milburn. This done, Mr. Treat, on behalf of several ladies of St. Louis, presented the company with a handsome flag of rich material.

On June 8th, the artillery companies, under the command of Capt. Weightman, Capt. Fischer, and Capt. Edmonson, paraded at Camp Lucas. Each company had the requisite number of men, but there were a few in one company not provided with horses, although they had been purchased and were hourly expected.[3]

When the companies were assembled and formed on the ground, Gen. Milburn read to the captains of the several companies the order of the acting Governor, by which he was required to form a battalion of artillery out of the four hundred men called for from St. Louis County, and directing that this battalion only should be sent forward to Fort Leavenworth.

Gen. Milburn then stated that, from the manner in which Capt. Weightman's company had been raised and accepted, he felt bound to regard it as one of the two companies to compose the battalion, and the only question to determine was which of the other two should be accepted. At the request of the general, Capt. Fischer stated his experience as an artillery officer, which was, in brief, that he had served several years as a first lieutenant in the artillery service of Prussia, and that he had held a commission and had been promoted. Capt. Edmonson did not assert for himself any considerable acquaintance with artillery tactics, but rested his claims and the claims of his company on other grounds. The general, being unable to decide between them, drew lots, and the selection fell on Capt. Fischer's company. The battalion

[1] Hugh Campbell, brother of Col. Robert Campbell, was also for many years a leading citizen of St. Louis. He was born in County Tyrone, Ireland, on the 1st of January, 1797, and died on the 4th of December, 1879. He was educated at Edinburgh, Scotland, for the medical profession, but never practiced, having decided to seek his fortune in America. He accordingly crossed the ocean and settled in North Carolina, where he embarked in business and eventually married. Subsequently he removed to Richmond, Va., and became well known there as a merchant of sound judgment and upright principles. From Richmond he moved to Philadelphia, where he conducted a large dry-goods business for twenty-six years. In 1859 he came to St. Louis and became associated with his brother, Robert Campbell, with whom he continued actively engaged until a few years before his death. In the early years of the civil war he was associated with Judge David Davis and Judge Jos. Holt on a commission appointed by President Lincoln to adjust claims brought against the Department of the West. The commission was an important one, and its sessions were held in St. Louis. Few men have succeeded in controlling and managing extensive business interests through so long a period, —nearly sixty years of constant, laborious, and sagacious application to commercial affairs. He was noted alike for his urbane manner and strict integrity in all his dealings. Though thoroughly occupied in the cares of business he was always fond of social pleasures, and had a very wide circle of close personal friends, whose esteem he retained in the constant exhibition of the most open-hearted generosity and courtesy.

[2] On the 6th of June an order was issued from acting Governor Young annulling a previous order of the adjutant-general, and directing that a battalion of artillery only should be furnished by St. Louis City and County for the Santa Fé expedition. This order cut off the several companies of mounted men under Capts. Fischer, Hudson, and Edmonson from any chance of participation in the service, and, as might be expected, there were loud and very general expressions of dissatisfaction with the conduct of the adjutant-general and the acting Governor. Both were denounced in the strongest terms. It was known that two if not all the companies had expended a large sum of money in the purchase of horses and the necessary equipment, and it was regarded as an outrage that such an order should be issued at so late a period. But Capt. Hudson was not long in determining what to do. He resolved to pay no attention to the order of Governor Young, to go forward with his men, to present them to Col. Kearney at Fort Leavenworth, and to state the circumstances under which they had been raised and the late hour at which the counter-order had been issued.

[3] Over twelve thousand dollars were raised among the citizens of St. Louis by private subscription to aid in mounting and equipping the companies of light artillery.

as finally organized was therefore composed of the companies under the command of Capt. Weightman and Capt. Fischer.

After the formation of the battalion the companies proceeded separately to the election of a major, when M. L. Clark was unanimously elected. The battalion then formed in a body, and Maj. Clark appearing before them, was received with hearty cheers.

On the following day Capt. Fischer's company was reorganized so as to make it conform to the change it had undergone by being converted from a dragoon into an artillery company. Capt. Fischer, who had had command of the company for several years, resigned, and was followed by the other officers. Capt. Fischer was then immediately re-elected by acclamation. Louis C. Garnier was elected first lieutenant; Christopher Kribben, second first lieutenant; and Franz Hassendeubel, second lieutenant. On the 11th an entertainment was given the company at the cave of Messrs. McHose & English. Among the guests were Col. Campbell, Gen. Milburn, Capt. Edmonson, and Col. Bogy, of the Sixty-fourth Missouri Regiment of militia. During the evening speeches were made by Capt. Fischer, Rev. Mr. Packard, Col. Bogy, and others. Col. Bogy, in the course of his remarks, alluded to the promptness with which the Germans had volunteered, the sacrifices which they had made to answer the call of their adopted country, and the peculiar position in which they were placed,—"newcomers to the land, yet enrolled among the defenders and protectors of its soil!" The company paraded on the 12th, and was inspected by Gen. Milburn, Col. Grimsley, acting brigade inspector, and Dr. Hardinge Lane, brigade surgeon. The company was handsomely uniformed in gray coats, and pantaloons of Kentucky jean with yellow stripes, forage-caps, new Spanish saddles, saddle-bags, bridles, holsters, and two new blankets for each man. Their horses were considered very good. The men passed a satisfactory inspection and were mustered into service. On the 16th they embarked on board of the "Amaranth," and in the evening left for Fort Leavenworth.

Capt. Weightman's company of artillery paraded and was inspected by the same officers on the 11th, and on the same day embarked on the steamer "Iowa," which left on the following day for Fort Leavenworth. Their uniform consisted of a blue roundabout faced with red, gray pantaloons with red stripe, and glazed U. S. forage-cap. They had new Spanish saddles, saddle-bags, bridles, halters, and two good blankets for each man. Their arms and equipments were furnished at Fort Leavenworth. After their departure from St. Louis the captain of the company addressed the following communication to the editors of the *Missouri Republican*:

"STEAMER 'IOWA,' OFF ST. CHARLES,
"June 14, 1846.

"*Editors of the Missouri Republican:*

"GENTLEMEN,—I have been requested by the company which it is my honor to command to present their thanks for the kind, considerate, and valuable present by 'several ladies' of St Louis 'of a supply of bandages and lint for the use of the battalion of horse artillery under the command of Maj. Clark and Capts. Fischer and Weightman.' Our gratitude, most heartfelt, for this gift is increased by the consideration that we have the sympathies of the thoughtful and the gentle. It is for one more gifted than myself properly to express the feelings which fill our hearts.

"We have also to express our obligations to Maj. Mitchell, Maj. Stewart, Mr. Lucas, Mr. Page, Col. O'Fallon, and Judge Schaumburg for negotiating a loan from the bank of six thousand dollars for the purpose of mounting and equipping our company; and to Messrs. Shacklett and Taylor for their kind assistance in selecting our horses. Indeed, we have received so much kindness from the citizens of St. Louis City and County that it is impossible to particularize.

"We will make no rash promises,—'let not him boast that putteth his armor on;' it is sufficient to say that if we thought we would disgrace ourselves we would stay at home.

"Our organization is complete, and our complement of men, with the exception of one musician and two privates. In anticipation of the passage of a law allowing two second lieutenants, Mr. Gratiot, our first sergeant, was by an overwhelming vote elected second lieutenant, and Mr. R. T. Jenkins to fill the vacancy in the list of non-commissioned officers. Our present organization is:

"R. H. Weightman, capt.
"A. J. Dorn, senior 1st lieut.
"E. F. Chouteau, junior 1st lieut.
"John O. Simpson, 2d lieut.
"John R. Gratiot, 1st sergt., to be 2d lieut. in case of the passage of the law.
"Davis Moore, 2d sergt., to be 1st sergt. in case of the passage of the law.
"A. V. Wilson, 3d sergt., to be 2d sergt. in case of the passage of the law.
"Clark Kennerly, 4th sergt., to be 3d sergt. in case of the passage of the law.
"Clay Taylor, 1st corp., to be 4th sergt. in case of the passage of the law.
"J. R. White, 2d corp., to be 1st corp. in case of the passage of the law.
"George W. Winston, 3d corp., to be 2d corp. in case of the passage of the law.
"R. T. Jenkins, 4th corp., to be 3d corp. in case of the passage of the law.
"R. T. Richardson to be 4th corp. in case of the passage of the law.

"With much respect,
"I am truly yours,
"R. H. WEIGHTMAN,
"*Capt. Horse Artillery.*"

During the same month (June) another company of mounted men was formed, with Thomas H. Holt, captain; Leonidas D. Walker, first lieutenant; and Edmund W. Paul, second lieutenant. Capt. Renick, a graduate from West Point; Capt. Korpony, who

had served with distinction as an officer in the Austrian service; and Capt. Robert Hunt, of St. Louis, also raised volunteer companies. The De Kalb Mounted Rangers, under the command of Capt. Edmonson, were mustered into service at the Prairie House on June 12th, and on the 17th they were provided with all the necessary arms and munitions of war by the government at the United States arsenal, near the city. A flag was presented to this company by the citizens of St. Louis, and swords to Capt. Edmonson and Lieut. John C. Dent. The company was afterwards attached to the regiment of Col. Sterling Price, which had its rendezvous at Independence, Mo. During the week it set out on its march for that point. Capt. Morrison's company of "St. Clair Guards" arrived at St. Louis on the 15th of June, and embarked in the evening on the steamer "Luella" for Alton, Ill.

Companies B and K, First Regiment of United States Dragoons, from Forts Atchison and Crawford, numbering one hundred and fifteen non-commissioned officers and privates, with one hundred and nineteen horses and fifteen mules, under the command of Capts. E. V. Sumner and Philip St. G. Cook, arrived in the city on the 26th of June on the steamer "Gen. Brooke." Attached to the companies were Lieuts. Hammond and Davidson and Surgeon R. A. Simpson. They were destined for Fort Leavenworth, there to join the expedition against New Mexico, and left the city on the 28th in the steamers "Amaranth" and "Corinne" for that point.

A company of volunteers, called the South Missouri Guards, consisting of one hundred and fifteen men from Perry, Franklin, and Cape Girardeau Counties, arrived in St. Louis on the 24th on the steamer "Clermont," *en route* for Fort Leavenworth. The officers were Firman Rozier, captain; R. H. Lane, first lieutenant; M. Neal, second lieutenant; and Jules Rozier, first sergeant. It left the city on the 26th. The Missouri Guards of St. Louis were organized on the 28th of August by the election of the following officers: L. F. McNair, captain; Alexander W. McNair, first lieutenant; and Morris D. Meyers, second lieutenant. The company soon after left for Fort Leavenworth.

The forces which were to compose the Army of the West commenced assembling at Fort Leavenworth early in June, 1846. Col. Kearney had discretionary orders from the War Department as to the number of men which should compose his command, and as soon as the companies of volunteers arrived they were mustered into the service of the United States, and lettered in the order of their arrival. On the 18th of June, the full complement of companies having arrived which were to compose the First Missouri Regiment, an election for colonel was held under the direction of Gen. Ward, of Pratte County, which resulted in the selection of Alexander William Doniphan.[1] C. F. Ruff, who was a private in the same company with Col. Doniphan, was chosen lieutenant-colonel, and William Gilpin, a private in a company from Jackson County, was selected as major.

The regiment of mounted volunteers was composed of companies from the counties of Jackson, Lafayette, Clay, Saline, Franklin, Cole, Howard, and Callaway, which were commanded respectively by Capts. Waldo, Walton, Moss, Reid, Stephenson, Parsons, Jackson, and Rodgers, aggregating eight hundred and fifty-six men. The battalion of light artillery consisted of two companies from St. Louis, under the command of Maj. M. L. Clark, which were officered as follows:

Company A.—A. W. Fischer, captain; L. C. Garnier, first lieutenant; C. Kribben, junior first lieutenant; F. Hassendeubel, senior second lieutenant; L. Johanning, junior second lieutenant.

Company B.—R. H. Weightman, captain; A. J. Dorn, first lieutenant; E. F. Chouteau, junior first lieutenant; John O. Simpson, second lieutenant.

The Laclede Rangers, from St. Louis, were attached to the First Dragoons, and numbered one hundred and seven men. They were officered as follows: Thomas B. Hudson, captain; Richard S. Elliott, first lieutenant; and Louis T. Labeaume, second lieutenant. The battalion of infantry from the counties of Cole and Platte, commanded respectively by Capts. Augney and Murphy, numbered one hundred and forty-five men, making the total force under the command of Col. Kearney sixteen hundred and fifty-eight men, with sixteen pieces of artillery,—twelve six-pounders and four twelve-pound howitzers. The organization of the expedition was completed by the appointment of the following officers: Capt. Riche, sutler to the dragoons; C. A. Perry, sutler; G. M. Butler, adjutant; Dr. George Penn, chief surgeon; T. M. Morton and I. Vaughn, assistant surgeons of the First Regiment.

The point of departure was, as previously stated, Fort Leavenworth, on the Missouri River, and the point to be reached (Santa Fé) was one thousand miles distant. For the greater part of that distance, from the Missouri to Bent's Fort on the Arkansas, the road lay over vast plains, which had for ages

[1] He was at this time a private in a company from Clay County. Col. Doniphan was an eminent lawyer, and had been a distinguished soldier, serving as brigadier-general in the campaign of 1838 against the Mormons. He had also served honorably as a legislator.

been the pasturage of the buffalo and the hunting-ground of the Indian. Short, dry grass, or sometimes tall prairie grass and matted pea-vines or barren ground, with skirts of trees in the valleys of the streams, made up nearly the whole landscape; while occasionally a buffalo in the distance, a prairie-wolf on the trail, or the carcass of some unfortunate horse, given to the wild birds or wilder beasts, lent variety to this desolate scene. The weary soldier had to pass many a day's journey without water to satisfy his thirst or grass for his beast. For twenty miles, in some cases, no spring was to be found. An eye-witness relates that after leaving the valley of the Canadian a traveler might pass a good day's journey without meeting with either wood, water, or grass. Such was the unfruitful and uninviting country through which the sons of Missouri were compelled to march at the call of duty.

On the 26th of June the main body of the "Army of the West" commenced its march over the plains, which extend from the western border of Missouri to the confines of New Mexico. Many obstacles impeded its progress, more particularly from the fact that there was no road nor even a path leading from Fort Leavenworth into the regular Santa Fé trail. The companies of infantry, however, kept pace with the mounted men, but their feet were blistered by their long and almost incredible marches. Their footprints were often marked with blood, yet the volunteer corps, which consisted of the best young men of the State, endured the sufferings of the campaign with great fortitude. After leaving Fort Leavenworth the army took a southwesterly course, with the view of intersecting the main Santa Fé trail at or near the Narrows, sixty-five miles west of Independence. On the 28th it reached Stranger Creek, and on the 30th arrived upon the banks of Kansas River. It reached the Narrows on the 1st of July, and Council Grove on the 5th, Pawnee Rock on the 13th, and on the 29th crossed the Arkansas and encamped in Mexican territory, about eight miles below Bent's Fort, six hundred and fifty miles west of Fort Leavenworth. On the 16th of August the army arrived at San Miguel, on the river Pecos, and on the 18th, after a tiresome march of nearly nine hundred miles in less than fifty days, Gen. Kearney, with his whole command, entered Santa Fé, the capital of the province of New Mexico, and took peaceable and undisputed possession of the country.

Immediately upon occupying the town, Gen. Kearney completed, by the aid of Willard P. Hall, of St. Louis, the "Organic Laws and Constitution" for the government of the new Territory. To the end that the machinery of this new government might be speedily put into force, Gen. Kearney made the following appointments to office: Charles Bent, Governor of the Territory; Don Aduciano Virgil, secretary; Richard Dallan, marshal; Francis P. Blair, Jr., United States district attorney; Eugene Leitensdoffer, auditor of public accounts; and Joab Houghton, Antonio José Otero, and Charles Baubien, judges of the Supreme Court. Capt. David Waldo was appointed to translate the laws into the Spanish language, which he did in a very satisfactory manner.

On the 25th of September, Gen. Kearney left Santa Fé with four hundred dragoons for California. He took the old Copper-mine route, down the Rio Grande to Sorotto, and thence to the Pacific. On the 20th of October, when three hundred miles west of Santa Fé, he was informed by a returning party that Gen. John C. Fremont had already taken possession of California. He then sent Maj. Sumner back with the larger portion of the dragoons, and taking only one hundred with him, pursued with this small force the daring enterprise of crossing the deserts and mountains of the West in the cold season.

For the purpose of reinforcing Col. Kearney at Santa Fé, the War Department had determined to organize a new force. Sterling Price, then a member of Congress from Missouri, having resigned early in the summer of 1846, applied to President Polk for the command and was appointed. The reinforcement was to consist of one full mounted regiment, one mounted extra battalion, and one extra battalion of Mormon infantry, the whole to be volunteers. After some delay the companies rendezvoused at Fort Leavenworth, and were mustered into service about the 1st of August. The companies from Boone, Benton, Carroll, Chariton, Lynn, Livingston, Monroe, Randolph, Ste. Genevieve, and St. Louis Counties, under the command respectively of Capt. McMillan, Hollaway, Williams, Holley, Barbee, Slack, Giddings, H. Jackson, Horine, and Dent, composed the Second Missouri Regiment. Notwithstanding the War Department had selected Sterling Price to command them, the officers thought they ought to have a choice in the matter. Accordingly they held an election and selected Sterling Price for colonel, D. D. Mitchell for lieutenant-colonel, and Capt. Edmonson for major. R. Walker was appointed adjutant, Mr. Stewart sergeant-major, Dr. May surgeon, and A. Wilson sutler. Another battalion was formed composed of companies om the counties of Marion, Polk, Platte, and Ray, commanded respectively by Capts. Smith, Robinson, Morin, and Hendly, with Lieut.-Col. Willock as commander of the battalion. With this mounted force and several pieces of artillery, Col. Price marched to

Santa Fé over the same route as Col. Kearney, and arrived there in fifty-three days on the 28th of September, three days after Col. Kearney's departure for California.

About the 10th of August another force of one thousand men was ordered to rendezvous at Fort Leavenworth, destined also for Santa Fé to join Col. Price. The regiment was organized with Maj. Dougherty, of Clay County, as commander, but before it took the field the President ordered it to disband, and the men, disappointed, returned to their homes.[1]

The conquest of New Mexico, completed by Col. Kearney, though apparently bloodless, was yet attended by conflicts, if less sanguinary, yet more interesting than the common events of war. On the 15th of January, 1847, a violent and totally unexpected insurrection against the American authorities took place at San Fernando de Taos, in New Mexico. On that night Governor Charles Bent, Sheriff Elliott, and twenty-three others were assassinated, and at Turley's, eight miles from Taos, seven other Americans were murdered. In a short time the insurrection became general, but it was finally suppressed by Col. Price, after several severe engagements with the Mexicans. Taken as a whole, the short campaign of Col. Price with Capt. Burgwin and others, from the 20th of January to the 5th of February, 1847, was one of the best exhibitions of military gallantry which accompanied the minor operations of the war. Marching in midwinter over snow-covered ground, they three times engaged the enemy, and in the last conflict stormed and carried a very strong military position against superior numbers.[2]

In the interval between the conquest of New Mexico by Kearney and the march of Gen. Scott from Vera Cruz there occurred in the northern provinces of Mexico one of those military adventures which convert the realities of history into the brilliant and enticing scenes of romance. This was the march of Col. Doniphan's corps of Missourians through the wild and unknown regions of Northern Mexico. In the early part of December he left Santa Fé with eight hundred men, in three divisions, destined for Chihuahua. The object of the expedition was to join Gen. Wool in the heart of Northern Mexico. On the 21st of December his corps reached Brozitos, where he defeated the enemy in a short engagement. On the 27th he entered El Paso del Norte, and on the 23d of February his forces were at Carmen, one hundred miles from Chihuahua. On the 28th Doniphan's corps gave battle to the enemy, who were intrenched with a large force near the Rancho Sacramento, on the river Sacramento, a [illegible]ented them with great loss. It then entered C[illegible]ua, a city of forty thousand inhabitants, and the capital of one of the most important States of Mexico.

When Gen. Taylor received authentic information of the fall of Vera Cruz, the capitulation of the castle of San Juan de Ulua, and the capture of Chihuahua, he issued the following congratulatory orders to the troops under his command:

"HEADQUARTERS ARMY OF OCCUPATION,
"CAMP NEAR MONTEREY, April 14, 1847.

"The commanding general has the satisfaction to announce to the troops under his command that authentic information has been received of the fall of Vera Cruz and of San Juan de Ulua, which capitulated on the 27th of March to the forces of Maj.-Gen. Scott. This highly important victory reflects new lustre on the reputation of our arms.

"The commanding general would at the same time announce another signal success won by the gallantry of [illegible]oops on the 28th of February, near the city of Chihua[illegible] column of Missouri volunteers, less than one thousa[illegible] under command of Col. Doniphan, with a light field batt[illegible], attacked a Mexican force many times superior in an intrenched position, captured its artillery and baggage, and defeated it with heavy loss.

"In publishing to the troops the grateful tidings, the general is sure that they will learn with joy and pride the triumphs of their comrades on distant fields.

"By order of Maj.-Gen. Taylor.

"W. W. BLISS, *A.A.A.G.*"

Col. Doniphan, having totally defeated and completely disorganized the Army of Central Mexico, moved his gallant corps of Missourians from Chihuahua in three divisions on the 25th, 26th, and 28th of April, 1847. Marching southwardly through Cerro Gordo, Mapimi, and Parras they reached Saltillo, more than one hundred miles, and pitched their camp near the battle-field of Buena Vista. On the 22d of May the regiment was reviewed by Gen. Wool in person, accompanied by his staff, and the following complimentary order was issued:

"ORDERS No. 293.

"HEADQUARTERS,
"BUENA VISTA, May 22, 1847.

"The general commanding takes great pleasure in expressing the gratification he has received this afternoon in meeting the

[1] While at Santa Fé, Capt. Hudson, of the Laclede Rangers, gave up his command to First Lieut. Elliott and raised a new company of volunteers in the town for the purpose of serving in California. The company numbered one hundred men and was called the California Rangers. It was, however, disbanded by Col. Doniphan as soon as he learned that California was in the possession of the Americans.

[2] On the 15th of November, 1846, a detachment of forty-five volunteers, commanded by Capt. Burrows and Thompson, met and totally defeated two hundred California Mexicans on the plains of Salinas, near Monterey, with considerable slaughter. The American loss was four killed and two wounded; among the former Capt. Burrows and Private Ames, of St. Louis.

Missouri volunteers. They are about to close their present term of military service, after having rendered, in the course of the arduous duties they have been called upon to perform, a series of highly important services, crowned by decisive and glorious victories.

"No troops can point to a more brilliant career than those commanded by Col. Doniphan, and no one will ever hear of the battles of Bracito or Sacramento without a feeling of admiration for the men who gained them.

"The State of Missouri has just cause to be proud of the achievements of the men who have represented her in the army against Mexico, and she will, without doubt, receive them on their return with all the joy and satisfaction which a due appreciation of their merits and services so justly entitle them.

"In bidding them adieu the general wishes to Col. Doniphan, his officers and men, a happy return to their families.

"By command of Brig.-Gen. Wool.

"IRWIN MCDOWELL, *A.A.A.G.*"

On the following day the Missourians marched to Gen. Wool's camp, where Capt. Weightman delivered his battery to Capt. Washington. The Mexican cannon which were captured in the action at Sacramento the Missourians were permitted to retain as the trophies of their victory. These were subsequently presented by Col. Doniphan to the State of Missouri.

The Missouri column proceeded on its march and passing Saltillo, the Grand Cañon of the Rinconada, Santa Catarina, and the city of Monterey, arrived in the American camp at the Walnut Springs on the 26th, having in three days marched seventy miles. Maj.-Gen. Taylor having reviewed the Missouri troops on the morning of the 26th, issued the following:

"ORDERS No. 59.

"HEADQUARTERS ARMY OF OCCUPATION,
"CAMP NEAR MONTEREY, May 26th.

"Col. Doniphan's command of Missouri volunteers will proceed *via* Camargo to the mouth of the river or Brazos Island, where it will take water transportation to New Orleans.

"On reaching New Orleans, Col. Doniphan will report to Gen. Brooke, commanding the Western Division, and also to Col. Churchill, inspector-general, who will muster the command for discharge and payment.

"At Camargo, Col. Doniphan will detach a sufficient number of men from each company to conduct the horses and other animals of the command by land to Missouri. The men so detached will leave the necessary papers to enable their pay to be drawn when their companies are discharged at New Orleans.

"The quartermaster's department will furnish the necessary transportation to carry out the above orders.

"The trophies captured at the battle of Sacramento will be conveyed by Col. Doniphan to Missouri, and there turned over to the Governor, subject to the final disposition of the War Department.

"In thus announcing the arrangements which close the arduous and honorable service of the Missouri volunteers, the commanding general extends to them his earnest wishes for their prosperity and happiness, and for a safe return to their families and homes.

"By command of Maj.-Gen. Taylor.

"W. W. BLISS, *A.A.A.G.*"

Pursuing their journey with rapid steps, the Missourians descended the Rio Grande, embarked on vessels, and arrived at New Orleans on the 15th of June. Here the volunteers were mustered out of the service of the United States, and soon after returned to their homes in Missouri. "In a little more than a year," says Capt. Edward D. Mansfield, in his interesting "History of the Mexican War," "this corps of volunteers, mustered from private life, had by land and by water, over mountain-tops and sandy plains, in snow and in rain and in hot deserts, amid the homes of civilization and the wilds of savages, amid the fires of battle, the sports of the camp, and the adventures of the wild wilderness, pursued their unchecked career for five thousand miles. Nor was this all. One detachment of this same corps, previous to the departure of the main body from Santa Fé, had marched another thousand miles in still wilder scenes and greater adventure. This was the detachment of Lieut.-Col. Gilpin, who was sent out towards the Rocky Mountains to overawe the Navajo Indians. This command actually crossed the Rocky Mountains, and descended into the valley of the Colorado of the South. Their march was full of new scenery, new dangers, and new adventures. After this party had thus pursued its novel and most interesting march through the spurs and rivers and wild tribes and wilder animals of the Rocky Mountains, it returned in time to join the long and adventurous march of Doniphan to Chihuahua and the Gulf of Mexico."[1]

When Col. Doniphan left Santa Fé, the command of the troops in New Mexico devolved upon Col. (then Brig.-Gen.) Sterling Price. Between the 1st and 15th of August, 1847, Gen. Price and the troops under his command returned to Missouri, where they arrived about the 25th of September, having lost more than four hundred men in battle and by disease.

The St. Louis Legion, after it sailed from New Orleans, landed on the 7th of June, 1846, on the west bank of the Brazos, in the harbor of Point Isabel. It spent the remainder of the month encamped at this place, drilling, etc., and on the 1st of July the camp was removed to the mouth of the Rio Grande, and from thence by steamers to the Heights of Barita, in the State of Tamaulipas, where orders were received from the Secretary of War to disband the six-months' volunteers. The Legion remained here until the 8th of August, when the command began to embark for home. The field and staff officers and officers and

[1] For a full and most interesting account of Doniphan's expedition, see the accurate work of J. T. Hughes, entitled "Doniphan's Expedition."

members of the St. Louis "Grays" and the "Rangers" returned to St. Louis on the steamer "Star-Spangled Banner," and arrived on the 21st, amid the cheers and rejoicings of the population, which lined the bank of the river.[1]

The detachment left Brazos Santiago on Sunday, the 9th of August, on the steamship "New York." The six other companies left about the same time, embarking on the following vessels: on the evening of the 8th, on the brig "Welsh," the Boone Guards, Capt. Knapp, Montgomery Guards, Capt. Watson, and Jaegers, Capt. Schaefer, accompanied by Assistant Surgeon Stevens; on the same evening, on the schooner "Wm. Bryan," the Texas Free Corps, Capt. Koch; and on the morning of the 9th, on the bark "Ivy," the Missouri Fusileers, Capt. Wockner, and the Morgan Riflemen, Capt. McKellops.

The Jaegers, Capt. Schaefer, Boone Guards, Capt. Knapp, and Montgomery Guards, Capt. Watson, arrived at St. Louis on August 26th, on board the steamer "W. R. King." The remainder of the command arrived in due time in good health and excellent spirits. On the 10th of September the mayor and City Council presented to the Legion in the rotunda of the court-house a stand of colors on behalf of the citizens of St. Louis. Mayor Camden presented the flag to Col. A. R. Easton, of the Legion, with a few patriotic remarks, and Capt. P. Salisbury, at the request of Col. Easton, responded for the battalion. At the conclusion of the presentation ceremonies Private Smithers, of Capt. McKellops' company, "addressed the meeting in a happy strain," and upon a call from the assemblage A. B. Chambers made a few remarks to the Legion.

The municipal authorities and citizens of St. Louis on April 15, 1847, determined to celebrate the victories which had been won by the army of Gen. Scott in Mexico. "In the morning, at the rising of the sun," says one of the journals of the day, "a national salute was fired by the German artillery company, on the vacant grounds in the rear of the city. The guns used were twelve-pounders, and although they were but indistinctly heard in some parts of the city, they were heard full thirty miles in the surrounding country. Several gentlemen who were thirty-five miles in Illinois when the first guns were fired heard them distinctly, and by hard riding were able to get here in time to witness the illumination. National salutes were fired at noon and at sundown, and several guns for the memory of those brave men who have fallen in battle.

"At half-past seven, when the signal was given, nearly every house instantly poured forth a flood of light. Although we knew that the illumination would be general, yet we confess we were not prepared for so general a demonstration. We traversed the city during the time of the illumination from north to south and from the river westward, and everywhere, on every street, we met with the same fervent display. The humblest tenement and the most stately mansion alike contributed to the beauty and the interest of the scene. In a word, it was one of those great popular demonstrations where the whole people are united, and to the full consummation of which they have given their entire energies."

In the mean time, as the war progressed, a large number of the volunteers whose term of service had expired, and who had been honorably discharged, re-enlisted in other commands. The "Mound City Rangers" were organized on the 20th of April, 1847, in the hall of the Missouri Fire Company, by the election of the following officers: James A. Faucett, captain; J. F. Scheifer, first lieutenant; P. L. Shoaff, second lieutenant; and Louis Gray, third lieutenant. The "Bent Guards" were organized on April 24th by the election of Elihu H. Shepard as captain; Samuel H. Holmes, first lieutenant; Thomas W. Levant, second lieutenant; and William Prichett, third lieutenant. On the 10th of May this company was mustered into service, and was designated as "Company A, Missouri Battalion of Infantry Volunteers," to serve during the war. A few days were spent at Camp Lucas in drilling and issuing quartermaster's stores preparatory to a march across the Western plains. On the 15th of May the company embarked on board the steamer "Meadan," Capt. Cheever, and proceeded to Fort Leavenworth, with orders to report to Lieut.-Col. Scott. It received orders to escort a very large train of ox-wagons loaded with commissary stores to Santa Fé, and executed the task in safety.

A requisition was made on the State in April for a regiment of mounted men, and preparations were immediately begun for the organization of new companies. On the 31st the St. Louis "Eagle Company" was organized, under the supervision of Gen. Milburn and Col. Grimsley, by the election of G. D. Korpony as captain; H. Schroeder, first lieutenant; Charles Krohne, second lieutenant; and Philip Ludwig, third lieutenant. The volunteers under this call were directed by the Governor to assemble at Independence.

In addition to this requisition on the State for volunteers, another was made in May for one battalion of

[1] The following officers returned: Col. Easton, Lieut.-Col. Kennett, Maj. Schoentmaler, Surgeon Johnson, Adjt. Almstedt, Capts. Coleman and Salisbury, Lieuts. West, Barnes, Ross, and Knapp.

infantry to serve during the war, and to rendezvous at Fort Leavenworth. Under the latter call Capt. Shepard's company was accepted. The "Missouri Mounted Guards" were organized on May 2d, with the following officers: W. L. F. McNair, captain; James M. Allen, first lieutenant; Golden Musick, second lieutenant; and Charles H. Merritt, third lieutenant. They were mustered into the service of the United States on May 14th, and numbered eighty-six non-commissioned officers and privates. The "St. Louis Grays" tendered their services to the Governor as part of the infantry battalion for Santa Fé. This battalion was completed on the 24th of May, when the infantry companies of Capt. Weckner, Capt. Cunningham, and Capt. Paul were mustered into service. Capt. Barnes' company was mustered in on the 25th, and, as we have seen, Capt. Shepard's on the 10th of the same month. These companies composed the battalion, and at an election for lieutenant-colonel, Alton R. Easton, who had been colonel of the old St. Louis Legion, was unanimously chosen.

We glean the following notes on military matters from the *Missouri Republican* of 1847:

"May 28.—The company of mounted men under the command of Capt. Geis was mustered into service yesterday.

"Capt. McNair's company, and that commanded by Capt. Korpony, arrived here yesterday from Jefferson Barracks, *en route* for Independence. They will leave to-day at eight o'clock.

"We understand that the members of the company under the command of Capt. McNair have presented him with a splendid sword, as a token of their appreciation of his energy and perseverance in getting up and equipping the company.

"The members of the late City Guard, at a meeting on Thursday evening, manifested their feelings of respect and good will towards their late captain, Abram Allen, now the first lieutenant of Capt. Paul's company, by presenting to him a handsome sword.

"Capt. A. Jones' company of mounted men, the 'Rough and Readys' from Washington County, were mustered into service yesterday by Col. Wharton. They will soon be ready to leave for Santa Fé."

"June 1.—Capt. Paul's company of volunteers left on board the 'Aramanth' yesterday for Fort Leavenworth."

"June 5.—The St. Louis Washington Artillery held an election for officers yesterday, under the supervision of Gen. Milburn. It resulted as follows: William H. Jeanings, captain; —— Wilcox, first lieutenant; David Dill, second lieutenant; James Fall, third lieutenant."

"June 7.—Capt. Barnes' company of infantry will leave to-day on the 'Little Missouri' for Fort Leavenworth. It is the last company of the battalion of infantry ordered to Santa Fé."

"June 9.—*Kosciusko Guards.* This company is now organized, and is awaiting the determination of the Governor whether it shall be received into the service. At the election, N. Kosciolowski was elected captain; Edward Colston, first lieutenant; W. H. Thorpe, second lieutenant; Chouteau Smith, second second lieutenant.

"Mr. William Wolfe has tendered to the Governor the services of another company; and it is said that the Governor has recommended to the Secretary of War the employment of these two companies in the United States service."

"June 9.—One of the Masonic societies of this city yesterday invited Capt. Barnes' company to their lodge-room for the purpose of presenting Capt. Barnes with a sword. Dr. Mitchell, Past Grand Master, in a very appropriate style in behalf of the Masonic fraternity, addressed the company and presented the sword. After the presentation the company marched to the steamer 'Little Missouri' and took passage for Fort Leavenworth."

"June 11.—*Lieutenant-Colonel of the Missouri Battalion of Infantry.* A letter from Fort Leavenworth, dated on the 3d inst., states that on that day an election was held by the Bent Guards for lieutenant-colonel. The entire vote of the company, eighty-five, was given for Alton R. Easton. This was the last company to vote, and the whole battalion have united in the election of Col. Easton. He left this city for Fort Leavenworth yesterday."

Col. Doniphan's command turned over to the ordnance officer at New Orleans the arms they had used in the campaign, and between the 22d and 28th of June were mustered out of service by Col. Churchill and received their pay. They then departed for home. Anticipating the arrival of the returning volunteers, the generous and patriotic citizens of St. Louis determined to give them a hearty welcome. Accordingly the mayor and City Council called a meeting of the citizens in the rotunda of the court-house on June 23, 1847, to make arrangements "to welcome home the returning Missouri and Illinois volunteers, and also to pay suitable honors to the remains of Col. J. J. Hardin and others, who fell gloriously in the Mexican war." On motion of Maj. Wetmore, Bryan Mullanphy, mayor of the city, was called to preside, and on motion of Dr. George Wilson, Louis V. Bogy and Thomas Harney were appointed secretaries. The chairman then explained the object of the meeting. On motion of R. S. Blennerhassett, a committee of five persons was appointed to prepare suitable resolutions expressive of the sense of the meeting; whereupon the chair appointed R. S. Blennerhassett, Wm. M. Campbell, S. Treat, Chas. Keemle, and A. B. Chambers. During the absence of the committee the meeting was addressed by Messrs. Blennerhassett, Hedges, Bowlin, Wright, and Eager. The committee soon returned and reported a series of resolutions which were adopted, recommending that the hospitalities of the city be tendered to the returning volunteers under the command of Col. Doniphan, and that the men be invited to accept suitable testimonials of the citizens' gratitude and respect for their patriotic services." A committee of arrangements, composed of Benjamin Soulard, David Chambers, Cornelius Campbell, Dr. J. Sykes, A. B. Chambers, J. Prentiss Moss, Michael Suter, Thornton Grimsley, Geo. Wilson, Geo. K. McGunnegle, Samuel Willi, Napoleon Koscialow-

ski, Wm. Christy, Theron Barnum, C. D. Walton, D. A. Magehan, Patrick Gorman, T. O. Duncan, John W. Scott, John Leach, C. W. Schaumburg, Gregory Byrne, Wm. Clark, and B. F. Jennings, was appointed, with full power to make all necessary preparations for the reception of and demonstration of respect to the volunteers. The City Council also appointed a committee of eight, to act in connection with the citizens' committee, and they met at the Planters' House on the following day to make the necessary arrangements. The joint committee was organized, with George K. McGunnegle as chairman, and A. B. Chambers as secretary. The committee adopted the following order of proceedings for the reception and entertainment of the Missouri volunteers:

"The procession will be formed on Fourth Street, the right resting on Market, as follows:

Band of Music.
Mayor and City Council.
Committee of Arrangements.
Officers of the Army and Navy of the United States.
United States Troops.
Military escort of Infantry, the Volunteer Corps of the city.
The Missouri Volunteers, under Col. A. W. Doniphan, returning from the campaign in Mexico.
Volunteer Cavalry.
The several societies, institutions, fire companies, and public bodies of the city will be assigned stations as they arrive upon the ground.
Citizens on foot.
Citizens in carriages.
Citizens on horse.

"On the approach of the volunteers to the city, thirteen guns will be fired from Camp Lucas (west of the city), and the bells of the churches and fire companies rung.

"Upon this signal the military companies will immediately form on Fourth Street, in front of the court-house, and await further orders.

"The several societies, institutions, fire companies, public bodies, and others will form on Fourth Street, or the cross streets leading into it, and report to the chief marshal.

"The steamboats and other public places will display their flags at top-mast.

"The aids and assistant marshals will report themselves to the chief marshal *at the earliest possible moment*, at the east front of the court-house.

"A national salute of thirty-one guns will be fired when the vessels containing the volunteers arrive in front of the city.

"From the uncertainty of the hour of their arrival, the line of march is not designated.

"At Camp Lucas, after the delivery of the oration and response of the volunteers, the civic part of the procession will be dismissed, and the returning volunteers, under the escort prescribed in the programme of the Committee of Arrangements, will be conducted to the St. Louis Park, to partake of a collation."

The following committees were also appointed to carry out the objects of the meeting:

"To meet the volunteers, and apprise them of the purposes of the citizens, Messrs. J. Sykes, J. B. Bowlin, and George W. Olney.

"To select the orators of the day, and make all necessary arrangements pertaining thereto, Messrs. Blennerhassett, Schaumburg, and Campbell.

"To prepare the catafalque, and all other necessary preparations pertaining thereto, Messrs. Koscialowski, Magehan, and Ladew.

"To provide the collations, and all pertaining thereto, Messrs. Barnum, Wilson, and Walton.

"To receive and audit accounts, and report the same to the City Council, Messrs. McGunnegle, Blennerhassett, and Thomas."

The orators of the day were Hon. Thomas H. Benton and Hon. James B. Bowlin. Col. Thornton Grimsley was selected as chief marshal, with the following aids and assistant marshals: Aids, David Chambers and Frederick Kr[illegible]ar; assistant marshals, T. B. Targee, Geor[illegible] Gannet, David Tatum, Wm. C. Wright, Gregory Byrne, John Hanson, Samuel Willi, N. Koscialowski, Wm. G. Clarke, A. H. Glasby, C. D. Walton, James A. Rogers, N. Aldrich.

The City Council appropriated sufficient money to defray the expenses of the reception of the volunteers; but the bill was vetoed by Mayor Mullanphy, and the veto was sustained by the board of aldermen. This proceeding of the mayor caused much indignation among the citizens, and at a large public meeting it was resolved "that his presence in welcoming the volunteers as chairman of the committee on reception has been dispensed with."[1]

The course pursued by the mayor compelled the committee of arrangements to apply to the citizens for subscriptions to defray the expenses of receiving and entertaining the volunteers, the mayor himself being a large contributor. The following gentlemen from each ward of the city were appointed to wait on the citizens for donations:

First Ward.—Messrs. R. S. Blennerhassett, N. Koscialowski, and John Dunn.

Second Ward.—Messrs. John Kern, G. R. Taylor, and J. P. Thomas.

[1] The following is a copy of the note sent to the mayor, in pursuance of the resolution:

"St. Louis, July 1, 1847.

"*Hon. Bryan Mullanphy, Mayor of St. Louis:*

"Sir,—The City Council having, in consequence of the course you have thought proper to adopt in regard to the reception of the Missouri and Illinois volunteers, and honored dead, on their return from Mexico, deemed it unadvisable to participate *officially* with our citizens on the occasion of their reception, the committee of arrangements have instructed me to notify you that your presence in welcoming said volunteers is dispensed with, and Judge Bowlin substituted in your place.

"Very respectfully your ob't serv't,

"G. K. McGunnegle, *Ch'n.*"

Third Ward.—Messrs. David Chambers, T. B. Targee, A. L. Mills, and J. Jacoby.

Fourth Ward.—Messrs. J. B. Brant, Edw. Walsh, and Richard J. Lockwood.

Fifth Ward.—Messrs. A. H. Glasby, Hugh Rose, and Dr. R. Knox.

Sixth Ward.—Messrs. Gregory Byrne, J. R. Hammond, and P. G. Camden.

On Sunday, June 27th, there arrived from New Orleans on the steamer "Hard Times" forty privates of Company B, belonging to Col. Doniphan's command, from Lafayette County; on the "Memphis," about thirty volunteers belonging to various companies; and on the "J. M. White," sixty-eight members of Company G from Howard County, and twenty-one members of other companies. But few of the officers arrived on these boats. On Monday, the 28th, a meeting of the citizens was held in the rotunda of the court-house to receive and welcome the Missouri volunteers, who had arrived from New Orleans the day before, and to prevail on them to remain until the rest of their command should reach the city. Addresses were made by Col. Thornton Grimsley, G. K. McGunnegle, Judge Bowlin, and Dr. Sykes, on behalf of the committee of arrangements to welcome the volunteers, and Capt. Reid responded in an eloquent manner, and accepted for the volunteers then in the city the invitation to remain and partake of the proffered hospitalities. On the 30th of June the steamer "Old Hickory" arrived from New Orleans, having on board as passengers Lieut.-Col. Morrison, of the Illinois volunteers, who had been at New Orleans awaiting the arrival of his regiment, but had returned home in consequence of ill health; Col. Doniphan, Maj. Gilpin, Adjt. De Courcy, Lieut. Lee, quartermaster; Capt. Rogers, Company H, Calloway County; Capt. Parsons, Company F, Calloway County; Capt. Moss, Company C, Clay County; Lieuts. Duncan and Murray, Company H, Calloway County; Lieuts. Gordon, Welles, and Winston, Company F, Cole County; Lieut. Graves, Company B, Lafayette County; Surgeons Thomas and James Morton. There were also a large number of privates on board. The "Harry of the West" and "Di Vernon" also brought considerable bodies of volunteers.

The uncertainty which attended the arrival of the volunteers, the limited number arriving in each boat, and the very great desire of many of them to return to their homes and friends, all conspired to create solicitude on the part of those who were anxious that everything should go off well at their reception. This was the case up to Friday morning, July 2d, when, at an early hour, the "Clarksville" came into port, having on board Maj. M. L. Clark, Capt. Weightman, Lieuts. Dorn and Chouteau, and other officers, and some of the privates of the battalion of light artillery. Their arrival determined the committee of arrangements to proceed with the ceremonies, and under their instruction the chief marshal issued orders to that effect. Thousands of citizens, leaving their usual avocations, turned out to honor the guests of the city, and long before the time appointed for the reception, in front of the Planters' House and in the streets leading to it a dense multitude of people collected. Flags were displayed in every direction, and the bells of the churches and of the various engine-houses rang a merry peal. Just as everything was ready for the orator appointed to welcome the volunteers to proceed with his address it was announced by the chief marshal that the "Pride of the West," having on board Capt. Hudson and several other officers of the command, and also the artillery captured from the Mexicans at the battle of Sacramento, was in sight, and by common consent further proceedings were postponed until they could arrive and be participants in them. New spirit seemed to be infused into the multitude by this fortunate coincidence. The committee of arrangements at once repaired to the boat, and through Mr. Blennerhassett tendered them the hospitalities of the city and an invitation to partake in the festival. This invitation was responded to by Capt. Hudson, and in a very short time the volunteers and the train of artillery were on their way to Fourth Street, where, in front of the Planters' House, it was arranged that the address welcoming the volunteers to the city should be made.

Judge Bowlin, who had been selected for the purpose, then delivered an eloquent and patriotic address. In addressing Col. Doniphan and the officers and soldiers of the Missouri volunteers he said,—

"In the name and on behalf of the people of St. Louis, I bid you a warm and cordial welcome back to the land of your cherished homes, and tender you the hospitalities of their city,—a city proud of her identity with your gallant achievements. In doing this it becomes me to assure you, gentlemen, we are performing no idle ceremonial in which the heart has no participation, but it is the spontaneous homage which we, as your fellow-countrymen, feel proud to award your patriotism, your valor, your self-sacrificing devotion to country. Indeed, we hail your return to your homes with no ordinary emotions, as a long anxiety for your safety, a consciousness of the perils that everywhere environed you, a dubiousness of your fate spread a gloom over the community which your security has dispelled, and awakened in lieu of it mingled feelings of gratitude for your deliverance and admiration for the heroic deeds that won it. Besides, we feel proud, as your countrymen, in sharing that halo of glory which your gallant deeds have thrown around the name of the 'Missouri volunteer.' You have baptized that glorious title with your blood and laureled it with brilliant victories, the memory of which can only perish with the language in which they are recorded. Your deeds have encircled around that hal-

lowed name a wreath of imperishable renown, never to fade or decay,—

> 'For the true laurel wreath which glory weaves
> Is from that tree no bolt of thunder cleaves.'"

After alluding to the condition of the country, and noticing some details of the heroic achievements of the volunteers, he closed his address as follows:

"In conclusion, I again bid you welcome to the shores of our own Missouri; welcome to her proud and favored city; welcome to the hospitality of her people; welcome to all that a generous and chivalrous heart casts at the shrine of valor; welcome to the homage due to the brave; welcome to our hearths and our hearts."

To this address Lieut.-Col. Mitchell responded in a brief but appropriate speech.

Under the escort of the volunteer companies of the city, Col. Kennett commanding, the procession was then formed and marched to Camp Lucas. As the returning veterans, roughly clad, and with their long beards and torn battle-flags flowing in the wind, marched through the streets of the city they were received with unabated enthusiasm. Along the route the display of flags from the houses and the waving of handkerchiefs by the ladies from windows and balconies announced to them that their return was hailed with universal joy, and that their arduous services were duly appreciated by their fellow-citizens of St. Louis.

Among the organizations which formed the escort were the Grays, Capt. West; the Montgomery Guards, Capt. Watson; the Jaegers, Capt. Resick; the Missouri Dragoons, Capt. Steitz; and a company of mounted men. Several of the engine companies in full uniform were also in the procession. At Camp Lucas an immense crowd of people had assembled, and very soon the chief marshal introduced in fitting terms the Hon. Thomas H. Benton, who had been selected to deliver the reception speech.

Senator Benton addressed the returned volunteers as follows:

"Col. Doniphan, and Officers and Men,—I have been appointed to an honorable and a pleasant duty,—that of making you the congratulations of your fellow-citizens of St. Louis on your happy return from your long and almost fabulous expedition. You have indeed marched far, and done much, and suffered much, and well entitled yourselves to the applauses of your fellow-citizens, as well as to the rewards and thanks of your government. A year ago you left home. Going out from the western border of your State, you re-enter it on the east, having made a circuit equal to the fourth of the circumference of the globe, providing for yourselves as you went, and returning with trophies taken from fields the names of which were unknown to yourselves and your country until revealed by your enterprise, illustrated by your valor, and immortalized by your deeds. History has but few such expeditions to record; and when they occur, it is as honorable and useful as it is just and wise to celebrate and commemorate the events which entitle them to renown.

"Your march and exploits have been among the most wonderful of the age. At the call of your country you marched a thousand miles to the conquest of New Mexico, as part of the force under Gen. Kearney, and achieved that conquest without the loss of a man or the firing of a gun. That work finished, and New Mexico, itself so distant and so lately the *ultima thule*,—the outside boundary of speculation and enterprise,—so lately a distant point to be attained, becomes itself a point of departure, a beginning point for new and far more extended expeditions. You look across the long and lofty chain—the Cordilleras of North America—which divide the Atlantic from the Pacific waters, and you see beyond that ridge a savage tribe which had been long in the habit of depredating upon the province which had just become an American conquest. You, a part only of the subsequent Chihuahua column under Jackson and Gilpin, march upon them, bring them to terms, and they sign a treaty with Col. Doniphan, in which they bind themselves to cease their depredations on the Mexicans, and to become the friends of the United States. A novel treaty that, signed on the western confines of New Mexico, between parties who had hardly ever heard each others' names before, and to give peace and protection to Mexicans who were hostile to both. This was the meeting and this the parting of the Missouri volunteers with the numerous and savage tribe of the Navajo Indians, living on the waters of the Gulf of California, and so long the terror and scourge of Sonora, Sinaloa, and New Mexico.

"This object accomplished, and impatient of inactivity, and without orders (Gen. Kearney having departed for California), you cast about to carve out some new work for yourselves. Chihuahua, a rich and populous city of nearly thirty thousand souls, the seat of government of the State of that name, and formerly the residence of the captains-general of the internal provinces under the vice-regal government of New Spain, was the captivating object which fixed your attention. It was a far-distant city, about as far from St. Louis as Moscow is from Paris, and towns and enemies, and a large river, and defiles and mountains, and the desert, whose ominous name portended death to travelers—*el jornada de los muertos* (the journey of the dead),—all lay between you. It was a perilous enterprise, and a discouraging one for a thousand men, badly equipped, to contemplate. No matter. Danger and hardship lent it a charm, and the adventurous march was resolved on, and the execution commenced. First, the ominous desert was passed, its character vindicating its title to its mournful appellation,—an arid plain of ninety miles, strewed with the bones of animals perished of hunger and thirst; little hillocks of stone and the solitary cross, erected by pious hands, marking the spot where some Christian had fallen, victim of the savage, of the robber, or of the desert itself, no water, no animal life, no sign of habitation. There the Texan prisoners, driven by the cruel Salazar, had met their direst sufferings, unrelieved, as in other parts of their march in the settled parts of the country, by the compassionate ministrations (for where is it that *woman* is not compassionate?) of the pitying women. The desert was passed, and the place for crossing the river approached. A little arm of the river Bracito (in Spanish) made out from its side. There the enemy in superior numbers, and confident in cavalry and artillery, undertook to bar the way. Vain pretension. Their discovery, attack, and rout were about simultaneous operations. A few minutes did the work. And in this way our Missouri volunteers of the Chihuahua column spent their Christmas-day of the year 1846.

"The victory of the Bracito opened the way to the crossing of the river Del Norte, and to admission into the beautiful little town of the Paso del Norte, where a neat cultivation, a comfortable people, fields, orchards, and vineyards, and a hospitable

reception offered the rest and refreshment which toils and dangers and victory had won. You rested there till artillery was brought down from Santa Fé, but the pretty town of the Paso del Norte, with all its enjoyments, and they were many, and the greater for the place in which they were found, was not a Capua to the men of Missouri. You moved forward in February, and the battle of the Sacramento, one of the military marvels of the age, cleared the road to Chihuahua, which was entered without further resistance. It had been entered once before by a detachment of American troops, but under circumstances how different. In the year 1807, Lieut. Pike and his thirty brave men, taken prisoners on the head of the Rio del Norte, had been marched captives into Chihuahua; in the year 1847, Doniphan and his men enter it as conquerors. The paltry triumph of a captain-general over a lieutenant was effaced in the triumphal entrance of a thousand Missourians into the grand and ancient capital of all the internal provinces, and old men, still alive, could remark the grandeur of the American spirit under both events,—the proud and lofty bearing of the captive thirty, the mildness and moderation of the conquering thousand.

"Chihuahua was taken, and responsible duties more delicate than those of arms were to be performed. Many American citizens were there engaged in trade; much American property was there. All this was to be protected, both lives and property, and by peaceful arrangement, for the command was too small to admit of division and of leaving a garrison. Conciliation and negotiation were resorted to, and successfully. Every American interest was provided for and placed under the safeguard, first, of good will, and next, of guarantees not to be violated with impunity.

"Chihuahua gained, it became, like Santa Fé, not the terminating point of a long expedition, but the beginning point of a new one. Gen. Taylor was somewhere, no one knew exactly where, but some seven or eight hundred miles towards the other side of Mexico. You had heard that he had been defeated, that Buena Vista had not been a good prospect to him. Like good Americans, you did not believe a word of it, but, like good soldiers, you thought it best to go and see. A volunteer party of fourteen, headed by Collins, of Boonville, undertake to penetrate to Saltillo, and to bring you information of his condition. They set out. Amidst innumerable dangers they accomplish their purpose and return. You march. A vanguard of one hundred men, led by Lieut.-Col. Mitchell, led the way. Then came the main body (if the name is not a burlesque on such a handful), commanded by Col. Doniphan himself.

"The whole table-land of Mexico, in all its breadth from west to east, was to be traversed. A numerous and hostile population in towns, treacherous Comanches in the mountains, were to be passed. Everything was to be self-provided,—provisions, transportation, fresh horses for remounts, and even the means of victory,—and all without a military chest, or even an empty box, in which government gold had ever reposed. All was accomplished. Mexican towns were passed in order and quiet, plundering Comanches were punished, means were obtained from traders to liquidate indispensable contributions, and the wants that could not be supplied were endured like soldiers of veteran service.

"I say the Comanches were punished. And here presents itself an episode of a novel, extraordinary, and romantic kind,—Americans chastising savages for plundering people whom they themselves came to conquer, and forcing the restitution of captives and of plundered property. A strange story this to tell in Europe, where backwoods character—Western character—is not yet completely known. But to the facts. In the mesquite forest of the *Bolson de Mapimi*, and in the sierras around the beautiful town and fertile district of Parras, and in all the open country for hundreds of miles round about, the savage Comanches have held dominion ever since the usurper Santa Anna disarmed the people, and sally forth from their fastnesses to slaughter men, plunder cattle, and carry off women and children. An exploit of this kind had just been performed on the line of the Missourians' march, not far from Parras, and an advanced party chanced to be in that town at the time the news of the depredation arrived there. It was only fifteen strong. Moved by gratitude for the kind attentions of the people, especially the women, to the sick of Gen. Wool's command, necessarily left in Parras, and unwilling to be outdone by enemies in generosity, the heroic fifteen, upon the spot, volunteered to go back, hunt out the depredators, and punish them, without regard to numbers. A grateful Mexican became their guide. On their way they fell in with fifteen more of their comrades, and in a short time seventeen Comanches killed out of sixty-five, eighteen captives restored to their families, and three hundred and fifty head of cattle recovered for their owners was the fruit of this sudden and romantic episode.

"Such noble conduct was not without its effect on the minds of the astonished Mexicans. An official document from the prefect of the place to Capt. Reid, leader of this detachment, attests the verity of the fact and the gratitude of the Mexicans, and constitutes a trophy of a new kind in the annals of war. Here it is in the original Spanish, and I will read it off in English.

"It is officially dated from the prefecture of the Department of Parras, signed by the prefect, Jose Ignacio Arrabe, and addressed to Capt. Reid, the 18th of May, and says,—

"'At the first notice that the barbarians, after killing many and taking captives, were returning to their haunts, you generously and bravely offered, with fifteen of your subordinates, to fight them on their crossing by the Pozo, executing this enterprise with celerity, address, and bravery worthy of all eulogy, and worthy of the brilliant issue which all celebrate. You recovered many animals and much plundered property, and eighteen captives were restored to liberty and to social enjoyments, their souls overflowing with a lively sentiment of joy and gratitude, which all the inhabitants of this town equally breathe, in favor of their generous deliverers and their valiant chief. The half of the Indians killed in the combat, and those which fly wounded, do not calm the pain which all feel for the wound which Your Excellency received defending Christians and civilized beings against the rage and brutality of savages. All desire the speedy re-establishment of your health, and although they know that in your own noble soul will be found the best reward of your conduct, they desire also to address you the expression of their gratitude and high esteem. I am honored in being the organ of the public sentiment, and pray you to accept it, with the assurance of my most distinguished esteem.

"'God and Liberty.'

"This is a trophy of a new kind in war, won by thirty Missourians, and worthy to be held up to the admiration of Christendom.

"The long march from Chihuahua to Monterey was made more in the character of protection and deliverance than of conquest and invasion. Armed enemies were not met, and peaceful people were not disturbed. You arrived in the month of May in Gen. Taylor's camp, and about in a condition to vindicate, each of you for himself, your lawful title to the double *sobriquet* of the general, with the addition to it, which the colonel of the expedition has supplied, 'ragged, as well as rough and ready.' No doubt you all showed title at that time to that

third *sobriquet*; but to see you now, so gayly attired, so sprucely equipped, one might suppose that you had never for an instant been a stranger to the virtues of soap and water, or the magic ministrations of the *blanchisseuse* and the elegant transformations of the fashionable tailor. Thanks, perhaps, to the difference between pay in the lump at the end of service and driblets along in the course of it.

"You arrived in Gen. Taylor's camp ragged and rough, as we can well conceive, and ready, as I can quickly show. You reported for duty! you asked for service!—such as a march upon San Luis de Potosi, Zacatecas, or the 'halls of the Montezumas,' or anything in that way that the general should have a mind to. If he was going upon any excursion of that kind, all right. No matter about fatigues that were passed, or expirations of service that might accrue: you came to go, and only asked the privilege. That is what I call ready. Unhappily the conqueror of Palo Alto, Resaca de la Palma, Monterey, and Buena Vista was not exactly in the condition that the lieutenant-general that might have been intended him to be. He was not at the head of twenty thousand men; he was not at the head of any thousand that would enable him to march, and had to decline the proffered service. Thus the long-marched and well-fought volunteers—the rough, the ready, and the ragged—had to turn their faces towards home, still more than two thousand miles distant. But this being mostly by water, you hardly count it in the recital of your march. But this is an unjust omission, and against the precedents as well as unjust. 'The Ten Thousand' counted the voyage on the Black Sea as well as the march from Babylon, and twenty centuries admit the validity of the count. The present age and posterity will include in 'the going out and coming in' of the Missouri Chihuahua volunteers the water voyage as well as the land march, and then the expedition of the One Thousand will exceed that of the Ten by some two thousand miles.

"The last nine hundred miles of your land march, from Chihuahua to Matamoras, you made in forty-five days, bringing seventeen pieces of artillery, eleven of which were taken from the Sacramento and Bracito. Your horses, traveling the whole distance without United States provender, were astonished to find themselves regaled, on their arrival on the Rio Grande frontier, with hay, corn, and oats from the States. You marched farther than the farthest, fought as well as the best, left order and quiet in your train, and cost less money than any.

"You arrive here to-day, absent one year, marching and fighting all the time, bringing trophies of cannon and standards from fields whose names were unknown to you before you set out, and only grieving that you could not have gone farther. Ten pieces of cannon, rolled out of Chihuahua to arrest your march, now roll through the streets of St. Louis to grace your triumphal return. Many standards, all pierced with bullets while waving over the heads of the enemy at the Sacramento, now wave at the head of your column. The black flag, brought to the Bracito to indicate the refusal of that quarter which its bearers so soon needed and received, now takes its place among your trophies, and hangs drooping in their nobler presence. To crown the whole, to make public and private happiness go together, to spare the cypress where the laurel hangs in clusters, this long and perilous march, with all its accidents of field and camp, presents an incredibly small list of comrades lost. Almost all return! and the joy of families resounds intermingled with the applauses of the State.

"I have said that you made your long expedition without government orders; and so indeed you did. You received no orders from your government, but, without knowing it, you were fulfilling its orders, orders which never reached you. Happy the soldier who executes the command of his government; happier still he who anticipates command and does what is wanted before he is bid. This is your case. You did the right thing at the right time, and what the government intended you to do, and without knowing its intentions. The facts are these: Early in the month of November last the President asked my opinion on the manner of conducting the war. I submitted a plan to him which, in addition to other things, required all the disposable troops in New Mexico, and all the Americans in that quarter who could be engaged for a dashing expedition, to move down through Chihuahua and the State of Durango, and if necessary to Zacatecas, and get into communication with Gen. Taylor's right as early as possible in the month of March. In fact, the disposable Missourians in New Mexico were to be one of three columns destined for a combined movement on the City of Mexico, all to be on the table-land, and ready for the movement in the month of March. The President approved the plan, and the Missourians being most distant, orders were dispatched to New Mexico to put them in motion. Mr. Solomon Sublette carried the order, and delivered it to the commanding officer at Santa Fé, Col. Price, on the 23d day of February, just five days before you fought the marvelous battle of Sacramento.

"I well remember what passed between the President and myself at the time he resolved to give this order. It awakened his solicitude for your safety. It was to send a small body of men a great distance, into the heart of a hostile country, and upon the contingency of uniting in a combined movement, the means for which had not yet been obtained from Congress. The President made it a question, and very properly, whether it was safe or prudent to start the small Missouri column before the movement of the left and centre was assured. I answered that my own rule in public affairs was to do what I thought was right, and leave it with others to do what they thought was right, and that I believed it the proper course for him to follow on the present occasion. On this view he acted. He gave the order to go, without waiting to see whether Congress would furnish the means of executing the combined plan; and, for his consolation, I undertook to guarantee your safety. Let the worst come to the worst, I promised him that you would take care of yourselves. Though the other parts of the plan should fail, though you should become far involved in the advance, and deeply compromised in the enemy's country, and without support, still I relied on your courage, skill, and enterprise to extricate yourselves from every danger, to make daylight through all the Mexicans that should stand before you, cut your way out, and make good your retreat to Taylor's camp. This is what I promised the President in November last, and what you have so manfully fulfilled. And here is a little manuscript volume (the duplicate of it in the hands of the President), from which I will read you a page to show you that you are the happy soldiers who have done the will of the government without knowing its will:

"'THE RIGHT WING.—To be composed of all the disposable troops in New Mexico, to advance rapidly through the States of Chihuahua and Durango, and towards Zacatecas, and to attain a position about on a line with Gen. Taylor in the month of March, and be ready for a push on the capital. This column to move light, to have no rear, to keep itself mounted from horses in the country, and to join the centre column, or cut its way out if the main object fails.'

"This is what was proposed for you in the month of November last, and what I pledged myself to the President that you would perform, and nobly have you redeemed the pledge.

"But this was not the first or the only time that I pledged myself for you. As far back as June, 1846, when a separate expedition to Chihuahua was first projected, I told the Presi-

dent that it was unnecessary, that the Missouri troops under Gen. Kearney would take that place, in addition to the conquest of New Mexico, and that he might order the column under Gen. Wool to deflect to the left and join Gen. Taylor as soon as he pleased. Again, when I received a letter from Lieut.-Col. Mitchell, dated in November last, and informing me that he was leaving Santa Fé with one hundred men to open a communication with Gen. Wool, I read that letter to the President and told him that they would do it. And, again, when we heard that Col. Doniphan, with a thousand men, after curbing the Navajoes, was turning down towards the south, and threatening the ancient capital of the captains-general of the internal provinces, I told him they would take it. In short, my confidence in Missouri enterprise, courage, and skill was boundless. My promises were boundless. Your performance has been boundless. And now let boundless honor and joy salute, as it does, your return to the soil of your State, and to the bosoms of your families."

When Senator Benton had concluded Col. Doniphan was loudly and enthusiastically called to the stand, whereupon he rose and responded in a chaste and modest yet graphic address, in which he ascribed the great success and good fortune which continually attended him on his expedition rather to the bravery and conduct of his soldiers than to his own generalship.

As soon as Col. Doniphan's speech was concluded Capt. Hudson was called for, but upon his suggestion that a very agreeable part of the entertainment, the collation, remained to be discussed, the company adjourned to the St. Louis Park, and did full justice to the ample cheer provided for them.

Speeches and toasts followed the dinner. In answer to calls of the company, Col. Mitchell, Maj. Clark, Capt. Weightman, Capt. Hudson, Col. Benton, Col. Grimsley, Capt. Reid, and others made speeches.

Soon after the crowd dispersed, and Col. Doniphan and a large number of the volunteers took passage on the "Little Missouri" for home.[1]

Funeral honors were paid on July 9th to the remains of Col. John J. Hardin and Lieut. B. R. Houghton, of the Illinois volunteers, who fell in the battle of Buena Vista. About daylight the steamer "Missouri" arrived from New Orleans, having on board a large number of volunteers returning from the war, and, in charge of Cols. Weatherford and Warren, the remains of the lamented Hardin and Houghton. The committee of arrangements had already made such preparations as were deemed appropriate for the reception of the remains. The rotunda of the court-house was prepared for this purpose. A platform was built in the centre, resting on the circular railing around the spiral stairs leading from the ground floor. In the centre of this platform was erected a monument, a resting-place for the dead, covered with appropriate drapery and crowned with several small cannon and an American flag. From the dome was suspended a chaplet of leaves. Muskets were stacked around the monument in military style, and suspended from the railing above were flags representing the several States, those of Illinois, Kentucky, and Mississippi, and the national flag being draped in mourning. The skylight had been darkened, and the rotunda faintly illuminated by lights suspended around the circle, imparting to the scene a solemn and funereal appearance.

At eleven o'clock the committee of arrangements and the other gentlemen designated to take part in the ceremonies, preceded by the St. Louis Grays as a military escort, repaired to the steamer "Missouri" for the purpose of receiving the remains of the dead. On behalf of the committee and of the citizens of St. Louis, John M. Eager welcomed the returning volunteers and paid a feeling tribute to the dead.

Maj. Richardson, of the First Regiment, responded to this address in an eloquent speech.

The procession, under Col. Thornton Grimsley, chief marshal, with David Chambers and Frederick Kretschmar as aids, and J. P. Thomas, Samuel Willi, A. H. Glasby, C. D. Walton, W. G. Clarke, N. Aldrich, T. B. Targee, and Gregory Byrne as assistant marshals, was then formed, and the remains placed in the hearses provided for the purpose, attended by Col. Mackey, Maj. Stewart, Maj. Lee, and Capt. Bell, U.S.A., and Lieut.-Col. Mitchell, Lieut.-Col. Kennett, Capts. Hudson and Weightman, Missouri volunteers, as pall-bearers. The several committees, volunteers of Missouri, and those belonging to the Illinois regiments, citizens, and others joined in the procession. In front of the Planters' House a large body of Masons, of which order Col. Hardin was a member, took their place in the procession, and it again moved on the route designated in the programme,—down Fourth to Myrtle Street, up Myrtle to Fifth Street, up Fifth Street to Washington Avenue, down Washington Avenue to Fourth, down Fourth to Market Street to the court-house. The remains were then carried into the rotunda, and placed in the monument constructed for their reception. A great multitude of people filled the rotunda. Rev. Mr. Van Court, who had been selected for the purpose, addressed the volunteers and the auditory.

Col. Benton then addressed the Illinois volunteers who were present and the assemblage of citizens.

The ceremonies at the rotunda being at an end the procession was again formed, and the remains escorted

[1] On the 29th of July a public dinner was given by the citizens of Independence, Mo., in honor of Col. Doniphan and his officers and men.

to the steamer "Defiance," from which they were disembarked at Meredosia and taken to Jacksonville.

For months succeeding the return to the State of the Missouri volunteers, sumptuous dinners, banquets, and balls were given in their honor, as if thereby to compensate in some measure for the hardships which they had experienced in the arid deserts of Mexico. On August 23d public honors were paid to Capt. Fischer's company of mounted volunteers and a part of Capt. Weightman's company, and other volunteers from St. Louis who had been in Santa Fé. About 3 o'clock P.M. the returned volunteers were received in front of the court-house by the mayor and City Council, a portion of the Phœnix Fire Company, and the Jaegers and dragoons under Lieut. Steitz. The mayor (Judge Mullanphy) addressed the volunteers, and welcomed them back to their homes. The Rev. Mr. Picker then addressed the volunteers in German, and was responded to by Capt. Fischer in the same language.

On the return of Gen. Stephen Watts Kearney from California to St. Louis, on August 26th, a number of prominent citizens met and resolved to tender him the compliment of a public dinner, as a testimonial of their appreciation of his services as a military man, and of the respect in which he was held as a citizen. In pursuance of this resolution the committee appointed for the purpose addressed him a note, of which the following is a copy:

"ST. LOUIS, Aug. 26, 1847.

"*Brig.-Gen. Kearney, U.S.A.:*

"SIR,—At a meeting of citizens of St. Louis, the following preamble and resolution were adopted, and the undersigned appointed a committee to communicate them to you:

"WHEREAS, Gen. Stephen W. Kearney, commander-in-chief of the 'Army of the West,' has returned to St. Louis, the residence of his family and his home, and the citizens of St. Louis are desirous of expressing their admiration for him as an officer and citizen, and of the exploits of the army under his command; therefore,

"*Resolved*, That a committee be appointed to invite him to accept of a public dinner at such time as may be most agreeable to him.

"Permit them, in conveying to you the desire of your fellow-citizens, to express to you their high regard for your gallant services in one of the most remarkable campaigns on record, to assure you that they take especial pleasure in being the medium of such a communication, entertaining as they do, personally, the highest respect for you as a citizen of St. Louis, as well as a distinguished officer of the United States army, whom they are proud to honor in all the relations of life.

"With sentiments of the highest respect, we remain

"Your obedient servants,

"John O'Fallon, B. Mullanphy, J. E. Yeatman, D. H. Armstrong, J. B. Crockett, George W. Olney, R. M. Rennick, George K. McGunnegle, Edward Walsh, J. H. Lucas, John M. Krum, A. B. Chambers, Trusten Polk, Bernard Pratte, L. V. Bogy, H. S. Geyer, L. Riggs, R. S. Blennerhassett, W. Primm."

Gen. Kearney, in his reply, acknowledged the honor tendered him, which he said he would "regard as a rich reward for any service" he had rendered or would render his country, but regretted that circumstances would prevent him from accepting the public dinner offered him. He left the city within a few days to attend to his public duties at Washington, and afterwards returned to his home in St. Louis, where he died on Oct. 31, 1848, leaving a wife and several children. Gen. Kearney was born at Newark, N. J., and at the time of his death was in the fifty-fifth year of his age. Being a student at Princeton College at the age of eighteen, when the war with Great Britain commenced he determined to enter the army, and obtained a commission as first lieutenant in the Thirteenth Regiment of infantry. He was attached to the company under the command of Capt. (afterwards Gen.) John E. Wool, was engaged in the desperate fight at Queenstown Heights, and was there surrendered a prisoner. After an exchange was effected he served with honor through the war, and acquired such distinction as to retain his rank as captain during the reductions of the army in 1815 and 1821.

In 1823, having received the brevet of major, he assumed the command of four companies of the First Infantry at Bellefontaine, near St. Louis, and with that command accompanied Gen. Atkinson in his celebrated expedition on the Upper Missouri. Upon this expedition he was absent two years, and penetrated a greater distance into the Western wilderness with a military force than had ever before been attempted. He ascended the river as high as the Yellowstone, two thousand miles from St. Louis,—not in steamboats, the use of which had hardly been attempted at that day on the Missouri, but in keel-boats, worked with paddles at the stern, constructed under the direction of Gen. Atkinson. The expedition was a tedious one, yet full of interest to the gallant and energetic men at the head of it.

On his return Gen. Kearney was promoted to a majority in the Third Regiment of infantry, in which he continued to serve at the South until appointed lieutenant-colonel of the First Dragoons, a branch of the military service then first introduced. This regiment was organized by him, and in 1834, while acting as lieutenant-colonel, he accompanied Col. Dodge on his arduous campaign among the Comanches of the Red River country. His command soon became conspicuous throughout the army for its high state of discipline. Gen. Gaines once said that the First Dragoons were the best troops he ever saw, and the efficiency of Kearney's training was exhibited in the bearing of the dragoon regiments and the Mounted Rifles

during the war with Mexico. In this connection we cannot refrain from copying an incident which is highly illustrative of his peculiar qualities, and which is related by Fayette Robinson in his valuable work on the army of the United States:

"While stationed at Jefferson Barracks, Gen. Kearney was drilling a brigade on one of the open fields near the post. The manœuvre was the simple exercise of marching in line to the front. An admirable horseman, he sat with his face towards the troops, while the horse he rode, perfectly trained, was backed in the same direction along which the command was marched. At once the animal fell, fastening the rider to the ground by his whole weight. His brigade had been drilled to such a state of insensibility, that not one of them came to his assistance, nor was it necessary. The line advanced to within about ten feet of him, when, in a loud, distinct voice, calmly as if he had been in the saddle under no unusual circumstance, Gen. Kearney gave the command, '*Fourth company—obstacle—march!*' The fourth company, which was immediately in front of him, was flanked by its captain in the rear of the other half of the grand division. The line passed on, and when he was thus left in the rear of his men he gave the command, '*Fourth company into line—march!*' He was not seriously injured, extricated himself from his horse, mounted again, passed to the front of the regiment, and executed the next manœuvre in the series he had marked out for the day's drill."

In 1835, Gen. Kearney, in command of four companies of his regiment, visited the Sioux Indians of the Upper Missouri, and produced a reconciliation of the difficulties which had existed for many years between that tribe and its neighbors, the Sacs and Foxes.

In 1836 he was promoted to the colonelcy of the First Dragoons, Col. Dodge having resigned from the army, and until 1842 was stationed at Fort Leavenworth, on the Missouri River. During this time it is matter of history that, with less than half his regiment with him, he gave entire protection to the Missouri frontier from Indian depredations, making frequent and extraordinary expeditions among the Indian tribes, and impressing them with a proper degree of respect for the government under which he acted.

In this station, too, Gen. Kearney displayed that best trait of a good and intelligent commander. Although upon what was regarded as a peace station, and such it was, with the exception of keeping the Indians in proper subjection, he maintained a degree of fellowship, *esprit du corps*, and good feeling among the officers and men of his command which has seldom been equaled at any post. Nor was he more eminent in this quality than in the respect, confidence, and good will manifested for him by the frontier settlers whose approximation or business brought them in connection with the command. At all times courteous, bland, approachable, and just, yet stern, fixed, and unwavering when his decisions were once formed, he not only acquired the respect, but commanded the confidence of all with whom official business or private relations brought him in contact.

In 1842 he was appointed to the command of the Third Military Department, with his headquarters at St. Louis, in which position he was retained until 1846. It is not to be supposed, however, that during this time he led an inactive life. In 1845, in command of five companies of the dragoons, he made one of the most extraordinary marches on record, extending as far as the South Pass of the Rocky Mountains, returning by the way of Bent's Fort, on the Arkansas, to Fort Leavenworth. In this expedition he held councils with numerous tribes of Indians, and was of important service in giving protection to the emigrants to Oregon and the persons engaged in the Santa Fé trade.

In 1846, the war with Mexico having in the mean time commenced, he was appointed to the rank of brigadier-general, and assigned to the command of the "Army of the West." This army, as is well known, was ordered to take military possession of New Mexico and California A land march of such immense distance, in a desert region, and with no possibility of obtaining supplies, except at either extremity of the route, required the direction of precisely such a man as Gen. Kearney. He was familiar with such service, and knew how to provide for all the wants of his army. In an incredibly short period of time men were enrolled and assembled at Fort Leavenworth. All the necessary military supplies were also soon collected, and, almost before the New Mexicans were aware of the existence of war, Gen. Kearney, with an army at his command, was in quiet possession of the capital of the country. Here, after making such disposition of his military force as was advisable, and providing a temporary civil government for New Mexico, he proceeded to carry out the further instructions of his government, and departed for California at a season of the year when such an expedition was deemed most hazardous, on account of the sterile and inaccessible nature of the country, and the excessively cold weather to which he would be necessarily exposed. Meeting an express from California, after being out some days from Santa Fé, he determined, from the condition of affairs in that department, to order the return of all but about one hundred of his men. Of the sufferings which he endured on this route, the several battles in which he was engaged, and in which he lost some excellent and accomplished officers and men, it is not necessary now to speak. Having executed the duties imposed upon him by the government, Gen. Kearney returned to the United States in 1847; and

for his service in this campaign the brevet commission of major-general was conferred upon him.

During the winter of 1847–48 he was on duty at Washington, and in the spring of 1848 was ordered to Mexico. He proceeded thither without delay. At Vera Cruz he was prostrated with an attack of yellow fever, from which he recovered, and thence proceeded to the interior, where he was constantly employed in the performance of the most arduous and responsible service. At the conclusion of the war he returned home, bringing with him the seeds of a disease which finally terminated his useful and eventful life.

In the varied career of Gen. Kearney there was no point of character more prominent than his firmness at decision. He was cool and dispassionate in the formation of his judgment, and received counsel and suggestions with affability and attention, but when his own decision was made it was unchangeable. He was of rather a taciturn disposition, and seldom communicated his purposes or intentions to any one. His own mind was the store-house of his thoughts, and when the hour for action arrived he was always equal to the exigency of the occasion. The possession of these and other qualities gave him a hold upon the affections and confidence of the officers of the army, which rendered him an efficient and successful leader wherever duty called him. When it was reported that he was to be the commander of "The Army of the West," for the conquest of New Mexico, a thrill of joy and security ran through the breast of every man who expected to engage in that expedition. His knowledge of frontier duty, his familiarity with the plains, the Indians, the wants and necessities of an army in such an expedition, his brave and well-matured judgment, all pointed him out as the man to lead such an expedition, and volunteers rushed with alacrity to enroll themselves under his standard.

In another aspect of his history his memory is treasured by the citizens of the West. His early military career was on the frontier, and from the time of his entering the army until his death most of his duties were actively discharged for the protection and security of the border settlers. The character of his duties brought him conspicuously before his fellow-citizens, and while his good qualities secured their esteem, his firmness and sense of justice won their respect. He had long been regarded as identified with the West, and the West claimed him as her son. In St. Louis were his home, his wife, and interesting family, and, as far as duty permitted, this was the place of his hopes and affections.

His funeral in St. Louis, on Nov. 2, 1848, was, perhaps, the largest that had ever taken place in the city up to that time. At an early hour a large concourse of persons had congregated in front of St. George's Church, on Locust Street, and the several streets leading to it. At eleven o'clock the coffin was deposited in the church, Gen. Churchill, Col. Plympton, Col. Bainbridge, and Maj. Loring, on the part of the military, and Kenneth Mackenzie, William Glasgow, Sr., Dr. William Penn, and Andrew Elliott, on the part of the citizens, acting as pall-bearers. The funeral ceremonies were performed by the Right Rev. Bishop Hawks, of the Episcopal Church. After the ceremonies in the church were over the corpse was borne in front of the Seventh and Eighth Regiments of United States infantry and a troop of the First Dragoons, under command of Maj. Thompson, the whole brigade under the command of Col. Sumner, of the First Dragoons, to the hearse. The procession was then formed, under H. L. Patterson, chief marshal, with Thornton Grimsley, Charles Keemle, T. B. Hudson, and Fred. Kretschmar, assistant marshals, as follows: The two United States regiments of infantry and troop of dragoons, acting as a military escort, their drums, etc., muffled, and regimental and company colors draped in mourning. Then came two carriages, with the bishop and pall-bearers; the hearse, the led horse, and the body-servant of the general; carriages with pall-bearers; the family and relatives of the deceased, and the several volunteer companies of the city, under the command of Col. Fischer. The volunteers who had served under Gen. Kearney, citizens on horseback and in carriages, brought up the rear of the procession. The whole procession, when under way, was nearly a mile in length. Upon reaching the place of interment the body was deposited in a private vault, and the ceremonies performed by the bishop. Three rounds were fired by the infantry and six guns by the artillery. Throughout it was a solemn and impressive scene.[1]

[1] The *Republican* contains the following notices of military affairs:

The De Kalb Rangers received a reception at Bridgeton on the 19th of October, 1847. December 18th, "Capt. Korpony has authority to receive three hundred mounted volunteers to fill up the Third Regiment Missouri Mounted Volunteers. They are designed for service in New Mexico."

Feb. 29, 1848.—"Yesterday, in front of the court-house, on Chestnut Street, a handsome national flag was presented to Capt. G. Korpony and his recruits by Col. T. Grimsley, the selected organ of the ladies by whom it was prepared. Above the Stars and Stripes floated two streamers, the one red, the other white, bearing this inscription, 'Third Regiment Missouri Mounted Volunteers.'"

July 26, 1848.—"Mr. Kit Carson, bearer of dispatches from Governor Mason in California to the government at Washington, arrived in this city this morning from California. He left

Col. Samuel Macree, another distinguished officer in the Mexican war, died in St. Louis in July, 1849. Col. Macree was long attached to the army, and had seen much active service. He was in the Florida war, and during the Mexican war was a most efficient officer in his department. So well was his conduct approved by the government that the brevet of lieutenant-colonel was conferred upon him for his services on the Rio Grande. At the time of his death he was quartermaster of the United States army in St. Louis. He left a widow and several children.

In June, 1852, still another prominent officer of the Mexican war, and one who had been for many years a resident of St. Louis, died. Gen. Rennet Riley at the time of his death held the rank of brevet major-general in the army of the United States. That he had merit is proven by the fact that before the war of 1812 he was the foreman of a shoemaker's shop in Baltimore, a place of confidence, and justifying the belief that he was a master-workman. But this employment did not suit him, and he entered as a sailor on board one of the American privateers about the commencement of the war of 1812, but was unsuccessful in the cruise. Returning to Baltimore after war was declared, influential friends procured for him the commission of ensign in the army. This was the commencement of that career which afterwards gave him distinction and a proud name in the history of the country.

His commission of ensign in a rifle company bore date the 19th of January, 1813, at which time he was over twenty-two years of age. He was rapidly promoted from this position for gallant services during the war, in which he was actively employed on the Canada frontier. At the close of the war he was captain in one of the rifle regiments. In 1819 he was at Council Bluffs, and was transferred to the gallant Sixth Infantry, in which regiment were Atkinson, Leavenworth, Cummings, Foster, Brown, and other worthies. He distinguished himself in the expedition led by the gallant Leavenworth against the Arickaree Indians, and in which they were badly defeated. These Indians had attacked and routed a party of mountain trappers under Gens. Ashley and Henry, on the Missouri, and for this Leavenworth and his command took ample vengeance.

In 1826 he was appointed to command an escort to the traders to Santa Fé, and when near the Arkansas was attacked by the Indians, but totally routed them. After his regiment left Fort Leavenworth they were stationed at Jefferson Barracks, and here his intercourse with the people of St. Louis was of an unreserved character, and he acquired the friendship of all with whom he came in contact. In 1832 he, with his regiment, participated in the Black Hawk war, and contributed materially to the early termination of that war. In 1836 he was ordered to the Sabine, the Texas boundary. Thence his regiment was transferred to Florida, to take part in the Seminole war, and it is familiar to all how many gallant spirits gave up their lives for their country in that ignoble strife. The Sixth Regiment suffered fearfully in officers and men. He was commissioned brevet colonel "from the day on which was fought the battle of Chokachatta, Fla., in which he particularly distinguished himself by brave and gallant conduct, and for long, meritorious, and gallant service." The war in Florida having come to a termination, he was promoted to be lieutenant-colonel of Second Infantry, and stationed on the lakes, and afterwards at Jefferson Barracks.

Of course the war with Mexico found him in the field, in command of the Second Brigade of Gen. Twigg's division, composed of the Fourth Artillery and the First and Seventh Infantry, on Gen. Scott's line. He participated in all the principal battles which marked Gen. Scott's march to the capital of the Montezumas, and received the brevet of brigadier-general for "gallant and meritorious conduct in the battle of Cerro Gordo, April 18, 1847," and the further brevet of major-general "for gallant conduct at Contreras, Aug. 20, 1847." He was also a gallant participant in the memorable battles of Cherubusco and Chapultepec, and was always distinguished by his courage and the judgment and coolness with which he went into battle.

---

the City of the Angels on the 5th of May with an escort of twenty men, and met with no adventure of any interest on the route so far as Santa Fé. Mr. Carson performed the entire journey from California to the Missouri River on the same set of animals. After leaving Taos he avoided the main road, fearing the hostility of the Indians, and therefore saw no parties of traders."

October 22.—"*St. Louis Grays.*—This volunteer company, which has been recently organized under the command of Capt. West, paraded on Friday to escort the remains of Lieut. Ridgely to the grave."

November 14.—"*Honor to Returned Volunteers.*—The Laclede Battalion of St. Louis volunteers yesterday paraded as an escort to do honor to the volunteers recently returned from Mexico. The several companies met at their respective quarters, and about twelve o'clock took up the line of march, and with their guests paraded through several of the principal streets, and then proceeded to the St. Louis Park. At the park the volunteers were welcomed and addressed by Wilson Primm, to which Capt. Fischer and Adjt. Holmes each responded. After these exercises the Laclede Battalion formed in line and saluted their guests as they passed into the saloon, where a sumptuous repast was provided."

On his return from Mexico he was ordered to the command of the Military Department in California, where he exercised civil as well as military power, and so well did he deport himself that it was contemplated at one time to elect him to the Senate of the United States from California, but this he declined. For two or three years before his death he had been residing with his family at Buffalo, N. Y., where he died in the sixty-second year of his age. He married Miss Israel, of Philadelphia, in 1830, and several children were born to them, one of whom was a promising young officer in the navy.

It may be stated as an evidence of the high estimation entertained for him by the people of Missouri that the Legislature caused to be procured and presented to him a splendid sword, and he was accustomed to refer in terms of gratified sensibility to this testimonial of the State in his favor.

Gen. Riley was not an educated man, but he was ready in word and action. He was slow in writing, it is said, and on one occasion, when he could ill brook a taunting allusion to this defect in his early education, he put an end to it by saying, "By G—d, I can make my *mark!*" Gen. Riley was the very soul of chivalry. He was incapable of a mean action, and never tolerated it in another. He was devoted to his profession and his country, and it may be said with propriety that in his death the army lost one of the *preux chevaliers* who have given to it so much of its glory.

CHAPTER XVI.

THE CIVIL WAR.[1]

—THE accession of the Republican or anti-slavery party to power filled the Southern States with dismay, and created the greatest excitement throughout the country. Hardly had this result been ascertained before some of the extreme Southern States began military preparations, and set

1860.

on foot measures to carry into effect their oft-repeated threats of secession, and of confederation in resistance to alleged Northern encroachments. Meetings were held in every city, town, and village, and these were addressed in vehement language by members of Congress and other prominent speakers. Resistance to the authority of the new administration and the duty of the Southern States to secede from the Union were the chief topics of their impassioned appeals to the people. On the 20th of December the State Convention of South Carolina, after a brief debate, passed the ordinance of secession by a unanimous vote, and on the following day a declaration of the causes which had led to this action was also adopted.

The announcement of the passage of the ordinance of secession excited general enthusiasm in all the more Southern slave States, but in the border States it served to intensify the painful feeling with which their people had watched the progress of events in South Carolina. That the action of the latter State had been hasty and ill judged a majority even of the people of the South admitted; and this fact gave additional poignancy to the general sorrow with which this first disunion movement was regarded. By the passage of the South Carolina ordinance of secession an impetus was given to the prevailing excitement in the South, and the measures of the cotton States looking in the same direction were greatly accelerated. Mississippi followed the example of South Carolina on the 9th of January, 1861; Alabama and Florida, January 11th; Georgia, January 20th; Louisiana, January 26th; Texas, February 1st; Virginia, April 17th; Tennessee, May 6th; Arkansas, May 18th; North Carolina, May 21st; and Kentucky, November 20th.

Missouri, as an exposed and frontier slaveholding State, had a large practical interest in the maintenance of the guarantees of the Constitution. From her geographical position she had a heavier stake, proportionately, in the preservation of the Union, as far as her material prosperity was concerned, than any of her sister Commonwealths of the South. This is clearly demonstrated by a consideration of the sources of her wealth, and the nature and direction of her industries and commerce, external and internal. Bound to the Constitution and the United States by every tie that interest could weave or strengthen, she had been uniformly loyal to the performance of every obligation imposed by the one or suggested by her devotion to the other, and in all the dissensions which sectional feeling and fanatical agitation had promoted her support had invariably been given to moderate doctrines and conciliatory counsels. Sympathizing with the South in her wrongs and just resentments, and

[1] In the limited space at our command it is impossible to treat that portion of the history of the city and county of St. Louis embraced between the years 1860 and 1866 except in the briefest possible manner. During the period in question almost every day bristled with prominent local events, and every week gave birth to numberless incidents of local or general interest. The magnitude of the subject and the multiplicity of the details required in a connected narrative of one of the most interesting and stirring epochs in the history of the city demand a far more extended and elaborate treatment than can be given within our present limits, and we have therefore been forced, reluctantly, to content ourselves with simply a chronological presentation of the most prominent events in St. Louis history during the period of the civil war.

ready at all times to make common cause with her in the constitutional maintenance of her rights, she had at the same time studiously kept aloof from 1860. the mad heresies and passionate bitterness of the more radical Southern leaders. Being the only border slaveholding State west of the Mississippi River, and lying contiguous to Kansas, she had often suffered from the aggressions of the Northern States, but had always been prompt to repel them within the limits of her constitutional resources and Federal allegiance, and had done nothing whatever to widen the breach between the antagonistic sections of the republic, or to weaken the hands of those conservative Northern citizens who were nobly struggling to maintain the good faith and integrity of the national compact.

—The General Assembly of Missouri began its twenty-first annual session Dec. 30, 1860, at Jefferson City, and on the 4th of January, 1861, Clai- 1861. borne F. Jackson was inaugurated as Governor. In his first message Governor Jackson recommended the immediate calling of a State Convention "to consider the relations between the government of the United States, the people and governments of the different States, and the government and the people of the State of Missouri, and to adopt such measures for vindicating the sovereignty of the State and the protection of its institutions as shall appear to them to be demanded."

In accordance with this suggestion, a bill was passed on the 18th of January calling the convention, which was to meet at Jefferson City on the 28th of February. In the mean time (on the 18th of January) Hon. Daniel R. Russell, who had been appointed a commissioner from Mississippi, had addressed the Assembly on the advisability of co-operation on the part of Missouri with Mississippi and the other Southern States in the adoption of efficient measures for the common defense and safety of the slaveholding States.

—Considerable excitement was caused in St. Louis on the 9th of January by the arrival of a small body of troops from Newport Barracks to reinforce the garrison at Jefferson Barracks. The excitement continued to increase until the 11th, when it became intense, owing to the fact that Lieut. Thompson, with a squad of United States soldiers, had entered the city, occupied the custom-house and sub-treasury, and removed the government funds. Affairs in the city then assumed such a threatening aspect that Mayor Filley, on the afternoon of the same day, sent a message to the City Council, in which he said, "Very general and unusual excitement prevails in our community, and, although I do not apprehend that any actual disturbance or interference with the rights of our citizens will ensue, yet I deem it best that all proper precautionary measures should be taken to fully prepare for any event. I would hence recommend 1861. that the members of the Council from each ward select from among their best citizens such a number of men as the exigencies of the case may seem to require, and to organize them to be ready for any emergency. Our citizens are entitled to the full protection of the laws, and must have it."

—On the 9th of January a number of the members of the Democratic party held a public meeting at Washington Hall, and adopted a series of resolutions, one of which called for the appointment of "a committee of twenty to act with a committee of the 'Union party,' for the purpose of opposing black Republicanism."

About the same time the leading unconditional Republicans, or Union men, agreed with certain leaders of the Democratic party to hold a grand Union meeting at the court-house on Saturday, January 12th, "to declare the sentiments of St. Louis on the great issues before the country."

On the morning of that day the Democratic papers announced that the meeting was expected "to assert its loyalty to the Union, and at the same time to take position in favor of the 'Crittenden Proposition,' as a fair basis for the adjustment of all the real differences between the free and the slave States." This proposition, which was thus announced for the first time, met with great objection from the Republicans, who desired to affirm their unconditional devotion to the Union. Hon. Francis P. Blair, after consultation with the leading men of his party, decided that the only legitimate course for them to pursue would be to declare their unalterable fidelity to the Union under any and all circumstances. As this could not be done under the arrangements for the proposed meeting without producing angry debate and probably serious consequences, he determined to advise his Republican friends to decline participation in it. Consequently, on the morning of the meeting-day (January 12th) the following placard was posted around the city:

"UNION MEETING.

"TO THE REPUBLICANS!

"As it seems to be the determination of those who called the Union meeting to-day to take narrower ground in support of the Union of the States than that which the Republicans of this city have already assumed, we have judged it expedient to advise the Republicans not to participate in the meeting to-day, but to maintain the position already assumed in favor of the Union under all circumstances.

"FRANK P. BLAIR, "F. A. DICK,
"P. L. FOY, "S. T. GLOVER,
"WM. MCKEE, "R. S. HART."

The meeting was held as announced at the east front of the court-house, and was a grand Union demonstration. At noon a salute of thirty-three guns was fired on the Levee, followed by another at two o'clock. Precisely at this hour the meeting was called to order by Capt. N. J. Eaton, and on his motion Col. Robert Campbell was chosen president. The following gentlemen were selected as vice-presidents:

1861.

Col. John O'Fallon, Bernard Pratte, Gen. N. Ranney, D. D. Mitchell, Ed. Haren, H. L. Patterson, J. W. Wills, Robert M. Funkhouser, Adolphus Meier, Samuel Gaty, Chas. Todd, Wm. Patrick, John Hogan, Edward Dobyns, Daniel G. Taylor, Wayman Crow, D. A. January, Jas. E. Yeatman, Andrew Harper, Andrew Christy, Dr. Linton, L. D. Baker, Jas. H. Lucas, Isaac H. Sturgeon, R. J. Lockwood, P. G. Camden, Judge Luckland, J. A. Brownlee, H. E. Bridge, George Penn, A. Gamble, Gerard B. Allen, D. H. Donovan, J. H. Alexander, Thomas Skinker Marshall Brotherton, John F. Darby, Sol. Smith, J. B. Brant, A. D. Stewart, John G. Priest, John S. McCune, M. M. Pallen.

Secretaries, E. N. Tracy, J. B. S. Lemoine.

A committee on resolutions was appointed as follows:

John D. Coalter, Logan Hunton, Albert Todd, A. S. Mitchell, C. C. Whittelsey, W. T. Wood.

The committee retired for action, whereupon Judge H. Gamble, being called upon, addressed the vast assemblage. At the conclusion of his speech the committee through Judge Coalter reported the following resolutions:

"The citizens of St. Louis, in mass-meeting assembled, not as party men, declare that, living as we do under a republican form of government, whose basis is public opinion, we (a portion of the people of Missouri) believe it to be our right and duty to set forth our sentiments in this crisis of public affairs, and therefore be it

"*Resolved*, 1. That we are warmly attached to the government under which we live; that we recognize the Federal Union as the great preservative of our liberties; that under it we have, by God's providence, prospered beyond all other people, and even beyond the expectations of our patriot sires, who established it as the best means of perpetuating the blessings which they so gallantly fought for and gained.

"2. That under this government we are respected abroad, prosperous at home, and fast taking our true position as the leading nation of the earth.

"3. That we do not recognize as a necessity any conflict between the institutions of the people of this great country, but, on the contrary, we see in our widely extended territory, our varieties of climate, soil, productions, domestic institutions, modes of industry, and even modes of thought, only the grounds for a more perfect union. In this variety we see nature's great laws pervading an extent, and a necessary characteristic of every great people and widely extended empire.

"4. Valuing as we do thus highly the American Union, we should regard its dissolution as eminently disastrous to our country, and as tending to injure the cause of rational liberty throughout the world.

"5. That as our fathers denounced so we denounce as hostile to the Union the formation of all parties upon a purely sectional basis; and while the temporary ascendency and triumph of such parties is not, of itself, sufficient cause for the dissolution of the Union and overthrow of the government, yet it is sufficient cause for us to give, as we now give, earnest and solemn warning that the Union cannot continue unless all constitutional rights are secured against encroachments.

"6. That the possession of slave property is a constitutional right, and, as such, ought to be ever recognized by the Federal government; that if the Federal government shall fail and refuse to secure this right the Southern States should be found united in its defense, in which event Missouri will share the common duties and common danger of the South.

"7. That the discord prevailing for forty years between the people of the Northern and the Southern States, touching the relation of the Federal government to slavery, affords sufficient reason for all sections of the Union to require a clear and final settlement of all matters in dispute by amendments to the Constitution, so that the slavery question may never again disturb the public peace or impair the national harmony.

"8. That we have ever reposed faith in the virtue, intelligence, and justice of the American people, and now give it as our opinion that if time and opportunity be given they will, when freed from the pernicious influence of mere politicians and demagogues, gladly and cordially agree to such terms of adjustment of our troubles as will secure to all the States equality in the Union and re-establish fraternal relations between the people of the different sections, and revive everywhere the love for our glorious Union; and we cordially approve of the principles of adjustment contained in what are known as the Crittenden Propositions, and believe that a settlement upon such a basis should and will be satisfactory to all parts of the country; and we give it as our unhesitating opinion that if opportunity for a direct vote on the propositions be given, the people, or their representatives elected for that purpose in convention, by overwhelming majorities in all parts of the Union would be found to favor their adoption; and, in our opinion, the country can only be saved from the horrors of civil war by the adoption of some such measure of compromise.

"9. That, holding these views, we are not prepared to abandon the Union with all its blessings while any hope of adjustment remains. Until then we will maintain our place in the Union, and contend for and demand our equal and constitutional rights, and will not be content with less.

"10. That, in the opinion of this meeting, the employment of the military forces of the government to enforce submission from the citizens of the seceding States will inevitably plunge the country in civil war, and will immediately endanger, if it do not entirely extinguish, all hopes of a settlement of the fearful issues now pending before the country. We therefore earnestly entreat, as well the Federal government as the seceding States, to withhold and stay the arm of military power, and on no pretext whatever to bring on the nation the horrors of civil war, until the people themselves can take such action as our troubles demand.

"11. That the people of Missouri should meet in convention for the purpose of taking action in the present state of the nation's affairs, at the same time to protect the Union of the States and the rights and authority of this State under the Constitution; and to secure a consummation so devoutly to be wished Missouri should consult with her sister States, that by united action those fraternal feelings which fanatics at both North and South have turned into bitterness and wrath be again restored, and mutual affection control all passion and redress all grievances.

"12. That in the call of a convention representation should be in proportion to population, as near as may be, and that the final action of the convention should be submitted to the people for their approval and ratification at the polls."

The reading of each clause produced cheers from the assemblage, and the resolution indorsing the Crittenden Propositions particularly was received with the
1861. greatest enthusiasm. "Three times three" cheers were given for Hon. John J. Crittenden. The meeting then adjourned, but the assemblage, not willing to disperse, called upon Maj. Uriel Wright for a speech. Maj. Wright accordingly addressed the meeting, and at the conclusion of his speech the vast throng gave three cheers for the Union. After Maj. Wright had concluded his remarks, Col. L. V. Bogy was called to the stand and made a short speech, in which he expressed strong Union sentiments. He was followed by C. C. Whittelsey, who took a philosophical view of the state of the country, and thought if the people remained cool all the difficulties would be settled peaceably. Speeches were also made by Mr. Sanders, Col. Henry N. Hart, Mr. Strong, Mr. Cullen, Hon. C. Kribben, Gen. N. Ranney, and others. It was nearly dark before the assemblage left the court-house.

—On the 17th of January, Britton A. Hill published an eloquent "appeal to the people of the United States in behalf of peace, of compromise, and of the Union," and on the same day the following memorial to Congress was very extensively signed by all classes of citizens and forwarded to Washington:

"The undersigned, citizens of the State of Missouri, view with alarm the present condition of public affairs. They have seen with great regret the secession of four States from the Union, so far as the action on the part of those States is concerned, and they fear that others may follow the example. They deeply regret that any condition of national affairs should have brought about such an issue; and, without going into an examination of the causes which have impelled sister States to this act, they pray your honorable body at once to pass such acts as will restore the Union and give peace to the country. And in this connection they beg leave to say that the adoption of the propositions contained in what are known as the Crittenden resolutions would be received by the border States as a satisfactory adjustment of existing difficulties, and render us once more a united and happy people."

—On January 17th, Maj. Higgins, an old and highly esteemed citizen of the Ninth Ward, raised a Union pole on Broadway near the "Reveille House," and hoisted the American flag on it.

—A meeting of the citizens of Carondelet, irrespective of party, was held at Lafayette Hall on Thursday evening, January 17th. Maj. Thomas Harney, on motion of Dr. Robert J. Hornsby, was called to the chair, and on motion of W. B. Quigley, Maj. Thomas W. Levant and Dr. A. W. Webster were appointed vice-presidents, and Edward Haren, Jr., secretary. On motion of J. M. Loughborough, Messrs. J. M. Loughborough, W. L. Hornsby, Socrates Newman, R. R. Southard, M. Chartrand, Josiah Cross, and J. F. Hume were appointed a committee on resolutions.

Mr. Loughborough, on the part of the majority of the committee, reported the following resolutions:

"*Resolved*, That we cordially approve and indorse the resolutions adopted at the mass-meeting of the citizens of St. Louis County, held at the court-house on last Saturday.

"*Resolved*, That as the Federal government was formed by the people of each State, and was sustained by the affection of each to the whole, it can only be continued by a similar affection, and not by the force of arms."

Mr. Hume presented a minority report.

On motion of Dr. Hornsby, the majority report was agreed to.

The meeting was addressed by Mr. Stafford and Maj. Harney, of Carondelet, and Maj. Uriel Wright, of St. Louis.

—"A meeting of the citizens of all political parties opposed to the black Republican rule in the city of St. Louis" was held on Dec. 26, 1860. It was called to order by Col. T. Grimsley, and John F. Darby was appointed chairman, and Charles C. Whittelsey, secretary. A committee consisting of Charles C. Whittelsey, Albert Todd, James E. Yeatman, John M. Krum, James M. Hughes, Daniel H. Donovan, and Thornton Grimsley, who were "opposed to the principles and practices of the Republican party," was appointed for the purpose of consulting together, and to report to the next meeting "the best policy for the citizens of St. Louis to adopt in view of the present condition of public affairs." The committee was authorized to "take under consideration the municipal affairs of the city of St. Louis only," and were to report at a meeting to be held on the 18th of January, 1861. At the time appointed the meeting again assembled, with John F. Darby in the chair, and Henry Overstolz and James E. Yeatman as vice-presidents, and P. B. Garesche, secretary. After some discussion, participated in by Messrs. Wayman Crow, James E. Yeatman, P. B. Garesche, Albert Todd, Daniel H. Donovan, Grimsley, H. N. Hart, A. S. Mitchell, J. C. Barlow, and others, the committee appointed at the first meeting amended their address, written by Hon. Albert Todd, so as to read, "to all who are opposed to the Republicans of the city of St. Louis," and the programme of measures recommended for "the overthrow of the present black Republican rule in the city at the coming municipal election in April next" was adopted.

—On January 29th, Thomas C. Johnson, of St. Louis, introduced into the Senate of Missouri a joint resolution appointing commissioners to the "Peace

Congress" which was to assemble in Washington on February 4th. After some amendments the resolution was adopted, and the following commis-
1861. sioners were appointed, who left without delay for Washington City: Nat. C. Claiborne, Waldo P. Johnson, John D. Coalter, A. W. Doniphan, Harrison Hough, and A. H. Buckner.

—During the Presidential campaign of 1860 the Republicans of St. Louis had organized the celebrated "Wide Awake" club, which afterwards, under the leadership of Hon. Francis Preston Blair, Jr., became the basis of the Unconditional Union party in St. Louis. After the election of Mr. Lincoln the original purposes of the club ceased to exist; but owing to the critical condition of public affairs, Mr. Blair advised the reorganization of the "St. Louis Wide Awakes," and in the latter part of December, 1860, meetings were held in the various wards for that purpose. The calls for enrollment of members were promptly and enthusiastically responded to, but after an organization had been perfected, the movements of the opposition led to an abandonment of their project by the Wide Awakes and the organization of the more popular Union clubs in their stead. Accordingly, on the 11th of January, 1861, a meeting was held at Washington Hall of all those in favor of the Union under any and all circumstances, at which the Wide Awakes were formally disbanded and a Union club organized. Subsequently all the Union men in the city of St. Louis, irrespective of old party ties, were invited to join the new association. The first political movement of this organization was the election of delegates to represent St. Louis in the State Convention, which was to assemble at Jefferson City on February 28th. In view of the critical condition of affairs, the Unconditional Union leaders acted with the greatest caution. Most of the ultra Republicans were in favor of placing a straight-out Republican ticket in the field upon an Unconditional Union platform, but Messrs. G. F. Filley, O. D. Filley, James O. Broadhead, Samuel T. Glover, F. P. Blair, Jr., and other prominent men in the old Republican party of St. Louis advised a more prudent course. James Peckham, in his interesting work on "Gen. Nathaniel Lyon, and Missouri in 1861," says,—

"Mr. Blair explained his anxiety to secure the aid of the State generally in behalf of the Union, and it was to be feared that the prejudice against the Republicans was so powerful that the masses, as well as the leaders who were favorable to the Union, would refuse to support a Republican ticket, no matter who were the candidates. It was upon this idea that Mr. Blair had advised the abandonment of the 'Wide Awakes' in January, and that he now advised a further abandonment of the Republican organization in the pending contest. 'I don't believe,' said a Republican partisan, 'in breaking up the Republican party just to please these tender-footed Unionists. I believe in sticking to the party.'—'Let us have a COUNTRY first,' responded Mr. Blair, 'and then we can talk about parties.'"

A meeting of Unconditional Union men was held in Mercantile Library Hall, January 31st, at which Sol. Smith was made chairman. Resolutions in favor of the Union were passed, and a committee of twenty was appointed to present to an adjourned meeting the names of suitable candidates for the convention. This committee of twenty was made up of Bell and Everett men and Douglas men. Mr. Blair was in constant consultation with this committee, and gave the movement his indorsement. By the call of the chairman of the former meeting, all Unconditional Union men were invited to meet at Verandah Hall on the 6th of February, for the purpose of receiving the report of the committee. The meeting was largely attended, with Sol. Smith in the chair, and John Riggin secretary. The committee of twenty reported, through Mr. Alexander, the following names as Unconditional Union candidates for the convention: Ferd. Meyer, George R. Taylor, Dr. M. L. Linton, H. R. Gamble, Hudson E. Bridge, John F. Long, Sol. Smith, J. H. Shackelford, Uriel Wright, Turner Maddox, William S. Cuddy, James O. Broadhead, Isador Busch, John How, and Henry Hitchcock.

Mr. Peckham says, "An effort was made to consider the names separately, which might have resulted in discarding several names on the ticket, had it not been for the argument of Messrs. James S. Knight, A. Mitchell, and Mr. Blair. From Messrs. Knight and Mitchell the meeting learned that the first three named were 'Douglasites,' the following seven were 'Bell-Everetts,' and the last four 'black Republicans.' At this last designation by Mr. Knight a storm arose, and cries of 'take it back' resounded from all parts of the hall. Mr. Knight pleasantly apologized, and was in turn cheered. Mr. Blair, in a speech of great power, said he did not care what parties gentlemen had belonged to. He was for a new party, an Unconditional Union party, for a party that would stand by the Union in any emergency, and he was satisfied with the ticket as it was presented. He was for remaining in the Union, and in St. Louis too, whether the State went out or not. If Missouri seceded, he was for St. Louis seceding from Missouri; and he wanted all the help he could get to keep her in the Union. In the crisis that was upon us men must cease to belong to parties, and belong, for the time, to the country. It was not a season to talk about individual preferences. What was wanted he felt would be cordially granted, and that was *a perfect forgetfulness of past organizations in the determination to save the Union!*

"The motion to consider the names separately was then withdrawn, and the whole ticket was nominated amid great enthusiasm. Subsequently George R. Taylor, William S. Cuddy, and Turner Maddox declined being candidates, and T. T. Gantt, Samuel M. Breckenridge, and Robert Holmes were elected to fill the ticket. In their letters of declination both Taylor and Maddox declared their fidelity to the Union cause."

—In pursuance of a call signed by "Union men" who were in favor of "giving the South all her consti-

tutional rights," a "Constitutional Union" meeting was held at Washington Hall on the 4th of February, and the following gentlemen having
1861. received the indorsement of the meeting became candidates for the State Convention: John L. Coalter, Henry Overstolz, Uriel Wright, D. A. January, Albert Todd, J. W. Willis, William T. Wood, N. J. Eaton, H. S. Turner, George Penn, H. R. Gamble, L. V. Bogy, L. M. Kennett, P. B. Garesche.

The campaign was opened by the "Constitutional Union" party at a public meeting held in the St. Louis Hall, corner of Biddle and Fifth Streets, on February 8th.

The meeting was called to order by T. F. Keane, upon whose motion Col. Thornton Grimsley was elected president, with the following additional officers: Vice-Presidents, James E. Yeatman, John F. Darby, Fidelio C. Sharp, Andrew Middleton, Edward Brooks, S. H. Laflin, Joseph McBride, Bernard Pratte, Joseph H. Locke, Samuel Gaty; Secretaries, C. C. Whittelsey, Calvin F. Byrnes, H. W. Williams.

Upon taking the chair, Col. Grimsley delivered a short but fervent and eloquent address, in which he took occasion to recite the objects contemplated in the nomination of the Constitutional ticket. At the conclusion of his remarks he introduced Judge William T. Wood, one of the Constitutional candidates for delegates, who delivered an address upon the issues before the people.

Loud calls were then made for Col. Bogy, who in response took the stand and delivered a short but spirited and forcible speech.

Hon. Albert Todd, who was next called to the stand, delivered an eloquent and patriotic address.

On the 9th of February the friends of the Constitutional Union ticket held a grand ratification meeting at Verandah Hall.

The meeting was called to order by ex-Mayor Washington King, upon whose motion Samuel Gaty was elected president. The following additional officers were then elected: Vice-Presidents, Thornton Grimsley, George W. Dreyer, James H. Lucas, H. N. Hart, Thomas C. Chester, Col. S. Wood, Asa Wilgus, Michael A. Hogan, John S. McCune, Earl Matlack, Capt. D. B. Hill, Capt. John Reilly, Gerard B. Allen, Thomas Skinker, Matthias Steitz, John D. Daggett, R. M. Parks, T. T. January, Levin D. Baker, Richard C. Ludlow, P. P. Tippett; Secretaries, Ed. N. Tracy, Charles Miller.

C. C. Whittelsey then offered the following resolutions, which were adopted with overwhelming unanimity:

"We, citizens of St. Louis, opposed to the black Republican party, in mass-meeting assembled, declare, in the language used by the Father of his Country, in his Farewell Address, 'that the unity of the government which constitutes one people is dear to us.' In the language of Washington in that same address, we say, further, that 'toward the preservation of our happy state it is requisite not only that we discountenance irregular opposition to its acknowledged authority, but also that we resist with care the spirit of innovation upon its principles, however specious the pretext. One method of assault may be to effect, in the forms of the Constitution, alterations which will impair the energy of the system, and thus undermine what cannot directly be overthrown.'

"We charge that the Republican party is, in the language of Washington, truly characterized by 'geographical discrimination' as a sectional party, whose bond of union is hostility to an institution common to fifteen States of this Union; we charge that it is seeking, under the forms of the Constitution, to subvert its spirit by denying, as that party has done in its platform of principles adopted at Chicago, to the slaveholding States their equality in the Union, by denying to the citizens of Missouri and her sister slaveholding States their rights in the common territories of the States. We therefore feel it to be our duty to resist any such innovation upon the principles of the Constitution which created this American Union, however specious the pretext.

"To this end we do heartily approve the resolutions adopted at the Constitutional Convention held at Mercantile Library Hall on Saturday, February 2d, and do ourselves adopt them. . . .

"Thus approving the principles of said resolutions, we do accept the nominations of said convention of candidates for delegates to the convention of the people of Missouri, to be held on the 28th of February, and in union for the sake of the Union we will do what we can to elect the Constitutional ticket by an overwhelming majority, and thus remove from St. Louis the stigma of being an anti-slavery black Republican county, hostile to the institutions of the State of Missouri, of which State we are proud to be citizens."

After the applause following the reading of the foregoing had subsided, Dr. D. A. January was introduced and made an eloquent speech. He was followed by Messrs. P. B. Garesche, Capt. N. J. Eaton, Maj. Wright, Hon. Luther M. Kennett, Louis V. Bogy, William T. Wood, and Albert Todd.

Another "grand rally" of the Constitutional Union party was held on the 13th, at which Col. Charles S. Clarkson and Messrs. Kennett, Wright, Garesche, Davis, of Illinois, Pauley, and others made speeches. The president of the meeting was James H. McBride, and the vice-presidents were Jas. S. Wilgus, James Shea, Joseph Garneau, Thornton Grimsley, Edward Ludlow, P. T. McSherry, J. D. McAuliff, George Light, Joseph McBride, Jacob Kern, John Mulloy, George Ward, Col. S. Woods, Louis Vallé, Z. T. Knott, William Pope, F. Beehler, Joseph H. Locke, Michael A. Hogan, Charles Todd, Samuel Gaty, James Sweeny, P. J. Pauley, John Busby, Andrew Middleton, John Shiffman, Andrew Reinstadtler, George W. West, J. W. Scimers, Patrick Driscoll,

Adolph Philibert, C. Pullis, Frank Weston, A. H. Menkins, L. D. Baker. The secretaries were R. C. Ludlow and Capt. P. Naughton.

1861. The last general meeting of the same party for the campaign was held in the rotunda of the court-house on the 16th, and was called to order by R. C. Ludlow, on whose motion J. B. S. Lemoine was elected chairman. The following additional officers were chosen: Vice-Presidents, Henry Whitimore, Ezra O. English, Jas. E. Yore, Col. Chiles, John Ramsey, Wm. F. Stacey, Wm. S. Cuddy, Dr. R. A. Stevens, Thos. Skinker, R. Southard, John C. Degenhardt, John Young, M. W. Warne, Samuel Robbins, L. D. Baker, Wm. S. Stamps, Archibald Carr, Chas. S. Rannells, Andrew Harper, John S. McCune; Secretaries, T. F. Keane, Jas. O. Alter.

At this meeting speeches were made by Col. L. M. Kennett, Judge Wood, Col. Bogy, Mr. Todd, and others.

After a very exciting canvass, during which State rights, slavery, secession, coercion, and many other national subjects were exhaustively discussed, the election took place on February 18th. In many localities throughout the State the direct issue was made for and against the passage by the convention of an ordinance of secession on the part of Missouri, subject, however, to the ratification or rejection of the voters of the State. The election resulted in the choice of a large majority of delegates opposed to secession by a popular majority of over eighty thousand votes. In St. Louis County the Unconditional Union ticket was elected by nearly six thousand majority. The delegates elected from St. Louis County, or the Twenty-ninth District, were Samuel M. Brackenridge, John How, Dr. M. L. Linton, Hudson E. Bridge, Thomas T. Gantt, Hamilton R. Gamble, John F. Long, Uriel Wright, Ferdinand Meyer, Henry Hitchcock, Robert Holmes, James O. Broadhead, Sol. Smith, Isador Busch, and John H. Shackelford. On the 28th of February the convention assembled in the court-house at Jefferson City, and organized by the election of Sterling Price as chairman. Robert A. Campbell, who was then a distinguished lawyer of St. Louis, was made assistant secretary. On the second day the convention adjourned to meet in Mercantile Library Hall in St. Louis on March 4th. It reassembled pursuant to adjournment, and during its session in St. Louis adopted some important measures. In a series of resolutions the convention, in the hope of averting the calamities of civil war, declared that it was opposed to secession and in favor of the maintenance of the Union, and that it was opposed to the use of coercion by the general government against the seceding States or the employment of military force by these States against the government. After the firing upon Fort Sumter, however, the opinions of a large majority of the members underwent a change and became more radical. The convention continued in session until March 22d, when it adjourned. It reassembled at Jefferson City July 22d, and after continuing in session until the last day of the month again adjourned, but was reconvened by proclamation of Governor Gamble on Oct. 10, 1861, at Mercantile Hall, St. Louis, and after a session of eight days adjourned. On June 2, 1862, it again assembled at Jefferson City, and on the 14th adjourned. On June 15, 1863, it met again at Jefferson City, and continued in session until July 1st, when it adjourned *sine die*. During one of its sessions (on July 31, 1861) the convention elected Hamilton R. Gamble, William P. Hall, and Mordecai Oliver respectively Governor, Lieutenant-Governor, and Secretary of State, in place of Claiborne F. Jackson, Thomas C. Reynolds, and Benj. F. Massey, whose seats had been declared vacant.

—An anti-Republican public meeting was held at the court-house March 30th, which was organized by the selection of Capt. N. J. Eaton as president; David B. Hill, Bernard Heidecker, John C. Degenhart, James G. Barry, E. C. Sloan, James H. Lucas, Dr. M. M. Pallen, Washington King, C. D. Blossom, J. P. Robinson, P. T. McSherry, John H. Fischer as vice-presidents; and Ed. Tracy and Louis T. Kretschmar as secretaries. Among those who made speeches were Daniel G. Taylor, George R. Taylor, and Gen. Riley, member of the Legislature.

—Dispatches were received on April 13th announcing the firing on Fort Sumter, in Charleston Harbor, by the Confederate forces under Gen. Beauregard. The dispatches were very unsatisfactory, but the news created intense excitement throughout the city.

—On the 15th of April, President Lincoln made a requisition on Governor Jackson for four regiments of men, to which the Governor replied as follows:

"EXECUTIVE DEPARTMENT OF MISSOURI,
"JEFFERSON CITY, April 17, 1861.

"TO THE HON. SIMON CAMERON,
"Secretary of War, Washington, D. C.:

"SIR,—Your dispatch of the 15th inst., making a call on Missouri for four regiments of men for immediate service, has been received. There can be, I apprehend, no doubt but these men are intended to form part of the President's army to make war upon the people of the seceded States. Your requisition, in my judgment, is illegal, unconstitutional, and revolutionary, in its object inhuman and diabolical, and cannot be complied with. Not one man will the State of Missouri furnish to carry on any such unholy crusade.

"C. F. JACKSON,
"Governor of Missouri."

—The following advice to the merchants of St. Louis in making out their manifests and invoices for their custom-house returns was furnished by Com. W. G. Dales, formerly of the United States navy, but at this time an officer of customs at New Orleans, in the Confederate States:

1861.

"In shipping dutiable goods for way points in the new Confederacy, merchants should prepare a printed manifest and invoice of the property shipped, and furnish the clerk of the steamer the same in triplicate. The form of the manifest can be seen at the captain's rooms, Merchants' Exchange. The invoice of all such property must accompany the shipment, or it will be detained at Norfolk, and thus entail upon all parties in interest much trouble and anxiety, with a probable loss of all."[1]

—A military company called "The Southern Guard" was organized at the State tobacco warehouse on April 20th. Their motto was, "Thrice is he armed who has his quarrel just." About fifty men signed the following preamble:

"In view of the present state of our country, and deeming it necessary that the State of Missouri should be armed and ready for any emergency that may arise, we, the undersigned, being unalterably attached to Southern institutions, and willing and determined to defend them to the bitter end, have formed ourselves into a military organization, to be called the Southern Guard."

The following officers were then elected: James T. Shackelford, captain; J. Z. Buskit, first lieutenant; Jos. S. Dear, second lieutenant; and D. F. Samuels, third lieutenant.

—The steamer "C. E. Hillman," on her trip from St. Louis to Nashville, Tenn., was seized and detained at Cairo, Ill., on April 26th, by the military commandant at that point, because she had on board arms and munitions of war "consigned to parties in a State in the Union." G. K. McGunnegle, president of the Board of Underwriters of St. Louis, complained to Governor Richard Yates, of Illinois, on April 26th, of the illegal seizure, and on the 29th the steamer, with the remainder of the cargo, was turned over to the owners.

—Capt. Henry Little, of the Seventh Regiment of Infantry, United States army, resigned his commission in April. The captain was a native of Maryland, and had been in the army over twenty years.

—On May 5th a number of guns and equipments belonging to Maj. McKinstry were seized by the Home Guards in the warehouse of James L. Pease on Market Street.

—On the 10th of May occurred the affair of Camp Jackson, of which a full account will be found later on in this work.

—J. B. Moulton, superintendent of the North Missouri Railroad, on May 11th announced that the military had taken possession of his railroad depot in the city, and that all freights passing over the road would be subject to military inspection.

—The *Missouri Republican* of May 18th contained the following in relation to the seizure of arms and the movement of troops in St. Louis:

"Yesterday there was another seizure of arms and military accoutrements in this city. The seizure was made, however, by civil process, and consequently gave rise to no difficulty, as was the case at Camp Jackson, where military power was brought to bear, independent of civil authority. It appears that several days ago a quantity of muskets, about two hundred in all, were purchased by a private citizen, out of his own pocket, for the purpose of arming the Constitutional Guards. After the terrible results of placing arms in the hands of raw recruits were made manifest by the 'Home Guards' at Camp Jackson and on Walnut Street, it was deemed advisable not to place these arms in the hands of the Constitutional Guards, and they were accordingly taken to the Central Police Station, and leave was granted whereby they might be left there for the time being for safe-keeping. Yesterday afternoon, however, Marshal Rawlings appeared with a writ of replevin from the United States District Court, at the instance of Capt. Lyon, U. S. A., with ample bonds, and demanded the arms. Chief of Police McDonough replied that he had no authority over the

[1] Before any attempt was made to provision Fort Sumter, and before Mr. Lincoln was inaugurated President, the Confederates undertook to restrict the navigation of the Mississippi. The Quitman Battery was ordered to Vicksburg on the 12th of January, 1861, to hail and bring in all passing boats, and on the following day the river steamer "A. O. Tyler" (which was afterwards transformed into a gunboat and did good service) was brought to by a shot across her bow. Early in the succeeding month a custom-house was formally established at Melm's Landing, near the State line of Mississippi. The following extracts are from a circular issued by the Confederate Secretary of the Treasury:

"CONFEDERATE STATES OF AMERICA,
"TREASURY DEPARTMENT,
"MONTGOMERY, Feb. 6, 1861.

"The regulations and instructions prepared by this department under this date are transmitted for the information and government of the officers of the several branches of the public service referred to therein. . . .

"Collectors and revenue officers above the port of New Orleans, within the Confederate States, in the adoption and practice enjoined by the regulations, will be under the general supervision, as far as practicable, of the collector of New Orleans, subject to the direction and control of this department. . . .

"C. G. MEMMINGER,
"*Secretary of the Treasury.*"

The instructions issued declared that all steamboats navigating the river, destined for ports or places within the Confederate States from any places above, should come to at the port of Norfolk (Melm's Landing), and the master should exhibit to the revenue officer manifests of the whole cargo. And it was made the duty of the collector to board, at all hours of the day and night, all vessels entering the Confederate States from any place above the limits of the Confederacy on said river.

arms whatever beyond their safe-keeping, and after consultation with the commissioners they were ordered to be delivered up. Thereupon several baggage-wagons appeared, and
1861. the muskets were brought out and deposited therein and taken to the Arsenal. Quite a crowd gathered about and witnessed the removal, but no demonstrations of a hostile character were made manifest.

"Previous to this a civil process was served by the marshal at the State tobacco warehouse. He had in charge a posse of sixty or seventy United States troops to enforce the process. They surrounded the building, effected an entrance, broke open various boxes, and found all sorts of munitions of war save muskets. A number of gray uniforms were also found, and although not claimed as United States property, were nevertheless transported with the rest of the articles to the Arsenal in baggage-wagons employed for the purpose. A large crowd of people collected at this place, but not the slightest belligerent demonstration was made.

"In addition to the above, early yesterday morning a company of Home Guards left their armory at Turners' Hall, and proceeded across the river to Illinoistown, with furniture-wagons, and took possession of one hundred navy revolvers at the depot, in boxes marked 'Frank Blair, care H. A. Sloan & Co.' Blair states that he never ordered the revolvers, and it is supposed that they were intended for other parties than the United States troops. They were taken to the Arsenal.

"About four o'clock yesterday afternoon a regiment of troops passed up Fifth Street, with six field-pieces. They are to be stationed in the extreme northern part of the city.

"The public will observe that a decided improvement has been made in the manner of conducting these things. The usual law process is issued, bonds given, and the marshal is required to execute the writ. If this had been done at Camp Jackson, the slaughter of innocent men, women, and children never would have taken place on the 10th of May.

"Late last night we received the following card from Col. Hart:

"'OAK SPRINGS, ST. LOUIS COUNTY,
May 17, 1861.

"'*To the Citizens of the City and County of St. Louis:*

"'I pray you stay your opinion with regard to a lot of rifles, bought with my money some time since, which were this evening seized by the United States marshal, until to-morrow, when I will fully and in detail publish all the facts for your judgment. I have just heard of the seizure, having left the city a few minutes before to come to my family here. Suffice for me at present to say, these arms were bought solely for the purpose of being used whenever we were legalized in quelling riots or mobs in the city of St. Louis, and in defense of the life and property of you all, without respect to past political parties.

"'After the surrender of Camp Jackson, the same evening, I delivered all over to the Police Department, ready to serve them with my organization, the Constitutional Home Guards, whenever they should call on us to assist them to quell riots or mobs, and intended they should remain there, and under their control, for that purpose.

"'I have never been a secessionist, have never knowingly done anything in violation of my duty to the Federal and State governments, and on all occasions where I could do anything to preserve peace, am known to have readily given my little aid to effect the same. I shall more fully and in detail set forth all the facts connected with them. In the mean time I ask you all to forbear hasty conclusions about the matter.

"'HENRY N. HART.'"

On Saturday afternoon, May 18th, United States Surveyor Howard and United States Marshal Rawlings seized on board the steamer "Sioux City," lying at the foot of Pine Street, twenty boxes of cartridges and four cases of musket-barrels, all of which were declared confiscated to the government and taken to the Arsenal. The articles were in boxes marked "soap." The captain of the boat, however, knew nothing about the matter.

—An artillery company numbering forty-eight men, under command of Capt. Spakofski, arrived at the Arsenal from Cairo, on board the steamer "J. D. Perry," at two o'clock Sunday afternoon, May 19th.

—The steamer "Robert Campbell, Jr.," was fired into on May 21st by a battery erected on the banks of the Mississippi River, northwest of Bremen, and under the command of Col. Boernstein's troops.

—The following persons, who had been arrested upon the alleged charge of threatening Union men at Potosi, Mo., were released from the Arsenal on May 21st and 22d: William Mathews, clerk Circuit Court, Washington County; E. D. Smith, Jefferson County, steamboat pilot; Stephen P. Dunklin, farmer; Joseph H. Dunklin, farmer; Dr. John Wyatt, Jefferson County; Geo. B. Clarke, lawyer; L. W. Casey, livery-stable keeper; Patrick Doyle, livery-stable keeper; Ed. Willoughby, miner; N. B. Buck, editor *Potosi Miner;* William J. Slater, lawyer; John Dean, smelter and farmer.

—United States Marshal Rawlings on May 21st seized two gun-carriages at Murphy's wagon manufactory on Broadway. Two brass cannon which had been removed by the police commissioners from the State tobacco warehouse to Arnot's building were also seized by the same officer.

—On the 22d of May the steamer "Iatau" left the Arsenal with one hundred men, under the command of Capt. Frantz, and proceeding down the river to Harlow's Landing, seized the steamer "J. C. Swon," which had been lying at that point for several days in charge of the mate.

—At this time all vehicles coming in or out of the city were searched by the military. The searching of private residences for contraband articles was also a daily occurrence.

—Col. Shutner's regiment left St. Louis May 28th, for the purpose of taking up a position at Bird's Point, opposite Cairo.

—In consequence of the agreement entered into between Gens. Price and Harney, on May 27th Gen. Harney issued orders for the withdrawal of the troops from the suburbs, and the different encampments were vacated on the 29th.

Col. Sigel's regiment remained in the Arsenal, in the place of Blair's regiment.

Col. Boernstein's regiment, stationed near the reservoir and at Bissell's Point, to stop Missouri River boats, was ordered to the barracks. An order
1861. was given to the commanding officer at Duncan's Island to permit all boats to pass up the river unmolested.

—On May 31st, Captain Hall, with a small detachment from Col. McNeil's regiment, searched Dr. McDowell's medical college for arms, but none were discovered.

—There were on June 1st five regiments of Home Guards in the city,—about five thousand men; one regiment was stationed at Soulard Market, one at Jaeger's Garden, one at Turners' Hall, one at Uhrig's Cave, and one at Fourteenth and Chambers Street. The regiment at Turners' Hall was commanded by Col. McNeil; that at Uhrig's Cave by B. Gratz Brown. This latter regiment, on May 31st, had changed its quarters from Bechtner's Varieties to Uhrig's Cave, and on the 16th of June embarked on the cars for Rolla.

—Morgan L. Smith opened a recruiting office at No. 78 [illegible]th Street, in the latter part of May, for a Zouave corps.

—Capt. Totten, in command of four hundred regulars, which had been quartered over Thornton's livery-stable, on June 1st changed his quarters to the Abbey.

—Mayor Taylor, on June 4th, tendered his resignation to the Council, which was accepted. On the 7th the Council reconsidered its action, and the mayor withdrew his resignation, thus continuing in office.

—Mr. Finnicliffe and two other deputy United States marshals on June 15th arrested Joseph W. Tucker, editor of the *State Journal*, and seized all of his private papers in his office, upon the charge, made by John D. Stevenson, that he "conspired with, and corresponded with," "traitorous bodies of men." He was taken before Judge Treat, of the United States District Court, who released him upon his giving bond in the sum of ten thousand dollars.

—In compliance with orders issued from the War Department on July 3d, Gen. John C. Fremont on the 25th assumed command of the Western Department. The following officers were at this time announced as constituting his staff: Capt. J. C. Kelpon, Asst. Adjt.-Gen. and Act. Com. Subst.; Brevet Maj. J. McKinstry, Asst. Quartermaster; Sergt. S. G. I. De Camp, Medical Director; Lieut.-Col. T. P. Andrews, Deputy Paymaster-General.

—The *Republican* of August 15th contains the following in relation to military movements in the city:

"Martial law was declared yesterday forenoon, and Maj. McKinstry appointed provost-marshal. So far, however, there has been no change, and probably will not be, in the police department, and the civil business will be conducted as heretofore. In certain contingencies only, we presume, or in cases not properly coming within the jurisdiction of the police, will the military power be exercised. Although there was very general inquiry as to the effect of martial law, and a sort of general apprehension that it would require people to remain indoors after nine o'clock in the evening, and compel them to obtain passes to leave the town, etc., yet, 'so far as heard from,' nothing of the kind will be required, and, in point of fact, martial law as yet does not differ from any other law.

"Mr. Brownlee, the president of the board of police commissioners, was arrested yesterday about noon and taken to the Arsenal. Mr. Basil Duke was appointed president of the board instead.

"In the afternoon the residence of Capt. William Wade, on St. Charles Street, near Fifth, was surrounded by soldiers and searched, but nothing contraband discovered. It was reported that a search was instituted for Capt. Wade with a view to his arrest, but that he was not to be found. Capt. McKellops' residence on Olive Street, near Fifth, was also searched, with a like result. Crowds of spectators gathered on the streets at both the above-named places while the search was being instituted, but there was no disturbance, loud talk, or excitement manifested. The city was perfectly quiet all day yesterday and last evening. About five o'clock last evening the *Bulletin*, *Missourian*, and *Herald* offices were taken possession of by soldiers, and orders issued for the suppression of those papers. The *Missourian* was printed at the *State Journal* establishment on Pine Street, between Third and Fourth; the *Bulletin*, on the same street, between Fourth and Fifth, at the *Christian Advocate* office; and the *Herald*, at the *Herald* office, on Market Street, between Second and Third. These papers have of late published the South side of accounts of affairs, as well as what have been regarded as very improbable and absurd rumors.

"The following is the form of the order for the suppression of the *Herald*:

"ORDER No. 12.

"OFFICE PROVOST-MARSHAL,

"ST. LOUIS, Aug. 14, 1861.

"*To Col. McNeil, Commanding Home Guards:*

"You are hereby ordered to suppress the newspaper called the *Morning Herald* (James L. Faucett, proprietor), and not allow the publication of the same from the date of this order.

(Signed) "J. MCKINSTRY,

"*Major U. S. Army, Provost-Marshal.*"

On the 16th the same paper gave the following account of the movements of steamboats in the harbor:

"A very large number of arrivals of steamboats at this port occurred yesterday morning. No less than nine steamers came up from Widow Waters' landing and vicinity and were landed at our Levee. We understand that the United States government ordered them to be brought up for greater safety.

"The boats to which we refer are the 'Continental,' Capt. B. F. Hutchinson; 'T. L. McGill,' Capt. N. Robirds; 'Planet,' Capt. ——; 'John Warner,' Capt. Chas. P. Warner; 'Gladiator,' Capt. John Klinefelter; 'Champion,' Capt. E. B. Moore; 'Edward Walsh,' Capt. Burke; 'Platte Valley,' Capt. ——, and 'John H. Dickey,' Capt. Danable.

"Nearly all these steamers are St. Louis and New Orleans packets, which were resting from their labors during the continuance of the blockade.

"The 'Princeton,' a celebrated stern-wheel boat, said to be worth $75,000 by the charitable individual who presented her to the United States government some time ago, is em-
1861. ployed in cruising around the harbor, for what particular purpose we are not advised."

—Maj. J. Kinstry, provost-marshal, on August 14th strictly prohibited under severe penalties "the wearing of concealed weapons by any person not in the military service of the United States or in the regularly constituted police force of the city." Notice was also given by the same officer "to gunsmiths and dealers in fire-arms resident in the city and county of St. Louis that no description of fire-arms would be permitted to be sold or given away" without a special permit from him.

—On the 16th Maj. McKinstry issued the following order:

"All places of public amusement—theatres, concerts, negro minstrels, etc.—will not be permitted to open for the reception of visitors on Sundays.

"All dance-houses, theatres, concerts, negro minstrels, or any other places of public resort of like character will be closed at 10.30 P.M. When any disturbance of the peace or disorderly conduct occurs, or is permitted by the proprietors, at any of the above-mentioned places of amusement, they will be closed forthwith permanently.

"Assemblage of persons on the streets or sidewalks, interfering with the free passage of the same, will not be permitted at any time or place. It is hereby made the especial duty of the Chief of Police of this city to carry out the prompt execution of the foregoing orders."

The sale of spirituous liquors within the city and county between the hours of twelve o'clock Saturday and seven o'clock on Monday following were at the same time strictly prohibited. The sale of malt liquors was not prohibited.

—The collection of troops and war material in the neighborhood of St. Louis in August was of the most formidable character. At Camp Benton, immediately west of the Fair Grounds, extensive preparations were being made for the accommodation of a large body of troops, but only two regiments had taken post in this vicinity on the 21st. The Twenty-second Indiana was encamped in tents a few hundred yards south of the Fair Grounds, and the Thirty-ninth Ohio, under Col. Groesbeck, which had just arrived, was establishing its quarters immediately adjoining the western inclosure of the Fair Grounds. Much the larger portion of the troops encamped in the neighborhood of St. Louis in the latter part of August were located at the barracks, Arsenal, and Lafayette Park. There were at this time about fifteen thousand troops, well armed and equipped, in the vicinity of the city, and every day one or more regiments was added to the number. The city was also strongly fortified. Two large columbiads were mounted a short distance from the city on the Gravois road, and one was placed at Rock Spring. Sulphur Springs, on the Iron Mountain Railroad, where it left the river, was considered a strategical point, and three columbiads were mounted there about the 1st of September. The work of erecting fortifications on all the commanding elevations in and near the city continued during the summer and fall. At some of these fortifications heavy guns, as we have stated above, were mounted to command the river and the main avenues leading to the city.

—About three hundred of the soldiers wounded at the battle of Springfield were placed under treatment, about the middle of August, at the new House of Refuge, west of the work-house. The building was of brick, five stories high, and the rooms being very large were well adapted for the purposes of a hospital. A large number of ladies from the city visited the hospital, and rendered very material assistance by furnishing bandages and other necessary articles.

—Early in August Gen. Fremont determined to form in the vicinity of St. Louis a camp of instruction capable of accommodating twenty thousand men. Accordingly, A. B. Ogden was instructed to make a thorough survey of the land west of the city from Bellefontaine cemetery to the Arsenal, for the purpose of selecting a suitable location for the camp. After a careful examination of various sites near the outskirts of the city, he finally selected a tract of one hundred and fifty acres owned by Col. John O'Fallon, immediately west of the Fair Grounds. Mr. Ogden addressed a note to Col. O'Fallon, stating that the land belonging to him had been selected for military barracks by the government, and that liberal and patriotic gentleman responded, stating that he would give the government the use of the land for one year at the nominal price of one hundred and fifty dollars. The ground was at this time in a high state of cultivation, and the generous offer of Col. O'Fallon was gratefully accepted by Gen. Fremont. The site chosen was admirably adapted for a military camp, being level, free from obstruction, and covered with a beautiful greensward. It was immediately graded to a perfect plane, and an effective system of underground sewerage was constructed, so that after a rain the water was speedily carried off, and the ground thereby kept in an excellent condition for parade purposes. A large number of mechanics were employed in the erection of barracks for men and of stables for horses. The barracks were constructed in five rows, each seven hundred and forty feet in length, extending from east to west. Each row of barracks was about forty feet in width, exclusive of covered walks on each side.

which extended six or eight feet from the main building. The interior was divided into compartments of convenient size, and these were lined on all
1861. sides with bunks for sleeping. Good provision was made for ventilation by means of openings in the walls, and there were sleeping accommodations for one hundred men in each seventy feet of the barrack building.

In General Orders No. 4, Gen. Samuel R. Curtis, on September 18th, directed that the barracks should be known as "Camp of Instruction, Benton Barracks," and added that troops were to be stationed at this post "especially to recruit, organize, and drill." Besides the grounds included in the chain of sentinels which surrounded the barracks and Fair Grounds, his command extended a mile in all directions from his headquarters. The saloons and hotels within this circle were liable to special and stringent supervision and suppression for disorder or riot.

A contemporary writer, who visited the barracks on the 1st of December, gives the following interesting description of the place:

"For a full mile to the west the ground is as level as a house floor, and along the entire distance regiments of infantry and cavalry are moving in grand and solid columns here and there, performing all sorts of military evolutions, while drums are beating, fifes screaming, and bugles sounding far and near. . . . The barracks are built in two straight lines, running directly west, and are about one-third of a mile apart. Laterally they are divided off into separate compartments, each compartment being capable of accommodating two companies. The quarters of the officers are so arranged in these different compartments that they can have an oversight of their different companies at all times. There are two tiers of bunks, and each bunk is furnished with clean straw and a thick blanket; a coal-stove is also furnished to each compartment, so that even in the coldest day the soldiers will be as comfortable as people living in houses furnished with all the modern improvements. Immediately back of the two lines of barracks is a strip of ground four hundred feet in width, and extending the length of the barracks, upon which temporary shanties have been erected to cover the cooking ranges. At first the common plan of digging a hole in the ground and building a fire in it for cooking purposes was adopted, but it was found that an immense amount of fuel was consumed in this way, and accordingly Capt. Dodds, the commissary and quartermaster, introduced camp cooking ranges, one for each company, and the saving in fuel is already nearly sufficient to pay the cost of the ranges.

"The two lines of barracks extend westward for the distance of nearly half a mile, and directly in the centre of the parade-ground at the west end, on a lot of ground about four hundred feet square, other barracks are erected. A wide space is left on each side of these barracks, so that the troops can move in regular bodies out upon the drill-ground, which is still farther west, and embraces some seventy acres.

"The commanding general's headquarters and the quarters for the field-officers are located on the eastern portion of the ground, the former, a two-story frame building, a short distance from the entrance and midway between the parallel line of barracks, and the latter at the extreme east end. The field-officers' quarters consist of a row of barracks, neatly and comfortably furnished, and the house occupied by the commanding general, externally and internally, is all that could be desired. The barracks are all whitewashed outside, and, in consequence of the strict discipline which is maintained, present a neat appearance throughout. On the north side of the barracks, for a considerable distance to the west, a large number of stables for cavalry horses are being erected, while still farther west are two great warehouses, in which are stored supplies for the soldiers and forage for the horses. In the immediate vicinity of the warehouses are various little frame buildings, used as daguerrean saloons and restaurants. Since Gen. Strong assumed command, however, the sale of all intoxicating liquors on the grounds, or within a radius of a mile, has been prohibited.

"The quartermaster's office is in one of the large warehouses, alongside of which a railroad track has been laid, so that stores can be put aboard horse-cars (built especially for the purpose) here in the city, and in a short space of time be delivered at their proper destination.

"Gen. William K. Strong is at present in command of the barracks. He succeeded Gen. Curtis. He was formerly connected with the staff of Gen. Fremont. Capt. Henry Z. Curtis is acting assistant adjutant-general, and Capt. Joseph L. Dodds quartermaster of the post and acting commissary.

"The barracks were built at a cost of sixty thousand dollars, but the improvements which have since been made, such as the introduction of water, the laundry, etc., will reach the sum of one hundred thousand dollars. About one thousand laborers were employed in constructing the barracks."

At one time (in April, 1862) over twenty-three thousand men were stationed at the barracks. About September, 1865, the grounds were turned over by the government to the owner.

—On August 26th, Provost-Marshal McKinstry issued the following order:

"The disturbance of the public peace to-day having been traced by this department to the unauthorized and improper sale of liquors to soldiers by irresponsible and ill-disposed persons, it is hereby ordered that from and after this date, until further orders, all saloons and bar-rooms and other places kept for retailing of spirituous and intoxicating liquors in the city and county of St. Louis, except the saloons connected with the principal hotels, and such others as may after due investigation receive special permission to open, be and remain closed; and the sale, exchange, or giving away of any such intoxicating liquors or beverages at retail, except as hereinbefore excepted, is hereby expressly forbidden. Any violation or evasion of this order will be visited with severe punishment."

The same officer on the 28th issued the following:

"The distribution, sale, exchange, or giving away of any copy or copies of the *New York News*, *Day-Book*, *Journal of Commerce*, *Freeman's Journal*, or *Brooklyn Eagle*, newspapers lately presented by the United States grand jury of the Southern District of New York as aiders and abettors of the enemy, also of the *New York Journal of Commerce*, *Jr.*, is prohibited in the city and county of St. Louis from this date. All railroad and express agents in the city are ordered to deliver into the possession of the provost-marshal all packages of the papers above named that may hereafter come into their possession.

"The delivery from the post-office of any number of either of the above-named treasonable sheets is also prohibited."

—On the 30th, Maj.-Gen. John C. Fremont, commanding the Western Department, issued the following proclamation, placing the entire State under
1861. martial law, as he had heretofore done the city and county of St. Louis:

"Circumstances, in my judgment of sufficient urgency, render it necessary that the commanding general of this department should assume the administrative powers of the State.

"Its disorganized condition, the helplessness of the civil authority, the total insecurity of life, and the devastation of property by bands of murderers and marauders who infest nearly every county in the State, and avail themselves of the public misfortunes and the vicinity of a hostile force to gratify private and neighborhood vengeance, and who find an enemy wherever they find plunder, finally demand the severest measures to repress the daily increasing crimes and outrages, which are driving off the inhabitants and ruining the State.

"In this condition the public safety and the success of our arms require unity of purpose, without let or hindrance, to the prompt administration of affairs.

"In order, therefore, to suppress disorders, to maintain as far as now practicable the public peace, and to give security and protection to the persons and property of loyal citizens, I do hereby extend and declare established martial law throughout the State of Missouri.

"The lines of the army of occupation in this State are for the present declared to extend from Leavenworth, by way of the post of Jefferson City, Rolla, and Ironton, to Cape Girardeau, on the Mississippi River.

"All persons who shall be taken with arms in their hands within these lines shall be tried by court-martial, and if found guilty will be shot.

"The property, real and personal, of all persons in the State of Missouri who shall take up arms against the United States, or who shall be directly proven to have taken active part with their enemies in the field, is declared to be confiscated to the public use, and their slaves, if any they have, are hereby declared free men.[1]

"All persons who shall be proven to have destroyed after the publication of this order railroad tracks, bridges, or telegraphs shall suffer the extreme penalty of this law.

"All persons engaged in treasonable correspondence, in giving or procuring aid to the enemies of the United States, in fomenting tumults, in disturbing the public tranquillity by creating and circulating false reports or incendiary documents are, in their own interest, warned that they are exposing themselves to sudden and severe punishment.

"All persons who have been led away from their allegiance are required to return forthwith to their homes. Any such absence without sufficient cause will be held to be presumptive evidence against them.

"The object of this declaration is to place in the hands of the military authorities the power to give instantaneous effect to existing laws, and to supply such deficiencies as the conditions of war demand. But it is not intended to suspend the ordinary tribunals of the country, where the law will be administered by the civil officers in the usual manner and with their customary authority, while the same can be peaceably exercised.

"The commanding general will labor vigilantly for the public welfare, and in his efforts for their safety hopes to obtain not only the acquiescence, but the active support of the loyal people of the country."

To prevent any disturbance caused by the declaration of martial law, Col. Groesbeck's command was ordered into the city and stationed around the court-house, and Lucas, Biddle, and Broadway Markets. They took twenty rounds of ammunition with them for an emergency, and remained until the following morning, when they were marched back to camp. On the same day (August 30th) Provost-Marshal McKinstry issued the following "Order No. 107":

"It appearing to this department, by satisfactory evidence, that individuals are daily leaving this city for the purpose of treasonably communicating with the enemy, and giving them

[1] At the beginning of the war slaves escaping from their masters were promptly returned by the officers of the army. Gen. W. S. Harney, commanding in St. Louis in the early part of the war, in responding to the claims of slaveholders for their slaves, said,—

"Already, since the commencement of these unhappy disturbances, slaves have escaped from their owners and have sought refuge in the camps of the United States troops from the Northern States and commanded by a northern general. *They were carefully sent back to their owners.*"

The above proclamation from Gen. Fremont was the first official paper issued after the commencement of the war that declared slaves under certain contingencies free men. Gen. Fremont, in accordance with his proclamation, gave freedom to a number of slaves; his mode of action may be seen in the following deed of manumission:

"*Whereas*, Thomas L. Snead, of the city and county of St. Louis, State of Missouri, has been taking an active part with the enemies of the United States in the present insurrectionary movement against the government of the United States; now, therefore, I, John Charles Fremont, major-general commanding the Western Department of the Army of the United States, by authority of law and the power vested in me as such commanding general, declare Hiram Reed, heretofore held to service or labor by Thomas L. Snead, to be FREE and forever discharged from the bonds of servitude, giving him full right and authority to have, use, and control his own labor or service as to him may seem proper, without any accountability whatever to said Thomas L. Snead, or any one to claim by, through, or under him.

"And this deed of manumission shall be respected and treated by all persons, and in all courts of justice, as the full and complete evidence of the freedom of said Hiram Reed.

"In testimony whereof, this act is done at headquarters of the Western Department of the Army of the United States, in the city of St. Louis, State of Missouri, on this 12th day of September, A.D. eighteen hundred and sixty-one, as is evidenced by the departmental seal hereto affixed by my order.

"J. C. FREMONT,
"*Major-General Commanding.*"

"Done at the office of the provost-marshal, in the city of St. Louis, the 12th day of September, A.D. eighteen hundred and sixty-one, at nine o'clock in the evening of said day.

"Witness my hand and seal of office hereto affixed.

"J. McKINSTRY,
"*Brigadier-General, Provost-Marshal.*"

This proclamation of Gen. Fremont caused considerable comment, and being displeasing to President Lincoln, Gen. Fremont was removed from the command of the Western Department, and his proclamation annulled.

information, aid, and comfort, in violation of law, it is hereby directed that from and after this date all persons are peremptorily forbidden to pass beyond the limits of the city and
1861. county of St. Louis without first obtaining a special permit from this office.

"All ferry, steamboat, and railway officers and agents, and all other carriers of passengers, are hereby forbidden to sell or transfer any tickets entitling the holder to go beyond the limits of this county to any person, or to carry, or allow to be carried, any person not exhibiting a permit from this office."

The following is a copy of the provost-marshal's pass that was issued to applicants:

"OFFICE PROVOST-MARSHAL,
"ST. LOUIS, MO., 1861.

"Permission is granted to —— —— to pass beyond the limits of the city and county of St. Louis, to go to ——.

"J. MCKINSTRY, *Major U.S.A.*,
"*Provost-Marshal-General.*"

On the back of the pass was the following description of the person:

"Age, ——.
"Height, ——.
"Color of eyes, ——.
"Color of hair, ——.
"Peculiarities, ——.

"It is understood that the within named subscriber accepts this pass on his word of honor that he is and will be ever loyal to the United States; and if hereafter found in arms against the Union, or in any way aiding her enemies, the penalty will be death.

(Signed) "—— ——."

"There were some amusing scenes," says the *Republican* of September 2d, "enacted at the office of the provost-marshal on Saturday morning in consequence of the rather unexpected order requiring every individual to obtain a pass before leaving the town. The rush for passes commenced at an early hour, and must have taken Maj. McKinstry somewhat by surprise, but, like a skillful general, he proved equal to the emergency. Every pass had to be written for the individual applying. This was done by one of the clerks, after which it had to be taken to the provost-marshal, McKinstry, for his signature. This process being found altogether too slow to accommodate the rush of passengers going east, the marshal caused the announcement to be made that all passengers going east on the morning trains would be allowed to leave the city without passes. This decimated the crowd somewhat, but large numbers intending to go out on the Iron Mountain, Pacific, and North Missouri roads remained to be attended to. There was but one alternative. The provost-marshal pulled off his coat, seated himself at his desk, and was speedily surrounded by a dense crowd armed with passes obtained from the clerk, and only awaiting the simple signature of 'J. McKinstry,' etc. As each individual submitted his pass the provost-marshal signed his name, looking all the while with his keen searching eyes directly at the applicant, and propounding two or three inquiries, such, for instance, as the following to a young and smart-looking chap who had a pass for Springfield: 'Going to Springfield?' 'Yes, sir.' 'Live there?' 'Yes, sir.' In an undertone, 'Not very profitable to be a minute-man, is it?' No reply, but a slightly confused and indignant look. In the mean time the signature has been affixed to the pass in a bold hand. Directly the young man is in possession of the important 'open sesame' and is leaving the room, when down falls the hand of the provost-marshal upon a little silver bell at his side, and simultaneously he cries out, 'Spot!' Two minutes later and the young man bound for Springfield is politely requested by an officer to consider himself under arrest. What follows is, of course, outside the ken of the reporter. The cries of 'spot' were numerous during the provost-marshal's eight hours' sitting for the purpose of signing passes on Saturday."

—On September 3d, James Taussig, Dr. Thomas O'Reilly, and E. W. Fox were appointed by the provost-marshal a committee to receive, examine, and report to him upon all applications for the reopening of all public places which he had heretofore directed to be closed. The committee met on the 4th, and decided upon the following order of business:

"1. All persons making applications shall state the number and street of their place of business, and shall have their application indorsed by two persons known to the committee as reliable Union men, who shall vouch for the orderly character of the house, and the loyalty of the proprietor to the United States government. No permit will be granted to persons who have not obtained their city and county licenses according to law.

"2. All applications not already presented shall be handed to Capt. Cozzens, at his office, No. 91 Washington Avenue, for examination by the committee; and all persons whose permits are ready will be notified of the fact and of the place of delivery by publication in the newspapers.

"3. All persons to whom permits are granted will be required to subscribe the following declaration: It is understood that the undersigned accepts this permit or license on his word of honor that he is and will be ever loyal to the United States, and if hereafter found in arms against the Union, or in any way aiding her enemies, the penalty will be death.

"4. A printed copy of the declaration so subscribed shall be kept posted up by the proprietor in a conspicuous place in each bar-room or saloon having a permit.

"Any violation of these rules or disorderly conduct will cause an immediate withdrawal of permits granted.

"By order of

"JAS. TAUSSIG,
"THOS. O'REILLY,
"E. W. FOX,
"*Committee.*

"Approved,
"J. MCKINSTRY,
"*Maj. U.S.A., Provost-Marshal.*"

On the 17th this committee was also authorized to grant permits to keepers of public gardens and parks located in the suburbs of the city to keep their places open on Sunday, under such regulations as the committee saw proper to impose.

The committee also issued the following notice:

"PROVOST-MARSHAL'S OFFICE,
"ST. LOUIS, Sept. 4, 1861.

"All persons who have heretofore obtained permission from the provost-marshal to reopen drinking saloons are required to comply with the rules established by the committee by subscribing the declaration, exhibiting their city and county license and permits heretofore obtained at the office of Capt. Cozzens, No. 91 Washington Avenue, between Fourth and Fifth Streets,

on Saturday, the 7th of September, 1861, between 9 o'clock A.M. and 12 o'clock P.M. of said day.

"The permissions granted to persons not complying with this order will be revoked.

1861.

"JAMES TAUSSIG,
"THOS. O'REILLY,
"E. W. FOX,
"*Committee.*

"Approved,
"J. MCKINSTRY,
"*Maj. U.S.A. and Provost-Marshal.*"

—The two-story brick building at the corner of Fifth and Myrtle Streets, which had been known as "Lynch's Slave-Pen," was on September 3d taken under the control of the military authorities and converted into a military prison.

—The prohibition of the circulation of the New York *Journal of Commerce* within the city and county of St. Louis, as well as of the *Journal of Commerce, Jr.*, was removed on September 4th.

—Brig.-Gen. J. McKinstry, on September 6th, was assigned temporarily as acting quartermaster-general of the Western Department, and on the 10th forbade any person in his command to deal with any one who was not known to be loyal to the United States.

—On September 11th, Gen. J. McKinstry, provost-marshal, issued an order prohibiting the distribution, sale, exchange, or giving away of any copy or copies of the *Dubuque Herald*, a newspaper published at Dubuque, Iowa.

—Maj.-Gen. Fremont, on September 15th, placed Col. F. P. Blair under arrest. The act gave rise to a great deal of excited comment in the city, and was received with astonishment throughout the country. Commenting upon it, the *Missouri Democrat* said,—

"Col. Blair's chief offense is the writing of certain letters to the President, members of the cabinet, and other leading parties in Washington City, complaining, among other things, of the inefficiency and incompetency of Gen. Fremont, speaking disrespectfully of him, and asking his removal from the Department of the West."

—A correspondent of the *Cincinnati Gazette* thus describes Gen. Fremont's headquarters at this time:

"Taking the cars on Fourth Street, from the Planters' Hotel you ride about four or five squares, when you come to the broad avenue, near the market on Fifth Street, known as Chouteau Avenue, named after the celebrated wealthy Indian trader of St. Louis. Two blocks up this avenue, you follow the crowd which emerges from the cars, and which is mostly composed of men in uniform, and in two minutes you are standing before a plain, two-storied stuccoed residence, situated on a raised eminence, and surrounded by a brick wall, before the entrance to which two fine-looking young men, dressed in plain blue, with the French fatigue-cap set jauntily on their heads, are pacing to and fro, armed with Colt's navy revolvers set on carbine stocks. The house mentioned, on which I had forgotten to state was displayed the glorious Stars and Stripes, was none other than the headquarters of the Western Department, the residence of Gen. Fremont.

"At the brick residence just above the general's quarters, and from which waves the flag of our Union, is the Subsistence Department, while to the left is an immense dome, surmounted by another flag, and overshadowing the building known as McDowell's College, and now the headquarters of the Recruiting Department of St. Louis. In the plain brick house back of Fremont's residence, on Gratiot Street, is the Adjutant General's Department, the duties of which are well executed by Capt. Kelton and his able employés. Hitherto these quarters have been much scattered, but now they are within call of Gen. Fremont, and within reach of officers wishing to join their commands or transact business connected with the army."

On September 20th the following officers were announced as constituting Gen. Fremont's staff:

"Chief of Staff, Brig.-Gen. A. Asboth; Assistant Adjutant General, Capt. Chauncey McKeever; Military Secretary and Aide-de-Camp, Col. J. H. Eaton; Chief Topographical Engineer, Col. John T. Fiala; Chief of Ordnance, Col. Gustave Wagner; Chief of Artillery, Lieut.-Col. James Totten; Judge-Advocate, Maj. R. M. Corwin; Division Surgeon, Dr. T. Telkampf; Assistant Surgeon, Dr. John Cooper; Acting Assistant Quartermaster-General, Brig.-Gen. J. McKinstry; Deputy Paymaster-General, Lieut.-Col. T. P. Andrews; Commander of Body-Guard, Maj. Charles Zagonyi; Musical Director, Capt. A. Waldauer; Aides-de-Camp, Col. A. Albert, Col. Gustave Koerner, Col. J. P. C. Schenck, Col. Owen Lovejoy, Col. John A. Gurley, Col. J. C. Woods, Maj. James W. Savage, Maj. Frank J. White, Maj. William Dorsheimer, Maj. H. Ramming, Maj. B. Rush Plumley, Capt. J. R. Howard, Capt. Leonidas Haskell, Capt. Joseph Reminyey; Chaplain, Rev. C. M. Blake.

"II. The special duties assigned to the aides-de-camp were as follows: Col. Albert Adlatus to be chief of staff; Col. Woods, director of transportation; Maj. Savage, military registrator and expeditor; Maj. Plumley, postal director; Capt. Haskell, police director; Maj. Dorsheimer and Capt. Howard, private secretaries.

"By order of Maj.-Gen. Fremont.

"CHAUNCEY MCKEEVER,
"*Assistant Adjutant-General.*"

On the same day the following officers were placed on duty in command of divisions as acting major-generals:

Brig.-Gen. Pope, Brig.-Gen. Sigel, Brig.-Gen. Asboth, Brig.-Gen. McKinstry.

The following officers were placed on duty in command of brigades as acting brigadier-generals:

Col. Davis, Col. Mulligan, Col. Kelton, Lieut.-Col. Totten.

—On the 24th, Brig.-Gen. Samuel R. Curtis assumed command of the city of St. Louis and vicinity.

—In September a new military hospital was established in the building at the corner of Fifth and Chestnut Streets, under the charge of Surgeon Mills, of the United States army, assisted by Drs. Wagner and Horton, of the army, and Dr. A. S. Barnes, of the city.

—In consequence of the Cherokee nation of Indians having joined the Confederate cause, the as-

sistant provost-marshal, John McNeil, colonel of the Nineteenth Regiment of Missouri volunteers, on

1861. October 2d confiscated about thirty-three thousand dollars belonging to the Indians, which they had on deposit in the "St. Louis Building and Savings Association."

—The Fremont Relief Society, for the relief of the sick and wounded soldiers in camp and hospital, was organized in October by the election of the following officers; Mrs. Jessie Benton Fremont, president; Vice-Presidents, Mrs. T. B. Edgar and Mrs. Dr. Heussler; Secretary, Mrs. Clinton B. Fisk; Treasurer, Mrs. Amalia Abeles. Rooms for the use of the society were provided at the residence of T. B. Edgar, on Chouteau Avenue opposite Fourteenth Street.

—Hon. Simon Cameron, Secretary of War, accompanied by Adjt.-Gen. Thomas and others of his suite, arrived in St. Louis on October 12th, and left immediately for Gen. Fremont's headquarters at Tipton, Mo. On his return he was serenaded by Col. Morphy's Eighth Wisconsin Regiment at Barnum's Hotel. Secretary Cameron made a short speech in response. Before his departure from the city, Secretary Cameron, on October 14th, issued the following order to Gen. Fremont:

"In view of the heavy sums due, especially in the quartermaster's department in this city, amounting to some four million five hundred thousand dollars, it is important that the money which may now be in the hands of the disbursing officers, or be received by them, be applied to the current expenses of your army in Missouri, and these debts to remain unpaid until they can be properly examined and sent to Washington for settlement; the disbursing officers of the army to disburse the funds and not transfer them to irresponsible agents,—in other words, those who do not hold commissions from the President and are not under bonds. All contracts necessary to be made by the disbursing officers. The senior quartermaster here has been verbally instructed by the secretary as above.

"It is deemed unnecessary to erect field-works around this city, and you will direct their discontinuance; also those, if any, in course of construction at Jefferson City. In this connection it is seen that a number of commissions have been given by you. No payments will be made to such officers, except to those whose appointments have been approved by the President. This, of course, does not apply to the officers with volunteer troops. Col. Andrews has been verbally so instructed by the secretary; also not to make transfers of funds, except for the purpose of paying the troops. The erection of barracks near your quarters in this city to be at once discontinued."

The *Republican*, in commenting on this order of the Secretary of War, said,—

"We must adhere to this our firm conviction, which even Gen. Lyon was prudent enough to entertain, for it is well known that before his march to Boonville he instructed Col. Fisk to select the proper strategical points for the erection of works of defense around the city, and that the necessity of erecting such fortifications was strongly apparent to the far-sighted mind.

"Gen. Lyon made preparations for the building of similar works of defense at Jefferson City, Rolla, Ironton, and Cape Girardeau. These four latter points have been the salvation of St. Louis during all the time that Gen. Fremont was preparing his grand army for the forward movement which he has now so happily inaugurated, for they form, with the Missouri River at the north, the great strategic circle which constitutes the first line of defense of the metropolis of the State.

"The acts of Gen. Fremont have been brilliant enough to warrant the recognition of merit, even from Mr. Lincoln. Gen. Fremont raised and organized an army of nearly ninety thousand men in less than half the time it took Gen. Scott to organize an army of the same number, and during the process of organization Gen. Fremont not only held the whole line of defense of St. Louis, from Bird's Point and Cape Girardeau *via* Pilot Knob and Rolla to Jefferson City, and all along the Missouri River to Kansas City, but even inaugurated the brilliant *coup de main* in Kentucky which saved that noble State to the cause of the Union, and put our troops in possession of Paducah and Smithland."

—The full commission appointed by the President to examine into the military accounts of the Department of the West, assembled at St. Louis in the fall of this year (1861). It was composed of Hon. David Davis, of Illinois; Hon. Joseph Holt, of Kentucky; and Hugh Campbell, of St. Louis, and was instructed to examine and report upon all unsettled claims against the Military Department of the West which originated prior to the appointment of Gen. Fremont. J. S. Fullerton was secretary, and Samuel T. Glover, of St. Louis, was the counsel for the government.

Joseph Scott Fullerton, the secretary of the commission, was a young lawyer who had removed to St. Louis from Chillicothe, Ohio, in 1858, and whose brilliant talents had already brought him into prominence. Mr. Fullerton performed the duties of this office with such ability and zeal that, on endeavoring to procure a release from the commission in order to enter the army, in which he afterwards became a distinguished officer, his application was twice refused, and it was not until the commission's labors were ended that he was enabled to carry out his cherished desire.

Gen. Fullerton traces his ancestry back to an old and well-known English family of the same name. The branch from which he descended removed to Scotland, where it played quite a conspicuous part in the political and religious dissensions of that country in early days. In 1602, Fergus Fullerton left Arran with Ramdal Na Arran (afterwards Earl of Antrim), and built Bush Mills, in the north of Ireland. He was the first of the Irish family. In 1641, William Fullerton, then the head of the family, successfully defended Ballantoy Castle against the insurgents. In

1690, Humphrey Fullerton distinguished himself at the battle of the Boyne, and for his bravery a sword was given to him by William of Orange. The
1861. sword was brought to this country by his son Humphrey, who came here in 1723.[1]

Humphrey, son of the last-named Humphrey, a man greatly respected, lived at Lancaster, Pa. His son Humphrey, who was one of the largest land-owners in Pennsylvania, lived near Greencastle, a man six feet two inches in height, who weighed over four hundred and thirty pounds. His son Humphrey moved to Chillicothe, Ohio, in the year 1806, taking with him his infant son, Humphrey (who was the sixth Humphrey in succession), the father of Joseph Scott Fullerton, the subject of this sketch, who was born at Chillicothe, Ohio, Dec. 3, 1836.

Gen. Fullerton's mother was Elizabeth T. Scott, daughter of Dr. Joseph Scott, a very prominent physician of Lexington, Ky., descended from an ancient Scotch family, whose father and uncle rendered distinguished service in the war of the Revolution.

In those early days of the West educational advantages were very limited, seminaries and schools for girls being unknown, and Mrs. Fullerton's father, a highly-educated man, who appreciated the advantages of a good school, placed her at one in Baltimore, Md. She made the journey with him in midwinter, traveling all the way from Lexington on horseback, their baggage being carried on pack-horses.

Gen. Fullerton's education was carefully superintended by his mother, who was a devout and earnest Christian, and, moreover, a woman of great force of character, and renowned for her goodness and sweetness of temper.

After completing the course of the Chillicothe Academy, young Fullerton, at the age of sixteen, entered the freshman class at Miami University, Oxford, Ohio, one of the oldest colleges in the West, and which perhaps has graduated more men who subsequently became famous than any other college in the West or South. Fullerton was not distinguished as a student; he paid more attention to the literary and secret societies than to study, and was rather too fond of college jokes to be a very earnest scholar, yet he stood among the first twelve of his class throughout the four years of his college life, and graduated without ever having been "conditioned" or "rusticated." He was then nineteen years of age, and he and Whitelaw Reid (now editor of the *New York Tribune*) were the youngest of their class (that of 1855), one of the largest classes that ever graduated from Miami University.

Young Fullerton then spent a year at Chillicothe, reading history and law, and in 1857 entered the Cincinnati Law School, from which institution he graduated in 1858. His class, though small, became rather noted; two of its members have been Governors of States, four are now on the bench, Gen. Noyes, one of them, was Minister to France under President Hayes, and several of them were distinguished in political life.

In the fall of 1858 Mr. Fullerton removed to St. Louis, and having had but little experience in the practical branches of his profession, he spent some time in the service of the clerk of the St. Louis Court of Common Pleas, giving his work for the advantages he derived from the experience as a deputy clerk of the court. His assiduity attracted the attention of the Hon. Henry Hitchcock, upon whose invitation, in 1859, Mr. Fullerton took a desk in that gentleman's office.

The next year was one of great political excitement, and Fullerton, as a "Douglas Democrat" and a strong Unionist, was thrown into sharp antagonism with most of his associates. His nearest friends were Southern people and sympathized strongly with secession, and a club of young men to which he belonged sent twenty-six members to the Confederate army and but four to the Union army,—Capt. Gratz, who was killed at the battle of Wilson's Creek, Andrew A. Alexander and Winfield Sumner, now in the regular army, and J. S. Fullerton. Though too young to have much influence, Fullerton exerted all his power to stem the torrent of disunionism which threatened to flood Missouri, and was one of a Committee of Safety of Union men, who organized to protect themselves and other Unionists in St. Louis.

The war broke out, and Fullerton was anxious to enter the service under the old flag, but unfortunate complications in his father's business seemed to forbid; besides, more men were offering themselves than the government could accept; so he continued the practice of his profession, and patiently bided his time. He had never belonged to a militia company or performed any kind of military duty or exercise, and had no taste for anything of the sort.

In the fall of 1861 he was appointed secretary of the commission, as heretofore stated, which sat at St. Louis to decide upon the claims of certain contractors and others against the government. It was reported that the work of the commission would occupy but a few weeks, but its labors were prolonged far into 1862. Meanwhile circumstances at home now favored Ful-

[1] Nearly a hundred years afterwards, being of excellent steel, one of the family, into whose hands it came, had the sword made into carving-knives.

one of the family, into whose hands it came, had the sword made into carving-knives.

few weeks, but its labors were prolonged [illegible]

Meanwhile circumstances at home now favored Ful

J. S. Fullerton

lerton's desire to take an active part in the war, and the delay was very irksome. Twice he resigned, but the commission refused to accept his resigna-
1861. tion. One day he told Mr. Holt, one of the members, that he would not stay in the rear another day, that he must go with the army, and was ashamed to stay back when so many were giving their lives for their country; "and the war, too," he added, "is nearly over!"

"Tut, tut, young man," said Holt, "you will have opportunity enough! Be patient till this important task is through. Even the shell of this rebellion is not cracked yet!"

In July, 1862, Mr. Fullerton finally finished the work of the commission, and then joined the "Halleck Guards," a volunteer company of young men of his acquaintance in St. Louis, who were at once mustered into the State service and accompanied an expedition of volunteers against guerrillas up the Missouri River.

Upon his return Mr. Fullerton was offered a major's commission by Governor Gamble, but having so little military experience he declined to accept such a high rank. He continued drilling with his company, and eventually, Oct. 14, 1862, at the request of Gen. Gordon Granger, was appointed second lieutenant in the Second Missouri Infantry, and assigned to duty as aide-de-camp to the general, who was organizing a force in Kentucky to move on Gen. E. Kirby Smith, commanding the Confederate forces in that State. Lieut. Fullerton remained on the staff of Gen. Gordon Granger in the campaign through Kentucky, and in 1863 went with him to Tennessee, where Gen. Granger took command of the reserve corps of the Army of the Cumberland.

In April, 1863, he was appointed assistant adjutant-general, with the rank of major, and was again assigned to Gen. Granger as chief of staff. He assisted that officer in reorganizing the reserve corps, which corps Granger took into battle at Chickamauga, Sept. 19 and 20, 1863, thus probably saving the day. So desperate was the situation that all depended on Longstreet being driven from a position in a gorge, which, had he held an hour longer, might have cost the North an army. Realizing the importance of the crisis, Granger threw one division of the corps into the gorge, without orders, and completely routed Longstreet. Of three thousand three hundred men who made this attack, about one thousand seven hundred were killed and wounded in less than an hour.

As chief of staff, Maj. Fullerton's gallantry attracted the attention of Gen. Thomas, and he was appointed lieutenant-colonel, and assigned to the Fourth Army Corps as chief of staff. Subsequently he was engaged in all the fights of that army until the end of the Atlanta campaign. Then Gen. Howard, commanding the Army of the Tennessee, requested his assignment to the staff of that army, but Gen. Thomas, commanding the Army of the Cumberland, refused to allow him to be transferred.

When Sherman left Atlanta on his famous march to the sea, Col. Fullerton went back as chief of staff under Gen. Stanley, with a part of the Army of the Cumberland, to fight Hood, and was engaged in all the battles of the command until the end of the war. Among the engagements in which he participated were those of Shelbyville, Chickamauga, Chattanooga, Missionary Ridge, Buzzard Roost Gap, Dalton, Resaca, New Hope Church, Pine Top Mountain, Kenesaw Mountain, Allatoona, the two battles at Atlanta, Jonesboro', Lovejoy Station, Columbia, Spring Hill, Franklin, and Nashville, besides many smaller fights and skirmishes. Although usually in the thickest of every engagement he seemed to lead a charmed life, never having been wounded or even received a bullet in his clothes. Yet he had many narrow escapes. Twice his horse was shot under him, several of his orderlies were shot, and once a twig, which he was holding in his hand, and afterwards a vine he had picked up and was examining, were shot away.

The character of his military services appears from a simple statement of the fact that he was recommended for brevet for distinguished services and gallantry in the Atlanta campaign, and was again recommended for brevet by Gen. T. J. Wood, commanding the Fourth Army Corps, and Gen. George H. Thomas, commanding the Army of the Cumberland, for "zealous, intelligent, and efficient performance of duty, and for most valuable services and distinguished personal gallantry in the field, especially displayed at Franklin, Tenn., Nov. 30, 1864, and in the several conflicts of the battle fought at Nashville, Tenn., Dec. 15 and 16, 1864."

In May, 1865, Gen. Howard, who had been appointed commissioner of the Freedmen's Bureau, requested that Gen. Fullerton be assigned as his assistant; but the latter refused to accept the position, although urged to do so by many of his friends (including Frank P. Blair), and, the war being over, he tendered his resignation from the army. It was not accepted, however, and he was ordered to report to Gen. Howard for the purpose mentioned. Fullerton foresaw that the bureau was likely to become a very convenient political machine, and he accepted service

under Gen. Howard with the distinct understanding that politics were to be kept out of it. For several months he succeeded in excluding the pseudo-philanthropists and adventurers from the North from the bureau, admitting none but those connected with the United States army; but during the summer of 1865 he again sought to resign, but was persuaded to remain for a while with the bureau. In October he was ordered to Louisiana to strive to bring about an adjustment of difficulties existing there, and to secure a better understanding between the State authorities and the officers of the military department and of the bureau. In this he was very successful. Under the administration of his predecessor the negroes had formed a very exaggerated idea of their importance, having been taught by demagogues and agitators that they were to have "forty acres and a mule." Consequently many of them had become demoralized and refused to work; the planters could not make contracts; the labor system was disorganized, and ruin stared the community in the face. On the other hand, there was a large class of influential whites who seemed disposed to harass the negro as much as possible. Gen. Fullerton directed himself to bringing about a better understanding between the two races. The negroes were told that freedom did not mean idleness, and that they would not be supported by the government, but must work for themselves; and the whites were informed that their late slaves were freemen, and must be treated by them as such; that their labor was necessary, and must be fairly paid for; and that the black man, never having had opportunities for self-improvement, should in all cases be treated with consideration, and when arraigned for infringement of the law, should have justice tempered with mercy.

1861.

In this wise and humane spirit Gen. Fullerton instituted the work of reform, and very soon succeeded in modifying the hostility which had existed between the two races. When he was relieved, in November, 1865, the *New Orleans Crescent* said, "The short administration of Gen. Fullerton has been marked by intelligence of the highest order, and has shown a regard for private rights and civil liberty which has won him the esteem of this community. . . . We would not willingly see Gen. Fullerton leave New Orleans without this acknowledgment on our part of the very great service he has rendered the public in his able administration of the bureau over which he has presided."

His administration in Louisiana was much commented upon by the newspapers. The radical Republican press generally abused him, while he was strongly upheld by the conservative papers. But even such a radical journal as the *Washington Chronicle*, after his return from Louisiana, said (Nov. 23, 1865), "Gen. Fullerton is a young man who served faithfully and fearlessly through the war. . . . We shall be greatly disappointed if his administration of the Freedmen's Bureau in Louisiana fails to give satisfaction. The work assigned an assistant commissioner of the bureau is a delicate and difficult task, and it is peculiarly so in Louisiana."

After leaving New Orleans, Gen. Fullerton returned to Washington. Congress had convened, and Gen. Howard, commissioner of the bureau, was unable to withstand the pressure which certain members brought to bear upon him to control the bureau politically. The gates were opened, and floods of adventurers poured into the South, filling the land with corruption and bringing shame upon the bureau. Feeling that he could no longer accomplish any good, Gen. Fullerton asked to be relieved from duty in the bureau, and to be mustered out, so that he might return to St. Louis. His application to be relieved was granted, but he was not mustered out, but was requested to report at the White House, where he acted as President Johnson's military secretary until April, 1866, when he was commissioned, in company with Gen. Steedman, of Ohio, to visit the South and make an inspection of the operations of the Freedmen's Bureau, and the political and social condition of the people in that section. This commission occupied him until August, and the result was the exposure of a vast amount of corruption and incompetency in the administration of the bureau. The report of Generals Steedman and Fullerton was virulently assailed by the radical Republican press, and was the occasion of a long and acrimonious newspaper controversy. As in the Louisiana affair, the radical papers unsparingly denounced the report, but the conservative press as strongly approved it. The *New York Times*, a leading Republican journal, had the frankness to say that the two commissioners had performed "an important public service," and under date of Aug. 19, 1866, it remarked "Gens. Steedman and Fullerton have pricked some very pretty bubbles. They have exposed the hollowness of much maudlin sympathy (for the negro). They have stripped disguise off proceedings that were not intended for the public eye, and have reduced divers humanitarians to the level of peculators and squanderers of public moneys."

This duty performed, Gen. Fullerton again urged (this time with success) that his resignation be accepted. In September, 1866, he was mustered out and returned to St. Louis. Upon this occasion the

National Republican, of Washington, D. C., which was then, as it is now, an organ of the Republican party, remarked, "Gen. Fullerton returns to his pur-
1861. suits of civil life crowned with unnumbered laurels fairly won in the military service, and secure of the lasting esteem of all whom he has met in social life in the national metropolis."

Gen. Fullerton had engaged in the war from a sense of duty, and had no fancy for military service in time of peace. When, therefore, upon the reorganization of the army, after the war, the President offered him the colonelcy of one of the new regiments, he declined it. He also, in the fall of 1866, declined an appointment to examine certain war claims, as it would interfere with his plan of returning to St. Louis to resume his professional work.

He arrived in St. Louis in December, 1866, and began to review his knowledge of the law, but while engaged in his studies he was surprised, in February, 1867, at receiving the unsolicited honor, at the hands of President Johnson, of being appointed postmaster of St. Louis. At first he was disposed to refuse, but finally accepted and held the office until Gen. Grant became President. During his administration he instituted many reforms, and greatly increased the efficiency of the service in St. Louis. He conducted the affairs of the office on strict civil service principles, and it is worthy of note that his was the first office so conducted in the Post-Office Department. No man was appointed or discharged for political reasons, nor were political assessments permitted. When a circular was received from the Republican Central Committee at Washington requesting him to pay a certain sum for campaign purposes, he returned it with the indorsement that he would not pay one cent, and that no man in his office should pay assessments unless he did so voluntarily. When his final accounts were examined, the auditor of the Post-Office Department complimented him on having had one of the very best conducted offices in the country, and his accounts on first trial were found exact to the last cent.

After leaving the post-office he then, as he is wont to say, began the study and practice of law, the war having deprived him of many of his best years.

The city and county of St. Louis being at that time in the hands of rings which were plundering the tax-payers, Gen. Fullerton, in December, 1872, co-operated with other leading citizens in the organization of the "Tax-Payers' League," "to aid in securing honesty, economy, and efficiency in the administration of municipal affairs and public business." The League appointed an executive committee, composed of Col. Robert Campbell, Col. Henry Hitchcock, J. R. Shepley, Maj. H. S. Turner, Hon. Albert Todd, Capt. Silas Bent, Judge John H. Fisse, and Gen. Fullerton as secretary; and for over three years (until October, 1876) this committee worked efficiently, exposed many rascalities, broke up many rings, pointed out many gross cases of misconduct and willful failure of duty on the part of certain officials, and brought about numerous reforms. The action of the League, more than anything else, led to the adoption of the "Scheme and Charter" for the government of St. Louis. As secretary of the committee, Gen. Fullerton necessarily performed his full share of the laborious work essential in a movement of such magnitude.

Gen. Fullerton also took a prominent part in suppressing the riots of 1877, his military experience serving him well in this unhappy emergency.

He is a member of and an active worker in Christ Church (Episcopalian), St. Louis, being a vestryman and trustee. As in politics, so in religion he is conservative, not a partisan, and not blinded to the good that exists in all parties and all churches.

Since 1868 he has been treasurer of the Army of the Cumberland, and is now treasurer of the Thomas Monument Fund, raised by the Army of the Cumberland for the erection of the statue of Gen. Geo. H. Thomas at Washington, D. C.

On the 29th of October, 1879, Gen. Fullerton married Miss Mary C. Morgan, only daughter of George D. Morgan, a retired New York merchant living at Irvington-on-the-Hudson. Mr. Morgan, with his cousin, ex-Governor Morgan, founded the well-known firm of E. D. Morgan & Co. Gen. Fullerton's tastes are eminently domestic. He avoids the crowd, and never cared for or worked for popularity. He never sought or asked for political preferment or office; but having held office, is one of the few persons who, after holding such, did not think the public owed him another as a debt. In his career he has always been moved by a strict sense of duty; and for this reason he has often, in business and public life, been obliged to act in conflict with his feelings, and at times to wound good friends by opposing them; but they were wounds that hurt him more than they did his friends.

Such is a hasty sketch of an unusually busy and brilliant career. It carries its own comment with it, but may be summed up as the history of one who, as a volunteer soldier, showed great bravery and gallantry on twenty battle-fields; as a lawyer, the possession of high legal attainments and a logical and observing mind; as a citizen, unselfish zeal for the public welfare; and who in private life is loved as a gentleman of the kindest heart and finest character.

—Gen. Curtis, on October 26th, issued an order, in which he said,—

"Entire secrecy must be preserved in regard to the armament and interior arrangements of our defenses.

"It is enjoined on all the officers and guards of the fort, now nearly completed, in St. Louis to admit *no visitors* without a pass signed by the commanding officer, Col. Almstedt, or by the commanding general, dated *after* the publicity of this order."

1861.

—Lieut.-Col. B. W. Glover, who was dangerously wounded in the battle of Lexington, died in St. Louis on October 30th. Lieut.-Col. Glover was a citizen of Johnson County, where he had resided a number of years. He had been a member of the State Senate, and was at one time Grand Master of the Masonic order of Missouri. He was buried in Bellefontaine Cemetery.

—Capt. George E. Leighton, of the Nineteenth Missouri Volunteers, and provost-marshal of St. Louis, on November 2d prohibited all steamboats, railways, and express companies from receiving or transporting any boots, shoes, saddles, bridles, or ready-made clothing from St. Louis to the interior of Missouri without a special permit.

—Provost-Marshal Leighton, on November 2d, gave notice that "on and after Monday, November 4th, no passes would be issued to visit the military prison, except to the immediate relatives of prisoners confined therein or to persons having important business, in which a personal interview is absolutely necessary."

—At the suggestion of Hon. Thomas Allen, a memorial of the citizens of St. Louis was signed and presented to Congress, praying that the collection of Federal taxes throughout the State of Missouri for 1862 be suspended.

—On November 6th, Gen. Fremont was relieved of the command of the Western Department, and Gen. Hunter took his place. The removal of Gen. Fremont created the greatest excitement in St. Louis as soon as it was announced, and the German citizens were loud in their expressions of indignation, especially against Col. Frank Blair, whom they regarded as chiefly responsible for the change of commanders. Gen. Curtis, in command at Benton Barracks, sent into the city a troop of cavalry to preserve the peace, and a large force of police were also on duty at points where the popular gatherings were largest.

The Germans determined to give Gen. Fremont a grand reception upon his return to the city from the Southwest, and accordingly, on November 7th, largely attended meetings were held at Soulard Market, Washington Hall, Gerdermann's and Sturgeon Market, at which a general plan was submitted by a committee composed of Dr. G. Fischer, G. Hoeber, John C. Vogel, Louis Wagner, and Capt. T. Niederwieser. The plan was adopted by all the meetings, and the following committee was appointed to make the necessary preparations for the demonstration:

First Ward, John H. Fisse, J. G. Woerner.
Second Ward, Charles W. Gottschalk, Gustavus Fisher.
Third Ward, Felix Coste, Gustavus Hoeber.
Fourth Ward, Philip Weigel, Tony Neiderweiser.
Fifth Ward, E. Anheuser, Julius Hestler.
Sixth Ward, Adam Hindricker, Thomas O'Reilly.
Seventh Ward, John G. Gerdeman, Charles Daunerman.
Eighth Ward, John C. Vogel, Henry Meyer.
Ninth Ward, S. E. Beckman, Louis Wagner.
Tenth Ward, Henry Block.

John C. Vogel, a highly-honored German citizen from the Eighth ward, was chosen president, and mainly through his efforts the reception was a great success.

St. Louis owes much to her citizens of German birth, many of whom, not only during the trying period of the war, but in the various walks of civil business, and private life, have conspicuously illustrated the peculiar virtues of their native land, and have won recognition in the home of their adoption as broad-minded and able men. Among this number John C. Vogel occupies a praiseworthy position as a type of the foreign-born citizen fully imbued with the spirit of American institutions, and thoroughly devoted to serving the best interests of the community with which he has been identified. He was born at Klanglangheim, a village in Bavaria, Germany, Oct. 9, 1816. His parents were people of education and refinement, and in easy circumstances. Their son enjoyed the advantages of a good education; but though education was compulsory in Germany, the boy needed no other spur than his thirst for knowledge. Upon leaving school he served an apprenticeship as baker, and having fulfilled his term entered upon the prosecution of an active and useful career with the reputation of being a first-class workman. Business opportunities, however, were not abundant in the land of his birth, and having heard much of the successes of his countrymen in America he in April, 1835, came hither, with the intention however, of returning to perform military service which was compulsory on every German male, under penalty of confiscation of property. After two years residence in this country he decided to remain permanently, and hired a substitute to perform his military service in Germany, while he devoted himself to bettering his condition in his new home. The estimate which he placed upon his prospects in the United States may be judged from the fact that he paid four hundred florins for his military substitute.

He reached St. Louis in 1836, and worked for two years at his trade, during which time his economy and intelligent labor enabled him to save sufficient money to go into business on his own account. His naturalization as a citizen of the United States in 1841 was simply the legal and visible record of a fact that was already accomplished, for he was in thought and fibre a citizen of the great republic.

1861.

In 1843 he was appointed city weigher, which office he held for three years, after which he served as clerk in the post-office for one year with credit to himself and satisfaction to the department. In 1847 he established the first omnibus line on Franklin Avenue, which proved highly successful. From 1851 to 1858 he was a justice of the peace, and served as a member of the City Council from 1855 to 1861. At the expiration of this term of office he served three months in the Fourth Regiment Missouri Volunteer Infantry (Home Guards).

Meanwhile, in 1851, he had become connected with the St. Louis Fire and Marine Insurance Company, an institution that takes high rank in the insurance world, and has been its president for many years, directing its operations and its policy, and making it one of the most honored and prosperous of such institutions in the West.

Mr. Vogel has always taken an active interest in politics, and his influence in the political world was early recognized as considerable. His assistance was eagerly sought, and he displayed such ability as to be regarded as a leader. When he received a nomination for sheriff of St. Louis County in 1862, his personal and political popularity carried him through triumphantly and secured his election.

As a business man of many years' standing, he enjoys a high reputation, and his judgment has been largely sought in banking and other corporations, in many of which he has served as director.

His social qualities have given him prominence in various societies, especially the Odd-Fellows, of which order Wildey Lodge has numbered him as a member since 1844, he having passed all the chairs. He assisted in the organization of the St. Louis Immigration Society, being one of the few liberal and earnest men who foresaw Missouri's prospective greatness, and who early applied themselves to the work of attracting immigration hither. As an enlightened gentleman of foreign birth, Mr. Vogel had much weight in the organization of the movement, and his counsels have ever been regarded as of unusual value in all matter pertaining to immigration.

Notwithstanding the love Mr. Vogel has ever borne his adopted country, and his reliance on her institutions, he has made several extended visits to his native land, attracted thither by a natural love for the home of his birth, and the recreation that liberal culture craves.

In December, 1840, Mr. Vogel was married to Miss Sophia Wilhelmina Franke, daughter of Christian Henry Franke, a native of Prussia and a well-known citizen of St. Louis. Four children resulted from this marriage, none of whom are now living.

Mr. Vogel's parents were members of the Evangelical Lutheran Church, in which faith he was reared, and to which he has steadily adhered. He is a leading member of that communion, and has been a liberal contributor to all its enterprises, as well as a generous supporter of every project designed to advance the interests of the city. His life has been a successful and useful one in a marked degree, and he enjoys the esteem and confidence of the entire community as one of its most honored and honorable members. Broadly liberal in both thought and action, he has done so much that deserves well at the hands of his fellow-citizens that he is both remembered and appreciated with a regard that might well satisfy a more ambitious man.

Gen. Fremont and staff arrived in the city on the 8th, and were received in the most enthusiastic manner by an assemblage numbering twenty thousand citizens. A torchlight procession was formed, which finally reached the front of Gen. Fremont's headquarters, where the committee appointed to deliver the address left the line to perform the duty assigned them. Gen. Fremont received them in one of the large rooms, and John C. Vogel, stepping forward, delivered an address highly eulogistic of the general, after which the following resolutions were read and then presented to Gen. Fremont:

"We, the citizens of St. Louis of German extraction, in mass-meeting assembled to give expression of our sentiments towards Maj.-Gen. John C. Fremont, have solemnly and unanimously resolved,

"1. That we recognize in John C. Fremont the embodiment of our patriotic feeling and political faith.

"2. That, notwithstanding many paralyzing circumstances, he has performed his arduous and responsible task with all possible energy and honesty.

"3. That we admire his impartiality and sagacity in selecting his military counselors, without national prejudices, from among such men as he considered true and worthy of his confidence.

"4. That we will stand by him as long as he shall prove true to us.

"5. That while we submit to the action of the government, as behooves loyal citizens, we regret to be deprived at the present moment of his services in conquering the rebel army, and believe we recognize in this event a wise providence which

may have reserved him for a still wider sphere of action in future times."

Gen. Fremont, during the reading of the resolutions and the delivery of the address, apparently found it difficult to restrain his emotions, and when he responded his voice was quite tremulous.

1861.

During Gen. Fremont's administration of the affairs of this military department, says the *Republican*, he made an arrangement by which the North Missouri Railroad Company was to be connected with the Iron Mountain and Pacific Railroad Companies.

"The consideration was that the company would repay to the United States twenty-five thousand dollars in transportation thereafter to be done on the road, and a part of that money has thus been paid. The road, two and a half miles in length, was constructed under the express orders of Gen. Fremont, at a cost of a little less than thirty-seven thousand dollars. Anybody can see the manner in which it has been done by examining it. A more substantial road cannot be built, and to suit the peculiar locality (on the Levee) it has been planked with thick stuff, so as to offer no obstacle to drays, wagons, etc., passing over it. The account of this work is before the committee of claims, and suspended under circumstances of peculiar hardship. Not a dollar has been paid to the laborers who built the road, although the United States is the responsible party for it."

—Brig.-Gen. Samuel R. Curtis, on November 7th, assumed command "over all the local commands and military operations within fifty miles of St. Louis on the Missouri side of the Mississippi River."

—The *Republican* of November 20th gives the following account of the provost-marshal's office and the mode of issuing passes:

"The provost-marshal's general office for the issue of passports is on Washington Avenue below Fourth Street. It is under the superintendence of Mr. Samuel Greene. Besides this principal office, however, passes are issued to guests at the Planters' House, Barnum's, Virginia Hotel, Everett House, City and St. Charles Hotels, and to passengers at all the railroad ticket offices, as also at the Keokuk and Northern Line packet office, and at the Carondelet ferry.

"At the passport office twelve clerks are constantly employed in issuing and recording passes. The form of these passes is familiar to many of our readers. It is nothing more or less than permission to pass beyond the limits of the city and county of St. Louis, signed by George E. Leighton, captain Nineteenth Missouri Volunteers, provost-marshal, and also signed by the clerk issuing the pass. On the reverse side are recorded the name, age, height, color of eyes and hair, nativity and residence of the applicant, and also a printed pledge of loyalty to be signed by the party to whom the paper is issued. A change has recently been made in the form of the obligation. During Gen. McKinstry's administration it was in the following words:

"'It is understood that the within named subscriber accepts this pass on his word of honor that he is and will be ever loyal to the United States; and if hereafter found in arms against the Union, or in any way aiding her enemies, the penalty will be death.'

"When Capt. Leighton assumed the duties of the office the form was altered to read as subjoined:

"'I hereby acknowledge that I accept this pass upon my word of honor, solemnly pledged, that I will ever bear true faith and allegiance to the United States of America, and that I will consider such allegiance as paramount to that due to any other power, sovereignty, or State whatsoever; that I will never take arms against the United States or those acting under its authority, or give aid, information, or comfort to its enemies, and that I will do all in my power as a citizen to discourage the present rebellion and preserve the Federal Union.'

"These passports are all numbered and recorded in books kept for the purpose, the clerks transferring number of pass, name, age, height, color of hair and eyes, nativity and residence, —an immense amount of labor being thus required.

"The office is constantly thronged during business hours, from 8 o'clock A.M. to 5 o'clock P.M., the principal pressure being in the afternoon. From eight hundred to one thousand passes are issued daily at the office. Many rich scenes and interesting incidents occurring here might be related were our space to justify it. The visitor may often hear utterances of impatience, ranging from the low murmur to the downright rip-roaring oath, fears expressed about being too late for the train or boat, and sundry excited ejaculations, together with some mirth about the general inconvenience of the thing anyhow. The clerks, however, appear as attentive and considerate as possible, and preserve, amidst the hurry and all the abuse they sometimes get, a most equitable temper and disposition.

"We have taken pains to ascertain the number of permits to leave the city that have been issued since martial law was declared in this county. Seventy-five thousand have been recorded, and, as near as can be conjectured, ten thousand more were issued in the grand rush following the declaration of martial law that were *not* recorded. Altogether, it is perhaps safe to put the whole number of passes issued from the 14th of August to the present time at eighty-five thousand.

"Foreign subjects, on presenting certificates that they are such from the acting consuls, are furnished passports without being required to sign the obligation or pledge. Returns to the superintendent's office are made every morning from the hotels, railroad offices, and packets, where passes are issued. In all respects the issuing and recording are the same at the hotels, etc., as at the passport office.

"Parties are stationed at all the ferries, depots, and steamboats, as well as at all the roads leading out of the county, to inspect passes and overhaul any suspected baggage. Persons losing their passes and applying for new ones are required to go before some justice of the peace and make affidavit as to the disposition they have made of their old ones."

—Brig.-Gen. McKinstry, acting major-general of one of the divisions of the army, arrived in St. Louis December 13th under arrest, in accordance with an order from the War Department. He turned over his command to Gen. Sturgis.

—By an order of the War Department, Gen. H. W. Halleck was transferred from California November 9th, and placed in "command of the Department of the Missouri, including the States of Missouri, Iowa, Minnesota, Wisconsin, Illinois, Arkansas, and that portion of Kentucky west of Cumberland River," with headquarters in St. Louis. He arrived in the city on the 10th, accompanied by Gen. S. Hamilton.

and established himself at the Planters' Hotel. On the 18th, Maj.-Gen. Hunter, who had been assigned to the Department of Kansas, relinquished his command of the Department of Missouri to him, and on the 19th Gen. Halleck took command.

1861.

—John F. Wielandy, agent for pensions, announced that he had succeeded in procuring the first pension to a disabled soldier in the Western Department. The pensioner was W. H. Wencker, a private of Company I, Third Regiment Missouri Volunteers, who was wounded at Wilson's Creek. His half pension began Oct. 14, 1861.

—Immediately upon assuming command Gen. Halleck proceeded to establish thorough discipline in the army, and to adopt measures for the successful prosecution of the war. On November 26th he issued General Order No. 8, through his assistant adjutant-general, John C. Kelton, in which he said,—

"Numerous cases have been brought to the attention of the commanding general of alleged seizure and destruction of private property in this department, showing an outrageous abuse of power and a violation of the laws of war. To avoid a recurrence of these evils the following rules will hereafter be observed:

"1. No private property will be taken except where necessary for the subsistence or transportation of the troops, or in cases of persons in arms against the United States, or affording aid and assistance to the enemy.

"2. Where it becomes necessary to take private property for the former purpose, intelligent and responsible officers will be detailed for that purpose, who will take an accurate account of the property so taken, and give receipts therefor. All such property must be duly returned and accounted for, and the authority for the seizure must be stated in the receipts and returns. Any unauthorized and unnecessary seizure or destruction of private property will be punished with the extreme penalty imposed by the laws of war, which is *death*.

"3. The seizure and conversion of the private property of an enemy (where not required for immediate supplies, as provided in the foregoing paragraph) is justifiable only in particular cases, provided for by the laws of the United States and the general laws of war, and should never be made except by the orders of the officer highest in command, who will be held accountable for the exercise of this power. Great caution should be used in this matter, as much injustice has been done to individuals who are not enemies, and much discredit cast upon our patriotic army by excesses committed by unauthorized persons pretending to act in the name of the United States. All property taken from alleged enemies must be inventoried and duly accounted for.

"Any person violating these rules will be immediately arrested and reported to headquarters.

"4. In all cases where prisoners taken at other posts or in the field are taken to St. Louis, they will be accompanied with a written statement of the charges against them, and the evidence on which the arrest was based. Otherwise prisoners so sent will be released on their arrival here.

"5. No person will be hereafter arrested without good and substantial reasons, and officers making arrests without sufficient cause, or without authority, will be held to account and punished. And officers sending prisoners to St. Louis without charges, proofs, or proper explanations will be charged with the expenses of their transportation."

—On November 27th, Gen. Curtis, through Maj. N. P. Chipman, his assistant adjutant-general, issued an order "to check communication with the enemy, prevent conveyance of contraband goods, and avoid the recurrence of assaults upon our steamboats" on the Mississippi River. It required boats entering the river to report at the first military post and stop, and to proceed under military orders at the discretion of the military commander. "Freight and baggage will be subject to careful inspection; an oath to which no patriot can object and no traitor forget shall be taken and subscribed to by all employés and passengers, except such alien friends as may be excepted by commanding generals. The plans of landing and departure will conform as near as may be to the custom of the trade, but all commission and storage business must be transacted with openly avowed and reliable Union men." The officers of boats and officers of the army were directed, and those of the navy were requested, to vigorously carry out the order.

—Gen. Halleck, on November 30th, issued an order, through J. C. Kelton, his assistant adjutant-general, recognizing the following officers of his staff who had reported for duty:

Brig.-Gen. George W. Cullum, chief of staff and chief of engineers; Brig.-Gen. Schuyler Hamilton, assistant chief of staff; Capt. J. C. Kelton, assistant adjutant-general, in charge of office; Capt. William McMichael, assistant adjutant-general; Capt. S. M. Preston, assistant adjutant-general; Maj. Robert Allen, chief of quartermaster's department; Capt. Thomas J. Haines, chief of subsistence department; Surg. J. J. B. Wright, chief of medical department; Lieut.-Col. T. P. Andrews, chief of pay department; Lieut.-Col. J. B. McPherson, aide-de-camp and assistant to chief of engineers; Col. George Thom, aide-de-camp and chief of topographical engineers; Col. Richard D. Cutts, aide-de-camp on topographical duty; Capt. Franklin D. Callender, chief of ordnance department; Lieut.-Col. James Totten, chief of artillery; Capt. George Hoskin, acting aide-de-camp.

—On December 1st, Governor H. R. Gamble issued an order assigning to duty at his headquarters, "upon the staff of the commander-in-chief," the following officers:

Col. Chester Harding, Jr., adjutant-general; Col. Samuel G. Reed, quartermaster-general; Col. Alton R. Easton, inspector-general; Col. Franklin D. Callender, aide-de-camp and chief of ordnance; Col. Hamilton Gamble, aide-de-camp, assigned to duty as assistant inspector-general; Col. William D. Wood, aide-de-camp, assigned to duty as assistant inspector-general; Col. William T. Mason, aide-de-camp, assigned to duty as assistant inspector-general.

—On October 16th the State Convention adopted an ordinance requiring test oaths of loyalty for all

civil officers, the same to be filed within sixty days, and providing that the offices of those who failed to comply with the ordinance before the 17th of December, 1861, should be declared vacant, and that the vacancy should be filled by appointment. On the 2d of December, M. Oliver, the Secretary of State, called the special attention of those "whom it may concern" to the provisions of the law, and submitted the following as the "approved form of the oath required by the ordinance:"

1861.

"I, A. B. (stating the office), do solemnly swear that I will support the Constitution of the United States and the State of Missouri, and that I will not take up arms against the government of the United States, nor the provisional government of the State of Missouri, nor give aid or comfort to the enemies of either during the present civil war, so help me God."

Notwithstanding this was a State measure and only applied to State and city officials, Gen. Halleck deemed it necessary on December 7th to issue the following general order requiring the enforcement of the ordinance:

"The mayor of the city of St. Louis will require all municipal officers to immediately subscribe to the oath of allegiance prescribed in the ordinance passed by the convention of this State on the 16th day of October, 1861.

"The provost-marshal-general will take measures to ascertain whether any civil officer of this State fails, within the time fixed by said ordinance, to subscribe and file the oath there prescribed; and any person having failed to take such oath who attempts to exercise civil authority, in violation of the terms of said ordinance, will be arrested."

—During the year Maj.-Gen. Sterling Price, of the Confederate army, requested D. Robert Barclay, J. R. Barret, and D. H. Armstrong, of St. Louis, to act in his behalf in conducting the exchange of prisoners of war. These gentlemen accepted the humane mission, and having been applied to frequently by ladies for information as to whether they would be permitted to supply the prisoners confined in the military prison in the city with such clothing and other necessaries as their comfort seemed from time to time to demand, they referred the matter to Capt. George E. Leighton, the provost-marshal, with the belief that he would act justly and humanely in the premises. In this anticipation they were not disappointed, as will be seen by the following letter:

"Office of Provost-Marshal.
"St. Louis, Mo., Dec. 3, 1861.

"Gentlemen,—Your communication of this day is at hand. In reply thereto, I have to say that the privilege of furnishing any clothing, or whatever may conduce to the personal comfort of any prisoner, has never been denied. It has not been deemed necessary by the government, while confining the person of the prisoner, to prohibit the ordinary offices of humanity or friendship, and while every reasonable effort is made by those in charge of the prison to secure the personal comfort of every prisoner, yet, if desired, anything of the character mentioned by you, upon being left at the prison, will be immediately delivered to the person for whom it is designed.

"Very respectfully,
"Your obedient servant,
"George E. Leighton,
"*Captain, Provost-Marshal.*

"To Messrs. D. Robert Barclay, and others."

—Gen. Halleck on December 4th issued General Orders No. 13, which, with the exception of Section II. (of little interest), were as follows:

"I. Lieut.-Col. Bernard G. Farrar is hereby appointed provost-marshal-general of this department. Capt. George E. Leighton is provost-marshal of the city of St. Louis and its vicinity. All local provost-marshals will be subject to the orders of the provost-marshal-general, who will receive his instructions direct from these headquarters.

"III. Commanding officers of districts, posts, and corps will arrest and place in confinement all persons in arms against the lawful authorities of the United States, or who give aid, assistance, or encouragement to the enemy. The evidence against persons so arrested will be reduced to writing and verified on oath, and the originals or certified copies of such affidavits will be immediately furnished to the provost-marshal-general in this city. All arms, ammunition, and other personal property required for the use of the army, such as horses, wagons, provisions, etc., belonging to persons so in arms or so assisting and encouraging the enemy, will be taken possession of, and turned over and accounted for. Such property, not of a proper character for issue, will be examined by a board of officers, and sold as directed by the army regulations.

"IV. Commissions will be ordered from these headquarters for the trial of persons charged with aiding and assisting the enemy, the destruction of bridges, roads, and buildings, and the taking of public or private property for hostile purposes, and also for the condemnation of property taken by our forces from disloyal inhabitants for the use of the army.

"V. In all certificates given for private property taken for public use, in accordance with General Orders No. 8 of this department, it will be stated whether the property was taken from loyal or disloyal persons, and as a test of the loyalty of persons claiming to be such, from whom property is so taken, officers commanding districts, posts, divisions, or separate brigades are authorized to appoint some competent and reliable officer to require and administer the usual oath of allegiance to the United States.

"VI. All persons found in disguise as pretended loyal citizens, or under other false pretenses, within our lines, giving information to or communicating with the enemy, will be arrested, tried, condemned, and shot as spies. It should be remembered that in this respect the laws of war make no distinction of sex,—all are liable to the same penalty.

"VII. Persons not commissioned or enlisted in the service of the so-called Confederate States, who commit acts of hostility, will not be treated as prisoners of war, but will be held and punished as criminals. And all persons found guilty of murder, robbery, theft, pillaging, and marauding, under whatever authority, will either be shot or otherwise less severely punished, as is prescribed by the rules and articles of war, or authorized by the usages and customs of war in like cases.

"VIII. The law of military retaliation has fixed and well-established rules. While it allows no cruel or barbarous acts on our part in retaliation for like acts of the enemy, it permits any

retaliatory measures within the prescribed limits of military usage. If the enemy murders and robs Union men, we are not justified in murdering and robbing other persons who 1861. are in a legal sense enemies to our government, but we may enforce on them the severest penalties justified by the laws of war for the crimes of their fellow-rebels. The rebel forces in the Southwestern counties of this State have robbed and plundered the peaceful non-combatant inhabitants, taking from them their clothing and means of subsistence. Men, women, and children have alike been stripped and plundered. Thousands of such persons are finding their way to this city, barefooted, half-clad, and in a destitute and starving condition. Humanity and justice require that these sufferings should be relieved, and that the outrages committed upon them should be retaliated upon the enemy. The individuals who have directly caused these sufferings are at present mostly beyond our reach. But there are in this city, and in other places within our lines, numerous wealthy secessionists, who render aid, assistance, and encouragement to those who commit these outrages. They do not themselves rob and plunder, but they abet and countenance these acts in others. Although less bold they are equally guilty. It is therefore ordered and directed that the provost-marshals immediately inquire into the condition of the persons so driven from their homes, and that measures be taken to quarter them in the houses and to feed and clothe them at the expense of avowed secessionists, and of those who are found guilty of giving aid, assistance, and encouragement to the enemy.

"IX. The laws of the United States confiscate the property of any master in a slave used for insurrectionary purposes. Should Congress extend this penalty to the property of all rebels in arms, or giving aid, assistance, and encouragement to the enemy, such provisions will be strictly enforced. Military officers do not make laws, but they should obey and enforce them when made.

"X. Where the necessities of service require it, the forced labor of citizens, slaves, and even prisoners of war may be employed in the construction of military defenses, but no one will be forced to such labor without orders from these headquarters, except in cases of siege or attack. All persons so impressed will be fed and quartered at the public expense, and an account will be taken of their labor, to be settled as may be directed by the War Department. All such working parties will be strictly guarded and kept, as far as possible, from communicating with the command where employed.

"XI. These orders may by some be regarded as severe; but they are certainly justified by the laws of war, and it is believed they are not only right but necessary. It is therefore expected that all loyal citizens in this department will assist the military authorities in strictly enforcing them. There is already a large military force in this State, which is daily increasing in numbers and improving in organization and discipline. In a few weeks this force will be able not only to expel or punish all traitors and rebels, but also to strike the enemy in his strongholds.

"XII. All communications relating to prisoners of war will be directed to the provost-marshal-general, to be by him laid before the commanding general, daily, at orderly hours."

In pursuance of this order Bernard G. Farrar, provost-marshal-general of the Department of the Missouri, on December 5th assumed the discharge of his duties. In his "Order No. 1" he required all local provost-marshals to report to him the corps from which and the commander by whom they were appointed, together with the limits of their jurisdiction. The order also contained the following provisions:

"IV. Provost-marshals will not issue orders for the arrest of persons or the seizure of property without satisfactory evidence by affidavit, or the official statements of army officers, showing probable cause to believe that the accused person or owner has been, or is, guilty of either of the crimes specified in the Department General Order No. 13, hereinbefore referred to. This, however, is not intended to refer to arrests or seizures, made by authority of military commanders, which are sent before the provost-marshals for investigation.

"V. Whenever a suspected person is arrested by order of, or sent before a local provost-marshal for examination, he shall immediately examine the witnesses under oath, reducing the several statements to writing, and shall immediately forward the same, together with his opinion thereon, to this office, detaining the prisoner in custody until directions are received for the disposition of the accused. Provided, however, if the evidence does not disclose any of the offenses specified, the prisoner shall be discharged upon taking the oath of allegiance by the local provost-marshal, and a report made to this office of such arrest, examination, and discharge.

"VI. When property is seized a correct description and inventory of the same shall be made and forwarded to this office, together with a sworn statement of the facts and circumstances upon which such seizure was founded, and the property safely held until directions are received from headquarters or the immediate military commander for its disposition.

"VII. The rank, name, and date of taking of all prisoners of war shall be immediately forwarded to this office for the information of the commanding general.

"VIII. Arrests and seizures made by provost-marshals for the mere purpose of enforcing camp and police discipline need not be reported to this office, but may be disposed of at the time, subject only to the orders of the immediate commander."

—To carry out the arrangements for protecting the commerce of the Mississippi, the following oath and blanks for names and description were prescribed by Brig.-Gen. Curtis on December 6th, for the use of the boats and houses engaged in this trade:

"I solemnly swear that I will bear true allegiance to the United States, and support and sustain the Constitution and laws thereof; and I will maintain the national sovereignty paramount to that of all State, county, or confederate powers; that I will discourage, discountenance, and forever oppose secession, rebellion, and disintegration of the Federal Union; that I disclaim and denounce all faith and fellowship with the so-called Confederate States and Confederate armies, and pledge my honor, my property, and my life to the sacred performance of this my solemn oath of allegiance to the government of the United States of America."

Name.	Residence.	Destination.	Age.	Height.		Eyes.	Hair.	Complexion.
			Years.	Feet.	Inches.			

This oath was also prescribed as the oath of allegiance to be taken and subscribed in obedience to

Paragraph V. of General Orders No. 13, heretofore mentioned, and in all other cases in the Missouri Department where an oath of allegiance was authorized and required.

1861.

—On December 4th, J. M. Schofield, brigadier-general commanding the Missouri State militia, ordered that the following officers of his staff should be recognized and obeyed:

"Lieut.-Col. Calvin W. Marsh, assistant adjutant-general.
"Lieut.-Col. Bernard G. Farrar, aide-de-camp.
"Lieut.-Col. John B. Gray, aide-de-camp and assistant inspector-general.
"Staff of the First Brigade:
"Maj. Henry Hescock, assistant adjutant-general.
"Maj. Henry L. McConnell, aide-de-camp.
"Maj. John F. Tyler, aide-de-camp."

—The following regulations for the river commerce from the port of St. Louis on the Missouri and Mississippi Rivers were put in force on December 10th by Brig.-Gen. S. R. Curtis:

"1. From and after this date the river commerce from the port of St. Louis will be entirely under military control and surveillance.

"2. No steamboats or other crafts will be permitted to take freights or passengers, or be allowed a clearance, except those authorized and commissioned by the major-general commanding the Department of the Missouri, or the general commanding the District of St. Louis.

"3. Every person or company owning a steamboat or other craft, and desiring to do business on the rivers from and to the port of St. Louis, will immediately after the publication of this notice be required to make written application to the chief quartermaster, United States army, in St. Louis, for permission, accompanying the same with a statement under oath of the true owner or owners of said steamboat or craft, and the amount of interest of each person or company in said steamboat or craft, whether in trust or otherwise, their places of residence and of business, and also the name and residence of each officer and pilot employed or to be employed on the same; and any change in the ownership of said steamboat or craft, or in the officers or pilots thereof, shall also be reported in like manner.

"4. All officers, pilots, and river employés on any steamboat or craft, shall take the following oath (the oath prescribed December 6th).

"5. When application has been made agreeably to the foregoing, it shall be the duty of the chief quartermaster in St. Louis to institute such further investigation as he may deem requisite as to the character and loyalty of the owner or owners, the officers and pilots of such steamboats or crafts, and if found UNEXCEPTIONABLE, he shall issue his commission to the owner or master thereof to do business on the rivers.

"6. The object of the foregoing is to SUPPRESS and ENTIRELY PREVENT any aid or ASSISTANCE to or COMMUNICATION WITH any person or persons (directly or indirectly) disloyal to or in arms against the Federal authority of the United States.

"7. ANY OWNER, officer, or pilot of any steamboat or other craft who shall do any act contrary to the object expressed in the foregoing section shall cause the immediate FORFEITURE of said steamboat or craft and her cargo to the Federal government, and such owner, officer, or pilot be subject to the pains and penalties prescribed by the articles of war for giving aid to the enemy. The articles of war referred to above are in the following words:

"'ART. 56. Whosoever shall relieve the enemy with money, victuals, or ammunition, or shall knowingly harbor or protect an enemy, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.

"'ART. 57. Whoever shall be convicted of holding correspondence with or giving intelligence to the enemy, either directly or indirectly, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.'"

In order to carry out the objects of Gen. Curtis in relation to the commerce and navigation of the Mississippi, Capt. John A. Scudder and Capt. Parsons were appointed, December 14th, to administer the

"oath of allegiance to the United States government to all officers, pilots, and river employés, consignors and consignees, and passengers on any steamboat or craft which shall, by permission of the proper authorities, quit the port of St. Louis.

"Masters of vessels and inspectors who have themselves been fully qualified, entered upon, and are still in the service are also authorized and appointed to administer the oath and carry out the object of the orders concerning the river commerce on the Mississippi and its tributaries."

—The city being crowded with Union refugees from the disturbed sections of the interior, Maj.-Gen. Halleck on December 12th issued the following "General Orders No. 24," for levying a contribution of ten thousand dollars on the Southern sympathizers for their support:

"I. The suffering families driven by rebels from Southwestern Missouri which have already arrived here have been supplied by voluntary contributions made by Union men. Others are on their way, to arrive in a few days. These must be supplied by the charity of men known to be hostile to the Union. A list will be prepared of the names of all persons of this class who do not voluntarily furnish their quota, and a contribution will be levied on them of *ten thousand dollars*, in clothing, provisions and quarters, or money in lieu thereof. This levy will be made upon the following class of persons, in proportion to the guilt and property of each individual: 1st, those in arms with the enemy who have property in this city; 2d, those who have furnished pecuniary or other aid to the enemy, or to persons in the enemy's service; 3d, those who have verbally, in writing, or by publication given encouragement to insurgents and rebels.

"II. Brig.-Gen. S. R. Curtis, United States volunteers, Lieut.-Col. B. G. Farrar, provost-marshal-general, and Charles Borg, Esq., assessor of the county of St. Louis, will constitute a board of assessors for levying the aforementioned contribution. In determining the amount of property of the individuals assessed, the board will take into consideration the official assessment lists for municipal taxes.

"III. As soon as any part of this contribution has been assessed by the board, the provost-marshal-general will notify the parties assessed, their agents or representatives, stating the amount of provisions, clothing or quarters, and the money value thereof required of each, and if not furnished within the time specified in such notice, he will issue an execution, and sufficient property will be taken and sold at public auction to satisfy the assessment, with costs and a penalty of twenty-five per cent. in addition. Where buildings or parts of build-

lings are to be used, and where any of the sufferers are to be quartered on families, care should be taken to produce as little inconvenience to the owners or families as possible, this
1861. not being considered a military contribution levied upon the enemy, but merely a collection to be made from friends of the enemy for charitable purposes.

"IV. If any person upon whom such assessment shall be made shall file with the provost-marshal-general an affidavit that he is a loyal citizen and has been true to his allegiance to the United States, he will be allowed one week to furnish evidence to the board to vindicate his character, and if at the end of that time he shall not be able to satisfy the board of his loyalty, the assessment shall be increased ten per cent. and the levy immediately made.

"V. The supplies so collected will be expended for the object designated, under the direction of the provost-marshal-general, with the advice of the State Sanitary Commission. Where moneys are received in lieu of supplies, it will be expended for them as they may be required. Any money not so expended will be turned over to the sanitary commission for the benefit of sick soldiers. A strict and accurate account of these receipts and expenditures will be kept and returned to these headquarters.

"VI. Any one who shall resist or attempt to resist the execution of these orders will be immediately arrested and imprisoned, and will be tried by a military commission."

On the following day Provost-Marshal Leighton, with a view to provide against the arrest or molestation of the large number of persons who were arriving in the city daily from the South,

"ordered that all persons who may arrive in St. Louis or its immediate vicinity from the States in rebellion against the authority of the government of the United States be required to report in person at the office of the provost-marshal of the city of St. Louis immediately upon their arrival.

"All such persons will be required to register their names and testify upon oath their allegiance to the government of the United States."

A "Ladies' Union Refugee Aid Society" was also formed for the relief of those who had thus sought the protection of the government. The rooms of the society for the reception of the refugees were at No. 68 Elm Street. The officers were Mrs. P. A. Child, president; Mrs. William Barr, secretary and treasurer; and the following directors: Mrs. Dr. Heusler, Mrs. Robert Holmes, Mrs. C. S. Kintzing, Mrs. Ferdinand Meyer, and Mrs. Professor Terrell. The following gentlemen acted as an executive committee: Messrs. Pearly, Childs, Robert Holmes, S. A. Braun, and James E. Cozzens.

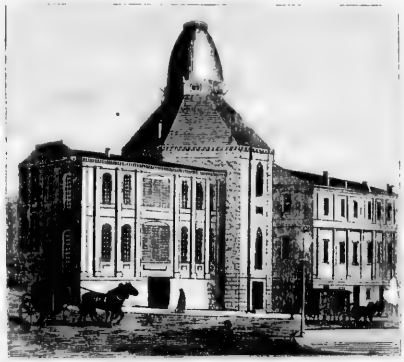
The Southwestern Missouri refugees, for whose benefit the ten thousand dollar assessment was now being made, were quartered in an old mansion located on Elm between Fourth and Fifth Streets. It was furnished with beds and bedding sufficient to accommodate about sixty persons. The colored quarters in the rear of the house were also fitted up for the same purpose. The refugees, who numbered up to this time (December 20th) about six hundred persons, were quartered as fast as they arrived in the city at the mansion, and remained long enough to be fed and clothed, and were then sent forward to their final destinations in Illinois and other States. Their teams while in the city were quartered on a lot near the mansion. Everything was under the sole management of the officers of the Ladies' Union Refugee Aid Society. The sixty-four persons who were assessed for the ten thousand dollars for the benefit of the refugees on December 20th were served with the following notice:

"Office of the Provost-Marshal-General
"of the Department of the Missouri.
"St. Louis, Mo., Dec. 20, 1861.

"—— ——.

"You are hereby notified that, pursuant to General Orders No. 23 from the headquarters of the Department of the Missouri, directing a levy upon the friends of the enemy for charitable purposes, you have been assessed the sum of —— hundred dollars as your contribution in aid of the suffering families driven by the rebels from Southwestern Missouri.

"You will, therefore, pay the amount so assessed, or its equivalent in clothing, provisions, or quarters, to me within five days after the service of this notice upon you, or, in default thereof, execution will be issued against your property for sufficient to satisfy the assessments, costs, and twenty-five per cent. penalty in addition. Should you elect to pay your assessment in clothing, provisions, or quarters, you will give notice of such intention to this office, accompanying the same with an inventory and description of the articles, or of the situation and value of the quarters tendered, which will be accepted, subject to an appraisement of the same by me.



"Bernard G. Farrar, *Provost-Marshal-General.*"

On the same day Col. Farrar directed that all those who were desirous of availing themselves of the privilege contained in Section IV. of General Orders No. 24 should file their affidavits of loyalty in his office on or before the 26th of December.

—The main portion of the prisoners captured by Gen. Pope reached St. Louis on the 22d of December by the Pacific train. They numbered about thirteen hundred men. The train consisted of thirty-six cars, and the prisoners were packed into each car so closely as to leave but little more than comfortable standing-room. They were marched in a close column, which extended from Gratiot Street to the Seventh Street Station, to McDowell's College, where they were quartered. They were escorted by the Twenty-fifth Indiana and the Second Iowa Regiments, followed by a large crowd, which occasionally cheered the prisoners.

Gratiot Street Military Prison, which was used by the Federal authorities during the civil war for the confinement of prisoners charged with offenses against military law, was originally the McDowell Medical Col-

lege. It was situated on the northwest corner of Eighth and Gratiot Streets, and consisted of a large octagonal building of gray stone, with arched
1861. and square windows, "reminding one of portholes in some antiquated fort or castellated structure," surmounted by an oddly-shaped dome, and flanked by two wings, the southern situated directly on the corner of Eighth and Gratiot Streets, and the northern extending to the building of the Christian Brothers. The fortress-like appearance of the central structure gave some color of probability with the credulous to a story which gained a wide circulation that Dr. McDowell, in erecting it, contemplated the possibility of having some day to make a military defense of the structure. This statement, however, is believed to have had its origin in the fact that during the Know-Nothing political troubles Dr. McDowell purchased a number of muskets from the United States arsenal and several small cannon. The muskets were stored in the cupola, and on the breaking out of the civil war Dr. McDowell sent the arms to Memphis, and subsequently went South himself.

VIEW OF THE OLD McDOWELL MEDICAL COLLEGE AND MILITARY PRISON.

The college was established in 1840 by Dr. J. N. McDowell, who, aided by Dr. John S. Moore, of Tennessee, had matured the plan for the institution during the winter of 1839–40. The two physicians procured a charter for the department of Kemper College (afterwards the Poor-house farm), and under its provisions organized. The first session opened in November, 1840, with a class of thirty-seven matriculates, and was held in a building at the corner of Ninth and Cerré Streets, subsequently the Wainwright brewery. The institution was successful from the first, and in 1847 the building at Eighth and Gratiot Streets was erected. During the same year the college became the Medical Department of the State University at Columbia, Mo., and so continued until 1857, when it was organized under another charter. After the commencement of the war the military took possession of the building, using it first as a barracks, and subsequently transforming it into a prison. In 1865, Dr. McDowell returned to St. Louis and reorganized the institution with mostly a new faculty. In 1868 he died, and Professor Paul F. was chosen to fill his place. The college was then removed to the corner of Sixth and Elm Streets. After various changes the institution, under the name of the Missouri Medical College, was transferred to a new building on Twenty-third Street and Christy Avenue, in connection with St. John's Hospital.

Among the graduates of the old McDowell College were Drs. Hodgen, Maughs, Tuholske, Otto, A. W. Wall, S. G. Armor, John J. McDowell, Drake McDowell, T. B. Lester, of Kansas City, and B. Winston and son, of Jefferson City, besides many others.

The occupants of the building during the period of its use as a military prison were captured Confederate soldiers, Southern sympathizers, bushwhackers, spies, mail-carriers and deserters, bounty-jumpers, and other delinquents on the Union side. The prisoners incarcerated there from time to time included many persons of distinction, among them being prominent ministers of the gospel, United States senators, legislators, influential citizens of St. Louis, and leading officers of the Confederate army. Capts. Bishop, Masterson, and Robert Allen were among the commandants. The discipline maintained seems to have been severe, and complaints were frequent, on the part of prisoners, of harsh treatment and insufficiency of heat and food. Hardships, however, are inseparable from prison life, especially in time of war; and there is no evidence before us to show that the administration of the Gratiot prison was more severe than that of the military prisons established by the authorities elsewhere. Its appearance was gloomy and forbidding,—doubly so to those who knew its history, from the fact that it was frequently the scene of military executions.[1]

[1] Capt. Griffin Frost, of Quincy, Ill., who was twice incarcerated at Gratiot prison, kept a diary of his experiences there, in which occur some vivid glimpses of the life at Gratiot. The first entry is as follows:

"January, 1863, Capt. Frost arrived in St. Louis, in company with one hundred and four prisoners, and they were confined the same night in Gratiot Street prison, the weather being extremely cold. The next morning the captain discovered Gratiot to be a very hard place, and fare so rough it seemed an excellent place to starve. A few days thereafter their quarters were changed to the lower room of the square building, which was in many respects a better place, but very cold and im-

E...es of prisoners were of frequent occurrence, but, as a rule, the fugitives were recaptured. On the 24th of February, 1862, the roof of the prison
1861. was set on fire by the inmates, but the flames were extinguished without serious damage. Among the most daring and successful of the prisoners was Absalom C. Grimes, a famous mail carrier and spy, who survived the war, and returned to his former occupation of river pilot. Grimes joined the Confederate service in June, 1861, in company with Samuel Bower and Samuel Clemens, the latter of whom subsequently became the well-known humorist "Mark Twain." After having been captured several times but always escaping, Grimes was finally caught again and placed in Gratiot prison. He thus describes his capture and imprisonment, and we reproduce his narrative almost in full, as presenting a vivid picture of the perils encountered by Southern sympathizers in St. Louis during this period:

"I continued in the secret service until Sept. 2, 1862, when I was captured on the ferry-boat 'Christy' with a heavy mail for 'Dixie.' The circumstances leading to my capture are briefly related. I had been stopping at the Virginia Hotel, on Main Street, St. Louis, where the contraband letters were consigned to my charge. A new clerk named Little was put in charge one day, who mistrusted something was wrong from my asking for letters directed to other names than myself, and he thereupon informed the authorities. To guard against accident I sent my carpet-sack, containing the letters, to the ferry-boat, lying at the foot of Cherry Street, by a bell-boy. I went out at a side-door to keep track of the boy. I saw that he was followed by two men whom I knew to be detectives. They followed him on board the boat. When the bell-boy came ashore the detectives also came ashore. I went round the square to head the bell-boy off and to ascertain from him what the detectives had said to him. While doing so the detectives went back on board the ferry-boat and hid down in the engine-room. The names of the detectives were Newbury and Conners. The boy told me that they had asked whose carpet-sack it was and where it was going to. He told them he did not know whose it was or where it was going to, but was ordered to give it to the engineer. I went back to the ferry landing, waiting for the boat to return from the Illinois shore. I felt well assured that the 'jig was up,' but was determined, if possible, to destroy the mail contained in the carpet-sack. I boarded the boat and looked for the carpet-sack, and also the two detectives. I did not see anything of them, but when the boat had got out into the middle of the stream, I being then in the cabin, the detectives came out from their place of concealment, and wanted to know my name and see my passes for leaving the city. I told them my name was John Cooley, and that I had lots of passes. After showing them some bogus passes they wanted to search my baggage. I told them I had none. They ordered some man standing by, who seemed to be one of the party, to go and get that carpet-sack. They asked me for the key. I told them I would unlock it for them. As soon as I got my hands on it I sprang to the door of the boat and flung it into the river.

...sible to keep warm. There were only two stoves to over a hundred men."

Under date of January 5th he writes: "There are now about eight hundred prisoners in Gratiot, and more coming in every day from all parts of the country. We are allowed only two meals a day, and it keeps the cooks busy to get through with them by dark. Some two or three hundred eat at a time, and the tin plates and cups are never washed from the first to the last table. For breakfast we have one-fifth of a loaf of baker's bread, a small portion of bacon, and a tin cup of stuff they call coffee. For dinner the same amount of bread, a hunk of beef, and a pint of water the beef was boiled in, which is called soup, and sometimes a couple of boiled potatoes, all fished up and portioned out with the hands, knives, forks, and spoons not being allowed. Many leave the table as hungry as they went to it."

On the 7th of January he records that he and his companions had been moved into the officers' quarters, which they found "a great improvement on the old position,—much cleaner, and not so crowded." There were eight of them in a room sixteen feet square, Rev. Mr. McBounds, of Shelbyville, being among the number. The prisoners, however, were accorded the privilege of promenading in a large hall, at the windows of which they watched "for the Southern ladies to pass." On the 12th of January the following entry in the diary was made: "Yesterday (Sunday) was a very lonesome day, nothing to do or read, and had it not been for Father Ryan coming in and preaching us a good sermon, I scarcely know how we would have gotten through the day. We have two or three Methodist ministers in prison who are permitted to preach occasionally. The ladies of St. Louis are very kind; they are constantly relieving our necessities, and seem thankful that it is in their power to do so." Ladies accused of sympathizing with the South, or extending aid and encouragement to the enemy, were also imprisoned at Gratiot prison, their quarters being in the octagonal building.

Capt. Frost was exchanged, but recaptured, and on the 23d of October, 1863, re-entered Gratiot prison and again took up the thread of his prison narrative. He notes the 30th as being a dull day,—"snowing all day and no ladies on the street." Under date of November 9th, he compliments the troops then stationed at the prison, "who," he says, "have seen service and know how to treat a prisoner," and adds that some of the troops who had never been in the field "imagined that prisoners ought to be made to feel the lash on all occasions." In bright contrast with this picture were the visits of ladies who supplied the wants of the prisoners as far as they could. Among them Capt. Frost mentions Mrs. Chouteau, Miss Rayburn, and Miss Laura Elder. On the 11th of January, 1864, Capt. Frost made the following entry: "The prisoners are poorly fed, worse clothed, and nearly suffocated in the impure air. It is said there have been as many as seventeen hundred men at one time in these lower quarters. That number could scarcely find standing room, sleeping would be out of the question; of course they must suffer, sicken, and die."

A curious mistake of the prison authorities, recalling some of the incidents of the French Revolution, is thus described by Capt. Frost under date of May 26th:

"On Tuesday among a lot of prisoners brought down was a man named Highly, who has been the subject of a rather curious mistake. He was arrested, imprisoned, tried, and sentenced to be hung on the 20th of next month, and on being sent down was discovered to be the wrong man. Some one else bearing the same name is the individual sought for."

At this time Capt. Frost's mess consisted of Dr. James Hardinge, Samuel Winston, Joseph Soward, W. H. Selring, Joseph Elliott, James A. Carson, Dr. Victor Jourdan, and Capt. Frost.

While their attention was directed to the floating carpet sack, I drew from my pocket quickly some official documents written on tissue-paper and began to chew them up. One of the
1861. detectives drew a pistol on me, and said if I destroyed any more papers he would shoot me. I told him that was the last I had. I was then brought before Provost McConnell, and while being questioned the carpet-sack was brought in, which was last seen floating in the river, it having been recovered by some boys in a skiff. There were about five hundred letters on love, friendship, and business from parties in St. Louis to their friends in the Southern Confederacy. Several prominent persons were compromised by the letters. These letters were from prominent families, from Governor Trusten Polk's family and many more. All the military letters being on tissue-paper I chewed up, but the balance were saved.

"I was then sent to Gratiot Street prison, Sept. 2, 1862, the date being inscribed on the wall, and brought for trial, on the charge of being a rebel mail-carrier and spy, before a military commission of which Gen. John B. Gray was the president. They brought me in guilty, and I was sentenced to death, the day of execution being fixed for the second Friday in October, 1862. I was placed in solitary confinement, with handcuffs, ball and chain. The room was about fourteen feet square, in the interior of the building, and was formerly used by Dr. McDowell as a back-parlor. There was a window on one side, and on the other side there were folding-doors in the partition separating it from the front parlor on the Eighth Street side, which was used as a female prison. The folding-doors between were securely nailed up. In the female prison were then confined two well-known ladies and two other ladies. One day the ladies handed me a bottle of chloroform, and asked me if I wanted it. I answered it in the affirmative. I took it through the jointure of the folding-doors, which could be pressed apart near the bottom for the purpose." Mr. Grimes then relates how he used the chloroform on his guards, but without accomplishing anything, and continues: "As time wore on I fully matured a plan to escape and regain my liberty. . . . In prosecuting my plan for escape, I during the day would lay on my mattress in one corner of the room and cut a narrow groove across three of the floor planks. This I did in two places, and split the tongues of the grooves with a dirk-knife given to me by the women through a rat-hole in the folding-doors. After I got the planks up in the floor I could replace them, and by inserting thin strips of wood in the cut places, the floor looked perfectly sound and was not observed by the prison officials. I used to open the hole at night, and by crawling along under the floor, which was from two to four feet from the ground, in a northeast direction, brought me immediately under the room where the ladies were in, and with a bar of iron and a large butcher-knife, which had been passed to me by a brother prisoner named Chapman, I commenced making a breach through a wall which would let me into an alley-way. The implements were procured by Chapman from the cook-room. While I was working at the wall, the women, in accordance with a previous understanding, would dance and move the chairs about, and thereby keep up a racket so as to drown any noise I would be making in burrowing a hole through the wall. At the same time one of the women would watch the door and window in my room through a crack in the folding-doors between their room and mine, and with a string attached to the old rocking-chair, she would rock the chair once in a while, which led the guard to believe that I was lying on the mattress and rocking the chair with my foot, the chair being placed directly between the mattress and the window, with a coat thrown over the back of it. The guards could not get into my room without first going to the office and getting Officer Bishop, or his clerk, Streeter, to unlock the door. It took me two nights to cut through the wall, which was of brick eighteen inches thick, and the foundation of stone two feet thick.

"After effecting a breach through the wall, I knew that it would bring me into a narrow alley between the old stone building and McDowell's residence, which was about four feet wide, and filled with cord-wood. Knowing that the wood-pile was there before, I told Chapman to climb over the far end of the wood-pile before roll-call in his room, on the night agreed upon for our escape, and secrete himself, and then to pile the wood back, so I would have no wood-pile to contend with when I came to the alley.

"Our plan being thus nearly completed, the night of the 21 of October, a few days previous to the time fixed for my execution, was set to carry it into effect.

"My plan not being disarranged by any untoward event, I started in the dead of night to carry out the enterprise. I passed down through the hole in the floor underneath the women's prison-room to the breach in the wall, where I disengaged myself from my shackles and a thirty two-pound shell, but found that Chapman, who was by prearrangement to meet me, had piled back of him all the cord-wood he possibly could get back, yet I had to pull nearly half a cord in through the breach in the wall, which I piled up behind me under the floor. I then gained the alley-way, which brought me and Chapman together. We found on the outside of the alley a two-inch poplar partition, which shut off our entrance to the street. I then commenced to cut through the plank partition with a dirk-knife, only having to cut a groove across one sixteen-inch plank two inches thick. It took just twenty minutes to do the job. After the hole was cut, Chapman looked at his watch, and it was just twenty minutes of twelve, midnight. As we had the guard to pass, we waited until twelve o'clock, when the guards would be relieved."

The fugitives succeeded in eluding the guard and effecting their escape.

Many other attempts to "break jail" were made by Confederate prisoners, which were equally daring and ingenious. On the 13th of March, 1862, five Confederate officers made their escape, and on the night of December 12th sixty prisoners escaped by means of a tunnel about eighty feet in length, which had been constructed by one man at a time boring into the dirt, which was put in a tin pan and hauled out with its load by a cord to the beginning of the tunnel. On Christmas-night, 1863, Mr. Grimes, who had been recaptured, and others, made an ineffectual attempt to escape, and were detected and severely punished.[1]

[1] Mr. Grimes' narrative of this episode is as follows:

"On Christmas night, 1863, I cut a hole from my room into the large room below, filled with Confederate prisoners. After cutting my irons off I looked down through the hole, and saw four guards standing there waiting for me. I put the trip off that time, but next morning at eleven o'clock all the convicts in our room, seven in number, were marched down to the yard, where we were handcuffed together round a post, and were kept there till midnight without a mouthful to eat. The same punishment was repeated the next day, but on the morning of the third day the sergeant came into our room, and made a propo-

On the 20th of June, 1864, about fifteen or twenty prisoners overpowered the guard in the jail-yard and succeeded in getting outside the inclosure.

1861. Five of them escaped, two were shot dead, two wounded, and the rest recaptured. The killed were James H. Colclaisair, of Clay County, imprisoned on the charge of bushwhacking, and Leon Schultz, formerly of Arkansas, but afterwards a spy for both the Northern and Southern armies. The wounded were Absalom C. Grimes, mail-carrier, who had been convicted and sentenced to death, and William McElhany. Those who escaped were John C. Carlin, son of Governor Carlin, of Illinois and colonel in the Texas cavalry, Jasper C. Hill, captain in Clark's command, William H. Sebring, lieutenant in Wood's cavalry, Alfred Yates, private in the Third Missouri, C.S.A., and William M. Douglass, citizen.

Mr. Grimes thus graphically describes this desperate affair:

"There were in our room five prisoners, four of us being condemned men, viz.: Colclaisair and Vandever, two of Quantrell's men, Capt. William A. Douglass, and Schultz, who had been a spy and detective on both sides, with serious charges against him. We scrubbed out our room, and were set with three guards into a lower yard while the floor dried. Previous to going there we had formed a plan to attack the guard and try to effect our escape. Five slips of paper were prepared; on three of them were written 'catch the guard;' one of them, 'throw the axe out of the cook-house;' and on one, 'break the gate open.' The slips were put in a hat, and after being shaken up, Colclaisair drew first, 'catch the guard;' I drew next, 'break the gate open;' Vandever drew 'catch the guard;' Schultz drew 'throw the axe,' while Douglass drew 'catch the guard.' On leaving our room for the yard, we all put our hands on a Bible, and pledged to each other to die game or triumph, and that there should be no flinching. Our design was, after disarming the guard stationed in the yard in rear of the prison, which was barricaded by a high plank fence, and smashing down the gate with the axe, to escape. Each person had his duty assigned him.

"On arriving in the yard, Schultz quickly passed into the cook-house, as the guards took their positions in the yard, one in the middle and one at each end. I took my position next to the cook-house window. Colclaisair, Vandever, and Douglass played their part by walking carelessly, each pretending to be reading a paper as each singled out and approached his guard. Shultz threw the axe out of the cook-house window. I picked up the axe immediately, when the first guard ordered me to lay it down and drew his gun on me. At this moment the three prisoners seized the three guards from behind. I threatened the first guard with the axe and made him drop his gun. Douglass picked it up. The other guards seeing that we had them at a disadvantage, dropped their guns and surrendered at discretion by running out of the yard. I then broke open the outside gate with the axe, first smashing the lock. Two guards standing on each side of the gate outside the yard fired upon me, one shot passing through my right leg, to which I had a thirty-two-pound shell attached, and I was disabled from making any further movement. Colclaisair, on getting outside of the fence, was shot by a guard through the head, killing him instantly. Schultz fled in a northwest direction, and ran on two soldiers sitting on an embankment, who having heard the firing and seeing Schultz running, ordered him to stop. He refused, and a soldier shot him through the heart with a revolver, killing him almost instantly. Vandever, having a ball and chain, was overtaken after hobbling off a few hundred yards and brought back to prison. Douglass was the only one who made a clear escape.

"The boys in the strong room No. 2, some of them being condemned men, who had their room open to scrub out just as we were leaving our room for the yard, were notified by me that we were going to make the attack on the guard, and when the yell was given that we had made the attack and the gate open, John Carlin (son of Governor Carlin, of Illinois), Jasper Hill, Mr. Yates, Lieut. Sebring, and Mr. McElhany all made a break for our yard. John Carlin knocked down the guard having him in charge with a brick. Carlin, Sebring, Hill, and Yates all made good their escape, but McElhany had his knee-cap shot off. By this time reinforcements of the guards had arrived and the game was blocked."

"On that all those who would promise not to break out of prison would not be handcuffed around the post. Five of them made the promise, but Lieut. Sebring and myself pledged our word and honor together that we would die at that post before we would engage to make the promise. Therefore every morning we were handcuffed around the post and kept there till twelve o'clock, midnight. On New Year's eve the weather was extremely cold (the next day, Jan. 1, 1864, being the coldest day ever experienced in this latitude), and about ten o'clock we were unexpectedly untied from the post and returned to our room. I was so near freezing to death that I had to be carried to my room, having no overcoat on and wearing thin cloth shoes. I learned afterwards from the old sergeant, Mike Welsh, that the Misses Harrisons, living across the street from the prison, who could see from their upper windows, on commiserating our distressed condition, had gone up after dark to Col. Broadhead, and representing to him the punishment inflicted by Capt. Burns on us, he sent an order to Burns to return us to our rooms. I could not possibly have lived an hour longer."

In June, 1878, a portion of the prison, being considered unsafe, was demolished by order of the fire department, but the ruins of the octagonal tower and the wing adjoining the building of the Christian Brothers are still standing.

—On the 26th of December Gen. Halleck gave notice of the enforcement of martial law in the city, as will be seen by the following "General Orders No. 34":

"I. In virtue of authority conferred by the President of the United States, martial law, heretofore declared in this city, will be enforced. In virtue of the same authority, martial law is hereby declared and will be enforced in and about all railroads in this State.

"It is not intended by this declaration to interfere with the jurisdiction of any civil court which is loyal to the government of the United States, and which will aid the military authorities in enforcing order and punishing crimes.

"II. Commanding officers of troops and of posts will be held responsible that their commands are ready to move at a moment's warning. Excuses for delay and want of preparation will hereafter not be admitted.

"III. Copies of muster-rolls of volunteers must be filed with the adjutant-general of the State to which the troops belong before commissions can be issued to the officers."

—The following "protest" was laid before Gen. Halleck by the persons who had been assessed for the support of Union citizens of the Southwest

1861. who had taken refuge in St. Louis:

"St. Louis, Dec. 26, 1861.

"To Maj.-Gen. H. W. Halleck, *Commanding the Department of Missouri:*

"Sir,—The undersigned, citizens of the State of Missouri, residing in the city of St. Louis, have received from the provost-marshal-general of Missouri notices, by which we are respectively informed that, 'pursuant to General Orders No. 24 from the headquarters of the Department of Missouri, directing a levy upon the friends of the enemy for charitable purposes,' we have been assessed in sums varying in amount from one hundred to four hundred dollars, as our 'contribution in aid of the suffering families driven by the rebels from Southwestern Missouri.' Against this harsh, illegal, and most extraordinary measure we deem it our imperative duty to enter this our respectful but earnest and solemn protest. We do so for the following reasons:

"On the 3d day of August, 1861, Judge Hamilton R. Gamble, on assuming the duties of Provisional Governor of this State, to which he was called by the State Convention, did, by his proclamation of that date addressed to the people of Missouri, set forth in clear and explicit terms the object for, and the principles on which, such provisional government should be administered.

"Among other things, it was in that paper promulgated that 'the choice of temporary Governor gives the further assurance to all that every effort will be made to stop the practices on the part of the military which have occasioned so much irritation throughout the State, such as arresting citizens who have neither taken up arms against the government nor aided those who are in open hostility to it, and searching private houses without any reasonable ground to suspect the occupants of any improper conduct, and unnecessarily seizing or injuring private property. Such acts must be, and will be, discountenanced: and there is every reason to believe, from a general order recently issued by Lieut.-Gen. Scott, and from the known disposition of Maj.-Gen. Fremont, whose command embraces Missouri, that such oppressive conduct on the part of the military will in a short time be arrested.

. . . "'Civil government in this State has no concerns with men's opinions, except to protect all in their undisturbed enjoyment. It is only when they become the causes of acts that they bring those who entertain them into any responsibility to the law. While this freedom of opinion is the right of all, and while it is the duty of each to respect this right in others, it is plainly the duty of the government to suppress, as far as practicable, all combinations to violate this right, and all violence arising from a difference of opinion.'

"This proclamation, in its most material part,—namely, that respecting persons who had taken up arms against the government,—was sanctioned by the President of the United States, as announced by the publication therewith of the dispatch from the Secretary of War to the author of the proclamation.

"Furthermore, under date of Nov. 26, 1861, a few days after assuming command of this department, you issued your General Orders No. 8, from which we had reason to presume that to the fullest extent we should be protected in the enjoyment of our right of property. In that order you deemed it proper to admonish the army under your command respecting the 'numerous cases of alleged seizure and destruction of private property in this department,' showing an outrageous abuse of power and a violation of the laws of war; and, after prescribing the mode of seizing private property when deemed 'necessary for the subsistence and transportation of the troops,' you proceed to say,—

"'The seizure and conversion of the private property of the enemy (when not required for immediate supplies, as provided in the foregoing paragraph) is justifiable only in particular cases, provided for by the laws of the United States and the general laws of war, and should never be made except by the orders of the officer highest in command, who will be held accountable for the exercise of this power. Great caution should be used in this matter, as much injustice has been done to individuals who are not enemies, and much discredit cast upon our patriotic army by excesses committed by unauthorized persons pretending to act in the name of the United States.'

"On the 12th day of December, inst., you issued the order following: [Here follow General Orders No. 24, of Dec. 12, 1861, which can be found on a preceding page.]

"We have thus placed before you those parts of the proclamation above recited, extracts from General Orders No. 8, and General Orders No. 24 in full, to the end that you may the more readily discover the reasonableness of the ground on which we claim that General Orders No. 24 are in conflict with the assurance theretofore given out to the people of this State.

"But this order, and the proceedings taken under it against us, are open to objection upon weightier and still more serious grounds. They violate the provisions of the fundamental law of the land,—a law to you as well as to us,—prescribing the duties of the citizen, and clearly defining and limiting the powers of the government. That law provides that no person shall be deprived of life, liberty, or property without due process of law;' that the 'accused shall enjoy a speedy and *public* trial by an *impartial* jury, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.'

"And yet, in disregard of all these great and dearly-cherished principles of constitutional freedom, at a time when the Federal Congress is in session to enact laws, if new ones be deemed necessary, the courts in full operation to enforce them, civil officers with all the power of the army and navy at call to aid them in the execution of process, and all branches of government in full and harmonious operation, we have been tried before a secret inquisitorial tribunal, on what charge we know not, and condemned to pay a forced contribution, arbitrarily levied upon us for alleged charitable purposes. In case of failure to liquidate the amount adjudged against us within the number of days allowed for that purpose our property is threatened to be seized and sacrificed by sale at auction, to satisfy such demand and twenty-five per cent. additional. And what is the remedy prescribed for those considering themselves aggrieved by the secret edicts and decrees of this tribunal? They are allowed one week within which 'to furnish evidence to the board to vindicate their character,' and if at the end of that time they fail to satisfy those judges who have already prejudged their cases of their *loyalty*, they shall be adjudged to pay the further sum of ten per cent. on the sum assessed. How '*loyalty*' is to be defined, by what particular standard it shall be measured, and under what rules and by what evidence it will be required to be established we are left to conjecture. And why, we respectfully inquire, are we thus to be abused? Not for anything we have done, but because of acts alleged to have been committed by persons to us unknown, remote from the locality in which we move, and over whose acts we could have exercised no control whatever.

"If we have in any manner transgressed the law, we are

ready to make all the atonement which the violated law demands. Its avenging ministers are near to try, condemn, and punish us conformably to the established forms and
1861. usages of law. There exists no necessity, in our opinion, for overriding in the way proposed the great principles of the fundamental law, setting aside all the restraints and limitations it so guardedly places upon power, and the inaugurating new tests and arbitrary modes for ascertaining guilt. There exists no necessity for such summary proceedings. Within this jurisdiction the ordinary course of justice, except so far only as it has been interfered with by the military authority, has been, and is now, entirely free and unobstructed. All officers of the government, both judicial and ministerial, are in the full exercise of all their official functions, so that all persons charged with having offended against law may be as speedily tried, and, if found guilty, as surely and as certainly punished as when peace prevailed throughout the State. If, then, it be charged against us that we have in any way sinned against the Constitution, or violated any known provision of the law, in God's name let us be tried under and according to the established forms and prescribed rules, and under the solemn sanctions of that Constitution and those laws. Vouchsafe us a speedy and *public* trial by an *impartial* jury; make known to us the nature and cause of the accusations against us; let us be confronted with our accusers, that we may see the hand that would smite us, and do not leave us and all we own to the mercy of a Star Chamber court of inquiry, where malice may be the lurking motive that determines the question of guilt and pronounces the judgment that may loom us and ours to want and beggary. If two or three military officers of the United States, or other persons designated for such purpose, may meet in secret, and, without notice, single out such citizens as they may choose upon whom to levy forced contributions, and arbitrarily fix the amount of the same, what man who may perchance hold political opinions not altogether acceptable to the tribunal thus constituted can consider himself secure in his right of liberty or property? If the military, by the authority of the bayonet, may to-day force from us a contribution of hundreds of dollars, they may to-morrow, by the same authority, force from us thousands of dollars, or all we may own, and cast us and ours paupers on the world's wide common.

"We, moreover, claim it to be our right to dispose of and distribute in our own way such charity as it may be in our power to bestow, and respectfully deny the power of the government of the United States, or that of any officer thereof, civil or military, to assess us for such purposes, and protest against the exercise of any such power.

"We do not mean by anything we have already said to be understood as conceding that any 'necessity' can justify the assumption by any officer of the government of powers not given by law. The duty of obedience to the Constitution is due alike from the official and the citizen, from those whose privilege it may be to govern as well as those who are governed, and to admit the validity of a plea of necessity to justify the agents of the government in a plain violation of the Constitution, or in the assumption of powers not authorized thereby, 'is to say as explicitly as could be said in words that it justifies the Federal authorities in breaking up the government themselves under the guise of preventing it being broken up by others. The forms of government may outlast such a catastrophe, but the Federal government, known to and created by the Constitution, must end with it. What remains is revolution in the garb of government, and depending for its legitimacy upon bayonets.'

"In conclusion, we do not mean to resist the proceedings against us under the orders complained of, unjust and oppressive as we deem them to be. We are powerless in the premises. You have the armed hand to enforce your orders and decrees. We are defenseless, and resistance would be idle. We cannot, however, give to your authority in the premises even such recognition as might be implied from our voluntary payment of the sums required of us. We have, therefore, concluded respectfully to protest and remonstrate against it, and to decline paying the same.

"When the constitutional supremacy of the civil over the military power shall again be established, we shall prefer our appeal to it for a vindication of our violated rights.

"Yours, very respectfully,

"Samuel B. Churchill, William M. McPheeters, Louis C. Garnier, George Kingsland, Mrs. Trusten Polk, Erastus Wells, L. Ch. Boislinniere, Charles McLaran, Juliette B. Garesche, D. H. Armstrong, S. S. Farrington, Robert M. Renick, E. C. Sloan, William F. Ferguson, J. W. Wills, John Wickham, Robert M. Funkhouser, Daniel H. Donovan, D. Robert Barclay, Samuel Robbins, L. Dorsheimer, Wiley Rudolph, William G. Clark, Henry B. Belt.

"The undersigned begs leave to annex his individual respectful protest, and to suggest that the adage 'charity begins at home' might with particular grace be applied to the inhabitants of a city renowned for her unbiased benevolence, which now, already in the eighth month, with unmurmuring loyal fortitude, groans under the centre weight of war and blockade.

"Very respectfully,

"Alexander Kayser."

—On the 18th of December, Gen. Halleck released from prison sixteen runaway negro men, being the property of alleged Southern sympathizers. They were confined in the city jail, and were advertised for sale by the sheriff, "in pursuance of the provisions of the statute of the State of Missouri concerning slaves."

—On December 31st, Provost-Marshal G. E. Leighton issued an order that "from and after this date the shipment of printers' ink and book, manilla, news, or other paper for printing purposes from this city to all points in the State of Missouri is prohibited, except under special permits issued from this office."

—Provost-Marshal G. E. Leighton, on Jan-
1862. uary 5th, issued an order directing that

"from this date all saloons for the sale of intoxicating liquors in the city of St. Louis are required to be closed, and all sales to cease at eleven o'clock P. M. All special permits heretofore issued allowing saloons to be kept open until a later hour are revoked. No exceptions whatever will be made to this order, and in case of any violation of its provisions the house or saloon will be permanently closed.

"The police of the city, as well as the United States police, are from this date authorized and empowered to arrest soldiers guilty of riotous or disorderly conduct, or found in a state of intoxication in the city, whether with or without leave of absence from their quarters, and confine them in the military prison, reporting to the officer in charge a statement of the cause of the arrest.

"The sale of intoxicating liquor to soldiers already under its influence, the harboring of soldiers absent from their commands without proper leave, permitting houses to become places of resort for soldiers for drinking, gaming, or other illegal purposes will be regarded as serious offenses, and visited with severe punishment."

—On the 8th, Provost-Marshal-General B. G. Farrar

"ordered that from and after this date the publishers of newspapers in the State of Missouri (St. Louis City papers excepted) furnish to this office, immediately upon publication, one copy of each issue for inspection. A failure to comply with this order will render the newspapers liable to suppression.

1862.

"Local provost-marshals will furnish the proprietors of newspapers with copies of this order, and attend to its immediate enforcement."

—On January 8th, Gen. Halleck promulgated the following regulations for the transportation and travel of the Department of the Missouri:

"1. From and after this date the transportation and travel of the Department of the Missouri, by land and water, will be under joint military and custom-house control and surveillance.

"2. No steamboat nor other craft will be permitted to carry freights or passengers except those commissioned by the quartermaster in charge of transportation in this city; and no boat or other craft shall be so commissioned which is not duly enrolled and registered at some custom-house on the Ohio River or the Mississippi above Cairo.

"3. No railroad car, stage-coach, or vehicle running west or westwardly from the Mississippi River will be permitted to convey freights or passengers without strict compliance with regulations of the Treasury Department at Washington, which require that all freights of whatever nature, except such as may be under military orders, shall be covered by a custom-house permit, and that all baggage of travelers shall be carefully inspected and duly sealed by a custom-house officer.

"4. Every person or company owning a steamboat or other craft, and desiring to do business on the rivers from and to the port of St. Louis, will, immediately after the publication of these regulations, be required to make written application to the quartermaster in charge of transportation in this city for permission, accompanying the same with a statement under oath of the true owner or owners of said steamboat or craft, and the amount of interest of each person or company in said steamboat or craft, whether in trust or otherwise, their place of residence and of business, and also the name and residence of each officer and pilot employed or to be employed on the same; and any change in the ownership of said steamboat or craft, or in the officers or pilots thereon, shall also be reported in like manner.

"5. All officers, pilots, and river employés on any steamboat or craft shall take the following oath, to wit:

"'I solemnly swear that I will bear true allegiance to the United States, and support and sustain the constitution and laws thereof; that I will maintain the national sovereignty paramount to that of all State, county, or confederate powers; that I will discourage, discountenance, and forever oppose secession, rebellion, and disintegration of the Federal Union; that I disclaim and denounce all faith and fellowship with the so-called Confederate States and Confederate armies, and pledge my honor, my property, and my life to the sacred performance of this my solemn oath of allegiance to the government of the United States of America.'

"6. When application has been made agreeably to the foregoing rule, it shall be the duty of the quartermaster in charge of transportation to institute such further investigation as he may deem requisite as to the character and loyalty of the owner or owners and the officers and pilots of such steamboat or craft, and if they be found unexceptionable, he shall issue his commission to the owners or masters thereof to carry freights and passengers on the rivers within this military district; but such commission shall entitle no boat to receive freight, other than such as may be under military orders, which is not covered by a custom-house permit, and every boat must take out the customary clearance before leaving this port.

"7. The object of the foregoing is to suppress and entirely prevent any aid or assistance to or communication with any person or persons (directly or indirectly) disloyal to or in arms against the Federal authority of the United States.

"8. If any owner, officer, or pilot of any steamboat or other craft shall do any act contrary to the object expressed in the foregoing section, such act shall cause the forfeiture of said steamboat or craft to the Federal government, and such owner, officer, or pilot be subject to the pains and penalties prescribed by the articles of war for giving aid to the enemy.

"The articles of war referred to above are in the following words:

"'ART. 56. Whosoever shall relieve the enemy with money, victuals, or ammunition, or shall knowingly harbor or protect an enemy, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.

"'ART. 57. Whosoever shall be convicted of holding correspondence with or giving intelligence to the enemy, either directly or indirectly, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.'

"At any point within this military department where there may be no inspector or other custom-house agent, it shall be the duty of the officer in command of the nearest military post to act in the place of such inspector or agent; and when any duly appointed custom-house officer at any point shall need assistance to enforce the revenue laws of the United States or the instructions of the Treasury Department, and make application for the same, it shall be the duty of the military officer nearest in command to render such assistance."

In order to carry out these regulations and to accommodate the traveling public, and to avoid any unnecessary delay to the several railroads, R. J. Howard, the collector of St. Louis, made the following arrangements:

"The custom-house inspector, Henry S. Lasar, will visit the following hotels, viz.: Planters', Barnum's, Everett, Virginia, Monroe, St. Charles, and the City Hotel, between the hours of 6 and 10 P.M., where and when he will examine and seal all the baggage destined for the Iron Mountain, Pacific, and North Missouri Railroads.

"He will also be ready to attend to all orders left at the custom house office for him to visit private dwellings, in order there, too, to examine and seal the baggage of travelers ready for reception at the depots of the above-named railroads. The hours alloted for this purpose will be from 10 A.M. till 3 P.M., and orders to this end should be left sufficiently in time at the herein-named office previous to the departure of those railroad trains."

—On January 6th, Brig.-Gen. Schuyler Hamilton announced, through his assistant adjutant-general, J Shaw Gregory, that he had entered upon the command of the St. Louis district, which included the "country bounded by the Missouri, Mississippi, and Maramec Rivers, including the line of the railroad from Pacific to Rolla, as far as Linsey's Station, and a line drawn through that point from the mouth of the Osage

River to the Maramec River, excepting the camp of instruction at Benton Barracks."

—In view of the fact that the organization
1862. of the six months' militia entailed great expense upon the State without any corresponding benefit, the Governor, through Chester Harding, Jr., his adjutant-general, on January 14th, ordered that this class of troops be disbanded on the 25th of January. In this order the following instructions were given:

"Commanding officers of the six months' militia will muster their commands for pay and discharge upon the 25th day of January, 1862, and will be prepared to deliver up all property of the State in their control, and to account for such as has been lost, consumed, or destroyed in the service. Upon compliance with these requirements, or as soon thereafter as the rolls can be examined, the officers and men will be paid by the State.

"Companies which shall report themselves ready for muster into the State service for the term of the war, in accordance with the conditions of the agreement made between the United States and the government of this State, as set forth in General Orders No. 1, series of 1861, will be accepted and mustered without delay. After muster they will be subsisted, clothed, armed, and paid by the United States.

"The following places are designated as points at which the six months' troops will be mustered out of service on the day above named, viz.: St. Joseph, Cameron, Chillicothe, Macon City, Mexico, and Louisiana.

"Officers commanding these troops will march their men to the nearest and most convenient of the above-named places, in time to be present at the muster for pay and discharge as above ordered."

—The aggregate of all the claims filed up to Jan. 18, 1862, before the commission appointed to investigate claims on the government arising out of the war in the Department of the West which accrued prior to Oct. 14, 1861, amounted to $9,667,371.55.

The following persons were employed by the commission in addition to those whose names have already been given:

William H. McHenry, commissioner to qualify witnesses, etc.; R. R. Hitt, phonographic reporter; R. C. Totten, clerk to receive claims; P. A. Hall, expert in railroad matters; John B. Turner, expert in railroad matters; Edward W. Wallace, clerk of railroad accounts; C. Woodward, expert in steamboat matters; Benson S. Hopkins, expert in mercantile accounts; P. B. Haagena, clerk in mercantile accounts; James H. Bowen, compiler of receipt register; William B. Alford, certificate and copying clerk; G. A. Gannett, certificate and copying clerk; Lawrence D. Alexander, certificate and copying clerk; J. J. Wilcox, certificate and copying clerk; O. T. Fishbuck, certificate and copying clerk; John P. Camp, messenger; Charles Kick, janitor.

The following is a list of the claims which came under the head of moneys loaned and taken by government. They were among the first to be filed, and were soon after allowed and paid in full, with legal interest added in cases where loans had been made in coin:

Boatmen's Saving Institution, $154,300.55; Buildings and Savings Association, $127,613.17; Mechanics' Bank, $36,000; Merchants' Bank, $75,000; German Savings Institution, $10,000; Commercial Bank of Kentucky, $6100; Robert S. Hays, $42,000; Webb & Kaime, $5000; Southern Bank, $10,000; Belcher's Sugar Refining Company, assignee, $10,000; Partridge & Co., $5000; People's Savings' Association, $10,000; Reed & Co., $4500; McMechan & Ballentine, $2500; George D. Hall, assignee, $10,000; Bank of Missouri, $291,103.50; State Savings Association, assignee, $37,235.06; Exchange Bank, $141,337.74; Union Bank, $62,877.50.

—The following special order was issued by Gen. Halleck on January 26th:

"I. The president, secretary, librarian, directors, and other officers of the Mercantile Library Association of this city, and also the president, secretary, directors, and other officers of the Chamber or Chambers of Commerce of this city, are required to take and subscribe the oath of allegiance prescribed by Article VI. of the State ordinance of Oct. 16, 1861. Any of the above-named officers who shall neglect to file in the office of the provost-marshal-general within ten days of the date of this order the oath so subscribed will be deemed to have resigned, and any one who, after neglecting so to file his oath of allegiance within the time prescribed, shall attempt to exercise the functions of such office will be arrested for contempt of this order and punished according to the laws of war.

"II. It is officially reported that carriages bearing the enemy's flag are in the habit of driving to the vicinity of the military prison in McDowell College. The commanding officer of the prison-guard will seize and take possession of any carriage bearing an enemy's flag, and the horses, carriages, and harness will be confiscated.

"III. It is also officially reported that certain women are in the habit of approaching the vicinity of the military prison and waving hostile flags, for the purpose of insulting our troops and carrying on communications with the prisoners of war. The commanding officer of the prison-guard will arrest and place in confinement all women so offending.

"IV. Any carriage or other vehicle bearing a hostile flag in the city will be seized and confiscated. The city police and patrol guards are directed to arrest any persons in vehicles under such flag, and also any person wearing or displaying a hostile flag in the city."[1]

—The Governor, on February 1st, appointed a medical board, to consist of Dr. John C. Hodgen (president), Dr. Charles Rosch, and Dr. S. H. Melcher, to convene in St. Louis on February 4th, for the purpose of examining candidates for appointments as surgeons to the State troops.

—On the 2d of February, Gen. Halleck issued the following "General Orders No. 29:"

"I. The president, professors, curators, and other officers of the University of Missouri are required to take and subscribe the oath of allegiance prescribed by the sixth article of the State ordinance of Oct. 16, 1861, and to file the same in the office of the provost-marshal-general in this city. Those who

[1] The "Union Merchants' Exchange" having exhibited to Gen. Halleck their book of membership, in which each officer and member had signed a pledge equivalent to the oath of allegiance required by the above orders, the latter, so far as they related to its officers and members, were rescinded.

fail to comply with this order within the period of thirty days will be considered as having resigned their respective offices, and if any one who fails shall thereafter attempt to ob-
1862. tain pay, or perform the functions of such office, he will be tried and punished for military offense. This institution having been endowed by the government of the United States, its funds should not be used to teach treason or to instruct traitors. The authorities of the university should, therefore, expel from its walls all persons who by word or deed favor, assist, or abet rebellion.

"II. The presidents and directors of all railroad companies in this State will be required to take and subscribe the oath of allegiance, in the form, within the time, and under the penalties prescribed in the preceding paragraph. They will also be required to file bonds for such sums as may be designated by the provost-marshal-general that they will employ no conductors, engineers, station-masters, or other officers, agents, or employés who have not taken the oath of allegiance, and who are not loyal to the Union.

"III. No contracts will hereafter be made by quartermasters or commissaries in this department with persons who do not take and subscribe to an oath of allegiance similar to that prescribed by the act of Congress approved Aug. 6, 1861. Purchasing officers are prohibited from making purchases of persons of known disloyalty to the government. When articles necessary for the public service are held only by disloyal persons, and cannot be purchased of Union men, the fact will be reported to these headquarters, when the proper instructions will be given.

"IV. All clerks, agents, and civil employés in the service of the United States in this department will be required to take and subscribe the oath prescribed by the aforesaid act of Congress. The attention of all military officers is called to this order, and any one who shall hereafter keep in the government employment persons who fail to take the said oath of allegiance, or who announce and advocate disloyalty to the Union, will be arrested and tried for disobedience of orders.

"V. It is recommended that all clergymen, professors, and teachers, and all officers of public and private institutions for education, benevolence, business, and trade, who are in favor of the perpetuation of the Union, voluntarily subscribe and file the oath of allegiance prescribed by the State ordinance, in order that their patriotism may be known and recognized, and that they may be distinguished from those who wish to encourage rebellion, and to prevent the government from restoring peace and prosperity to the city and State."

—On February 3d the "Ladies' Union Aid Society" made their semi-annual report, in which they presented the following statistics: From the organization of the society, Aug. 2, 1861, to Jan. 1, 1862, their receipts were twelve hundred and forty dollars and fifty cents in cash, besides donations of clothing material, etc. The society was in successful operation under the supervision of Mrs. Alfred Clapp, president; Mrs. S. C. Davis, vice-president; Mrs. S. B. Kellogg, treasurer; Miss H. A. Adams, secretary; Mrs. T. M. Post, Mrs. M. O. Darrah, Mrs. Willys King, Mrs. C. S. Greeley, prudential committee; Mrs. Joseph Cranshaw, Mrs. C. L. McMurray, Mrs. N. B. Thayer, Mrs. N. H. Clark, Mrs. Robert Anderson, Mrs. J. E. D. Cousins, and Miss Sarah Tildon, managers; Mrs. N. H. Clark, Mrs. S. F. Thayer, distributors; Miss Bella Anderson, inspector.

—*The Republican* of February 4th contained the following:

"The sale of the property levied upon to satisfy the assessments against sundry citizens, as friends of the enemy, for the relief of the Union refugees from Southwest Missouri, commenced yesterday at Morgan's auction rooms, on Fourth Street. An immense crowd, more than could obtain entrance, was present yesterday morning.

"The articles sold were those which had been advertised in the papers, being the property of some thirteen or fourteen citizens of secession proclivities, viz.: Samuel Engler, John Kennard, Sr., John Kennard, Jr., Wm. M. McPheeters, D. Robert Barclay, D. H. Armstrong, Chas. L. Boisliniere, R. M. Funkhouser, Geo. Kingsland, Alexander Kayser, Charles McLaren, Andrew Park, Trusten Polk, and Mrs. Rebecca Sire. The amount of the assessment on each ranged from one hundred to five hundred dollars (the majority being assessed for three hundred), with twenty-five per cent. penalty and costs of sale, storage, etc. Only so much of the property of each was sold as would satisfy the levy. Three lots belonging to Messrs. Boisliniere, McPheeters, and Kingsland did not bring sufficient to liquidate the amounts charged against these gentlemen, but in the other cases only a portion of the articles seized were put up.

"As a general thing, considering the times, the furniture, etc., brought fair prices, though in some instances great bargains were had. An elegant piano, nearly new, said to have cost Mr. Kayser between five and six hundred dollars in Europe, was sold for two hundred and forty dollars. Another, for which Mr. Polk is reputed to have given over a thousand, went for three hundred and thirty dollars. A set of brocatelle rosewood furniture (sofa, arm-chairs, and fancy chairs), owned by Mr. Park, brought one hundred and forty-five dollars. A lot of miscellaneous books, one hundred and ten in number, the property of Mr. Funkhouser, netted about twenty-nine dollars. Some of the fine carpets, velvet and Brussels, were sold low, whilst others brought full retail prices."

—Gen. Halleck, on February 3d, adopted the following tariff, prepared by Maj.-Gen. Sterling Price, for the exchange of prisoners:

"Where the same grades cannot be exchanged for each other, two of the next lower grade will be substituted; that is, one major-general for two brigadiers, or four colonels, or eight lieutenant-colonels, or sixteen majors, or thirty-two captains, or sixty-four lieutenants, or one hundred and twenty-eight non-commissioned officers, or two hundred and fifty-six privates. In this tariff no distinction will be made between first and second lieutenants, or between sergeants and corporals. Of course alterations of grades can be made, when necessary, on the same basis. Musicians, wagoners, and others will be exchanged as privates or non-commissioned officers, according as they are rated in our service."

—On February 5th the *Republican* announced that a writ of attachment had been issued by the provost-marshal-general, and was

"executed on Tuesday afternoon upon Dr. William Johnson, assessed under Order 24 for the sum of four hundred dollars. The officers proceeded to his residence on Pine Street near Thirteenth, and seized sundry articles of household furniture, consisting of two sofas, three sofa-bottom chairs, one easy-chair, six cane-seat chairs, one marble-top centre-table, one mirror,

two Brussels carpets, two window-blinds, one bedstead, one wash-stand, and one lounge.

"Similar writs were also executed upon property belonging to Gen. D. M. Frost and Mrs. T. C. Beckwith. The assessment of Gen. Frost, with costs, amounts to seven hundred and fifty dollars. Mrs. Beckwith's assessment was for but ninety dollars."

1862.

On the 11th of the same month the same paper said:—

"Another sale of property, seized from certain citizens of St. Louis, came off yesterday at Morgan's auction-rooms, No. 107 Fourth Street. The sale was attended by a large crowd. In addition to the seized St. Louis property were sold some contraband goods sent here from Sedalia."

The following is a list of the owners of the property that was sold: A. Kayser, T. Polk, S. Robbins, W. G. Clarke, Dr. Johnson, John Wickham, J. W. Wills, George Kingsland.

—The following "circular" was issued by Gen. Halleck on February 14th:

"I. All persons who are known to have been in arms against the United States, or to have actively aided the rebellion, by *word or deed*, are to be arrested. Those who are accused of acts in violation of the laws of war, such as the destruction of railroads and bridges, or private property, firing into trains, assassination, etc., will not be released on any terms, but will be held for trial before a military commission.

"II. Notoriously bad and dangerous men, though no specific act of disloyalty can be proved against them, will be kept in custody, and their cases referred to the commanding general.

"III. Prisoners not included in either of the above classes may be released upon subscribing to the usual oath, and giving a sufficient bond, with good security, for their future good conduct.

"IV. The bond and oath should be of the form inclosed herewith. The amount of the bond should in no case be less than one thousand dollars, and in some cases should be much larger, varying according to the wealth, influence, and previous conduct of the party. The security should in preference be a secessionist.

"V. Persons now engaged in recruiting for the rebel army, also those enrolled for the rebel service, will be arrested and held as prisoners of war. In addition to this all property belonging to such persons, and which can be used for military purposes, such as horses, mules, harness and wagons, beef cattle, forage, etc., will be seized and turned over to the provost-marshal, to be disposed of according to the orders of the commanding general of the department.

"VI. Where persons who have been in the rebel service voluntarily come forward and take and subscribe to the oath of allegiance and parole, and are released on bonds, all property not of a military character taken from them will be restored."

On the same day he issued the following "General Orders No. 39," in relation to the courts and judicial officers of the city:

"I. Information having been received that certain judicial officers intrusted with the administration of the criminal laws and ordinances in this department have misunderstood the objects and purposes of the establishment of martial law in this city of St. Louis, and in consequence of such misunderstanding have failed to enforce all those laws and ordinances, and as crimes and misdemeanors should at all times be strictly suppressed, it is hereby enjoined upon all such civil officers, whether as judges, attorneys, sheriffs, marshals, coroners, clerks, justices of the peace, presiding officers of police courts, constables, or members of the police, to strictly enforce all criminal laws and ordinances; to have arrested, tried, and punished in the courts established in the State, and in the manner prescribed by the laws of the State, all persons guilty of any violation of such laws and ordinances, in the same manner as if martial law had not been declared to exist.

"II. And it is especially enjoined upon the judge of the St. Louis Criminal Court to have a full complement of grand jurors at every sitting of the court; to strictly charge said grand jurors to diligently inquire into all crimes and misdemeanors under the laws of the State that may come to their knowledge, and present for trial such offenders known to them.

"And the assistant circuit attorney for this county is particularly required to faithfully aid and assist the said grand jurors and officers of the said court in the discharge of their duties, and to strictly perform all charges devolving upon him by the laws of the State.

"III. By the establishment of martial law in the city of St. Louis it is not designed to interfere with or suspend the operation of the laws and ordinances of the State or city with reference to crimes and misdemeanors, nor the remedies and process of the civil courts, except so far as the interests of the government imperatively require. The civil authorities who attempt to interfere with the execution of military orders emanating from these headquarters will be punished for military offense, but in all other cases it is their duty to enforce the laws and punish crimes and misdemeanors."

—Brig.-Gen. Schuyler Hamilton, who had been in command of the St. Louis district, was, by order of Gen. Halleck, on February 15th, relieved of his command, and Brig.-Gen. John M. Schofield on the same day assumed command of the district.

—In February the following places were designated as recruiting and mustering stations for the Missouri State militia:

St. Louis, St. Charles, Hudson, Louisiana, Columbia, Palmyra, Alexander, Chillicothe, Cameron, St. Joseph, Lexington, Kansas City, Sedalia, Pilot Knob, Greenville, Linn Creek, Springfield, and Boonville.

—Considerable excitement was created on the Levee on the 17th of February, in consequence of the seizure of a large number of steamboats by the government, for the purpose of transporting troops and army supplies. The boats seized were the "Northerner," "Pembina," "John J. Roe," "D. G. Taylor," "War Eagle," "Henry Clay," "John D. Perry," "John H. Dickey," and "Edward Walsh."

—The Confederates captured at Fort Donelson were brought to St. Louis on or about February 20th. The following steamboats, as will be seen, brought up 10,685 men: "Empress," 2485; "Gladiator," 1100; "D. A. January," 1200; "White Cloud," 1000; "Emma Duncan," 600; "Tecumseh," 800; "Lebanon," 600; "Stephen Decatur," 500; "Alex. Scott," 1800; "Dr. Kane," 600.

In addition to these, about 2000 were sent to Chicago by the Illinois Central Railroad. As fast as those who arrived by steamer were landed
1862. at St. Louis, they were forwarded by railroad to Springfield, Chicago, Indianapolis, Detroit, and other points.

—On February 20th, Gen. Halleck issued the following important "General Orders No. 44:"

"I. In consideration of the recent victories won by the Federal forces, and of the rapidly-increasing loyalty of citizens of Missouri, who for a time forgot their duty to their flag and country, the sentences of John C. Tompkins, William J. Forshey, John Patton, Thomas M. Smith, Stephen Scott, George H. Cunningham, Richard B. Crowder, and George M. Pullium, heretofore condemned to death, are provisionally mitigated to close confinement in the military prison at Alton. If rebel spies again destroy railroads and telegraph lines, and thus render it necessary for us to make severe examples, the original sentence against these men will be carried into execution.

"II. No further assessments will be levied or collected from any one who will now take the prescribed oath of allegiance.

"III. Boards or commissions will be appointed to examine the cases of prisoners of war who apply to take the oath of allegiance, and on their recommendation orders will be issued from these headquarters for their release."

—At the request of the acting Governor of Missouri, Gen. Halleck, on the 15th of February, ordered that in all future elections in the State, whether for State, municipal, county, or town officers, every voter should be required to take the oath of allegiance prescribed by the State Convention of Oct. 16, 1861. Officers at the polls were to see that this order was executed, and if they received the votes of persons who had not taken the oath, they were to be arrested and tried for a military offense, and the election was to be declared null and void.

—On the 22d of February the members of the St. Louis Chamber of Commerce contributed one thousand dollars for the relief of the sick and wounded soldiers under Gen. Halleck's command. The money was handed over to James E. Yeatman, president of the Western Sanitary Commission.

—About two hundred and fifty sick of the Confederate prisoners captured at Fort Donelson were quartered in the large military hospital which then stood at the corner of Fifth and Chestnut Streets, and received very kind treatment from the hospital physicians and nurses and members of the Sanitary Commission.

—The Union residents of St. Louis desiring to testify their appreciation of the services of Gen. Halleck before his "departure for the more immediate field of war," tendered him on the 3d of March a public dinner through the following persons:

Willard P. Hall, acting Governor of Missouri, Daniel G. Taylor, mayor of St. Louis, C. B. Lord, J[illegible]n How, N. Paschall, Hudson E. Bridge, William McKee, Charles G. Ramsay, John R. Shepley, William M. McPherson, Lewis V. Bogy, Isaac H. Sturgeon, Hugh Campbell, Walter B. Foster, George R. Taylor, James H. Lucas, C. S. Greeley, John Cavender, George Partridge, John M. Taylor, Amos Cutter, George K. McGunnegle, James E. Yeatman, S. M. Breckinridge, Benjamin Farrar, James O. Broadhead, Henry Hitchcock, Henry J. Moore, John O'F. Farrar, Thomas Allen, James Harrison, J. O'Fallon, Charles Todd, S. Haskell, Gerard B. Allen, S. Treat.

Gen. Halleck, in his reply, said,—

"GENTLEMEN,—Your very complimentary letter, inviting me, in the name of the loyal residents of St. Louis, to a public dinner, is just received. I regret that the uncertainty of my own movements, and the fact that I may leave this city at any moment, compel me to decline your polite invitation. Accept my sincere thanks for the offer, and for the very complimentary terms in which it is made. Permit me to say, in conclusion, that the trade of the Cumberland and Tennessee Rivers is now open to the merchants of this city, and I hope in due time to add that of the Mississippi. The restraints which were necessarily imposed on commerce in order to crush the rebels in this State in their mad attempt to destroy the Constitution and the Union will very soon be removed, and St. Louis will assume her sway as the commercial queen of the West. Her own citizens should cheerfully assist in restoring to this metropolis its former prosperity."

—On the 24th of February the roof of Gratiot Street military prison was set on fire by some of the prisoners, but the flames were extinguished before much damage was done. There were one hundred and seventy-seven prisoners in confinement, some of whom were quite disorderly from the effects of liquor. During the progress of the fire Maj. Woods and several other prisoners gathered about the hose with the intention of cutting it. They were ordered away by the prison-keeper, Lieut. Bishop, but they refused to go. The guard was then summoned, and they were arrested and confined in irons.

In about half an hour after the flames at the roof were quenched, fire was again discovered bursting from a pile of mattresses in an entry on the second floor. The articles were at once thrown into the yard and drenched, thus averting a second danger.

Scarcely five minutes had elapsed after this event when flames again appeared in a new quarter of the premises. The bed in the apartment of the Confederate Col. Magoffin, in the southwest corner of the second story, was on fire. It was immediately extinguished, together with the flames of some still burning paper which the incendiary had used to effect his purpose.

Magoffin was at a distance from his room when the last fire occurred, and had not been in it for some time. He was not suspected as the perpetrator of the incendiarism.

—On February 26th, Gen. Halleck gave orders that any officer who published, "without proper au-

thority, information respecting the movements of the armies, even of battles won, or any official papers," would be arrested and tried by court-martial.

1862. He also warned the newspapers that the Secretary of War had directed that the whole edition of the newspaper publishing such information should be seized and destroyed.

—On March 3d, Gen. Halleck announced the restoration of commerce between the loyal section of the Department of Missouri and the country on the Tennessee and Cumberland Rivers. Steamboats and other vessels trading on these rivers from St. Louis were required, in addition to the customary registration and enrollment required by the revenue laws of the United States, to take out a special license for their renewed intercourse, with some restrictions.

—Union officers wearing gray or mixed uniforms or overcoats in the field were ordered to be arrested by Gen. Halleck on March 10th, and tried for disobedience and neglect of duty. Commanders of divisions, brigades, and regiments were required to see that no man under their command wore any gray or mixed clothing.

—In compliance with the orders of the President, Gen. Halleck, on March 13th, assumed command of the Department of the Mississippi, which included the Departments of Kansas and the Missouri and the Department of the Ohio, the country west of a north and south line drawn through Knoxville, Tenn., and east of the western boundaries of the States of Missouri and Arkansas, with headquarters at St. Louis.

—On March 13th, Gen. Halleck issued the following "General Orders No. 2:"

"I. Martial law has never been legally declared in Missouri, except in the city of St. Louis, and on and in the immediate vicinity of the railroads and telegraph lines; and even in these localities military officers are specially directed not to interfere with the lawful process of any loyal civil court. It is believed that the time will soon come when the rebellion in Missouri may be considered as terminated, and when even the partial and temporary military restraint which has been exercised in particular places may be entirely withdrawn. By none is this more desired than by the general commanding.

"II. It must, however, be borne in mind that in all places subject to the incursions of the enemy, or to the depredations of insurgents and guerrilla bands, the military are authorized, without any formal declaration of martial law, to adopt such measures as may be necessary to restore the authority of the government, and to punish all violations of the laws of war. This power will be exercised only where the peace of the country and the success of the Union cause absolutely require it.

"III. Evidence has been received at these headquarters that Maj.-Gen. Sterling Price has issued commissions or licenses to certain bandits in this State, authorizing them to raise 'guerrilla forces,' for the purpose of plunder and marauding. Gen. Price ought to know that such a course is contrary to the rules of civilized warfare, and that every man who enlists in such an organization forfeits his life and becomes an outlaw. All persons are hereby warned that if they join any guerrilla band they will not, if captured, be treated as ordinary prisoners of war, but will be hung as robbers and murderers. Their lives shall atone for the barbarity of their general."

—The Union ladies of St. Louis, in token of their approbation of the vigorous and efficient services Gen. Halleck had rendered as military commander of the Department of the Mississippi, decided to present him with a magnificent sword. The general gave his consent, and designated Monday evening, March 17th, and the Planters' Hotel, as the time and place for the ceremony. At the time appointed the sword was presented to Gen. Halleck in the private parlors of the hotel by the following committee of young ladies: Miss Helen W. Budd, Miss Mary Crow, Miss Belle Bridge, Miss Sue Benton, Miss Belle Holmes, Miss Fannie Edgar, and Miss Ellen McKee. Miss Budd made the presentation speech in behalf of the committee.

Gen. Halleck, on receiving the sword handed to him by Miss Budd, addressed the committee as follows:

"LADIES OF THE COMMITTEE:

"I thank you and those whom you represent for the honor you have conferred on me in the presentation of this beautiful sword. I cannot believe that I have done anything to merit this distinguished favor from the ladies of St. Louis. I, however, accept it from them, with the promise that it will be used only in the defense of the rights of American citizens and of the flag of our common country. This sword is presented by the ladies; it shall be used, if occasion should require, in their service, and in defense of their rights and their honor.

"I thank you, ladies, for your address, and you, Miss Budd, for the manner of its delivery."

The ladies and gentlemen present were then individually introduced to the general by Charles D. Drake, and the company dispersed.

The following is a list of the contributors:

Mrs. George K. Budd, Miss Helen W. Budd, Mrs. A. Northrop, Mrs. Dennis Marks, Mrs. S. J. Bacon, Mrs. S. T. Hyde, Mrs. Arthur Benson, Mrs. A. L. Holmes, Mrs. Amos Cutter, Miss Mary Thomas, Mrs. George D. Humphreys, Mrs. William McKee, Miss Ellen McKee, Mrs. William Groshon, Mrs. Albert Pierce, Mrs. James Smith, Mrs. Maj. Weber, Mrs. Giles F. Filley, Mrs. T. Woodruff, Mrs. Stephen Ridgley, Mrs. Thomas Yeatman, Mrs. J. B. Sickles, Mrs. Benjamin Farrar, Mrs. Delano, Mrs. E. W. Foy, Mrs. C. B. Hubbell, Mrs. Edward A. Filley, Mrs. Charles Holmes, Mrs. Charles F. Holmes, Mrs. Samuel Kellogg, Mrs. A. F. Shapleigh, Mrs. George Partridge, Mrs. Wayman Crow, Mrs. J. Cheever, Mrs. John Beach, Mrs. Ely Ware, Mrs. H. Wilson, Mrs. L. Eaton, Miss Lizzie Albright, Mrs. Capt. Lowe, Mrs. Haren, Mrs. James Richardson, Mrs. E. J. Cheever, Mrs. Hannah Patterson, Mrs. Carlos S. Greeley, Mrs. R. J. Howard, Mrs. Ira Stansbury, Miss Garritt, Mrs. Edward Wyman, Mrs. Oliver, Miss Adriance, Miss Mary E. Tuttle, Miss Addie F. Tuttle, Miss M. Avery, Mrs. Charles S. Blood, Mrs. S. Treadway, Mrs. Wyllis King, Mrs. R. Scarritt, Mrs.

Isidor Busch, Mrs. Dwight Durkee, Mrs. J. W. Peck, Mrs. S. M. Allen, Miss Lucia Allen, Master Willie A. Allen, Mrs. Maj. Shaw, Mrs. Col. O'Fallon, Mrs. P. Allen, Mrs. B.
1862. Stickney, Mrs. O. Garrison, Mrs. T. B. Edgar, Mrs. W. L. Thoyel, Mrs. Dr. William Eliot, Mrs. Dr. T. M. Post, Mrs. Dr. H. A. Nelson, Mrs. J. J. Porter, Mrs. John How, Mrs. Col. A. R. Easton, Mrs. John J. Roe, Mrs. Robert Holmes, Mrs. Hudson E. Bridge, Miss Belle Bridge, Miss Sue Benton, Mrs. A. Knight, Mrs. C. B. Burnham, Mrs. Eben Richards, Mrs. L. H. Laflin, Miss Dodd, Mrs. James Duncan, Mrs. E. J. Cubbage, Mrs. William Barr, Mrs. James G. Brown, Mrs. John Avery, Mrs. S. J. Breckenridge, Mrs. Sol. Smith, Mrs. John V. Metlar, Mrs. Rumbold, Mrs. R. Barnett, Mrs. James Patrick, Mrs. E. H. Whedon, Mrs. William Patrick, Mrs. N. C. Chapman, Mrs. Dr. E. Hale, Mrs. John C. Porter, Mrs. Isaac Rosenfeld, Mrs. S. A. Ranlett, Mrs. James Blackman, Mrs. A. Valté, Mrs. M. W. Warne, Mrs. O. D. Filley, Mrs. S. M. Edgell, Mrs. Moody, Mrs. William G. Webb, Miss E. Glover, Miss Emily Young, Miss Minster, Miss Jennie Glover, Miss Fannie Edgar, Miss Belle Holmes, Miss M. D. Budd, Mrs. Clinton B. Fiske, Mrs. Dr. Fisher, Mrs. Adolphe Abeles, Mrs. Ferdinand Meyer, Mrs. Charles Kintzing, Mrs. A. G. Braun, Mrs. Isaac L. Garrison, Mrs. Daniel R. Garrison, Mrs. Kreigler, Mrs. Judge Krum, Mrs. J. H. Parsons.

In addition to this compliment, Gen. Halleck was honored on the same evening with a serenade. A large assemblage gathered, and in response to repeated calls the general appeared on the balcony and delivered a brief address. On the 15th an invitation signed by six hundred children of the public schools was sent to Gen. Halleck, soliciting his attendance at their concert and exhibition for the benefit of the poor.

—All jurors, whether in civil or criminal courts, in the State were required by Gen. Halleck, after March 14th, to take the oath of allegiance prescribed by the convention on the 16th of October, 1861. Those refusing to take such oath were to be regarded as aliens. He also said,—

"Any neglect on the part of army or volunteer surgeons in their duties to the sick and wounded will be immediately reported to these headquarters. It is said that some of the medical officers, prisoners of war, have failed to give proper attention to their own sick and wounded. In all cases of this kind the medical officer will be deprived of his parole, and be placed in close confinement, and the facts reported to headquarters."

In view of the rapid extension of steamboat navigation into the Southern States and the importance of having the boats engaged in such navigation controlled by loyal citizens, Gen. Halleck, on March 28th, ordered that all licenses to pilots and engineers navigating the waters of his military department be revoked from and after the 15th of April; "and that said pilots and engineers take out new licenses from the 'supervising inspector,' who will only grant licenses to persons of approved loyalty, or, in case of doubt, will require bond with security for the loyal conduct of such engineers and pilots."

—On the 5th of April, Bernard G. Farrar, provost-marshal-general, issued the following "Special Orders No. 237:"

"The following-named judges of election are appointed to act as inspectors at the several election precincts of the city of Carondelet at the municipal election to be held in said city on the 7th instant. They are authorized to enforce General Orders No. 41, current series of Maj.-Gen. Halleck, in every particular; they will administer the oath of allegiance to each voter, and make a certificate thereof, and return the same to this office. A duplicate of said certificate, signed by either of the inspectors, will entitle each voter to vote at the election for clerk of the Land Court, by depositing the same with the inspector at that poll:

"For the First Ward, A. A. Blumenthal.
"Second Ward, L. M. Maxon.
"Third Ward, John Hewitt.
"Fourth Ward, John Schreiber."

—The steamboats "Crescent City" and "Woodford" arrived in St. Louis on April 14th from Tennessee River, the former conveying wounded soldiers and the latter Confederate prisoners. The "Crescent City," when she left the Tennessee, had had on board four hundred and fifteen wounded, four of whom were Confederates, but fifty who were badly injured were left at Paducah, and five died on the trip. This boat was in charge of Dr. J. P. Smith, surgeon of Gen. Thomas' brigade. The "Woodford" brought a large number of Confederate prisoners, in charge of Capt. Newsham, of Gen. C. F. Smith's staff, and a detachment of Union troops. They were all removed under guard and placed in the Gratiot Street military prison. On the same evening the steamer "Louisiana" arrived from the Tennessee with more wounded, many of them belonging to the Confederate army.

At this time the following hospitals in St. Louis were occupied by sick and wounded soldiers:

Fifth Street (corner Chestnut, opposite court-house), Dr. Hodgen.
Fourth Street (near Franklin Avenue), Dr. McGugin.
New House of Refuge (five miles out, southwest), Dr. Bailey.
Pacific House (Spruce Street, west of Seventh), Dr. Martin.
Good Samaritan (Twenty-fifth Street, near O'Fallon Street), Dr. McMartin.
Hickory Street (west of Seventh Street), Dr. Melcher.
City Hospital (St. Ange Avenue), Dr. Grinstead.
Sisters of Charity (Spruce Street, corner Fourth), Dr. Rox.
McDowell's College Hospital (for Confederate prisoners), Dr. Melcher.
Arsenal Hospital (three miles out, south), Dr. Getty.
Marine Hospital (four miles out, south), Dr. Melcher.
Duncan's Island (for smallpox, four miles down the river), Dr. Smith.
Jefferson Barracks (twelve miles out, south), Dr. Fish.
Benton Barracks, general hospital (four miles out, northwest), Dr. Dickinson.
Benton Barracks Convalescent No. 1 (Fair Ground), Dr. Dyer.
Benton Barracks Convalescent No. 2 (Parade Ground), Dr. Colegrove.

Rev. H. A. Reid was employed by the Western Sanitary Commission as relief agent to furnish all information, etc., and render all needful assistance to the sick and wounded soldiers.

1862.

—In compliance with orders from Gen. Halleck, Col. Lewis Merrill assumed command of the St. Louis division, which was bounded as follows:

"A line beginning at the north corner of Pike County, on the Mississippi, running west to the eastern line of Linn County, south to the mouth of Chariton River, down the Missouri to the mouth of the Gasconade, thence the line of the Gasconade and Big North Fork of White River to the southern line of Missouri, excluding the counties of Pemiscott, New Madrid, and Mississippi, and camp of instruction at Benton Barracks."

—Early in April Gen. Halleck left for Corinth, Miss., leaving Maj.-Gen. John M. Schofield in command of the greater part of the State; and on June 1st Gen. Schofield assumed command of the entire Department of Missouri, with headquarters in St. Louis.

—Bernard G. Farrar, provost-marshal-general of the Department of the Mississippi, on June 17th issued the following "Special Orders No. 300:"

"Whilst in the State of Missouri, and especially in the city of St. Louis, there has never been any well-founded expectation of success to the rebel cause, still the desperate though fruitless efforts of the rebels in this State have been productive of the greatest evils; the peace of the people has been destroyed, their lives constantly in danger, their industry paralyzed and its fruits ruthlessly seized and stolen. Whilst the interior of the State has been in a miserable condition, constant and effective aid, support, and encouragement have been given to the outlaws in arms by a large number of the inhabitants of this city, who have been equally guilty with those who have taken up arms. These outlaws in spirit amongst us are, many of them, individually well known to the military authorities as active and efficient supporters of this rebellion. Forbearance has been extended to these people in the hope that they would cease their misconduct, but they continue their acts of hatred to the government, deriding its power, and constantly claiming and asserting that it has no rightful existence here, and that it rightfully should and would be overthrown by the rebel government. Their abuse of the Federal government and all in authority under it, their obstinate support of the cause of the rebellion becomes a serious matter; it not only encourages and keeps alive the marauding guerrilla warfare in this State, but it has a great effect upon a large number of persons in this city and State whose disloyal tendencies would long since have been rooted out but for this continuing cause of support.

"In view of the evil consequences of treating these people with leniency, and that to do so tends to keep up the insurrectionary spirit in this city and State, the time has come when they should be recognized in their true character, and dealt with as active and efficient enemies of the government. The peace and welfare of this city and State suffer from the failure of the military authorities to take notice of the evils resulting from the conduct of these cunning traitors, who, while plotting treason, try to practice it in secret. It is therefore ordered that the provost-marshal of the city of St. Louis will cause all persons in this city suspected of disloyal sympathies to take the oath of allegiance to the United States government and the provisional government of the State, and all persons well known by their conduct, bearing, conversation, or companions to be disloyal shall be required to give bond for the observance of their oath, and the provost-marshal of the city will cause the arrest of all persons guilty, after the publication of this order, of any of the disloyal conduct hereinbefore mentioned, whether it consists in acts or language hostile to the government."

In compliance with this order, the provost-marshal of St. Louis sent the following circular letter to nearly a thousand Southern sympathizers in St. Louis, calling upon them to present themselves before him and take the oath and give bond for their loyal conduct:

"OFFICE OF THE PROVOST-MARSHAL,
"ST. LOUIS, MO., ——, 1862.

"SIR,—Your attention is called to the following extract from Special Orders No. 300, issued by the provost-marshal-general of this department:

"'The provost-marshal of the city of St. Louis will cause all persons in the city suspected of disloyal sympathies to take the oath of allegiance to the United States government and the provisional State government, and all persons well known by their conduct, bearing, conversation, or companions to be disloyal shall be required to give bond for the observance of their oath.'

"In pursuance of the same, you are directed to appear at my office within the next —— days, and take the oath and give a bond, as required by said order. The bond will be in the sum of —— thousand dollars.

"Very respectfully,
"GEO. E. LEIGHTON,
"*Provost-Marshal, St. Louis.*

"To —— ——, St. Louis."

For the information of those who were notified to appear at his office under the special orders of the provost-marshal-general, Major Leighton issued the following "General Orders No. 866:"

"I. No person who has once taken the oath of allegiance in any form since July 4, 1861, and before June 18, 1862, will be required to take it anew. Persons who have taken it, who have been or may hereafter be notified to appear, are requested to bring with them the evidence of the same.

"II. Numerous applications have been made for the privilege of taking the Convention oath. This oath cannot be administered under this order, nor be accepted when presented in lieu of the usual military oath, unless it shall have been taken previous to the 18th day of June, 1862. The objections of such persons to the form used present the strongest reasons in its favor.

"III. The oath which will be required of those who have not taken it previous to their notification to appear at this office, will be as follows:

"'I, —— ——, county of ——, State of ——, do solemnly swear that I will support, protect, and defend the Constitution and government of the United States, and the provisional government of the State of Missouri, against all enemies, whether domestic or foreign; that I will bear true faith, allegiance, and loyalty to the same, any ordinance, resolution, or law of any State Convention or Legislature to the contrary notwithstanding; and, further, that I will well and faithfully perform all the duties which may be required of me by the laws of the United States. And I take this oath without any mental reservation or evasion whatsoever, with a full and clear understanding that death or other punishment by the judgment of a military commission will be the penalty for the violation of this my solemn

oath. And I also swear that under no consideration will I go beyond the military lines of the United States forces, so help me God.'

"No modification will be made under any circumstances."

1862. —Lieut.-Col. B. G. Farrar, on June 27th, besides being appointed provost-marshal-general of the District of Missouri also had the military prison at Alton, Ill., included under his jurisdiction.

—A large mass-meeting of the citizens of St. Louis was held on July 12th in the rotunda of the court-house to take into consideration the subject of offering inducements to the government to locate the navy-yard, the establishment of which on the Upper Mississippi was in contemplation, at St. Louis.

Maj. Daniel G. Taylor was chosen to preside, with the following vice-presidents: C. S. Greeley, L. V. Bogy, J. G. Woerner, C. D. Wolf, A. W. Fagin. The object of the meeting having been stated, Messrs T. S. Nelson, J. E. Burnett, George Partridge, W. H. Benton, James H. Lucas, Benjamin Stickney, John O'Fallon, B. M. Runyon, A. Meier, and John Cairns were appointed a committee on resolutions. They reported a series of resolutions favorable to the proposition, which were adopted, and three members of the Council were requested to visit Washington and lay the matter before the government. During the evening speeches were made by Maj. Taylor, C. C. Whittelsey, and L. V. Bogy.

—Governor Gamble, on July 22d, authorized Brig.-Gen. John M. Schofield, in command of the Missouri State militia, to enroll and organize the entire militia of the State into companies, regiments, and brigades, "for the purpose of putting down all marauders, and defending the peaceable citizens of the State."

Gen. Schofield placed the enrollment and organization of the militia of St. Louis under the general direction of Col. Lewis Merrill, commanding the St. Louis division, who began to organize the militia of the city as follows:

"The militia of each ward will, as far as practicable, constitute a regiment, and will be at once enrolled for this purpose, reporting to the enrolling officers below named at their offices, which will be at the places where the elections are usually held in each ward.

"As soon as sixty-four men are enrolled they will be organized into a company, and proceed to elect their officers. When ten companies are organized in each ward they will be formed into a regiment, and the field and staff officers appointed.

"After the organization of the regiment, all persons enrolled will by the enrolling officer be assigned to companies already organized.

"Capt. R. A. Howard, Merrill's Horse, is hereby appointed superintendent of enrollment for the city of St. Louis, and the enrolling officer will report to him for further orders.

"The following enrolling officers are hereby appointed, and are authorized to detail from the militia the necessary clerks and assistants for the proper discharge of their duties

First Ward, John Nicolay.
Second Ward, Charles W. Gottschalk.
Third Ward, Jean J. Witzig.
Fourth Ward, Tony Niederwieser.
Fifth Ward, R. J. Howard.
Sixth Ward, George Doan.
Seventh Ward, Thomas J. Dailey.
Eighth Ward, George Kyler.
Ninth Ward, William Bailey.
Tenth Ward, Brainard M. Million.

Who will immediately enter upon the discharge of their duties, and report daily to the superintendent of the enrollment the progress made in the organization.

"All applications for furloughs for any militiaman will be made to Capt. Howard."

By order of the Governor the following persons were exempted from enrollment in the active militia of the State:

"Judges, justices, and clerks of court of record, sheriffs, coroners, and constables, secretary of State, auditors, treasurers, and registers of land and their clerks, postmasters, mail-carriers, mail agents, engine-drivers, conductors, brakemen, and watchmen in actual service upon railroads, millers, keepers of ferries, keepers of jails and other prisons, officers of the penitentiary, practicing physicians, priests, and preachers of any religious denomination when regularly ordained, instructors and pupils in schools established by law, and persons employed in the steam fire department of any city or town."

—On July 24th the board of police commissioners passed the following order, which required all persons doing business with the county wherein the payment of money from the county treasury was involved to first prove their loyalty before obtaining pecuniary satisfaction. In case the loyalty of persons was not established, the accounts against the county were not to be liquidated:

"*Ordered*, That the auditor inform by letter (including a copy of this order) all heads of departments and officers in the employ of the county, and all other persons and parties who by law are making purchases for which the county is liable, that hereafter no accounts of any person whatsoever in whatever capacity he or they be employed will be allowed unless they furnish satisfactory proof to the auditor that they have taken the oath of allegiance prescribed by the Convention of the State; and the auditor is hereby instructed to indorse on every bill or account presented the fact whether the party concerned has, to his knowledge, taken the oath or not."

—A very large and enthusiastic meeting was held at the court-house on July 25th to encourage enlistments for the war. The rotunda of the court-house, including all the galleries, was completely filled with people, and quite an assemblage gathered on Fourth Street in front of the building to listen to the remarks of volunteer speakers. The principal speeches were made in the rotunda. The meeting was called

to order by James Peckham, who proposed Mr. Lightner, of the board of county commissioners, as president, and having made a few patriotic re-
1862. marks, read the following resolutions, prepared for the occasion, which were adopted:

"*Resolved*, That the preservation of the Union is to St. Louis an interest greater than all other interests, and that we will, regardless of all other interests, contribute in men and means the last man and the last dollar of which our city is possessed, if necessary, to reinforce our armies;

"*Resolved*, That loyalty should be intolerant of treason, and no description of disloyalty to the government of the United States should be tolerated by the military authorities, and that we demand, as we have a right to do, security from home traitors and rebel spies by their removal from our midst.

"*Resolved*, That the chairman of this meeting appoint a committee of two persons from each ward of the city to act as a fund committee, who shall collect and dispose of means for raising and organizing the regiments to compose Gen. Blair's brigade."

The resolutions were received with great demonstrations of applause. Mr. Drake then addressed the meeting, and when he had finished loud calls were made for Gen. Blair, and that gentleman came forward and made an eloquent speech.

Speeches were also made by Thomas S. Nelson and others.

—On the 28th the following "General Orders No. 23," relating to exemptions from military duty, were issued:

"All persons who prefer to contribute money rather than personal service in the enrolled militia can procure exemption from military duty for one year by enrolling their names and paying an exemption fee into the military treasury of the State, or of the county in which they reside, at the option of the individual.

"The exemption fee will be ten dollars for each individual, and one-tenth of one per cent. upon all taxable property as shown by the last assessment.

"The exemption fee may be paid in money or in supplies for the support of the militia when in active service.

"It is expected that all persons of means, though legally exempt from military service, will voluntarily contribute, in proportion to their ability, to one of these funds, and thus enroll themselves among the loyal and willing supporters of law and order.

"All persons not exempt from military service by law, by general orders, or by payment of exemption fee as above stated will be enrolled and organized into companies, regiments, and brigades."

—On the 29th the county commissioners met, all the members being present except Mr. Tippet. Mr. Lightner submitted the following resolution for an appropriation for the relief of the families of volunteers, which was adopted:

"WHEREAS, It is right and proper that aid and comfort should be furnished all loyal Union people and interests; therefore be it

"*Resolved*, That this board of St. Louis County commissioners pledges itself hereafter, as heretofore, to continue to aid all families in our midst whose male supporters may volunteer to fight our country's battles. This St. Louis County pledges herself to do to the amount of one hundred thousand dollars, or as much more as may be necessary."

—In August the following donations among others were made to aid volunteers enlisting for the war and their families:

State Savings Association	$2500
Phœnix Insurance Company	500
Marine Insurance Company	1500
Atlantic Insurance Company	1000
St. Louis Insurance Company	500
Memphis Packet Company	500
St. Louis Shot-Tower Company	250
Bank of the State of Missouri	5000
Merchants' Bank	2000
Union Insurance Company	500
Board of Underwriters	100
United States Insurance Company	500
Merchants' Mutual Insurance Company	500
Citizens' Insurance Company	1000
Lumberman's and Mechanics' Insurance Company	1000
Boatmen's Savings Institution	4000
Southern Bank	500
Bank of St. Louis	600
Hope Mutual Fire Insurance Company	100
Globe Mutual Fire Insurance Company	400
Franklin Savings Institution	500
Franklin Insurance Company	500
Mechanics' Bank	2000
Merchants' Mutual Insurance Company	500
Pacific Insurance Company	500
L. A. Benoist & Co.	500
St. Louis Gaslight Company	1000
Exchange Bank of St. Louis	2000
Tesson & Danjen	100
Allen, Copp & Nesbit	100
Citizens' Railroad Company	200
Union Bank	500

—Gen. Schofield, on August 28th, by Special Orders No. 91, appointed Henry Moore, John Cavender, G. F. Filley, Charles Berg, and Ferdinand Meyer a county board for St. Louis County, "to assess and collect, without unnecessary delay, the sum of five hundred thousand dollars from the secessionists and Southern sympathizers in St. Louis County," the money thus realized to be "used in subsisting, clothing, and arming the enrolled militia while in active service, and in providing for the support of the families of such militiamen and United States volunteers as may be left destitute." On the 30th, Col. John O'Fallon, Daniel Garrison, and James S. Thomas were appointed additional members of the board, and John Cavender, who was president of the committee charged with the disbursement of the fund for the relief of soldiers' families, was relieved from serving as a member of the assessment board.

When this order was issued it created the greatest surprise and indignation among those citizens of St. Louis who sympathized with the South. The assessment was to be graded on a double scale, regulated by the wealth and supposed degree of sympathy for the South on the part of the persons assessed. The board

of citizens appointed to make the assessment was instructed to ascertain the facts, examine witnesses, and specify the amounts to be paid by each party.

1862. The *St. Louis Republican* long after the war gave a history of the assessment proceedings of 1862, which we reproduce here, and which we think will be found to be "very interesting reading:"

"*Ex parte* and secret evidence was received; little or no opportunity of defense was practicable. Many persons did not know they were under suspicion until the assessed amount was declared. The collection was to be summary, under the stringency of martial law. When the amount of one hundred and fifty thousand dollars had been reached, and comparatively few persons knew where the blow would strike, the forced collection began, and had proceeded a little way, under the indignant protest but prudent submission of the sufferers, many of whom were good and true citizens in every sense of the word. All at once and quite unexpectedly an order, bearing date Dec. 15, 1862, appeared, which was understood to come direct from Washington, and took the 'assessors' themselves completely by surprise, stopping the assessment summarily and forever. There were probably not a dozen persons in St. Louis at the time to whom the immediate causes of the change were known. Great and bitter complaints were made by the board of assessment and by many others. A few months afterwards a leading member of the board, in a long letter arraigning the course of Governor Gamble, and published over his own name in the daily *Democrat* of June 13, 1863, makes the following statement:

"'On the 25th of December the board of assessment called on Gen. Curtis at his headquarters, when the general informed the board that ———, a good Union man, had got up a petition of remonstrance with many signatures (or 'rigmarole,' as the general called it), and that that petition was taken to Gen. Halleck at Washington; and on the strength of that petition and the letter of Governor Gamble the assessment was suspended by Gen. Halleck at Washington. The petition of ——— set forth that the assessment was an arbitrary and unjust proceeding.'

"This is partly right and partly wrong. The memorial or petition was written and signed by a clergyman of this city who was known to be very active in the Union cause and a personal friend of President Lincoln. It was addressed to Governor Gamble, and by him indorsed and forwarded to the President. Mr. Lincoln read the memorial with care, turned it over and indorsed upon it, 'Stop the whole thing by telegraph,' and sent it to Gen. Halleck.

"We have lately happened to have access to the original documents and to the order of repeal. They are as follows, and are well worth reading, now that the excitement of strife has passed. Undoubtedly the board of assessment labored to perform its duty faithfully, but few persons will now fail to see that the grounds of objection to the whole proceeding were just and sufficient:

"'*To His Excellency Governor H. R. Gamble:*

"'GOVERNOR,—The undersigned, your memorialists, who are now and always have been unconditional Union men and supporters of the government, most respectfully represent: That the 'assessment' now in progress, to be levied upon Southern sympathizers and secessionists, is working evil in this community and doing great harm to the Union cause. Among our citizens are all shades of opinion, from that kind of neutrality which is hatred in disguise, through all the grades of lukewarmness, 'sympathy,' and hesitating zeal up to the full loyalty which your memorialists, in common with yourself, claim to possess. To assort and classify these, so as to indicate the dividing line of loyalty and disloyalty, and to establish the rates of payment by those falling below it, is a task of great difficulty. If it can be done at all, it must be by patient investigation and after hearing evidence on both sides, giving each party the opportunity of self-defense. It would require not only a competent tribunal, sitting for a great length of time and possessed of full authority to examine witnesses under oath, but also a kind and degree of scrutiny inconsistent with republican institutions. Such an investigation has to some degree been attempted in the present case, but although the character and standing of the assessment board give assurance of the faithful endeavor to be just and impartial has been made, they have been compelled to admit hearsay evidence, 'opinions,' and 'general impressions,' and have in no case required witnesses to testify under oath. The natural consequence has been that many feel themselves deeply aggrieved, not having supposed themselves liable to the suspicion of disloyalty: many escape assessment who, if any, deserve it; and a general feeling of inequality in the rule and ratio of assessment prevails. This was unavoidable, for no two tribunals could agree upon the details of such an assessment, either as to the persons or the amounts to be assessed, without more complete knowledge of facts than can be attained from *ex parte* testimony and current reports. Nothing short of a thorough judicial investigation could lead to a satisfactory result. . . .

"'Your memorialists therefore respectfully petition that you will use your influence, Governor Gamble, with the commanding general and with the authorities at Washington, that the proceedings in assessment be stayed, at least until other methods of obtaining the funds required by the State shall have been first tried. Perhaps, if the case were fully presented before Congress, the just demand of the State would be met, and the employment of our State militia, in defense of the common cause, would be made. . . . It is the opinion of your memorialists that nothing anything short of congressional authority and judicial sanction such assessments as are now in progress would only amount to a *forced loan*, for which reclamation could ultimately be made and sustained.

"'All of which is respectfully submitted by your obedient servant,

"'ST. LOUIS, Dec. 2, 1862.'

"The memorial was written with the expectation of many signatures, but having been offered to a number of leading citizens without success, it was sent with a single name.

"The consequent order of Gen. Halleck is as follows:

"'HEADQUARTERS OF THE ARMY,
WASHINGTON, D. C., Dec. 15, 1862.

"'*Maj.-Gen. S. R. Curtis, St. Louis:*

"'GENERAL,—I have received the documents forwarded by you in relation to the assessment ordered by Brig.-Gen. Schofield on the city and county of St. Louis, and have submitted them to the Secretary of War for his decision.

"'I am instructed to say in reply that, as there seems to be no present military necessity for the enforcement of this assessment, all proceedings under the order of Gen. Schofield will be suspended.

"'Very respectfully your obedient servant,

"'H. W. HALLECK, *General-in-Chief.*

"When this order appeared the whole community drew a long breath of relief, though there were many dissenting voices. It may seem to us at the present day unaccountable that any one could have expected permanent good results from an arbitrary proceeding like that which was discontinued. That there were many such is one among the many proofs of 'the madness which ruled the hour.'"

—On September 3d the headquarters of the different wards and of the districts of the city and county for the enrollment and organization of the militia were announced by Brig.-Gen. John B. Gray:

1862.

"First Ward, Col. Nicholas Schuttner, headquarters St. George Market.

"Second Ward, Col. C. D. Wolf, Soulard Market.

"Third Ward, Col. Ford. Boyle, Chouteau Avenue, three doors west of Seventh Street.

"Fourth Ward, Col. Thomas Ritcheson, Turner Hall.

"Fifth Ward, Col. John Knapp, Lucas building, Pine Street west of Fourth.

"Sixth Ward, Col. John M. Krum, Washington Avenue, between Sixth and Seventh.

"Seventh Ward, Col. E. H. E. Jameson, Valley Hotel, corner of Seventh and Morgan Streets.

"Eighth Ward, Col. William Cuddy, Franklin Engine House, Eleventh Street, between Wash and Carr.

"Ninth Ward, Col. William Bailey, corner of Sixth and O'Fallon Streets.

"Tenth Ward, Col. B. M. Million, northwest corner of Jefferson and Main Streets, Marlow's factory.

"Districts Nos. 21, 22, 23, and 24, or St. Louis township, and Nos. 33, 34, and 35, or Central township, will be under command of George Knable, Jr., headquarters at the Mansion House.

"Districts Nos. 25, 26, 27, and 28, or Carondelet township, Col. E. Stafford, headquarters City Hall, Carondelet.

"Districts Nos. 36 and 37, or Bonhomme township, and Nos. 1 and 40, or Maramec township, Col. William P. Fenn, headquarters at Manchester.

"Districts Nos. 29, 30, 31, and 32, or St. Ferdinand township, Col. Julian Bates, headquarters Florissant."

—The following surgeons were appointed on the 3d of September for the examination of those claiming exemption from service in the enrolled Missouri militia of the city and county by reason of physical disability, the surgeons being instructed to report for duty to the colonels of their respective wards and districts as above mentioned:

Dr. William Taussig, Carondelet city and township; Dr. Gustave Fischer, First Ward; Dr. William E. Gempp, Second Ward; Dr. S. Pollak, Third Ward; Dr. Philip Wiegel, Fourth Ward; Dr. John Barnes, Fifth Ward; Dr. H. E. Martheus, Sixth Ward; Dr. F. W. White, Seventh Ward; Dr. John Conduman, Eighth Ward; Dr. S. Stark, Ninth Ward; Dr. Daniel A. Million, Tenth Ward; Dr. J. N. Morris, St. Ferdinand township; Dr. William A. McMurray, Central and St. Louis township; Dr. L. D. Morse, Bonhomme and Maramec townships.

These surgeons were authorized and instructed to collect a fee of fifty cents from each person examined, one-half of which sum they were to retain as remuneration for services rendered, and the other half they were to turn over weekly to the colonels of their districts, which was to be expended by said colonels in the necessary incidental expenses of organization, and properly accounted for monthly by them to headquarters.

—Maj. Charles L. McConnell, assistant provost-marshal-general, was, on September 5th, appointed provost-marshal-general *ad interim* of St. Louis district by Gen. Schofield, in place of Col. B. G. Farrar. On the 10th of September, Col. T. T. Gantt received the appointment from Gen. Schofield, succeeding Col. Farrar and Maj. McConnell.

—The unconditional Union men of St. Louis were requested by James S. Thomas, president of the county board to assess and collect the sum of five hundred thousand dollars from Southern sympathizers, to forward to his board "such information as they may have in their possession which will aid them in carrying out the requirements of Special Orders No. 91." He added, "The board wish it to be understood that all communications and evidence will be considered strictly private."

—On September 11th the following orders, under which the property of Missouri Confederates was to be confiscated, were issued by Gen. Schofield:

"I. In compliance with orders from Honorable Secretary of War, the provost-marshal-general of the District of Missouri will proceed without delay to carry into effect the provisions of the act of Congress approved July 17, 1862, and entitled 'An Act to suppress insurrection, to punish treason and rebellion, to seize and confiscate the property of rebels, and for other purposes,' so far as the provisions of said act are subject to be carried into effect by the military authorities of the United States in the District of Missouri.

"II. Property seized in pursuance of Section 5 of said act will be reported to the United States district attorney for the district in which it may be, or may first be brought for condemnation and sale, as provided in Section 7 of said act.

"III. Inasmuch as the conviction or the establishment of the guilt of the owners of the property so seized before a court of competent jurisdiction is by the act of Congress aforesaid made the condition of the condemnation and sale thereof, the provost-marshal-general is hereby ordered to transmit at the same time to such United States attorney a list of the witnesses by whose evidence the guilt of such owners has been made to appear to him.

"IV. Whenever an inquiry into the guilt of any person supposed to have violated the act of Congress aforesaid shall be made by the provost-marshal-general, the testimony of the witnesses examined shall take the form of affidavits, and be by them subscribed and sworn to before the provost-marshal-general, and all such affidavits shall be preserved by him on file in his office.

"V. The provost-marshal-general will in no case suspend the payment of any indebtedness which may be a part of the credits of any person violating the provisions of the act of Congress aforesaid, but all such indebtedness will be paid provisionally to the credit of the suit instituted against the person prosecuted or the property libeled in a court of competent jurisdiction, and will abide the final judgment of said court."

—Capt. E. H. Tunnecliff, on October 1st, acting under orders from Maj. George E. Leighton, provost-marshal-general of St. Louis district, was relieved of his command as chief of the United States police,

and Capt. Henry A. Smith was appointed to fill the vacancy.

—On the 23d of October, William D. Wood, assistant adjutant-general of Missouri, issued the following "General Orders No. 45," relating to elections: **1862.**

"I. A general election is to take place throughout the State on the first Tuesday in November next. This is the first attempt of the people to choose their officers since the war of this rebellion commenced. It will be an occasion when angry passions, excited by the war, might produce strife, and prevent the full expression of the popular will in the selection of officers.

"The convention has provided by ordinance that every voter shall, before voting, take a prescribed oath, and that no vote shall be counted in favor of any candidate for a State or county office unless he shall have taken an oath prescribed for candidates. The ordinance of the Convention fixes heavy penalties upon those who take the oaths falsely. These are the safeguards which the Convention has judged necessary to keep unfaithful and disloyal persons from exercising power in the State. They are sufficient. No person must be allowed to interfere with the freedom of those qualified to vote under this ordinance.

"The enrolled militia, being citizens of the State, and very nearly all entitled by age to vote, will doubtless be generally at places of voting. They are a body organized for the purpose of preventing violations of the law of the State, and they all know that it is essential to the maintenance of our government that all qualified voters should be allowed, without molestation of any kind, to cast their votes as they please.

"II. It is required of all officers and men of the enrolled militia that they keep perfect order at the polls on the day of election, and that they see that no person is either kept from the polls by intimidation, or in any way interfered with in voting at the polls for whatever candidate he may choose.

"III. If any officer or private shall either interfere with the rights of voters or countenance such interference by others, it will be treated as a high military offense and punished with the utmost rigor.

"IV. Wherever there is any reason to apprehend any interference with the election on the part of bands of guerrillas, the commanding officer of the nearest regiment will detail a sufficient force to prevent any such interference, and station it where there is apprehended danger.

"V. In case of disturbance arising which cannot be arrested by the civil authorities, any commissioned officer present is hereby ordered, at the request of any judge, sheriff, or justice of the peace, to use the necessary military force to suppress it.

"VI. Commanding officers of the E. M. M.[1] are hereby directed to see that the foregoing orders are strictly obeyed."

—Col. T. T. Gantt, provost-marshal-general of the St. Louis district, was relieved by Gen. S. R. Curtis on the 1st of November, and Brig.-Gen. Eugene A. Carr assumed command of the St. Louis district on the 15th.

—On the 22d of November, Col. B. G. Farrar, of the Thirtieth Missouri Volunteers, was appointed by Maj.-Gen. Curtis to "attend specially to the procuring of evidence concerning property liable to confiscation under the law of July 17, 1862, and when he thinks evidence can be found showing the propriety of confiscation, he will take immediate possession of the property and institute proceedings, to determine the matter as defined by law."

On the 11th of December he was also placed by Gen. Curtis in charge of all contraband and confiscated property in the Department of the Missouri, and assigned the important duty of collecting all bonds that had been forfeited by Confederates and Southern sympathizers.

—The Army of Southeast Missouri being within the district of St. Louis, Gen. J. W. Davidson, on February 24th, assumed command of the whole, and Brig.-Gen. E. A. Carr, who had been in command of the district of St. Louis, was ordered to report to him. **1863.**

—Lieut.-Col. F. A. Dick, provost-marshal-general, on April 21st ordered Edward Wyman, principal of the City University, to hoist "the United States flag over his school building, and keep the same floating daily in a conspicuous position." The parades and military exercises of the school were also to be made under the same flag. In another order issued on the following day the loyalty of Mr. Wyman and his assistants was "fully conceded" by Gen. Curtis.

—The *Republican* of July 13th makes the following allusion to Maj.-Gen. Bowen, formerly of St. Louis, but then of the Confederate army, and who afterwards died in the service:

"This officer, who was taken prisoner at Vicksburg, graduated a few years ago at West Point, which institution he entered as a cadet from the State of Georgia. He is well known in St. Louis, where, previous to the war, he pursued the profession of an architect and draughtsman. He was connected with our city military organizations, and was adjutant-general on the staff of Gen. Frost at the time of the expedition to the border in search of Montgomery, who was said to have invaded Missouri with a force of Kansas men, and to have perpetrated numerous outrages in that quarter. Bowen remained on the border with a small command until about the time when the Rebellion broke out in the South, when he came to this city and took command of the Second Regiment of Frost's brigade as colonel. He was at Camp Jackson, and, as Frost's acting chief of staff, was the bearer of the letter from Gen. Frost to Capt. Lyon, at the Arsenal, asking to be assured that the rumors of a contemplated attack on Camp Jackson were incorrect, and protesting that the camp was not for any aggressive purpose. Shortly after the release of the Camp Jackson prisoners, Col. Bowen went South, and turned up soon at Columbus, Ky. He has been in several battles, but acted the most conspicuous part at Port Gibson, where he was defeated and compelled to retreat. He was prominent in the negotiations for the surrender of Vicksburg."

—One of the most notable events that took place during this excited period was the arrival at New Orleans on July 16th of the steamboat "Imperial"

[1] Enrolled Missouri Militia.

without obstruction or annoyance down the Mississippi River. This event stimulated the merchants of St. Louis to endeavor to open the commerce of the river, and as a consequence the Chamber of Commerce on July 24th passed the following resolution, which was introduced by E. W. Fox:

1863.

"*Resolved*, That A. W. Fagin, Albert Pearce, Samuel R. Filler, John J. Roe, Samuel Gaty, Alexander B. Moreau, J. H. Oglesby, and J. H. Alexander are hereby appointed a committee to proceed to Washington and urge President Lincoln to remove all restrictions from the commerce of the Mississippi valley, so far as the same can be done with safety to the nation, and that the treasurer is hereby instructed to defray the expenses of said committee during the trip out of the funds of the Exchange."

On the same day the following dispatch was received from Washington announcing the opening of the Mississippi River to New Orleans:

"WASHINGTON CITY, July 23, 1863.

"TO THE SURVEYOR OF CUSTOMS:

"Clear boats and cargoes, except of prohibited articles, for New Orleans, if desired, taking bonds not to land goods at intermediate points, except under permits authorized by existing regulations.

"S. P. CHASE, *Secretary Treasury*."

The *Republican*, commenting upon the internal trade regulations at this time, said,—

"Now that the trade through the whole line of the Mississippi is established by the fact of the arrival of the steamer 'Imperial' at Memphis, and her expected arrival here to-day, our mercantile community is strongly and justly exercised at the conditions imposed on it. One of these conditions is that five per cent. shall be paid on the value of all shipments. Of course a duty so onerous is felt to be a grievance, and although it has been paid on shipments to Memphis and Helena, we are confirmed that no such tax is exacted on shipments made coastwise from the Atlantic ports to New Orleans. The shipments heretofore to Memphis, etc., have been so inconsiderable that the burden has not been generally felt. Now, however, the case is different, and as it is discovered that the eastern cities are exempted from a tax which is imposed on St. Louis, the exaction is regarded as not only burdensome but inequitable. The interest felt on this subject will excuse some reference to these trade regulations and the law that authorizes them."

On the 8th of August the same journal said,—

"The free and unobstructed navigation of the Mississippi from the Falls of St. Anthony to the Balize was announced on Wednesday last by the steamer 'Imperial,' arrived at St. Louis from New Orleans. Out of its two years' imprisonment the commerce of the great river feebly revived in twenty-five boxes of lemons, the only consignment of the first boat up, but gives promise of an eager awakening."

—President Lincoln, on October 1st, issued the following instructions to Gen. Schofield:

"EXECUTIVE MANSION,

"WASHINGTON, D. C., Oct. 1, 1863.

"GEN. JOHN M. SCHOFIELD:

"There is no organized military force in avowed opposition to the general government now in Missouri; and if any such shall reappear, your duty in regard to it will be too plain to require any special instruction. Still, the condition of things both there and elsewhere is such as to render it indispensable to maintain for a time the United States military establishment in that State, as well as to rely upon it for a fair contribution of support to that establishment generally. Your immediate duty in regard to Missouri now is to advance the efficiency of that establishment, and to so use it, as far as practicable, to compel the excited people there to leave one another alone.

"Under your recent orders, which I have approved, you will only arrest individuals and suppress assemblies or newspapers when they may be working *palpable* injury to the military in your charge; and in no other case will you interfere with the expression of opinion in any form, or allow it to be interfered with violently by others. In this you have a discretion to exercise with great caution, calmness, and forbearance.

"With the matters of removing the inhabitants of certain counties *en masse*, and of removing certain individuals from time to time who are supposed to be mischievous, I am not now interfering, but am leaving to your discretion.

"Nor am I interfering with what may still seem to you to be necessary restrictions upon trade and intercourse. I think proper, however, to enjoin upon you the following: Allow no part of the military under your command to be engaged in either returning fugitive slaves or in forcing or enticing slaves from their homes; and, so far as practicable, enforce the same forbearance upon the people.

"Report to me your opinion upon the availability for good of the enrolled militia of the State. Allow no one to enlist colored troops, except upon orders from you, or from here through you.

"Allow no one to assume the functions of confiscating property, under the law of Congress, or otherwise, except upon orders from here.

"At elections see that those and only those are allowed to vote who are entitled to do so by the laws of Missouri, including as of those laws the restriction laid by the Missouri Convention upon those who may have participated in the Rebellion.

"So far as practicable, you will, by means of your military force, expel guerrillas, marauders, and murderers, and all who are known to harbor, aid, or abet them. But, in like manner, you will repress assumptions of unauthorized individuals to perform the same service, because under pretense of doing this they become marauders and murderers themselves.

"To now restore peace, let the military obey orders; and those not of the military leave each other alone, thus not breaking the peace themselves.

"In giving the above directions it is not intended to restrain you in other expedient and necessary matters not falling within their range.

"Your obedient servant,

"A. LINCOLN."

—With a view to securing fairness and freedom in the election to be held on November 3d, Gen. Schofield, in the exercise of the powers vested in him, issued an order on the 20th of October, in which he directed that the county courts should make proper selections of judges of elections throughout the State from loyal men, and ordered that those citizen-soldiers who were entitled to vote at elections in Missouri, should vote in their camps, thus dispensing as far as possible with their presence at election precincts. In particular, he required that the oath prescribed by

the ordinance of the convention should be administered to all the voters before they were permitted to deposit their ballots.

—On the 27th of January of this year a number of Union citizens determined to give Gen. Grant, who was in St. Louis at the time, a public dinner.

1864. The members of the general committee were John How, James O. Broadhead, John R. Shepley, James Taussig, John H. Fife, William D'Oench, Samuel Reber, S. H. Laflin, Thomas Richeson. The committee of arrangements was composed of C. B. Lord, George E. Leighton, C. P. E. Johnson, Barton Able, J. H. Andrews, C. B. Hubbell, and W. J. and Romyn G. Hoeber.

—In compliance with orders from the War Department, Maj.-Gen. J. M. Schofield on the 30th of January relinquished the command of the Department of the Missouri to Maj.-Gen. W. S. Rosecrans. The staff of Gen. Rosecrans was as follows:

Brig.-Gen. John B. Gray, adjutant-general; Col. E. Anson Moro, quartermaster-general; Col. Silas Woodson, inspector-general; Col. John T. Hodgen, surgeon-general; Col. C. P. E. Johnson, paymaster-general; Col. F. D. Callender, aide-de-camp and chief of ordnance; Col. Allen P. Richardson, aide-de-camp; Col. William P. Harrison, aide-de-camp; Lieut.-Col. Melville Sawyer, department paymaster-general; Col. A. R. Easton, aide-de-camp; Maj. C. C. Bailey, aide-de-camp and military secretary.

The honorable aides-de-camp upon the staff of the late Governor were continued as such upon the staff of Gen. Rosecrans.

—Col. J. H. Baker, of the Tenth Regiment of Minnesota Infantry, commanding the post of St. Louis, on March 1st issued an order requiring citizens who had obtained soldiers' clothing by purchase and discharged soldiers to dye their soldier clothing another color. Any citizen who was found wearing soldiers' clothing or any part of the uniform was arrested and the clothing confiscated. Wearing the regulation officer's cord on their hats by either citizens or enlisted men was also prohibited.

—On the 7th of March Gen. Rosecrans issued the following "Special Orders No. 61:"

"7. While it is the determination of the general commanding this department that due protection shall be given within its limits to all religious convocations which may assemble to promote the cause of religion and morality, whether convening as conventions, synods, ministerial assemblies, conferences, council', or under any other name or title, the interests of the country at the present time require that no such assemblages of persons whose proceedings would be disloyal and tend to foment discord and encourage rebellion should be permitted. It is right and proper, therefore, that all members of such assemblages should give satisfactory evidence to the public of their loyalty to the government of the United States, that their patriotism may be known, and that they be distinguished from those who seek its overthrow.

"8. It is therefore deemed expedient and hereby ordered, as a condition precedent to such privilege of assemblage and protection, that each and every person attending such convention, synod, ministerium, assembly, conference, council, or by whatever name it may be called, and participating in the proceedings thereof, shall take and subscribe to an oath of allegiance, and file the same in the office of the assistant provost-marshal of the locality in which the assemblies are held.

"9. It is hereby made the duty of all such assemblages to ascertain, before proceeding to organize and transact business, those who have taken, subscribed, and filed the required oath, and permit only such to participate in their proceedings. And in case any such assemblage shall neglect or refuse so to do, or shall knowingly permit any one who has failed to comply with the requirements of this order to participate in its proceedings, it will be deemed a military offense, for which its members may be held amenable; and any provost-marshal present shall immediately order the assemblage to disperse and prevent the continuance of its proceedings.

"10. The form of the oath of allegiance to be taken, subscribed, and filed as aforesaid shall be in these words:

"'*Oath of Allegiance.*

"'I, ——, of —— County, State of ——, do hereby solemnly swear that I will bear true allegiance to the United States, and support and sustain the Constitution and laws thereof; that I will maintain the national sovereignty paramount to that of all State, County, or confederate powers; that I will discourage, discountenance, and forever oppose secession, rebellion, and the disintegration of the Federal Union; that I disclaim and denounce all faith and fellowship with the so-called Confederate armies, and pledge my honor, my property, and my life to the sacred performance of this my solemn oath of allegiance to the government of the United States of America.

"'_____.

"'Subscribed and sworn to before me this —— day of ——, 1864, at ——.

"'_____.

"'Witness, ——, of ——.'

"11. District provost-marshals will give their immediate and special attention to the enforcement of this order in the respective districts, and enjoin upon each assistant provost-marshal the duty of attending all such assemblages which may be held in his locality, advise those assembled of this order and enforce its directions. And they will also report immediately to these headquarters all cases of neglect or refusal, giving a full description of the character of the assemblage, the names of those present, and an account of its proceedings.

On the 29th Provost-Marshal Sanderson also issued the following "General Orders No. 7:"

"1. The sale, distribution, or circulation of such books as 'Pollard's Southern History of the War,' 'Confederate Official Reports,' 'Life of Stonewall Jackson,' 'Adventures of Morgan and his Men,' and all other publications based upon rebel views and representations, being forbidden by the general commanding, will be suppressed by provost-marshals by seizing the same and arresting the parties who knowingly sell, dispose of, or circulate the same."

—On March 15th "the exhibition and sale of photographs, engravings, paintings, and other kind of likenesses of public persons in the rebel service" was prohibited by Provost-Marshal-General J. P. Sanderson under the severest penalties. On the 26th al

the copies of a newspaper called the *Metropolitan Record* and published in New York were confiscated in St. Louis by the same officer for publishing

1864. "various articles of an incendiary, disloyal, and traitorous character."

—Brig.-Gen. Thomas Ewing, Jr., on April 4th assumed command of the St. Louis district, and the following changes were made in the staff of the district: First Lieut. Harrison Hannahs, Eleventh Kansas Cavalry, was made aide de-camp and acting assistant adjutant-general, and First Lieut. Cyrus Leland, Jr., Tenth Kansas Volunteers, aide-de-camp.

—On April 12th, Gen. W. S. Rosecrans issued the following General Orders No. 15:

"I. The following regimental organizations of the Enrolled Missouri Militia are hereby broken up, and the commissions of all officers in the same consequently vacated:

"16th Regiment E. M. M., Col. M. W. Warne.
"17th Regiment E. M. M., Col. Charles L. Tucker.
"22d Regiment E. M. M., Col. Thomas Miller, Jr.
"23d Regiment E. M. M., Col. George R. Taylor.
"24th Regiment E. M. M., Col. F. D. Callender.

"II. By reason of such disbandment the members of these regiments will be required to re-enroll for the year 1864, in the respective wards or districts in which they reside, and to be assigned by the commissary of exemption of St. Louis County to such regiments as are deemed by him the most convenient and proper."

—Saturday, the 15th of April, was very generally observed by the civic and military authorities and citizens as a day of thanksgiving for recent great victories of the Union armies.

—The quartermaster's department up to April 16th had purchased, during the war, in St. Louis one hundred and seventy thousand horses and ninety thousand mules.

—The county court of St. Louis County on April 20th passed the following order:

"The court having duly considered the petition for an appropriation in aid of the Mississippi Valley Sanitary Fair, filed herein on the 14th of March last past, order that the valuable tract of land owned by St. Louis County, known as the Smizer farm, containing about five hundred acres, together with buildings, fencing, and all other improvements, valued at thirty or forty thousand dollars, be and the same is hereby donated to the Mississippi Valley Sanitary Fair, to aid the humane and patriotic work of taking care of the sick and wounded soldiery of our valley."

—On the 29th of April, Gen. Rosecrans issued General Orders No. 65, in which he said,—

"I. No person shall, directly or indirectly, attempt to deter or prevent any other person from working on such terms as he may see upon in any manufacturing establishment where any articles ordinarily made which may be required for use in the prosecution of the Western waters, or in the military, naval, or transport service of the United States.

"II. No person shall watch around or hang about any such establishment for the purpose of annoying the employés thereof, or learning who are employed therein.

"III. No association or combination shall be formed or continue or meeting be held having for its object to prescribe to the proprietors of any such establishment whom they shall employ therein, or how they shall conduct the operations thereof.

"IV. All employés in such establishments will be protected by military authority against all attempts by any person to interfere with or annoy them in work, or in consequence of their being engaged in it."

—Brig.-Gen. Thomas Ewing, Jr., on June 28th divided the St. Louis military district into sub-districts, as follows:

"First sub-district to include the counties of St. Louis, except Benton Barracks, Jefferson, and Franklin, and all that part of the counties of Gasconade, Osage, and Maries lying east of Gasconade River and north of the northern boundary of Washington County extended; headquarters at St. Louis, Lieut. Col. John N. Herder, 1st M. S. M. Infantry, commanding.

"Second sub-district to include the counties of Perry, Bollinger, Cape Girardeau, Scott, Stoddard, Mississippi, New Madrid, Pemiscot, and Dunklin; headquarters at Cape Girardeau, Lieut.-Col. John T. Burris, 10th Kansas Volunteers, commanding.

"Third sub-district to include the counties of Ste. Genevieve, St. François, Madison, Wayne, and Butler, and all of the counties of Washington, Iron, Reynolds, Carter, and Ripley lying east of the fifth principal meridian; headquarters at Pilot Knob, Col. John F. Tyler, 1st M. S. M. Infantry, commanding."

—At a preliminary meeting of citizens of St. Louis, held on the 4th of July, in pursuance of a call from Mayor Thomas, a committee was appointed, who subsequently issued the following address:

"St. Louis, July 4, 1864.

"*To the People of St. Louis County:*

"The undersigned, a committee appointed for that purpose, earnestly request a large attendance at the rotunda of the court-house at eight o'clock on Thursday evening, the 7th inst. The order from the War Department and the proclamation of the mayor explain the purpose for which the meeting is called.

"It is proposed to obtain a list of three classes of subscribers: 1st, those who will pay a certain amount to the proper committee to hire representative recruits; 2d, those who will directly furnish one or more recruits and make their own arrangements for their compensation; 3d, those who will agree to pay a monthly sum during the service to increase the pay of recruits, and thus aid in supporting their families. . . . The above plan is merely proposed by your committee. Of course it can be set aside and a better one adopted if the meeting see proper.

(Signed)

"James S. Thomas, Louis C. Hirschberg, E. W. Fox, R. J. Rombauer, James K. Knight, James C. Moody, Louis Bach, James Archer, A. G. Braun, William H. Godfrey."

—The following additional sub-districts for military purposes were on July 18th erected in the St. Louis military district:

"The seventh sub-district, consisting of the counties of Gasconade, Franklin, and that part of Jefferson County north of the southern boundary line of Franklin County, with headquarters at Franklin.

"The eighth sub-district, consisting of the counties of Ste.

Genevieve, Perry, and that part of Jefferson County south of the northern boundary of Franklin; headquarters at Ste. Genevieve.

"The ninth sub-district, consisting of the counties of
1864. Washington and St. François; headquarters at Potosi."

—George W. Ford, military harbor master of St. Louis, issued on the 16th of July the following order for the protection of steamers in port:

"All steamers plying to and from the port of St. Louis are required to report at this office at the earliest moment after their arrival.

"All boats permitted at the wharf, in discharging or receiving cargo, are required to keep steam up night and day, either in their main boiler or the doctor boiler, with sufficient engineers to man the same.

"Boats in the stream at anchor, using yawls to communicate with the shore, shall display at the bow of their small boats, when in such use, a white flag one yard square, with a black ball in the centre eight (8) inches in diameter. No small boats will be permitted to ply in the harbor (and those only belonging to steamers in the stream) between the hours of 8 P.M. and 4 A.M., except by special permit. Small boats, when not in use, shall be kept hoisted out of the water.

"All hay, hemp, cotton, and straw now on the landing must be removed at once, and hereafter must be removed in eight hours after being landed."

—H. A. Adams, secretary of the Ladies' Union Aid Society, corner Fifth and Chestnut Streets, on July 25th published an appeal for rags for hospitals and the Army of the Cumberland, and an ambulance and a corps of collectors canvassed the city for "linen and cotton rags, worn shirts and drawers, old handkerchiefs, bed and table linen," and women and children's apparel for refugees.

—Up to July 25th two hundred and sixty-two persons had procured and offered acceptable substitutes at the office of the board of enrollment in St. Louis. The *Republican*, giving an account of the "substitute market" at this period, says,—

"Eighteen of the principals reside elsewhere in the State, but the balance are from such portions of the city and county as lie within the district limits. The substitutes are nearly all aliens, the Irish having the largest representation among them, and the Germans next. English, Scotch, Welsh, French, and Italian names also adorn the list, but only to a small extent. The prices paid them by their principals have varied according to circumstances. About a year ago, when the original conscription act passed, a few were put in at the cheap rates of forty or fifty dollars each. At that time government bounties to recruits were liberal, and the fever of volunteering was not quite allayed, but when a draft became imminent some months afterwards prices rose to about one hundred and fifty. Withal, however, the substitute business remained at a low ebb until a recent period, that immediately preceding the repeal of the commutation clause. Just before that took place two hundred dollars got to be the ruling price, and when the repeal was at last effected by Congress there was an instant advance to three hundred per man. From that point there has been a steady addition to the cost each week, and closing rates are four hundred to four hundred and fifty dollars for a man competent to pass examination at the enrollment board.

"Occasionally a substitute is obtained by chance by the principal himself or through the medium of a 'runner.' But in a large majority of cases they are furnished by Messrs. Stafford, Topping, Cavender & Rowse, Mason & Clements, and others who have opened offices regularly for the transaction of a business of this kind. An applicant who leaves his name at one of these offices is soon supplied at the current rate, and gets his exemption papers made out and filled up in all due form sent directly to his hands.

"Since the business has thus been reduced to a system, aliens and other service-seekers have come to St. Louis in no inconsiderable numbers, some from the interior of this State and Illinois, and some from other cities where substitute hiring is not so well advanced. It is estimated that there are four or five hundred such now here who are open to purchase for the customary three years. None, we believe, have been engaged for a shorter time, although the President may issue his call and order a draft for two years, or for only one. A *locum tenens* is entitled to a bounty from government of three hundred dollars for the three years he engages to serve, in addition to such sum as he may receive from his principal, making together a very comfortable amount. Until a draft occurs, none but aliens and those who have been in the army or navy two years are eligible for purchase in the substitute market. Veterans, whose term of service is just expiring, having found this fact out, have declined to re-enlist, and will go back into the army as substitutes or not at all. Whenever a man's papers are adjusted by the enrollment, his representative is sent out without delay to Benton Barracks, and in a few days forwarded to some camp or garrison for active duty. Quite a delegation was sent off to Fort McHenry during the recent rebel raid upon the vicinity of Baltimore.

"With regard to the draft itself, we may state that everything is in readiness for carrying it out throughout the State. In this district over thirty thousand tickets bearing names copied from the enrollment-books have been prepared, assorted, and put into packages by sub-districts, and sealed up, ready to be opened and put into the draft-wheel whenever the proper day arrives. The President has just issued his preparatory mandate, fifty days after which a draft will take place. If the call be fixed for five hundred thousand, the quota of Missouri will be about eighteen thousand, and if for three hundred thousand, we are responsible for no more than twelve thousand. Even then there will be a considerable deduction on account of the excess over the last call, which lies to our credit on the books of the adjutant-general at Washington, and for all the substitutes that are now being so plentifully supplied. Those who are nervous with fear of being drafted may comfort themselves with the reflection that there are thirty chances to one in their favor against any such dreaded mishap."

—Maj.-Gen. W. S. Rosecrans, commanding the Department of Missouri, on July 28th issued the following appeal to the "citizens of St. Louis:"

"By authority from the War Department, I have called for some regiments of twelve and six months' volunteers, to meet the local demands of the military service, and give peace and protection to the State.

"Under this call I wish you to furnish two splendid regiments, models of soldiership and military bearing, to serve for twelve months in St. Louis.

"While it is expected that they will serve mainly or entirely here, I want no man in them who would hesitate for a moment to go wherever duty and country calls.

"The officers and soldiers ought to be picked men. None

should be proposed, and none will be recommended for commissions unless they are qualified to command and give promise of taking, if they do not possess, 'military polish.'

1864. "As it is, my wish is to make these regiments the pride and honor of St. Louis. They will be kept on duty here on condition that they shall make themselves worthy of it.

"May I not hope, nay, I do hope and expect from the people who got up the most complete, unique, and successful 'Sanitary Fair' in the United States, two regiments of the finest troops in the service, to be called the '*St. Louis Volunteer Guards.*'"

To encourage enlistments in the proposed St. Louis Volunteer Guards, a committee representing a number of tax-payers waited upon the judges of the county court on the 8th of August and presented a petition signed by more than one hundred tax-payers, asking that an appropriation of six hundred thousand dollars be made for bounties to recruits for the two regiments called for by Gen. Rosecrans. The members of the committee were

Dr. C. A. Pope, Judge John M. Krum, Hon. Henry T. Blow, A. G. Braun, Carlos S. Greeley, George H. Rea, Charles F. Myers, James Taussing, N. C. Chapman, George R. Taylor, E. W. Fox, Dr. M. L. Linton, J. P. Doan, George Gherke, Christopher Stachlin, James Blackman, James Clemens, Jr., Charles K. Dickson, Gen. A. G. Edwards, James O. Broadhead, Hudson E. Bridge, Oliver Garrison, Bernard Krickhard, and O. A. Hart.

After hearing the remarks of the committee, the court passed an order appropriating four hundred thousand dollars for bounties as requested.

Immediately after the passage of this appropriation measures were taken to organize the regiments. Col. Samuel A. Holmes was appointed to organize one regiment, and the following persons received commissions as second lieutenants, with the necessary authority to recruit six or twelve months' men: W. J. Whitwell, Monroe Harrison, Adam Box, H. Kallman, George W. Gilson, E. J. Castello, Robert C. Allen, M. Green, Henry R. Switzer, and D. G. Stillinger. It was understood that if they succeeded in raising companies they were to command them, with the rank and pay of captains.

The following persons were commissioned second lieutenants for the purpose of recruiting men for the other regiment, which was to be commanded by Col. Weydemeyer: Frederick Gratz, Henry Hulm, Henry J. Bischoff, Felix Lais, H. F. Dietz, Carroll P. Roetter, Christian Elrodt, A. C. Windmuller, James Schubert, and John E. Sanders.

—On the 9th of September, Gen. Rosecrans, under "General Orders No. 165," made an assessment upon the underwriters of St. Louis for the purpose of building or purchasing a tow-boat. A return, under oath, was

"required from the proper officer of each insurance company of the city, and from the agents of all other insurance companies having recognized agencies in the city, of one-half of all hull premiums, nett; of one-third of all cargo premiums, nett; and one-sixth of all fire premiums on steamboats, nett; the returns to be based upon the nett receipts for the six months ending on the 30th of June, 1864."

—Col. T. E. Chickering, provost-marshal-general of the Department of the Gulf, at New Orleans, gave notice in August that no permit was required for the shipment of merchandise or produce not contraband of war from St. Louis to New York *via* New Orleans. Commenting upon this fact, the *Republican* said that the advantage of this arrangement was

"that it removes a fruitful cause of corruption on the part of certain dishonest government officials at New Orleans, whose custom it has been to blackmail St. Louis merchants by extorting large extra fees from them for the privilege of giving them permits. We have heard of local shippers who have been mulcted by such sharpers a dollar and a half per barrel upon whiskey, for the benefit of their own pockets, and independent of the usual treasury regulation fee. Coincident with the abolishment of this permit system, we learn that New Orleans steamers have reduced the freight to that city from a dollar to seventy-five cents per hundred pounds."

—On the 9th of September a river guard was established at each of the six ferries at and near the city, for the purpose of preventing the crossing of soldiers and negroes who did not show papers signed by the military authorities. At night the guard was posted six miles along the river-front to prevent the passage of small boats.

—Gen. Rosecrans, on September 27th, requested the steamboat captains, pilots, engineers, and other boatmen to form a company for the protection of steamboat property in the harbor of St. Louis. The company was organized at the Merchants' Exchange on the 30th of September, with N. J. Eaton as captain, and Griff Prathin second lieutenant.

—In conformity with a letter of instructions from Gen. E. Kirby Smith, dated Aug. 11, 1864, Maj.-Gen. Sterling Price made immediate arrangements for a movement of Confederate troops into Missouri from Arkansas. He formed a junction with the force of Gen. J. O. Shelby, and on the 30th took up the line of march with twelve thousand men. On the 18th of September he divided his army into three divisions, commanded respectively by Maj.-Gen. J. F. Fagan, Maj.-Gen. J. S. Marmaduke, and Brig.-Gen. J. O. Shelby. He then invaded Missouri in three columns, and advanced within ten miles of St. Louis, on the St. Louis and Iron Mountain Railroad. The close proximity of the Confederate army under its dashing leader created the greatest excitement in the city of St. Louis, and alarmed the commanding general. On the 25th all public business was suspended, to enable the authorities to complete the organization for local

defense. All the enrolled militia of the city was called into active service, and the "exempts from the military service capable of defending their homes" were requested to organize under the direction of the mayor. Officers and soldiers who had been discharged or were on veteran furloughs were requested to report at Schofield Barracks No. 2, where they were organized by Col. Laibold. The Guards were instructed by Gen. E. C. Pike "to arrest all residents of the district who are not with their regiments or show satisfactory evidence of exemption." Complete organizations of "loyal exempts" were also accepted for temporary service, and the chief quartermaster and chief commissary of subsistence were ordered to organize into companies all their employés who could bear arms. The Old Guard, under the command of Capt. N. H. Clark, tendered their services in the emergency, and their offer was accepted. The First Brigade of the enrolled Missouri militia in the city was officered as follows:

1864.

Brig.-Gen. E. C. Pike, commanding; Maj. D. K. Stickton, brigade quartermaster; Maj. M. P. Hanthorn, brigade commissary; Maj. E. Marthens, brigade surgeon; Capt. C. H. Tillson, A. A. A. G.; Capt. A. Wilhartitiz, A. A. A. G.; Capt. J. O'Brien, A. D. C.

Besides the organizations for local defense, a large number of men, white and colored, particularly Southern sympathizers residing in the city, were pressed into service, and set to work throwing up breastworks and building or completing fortifications.

Military reinforcements in the mean time began to pour in from every quarter, until there were at least fifteen thousand men under arms in the city. Gen. Price, in his official report of his campaign in Missouri in 1864, says,—

"I brought out with me over five thousand recruits, and they are still arriving daily. After I passed the German settlements in Missouri my march was an ovation; the people thronged around and welcomed us with open hearts and hands. Recruits flocked to our flag in such numbers as to threaten to become a burden instead of a benefit, being mostly unarmed. In some counties the question was not who should go to the army, but who should stay at home. I am satisfied that could I have remained in Missouri this winter the army would have increased fifty thousand men"

In order to deter young men in the State from joining the Confederate army, Gen. Rosecrans, on the 27th of September, issued the following "General Orders No. 179":

"1. Traitors and spies caught in the act of passing the Federal lines to the guerrillas or to the rebel forces now invading the State will be shot on the spot. Those captured prior to the promulgation of this order will be sent immediately to the nearest headquarters, accompanied by papers and witnesses, for trial.

"The provost-marshal-general is directed to send, without delay, those captured within the past two or three days before a military commission for trial."

—In view of the intense excitement caused by the Confederate invasion, and "to avoid everything calculated to arouse the passions and disturb the public peace and tranquillity," the Democratic Central Committee, through Robert W. Renick, president, D. M. Armstrong, secretary, and Christopher Kribben, chairman of the executive committee, thought it advisable to suspend all public meetings until further notice.

—The city was thrown into the greatest consternation on the 28th of September by the announcement that Gen. A. J. Smith's command had retreated to De Soto before the Confederate advance, that the railroad below Big River had been destroyed, and that Gen. Hugh S. Ewing was surrounded at Pilot Knob and besieged at that place.

In view of the threatened danger, as it was believed St. Louis was Gen. Price's objective-point, Maj.-Gen. Frank P. Blair, who was in the city on sick leave, tendered his services to Gen. Rosecrans, and on the 28th was assigned to the command of the county of St. Louis, and the troops of all kinds for the defense of the city. Col. J. H. Baker commanded the city proper, under the orders of Gen. Blair. Col. B. Gratz Brown was charged with the task of organizing the City Guard, and afterwards, by order of Gen. Rosecrans, was assigned to the command of the militia exempts organized for special duty in St. Louis. On the 28th a large number of veterans from Illinois arrived in the city. There were at this time about twelve thousand militia under arms in St. Louis. As a consequence of the Confederate invasion, the city was full of prominent citizens and other refugees who had fled before the advancing army from all parts of the State, but particularly from Southeast Missouri. To accommodate the refugees and contrabands quarters for twenty-five thousand persons were erected near the city. From a statement made by the Rev. Mr. Wright, who was the chaplain and superintendent of refugees and contrabands, we learn that there were four receptacles for these unfortunates,—two in St. Louis, one at Pilot Knob, and one at Cape Girardeau. At these stations there were on August 31st two thousand three hundred and ninety-seven persons, of whom nineteen hundred and ninety-five were refugees and four hundred and two contraband. They were distributed in the following manner:

	Refugees.	Contraband.
Pilot Knob	1180	1.5
Cape Girardeau	330	18
St. Louis	299	...
Benton Barracks	186	229
	1995	402

—Under an order issued September 29th, permits were required for the shipment by rail or steamer of merchandise to all that portion of the State
1864. lying south of the Missouri River.

—The organization of the citizens had so far progressed that business was resumed on October 1st, with the understanding that business houses were to close at three o'clock P.M., to give their employés an opportunity for drill.

—The militia was enrolled with the greatest rapidity, and the entire organization was formed into one division of three brigades, under the command of Brig.-Gen. E. C. Pike. The first brigade, under Col. Miller, went into rendezvous at Carondelet late in September. It was composed of the First, Second, Eighteenth, and Eighty-fifth Regiments, the two latter from Franklin County, Mo. The Second and Third Brigades went into camp at "Camp Sheridan," at the head of Olive Street. About the same time the Second Brigade was composed of the Third, Fourth, and Tenth Regiments, under the command of Col. C. D. Woiff, of the Fourth, acting brigadier-general. The Third Brigade was composed of the Seventh, Eleventh, and Thirteenth Regiments, under the command of Col. G. F. Meyer, of the Seventh Regiment, acting brigadier. The two appointees of Gen. Blair, Cols. Coleman and Gage, had not then assumed command. The Second and Third Brigades on September 30th had over three thousand men on parade. The troops were commanded by Brig.-Gen. E. C. Pike, with the following staff officers: Col. John Knapp and Capt. O'Brien, aides-de-camp; Maj. Hanthorn, commissary sergeant, with Maj. Hoffman, of the Fortieth Missouri, in company. The regiments were commanded as follows: Third, Col. F. Valcamp; Fourth, commanded by the lieutenant-colonel of the regiment; Tenth, Lieut.-Col. Cleveland; Eleventh, Lieut.-Col. Beckman; Thirteenth, Lieut.-Col. John R. Marcy. The First Battalion of cavalry was under the command of Maj. Walton.

—A small detachment of Confederate cavalry made a raid on the post-office at Cheltenham, on the Pacific Railroad, only four miles from the city, on September 29th.

—Maj.-Gen. A. Pleasonton assumed command of the St. Louis district on the 2d of October.

—To prevent supplies from reaching the Confederates, an order was issued October 5th prohibiting the shipment of goods outside the county of St. Louis without special permission. These restrictions were removed on November 4th. On account of the scarcity of hay, army horses were fed on half-rations in St. Louis, and the shipment of hay from the city was prohibited. All hay received in the city and not used for private purposes was confiscated by the military.

—In view of the close proximity of the Confederate raiders, two brigades of the First Division of Enrolled Missouri Militia, Gen. E. C. Pike commanding, on the 1st of October marched out of the city and encamped at Laclede Station on the Pacific Railroad.

—The distress in the city caused by the invasion of the State by the Confederates, and the consequent withdrawal from their homes of men having families dependent upon them for support, as well as by the large number of refugees who had been compelled to flee to St. Louis in a most destitute condition, induced Mayor J. S. Thomas to institute measures for their relief. Accordingly, on the 7th of October, he issued an appeal requesting the citizens to contribute such sums of money and such provisions or clothing as might be in their power. For the purpose of carrying his appeal into effect he appointed the following gentlemen a committee to make collections in each ward:

First Ward, Col. Schistner, Stephen Barlow, Aug. Kriekhaus, E. Anheuser.

Second Ward, George Gehrke, Hy. Gemp, Bernard Klein, Chas. Cady.

Third Ward, H. Schepmann, Amade Vallé, B. Kraft, C. C. Simmons.

Fourth Ward, Col. Chas. Fritz, George W. Cline, A. T. W. Goodwin, Ph. Danerheim, Th. Kalb.

Fifth Ward, J. Winkelmeyer, John H. Andrews, Albert Fischer, B. D. Killian, J. H. Herrser.

Sixth Ward, R. Kefler, Dwight Durkee, —— Neilsen, E. W. Fox, Nic. Schaffer.

Seventh Ward, D. Hartmann, Fred. Heigerwald, John Dunn, John H. Gerdemann, Squire Heath.

Eighth Ward, John Gresher, John Stewart, John C. Vogel, Meyer Priedo, R. Weber.

Ninth Ward, Louis Bash, F. Pesh, E. C. Sanders, Caspar Stolle, Pat. Driscoll.

Tenth Ward, Adolphus Meier, Ph. Stremmel, Chas. Irwin, Chas. Borg, N. C. Chapmann.

—Intelligence was received in St. Louis on the 10th of October that Gen. Price and his army had retired from Jefferson City without hazarding a regular engagement, and there now being no immediate danger of an attack on St. Louis, Gen. Rosecrans and staff left the city on the 12th to join Gen. Pleasonton near Jefferson City, but Gen. Rosecrans and Gen. A. J. Smith returned to St. Louis on the 13th of November.

—Col. J. P. Sanderson, who had filled the office of provost-marshal-general of the Department of Missouri for several months, died at his residence in St. Louis on October 14th. Col. Sanderson had been chief clerk of the War Department during Simon Cameron's term

as secretary. Before resigning that position he was appointed to a lieutenant-colonelcy in one of the new regiments of the regular army, and in a short time attained the colonelcy of the Thirteenth United States Infantry by seniority. His infirm state of health having incapacitated him for protracted service in the field, he was assigned to the Department of the Missouri coincidently with the appointment of Maj.-Gen. Rosecrans as its commander. The duties that devolved upon him were discharged with a vigor and system of detail that proved him to be a man of rare capacity for such a position. In consequence of his death Col. Joseph Darr, Jr., was appointed provost-marshal-general.

1864.

—In accordance with orders issued by Gen. Rosecrans, six Confederate prisoners of war were on October 29th executed by shooting, in retaliation for the shooting of Maj. James Wilson and his six comrades, of the Third Missouri State Militia Cavalry, by the Confederates, near Washington, Mo.

The names of the men led to execution were James W. Gates, Third Missouri Cavalry, C.S.A.; Harvey H. Blackburn, Company A, Coleman's Regiment Arkansas Cavalry, C.S.A.; John Nichols, Company G, Second Missouri Cavalry, C.S....; Charles W. Minniken, Company A, Crabtree's Arkansas Cavalry, C.S.A.; Asa V. Ladd, Company A, Burbridge's Missouri Regiment of Cavalry, C.S.A.; and George T. Bunch, Company B, Third Missouri Cavalry.

About half-past one o'clock the procession started from Gratiot Street prison, and, under escort of a detachment of the Tenth Kansas, arrived on the ground of execution about half-past two. There were, including soldiers and citizens (the former largely preponderating), about three thousand persons on the ground, with the guards and escort. The firing party consisted of fifty-four men,—forty-four of the Tenth Kansas and ten of the Forty-first Missouri,—thirty-six being detailed to fire, eighteen being in reserve. When the prisoners arrived on the ground they were marched promptly to the places fixed for the execution, there being six upright pine posts set in the ground, with square board seats attached for each man to sit upon. They took their places upon their seats, each with comparative calmness, and nearly all with an appearance of resignation to their dreadful fate. But little emotion was displayed by any of the six, except Nichols and Minniken.

After each had been tied to a stake their eyes were bandaged, and the command to make ready was given. There was a momentary suspense, and then a further command, "One, two, fire!" and the entire volley was discharged almost as one gun. Instantly the blood spurted from the breast of each prisoner, and quivering for a moment their heads fell upon their shoulders, and then their bodies lurched to one side and fell as near the ground as they could with their arms pinioned to the stakes. In this position the blood streamed from their wounds, which were nearly all in the breast, and in one or two places formed little pools upon the ground. The attending physicians examined the bodies as soon as the firing ceased, and found no signs of life in any except Blackburn. In five minutes from the time the volley was discharged they were all dead.

Gates, after he was shot, uttered the exclamation, "Oh!" and Blackburn cried out, "Kill me, quick!" but in an instant later they were evidently insensible.

After this the bodies were placed in coffins and taken in charge by the government undertaker, Mr. Smithers. Then the crowd dispersed and the soldiers returned to their quarters.

It had been the intention of Gen. Rosecrans to execute a major of the Confederate service as soon as one fell into his hands. In a short time Maj. Enoch O. Wolf, of Ford's Confederate regiment, was captured, and was ordered to be executed by Gen. Rosecrans on the 11th of November. At the request of Rev. P. M. McKim and other Union citizens of St. Louis a respite of fourteen days was granted him to prepare for death. Soon after the issue of this order, on the same day, President Lincoln sent the following dispatch to Gen. Rosecrans: "Suspend execution in case of Maj. Wolf until further orders, and meanwhile report to me in the case." The execution of Maj. Wolf was never carried into effect.

—At the request of Rev. P. J. Smet, S.J., the Secretary of War on November 10th exempted the following members of the St. Louis University, drafted in St. Louis: Rev. John L'Esperance, Rev. Joseph E. Kelly, Rev. John T. H. Sealer, and Rev. John W. O'Neill.

—Some time after the war commenced the Secretary of War and the quartermaster-general, having differed as to the mode of conducting the cavalry arm of the military service of the government, the former established a "Cavalry Bureau" at Washington, and placed it under the direction of Maj.-Gen. Stoneman. Subordinate to the bureau were established Eastern and Western Divisions,—one at Giespoint, near Washington, and the other at St. Louis. For the latter Louisville was first considered an eligible site, but after an examination of the relative merits of the two cities the location was finally made at St. Louis. After six or eight months' experience, the secretary's plan of dissociating the cavalry arm entirely from the

quartermaster-general's direction was found not to succeed as well as had been anticipated. It was, therefore, restored to Gen. Meigs' department,
1864. but retained the name of Cavalry Bureau and the division organizations at Giespoint and St. Louis.

West Division Cavalry Bureau was the official title of the institution in St. Louis, and it was opened on Oct. 26, 1863. Brig.-Gen. J. P. Hatch was first assigned to the command, and served until March or April following. Brig.-Gen. J. W. Davidson succeeded, and served until he was ordered to Gen. Canby's department. Brig.-Gen. Edwin Hatch was then ordered to St. Louis, but remained only two weeks, when he gave place to Col. Lewis Merrill, who was in command up to Oct. 30, 1864, when he was relieved and assigned to general inspection service. A further change in the character of the Cavalry Bureau occurred from the law of Congress passed in 1864, which placed it completely under the direction and supervision of the quartermaster's department, and made it, under that law, the first of the nine divisions or bureaus into which the extensive and complicated duties of that office were at that time divided. Under this arrangement, Capt. Ingham Coryell, who originally located the depot in St. Louis, and who had been its chief quartermaster and executive officer, had charge.

The depot grounds were directly north of Benton Barracks, and but a few rods distant, and covered an area of one hundred acres. They were securely inclosed on all sides, and presented the aspect of a thriving village. Long ranges of stables, grain and forage warehouses, a building for the repair of saddles, a blacksmith-shop, carpenter's shop, quarters for employés, various offices for the transaction of business, and many other structures comprised houses and buildings in sufficient number to make a fair-sized country town.

Col. Merrill, Capt. Coryell, Maj. Gleim, and a number of officers and clerks were domiciled in October, 1864, at No. 87 Olive Street.

At the depot were James Wallace, general superintendent; James Lindsay, superintendent of mechanics; Mr. Schneider, in charge of the principal corral; Mr. Buell, superintendent of hospital yard; Dr. Valentine, veterinary surgeon, and assistants, mechanics, teamsters, farriers, laborers, etc., to the number of nine hundred and fifty persons, the pay-roll for all of whom footed up about one thousand dollars per day.

Many of the minor officials and employés, such as watchmen, were discharged soldiers who had become incapacitated for further active service. Those who were capable of service, civil employés and all, were organized into three companies of infantry and one of cavalry, and were officered and well drilled. There was an armory on the grounds, from which they could have been armed in ten minutes, in case of such an emergency as arose when an attack was threatened upon the city by the Confederates under Price.

A fire brigade was also organized, among the inmates and employés of the depot, with hose, hooks and ladders, and other appliances for putting out fires. Water was abundant. A large well on the premises, in which was placed a pump, worked by the engine which ran the mill for grinding corn, had a capacity for supplying ten thousand gallons in a single hour.

The police organization was also complete in its way, and all offenders against good order were promptly arrested and punished.

The open market system in the purchase of horses which was adopted in St. Louis in place of the contract system produced very satisfactory results. A man having one or a number of horses for sale brought them to the depot and submitted them to the examination of the government inspectors. The animals were put through severe exercises in running, jumping, etc. The tests applied were so perfect that it was a very rare thing for an unsound or unserviceable horse to pass examination. When he did pass, his owner received one hundred and seventy dollars, or one hundred and sixty dollars, according to the horse's fitness for artillery or cavalry duty. If less than a thousand dollars worth were purchased, Quartermaster Coryell paid the money, if he happened to have it on hand. If the bills exceeded that sum, payment was made as early as practicable in a "certificate of indebtedness." No mules were bought at the depot, the mule business being monopolized at the large corral nearer to the city, on the Franklin Avenue Railroad. Mares were not purchased for army use, for the reason that the government did not desire to lessen the production of the country by the waste of war. A special order for the purchase of two thousand mares was issued in the summer of 1864, but Gen. Halleck forbade the purchase of any more.

During the year the depot existed the number of horses purchased and received was 47,524, of which there were issued

For service	38,714
Total number unserviceable received at the depot	8,563
Of which were condemned and sold	2,524
Died of disease	562
Killed on account of glanders	1,429
	4,515
Recuperated and issued again to service	4,048

Horses that were recuperated and returned to the field were preferred to new and inexperienced ones.

The number that were ordinarily at the depot awaiting requisitions was about five thousand. Good stabling was constructed for nine thousand. In addition, there was a sub-depot at the town of Mattoon, Illinois, where there were large and cheap grass pastures. At the two points fully thirty thousand horses could have been accommodated.

1864.

About four hundred and fifty thousand dollars per month was disbursed by the government in St. Louis for horses, and on Oct. 30, 1864, there was a million dollars in vouchers lying over and awaiting payment.

—The First, Second, and Third Brigades, First Division of the Enrolled Missouri Militia, were relieved from active service on November 3d, and their arms and equipments were turned over to the quartermaster-general of the State.

—Another military execution took place within the walls of the St. Louis County jail on the 26th of December. James M. Utz, a young man of twenty-six years of age, who was born and raised in the vicinity of Bridgeton, St. Ferdinand township, St. Louis, was the unfortunate victim. Some time in 1862 he was captured in the vicinity of his home. At that time it was supposed that he was acting in the capacity of a Confederate spy. This, however, was not certainly known, but, be this as it may, he managed to get exchanged at the time as a prisoner of war. The circumstances leading to his last arrest, and inducing the belief that he was acting as a spy, grew out of a letter written in an ingeniously-arranged cipher, which was captured some time in the latter part of July, 1864, on the person of one of five men found in Jefferson County, on their way, it was supposed, to join Gen. Price's command. The contents of this letter led to the arrest of James M. Utz, and his trial before the military commission sitting in St. Louis, of which Col. W. A. Barstow, Third Wisconsin Cavalry, was president. Utz was arraigned on three separate charges,—first, being a Confederate spy; second, recruiting men within the lines of the United States forces for the Confederate army; third, carrying correspondence and information to the enemies of the United States. The prisoner was convicted and sentenced to death, and was transferred from Gratiot Street prison to the county jail on Christmas evening. A few minutes before twelve o'clock on Monday, December 26th, he was led by the attending officers from the cell to the scaffold, accompanied by Rev. Father Ward, of the Catholic Church, as spiritual adviser, and at twenty minutes after twelve o'clock the bolts were drawn and the drop fell.

—During the last ten months of 1864 Missouri furnished over twenty thousand volunteers to the Union armies.

—Early in December, 1864, Gen. Rosecrans was relieved of the command of the Department of the Missouri, and Gen. Granville M. Dodge, of Iowa, was appointed to succeed him. Brig.-Gen. Thomas Ewing, Jr., commanded the district of St. Louis, with the following officers as his district staff:

Lieut.-Col. David Murphy, Fiftieth Missouri Volunteers, Inspector; Maj. S. D. Carpenter, Missouri State Volunteers, Surgeon in Charge; Maj. H. H. Williams, Tenth Kansas Veterat. Volunteers, Provost-Marshal; Maj. W. Fischer, Fifth Missouri State Militia, Topographical Engineer; Maj. C. H. Gregory, Seventh Kansas Veteran Cavalry, Chief of Cavalry and Acting Ordnance Officer; Maj. H. Hannahs, Fiftieth Missouri Volunteers, Acting Assistant Adjutant-General (in charge of office); Capt. H. Garvens, United States Volunteers, District Quartermaster; Capt. G. W. Gilson, Missouri Volunteers, Assistant Inspector; Capt. C. L. Porter, Eighteenth United States Infantry (colored), in charge of Permit Office; Chaplain J. G. Forman, First Infantry Missouri State Militia, Superintendent of Refugees and Contrabands; 1st Lieut. William Ewing, United States Army, Assistant Commissary Musters; 1st Lieut. A. Vezen, Fourth Missouri Cavalry, A. D. C. and A. A. A. G.; 2d Lieut. G. E. Hodgdon, Veteran Reserve Corps, Judge-Advocate; 2d Lieut. T. F. Oakes, Eighteenth United States Infantry Corps, A. D. C.

—Gen. Dodge, on assuming command of the department, retained the whole force of clerks, and appointed to his staff most of the officers who had served under Gen. Rosecrans. He, however, appointed as his aides-de-camp officers who had served with him in the field in Tennessee, Mississippi, and Georgia during the greater period of the war. His aides were Capt. George Ford, Fourth Iowa; Lieut. George C. Tickenor, Thirty-sixth Iowa; and Lieut. Edward Jonas, Fiftieth Illinois.

—In consequence of the destruction of the refugee barracks, the large marble-front hotel building, erected by Louis G. Picot, at the southwest corner of Broadway and Biddle Streets, at a cost of about one hundred thousand dollars, was rented in February, 1865, by the government for refugee quarters.

1865.

—On the 4th of February, Maj.-Gen. John Pope assumed command of the Military Division of the Missouri, embracing the Departments of Missouri, of Kansas, and of the Northwest, with headquarters in St. Louis. His staff consisted of Brig.-Gen. T. C. H. Smith, chief of staff; Lieut.-Col. Edward Meyers, quartermaster; Col. C. A. Morgan, A. D. C., inspector-general; Maj. J. F. Maline, A. A. A. General; Capt. M. Norton, A. G.; Capt. J. McC. Bell, A. A. General; Capt. Edward Haight, A. A. D. C.

—The special orders issued by the provost-marshal-

general on March 8, 1864, prescribing certain rules to be observed by religious convocations, was on March 3, 1865, so modified by Provost-Marshal J. H. Baker as to read as follows:

"It is hereby made the duty of all such assemblages to submit the roll of the members of their organization to the provost-marshal of the district in which the assemblage has convened before proceeding to the transaction of business.

"The provost-marshal to whom the roll is submitted will thereupon proceed to ascertain from the records of his office whether any of the members of said assemblage have failed to take and subscribe to the oath prescribed by said Special Orders No. 62, and any person found to have so failed will be by him at once forbidden to participate in the business of the assembly until such time as he has complied with the requirements of said order, and should any person so forbidden meet with or attempt in any manner to participate in the doings of the said assembly, he will be immediately arrested and sent to this office, with a statement of the facts in his case."

—On March 7th, Governor Thomas C. Fletcher issued a proclamation, in which he stated that there no longer existed in the State of Missouri any organized force of the enemies of the government of the United States, and announced the restoration of civil law.

—In compliance with an act of the General Assembly of Missouri entitled "An Act for the organization and government of the Missouri militia," the State was divided into three military districts, the third district comprising the city and county of St. Louis. Brig.-Gen. D. C. Coleman assumed command of the Third District on the 28th of February, with orders to proceed to enroll the male inhabitants in his district. On the 8th of March he issued the following order, appointing enrolling officers:

"In compliance with General Orders No. 1, Headquarters Second Military Division, State of Missouri, the following officers of the Enrolled Missouri Militia are hereby appointed enrolling officers. They will proceed at once to enroll all male inhabitants (persons of color included) of the several wards and townships in St. Louis County:

"P. J. Hays, lieutenant, Company I, Eighty-fifth Enrolled Missouri Militia, St. Louis township; E. A. Chapman, captain and adjutant, Eighty-fifth Enrolled Missouri Militia, Central township; C. Roeber, captain Company G, Second Enrolled Missouri Militia, Carondelet City; M. Tanzberger, captain Company C, Second Enrolled Missouri Militia, Carondelet township; E. Augustine, captain Company D, First Enrolled Missouri Militia, Bonhomme and Meramec; J. McCarty, first lieutenant Company F, Eighty-fifth Enrolled Missouri Militia, St. Ferdinand township; W. Waldschmidt, captain and adjutant, Third Enrolled Missouri Militia, First Ward; H. Specker, first lieutenant Company C, Eighth Enrolled Missouri Militia, First Ward; C. Oberbeck, captain Company G, Fourth Enrolled Missouri Militia, Second Ward; E. G. English, captain and adjutant, Company D, Fifth Enrolled Missouri Militia, Third Ward; E. Aechster, captain and adjutant, Sixth Enrolled Missouri Militia, Fourth Ward; R. E. Craig, captain Company A, Eighth Enrolled Missouri Militia, Fifth Ward; L. R. Gordon, captain Company G, Tenth Enrolled Missouri Militia, Sixth Ward; A. Graser, captain Company K, Tenth Enrolled Missouri Militia, Sixth Ward; J. D. Merten, captain Company C, Eleventh Enrolled Missouri Militia, Eighth Ward; C. Luehrmann, captain Company D, Eleventh Enrolled Missouri Militia, Ninth Ward; J. H. Winkelmayer, captain Company C, Thirteenth Enrolled Missouri Militia, Tenth Ward; M. R. Clark, first lieutenant Company A, Thirteenth Enrolled Missouri Militia, Tenth Ward."

The following officers on March 20th were assigned to his staff:

Maj. A. Wilhartitz, acting assistant adjutant-general; Maj. A. S. Barnes, surgeon; Capt. Gustavus Cohrs, assistant district quartermaster; Lieut. John S. Weber, assistant aide-de-camp.

—There was no means of feeding the refugees in St. Louis except through assessments upon Southern sympathizers, but these assessments, as we have shown, were suspended in the summer of 1864 by Gen. Halleck. There was in existence, however, an order from the War Department authorizing such assessments, and its enforcement was about to be resumed by Gen. Dodge, who was authorized to assess this class of citizens five thousand dollars for the rental of the new hotel, "Asylum Home," and five thousand dollars for its maintenance; but, as will be seen by the following correspondence between Gen. Dodge, the then commander of the department, and J. H. Britton and James B. Eads, of the Third National Bank, the plan of levying assessments upon citizens of Southern sympathies was abandoned, and the generosity of the Union citizens was relied upon for the raising of such sums of money as were required for the refugees, or for any charitable purposes:

"St. Louis, March 14, 1865.

"Dear Sir,—Having learned during my interview with you this morning that you were desirous of obtaining ten thousand dollars for the purpose of relieving the distress of refugees and contrabands in our community, and assured that your own feelings (if not your judgment) disapproved of raising this sum by assessments upon individuals residing in this department, I expressed the belief that, although our people had suffered as much and had given as freely as any other in the land, the sum would be cheerfully contributed at once by our banking institutions if they were informed of the charitable use for which the money was designed: and that I felt confident they would much sooner give the amount, or a much larger one if need be, than have old animosities and ill feelings revived among us by assessing men who, no matter what their antecedents may have been, were now, and had been for the past two or three years, quiet and peaceable citizens.

"Knowing the plan proposed by the President, and cordially approved by Governor Fletcher, for the pacification of the State of Missouri, and knowing that the President's amnesty proclamation is still in force, I cannot but believe that the levying assessments at this late date in a community as great as this is calculated to defeat the policy indicated by the President. I cannot believe that those who have been disloyal, no matter how desirous they may be to repent of their former conduct and submit to the laws, can enter with any cordiality in this much to be desired movement throughout the State if they are led to believe that assessments will be laid upon them from

time to time after order is restored, the effect of which will be to remind them of past delinquencies.

"The rebel in arms can scarcely be expected to give
1865. up his musket and avail himself of the President's amnesty if he learns that instead of being received as an erring and repentant brother he is to be continually taunted for his past sins, and his property taken without form of law in punishment for them.

"The amnesty implies forgiveness, while the latter course assures him that there was none intended.

"I am happy to be able to assure you that these views are unanimously concurred in by the board of directors of the 'Third National Bank' of St. Louis, of which I have the honor to be a director, and I herewith inclose you a letter from the president, informing you of the action of the bank on being notified by me of the charity you desire to extend to the suffering refugees and contrabands in St. Louis.

"I have the honor to be, your obedient servant,

"JAS. B. EADS.

"MAJ.-GEN. G. M. DODGE, *Commanding, etc.*"

"THE THIRD NATIONAL BANK OF ST. LOUIS,
"March 14, 1865.

"MAJ.-GEN. G. M. DODGE, *Commanding Department of the Missouri, St. Louis:*

"DEAR SIR,—Our board, learning that you desired ten thousand dollars for charitable purposes, have this day appropriated one thousand dollars, and instructed me to place the amount in your hands, subject to such disposition as it may be your pleasure to make of it. Permit me to hand you herewith a check for the same.

"Respectfully, your obedient servant,

(Signed) "J. H. BRITTON, *President.*"

"HEADQUARTERS DEP'T OF THE MISSOURI,
"ST. LOUIS, MO., March 15, 1865.

"JAMES B. EADS, Esq., *Member Board of Directors, Third National Bank, St. Louis, Mo.:*

"DEAR SIR,—I have the honor to acknowledge the receipt of your communication of the 14th inst., inclosing action of the Third National Bank of St. Louis, with check for one thousand dollars, to be used for the benefit of the destitute refugees and contrabands in St. Louis, for which, in their behalf, accept my thanks.

"I have suspended collection of the assessments, having been assured that your generous action will be emulated by others, and thereby relieve me from any further action or trouble in the matter.

"I am, sir, very respectfully, your obedient servant,

"G. M. DODGE,
"*Major-General Commanding.*"

The provost-marshal-general, in February, seized about eight thousand dollars belonging to Wm. D. Merriwether, of Batesville, Ark., which was on deposit with the firm of L. Levering & Co. In March the same officer seized property and money valued at over one hundred thousand dollars, which belonged to Mrs. Lisinka C. Brown, a widow, who afterwards married Maj.-Gen. Ewell, of the Confederate army.

—On March 16th, J. E. D. Cousins, who had been chief of police of St. Louis for nearly four years, resigned, and Col. Bernard Laibold was appointed to fill the vacancy. Col. Laibold was born in Baden in 1827, and came to St. Louis about the year 1833. He served throughout the Mexican war, entered the Union service in the civil war on the 1st of August, 1861, as lieutenant-colonel of the Second Missouri Infantry, and on the 8th of January, 1863, was promoted to be colonel of the same regiment. He will be remembered for heroic conduct at Dalton, Ga. Having only four hundred and fifty men under his command, he was pressed by Gen. Wheeler, in command of something like ten thousand men. In reply to Gen. Wheeler's summons to surrender Col. Laibold returned the memorable answer, "I was placed here to defend the post, not to surrender it."

—Mrs. John Smith, a Confederate spy, was arrested in St. Louis on March 22d. Her arrest implicated quite a number of Southern sympathizers who suffered very severely for their imprudence.

—The neighborhood of Eleventh and O'Fallon Streets was the scene of great disorder and excitement on April 16th, occasioned by riotous demonstrations by a party of twelve or fifteen soldiers belonging to the Forty-first Missouri, who beat several citizens and a number of policemen.

—Mrs. Ada B. Haines, of St. Louis City, who had been released from the female department of Gratiot Street prison in the fall of 1864 by Gen. Rosecrans upon her giving bond in the sum of three thousand dollars to reside in the State of New York during the war, was released from her bond in April, and permitted to return to St. Louis. The case of Mrs. Haines, on the occasion of her arrest by the military authorities in the spring of 1863, excited a great deal of interest. She was convicted of being engaged in the service of the South as a kind of Confederate mail-carrier and agent, and banished South. She soon made her appearance again in the city, however, without permission of the authorities, she having learned that one of her children, whom she had left behind her in the care of friends, was ill. She was thereupon again arrested and placed in prison, where she remained five months, when she was released upon the interposition of influential loyal citizens on the terms above mentioned, John How becoming her bondsman in the sum required.

—The members of the St. Louis Presbytery, in session in the Old School Presbyterian Church, corner of Walnut and Sixteenth Streets, were waited upon on the 7th of April by the district provost-marshal, and each was required to take the oath of allegiance.

—The news of the occupation of Richmond, Va., reached St. Louis about noon on April 3d, and created the greatest excitement. Flags were dis-

played in all parts of the city, and business was almost entirely suspended. Bulletins were posted in front of the newspaper offices, and eager crowds gathered
1865. to read the news. Salutes were fired at each post and arsenal in the department in honor of the Union victories. The excitement was intensified on the 9th, when news was received of the surrender of Gen. R. E. Lee and his army.

—On April 10th Governor Thomas C. Fletcher issued the following proclamation:

"*Whereas*, An earnest of speedy peace to our war-distracted country has been given in the recent successes of the nation's brave army, under the guidance and protection of Almighty God: and for this hope of peace and the early restoration of the authority of the Constitution and the laws of the United States over the whole land it becomes us to give thanks to the Giver of all good;

"Now, therefore, I, Thomas C. Fletcher, Governor of the State of Missouri, do hereby earnestly recommend that Saturday, the 15th day of April (instant), be observed throughout the State of Missouri by all good citizens as a day of thanksgiving to God, who giveth the victory to truth and justice; that on that day the people, regardless of all differences of opinion in the past, meet in their respective places of worship and unite in religious exercises, the evening of the day to be marked by large assemblages, to be addressed by patriotic speakers; and that, amid bonfires, illuminations, and resounding salutes of artillery, they testify their appreciation of the heroism of the army of the Union in the re-establishment of the national authority in Richmond, the rout of the insurgent forces, the capture of the Army of Northern Virginia, and of the manifestations of a disposition on the part of men in authority to stay the effusion of blood of Americans and freemen."

—On April 29th the Secretary of War directed that the recruiting of men, both white and colored, in the loyal States for the volunteer force be discontinued.

—Gen. Dodge, on May 12th, promulgated the following order, issued by Lieut.-Gen. Grant on May 8th:

"3. Paroled officers and men of the late rebel armies whose homes were, at the date of their joining the armies in States that have never been in rebellion, and who are not excepted from the benefit of the President's amnesty proclamation, will, upon taking the oath prescribed therein, be permitted to return to their former homes in those States."

—The following committee was appointed on June 16th to arrange for the reception of the returning veterans from Sherman's army:

On finance, P. H. Murphy, Tony Neiderweiser, E. Stafford, T. W. Heman, John O. Cavender, Edward Stevens, Adolph Ehlert, and Martin Keary, Judge T. J. Baily, treasurer; on music, E. C. Harrington; on badges, B. F. Daily; on decorations, H. H. Helmkamp; on dinner, James Peckham, B. H. Stone, and James Coff; on extra refreshments, Christian Stocklin, Samuel Wainwright, Julius Winklemeyer, Tony Neiderweiser, Edward Stevens, George Berg, James Peckham, R. R. Beck, F. Kretschmar.

—On June 20th considerable excitement was created in the city by the arrival of the Ninth Missouri Confederate Regiment, comprising ten full companies, and numbering about seven hundred officers and privates. This regiment was surrendered by Gen. E. Kirby Smith, and afterwards paroled at Baton Rouge. It arrived on the steamer "Maria Denning," and on the 21st the officers and men took the oath of allegiance before Capt. Richardson. The regiment had served four years, and was composed entirely of Missourians. It achieved considerable fame in the Confederacy for bravery and endurance, and was complimented by Gen. E. Kirby Smith as the best regiment that Missouri had furnished to the Confederate army. The following is a list of the officers and men of the regiment:

In the absence of Col. Mercer and Lieut.-Col. Richard Gaines, the regiment was commanded by Maj. Hughes.

Company A, Capt. Joseph A. Miller, First Lieut. P. M. Cox, Second Lieut. W. F. Carter.

Company B, Capt. George H. Willis, First Lieut. W. O. Keeble, Second Lieut. Thomas Walden.

Company C, Capt. W. F. Bond, First Lieut. James Leeper, Second Lieut. —— Bass.

Company D, Capt. W. W. Stone, First Lieut. George Wayland, Second Lieut. William Wayland.

Company E, Capt. R. Brooks, First Lieut. Samuel Hart, Second Lieut. John W. Page.

Company F, Capt. F. Y. Doak, First Lieut. W. C. Campbell, Second Lieut. David Scott.

Company G, Capt. R. H. Edmondson, First Lieut. L. W. Hanie, Second Lieut. John Millsap.

Company H, Capt. D. H. Lindsay, First Lieut. H. T. Walker, Second Lieut. J. H. Montgomery.

Company I, Capt. J. W. Wallace, First Lieut. William Vaughan, Second Lieut. John W. Paxton.

Company K, Capt. John Hannah, First Lieut. H. Ferril, Second Lieut. S. H. Southerland.

The *Republican*, noticing the arrivals of the paroled Confederate regiments on June 23d, said,—

"During the present week there have arrived in the city five paroled infantry regiments and two battalions of cavalry, including the Eighth, Ninth, Tenth, Eleventh, and Sixteenth Veteran Infantry, and the Third and Fourth Battalions of cavalry, numbering in all about five thousand officers and privates. Of this number the larger portion have already taken the oath before Capt. Richardson, and many have proceeded on the way to their old homes in various parts of the State. Besides those mentioned there are now on the way to the city from Baton Rouge five or six other regiments, numbering about three thousand. In the course of a few days all that portion of the rebel army which was recruited in Missouri, with the exception of a few who prefer to remain in the South, or to seek new homes in Texas or Mexico, or in foreign countries, will have returned to their farms, or their former places of labor or business throughout the State, and their character, habits, and feeling as soldiers will disappear as they resume their old habits as citizens. . . .

"Yesterday morning there arrived by the 'Belle Memphis,' from Baton Rouge, the Fourth Missouri Cavalry, under Col. J. Q. Burbridge, and Col. Perkins' battalion, forming a part
1865. of Marmaduke's old brigade.

"We give a list of the officers of the Fourth Cavalry:

"Colonel, John Q. Burbridge, Price County; Lieutenant-Colonel, William J. Preston, Buchanan County; Major, James Porter, Lewis County; Adjutant, Daniel Hatch, Lewis County; Surgeon Bennett, Marion County.

"Company A, Capt. Jackson, Cape Girardeau County.

"Company B, Capt. Hicks, Dunklin County.

"Company C, Capt. David Sappington, St. Louis County.

"Company D, Capt. Jacobs, Shelby County.

"Company E, Capt. Hulett, Howard County.

"Company F, Capt. James O'Neil, Texas County.

"Company G, Capt. Roberts, Hickory County.

"We give a list also of the officers of Perkins' battalion:

"Colonel, C. J. Perkins, Randolph County; Major, T. B. Patten, Randolph County; Surgeon Gullett, Linn County.

"Company A, Capt. Frank Davis, Monroe County; First Lieut. Samuel Powell, Randolph County; Second Lieut. C. H. Gardner, Randolph County.

"Company B, Capt. M. G. Madlock, Randolph County; First Lieut. Turner, Randolph County; Second Lieut. William Sommers, Second Lieut. Baker, Randolph County.

"Company C, Capt. J. W. Bryson, Audrain County; First Lieut. Nathan Williams, Boone County; Second Lieut. Wisdom, Audrain County.

"Company D, Capt. Alexander Day, Callaway County; First Lieut. Joseph Boyd, Callaway County; Second Lieut. John Kelsaw, Callaway County.

"Company E, Capt. T. W. Todd, Howard County; First Lieut. Townsend Wright, Howard County; Second Lieut. William Webb, Howard County; Second Lieut. William Harding, Howard County.

"Company F, Capt. G. W. Rowland, Boone County; First Lieut. Ebenezer Arnold, Polk County; Second Lieut. T. B. Wade, Boone County; Second Lieut. William Frost, Boone County."

—On June 23d, Gen. Dodge issued the following order in reference to wearing the Confederate uniform in the city:

"1. Paroled officers and men of the late rebel armies are forbidden to wear within this department the uniform, or any part thereof, or other insignia of said rebel service. Exception, however, will be made in the case of private soldiers who are destitute of means, and such persons will be permitted for a short time to wear such clothing as is in their possession after stripping from the same all Confederate or State buttons and other insignia of the rebel service. In the case of officers of every rank no exception will be made, but such persons will be held to a prompt and strict compliance with this order, and any violation of its terms by either officers or soldiers will be considered as an act of hostility to the government of the United States, and will be punished accordingly."

—In June, Maj. Matlack, the provost-marshal of the district of St. Louis, was relieved from duty and the office abolished. In July, Gen. Dodge, before he took his departure for his new command at Leavenworth, closed up the secret service bureau of the provost-marshal-general's office in St. Louis, and forwarded the papers and records under seal to the War Department at Washington.

The closing of the provost-marshal's department in St. Louis ended the reign of the military commanders in Missouri. President Johnson, on June 23, 1865, rescinded the blockade proclamations issued April 15 and 17, 1861; removed further restrictions Aug. 29, 1865; annulled the suspension of the writ of *habeas corpus* Dec. 1, 1865; and on April 2, 1866, announced by proclamation that the rebellion had ended.

—Maj.-Gen. W. T. Sherman returned to his home in St. Louis early in July, 1865, and the following gentlemen, as a token of their appreciation of his distinguished military services, tendered him a dinner: Samuel T. Glover, Robert Campbell, F. Whittaker, T. T. Gantt, John J. Roe, Barton Able, Henry S. Turner, O. D. Filley, John How, Edgar Ames, John H. Fisse, William M. McPherson, Carlos S. Greeley, James O. Broadhead.

To their letter of invitation Gen. Sherman replied as follows:

"HEADQUARTERS
"MILITARY DIVISION OF THE MISSISSIPPI,
"ST. LOUIS, MO., July 16, 1865.

"*Messrs. S. T. Glover, William M. McPherson, T. T. Gantt, John How, Robert Campbell, and others:*

"GENTLEMEN,—Your kind note tendering me a hearty welcome to your city and a dinner is received. I accept with pleasure, and appoint next Thursday evening, at nine o'clock, as the time most agreeable to me for the proposed dinner.

"I deem it a most fortunate accident that events have set me back to the very point whence I sallied at the beginning of the late momentous struggle, now so happily ended, and if the good citizens of St. Louis account me one of them, I accept the title with honor and satisfaction. I feel sure that St. Louis, as a city, is more than any other interested in maintaining a true government and a united people, and therefore that my efforts in the past have tended especially to your welfare. So may it be in the future, and no man will more rejoice than I will to see your city again enter on that path of progress and wealth that was temporarily interrupted by a struggle begotten by ambitious and designing men.

"I am, with great respect, your friend and servant,

"W. T. SHERMAN, *Major-General.*

The following committees were then appointed to superintend the affair:

Committee of General Arrangements.—John How (chairman), Barton Able, D. A. January, George Maguire, Francis Whittaker, James Archer, Samuel T. Glover, H. T. Blow, J. O. Broadhead, Thomas T. Gantt, C. S. Greeley, C. P. E. Johnson, W. C. Jones, Robert Campbell, John B. Gray, Charles F. [illegible], J. J. Witzig, George A. Mitchell, John H. Lightner, John McNeil, J. E. D. Couzins, C. M. Ellcard, John J. Roe, Charles P. Johnson, R. E. Rombauer, John Hogan, George B. Kellogg, Edgar Ames, H. A. Homeyer, B. Gratz Brown, William J. Romyn, William E. Taussig, H. S. Turner, T. J. Dailey, E. H. E. Jameson, Gust. W. Dreyer.

Sub-Committees.—Executive Committee, John How, S. T. Glover, C. P. E. Johnson, Thomas T. Gantt, George B. Kellogg, John B. Gray; Invitation Committee, C. S. Greeley, John B. Gray, C. P. E. Johnson, John McNeil; Committee on Supper and Wines, Barton Able, W. J. Romyn, W. C. Jones, F. Whit-

taker, George Maguire, James Archer, C. P. E. Johnson, J. E. D. Couzins, C. M. Elleard, George A. Mitchell; Committee on Toasts and Responses, T. T. Gantt, J. O. Broadhead,
1865. George S. Kellogg, William E. Taussig; Committee on Decorations, Badges, and Music, Charles F. Cady, E. H. E. Jameson, T. J. Daily, J. E. D. Couzins, J. J. Witzig; Finance Committee, F. Whittaker, C. S. Greeley, Edgar Ames, Robert Campbell, H. S. Turner, John J. Roe, C. M. Elleard, H. A. Homeyer, Barton Able, treasurer.

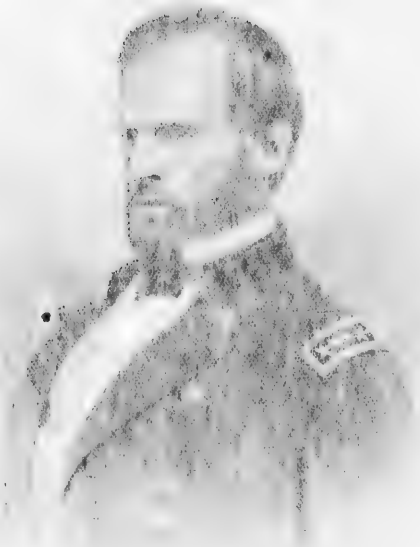
The banquet was given at the Lindell Hotel on July 20th, and was a grand affair. There were over three hundred prominent persons present. Capt. Barton Able presided, and eloquent and patriotic speeches were made by Hon. S. T. Glover, Hon. J. S. Rollins, Gen. Sherman, Judge Moody, and others.

Gen. Sherman has been closely identified with St. Louis for many years, having been stationed at Jefferson Barracks in early life, and associated in business with the well-known St. Louis banking-house of James H. Lucas & Co. William Tecumseh Sherman was born in Lancaster, Ohio, on the 8th of February, 1820, and was the son of Hon. Charles R. Sherman, judge of the Supreme Court of Ohio, who died when young Sherman was nine years of age. The boy then entered the family of Hon. Thomas Ewing, and at the age of sixteen received an appointment as cadet at the Military Academy at West Point. His record at that institution was highly creditable, and he graduated in 1840, sixth in his class. He was at once appointed second lieutenant in the Third Infantry, and served with his regiment during the following year in the Florida war. In November, 1841, he was promoted to a second lieutenancy and ordered to Fort Moultrie, S. C. During 1843, while on leave of absence, he visited St. Louis, and was so much pleased with the city that he expressed the desire to make it his place of residence. Lieut. Sherman contracted during his stay in St. Louis many warm friendships which have survived the lapse of years.

When the Mexican war commenced, in 1846, he was engaged in recruiting service in Ohio, and at once applied for active duty, but instead of dispatching him to Mexico as he desired, the War Department ordered him to proceed with his regiment, the Third Artillery, to California. Accordingly, he repaired to New York, and sailed from that city on the 14th of July for the Pacific coast, reaching Monterey, the capital of Upper California, *via* Cape Horn, on the 26th of January, 1847. Being thus removed from the theatre of active military operations, Lieut. Sherman had but little opportunity of achieving distinction or of exhibiting the conspicuous talents which afterwards won him his present high rank as one of the foremost generals of the age. He discharged his duties on the Pacific slope, however, with great care and characteristic energy, and it so happened that the first gold discovered in California passed under his inspection when Col. Suter, the famous pioneer, applied to Governor Mason for the pre-emption of a tract of land. In his "Memoirs" Gen. Sherman gives an interesting and graphic description of the rush for gold which followed the publication of the official report prepared by the army officers.

In 1850 he returned from California, bearing dispatches for the War Department, and on reaching Washington was granted leave of absence for six months. After visiting his mother, at Mansfield, Ohio, he returned to Washington, where he was married to Miss Ellen Boyle Ewing, daughter of Hon. Thomas Ewing, then Secretary of the Interior, on the 1st of May, 1850. At this time his company, then commanded by Capt. Braxton Bragg, afterwards a distinguished Confederate general, was stationed at Jefferson Barracks, St. Louis; and shortly after reporting at the barracks he received his commission as captain, and was detailed to act as commissary of subsistence at St. Louis, where he was soon joined by his family. In September, 1852, Capt. Sherman was transferred to New Orleans, and about two months later, while stationed there, received a proposition from Maj. Henry S. Turner, of St. Louis, to aid in the establishment of a branch in San Francisco of the banking-house of James H. Lucas & Co., of St. Louis. Subsequently Mr. Lucas himself renewed the proposition, and Capt. Sherman finally determined to accept the position of resident and managing partner of the firm of Lucas, Turner & Co., as the California house was styled at San Francisco.

On the 6th of September, 1853, he resigned his commission in the army, and proceeded with his family to the Pacific coast. For several years he conducted the affairs of the firm in San Francisco with energy and success, and was quite prominent in the affairs of that city. In 1857, however, he came to the decision that it was not desirable to continue the California branch any longer, and his suggestion to that effect having been approved by the parent house, he returned to St. Louis, where, at the request of his partners, he proceeded to New York, and opened there, in July, 1857, a branch of the St. Louis firm. The financial panic of that year, however, caused the abandonment of the enterprise, and in 1858, Capt. Sherman associated himself with Thomas Ewing, Jr., in the practice of the law at Leavenworth, Kan. In July, 1859, he was elected superintendent of the Louisiana Military Academy, and remained in charge



of that institution until Jan. 18, 1861, when he addressed a letter to Governor O'Moore, announcing his intention to resign his position in case Louis-
1865. iana seceded from the Union. When the political course of the State had been determined he accordingly withdrew and repaired to St Louis, where he was made president of the Fifth Street Passenger Railroad.

Soon after taking charge of the company's affairs, he was offered the chief clerkship of the War Department, but declined it. On the 8th of May, however, he tendered his services to the government, and on the 14th was appointed colonel of the Thirteenth Infantry. Three days later he was made brigadier-general of volunteers, and commanded a brigade in the first battle of Bull Run (July 21st). In October he was assigned to the Department of the Cumberland, and upon the retirement of Gen. Robert Henderson from the command of that department he was appointed his successor, but subsequently at his own request, was transferred to St. Louis, where he took charge of the camp of instruction. He remained at St. Louis until February, 1862, when he was assigned to the command of the District of Paducah, Ky. In the Tennessee and Mississippi campaign he commanded the Fifth Division under Gen. Grant, and was wounded in the battle of Shiloh (April 6th and 7th). He also took part in the movement against Corinth, and in the siege of that place (April 15th to May 30th), and on the 1st of May was made major-general of volunteers. Gen. Sherman commanded the expedition which attempted the capture of Vicksburg on the 27th of December, and while in command of the Fifteenth Army Corps led the assault on Arkansas Post, on the 11th of January, 1863. He took an active and prominent part in the siege of Vicksburg, and was appointed brigadier-general in the regular army in the summer of the same year, his commission dating from July 4th, the day of the surrender of Vicksburg. After the fall of this important point he was assigned to the command of the Army of the Tennessee, and at the battle of Chattanooga (November 23–25) commanded the left wing of the army. In December he compelled the Confederate Gen Longstreet to raise the siege of Knoxville, and in February of the following year (1864) broke up the railroads centring at Meriden, Miss.

On the 12th of March, 1864, he took command of the Division of the Mississippi, succeeding Gen. Grant, who had been appointed general-in-chief of the army. The division comprised the Departments of the Ohio, the Cumberland, the Tennessee, and the Arkansas. Gen. Sherman addressed himself more particularly to the task of subduing the Confederate forces in Georgia under Gen. Joseph E. Johnston, and for that purpose collected at Chattanooga an army of one hundred thousand men. After a series of successful engagements with the enemy he occupied Marietta, an important strategic point, on the 3d of July, and subsequently defeated Gen. Hood, Gen. Johnston's successor, the campaign culminating in the battle of Atlanta. He was appointed major-general in the regular army on the 12th of August, and fought the battle of Jonesboro' on the 31st. On the following day Gen. Hood evacuated Atlanta, which was then occupied by the Union forces, and about the middle of November Gen. Sherman began his famous "march to the sea." He reached Savannah on the 13th of December, and laid siege to that city, which surrendered on the 21st. On the 17th of February he occupied Columbia, S. C., and then invaded North Carolina. Raleigh was occupied by his army on the 13th of April, and on the 26th, Gen. Joseph E. Johnston, commanding the Confederate forces, surrendered at Durham Station. He then proceeded north with his army, arriving in Washington on the 24th of May, and on the 27th of June was appointed to the command of the Division of the Mississippi, comprising the Departments of the Ohio, Missouri, and Arkansas, with headquarters at St. Louis. On the 25th of July, 1866, he succeeded Gen. Grant as lieutenant-general, and on the 11th of August took command of the Department of the Missouri. In the fall of the same year he was sent on a special mission to Mexico, and on the 4th of March, 1869, was made general of the army to succeed Gen. Grant, who had been elected President of the United States. In the autumn of 1871, having obtained leave of absence, he went to Europe, and spent nearly a year visiting the different countries of the Old World. Upon his return to the United States he established himself at Washington, but in October, 1874, removed his headquarters to St. Louis. Subsequently, however, he returned to Washington, where he now has his headquarters.

—The ladies of St. Louis early in July determined to form a Missouri Southern Relief Association, and organized by the election of the following officers: Silas Bent, chairman; Charles Miller, treasurer; John G. Shelton, Jr., recording secretary; and Messrs. G. G. Schoolfield, George R. Robinson, William H. Pittman, R. H. Spencer, J. W. Larimore, and John S. Dyer, corresponding secretaries.

The grand Southern Relief Fair was inaugurated on October 10th, in the building of the St. Louis Warehouse Company, on Chouteau Avenue, between Sixth, and Papin Streets. The fair was a sig-

Gen. Sherman addressed himself more particularly to Sixth, and Papin Streets. The fair was a signa

W. T. Sherman

success, and its managers realized a princely sum for their noble charity,—the succor of helpless widows and orphans, made such by the events of a terrible war.

—Notwithstanding Missouri was a slave State at the beginning of the war and furnished a large quota of men to the Confederate army, it contributed more volunteers to the Union army than did eight free States. If the matter of population is taken into account, without allowance for the Confederate soldiers who went out of the State, Missouri will still make a more favorable showing than most of the strong free States. Thus Maine, New Hampshire, and Vermont had 87,438 more people in 1860 than Missouri, and yet Missouri sent 55,106 more volunteers to fight the battles of the Union. Again, Rhode Island, Minnesota, Kansas, and Iowa had only 53,248 fewer people in 1860 than Missouri, and yet Missouri furnished 50,820 more soldiers. Again, with but little more than twice as large a population as Iowa, Missouri sent out 40,313 more than twice as many Union soldiers.

The War Department in 1879 issued a statement giving the number of men furnished the Union army by each State and Territory and the District of Columbia from April 15, 1861, to the close of the war of the Rebellion. It shows that the total number of volunteers was 2,678,967, distributed as follows:

Maine	72,114	Missouri	199,111
New Hampshire	36,629	Kentucky	79,025
Vermont	35,262	Kansas	20,151
Massachusetts	152,048	Tennessee	31,092
Rhode Island	23,699	Arkansas	8,289
Connecticut	57,379	North Carolina	3,156
New York	467,047	California	15,725
New Jersey	81,010	Nevada	1,080
Pennsylvania	366,107	Oregon	1,810
Delaware	13,670	Washington Territory	964
Maryland	50,316	Nebraska Territory	3,159
West Virginia	32,068	Colorado Territory	4,903
District of Columbia	16,872	Dakota Territory	206
Ohio	319,659	New Mexico Territory	6,561
Indiana	197,147	Alabama	2,576
Illinois	259,147	Florida	2,190
Michigan	89,372	Louisiana	8,224
Wisconsin	96,424	Mississippi	545
Minnesota	25,052	Texas	1,965
Iowa	76,309	Indian Nation	3,503

The following tables, made up from the official report of the War Department, will prove interesting, as they demonstrate our statements. Missouri must have been quite a loyal State if the number of men she furnished the Union army be taken as a test of loyalty, and this is the only true test:

TABLE No. 1—UNION SOLDIERS.

Missouri		199,111
Vermont	35,262	
New Hampshire	36,629	
Rhode Island	23,699	
Minnesota	25,052	
Connecticut	57,379	
California	15,725	
Nevada	1,080	
Oregon	1,810	
		196,636
Missouri over all		2,475

TABLE No. 2—UNION SOLDIERS.

Missouri		199,111
Michigan	89,372	
Iowa	76,309	
Minnesota	25,052	
Nebraska	3,159	
Oregon	1,810	
Nevada	1,080	
		196,782
Missouri over all		2,329

TABLE No. 3—UNION SOLDIERS.

			373,272
Thirteen slave States over the same number of free States			58,955

Military Roster.—The first Union military organization in St. Louis originated in a meeting held early in the year 1861 in the counting-room of O. D. Filley, on Main Street, for the purpose of organizing a body of Union men to repel any attack which might be made by Southern sympathizers. Those present were enrolled, and others joined at subsequent meetings, which were held for some time in the third story of a house on Olive Street, above Twelfth, and in a house owned by Benjamin Farrar, on Seventh Street, near St. Charles. The floors of both buildings were strewn with sawdust to avoid noise in drilling. The roster of the first Union company formed was as follows:

F. P. Blair, Jr. (captain), Henry Hitchcock, Silas Reed, Thomas Cuddy, B. M. Joel, William McKee, Fred. I. Dean (second lieutenant), J. H. Lightner, William S. Hillyer, Frank G. Porter, James Peckham, T. P. Loes[illegible], J. D. Leonard, Joseph M. Hallenbeck, H. L. Pinney, J. McCormack, Joseph R. Boggs, William P. Hollister, William Z. Clark, Lucien Eaton, Jacob Buhr, H. A. Conant, H. Sand, Henry Halterlien, John Service, John McFall, Alexis Mudd, R. J. Healy, W. D. Bowen, Henry Kuntz, William H. Mills, John Popp, William Gadmon, Theodore C. M. Tracie, James J. Wishart, —— Ripply, F. H. Mauter, John P. McGrath, William Cuddy, E. M. Joel, Charles W. Brans-

come, A. S. Thurneck, W. C. Smith, D. M. Houser, Jacob S. Merrill, Michael Summers, C. W. Anderson (first lieutenant), William C. Mahew, Samuel Knox, N. M. Christian, John E. Walker, L. Marsow, Henry McKee, Charles Castello, F. Van Braemer, Thomas Woody, Fred. Broomerfaf, George Casper, Charles Wappiel, D. Kerr, C. H. Lippman, —— Gordon, George Pope, R. B. Beck, Thomas Mennott, Henry Gurth, N. B. McPherson, Patrick Costiggan, J. Peter Nee, John J. Russell, James Oats, S. T. Glover, Charles Osburg.

In less than a fortnight several full companies were formed in different parts of the city composed of earnest Union men. There was an "inside organization" and an "outside organization." The latter was composed of the companies themselves, and the former of the power that controlled them. Mr. Blair was president of the inside organization, and E. M. Joel secretary. All the members acted in concert with the Committee of Safety, of which O. D. Filley was chairman, and James O. Broadhead secretary. The roster of the different companies was as follows:

Grand Drill-Master. C. F. Larned.

East Division, Union Club.—President, Chester Harding, Jr.; two hundred men.

West Division, Union Club.—President, —— Fecklenburg; two hundred men.

Fourth Ward, Union Black Rifles.—Captain, George Dahmer; first lieutenant, Gus. Boernstein: second lieutenant, A. Boernstein; eighty men.

Fifth Ward, Union Club.—S. T. Glover, president; George A. Schaeffer, secretary; one hundred and five men.

Seventh Ward, Union Guard.—Captain, Julius Wagner; first lieutenant, Frank Golde; second lieutenant, Charles Nager; fifty-eight men.

Tenth Ward, Union Guard.—Captain, Linkerman; first lieutenant, Wingar; second lieutenant, Siegermann; sixty-five men.

Second Ward, Black Rifles (Company A).—Captain, Chris. Goerish; first lieutenant, George Geigler; second lieutenant, Philip Frank; one hundred and thirty-six men.

Second Ward, Black Rifles (Company B).—Captain, Bernard Klein; first lieutenant, Ferd. Schuddig; second lieutenant, John A. Lippard; ninety-six men.

Company No. 5, Union Guard.—Captain, Geo. Smith; first lieutenant, Joe Gerwina; second lieutenant, John Nolte; fifty-three men.

Citizen Guard.—Captain, C. E. Solomon; first lieutenant, F. W. Noel; second lieutenant, A. Albert, eighty-three men.

Citizen Guard.—Captain, C. D. Wolf; sixty men.

Black Rifles.—Captain, Ott; first lieutenant, Hrudicka; second lieutenant, Nickerle; forty-six men.

Mounted Citizens' Guard.—Captain, Henry Almstedt: forty men.

Black Rifles.—Captain, Fred. Niegermann; first lieutenant, Wm. Rotterman; second lieutenant, D. Gronemeier; one hundred and twenty men.

Third Ward, Union Guard.—N. Schuttner, major; forty men.

Black Jaegers.—Captain, Michael Praester; first lieutenant, P. Miller; second lieutenant, C. Weiss; sixty men.

The following is a list of those who, in addition to Capt. Blair's company, in January, 1861, organized secretly for the purpose of sustaining the government of the Union and to protect Union men in St. Louis, but more especially to protect the St. Louis arsenal from falling into the hands of the Confederates:

CAPT. KLEIN'S COMPANY.

Bernhard Klein, captain; Ferd. Schueddig, first lieutenant; J. Peter Lipphardt, second lieutenant; Julius Sauer, quartermaster.

Altenbach, Chr.
Adrian, Friedrich.

Among the meetings held by Union men during the winter of 1861 was one which took place at a lawyer's office, and which was attended by O. D. Filley, Giles F. Filley, James O. Broadhead, F. A. Dick, Barton Able, Charles M. Elleard, William McKee, B. Gratz Brown, S. T. Glover, Benjamin Farrar, Samuel Simmons, P. L. Foy, and F. P. Blair. Messrs. S. T. Glover and F. P. Blair urged the importance of arming on the part of Union men without delay, but the meeting broke up without reaching any definite conclusion. Another meeting was held at Washington Hall about the 1st of February, at which a military organization was effected, and a company of Union Guards enrolled for secret drill. It was suggested that Francis P. Blair should be made the colonel of the regiment, but that gentleman, anticipating a visit to Washington, advised the appointment of O. D. Filley, John How, Samuel T. Glover, James O. Broadhead, and J. J. Witzig as a Committee of Safety. The suggestion was adopted, and the committee entered at once upon the active discharge of its duties. The organization at Washington Hall and the arming and drilling of the Union men were conducted with the most secrecy. The members of the recently disbanded *Wide Awakes* were enrolled into military companies, which drilled at night in the foundry of Giles F. Filley, in a house on the east side of Seventh Street, near St. Charles, owned by the Farrars; in the brewery of Mr. Winkelmeyer, on Market Street; in Washington Hall, in Yaeger's Garden, and elsewhere. The meeting-places were always approached with caution, and guards were stationed outside to prevent surprise.

After these companies had been organized the question arose as to how the means might be procured for arming them. It was decided that it would be unwise to apply to the authorities at the arsenal for arms, as such application might expose their plans to the secession leaders. In this quandary Capt. Blair applied to Messrs. E. A. and S. R. Filley, leading merchants of St. Louis and earnest friends of the Union cause, for assistance and advice. They agreed with him that arms should be at once procured, and Samuel R. Filley offered to raise the necessary funds. It was thought at first that three hundred dollars would be sufficient to purchase such arms as could be privately disposed of immediately, and this amount was speedily secured, E. A. and S. R. Filley subscribing one hundred dollars, and O. D. Filley and Giles F. Filley each one hundred dollars. Capt. Blair himself added twenty-five dollars, and with this amount purchased seventy muskets from T. J. Albright for four hundred and seven dollars and ninety cents, giving a due bill for the amount (eighty-two dollars and ninety cents) not covered by the subscription of three hundred and twenty-five dollars. Governor Yates, of Illinois, also contributed about two hundred muskets for the use of the Union men of St. Louis, the guns being shipped to Giles F. Filley, in the care of Woodward & Co., hardware dealers, Main Street, St. Louis. Upon their arrival they were taken to Turner Hall in a beer-wagon, under cover of a lot of beer-barrels, and distributed to members of the Union Guard. Woodward & Co. had also sixty Sharp's rifles, which Giles F. Filley had purchased, in order to prevent them from falling into the hands of the secessionists, and which he reserved for the use of the company that was drilling in his own foundry. About fifty other guns were transferred by Mr. Woodward to the Union Guard, the pay for which, it is said, he never claimed. In addition to these, a number of arms were procured by different Union citizens, "and thus, silently and secretly, there were enough muskets and rifles reported to Mr. Blair to arm a regiment."[1]

It now became necessary to raise a considerable sum for the work of the Committee of Safety, and after a full consultation in the store of O. D. Filley, Messrs. Samuel R. Filley and E. W. Fox agreed to

[1] "Gen. Nathaniel Lyon and Missouri in 1861," by James Peckham, p. 38.

act as a committee to solicit subscriptions in order to raise funds not only for the use of the committee, but for the use of the Guards, "upon whom Union men relied for the defense of the arsenal." It was thought at first that one thousand dollars would be sufficient, but subsequently, when it was found that more assistance would be needed, the committee acted in conjunction with a sub-committee of the Committee of Safety and the colonels of the first four regiments of volunteers.

The following firms and individuals contributed one hundred dollars each in response to the application of Messrs. Samuel K. Filley and E. W. Fox: Henning & Woodruff, Child, Pratt & Fox, Cash (H. Weil & Bro.), J. B. Sickles, Wolfe & Hoppe, Robert Holmes, Cash, Giles F. Filley, Oliver D. Filley, Greeley & Gale, Samuel C. Davis & Co., Pike & Kellogg, Benjamin Farrar, Pomroy & Benton, Lee Claflin, Thomas Mellen (Philadelphia), E. A. & S. R. Filley, Partridge & Co., Isaac V. Brown, Usdell, Peirson & Co., N. P. Coburn, Goodrich, Willard & Co., H. Crevelin, Bridge, Beach & Co., Thomas T. Gantt, Dr. M. L. Linton.

The following subscribed fifty dollars each: Christopher & Richards, Eben Richards, D. Durkee, Chauncey I. Filley, H. Ames & Co., H. J. Loring & Co., John Tilden, Archer, Whitesides & Co., A. S. Roberts, Jr., J. F. Comstock & Co., T. B. Edgar, Henry Whitmore, Morris Collins, James Brown, O. B. Filley, Cutter & Tirrill, Cash.

The following subscribed twenty-five dollars each: Solomon Smith, Plant & Bro., Cash, H. Whitmore, Morris Collins, Mr. Richardson, P. L. Foy, E. B. Hubbell, Jr., L. & C. Speck & Co., J. H. Lightner, Samuel G. Reed, R. J. Howard, H. C. Creveling, James Harkness, Claflin, Allen & Co., Stranger from Western Missouri, Reed & Co.

Twenty-dollar subscriptions: G. B. Smith, Capt. J. B Phillips, Henry Martin, J. H. Andrew.

Ten-dollar subscriptions: J. M. Brown, L. W. Patchin & Co., Thomas Taylor, J. H. Simpson, C. F. Eggers, Henry Pettis, George D. English, Stephen Hoyt, H. Bakewell, W. H. Tasker, R. P. Studley, E. Greenleaf, S. Bonner, William Rumbold, Cash, Woodbury & Scott.

Five-dollar subscriptions: E. Crawshaw, J. Crawshaw, Jr., J. Crawshaw, S. Gardner, M. J. Lippman, W. T. Dickson, Mr. Dodge, Cash, T. J. Albright, Cash, E. G. Brooks, J. J. Flippen.

Miscellaneous subscriptions: T. H. and St. Louis Railroad, $3.95; Testimonial Fund, $48; John Clark, 65 cents; Cash, $62; S. C. Mansur, $15.

Money subscriptions from the East:

Besides the above there were [illegible]ast quantities of goods received from the East, which were carefully distributed.

On the 15th of April, 1861, President Lincoln issued his famous proclamation calling for seventy-five thousand men. At that time Capt. Nathaniel Lyon, U.S.A., soon afterwards made brigadier-general of volunteers, was in command of the United States arsenal at St. Louis, and under his direction the first organization of troops in St. Louis for the United States service was effected by Col. Chester Harding. As we have seen, the Union men of St. Louis, under the leadership of Francis P. Blair, and Messrs. Glover, Broadhead, the Filleys, and others, had already formed a number of companies, and these were now incorporated in Gen. Lyon's comm[illegible]

Early in May authority was [illegible] to enroll and arm the loyal citizens of St. [illegible]as a "reserve corps," the number so enrolled not to be more than sufficient to make the whole number of volunteers and reserve corps amount to ten thousand. This limit was not strictly adhered to. On the 7th, 8th, and 11th days of May five regiments of reserve corps, numbering four thousand seven hundred and seventy-four officers and men, were mustered.

A brigade morning report of the 1st of June shows the strength of the whole force then under the command of Gen. Lyon to have been as follows:

First Regiment Volunteers, Col. F. P. Blair	12[illegible]
Second Regiment Volunteers, Col. H. Boernstein	112[illegible]
Third Regiment Volunteers, Col. Fr. Sigel	11[illegible]
Fourth Regiment Volunteers, Col. N. Schuttner	1027
Fifth Regiment Volunteers, Col. C. E. Salomon	9[illegible]
Battalion of Artillery, Maj Backoff	[illegible]
Pioneer Company, Capt. Voerster	12[illegible]
First Regiment U. S. R. C., Col. H. Almstedt	110[illegible]
Second Regiment U. S. R. C., Col. H. Kallman	756
Third Regiment U. S. R. C., Col. John McNeil	8[illegible]
Fourth Regiment U. S. R. C., Col. B. Gratz Brown	1169
Fifth Regiment U. S. R. C., Col. Stifel	1011
	10,7[illegible]

The whole of this force was raised in St. Louis, and the German citizens furnished at least four fifths of it. The whole of it was actively and usefully em-

ployed in the field and in garrison until discharged or remustered into the three years' service.

The new organization was called the "United States Reserve Corps," but was known better as "Home Guards." The Fifth Regiment of Volunteers was regularly mustered into the service by orders from Washington. On the 7th of May the First Regiment Home Guards, made up of residents of the First Ward; on the morning of the 8th the Second Regiment, from the Second Ward; at four P.M. the same day the Third Regiment, from the Third, Fourth, and Fifth Wards; at nine P.M., same day, the Fourth Regiment, from the Seventh and Eighth Wards, were all mustered in and armed. These regiments established their quarters as follows: The First, Col. Almstedt, in Yaeger's Garden; the Second, Col. Kallman, on Chouteau Avenue; the Third, Col. John McNeil, at Turner Hall; the Fourth, Col. B. Gratz Brown, at Bechner's Garden, on Fifth Street. On Saturday, May 11th, Col. Stifel's Fifth Regiment was mustered in, and established its quarters in the Tenth Ward. The commissioned officers of these regiments elected Capt. Thomas W. Sweeney their brigade commander, and he was at once recognized as such. Col. Harding continued upon the staff of Gen. Lyon as his adjutant-general.

During the interval between the departure of Gen. Lyon from St. Louis in June and the assumption of the command of the department by Gen. Fremont in July, the Union men of St. Louis were actively engaged not only in equipping and preparing the companies for local service, but also in perfecting the organizations then being formed of volunteers for the United States service "for the term of three years, or during the war."

The following is the roster of the various Union military organizations formed in St. Louis during the early part of the war:

First regiment of United States Reserve Corps, three months' service, mustered in May, 1861, and discharged in August the same year:

FIELD AND STAFF.—Henry Almstedt, col.; Robert J. Rombauer, lieut.-col.; Phil. J. Brimmer, major; Emil Seemann, surg.; John Heinback, asst. surg.; William Waldschmidt, adjt.; Aug. Lucssler, q.m.

Co. A, CAVALRY.—Jacob Melter, capt.; John Traber, 1st lieut.; Charles Wagmann, 2d lieut.

Co. A.—Jacob Horn, capt.; Emil Mark, 1st lieut.; W. Waldschmidt, 2d lieut.

Co. B.—Rod. E. Rombauer, capt.; Theo. Eckerle, 1st lieut.; Isaac Baer, 2d lieut.

Co. C.—Theo. Hilderbrandt, capt.; James H. Vodoarka, 1st lieut.; George Ost, 2d lieut.

Co. D.—Leonhard Weindel, capt.; Fred. W. Henkels, 1st lieut.; Peter Schardin, 2d lieut.

Co. E. George Rothweiler, capt.; Lorenz Liebermann, 1st lieut.; Gustav Garvell, 2d lieut.

Co. F.—William Balz, capt.; William Balz, 1st lieut.; Jacob Reinhardt, 2d lieut.

Co. G.—Charles Hartig, capt.; Arnold P. Rocter, 1st lieut.; George Clemens, 2d lieut.

Co. H.—Joseph Schubert, capt.; Casper Kochler, 1st lieut.

Co. I.—Herman T. Hasse, capt.; Clemens Gutgesell, 1st lieut.; Fred Krenning, 2d lieut.

Co. K.—William Hahn, capt.; Henry Delus, 1st lieut.; Joseph Witzel, 2d lieut.

Co. L.—William Prolerman, capt.; Jacob Bischoff, 1st lieut.; Augustus Leupler, 2d lieut.

Co. M.—Augustus Eichele, capt.; Charles B. Gutzahr, 1st lieut.; Hern. Lautensclager, 2d lieut.

Of this regiment, Company A, cavalry, served as mounted orderlies of Brig.-Gen. Lyon from the 11th of June, 1861, to the 10th of August, and subsequently served in various portions of Missouri. Company A, infantry, and Companies B, C, D, E, F, G, H, and M took part in the capture of Camp Jackson, May 10, 1861, the First Regiment, commanded by Col. H. Almstedt, serving as the reserve of Gen. Lyon's brigade. Company I also participated in the capture, and was principally stationed at Jacques' Garden. Company L, on July 30, 1861, marched with a detachment of the First Regiment, United States Reserve Corps, under command of Col. Henry Almstedt, to Rolla, Mo., and subsequently to several other points in the State.

Second Regiment of U. S. Reserve Corps, three months' service, mustered in in May, 1861, and discharged in August of the same year:

FIELD AND STAFF.—Herman Kallman, col.; John T. Fiala, lieut.-col.; Julius Rapp, maj.; Anthony Teitinger, adjt.; Charles W. Gottschalk, q.m.; F. C. Castlehun, surg.; Charles Sprinzig, asst. surg.; Henry L. Rothsow, maj.

Co. A.—Bernard Essroger, capt.; Herman Bleck, 1st lieut.; Leopold Swanziger, 2d lieut.

Co. B.—Edmund Wurpel, capt.; Joseph Gerwiner, 1st lieut.; Franz Shindler, 2d lieut.

Co. C.—Fred. Mueller, 1st lieut.; Fred. Cratz, 2d lieut.

Co. D.—F. M. Wolke, capt.; Bernhard Klein, 1st lieut.; Fred. Gottschalk, 2d lieut.

Co. E.—Laies Felix, capt.; Ploser Christian, 1st lieut.; Michel Phillip, 2d lieut.

Co. F.—Theodore Boethelt, capt.; Alexander Windmiller, 1st lieut.; Anthony Ochosky, 2d lieut.

Co. G.—Herman Takrzewski, capt.; Ger. Bensberg, 1st lieut.; Herman Moll, 2d lieut.

Co. H.—Charles Goerisch, capt.; Charles Hoppe, 1st lieut.; John Heusack, 2d lieut.

Co. I.—Jacob Reseck, capt.; John Raedi, 1st lieut.; August Frohnhaeser, 2d lieut.

The regiment participated in the capture of Camp Jackson, and for some time occupied prominent places in St. Louis, in order to be ready for any emergency. It also performed service in guarding bridges

on the North Missouri and the St. Louis and Iron Mountain Railroads.

Both the First and Second Regiments subsequently re-enlisted for the war.

Third Regiment of U. S. Reserve Corps, three months' service, mustered in in May, 1861, and discharged in August of the same year:

FIELD AND STAFF.—John McNeil, col.; Charles A. Fritz, lieut.-col.; Calvin W. Marsh, maj.; Samuel P. Simpson, adjt.; George E. Leighton, q.m.; William Arthur, com'y; Ellery P. Smith, surg.; Edmund Boemer, asst. surg.

Co. A.—Charles W. Smith, capt.; H. Rupert Serot, 1st lieut.; Fred. Leser, 1st lieut.; Fred. Holst, 1st lieut.; George Haran, 1st lieut.; H. Wigand, 2d lieut.

Co. B.—Charles Albert Warner, capt.

Co. C.—Tony Niederwieser, capt.; H. P. Fabricius, 1st lieut.; William Hirt, 2d lieut.

Co. D.—Merritt W. Griswold, capt.; William M. Wherry, 1st lieut.; Charles C. Johnson, 2d lieut.

Co. E.—W. A. Hequembourg, capt.; Felix Coste, 1st lieut., Fritch Carl Adolph, 2d lieut.

Co. F.—Philip F. Weigel, capt.; John C. Blech, 1st lieut.; Max. Kornex, 2d lieut.

Co. G.—George Dominick, capt.; Charles Moeller, 1st lieut.; Samuel P. Simpson, 2d lieut.

Co. H.—Henry Lischer, capt.; The. Kalb, 1st lieut.; Adolph. Knipper, 2d lieut.

Co. I.—Robert Hundhausen, capt.; Louis Duestrou, 1st lieut.; J. Conrad Meyer, 2d lieut.

Co. K.—George A. Rowley, capt.; Edward J. Clark, 1st lieut.; George E. Leighton, 2d lieut.

The Third Regiment was organized in the city of St. Louis, at Turners' Hall, early in 1861, and upon the first suspicion that the political controversy of that period would have to be decided in the arena of arms, numbers of loyal citizens assembled at this hall for the purpose of preparing themselves in military exercises to meet the issue in Missouri. The result was the organization of a regiment, which retained Turners' Hall as its headquarters during a considerable period of the service. John McNeil, afterwards colonel, Charles A. Fritz, afterwards lieutenant-colonel, with others of the field, staff, and company officers, were active in these preparations. The regiment was mustered into service on the 8th of May, 1861, by Capt. (afterwards brigadier-general) Nathaniel Lyon, who personally administered the oath at the St. Louis arsenal; on that day the regiment, nearly twelve hundred strong, received its arms; the accoutrements and clothing were obtained by the officers pledging their individual credit. On the 10th of May, 1861, this regiment was engaged with others in the capture of Camp Jackson, and subsequently rendered efficient service in Northern and Southern Missouri. On the 17th of July, 1861, it repelled an attack of Confederates under Gen. Thomas Harris near Fulton, Mo. Col. McNeil was succeeded in the command of the regiment by Col. C. A. Fritz, and in January, 1862, the organization was consolidated with that of the Gasconade County battalion, the regiment thus formed being known as the Fourth Infantry, Missouri Volunteers.

Fourth Regiment U. S. Reserve Corps, three months' service, mustered in in May, 1861:

FIELD AND STAFF.—B. Gratz Brown, col.; Rudolph Wesselling, lieut.-col.; S. B. Shaw, maj.; John C. Vogel, q.m.; Jacques Ravald, surg.; George Kaufhold, adjt.

NON-COMMISSIONED STAFF.—Ed. Schultz, com. sergt.; E. M. Joel, q.m.-sergt.

Co. A.—Charles E. Adams, capt.; George Kaufhold, 1st lieut.; G. C. Albert, 2d lieut.

Co. B.—Alexander G. Hequembourg, capt.; Louis Schnell, 1st lieut.; Charles Schnell, 2d lieut.

Co. C.—— ——, capt.; J. W. Koch, 1st lieut.; Louis Reicholz, 2d lieut.

Co. D.—Louis Schneider, capt.; Philip Winkel, 1st lieut., Charles Bromser, 2d lieut.

Co. E.—Charles Zimmer, capt.; John Schenkel, 1st lieut., Henry Obermeuller, 2d lieut.

Co. F.—Peter Helie, capt.; F. Merzwieler, 1st lieut.; Charles Knolle, 2d lieut.

Co. G.—John H. Dierke, capt.; Casper Kopp, 1st lieut.; M. S. Hasie, 2d lieut.

Co. H.—William Heyl, capt.; A. Loblein, 1st lieut.; John Reuter, 2d lieut.

Co. I.—William C. Jones, capt.; John W. Stevens, 1st lieut.; John W. Holman, 2d lieut.

Co. K.—Charles Osburg, capt.; Julius Glade, 1st lieut.; Henry Kleeman, 2d lieut.

Co. L.—Louis Loos, capt.; G. Quernori, 1st lieut.; M. Heilseck, 2d lieut.

Co. M.—James C. Campbell, capt.; J. W. Wilson, 1st lieut.; John Obercombie, 2d lieut.

Fourth U. S. Reserve Corps, Infantry, Missouri Volunteers, mustered in in the fall of 1861:

FIELD AND STAFF.—John M. Herder, lieut.-col.; Charles H. Mannhardt, adjt.; Gustavus R. Spannagel, q.m.; Frederick Roepke, surg.

Co. A.—Charles A. Meyer, capt.; Frederick Hass, 1st lieut.; John D. Merton, 2d lieut.

Co. B.—Frederick Lubbering, capt.; Frederick Kreuter, 1st lieut.; Wolrad Schurmann, 2d lieut.

Co. C.—Frederick Pohlmann, capt.; Leopold Dingert, 1st lieut.; Henry Mester, 2d lieut.

Co. D.—Frederick Wedekind, capt.; Conrad Mueller, 1st lieut.; John Collonnes, 2d lieut.

Co. E.—George Adler, capt.; Robert Moss, 1st lieut.; Andrew Lepp, 2d lieut.

Co. F.—Julius Clade, capt.; Louis Sagel, 1st lieut.; Frederick Feldman, 2d lieut.

This battalion, like the Third Reserve Corps, was formed from the German population of St. Louis, and, like the other Reserve Corps organizations, rendered valuable service. It was mustered out Jan. 13, 1862.

Fifth Regiment of U. S. Reserve Corps, three months' service, organized in May, 1861, and discharged in September of the same year:

FIELD AND STAFF.—Charles G. Stifel, col.; Robert White, lieut.-col.; John J. Fischer, maj.; John K. Cummings, adjt.; John B. Mears, q.m.; Adalbert Gemmer, surg.; William Drechsler, asst. surg.; Rudolph Decker, chap.

Co. A.—E. H. Steinman, capt.; Henry Wilke, 1st lieut.; Otto Grassmer, 2d lieut.

Co. B.—Julius Krusch, capt.; George Dietrich, 1st lieut.; Frederick Forthmann, 2d lieut.

Co. C.—August Thorwald, capt.; Herman Schuk, 1st lieut.; Bern. Wingastner, 2d lieut.

Co. D.—William S. Herd, capt.; Joseph Tallman, 1st lieut.; William S. Robinson, 2d lieut.

Co. E.—Frederick Wedekind, capt.; John Gutberlet, 1st lieut.; Frederick Barth, 2d lieut.

Co. F.—John N. Herder, capt.; Frederick Kreuter, 1st lieut.; Frederick Lubbering, 2d lieut.

Co. G.—William Lorbe, capt.; Henry Mester, 1st lieut.; Frederick Pollman, 2d lieut.

Co. H.—Charles F. Koch, capt.; Gustavus Knoch, 1st lieut.; John B. Staunch, 2d lieut.

Co. I.—Charles Schoenbeck, capt.; Charles Beck, 1st lieut.; Conrad Miller, 2d lieut.

Co. K.—James B. Tannehill, capt.; Nic. F. Woiff, 1st lieut.; Philip Reeger, 2d lieut.

The regiment was mustered into service by Capt. Lyon on the 11th of May, 1861, and on returning from the arsenal was attacked by a mob at the corner of Fifth and Walnut Streets, St. Louis. Shots were exchanged, and four members of the regiment were killed; the loss of the mob was not ascertained. Subsequently, Companies A, D, and K volunteered to proceed to Jefferson City, and suppressed the insurrection of prisoners in the penitentiary. The regiment then performed much active service in various portions of the State, and re-enlisted in September, 1861, Lieut.-Col. John Jacob Fischer, commanding; C. F. Koch, maj.; Adolphus Zobel, adjt.; Frederick P. Zeppenfeld, q.m.; and Adalbert Gemmer, surg.

First Regiment of Missouri Volunteers, three months' service, mustered in April 20, 1861, reorganized June 10th:

FIELD AND STAFF.—Frank P. Blair, col.; George L. Andrews, lieut.-col.; John M. Schofield, maj.; Henry Hescock, adjt.; Herbert M. Draper, q.m.; Florence Cornyn, surg.; William Simon, asst. surg.

Co. A.—Rufus Saxton, capt.; William A. Gordon, 1st lieut.; Ernest W. Decker, 2d lieut.

Co. B.—W. L. Lothrop, capt.; Benjamin Taumatic, 1st lieut.; John L. Matthai, 2d lieut.

Co. C.—G. Harry Stone, capt.; —— Marshall, 1st lieut.; John H. Tiemeyer, 2d lieut.

Co. D.—Charles Anderson, capt.; Stillman O. Fish, 1st lieut.; Fulton H. Johnson, 2d lieut.

Co. E.—Robert B. Beck, capt.; John McFall, 1st lieut.; William D. Bowen, 2d lieut.

Co. F.—Cary Gratz, capt.; William T. Stewart, 1st lieut.; George Meyers, 2d lieut.

Co. G.—John S. Cavender, capt.; Frederick Welker, 1st lieut.; Charles S. Sheldon, 2d lieut.

Co. H.—Theodore Yates, capt.; Francis H. Manters, 1st lieut.; Thomas Haynes, 2d lieut.

Co. I.—Madison Miller, capt.; David Murphy, 1st lieut.; James Mar, 2d lieut.

Co. K.—Patrick E. Burke, capt.; E. W. Weber, 1st lieut.; Edward Madison, 2d lieut.

The first company of this regiment was organized at the first call of the President in the spring of 1861, and C. F. Larned was the first man to drill and organize the company. A second and third company was soon filled up and ready for service. These three companies were made up almost entirely of German Turners of St. Louis. Gen. Harney, at this time in command at St. Louis, refused to accept them into the United States service, he having no orders on the subject. After several ineffectual attempts to be admitted into the St. Louis arsenal, the companies resolved to offer their services to the Governor of Illinois. On making their intentions known to Hon. F. P. Blair, Jr., he at once, in conjunction with Capt. Lyon and Lieut. J. M. Schofield (afterwards general), consulted the companies, and promised to admit and arm them at the earliest possible moment. Accordingly, on the morning of April 22, 1861, these three companies were the first volunteers to enter the St. Louis arsenal, and were commanded as follows: Company A, Capt. Rufus Saxton, U.S.A.; Company B, Capt. Warren L. Lathrop, U.S.A.; Company C, Capt. G. Harry Stone, U.S.A. During the following few days several other companies entered the arsenal, and on the evening of the 27th, at the meeting of the officers, Hon. F. P. Blair, Jr., was unanimously elected colonel; George L. Andrews, lieutenant-colonel; and J. M. Schofield, major. The regiment on its organization numbered one thousand and twenty men. On the 27th of April a detachment of the regiment, under Capt. Harry Stone, was placed on board the steamer "City of Alton," and had the charge of the safe removal of a large quantity of arms and ammunition to Springfield, Ill., to arm Illinois troops. On the 10th of May the whole regiment participated in the capture of Camp Jackson, acting as guard to the prisoners until they were paroled. On the 10th of June the regiment, still having over a month of its original three months' enlistment to serve, was reorganized into a three years' or during the war regiment, and on the 1st of September following into the First Light Artillery Regiment. The regiment played a prominent part in the battle of Wilson's Creek.

For the Second Regiment Missouri Volunteers, for the three months' service, Henry Boernstein, colonel, no returns were made to the adjutant-general's office. On the 10th of September, 1861, the regiment was reorganized, the men having enlisted for the war. Its officers were:

FIELD AND STAFF.—Frederick Schaefer, col. (killed in battle, Murfreesboro', Tenn., Dec. 31, 1862); Bernard Laibold, col. (Jan. 8, 1863); Bernard Laibold, lieut.-col.; Francis Ehrler, lieut.-col.; Arnold Beck, lieut.-col.; Julius Windsbecker, maj.; Francis Ehrler, maj.; Arnold Beck, maj.; Matthias Kreamer, maj.; Frederick Jaensch, adjt.; Charles Fuelle, adjt.; Henry Busing, adjt.; Philip W. Schmidt, q.m.; Robert Kunz, q.m.; Richard Veeter, surg.; Charles Spinzig, surg.; George Bung, asst. surg.; Gustave Stegemann, asst. surg.

Co. A.—Francis Kohr, capt.; Matthias Kraemer, capt.; Adolph Lochr, 1st lieut.; Henry F. Dietz, 2d lieut.; William Strumpf, 2d lieut.; Leopold Kunth, 2d lieut.

Co. B.—Christian Burkhardt, capt.; Carroll A. Bernard, capt.; Jacob Zibelin, 1st lieut.; Matthias Kraemer, 1st lieut.; Robert Kunz, 1st lieut.; Henry Haverkamp, 1st lieut.; Charles Eichles, 2d lieut.; Henry Haverkamp, 2d lieut.; Christian Hoffmeister, 2d lieut.

Co. C.—Arnold Beck, capt.; Charles Fuelle, capt.; Carroll A. Bernard, 1st lieut.; Christopher Geissler, 1st lieut.; William Aulbach, 1st lieut.; William Boder, 2d lieut.; John Claude, 2d lieut.; Leopold Arndt, 2d lieut.

Co. D.—Henry Landfried, capt.; August Geuntzel, 1st lieut.; John Claude, 1st lieut.; John Klein, 2d lieut.; G. A. Rotter, 2d lieut.

Co. E.—Th. Trauernicht, capt.; Louis Bergan, capt.; Th. Trauernicht, capt.; Clemens Landgraeber, 1st lieut.; J. S. Fullerton, 1st lieut.; Michael V. Sherdan, 1st lieut.; Charles Knappe, 2d lieut.; Louis Raum, 2d lieut.; Henry Block, 2d lieut.

Co. F.—Francis Ehrler, capt.; Herman Hartman, capt.; August Zerman, 1st lieut.; Henry F. Dietz, 1st lieut.; Manlius Karl, 1st lieut.; William Kreuger, 1st lieut.; Matthias Kraemer, 2d lieut.; Julius Hunicke, 2d lieut.; William Zawadill, 2d lieut.

Co. G.—Charles W. Doer, capt.; Henry F. Dietz, capt.; P. U. Schmidt, capt.; Philip Wild, 1st lieut.; Charles Schoerckel, 1st lieut.; Edmund Dorsey, 2d lieut.; Charles Fuelle, 2d lieut.; Charles Schoerckel, 2d lieut.; Christian Heydtmann, 2d lieut.

Co. H.—Walter Hoppe, capt.; William Stoecker, capt.; Julius Hunicke, capt.; Herman Hartmann, 1st lieut.; Julius Hunicke, 1st lieut.; Leopold Arndt, 1st lieut.; Charles Deghle, 2d lieut.; Julius Neudorf, 2d lieut.; John Murphy, 2d lieut.

Co. I.—William Siefert, capt.; Charles Deghle, capt.; Jacob Zieblin, capt.; Nic Sand, 1st lieut.; William Stoecker, 1st lieut.; Henry Busing, 1st lieut.; Julius Neudorf, 1st lieut.; Henry Loeffel, 2d lieut.; Adolph Lohr, 2d lieut.; Gottfried Hauser, 2d lieut.; William Kreuger, 2d lieut.

Co. K.—Fred. Louis Weber, capt.; Jacob Zieblin, capt.; Christopher Giessle, capt.; Charles Miller, 1st lieut.; William Strumpf, 1st lieut.; Frederick Jaensch, 2d lieut.; Henry Busing, 2d lieut.; Ferdinand Hahn, 2d lieut.

The regiment took part in various engagements in Southwestern Missouri, Arkansas, and Mississippi, and in the battles of Murfreesboro', Chickamauga, and Chattanooga, in Tennessee.

Third Regiment of Missouri Volunteers, three months' service, mustered in in April, 1861, discharged in August, 1861:

FIELD AND STAFF.—Francis Sigel, col.; Albert Anselm, lieut.-col.; Henry Bishoff, maj.; Gustav Heinrichs, adjt.; Sebas. Engert, qrmr.; Frederick Hanssler, surg.; Charles Ludwig, asst. surg.

Co. A—RIFLES.—Joseph Indes, capt.; Leopold Helmle, 1st lieut.; William Roemer, 2d lieut.

Co. A.—John F. Cramer, capt.; William Osterhorn, 1st lieut.; Charles Weistney, 2d lieut.

Co. B—RIFLES.—Henry Zeis, capt.; Joseph Fries, 1st lieut.; Peter Steven, 2d lieut.

Co. B.—Joseph Conrad, capt.; William Mettmann, 1st lieut.; George Damede, 2d lieut.

Co. C.—Jacob Hartmann, capt.; Henry Bishoff, 1st lieut.; J. Heckenlaner, 2d lieut.

Co. D.—Aug. Hackman, capt.; Liverott Danner, 1st lieut.; Stephan Tehl, 2d lieut.

Co. E.—Charles Schaerff, 2d lieut.

Co. F.—Hugh Gollmer, capt.; Aug. Wilham Busche, 1st lieut.

Co. G.—Adolph Dengler, capt.; Charles Hoenny, 1st lieut.; Ed[illegible]rd Krebe, 2d lieut.

Co. I.—George D. Friedlein, capt.; George Marschall, 2d lieut.

Co. I.—Charles H. [illegible]rhardt, capt.; H. Klostermann, 1st lieut.; Joseph [illegible]ner, 3d lieut.

Co. K.—Theodore Meumann, capt.; Theodore Henck, 1st lieut.; George Schuster, 2d lieut.

Of this regiment, Company B (Rifles) was engaged in the battles of Carthage and Wilson's Creek, and Companies B, C, E, F, G, H, I, and K also participated in the campaign in Southwestern Missouri, having previously taken an active part in the Camp Jackson affair. The regiment re-enlisted, and was reorganized Jan. 18, 1862, and consolidated with a portion of the Nineteenth Regiment, Isaac F. Shepard, and subsequently Theodore Meumann, being the colonel of the new regiment. It participated in the campaign which ended with the capture of Vicksburg.

Fourth Regiment of Missouri Volunteers, three months' service:

FIELD AND STAFF.—Nic. Schüttner, col.; A. Hammer, lieut.-col.; F. Niggeman, maj.; S. Homburg, adjt.; Charles Grison, q.m.; Dr. Beck, surg.; A. Keosch, asst. surg.

Capts. George Dahmer, Co. A; George Rehman, Co. B; Frederick Schuddig, Co. C; George Hasfurther, Co. D; Theodore Fishback, Co. E; George Berg, Co. F; Charles Dening, Co. G; Phil. Frank, Co. H; J. Hubbel, Co. I; Louis Rohrer, Co. K; —— Henry, Co. L; —— Weber, Co. M.

Out of a body of Union men called the Black Jaeger, and organized under Maj. Schüttner in the winter of 1861, "for the maintenance of the constitutional government of the United States, and for the protection of the St. Louis arsenal in particular," the Fourth Regiment Missouri Volunteers, for the three months' service, was mainly recruited. They were encamped and were sworn in on the arsenal grounds on the 22d and 23d days of April, 1861. The regiment consisted of ten companies (each full number) and one rifle battalion of two companies,—total, twelve companies, with over one thousand men, under the

command of Col. N. Schüttner. After being encamped in the arsenal a short time, Gen. N. Lyon, on the 10th day of May, issued the order to march on Camp Jackson, where the Fourth Regiment occupied the east front, and after the surrender of the camp, the regiment, in connection with the Third Regiment, held possession of the same till the camp equipage and all the captured articles were removed to the St. Louis arsenal. Subsequently the regiment rendered effective service in Illinois and Missouri. In 1862 the Third and Fourth Battalions, Reserve Corps, were consolidated, and the Fourth Regiment Infantry, Missouri Volunteers, formed from them. It was chiefly employed within the State. The officers then were:

Field and Staff.—Robt. Handhausen, col.; Julius Handhausen, lieut.-col.; Charles A. Warren, maj.; Jerome H. Bacon, adjt.; George Husmann, q.m.; Edmund Boerner, surg.; John Feldman, asst. surg.; George Feutschmann, chaplain.

Co. A.—Adolph Knipper, capt.; C. A. F. Halst, 1st lieut.; Louis Krauthoff, 2d lieut.

Co. B.—Michael Bauer, capt.; Christian Strobel, 1st lieut.; Alexander Lowry, 1st lieut.; Louis Waechter, 2d lieut.; Julius Sporleder, 2d lieut.

Co. C.—Constance Rick, capt.; Henry German, 1st lieut.; Charles Rick, 2d lieut.

Co. D.—Wm. Hirt, capt.; Louis Koop, 1st lieut.; Louis Miller, 2d lieut.

Co. E.—Balthazar Mundwiller, capt.; Eugene Alean, 1st lieut.; J. J. Stocklin, 2d lieut.

Co. F.—Caspar Schubert, 1st lieut.; J. C. Myer, 1st lieut.; Frank Emser, 2d lieut.; Wm. R. McCracken, 2d lieut.

Co. G.—A. H. Piquenard, capt.; Louis Hild, 1st lieut.; Michael D. Lemoine, 2d lieut.

Fifth Regiment of Missouri Volunteers, mustered in in May, 1861, for three months' service; discharged Aug. 26, 1861:

Field and Staff.—Charles E. Solomon, col.; Chest. Dick Wolff, lieut.-col.; F. W. Cronenbold, maj.; Edward C. Franklin, surg.; Samuel H. Melcher, asst. surg.; William Gerlach, adjt.; Ben. Meisner, q.m.

Co. B.—Louis Gottschalk, capt.; Emil Wachter, 1st lieut.; William Berg, 2d lieut.

Co. C.—Frederick Solomon, capt.; William Kassak, 1st lieut.; Otto Veme, 2d lieut.

Co. D.—Charles Mehl, capt.; Gustav Leibold, 1st lieut.; Christopher Stork, 2d lieut.

Co. E.—Charles Stephany, capt.; James Ballhaus, 1st lieut.; Julius Nehrig, 2d lieut.

Co. F.—Alfred Armand, capt.; Rudolph Schneider, 1st lieut.; Emilie Thomas, 2d lieut.

Co. G.—Charles E. Stark, capt.; Nicholas Fuester, 1st lieut.; Charles Weiss, 2d lieut.

Co. H.—William J. Chester, capt.; John Coleman, 1st lieut.; Samuel Morris, 2d lieut.

Co. I.—Charles P. Meisner, capt.; G. Adam Bauer, 1st lieut.; Joseph Spiegelhalter, 2d lieut.

Co. K.—Samuel A. Hogg, capt.; William S. Boyd, 1st lieut.; William H. Thompson, 2d lieut.

The regiment took part in various engagements in the southwestern part of Missouri.

Fifth Regiment Infantry, Missouri Volunteers:

Field and Staff.—August H. Poten, col.; Samuel A. Foster, col.; John Jacob Fischer, lieut.-col.; Emil Stradtman, lieut.-col.; James A. Greason, lieut.-col.; C. F. Koch, maj.; Elliott Charles, maj.; Adolphus Zobel, adjt.; Frederick P. Zeppenfeld, q.m.; Adalbert Gemmer, surg.; Henry Schoenick, asst. surg.; William Wilken, chaplain.

Co. A.—Wm. H. Moeller, capt.; Theodore Becher, 1st lieut., Wm. F. Gieselmann, 1st lieut.; George Frommann, 1st lieut.; Wm. F. Gieselmann, 2d lieut.; Frederick Schmidt, 2d lieut.

Co. B.—Henry Obermuller, capt.; Louis Reichold, 1st lieut.; Hermann Draege, 2d lieut.; Roger T. Davidson, 2d lieut.

Co. C.—Peter Holle, capt.; Bernard Essroger, capt.; Felix Sprohmle, capt.; Charles Sarstedt, 1st lieut.; H. J. Kleimann, 2d lieut.

Co. D.—Philip Adolph, capt.; John B. Straush, 1st lieut.; Wm. Heidemann, 2d lieut.

Co. E.—Henry Deubark, capt.; Henry Heimburger, 1st lieut.; Conrad Ludwig, 2d lieut.

Co. F.—Henry Nagel, capt.; Frederick L. Muller, capt.; A. A. Blaumenthal, 1st lieut.; Wm. B. Putnam, 2d lieut.

Co. G.—Richard Flack, capt.; Louis Fred. Muller, 1st lieut.; A. Frumhold, 1st lieut.; F. W. Bodungen, 2d lieut.

Co. H.—Anton Gerster, capt.; John Kies, 1st lieut.; Thos. F. Haskell, 2d lieut.

Co. I.—J. D. Voerster, capt.; John E. Henseler, capt.; John E. Henseler, 1st lieut.; Christian Lochbuler, 1st lieut.; John E. Henseler, 2d lieut.; Christian Lochbuler, 2d lieut.; John Kribs, 2d lieut.

Co. K.—Louis Winkelmaier, capt.; Felix Sprohmle, capt.; J. B. Reavis, capt.; George Berg, capt.; Philip Dickendorff, 1st lieut.; Charles C. Allen, 1st lieut.; Jacob Schomle, 2d lieut.

Co. A (new).—J. B. Reavis, capt; Wm. H. Miller, 2d lieut.

The regiment was formed by the consolidation of the Fifth Reserve Corps with three unattached companies, under Special Orders No. 43, 18th March, 1862. The regiment was chiefly employed within the State, and performed valuable service.

Sixth Regiment Infantry, Missouri Volunteers:

Field and Staff.—Peter E. Bland, col.; James H. Blood, col.; Ira Boutell, lieut.-col.; Mahlon Weber, maj.; John W. Fletcher, maj.; William D. Coleman, maj.; James S. Temple, maj.; Ira Boutell, maj.; Joseph S. Gage, maj.; Bowman H. Peterson, maj.; George S. Walker, surg.; E. M. Joslin, surg.; Jacob Keller, asst. surg.; Warren P. McChesney, asst. surg.; Walter C. Gantt, adjt.; James P. Needham, adjt.; William S. Jewell, adjt.; William Wolf, adjt.; John A. Blood, q.m.; Samuel Huffman, chaplain.

Co. A.—George A. Schaffer, capt.; Frederick A. Bragg, capt.; Henry C. Houts, 1st lieut.; George Goodwin, 1st lieut.; John E. Thompson, 2d lieut.; L. W. Williams, 2d lieut.; William L. Gordon, 2d lieut.; Garret D. Brookman, 2d lieut.

Co. B.—John W. Fletcher, capt.; Charles C. Fletcher, capt.; T. L. Harrington, capt.; Charles C. Fletcher, 1st lieut.; T. L. Harrington, 1st lieut.; Joseph F. Dutch, 1st lieut.; M. Elwood Miller, 2d lieut.; Thomas J. King, 2d lieut.; J. G. Rhomberg, 2d lieut.; Philip H. Snider, 2d lieut.

Co. C.—James S. Temple, capt.; James Adams, capt.; Lewis M. Habish, 1st lieut.; James Adams, 1st lieut.; Robert L.

Vance, 1st lieut.; George H. Stockman, 1st lieut.; Robert L. Vance, 2d lieut.; George H. Stockman, 2d lieut.; Richard D. Bland, 2d lieut.

Co. D.—Joseph S. Gage, capt.; Julius Pitzman, capt.; Charles O. Patier, 1st lieut.; Julius Pitzman, 1st lieut.; William L. Gordon, 1st lieut.; William Wolf, 2d lieut.; Mark Anthony, 2d lieut.

Co. E.—Francis P. Rush, capt.; Solomon Males, 1st lieut.; John F. Bailey, 1st lieut.; Stephen Child, 2d lieut.; George W. Bailey, 2d lieut.

Co. F.—Ira Boutell, capt.; James P. Needham, 1st lieut.; Edwin R. Messenger, 1st lieut.; James P. Needham, 2d lieut.; Edwin R. Messenger, 2d lieut.; David R. Mortimer, 2d lieut.

Co. G.—George W. Bywater, capt.; W. P. Hollister, capt.; L. W. Williams, capt.; William P. Hollister, 1st lieut.; Thomas J. King, 1st lieut.; William R. Duff, 1st lieut.; Simeon S. Baker, 1st lieut.; Thomas L. Harrington, 2d lieut.; T. H. Seward, 2d lieut.; Charles Johnson, 2d lieut.; John Williams, 2d lieut.

Co. H.—Delos Van Daison, capt.; Jacob Lyman Perly, 1st lieut.; Patrick G. Galvin, 2d lieut.; Shelby Tyler, 2d lieut.

Co. I.—James C. McGinnis, capt.; Robert L. Vance, capt.; Daniel O. Ketchison, capt.; Frederick A. Bragg, 1st lieut.; Daniel O. Kethison, 1st lieut.; J. G. Rhomberg, 1st lieut.; Daniel O. Ketchison, 2d lieut.; John H. Pinney, 2d lieut.; Herman D. Stevens, 2d lieut.

Co. K.—Robert H. Buck, capt.; Jacob Lyman Peerly, capt.; Charles O. Patier, capt.; Symmes H. Voorhees, 1st lieut.; Belmont Perkins, 1st lieut.; Charles O. Patier, 1st lieut.; Belmont Perkins, 2d lieut.; Edward Stanton, 2d lieut.; Frank Bennett, 2d lieut.

The Sixth Regiment was organized at St. Louis in the months of May and June, 1861, and was employed in Missouri until June, 1862, when it proceeded to Corinth, Miss., subsequently taking part in various engagements. It was prominent in the assault on Chickasaw Bluffs, Dec. 29, 1862, and suffered severely at Arkansas Post. It was subsequently ordered to reinforce Gen. Rosecrans in Tennessee, and participated in the engagements of Lookout Mountain and Missionary Ridge, Nov. 24 and 25, 1863.

Seventh Regiment Infantry, Missouri Volunteers:

Field and Staff.—John D. Stevenson, col.; Wm. S. Oliver, col.; Egbert B. Brown, lieut.-col.; Thomas Curley, lieut.-col.; Wm. S. Oliver, lieut.-col.; Robert Buchanan, lieut.-col.; Thomas Curley, maj.; Wm. S. Oliver, maj.; Edwin Wakefield, maj.; Wm. B. Collins, maj.; Frederick Whitehead, adjt.; Thomas Whelan, adjt.; Charles D. Beman, adjt.; John F. Neville, q.m.; E. M. Powers, surg.; P. S. O'Reilly, asst. surg.; B. F. Thayer, asst. surg.

Co. A.—Wm. A. Taulby, capt.; Henry R. Switzer, capt.; Henry R. Switzer, 1st lieut.; John O'Conner, 1st lieut.; John O'Neil, 2d lieut.; John O'Conner, 2d lieut.; John Lamb, 2d lieut.

Co. B.—Wm. S. Oliver, capt.; James H. Coffee, capt.; Frank A. O'Mara, 1st lieut.; Thomas Whelan, 1st lieut.; Robert Porter, 1st lieut.; James F. How, 2d lieut.; Thomas Whelan, 2d lieut.; Robert Porter, 2d lieut.

Co. C.—James Sullivan, capt.; Moroe Harrison, capt.; James H. Steger, 1st lieut.; Samuel McGoffin, 1st lieut.; Leonard Snell, 2d lieut.; Samuel McGoffin, 2d lieut.; Timothy D. O'Sullivan, 2d lieut.; Charles W. Tetsell, 2d lieut.

Co. D.—Edwin Wakefield, capt.; Thomas H. Oliver, capt. James Hester, 1st lieut.; Thomas Russell, 1st lieut Robert Menagh, 1st lieut.; John B. Mead, 2d lieut.; Thomas Russell, 2d lieut.; A. P. Cindall, 2d lieut.

Co. E.—Edward J. Castello, capt.; James H. Coffey, 1st lieut. Henry W. Chanfrau, 1st lieut.; Henry Smith, 1st lieut. Albert T. Smith, 2d lieut.; Henry W. Chanfrau, 2d lieut. Henry Smith, 2d lieut.; Brice P. Munns, 2d lieut.

Co. F.—Jesse H. Holmes, capt.; Wm. B. Collins, capt.; Thomas Russell, capt.; Wm. B. Collins, 1st lieut.; Michael A. Doyle 1st lieut., Dan. McBride, 1st lieut.; George Fonda, 1st lieut.; Michael A. Doyle, 2d lieut.; George W. Jennings, 2d lieut.; Dan. McBride, 2d lieut.; Wm. T. Followell, 2d lieut.

Co. G.—John W. Watts, capt.; Alfred J. Judy, capt.; Thomas Whelan, capt.; Alfred J. Judy, 1st lieut.; Frank F. Gray, 1st lieut.; Martin L. Watts, 2d lieut.; Frank F. Gray, 2d lieut.; Benjamin F. Haynes, 2d lieut.

Twenty-seventh Regiment:

Co. H.—Wm. J. Hawkins, capt.; Philip D. Toomer, capt. Munroe Harrison, 1st lieut.; Philip D. Toomer, 1st lieut. George W. Jennings, 1st lieut.; Bartlett Reames, 1st lieut. Philip D. Toomer, 2d lieut.; John W. Burrett, 2d lieut.

Co. I.—Joseph S. C. Rowland, capt.; Jay J. Drake, capt.; Andrew Hosmer, 1st lieut.; Thos. H. Oliver, 1st lieut.; John K. Aldrich, 1st lieut.; Jay J. Drake, 2d lieut.; George Fonda, 2d lieut.

Co. K.—George W. Smith, capt.; Robert Buchanan, capt.; Joshua W. Bourne, capt.; Joshua W. Bourne, 1st lieut Chauncey F. Wilson, 1st lieut.; John B. Rowland, 2d lieut.; John H. Schooley, 2d lieut.; Chauncey F. Wilson, 2d lieut.

This regiment was organized in June, 1861, and saw much hard service, which it performed with great zeal and unflinching courage. Its first colonel, John D. Stevenson, was subsequently in command at Harper's Ferry during Sheridan's operations in the Valley of Virginia, and it was through him that all the telegraph reports were communicated to the country. At the close of the war he was in command of Fort Russell, which he built, near Cheyenne. Col. Stevenson was a Free-Soil member of the Missouri Legislature before the war, and in October, 1875, was appointed United States Marshal of Missouri, vice Newcomb resigned.

Eighth Regiment Infantry, Missouri Volunteers:

Field and Staff.—Morgan L. Smith, col.; Giles A. Smith, col.; David C. Coleman, col.; James Peckham, lieut.-col. Giles A. Smith, lieut.-col.; David C. Coleman, lieut.-col. Dennis T. Kirby, lieut.-col.; John McDonald, maj.; Dennis T. Kirby, maj.; Bowman H. Peterson, surg.; John R. Bailey, surg.; John R. Bailey, asst. surg.; Trolius Brown, asst. surg.; Amos L. Flint, asst. surg.; Darius Crouch, chaplain; Samuel D. Longhead, chaplain; David C. Coleman, adjt.; Edwin E. Furber, adjt.; James Hall, q.m. Frederick B. Clapp, q.m.; Isaac B. Halsey, q.m.

Co. A.—John McDonald, capt.; Wm. G. Johnson, capt.; George W. Crane, capt.; Wm. G. Johnson, 1st lieut.; George W. Crane, 1st lieut.; Charles Vierheller, 1st lieut.; Ezra W. Cummings, 1st lieut.; George W. Crane, 2d lieut.; Nelson

Patterson, 2d lieut.; Isaac B. Halsey, 2d lieut.; John Fitzgerald, 2d lieut.

Co. B.—William Hill, capt.; Edward R. Otis, 1st lieut.; Henry C. Moffett, 1st lieut.; Alonzo S. Sterling, 1st lieut.; Henry C. Moffett, 2d lieut.; Samuel Boyd, 2d lieut.; Edward Perret, 2d lieut.; Harvey W. Green, 2d lieut.

Co. C.—Charles McDonald, capt.; Thomas Lee Morgan, capt.; G. Frederick Eckhard, 1st lieut.; Harry B. Harris, 1st lieut.; William D. Murphy, 1st lieut.; Thomas Lee Morgan, 1st lieut.; Wm. F. Sheely, 1st lieut.; Harry B. Harris, 2d lieut.; Thomas Lee Morgan, 2d lieut.; Clifford A. Hand, 2d lieut.

Co. D.—Giles A. Smith, capt.; Morgan Potts, capt.; John B. Cole, capt.; John W. White, 1st lieut.; Morgan Potts, 1st lieut.; Jacob C. Hill, 1st lieut.; Frederick B. Clapp, 2d lieut.; Isaac E. Huff, 2d lieut.; George Ostram, 2d lieut.

Co. E.—Dennis T. Kirby, capt.; Sidney W. Ainsworth, capt.; Nelson Patterson, capt.; Sidney W. Ainsworth, 1st lieut.; Louis Lipman, 1st lieut.; Wm. G. McSpadden, 1st lieut.; Addison Ware, Jr., 2d lieut.; Wm. G. McSpadden, 2d lieut.; Elias Reitenaur, 2d lieut.

Co. F.—Alex. A. Jameson, capt.; Elias S. Bedford, 1st lieut.; Bushrod W. Musselmann, 1st lieut.; Philip H. Murphy, 2d lieut.; Bushrod W. Musselmann, 2d lieut.; Wm. M. Bogart, 2d lieut.

Co. G.—David P. Grier, capt.; Henry C. Moffett, capt.; Hugh Neill, 1st lieut.; Addison Ware, Jr., 1st lieut.; William D. Murphy, 2d lieut.; Alonzo S. Sterling, 2d lieut.; Ezra W. Cummings, 2d lieut.

Co. H.—George B. Swarthout, capt.; John W. White, capt.; Charles L. Corwin, 1st lieut.; William C. Russell, 1st lieut.; George W. Baker, 1st lieut.; George W. Baker, 2d lieut.; Edwin A. Ware, 2d lieut.; Harvey Eno, 2d lieut.

Co. I.—Alexander Hart, capt.; William H. McGowan, capt.; Joseph W. Barr, 1st lieut.; Edwin E. Furber, 1st lieut.; William H. McGowan, 1st lieut.; Edward Perret, 1st lieut.; Edwin E. Furber, 2d lieut.; William H. McGowan, 2d lieut.; William H. Sheely, 2d lieut.; John B. Cole, 2d lieut.; Samuel H. Halsted, 2d lieut.

Co. K.—Edward M. Seibel, capt.; Hugh Neill, capt.; Edward E. Lane, 1st lieut.; Nelson Patterson, 1st lieut.; Edwin A. Ware, 1st lieut.; Charles Vierheller, 2d lieut.; Joshua A. Browner, 2d lieut.

This regiment, known originally as the American Zouaves, was organized in June, 1861, and appeared conspicuously in many important battles. It lost largely in men, and no regiment rendered more honorable service. Cols. Morgan L. Smith and Giles A. Smith became brigadier-generals of volunteers.

Tenth Regiment Infantry, Missouri Volunteers:

Field and Staff.—George R. Todd, col.; Samuel A. Holmes, col.; Francis C. Deimling, col.; George R. Todd, lieut.-col.; Samuel A. Holmes, lieut.-col.; John D. Foster, lieut.-col.; Leonidas Henry, lieut.-col.; Christian Hoppel, lieut.-col.; Samuel A. Holmes, maj.; Aaron Brown, maj.; Leonidas Henry, maj.; Francis C. Deimling, maj.; Joseph Walker, maj.; Francis C. Deimling, adjt.; John M. Boyd, Jr., adjt.; Thorwald Jacobson, q.m.; William A. Kellogg, q.m.; Oliver B. Payne, surg.; Philander J. Payne, surg.; Absalom B. Stuart, asst. surg.; Thomas L. Morgan, asst. surg.; George R. Palmer, chaplain.

Co. A.—Leonidas Henry, capt.; Charles A. Gilchrist, capt.; Samuel W. Craft, capt.; Joseph Walker, 1st lieut.; Samuel W. Craft, 1st lieut.; Asaph J. Davis, 1st lieut.; Miles McCabe, 2d lieut.; William F. Snyder, 2d lieut.; Samuel W. Craft, 2d lieut.; Asaph J. Davis, 2d lieut.

Co. B.—William F. Bayne, capt.; Gilbert D. Gray, capt.; James E. Fleming, 1st lieut.; Isaac N. Vanhosen, 1st lieut.; Jerry Randolph, 2d lieut.; John M. Boyd, Jr., 2d lieut.; Isaac N. Vanhosen, 2d lieut.; Duncan McVickar Stuart, 2d lieut.

Co. C.—Andrew J. Lovell, capt.; James B. Fitch, capt.; John F. Noyes, 1st lieut.; Gerald M. Finley, 1st lieut.; Alexander S. Buchanan, 1st lieut.; Peter Craigmiles, 2d lieut.; Alexander S. Buchanan, 2d lieut.; Samuel A. Shannon, 2d lieut.

Co. D.—David C. Dougherty, capt.; Samuel McAchanan, 1st lieut.; Gilbert D. Gray, 1st lieut.; Manus O. Frost, 1st lieut.; Gilbert D. Gray, 2d lieut.; Albert A. Wilson, 2d lieut.; Lewis D. Phillips, 2d lieut.

Co. E.—Elihu H. Henry, capt.; Thomas D. Seawell, capt.; Thomas D. Seawell, 1st lieut.; James B. Logan, 1st lieut.; Solomon L. Elwood, 1st lieut.; James B. Logan, 2d lieut.; Solomon L. Elwood, 2d lieut.

Co. F.—Andrew C. Todd, capt.; Joseph Walker, capt.; Morris Frazer, capt.; James Crawford, 1st lieut.; Morris Frazer, 1st lieut.; Russell T. Stokes, 1st lieut.; John Stevenson, 2d lieut.

Co. G.—William A. J. Russell, capt.; James K. Davidson, 1st lieut.; Joseph K. Lloyd, 1st lieut.; Morris Frazer, 2d lieut.; Joseph K. Lloyd, 2d lieut.

Co. H.—James F. Dougherty, capt.; Christian Hoppel, capt.; William H. White, capt.; James Kay, 1st lieut.; Cyrus C. Bemis, 1st lieut.; H. H. Meredith, 1st lieut.; Michael Diemar, 1st lieut.; Robert P. Todd, 2d lieut.; A. H. Baum, 2d lieut.; Michael Diemar, 2d lieut.

Co. I.—Charles A. Gilchrist, capt.; Joel W. Strong, capt.; Gerald M. Finlay, 1st lieut.; Austin Swan, 1st lieut.; William B. White, 1st lieut.; John A. Donaldson, 1st lieut.; Samuel W. Craft, 2d lieut.; William B. White, 2d lieut.

Co. K.—George Hepperheimer, capt.; William Forbes, capt.; James B. Logan, capt.; Jacob Keller, 1st lieut.; William H. Fenner, 1st lieut.; David W. McClurken, 1st lieut.; Charles Wexler, 2d lieut.; Henry H. Meredith, 2d lieut.; Schuyler von Tiffin, 2d lieut.

The Tenth Regiment rendezvoused at the St. Louis arsenal on the 1st of August, 1861, and its original officers were: Colonel, Chester Harding, Jr.; lieutenant-colonel, George R. Todd; major, Samuel A. Holmes; adjutant, Francis C. Deimling; quartermaster, Thorwald Jacobson; surgeon, Oliver B. Payne; assistant surgeon, A. B. Stuart. On the 1st of December, 1861, Col. Harding, having been appointed adjutant-general of the State of Missouri, resigned the colonelcy, and Lieut.-Col. Todd was promoted to be colonel, and Maj. Holmes to be lieutenant-colonel. At the same time a battalion, known as the Twenty-first Missouri Infantry, was consolidated with the regiment, with A. Brown as major. Subsequently Lieut.-Col. Holmes became colonel, and Capt. Leonidas Horney, of Company A, major. At the same time three companies of the battalion known as the Twenty-second Missouri Volunteers were consolidated with the regiment, and their commander, Lieut.-Col.

John D. Foster, was made lieutenant-colonel of the Tenth. After serving at various points in Missouri, it was assigned to the Army of the Mississippi, under Gen. Pope, and participated in a number of severe engagements. At the battle of Corinth, Oct. 3 and 4, 1862, it recaptured a battery at the point of the bayonet and held its position against repeated assaults. In November and December, 1862, it formed a part of the expedition into Central Mississippi, and subsequently served in Louisiana, Arkansas, and Mississippi. On the 14th of May, 1863, during the attack on the city of Jackson, the capital of Mississippi, the Tenth had a desperate fight with the Twenty-fourth South Carolina Regiment, which it defeated with heavy loss. On the 16th, at the battle of Champion Hill, it executed a bayonet charge which forced the enemy back at a critical juncture and elicited the acknowledgments of Gen. Grant. During the charge Lieut.-Col. Horney, who commanded, was killed. The Tenth also took part in the siege of Vicksburg. At the battle of Missionary Ridge the regiment again distinguished itself. In the mean while, Col. S. A. Holmes having resigned, Maj. F. C. Deimling was promoted to be colonel, Capt. Christian Happel to be lieutenant-colonel, and Capt. Joseph Walker to be major.

Twelfth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—P. J. Osterhaus, col.; Hugo Wangelin, col.; Otto Schadt, lieut.-col.; Jacob Karcher, lieut.-col.; Hugo Wangelin, maj.; Jacob Karcher, maj.; Gustavus Lightfoot, maj.; Frederick Ledergerber, maj.; William A. Gordon, adjt.; Joseph A. Ledergerber, adjt.; Charles Louis Kasten, adjt.; Anthony Sanspeur, q.m.; Herman F. Mons, q.m.; Charles Cook, surg.; L. H. Junghaus, surg.; Joseph Spiegelhalter, surg.; William Fritz, asst. surg.; Joseph Spiegelhalter, asst. surg.; Frederick Hohly, asst. surg.; Albert Kraus, chaplain.

Co. A.—Jacob Karcher, capt.; Christian Andel, capt.; Albert Affleck, capt.; Albert Affleck, 1st lieut.; Arthony Engleman, 1st lieut.; Herman Grenzenberg, 1st lieut.; John Kaufman, 1st lieut.; Joseph A. Ledergerber, 2d lieut.; Herman Garvins, 2d lieut.; Casemir Andel, 2d lieut.

Co. B.—Frederick Ledergerber, capt.; Herman Grenzeberg, capt.; Christian Andel, 1st lieut.; Charles Louis Kasten, 1st lieut.; William Bechtel, 1st lieut.; Anton Engleman, 2d lieut.; Trolius Tyndale, 2d lieut.; Charles Thery, 2d lieut.

Co. C.—Herman Bendel, capt.; William Mittmann, capt.; Frederick Von Bodungen, 1st lieut.; Anthony Engleman, 1st lieut.; Casemir Andel, 1st lieut.; Frederick Dinkleman, 2d lieut.; Henry Kircher, 2d lieut.; Ferdinand Dallmyer, 2d lieut.

Co. D.—Julius Fauer, capt.; Albert Affleck, capt.; Adam Rauft, capt.; William McKenzie, 1st lieut.; Charles G. Doerg, 1st lieut.; Herman Grenzeberg, 2d lieut.; E. Schierenberg, 2d lieut.; Henry Seipel, 2d lieut.

Co. E.—Charles Denny, capt.; Henry Kircher, capt.; John Kayser, 1st lieut.; William Reinicke, 1st lieut.; Herman Tuerk, 2d lieut.; Herman F. Mons, 2d lieut.; Theodore Hermann, 2d lieut.

Co. F.—Gustavus Lightfoot, capt.; John Kaisir, capt.; Adam Rauft, 1st lieut.; Herman Garvens, 1st lieut.; Charles G. Doerge, 2d lieut.; Frederick Meyer, 2d lieut.; George Eggart, 2d lieut.

Co. G.—John Mockenhaupt, capt.; Anthony Englemann, capt.; Frederick Wallmann, 1st lieut.; Frederick N. Wolf, 1st lieut.; Frederick Meyer, 1st lieut.; Charles Louis Kaster, 2d lieut.; William Reincke, 2d lieut.; John Kaufman, 2d lieut.

Co. H.—William Schunhr, capt.; William McKenzie, capt.; Adam Rauft, capt.; Christian Andel, capt.; Anthony Steffens, capt.; O. Steinberg, 1st lieut.; Joseph A. Ledergerber, 1st lieut.; Alex. Pfeiffer, 1st lieut.; Anthony Steffens, 1st lieut.; Theodore Hermann, 1st lieut.; Adolphus Schoettler, 2d lieut.; Frederick Kessler, 2d lieut.

Co. I.—John Ahlefeld, capt.; Joseph A. Ledergerber, capt.; Robert Henne, 1st lieut.; Henry Seipel, 1st lieut.; Anton Steffens, 2d lieut.; Ernst Arp, 2d lieut.; Edward Neisek, 2d lieut.

Co. K.—C. Von Haseler, capt.; F. O. Steinberg, capt.; William Mittman, 1st lieut.; Henry Kircher, 1st lieut.; Frederick Kessler, 1st lieut.; Alex. Pfeiffer, 2d lieut.; William Bechtel, 2d lieut.; Ernst Schmidt, 2d lieut.

This regiment was organized under Col. P. J. Osterhaus, in St. Louis, in August, 1861. It left St. Louis with the Fremont expedition, as part of Gen. Sigel's division; went to Jefferson City, and from there to Sedalia, where Col. Osterhaus took command of a brigade, and Lieut.-Col. Otto Schadt succeeded him in the command of the regiment. From Sedalia it went to Springfield; from there, October 6th, to Wilson's Creek; returned October 8th to Springfield, and moved into quarters at Rolla.

After performing much active service, it took boats for Yazoo River December 21st; fought the battles of Chickasaw Bayou, and was in the first attack upon Vicksburg, December 28th, 29th, and 30th. From thence it returned to Arkansas Post, Jan. 2, 1863; partook in the siege and capture of that place, and returned from there to Young's Point, La. In February it took boats for Old Yazoo Pass, and formed part of the expedition against Fort Pemberton, from which, returning in the latter part of April, it moved its camp to Milliken's Bend. From there it marched by way of Grand Gulf, as a part of Gen. Grant's army, upon Vicksburg; took part in the different battles and skirmishes before Vicksburg; was in the assault May 22, 1863, and until the day of surrender of that place in the trenches before it.

On the 5th of July the regiment marched to Canton, Miss., where it was again engaged with the enemy on July 10th, and afterwards encamped near Black River bridge. From there it marched by Memphis, Corinth, etc., to Iuka; advanced to Tuscumbia, being engaged in frequent skirmishes on the way, and received orders to join the United States forces at Chatta-

nooga, where it partook in the battles of Chattanooga, Ringgold, and Missionary Ridge.

No regiment lost more severely in officers and men, and in the famous charge on the enemy's works at Vicksburg it met the terrific fire with great heroism.

Fifteenth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Francis J. Joliat, col.; Joseph Conrad, col.; William Jacquien, lieut.-col.; Joseph Conrad, lieut.-col.; John Weber, lieut.-col.; George Landry, maj.; John Weber, maj.; H. F. Dietz, maj.; Francis Mohrhardt, maj.; George Hollman, adjt.; Adolphus Schuster, adjt.; Martin Schroeder, adjt.; Frederick Lipps, adjt.; Charles Perret, q.m.; Jacob Gross, q.m.; Charles Perret, q.m.; Adolphus Erdmann, q.m.; Wm. Steiger, surg.; John Ernst, surg.; August Roach, surg.; Galles Reitz, asst. surg.; John B. Chaffie, asst. surg.; Edward Keller, chaplain.

Co. A.—Joseph M. Elmer, capt.; Francis Unger, capt.; Edward De Borde, capt.; George Ernst, 1st lieut.; Jacob Bugg, 1st lieut.; Adolphus Erdmann, 1st lieut.; Jacob Bugg, 2d lieut.; Marca Rigoni, 2d lieut.; Adolphus Erdmann, 2d lieut.; Anton Tanner, 2d lieut.

Co. B.—John Weber, capt.; George Ernst, capt.; Henry Nelson, 1st lieut.; Francis Unger, 1st lieut.; Fridolin Ramnel, 1st lieut.; Frank Unger, 2d lieut.; Geo. Albert, 2d lieut.; Christian Queinzius, 2d lieut.; Wm. Eisermann, 2d lieut.

Co. C.—Melchior Zimmerman, capt.; Martin Schroeder, capt.; Jacob Gross, capt.; John G. Reis, capt.; Frederick Unger, 1st lieut.; Jacob Gross, 1st lieut.; Justin Troxler, 1st lieut.; George A. Bauer, 1st lieut.; Jacob Seeli, 2d lieut.; Justin Troxler, 2d lieut.; Frederick Lipps, 2d lieut.; Frederick Eckert, 2d lieut.; Hermann Koenig, 2d lieut.

Co. D.—Jacob Straub, capt.; Louis Bergau, capt.; Gustav Linkleman, 1st lieut.; Martin Schroeder, 1st lieut.; John Postel, 1st lieut.; Martin Schroeder, 2d lieut.; Victor Vandernealc, 2d lieut.; George F. Elwerth, 2d lieut.; John Kraehe, 2d lieut.

Co. E.—John Wildberger, capt.; George Isenstein, capt.; Max Goedon, 1st lieut.; Samuel Reisenger, 1st lieut.; John Buerki, 1st lieut.; Samuel Rexinger, 2d lieut.; John Postel, 2d lieut.; Charles Kellner, 2d lieut.; John Behrend, 2d lieut.

Co. F.—Francis Morhardt, capt.; Samuel Rexinger, capt.; Constantine Aberle, 1st lieut.; Edward Deborde, 1st lieut.; Frederick Eckert, 1st lieut.; Zebastien Zahner, 2d lieut.; Edward Deborde, 2d lieut.; George Morhardt, 2d lieut.

Co. G.—George Birg, capt.; George Muller, capt.; Edward Koenig, 1st lieut.; George Muller, 1st lieut.; Herman C. Koerner, 1st lieut.; George Muller, 2d lieut.; Herman C. Koerner, 2d lieut.; John Buerki, 2d lieut.; Charles Bretschneider, 2d lieut.

Co. H.—John G. Reis, capt.; John Brengartner, capt.; John Krebs, capt.; Joseph Ebner, 1st lieut.; John Brengartner, 1st lieut.; William Hark, 1st lieut.; John Brengartner, 2d lieut.; Frederick G. Elwerth, 2d lieut.; Fridolin Romnel, 2d lieut.; William Hark, 2d lieut.; George Horr, 2d lieut.

Co. I.—Edward Richter, capt.; Adolphus Schuster, capt.; George Isenstein, 1st lieut.; Adolphus Schuster, 1st lieut.; John Krebs, 1st lieut.; Max Goedon, 1st lieut.; Adolphus Schuster, 2d lieut.; John Krebs, 2d lieut.; Joseph Sbner, 2d lieut.

Co. K.—John Jecklin, capt.; Henry Nelson, capt.; Ulrich Schwendener, capt.; Ulrich Schwendener, 1st lieut.; Nicholas D. Randall, 1st lieut.; Jacob Gross, 2d lieut.; Jacob Leupp, 2d lieut.; Casimir Muri, 2d lieut.

This regiment was formed in August, 1861, and was in active service continually, its losses in the many engagements in which it took part being extremely severe, both in men and officers. As a part of the Army of the Cumberland, it was constantly in the front, and in the battles of Murfreesboro', Chickamauga, and Missionary Ridge its behavior was heroic.

Seventeenth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Franz Hassendeubel, col.; John F. Cramer, col.; John F. Cramer, lieut.-col.; August H. Poten, maj.; Ferd. Niegemann, maj.; Francis Romer, maj.; Frederick Leser, adjt.; Adolphus Rodenbruck, adjt.; John Schenk, q.m.; Adolph Roesch, surg.; Herman Hubrick, surg.; J. B. McConnaughy, surg.; Herman Hubrick, asst. surg.; J. B. McConnaughy, asst. surg.; George Holst, asst. surg.; Andrew Adam, asst. surg.; Charles Bruckner, asst. surg.; Herman Fehrmann, chaplain.

Co. A.—August W. Busche, capt.; Theodore Weller, capt.; John G. Cangguth, capt.; Julius Wagner, 1st lieut.; Julius Muller, 1st lieut.; Robert Lange, 1st lieut.; Julius Muller, 2d lieut.; Morris Jacobi, 2d lieut.; Theodore G. Knapp, 2d lieut.; Adolphus Rodenbruck, 2d lieut.; Conrad Andres, 2d lieut.

Co. B.—William Andre, capt.; Julius Muller, capt.; Louis Voss, 1st lieut.; Wm. Streisguth, 1st lieut.; John G. Langguth, 1st lieut.; Herman O. Kottberg, 1st lieut.; Wm. Streisguth, 2d lieut.; Louis Darmstaetter, 2d lieut.; John G. Langguth, 2d lieut.; Andrew Moes, 2d lieut.

Co. C.—Francis Romer, capt.; Adolph Boettscher, capt.; Joseph Fries, 1st lieut.; Adolph Boettscher, 1st lieut.; Charles Bruno, 1st lieut.; James T. Mollinkrott, 1st lieut.; Stephen Sutter, 2d lieut.; Robert Lange, 2d lieut.; George Moehl, 2d lieut.

Co. D.—Frederick Niegerman, capt.; Paul Morensky, capt.; Louis Darmstaetter, capt.; Francis Gulde, 1st lieut.; Henry Neen, 1st lieut.; August Boettscher, 2d lieut.; Frederick Martin, 2d lieut.

Co. E.—Wm. Fuchs, capt.; Joseph Fries, capt.; August Fischer, capt.; Theodore Weller, 1st lieut.; Theodore G. Knaup, 1st lieut.; Julius Montzheimer, 1st lieut.; Adolphus Rodenbruck, 1st lieut.; Conrad Andres, 1st lieut.; Paul Morensky, 2d lieut.; August Fischer, 2d lieut.; Herman O. Rottberg, 2d lieut.

Co. F.—Charles Booking, capt.; Hugo Gollmer, capt.; Francis Gulde, capt.; Charles Zimmer, 1st lieut.; August Fischer, 1st lieut.; Leonard A. Horn, 1st lieut.; August Haunitzky, 2d lieut.; William Christ, 2d lieut.; Herman O. Rottberg, 2d lieut.

Co. G.—Francis Wilhelm, capt.; Edward Schneller, 1st lieut.; John Kaegi, 1st lieut.; Louis Darmstaetter, 1st lieut.; John A. Shaub, 1st lieut.; August Spinner, 2d lieut.; Charles O. Bruno, 2d lieut.; John A. Shaub, 2d lieut.

Co. H.—Adolph Ehlert, capt.; John Kaegi, capt.; John M. Manzlinger, 1st lieut.; August Haunitzky, 1st lieut.; Gustav Wetzlaw, 1st lieut.; Henry Nean, 2d lieut.; Jas. T. Mollinerott, 2d lieut.

Co. I.—Charles Reiss, capt.; Edward Schneller, capt.; John Kaegi, 1st lieut.; Paul Morentzky, 1st lieut; Robert Fischer, 1st lieut.; John Reinhardt, 2d lieut.; Robert Fischer, 2d lieut.; Julius Uhlenhuth, 2d lieut.

Co. K.—Adolph Schill, capt.; Charles Bruno, capt.; Herman Ihern, 1st lieut.; John H. Peterson, 1st lieut.; Julius Montzheimer, 2d lieut.; Peter Hassendeubel, 2d lieut.

This regiment was organized by order of Maj.-Gen. Fremont in August, 1861, and took a prominent part in the following battles: Pea Ridge, Searcy Landing, Ark., Chickasaw Bayou, Miss., Arkansas Post, Ark., Fourteen-Mile Creek, Miss., Jackson, Miss, Vicksburg, Miss., Canton, Miss., Lookout Mountain, Missionary Ridge, and Ringgold, Ala.

Col. Hassendeubel died of wounds received before Vicksburg, Miss. The regiment lost severely in officers and men, and on every occasion proved itself worthy of the highest commendation.

The Thirtieth Regiment Infantry, Missouri Volunteers, was organized in October, 1862, and its officers were:

B. G. Farrar, col.; John W. Fletcher, lieut.-col.; Otto Schadt, lieut.-col.; John W. Fletcher, maj.; James S. Farrar, maj.; John P. Coleman, adjt.; Amos P. Foster, q.m.; Robert P. Fendick, q.m.; Webster B. Sargent, surg.; Webster P. Sargent, asst. surg.; James Hill, asst. surg.; Robert J. Sloan, asst. surg.; J. G. Rodgers, chaplain.

The regiment formed part of Blair's brigade, and participated in most of the battles of the campaigns on the Mississippi and in the interior.

The Thirty-first Regiment was organized in St. Louis on the 7th of October, 1862, with the following officers:

Thomas C. Fletcher, col.; Samuel P. Simpson, lieut.-col.; Frederick Jaensch, maj.; Robert M. Swander, adjt.; Wm. B. Pratt, adjt.; Wm. H. Barlow, q.m.; Churchill D. Strother, surg.; Oliver H. P. Stone, asst. surg.; Julius A. Ruge, asst. surg.; E. H. Hoffman, asst. surg.

The regiment was incorporated with the brigade of Gen. F. P. Blair. At Chickasaw Bluffs, Dec. 29, 1862, the regiment lost two hundred and eighteen killed, wounded, and missing, and its commander, Col. Fletcher, was wounded and captured. At Lookout Mountain and Missionary Ridge the Thirty-first was also in the thickest of the fight, and behaved with conspicuous courage.

The Thirty-third Regiment Infantry, Missouri Volunteers, was the seventh in the quota of eight regiments raised by the State under President Lincoln's call for three hundred thousand troops in July, 1862. It was organized on the 5th of September by Clinton B. Fisk, who, having been promoted to a brigadier-generalship Nov. 24, 1862, was succeeded as colonel of the regiment by William A. Pile. The other officers were:

William H. Heath, lieut.-col.; George W. Vanbeck, maj.; George A. Holloway, adjt.; Edward S. Day, adjt.; Lyman B. Ripley, q.m.; Thomas Smith, surg.; Aurelius T. Bartlett, surg.; Albert R. Sawyer, asst. surg.; Milton Kile, asst. surg.

After serving at various points in Missouri, it joined Fisk's brigade, and subsequently formed part of the White River expedition to Duvall's Bluff.

The Engineer Regiment of the West, Missouri volunteers, was organized at the St. Louis arsenal on the 26th of July, 1861, by Col. J. W. Bissell. The officers were Col. J. W. Bissell, who was succeeded in July, 1861, by Col. Henry Flad; lieutenant-colonels, successively Charles E. Adams, Henry Flad, William Tweeddale; majors, successively M. S. Hasie, William Tweeddale, Henry Flad, and Eben M. Hill; surgeons, Charles S. Skelton, John C. Book, and Charles Knower (assistant surgeon). In October, 1863, the regiment was reorganized with the following officers:

Henry Flad, col.; William Tweeddale, lieut.-col.; Frederick C. Nichols, maj.; Eben M. Hill, maj.; Hamilton Dill, maj.; John C. Book, surg.; Charles Knower, asst. surg.; Alpha Wright, chaplain.

The First Regiment Artillery, Missouri Volunteers, was formed on the 1st of September, 1861, by the conversion of the First Regiment of Infantry, Missouri Volunteers, into artillery. The first colonel was Francis P. Blair, who, being promoted to a brigadier-generalship, was succeeded, Sept. 1, 1862, by John V. Dubois, who resigned Oct. 14, 1862. Lieut.-Col. Warren L. Lothrop was then promoted to the command of the regiment. The lieutenant-colonels of the regiment in succession were:

James Totten (promoted to brigadier-general), Warren L. Lothrop, and A. M. Powell; majors, John V. Dubois, John M. Schofield, Warren L. Lothrop, George H. Stone, A. M. Powell, Thomas D. Maurice, David Murphy, Nelson Cole, Charles Mann; William Hill, surg.; Joseph Brooks, chaplain; George W. Schofield, capt.

At the battle of Fort Donelson, the Second Battalion, consisting of Batteries D, H, and K, won great distinction, and at the battle of Shiloh the regiment had five batteries engaged. Welfley's battery, at Pea Ridge, and Murphy's, Cole's, and Backof's, at Prairie Grove, also rendered effective service. At the battles of Iuka and Corinth, at the siege of Vicksburg, and at Murfreesboro', Chickamauga, Lookout Mountain, and other important battles one or more batteries of the regiment participated. In fact, the First Missouri was represented in almost every engagement of any magnitude in the West, and is claimed to have contributed more general and field officers than any other regiment in the United States service, not including the line officers.

The Second Regiment of Artillery, Missouri Volunteers, was organized in the autumn of 1861, and was chiefly employed in garrisoning the forts about

St. Louis. The men composing it were nearly all from the German population. The officers were:

Henry Almstedt, col.; Joseph Weydemeyer, lieut.-col.; Theodore Wilkins, maj.; Dominick Urban, maj.; Dominick Urban, adjt.; John J. Witzig, q.m.; Emil Seemann, surg.; J. B. Pondrom, surg.; John Jacob Schulte, asst. surg.; J. B. Pondrom, asst. surg.; William C. Finlaw, asst. surg.; Hugo Krebs, chaplain.

Attached to the regiment was the famous independent battery of Missouri horse artillery known as "Landgraeber's," from the name of the commander, Capt. Clem. Landgraeber, who was dubbed by the enemy "the Flying Dutchman," on account of the celerity of his movements. The battery took part in many engagements, and always behaved with gallantry and credit.

The Second Regiment was reorganized in the fall of 1863, the officers being Nelson Cole, lieutenant-colonel commanding; Frank Backof, major; J. B. Pondrom, surgeon; William C. Finlaw, assistant surgeon.

The First Regiment Cavalry, Missouri Volunteers, was mustered into service under Col. C. A. Ellis, on the 6th of September, 1861, at Jefferson Barracks, its membership being largely composed of citizens of St. Louis. Its officers were:

Calvin A. Ellis, col.; John F. Ritter, col.; Frederick W. Lewis, lieut.-col.; John T. Price, lieut.-col.; John J. Joslyn, lieut.-col.; J. M. Hubbard, maj.; Henry Townsley, maj.; Albert P. Peabody, maj.; Charles Banzhof, maj.; Henry J. Stierlin, maj.; John J. Joslyn, maj.; Harry Wilde, adjt.; Samuel Caldwell, adjt.; Joseph Tinker, adjt.; W. T. Hamilton, adjt.; John C. Crane, q.m.; T. J. Golden, q.m.; Joseph E. Lynch, surg.; W. W. Bailey, asst. surg.; Thomas W. Jones, chaplain; James P. Craig, commissary.

The regiment rendered valuable service in the campaigns in Missouri and Arkansas.

The Fourth Regiment of Cavalry, Missouri Volunteers, was formed by the consolidation of the Fremont Hussars and Benton Hussars, two battalions of six companies each, organized by authority of Gen. Fremont in the fall of 1861. The First Western Cavalry, Fremont Hussars, was organized at the Abbey Track, St. Louis, and under the command of Maj. George E. Waring, Jr., accompanied Gen. Fremont on his Western expedition. In January, 1862, Wood's battalion of Missouri cavalry was consolidated with the Fremont Hussars, under the name of the Fourth Missouri Cavalry, and Maj. Waring was commissioned colonel of the regiment. Subsequently Wood's battalion was withdrawn from the command, and three companies of the "Hallan Horse" were added. These also were finally withdrawn, and the Benton Hussars were then incorporated with the regiment. The Fourth saw much active service during the war, and gained an enviable reputation. The officers were:

G. E. Waring, Jr., col.; Rudolph Blome, lieut.-col.; Gustav Von Helmrich, lieut.-col.; Eugene Kilmansegge, maj.; Gustavus M. Elbert, maj.; Edward Langen, maj.; Eminio Mezaros, maj.; James F. Dwight, maj.; B. C. Ludlow, maj.; Gustavus Heinrichs, maj.; James F. Dwight, adjt.; Hann Hanson, adjt.; Joselyn S. Foulkes, q.m.; Joselyn S. Foulkes, q.m.; Charles A. Snell, commissary; Emil Schurback, commissary; Henry W. Nichols, surg.; William A. Wilcox, surg.; Jacob Affolder, asst. surg.

The Tenth Regiment of Cavalry, Missouri Volunteers, was organized in December, 1862, by Florence M. Cornyn, at Camp Magazine, near Jefferson Barracks, Missouri. The officers were:

Florence M. Cornyn, col., killed Aug. 10, 1863; Andrew J. Alexander, col.; William D. Bowen, lieut.-col.; Thomas Hynes, maj.; Frederick W. Bentoen, maj.; William H. Lusk, maj.; Thomas Hynes, adjt.; Jeremiah F. Young, adjt.; Duncan McNicol, q.m.; Albert E. Hall, q.m.; Michael Ravold, commissary; Edward L. Feehan, surg.; William L. Tallman, asst. surg.

The regiment distinguished itself in the campaign of the spring of 1863 against Van Dorn, and subsequently in various raids in Alabama and Tennessee.

Carondelet Home Guards, Co. A (independent), organized in June, 1861; captain, Henry Nagel; first lieutenant, August A. Blumenthal, Jr.; second lieutenant, William B. Putnam; aggregate strength, one hundred and twenty-seven.

Sappers and Miners, Home Guards, Co. A (independent), organized in May, 1861; captain, J. D. Voerster; aggregate strength, two hundred and thirty-three. This company, organized by authority of Gen. Lyon, consisted of two classes, mechanics and laborers, and the duty performed was partly in the city of St. Louis and at the arsenal grounds, building batteries, stables, outbuildings, etc. At Boonville it built fortifications, repaired roads, and ferried troops across Grand and Osage Rivers. It also built a masked battery at Ironton, and repaired roads from Rolla to Springfield, and continued in such service until August, 1861.

First Regiment Infantry, Missouri State Militia, organized in the spring of 1862:

Field and Staff.—John B. Gray, col.; John F. Tyler, col.; John F. Tyler, lieut.-col.; John N. Herder, lieut.-col.; John N. Herder, maj.; Charles Bichle, maj.; William Eylers, adjt.; G. D. O. Kellmann, adjt.; Geo. H. Steward, q.m.; Gustavus R. Spannagel, q.-m.; Thomas McMartin, surg.; Charles H. Hughes, surg.; H. W. Jones, asst. surg.; Frederick R. Phelps, asst. surg.; William A. Wilcox, asst. surg.; Allen M. Lee, asst. surg.

Co. A.—George H. Eversole, capt.; Charles C. Byrne, capt.; Hugh McEnna, 1st lieut.; Andrew J. Hughes, 1st lieut.; William A. Sluder, 2d lieut.; Benjamin E. Fish, 2d lieut.

Co. B.—Frederick J. Lubbering, capt.; Frederick Kreuter, 1st lieut.; Wolrad Scheurmann, 2d lieut.

Co. C.—David W. Rosenstein, capt.; Albert N. Guisson, 1st lieut.; John Dinsbeer, 2d lieut.

Co. D.—Patrick F. Lonergan, capt.; John F. L. Jacoby, 1st lieut.; Isaac H. Sisson, 1st lieut.; Isaac H. Sisson, 2d lieut.; James C. Booth, 2d lieut.; James H. Dawson, 2d lieut.

Co. E.—Charles A. Meyer, capt.; Gustavus R. Spannagel, 1st lieut.; Henry Kelling, 1st lieut.; Robert Maes, 2d lieut.; Philip Hoehn, 2d lieut.

Co. F.—John Dietrich, capt.; Frank Blucker, 1st lieut.; Henry Dietrich, 2d lieut.

Co. G.—James D. Walters, capt.; Charles Bichle, capt.; Joseph Weber, capt.; Thomas Thomas, 1st lieut.; Joseph Weber, 1st lieut.; John Fessler, 1st lieut.; John W. Garatt, 2d lieut.; John Fessler, 2d lieut.; Lewis Jerger, 2d lieut.

Co. H.—Josiah C. Smith, capt.; John A. Veith, capt.; John F. W. Dette, capt.; William A. Lord, 1st lieut.; John F. W. Dette, 1st lieut.; John G. Broemser, 1st lieut.; Francis M. Avey, 2d lieut.; J. G. Broemser, 2d lieut.; Felix Doutreville, 2d lieut.

Co. I.—George P. Covert, capt.; John R. Compton, capt.; John A. Payne, capt.; John A. Payne, 1st lieut.; William W. Burris, 1st lieut.; John R. Compton, 2d lieut.; William W. Burris, 2d lieut.; Alexander S. Pilcher, 2d lieut.

Co. K.—John Rupp, capt.; Ferdinand Wagenfuehr, 1st lieut.; Alexander Schrader, 1st lieut.; Alexander Schrader, 2d lieut.; August Hoffbauer, 2d lieut.

This regiment was formed by the concentration of the various infantry companies of Missouri State militia which had been raised in St. Louis and other portions of the State on the 13th of May, 1862. It was retained in St. Louis, performing prison-guard, provost-guard, and other duty, until early in October, 1862, when it was sent to Pilot Knob, Mo., with a view to participating in the then expected expedition to Little Rock. Subsequently, however, all but two companies (C and I) were placed upon bridge-guard duty along the line of the Iron Mountain Railroad. The two companies above referred to participated in an expedition into Arkansas which was sent out from Patterson to Pocahontas, Ark., in the month of November, 1862.

The First Regiment of Enrolled Missouri Militia (mainly recruited in St. Louis) was organized in the fall of 1862. Its officers were William P. Fenn, col.; Robert C. Allen, lieut.-col.; Hiram Inman, maj.; Alexander McElhinney, adjt.; John McDonald, q.m.; Leonard B. Holland, q.m.; L. D. Morse, surg.

First St. Louis County Battalion, Enrolled Missouri Militia:

Field and Staff.—W. J. A. Smith, lieut.-col.; Samuel T. Henley, adjt.; William R. Vaughan, q.m.

Co. A.—Frederick Steudeman, capt.; Charles Castello, 1st lieut.; Peter Nick, 2d lieut.

Co. B.—John B. Aubuchon, capt.; John Belleville, 1st lieut.

Co. C.—Frederick Dedrich, capt.; Joseph G. Aubuchon, 1st lieut.; Alfred Shaw, 2d lieut.

Co. D.—James Willoughby, capt.; Peter Foster, 1st lieut.; William R. Vaughan, 2d lieut.

Co. E.—Nero V. Hall, capt.; Henry Obert, 1st lieut.; Henry O. Sattler, 2d lieut.

Co. F.—William L. Hickman, capt.; John McCarthy, 1st lieut.; Henry J. Kuester, 2d lieut.

St. Louis Police Battalion:

J. E. D. Couzins, maj.

Co. A.—William Lee, capt.; R. P. Banning, 1st lieut.; William Saulsbury, 2d lieut.

Co. B.—John F. Fealy, capt.; Francis Molair, 1st lieut.; Aaron Francis, 2d lieut.

Unattached companies Enrolled Missouri Militia. St. Louis County:

Old Guard.—N. H. Clark, capt.; Alfred Mackay, 1st lieut.; James Richardson, 1st lieut.; A. G. Edwards, 2d lieut.; C. G. Wells, 2d lieut.

City Post Band.—Frank Boehm, capt.; Frank Gerks, 1st lieut.; Jacob Stueck, 2d lieut.

Independent Cavalry Company.—Frederick Walters, capt.; Charles Lienberger, 1st lieut.; Charles Jenne, 2d lieut.

Corps of Detectives.—George J. Deagle, capt.; R. F. Cardella, 1st lieut.; F. H. Chandler, 2d lieut.

The following statement shows the number of men who up to Dec. 31, 1863, had entered the service of the United States as volunteers from St. Louis County, under the different calls of the President, for the term of three years or during the war:

1st U. S. Reserve Corps, 791; 2d U. S. Reserve Corps, 867; 3d U. S. Reserve Corps, 541; 4th U. S. Reserve Corps, 131; 5th U. S. Reserve Corps, 538; 2d Infantry, 645; 3d Infantry, 681; 6th Infantry, 489; 7th Infantry, 564; 8th Infantry, 576; 10th Infantry, 37; 11th Infantry, 33; 12th Infantry, 562; 13th Infantry, 160; 15th Infantry, 500; 17th Infantry, 658; 18th Infantry, 139; 21st Infantry, 2; 23d Infantry, 40; 24th Infantry, 79; 25th Infantry, 14; 26th Infantry, 203; 27th Infantry, 187; 29th Infantry, 103; 30th Infantry, 574; 31st Infantry, 117; 32d Infantry, 62; 33d Infantry, 145; 35th Infantry, 84; 1st Artillery, 1227; 2d Artillery, 1951; 1st Cavalry, 365; 2d Cavalry, 83; 3d Cavalry, 21; 4th Cavalry, 1062; 6th Cavalry, 12; 7th Cavalry, 93; 8th Cavalry, 1; 10th Cavalry, 247; 11th Cavalry, 246; 12th Cavalry, 95; Engineer Regiment, 149. Total, 15,310.

In addition to these were the following organizations of the Missouri State militia, with the number of men in each:

1st Infantry, 687; 2d Cavalry, 1; 4th Cavalry, 4; 6th Cavalry, 2; 7th Cavalry, 13; 8th Cavalry, 4; 10th Cavalry, 1; 12th Cavalry, 8; 13th Cavalry, afterwards the 5th, 201; 14th Cavalry, 5; 2d Battalion, 4; Westerberg's company, 95; 1st Battery, 1. Total, 1026.

The following is a list of officers of various other military organizations recruited wholly or in part in and near St. Louis:

Ninth Regiment Infantry, Missouri Volunteers:

Field and Staff.—John C. Kelton, col.; C. H. Frederick, lieut.-col.; D. McGibbon, maj.; Sydney P. Post, maj.; Sydney P. Post, adjt.; Frederick Brasher, q.m.; J. D. S. Haslett, surg.; H. J. Maynard, asst. surg.; Nathan Shumate, chaplain.

This regiment, which was completed in September, 1861, performed good service up to the date of its transfer to the State of Illinois by Special Orders No. 43, series 1862.

Eleventh Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Joseph B. Plummer, col.; Joseph A. Mower, col.; A. J. Weber, col.; William L. Barnum, col.; William E. Panabaker, lieut.-col.; A. J. Weber, lieut.-col.; William L. Barnum, lieut.-col.; Benjamin F. Livingston, maj.; A. J. Weber, maj.; Eli Bowyer, maj.; Charles H. Brookings, adjt.; George P. Weber, adjt.; George W. Henry, q.m.; Abel G. Pickrell, q.m.; Thomas Smith, surg.; M. W. Fish, surg.; Eli Bowyer, asst. surg.; Thomas S. Hawley, asst. surg.; Joseph Brooks, chaplain; Samuel C. Baldridge, chaplain.

This regiment was raised in the States of Missouri and Illinois, between the middle of June and the 1st of August, 1861, and organized the 1st of August same year, at the United States arsenal at St. Louis, Mo. It was raised as a rifle regiment for and at the request of Capt. Rufus Saxton, of the regular army, who, on being promoted and sent to another department soon after, did not take command. Capt. David Bayles then took command of the regiment as its colonel. On the 18th of October, Col. Plummer succeeded Col. Bayles. Subsequently (in 1863–64) the field and staff officers were: William L. Barnum, colonel; Eli Brower, lieutenant-colonel; M. J. Green, major; George P. Weber, adjutant; Walton H. Finch, adjutant; Abel G. Pickrell, quartermaster; Henry C. Applegate, quartermaster; M. W. Fish, surgeon; Thomas S. Hawley, assistant surgeon; James B. Farrington, assistant surgeon.

Fourteenth Regiment of Missouri Volunteers, Home Guards:

FIELD AND STAFF.—Robert White, col.; R. H. Graham, lieut.-col.; J. F. Tyler, maj.; F. Cooley, surg.

Companies of this regiment were organized in July and August, 1861, and immediately entered upon duty at Lexington, Mo., where they remained until Sept. 20, 1861, when they were captured. The officers and men were subsequently paroled, and were discharged at St. Louis on the 19th day of October, 1861.

Eighteenth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Madison Miller, col.; J. V. Pratt, lieut.-col.; Charles S. Sheldon, lieut.-col.; James A. Price, maj.; William H. Minter, maj.; William A. Edgar, adjt.; Edwin J. Conway, adjt.; D. A. Cudworth, q.m.; D. A. Cudworth, q.m.; Norman S. Hamlin, surg.; S. B. Hauts, surg.; S. B. Hauts, asst. surg.; F. F. Randolph, asst. surg.; J. M. Garner, chap.

This regiment was formed in August, 1861, and lost largely in officers and men, especially at the battle of Shiloh.

Twenty-second Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—John D. Foster, lieut.-col.; Andrew H. Linden, maj.; Hiram B. Foster, adjt.; David S. Hooper, q.m.; Hugh Meredith, asst. surg.; James Linden, chap.

This regiment, which was composed of Foster's battalion and two independent companies, after performing some service, was broken up and distributed to other regiments.

Twenty-fourth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Sempronius H. Boyd, col.; James K. Mills, col.; James K. Mills, lieut.-col.; William H. Stark, lieut.-col.; Eli N. Weston, maj.; William H. Stark, maj.; Robert W. Fyan, maj.; J. C. S. Colby, adjt.; William H. McAdams, adjt.; Sanford C. Peck, q.m.; J. C. S. Colby, q.m.; Edwin T. Robberson, surg.; Leander H. Baker, surg.; J. Little, asst. surg.; Orson H. Crandall, asst. surg.; Alfred H. Powell, chaplain.

Twenty-fifth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Everett Peabody, col.; Chester Harding, Jr., col.; Robert T. Vanhorn, lieut.-col.; James E. Powell, maj.; Frederick C. Nichols, maj.; Charles W. Graff, adjt.; Herman Giseke, adjt.; J. D. Henderson, q.m.; John T. Berghoff, surg.; Julius Brey, asst. surg.; John Q. Eggleston, asst. surg.; L. C. Pace, chaplain.

The Twenty-fifth Regiment Infantry, Missouri Volunteers, was first organized in June, 1861, at St. Joseph, Mo., and was then known as the Thirteenth Regiment Infantry, Missouri Volunteers. It was, for the most part, formed from the Home Guard battalions of Maj. Peabody, Maj. Van Horn, and Maj. Berry. The regiment was employed in guarding a portion of the line of the Hannibal and St. Joseph Railroad and upon garrison duty until it was ordered to Lexington, in the latter part of August. Col. Mullikin, who commanded at Lexington, surrendered the post to Gen. Sterling Price on the 20th of September, 1861, who paroled the officers of the Thirteenth, and released the men upon their oaths. Exchanges were subsequently effected, and the regiment was reorganized as the Twenty-fifth, with Everett Peabody as colonel, Robert T. Van Horn as lieutenant-colonel, and James E. Powell as major. In March, 1862, the regiment was sent to Gen. Grant at Pittsburgh Landing, and was brigaded in McKean's brigade, Prentiss' division. It participated in the battle of Shiloh, losing very heavily in killed and wounded. Among the former were the colonel and major.

Capt. Frederick C. Nichols was subsequently promoted to the majority, and Chester Harding, Jr., was appointed colonel.

Twenty-sixth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—George B. Boomer, col.; Benjamin D. Dean, col.; John H. Holman, lieut.-col.; John McFall, lieut.-col.; L. E. Koniuszoski, maj.; Charles F. Brown, maj.; Robert C. Crowell, maj.; Abraham Vanbeuren, adjt.; George W. Brown, adjt.; Charles F. Brown, q.m.; James T. Berry, q.m.; Jonathan S. Prout, surg.; Charles F. Barrett, asst. surg.; John L. Bryan, asst. surg.; Joseph Warren, chaplain.

The Twenty-sixth Missouri Infantry was organized in December, 1861, and soon after joined the expedition under Gen. Pope against New Madrid, and on the 26th raised its flag over the lower fort. April 9, 1862, the Twenty-sixth formed a part of the force that captured the Confederate army (6500) at Tiptonville. On April 22d it reached the vicinity of Corinth, participating in the battle of Farmington and the final capture of Corinth. It also served with distinction in the battles of Iuka, Corinth, Vicksburg, and other important engagements.

Twenty-seventh Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Thomas Curley, col.; A. Jacobson, lieut.-col.; James F. How, maj.; Albert A. Morey, adjt.; William H. Hele, adjt.; John Wellmeyer, adjt.; Bryan Foley, q.m.; B. N. Bond, surg.; John S. Murphy, asst. surg.; John Bowman, asst. surg.; Edwin A. Casey, asst. surg.

Recruiting for the Twenty-seventh Regiment, Missouri Volunteers, infantry, was commenced about Aug. 1, 1862. About the 25th of September four companies were mustered into the service under command of Lieut.-Col. Jacobson. During the next six weeks two more companies were filled, and Maj. James F. How was mustered into the regiment. The organization was completed by the assignment to it of three veteran companies, which, in the Fifth and Sixteenth Missouri, had done good service at Donelson, Shiloh, and Pea Ridge, and by the muster in of the tenth company on Jan. 8, 1863, at which time Col. Thomas Curley was placed in command.

Twenty-ninth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—John S. Cavender, col.; James Peckham, col.; James Peckham, lieut.-col.; Thomas H. McVicar, lieut.-col.; Joseph S. Gage, lieut.-col.; Bowman H. Peterson, maj.; Joseph S. Gage, maj.; Philip H. Murphy, maj.; Eng Voerster, adjt.; David Allen, adjt.; E. M. Joel, q.m.; John C. Morgan, surg.; John H. Stumberg, asst. surg.; Daniel Abbey, asst. surg.

The Twenty-ninth Missouri Infantry was raised during the months of July, August, September, and October, 1862, at different places through the State, the rendezvous being Benton Barracks. Among other conspicuous engagements of the war it participated in the siege of Vicksburg and the storming of Lookout Mountain.

Thirty-second Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—F. H. Manter, col.; H. C. Warmoth, lieut.-col.; Abraham J. Seay, maj.; Joseph P. Newsham, adjt.; Charles A. Single, q.m.; Thomas J. Watson, surg.; W. A. Hyde, asst. surg.; Horace Newell, asst. surg.; James Lester, chap.

This regiment was one of those assigned to Gen. Blair's brigade. It was organized in October, 1862, and entered the field at once, serving in the Army of the Mississippi, and subsequently in the interior.

Thirty-third Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—William A. Pile, col.; William H. Heath, col.; William H. Heath, lieut.-col.; George Vanbeck, maj. Edward S. Day, adjt.; Lyman B. Ripley, q.m.; Luther Armstrong, q.m.; Aurelius T. Bartlett, surg.; Milton Kile, asst. surg.

Co. A.—Wm. M. Blake, capt.; Stephen J. Burnett, 1st lieut.; James M. Conner, 2d lieut.

Co. B.—James G. Patton, capt.; George H. Rapp, 1st lieut.

Co. C.—Alex. J. Campbell, capt.; Luther P. Eldridge, 1st lieut.

Co. D.—Wm. P. McKee, capt.; Jacob S. Baker, 1st lieut.; Charles L. Draper, 2d lieut.

Co. E.—Thos. M. Gibson, capt.; Charles L. Draper, 1st lieut.; Frank E. Lombar, 2d lieut.

Co. F.—Daniel D. Carr, capt.; Robert M. Reed, 1st lieut.; Edgar L. Allen, 2d lieut.

Co. G.—Stuart Carkner, capt.; Thomas Rudledge, 1st lieut.; Moses Reed, 2d lieut.

Co. H.—Henry Rose, capt.; Henry Cochran, 1st lieut.; Luke O'Reilly, 2d lieut.

Co. I.—George H. Tracy, capt.; Isaac S. Coe, 1st lieut.

Co. K.—Elias S. Schenck, capt.; H. H. Knowlton, 1st lieut.

The Thirty-third Missouri Infantry was recruited under the patronage of the Union Merchants' Exchange of St. Louis, and was therefore styled the "Merchants' Regiment." Its original field officers were: Colonel, Clinton B. Fisk, secretary of the Merchants' Exchange; lieutenant-colonel, William A. Pile, captain in First Missouri Artillery; major, William H. Heath, adjutant of the Eighteenth Illinois Infantry.

By the energy of Col. Fisk it was the first regiment mustered into United States service under the President's call of 1862. It was ordered to the field Sept. 22, 1862, under command of Lieut.-Col. Pile, and made several severe marches through Phelps, Dent, Texas, and Wright counties, Mo. December 19th it returned to St. Louis. December 23d, Col. Fisk was appointed brigadier-general, Lieut.-Col. Pile was made colonel, and Maj. Heath lieutenant-colonel. On the same day the regiment moved by steamer to Columbus, Ky., that place being threatened; Jan. 5, 1863, moved to Helena, Ark., and took part in Gen. Gorman's expedition to Duvall's Bluff, Ark., returning to Helena January 20th, at which place more

than one hundred men died from exposure within one month; February 24th formed part of Gen. L. F. Ross' expedition to Fort Pemberton, Miss., known as the "Yazoo Pass expedition." The regiment was under fire here for the first time, doing efficient service in constructing field-works, mounting siege-guns, reconnoitering the enemy's position, and capturing his pickets; April 8th returned to Helena, and May 5th the regiment was placed in charge of the fortifications and artillery of that garrison, numbering eighteen pieces of heavy and light calibre. Under the superintendence of Col. Pile, the regiment learned in two weeks to handle artillery with ease and accuracy, and so strengthened and improved the fortifications as to render them very formidable. May 22d, Col. Pile was detailed to superintend the organization of colored regiments and ordered to St. Louis, and Capt. George W. Van Beck appointed major. The command of the regiment thus fell to Lieut.-Col. Heath. July 14, 1863, the regiment, supported by detachments of the Forty-third Indiana, Thirty-third Iowa, and Thirty-fifth Missouri, held their works against the combined forces of Price, Holmes, and Marmaduke, estimated at fifteen to twenty thousand men, repelling numerous heavy assaults, and sustaining a continuous musketry fire for six hours. Battery C, a small work, mounting two brass six-pounders, was captured by Price's division on the second charge, but the enemy were compelled to abandon it by the concentrated fire of all the artillery after suffering terrible losses in killed and wounded. The total loss of the regiment in this fight was 49. Total loss of the garrison, 420. Total losses of the enemy, about 3100; Price's division alone losing 1100 men, as stated in his official report. Although this was the first battle in which the regiment had borne part, their intrepidity is sufficiently attested by the terrible punishment inflicted upon the enemy as compared with the small loss sustained by the regiment. During the entire engagement the guns were worked by but one relief, many of the men fainting at their posts from excessive heat. March 10th, Gen. Joseph A. Mower assumed command of the division, and the regiment moved from Vicksburg with the expedition to Red River, La. March —th, regiment was present in reserve at the capture of Fort De Russey. March 21st, the regiment, in conjunction with the Thirty-fifth Iowa, captured Henderson Hill, La., by a midnight surprise and assault, securing the Second Louisiana Tigers (cavalry) and Edgar's Texas battery, with horses, arms, ammunition, and colors complete, surrounding and disarming the enemy before he had received any alarm. April 9th, regiment took part in the gallant and overwhelming defeat of the enemy at Pleasant Hill, La., capturing a five-gun battery in the final charge and joining in the pursuit for one mile and a half. In this battle Lieut.-Col. Heath received a wound in the head, and the command of the regiment fell to Maj. Van Beck. June 6th, the regiment took part in the attack upon Marmaduke's forces at Old River Lake, Ark., Maj. Van Beck by seniority commanding the Third Brigade, Mo'er's division, and Capt. A. J. Campbell, Company C, commanding the regiment. This brigade, composed of the Thirty-third Missouri and Thirty-fifth Iowa, was ordered to charge the enemy, who were strongly posted on the opposite side of a bayou, and made the charge in gallant style, passing over the skirmishers of another brigade which had failed to advance, and moving unflinchingly forward to the bank of the bayou, which was then found to be unfordable. Notwithstanding this obstacle they stood up bravely, and at forty paces' distance poured in such a galling fire that the enemy broke and ran in confusion. The regiment lost here in a few minutes forty-one men; enemy's loss not great, but the fight compelled the withdrawal of a battery from Columbia, Ark., which had seriously interrupted the navigation of the Mississippi River. June 10th, the regiment arrived at Memphis, Tenn., and immediately joined an expedition against Lee and Forrest in Mississippi, Lieut.-Col. Heath having returned and assumed command.

Thirty-fifth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Samuel A. Foster, col.; Thos. F. Kimball, lieut.-col.; James A. Greason, lieut.-col.; Horace Fitch, lieut.-col.; Thos. H. Penny, maj.; Thos. H. Penny, adjt.; Jacob T. Child, adjt.; Effingham T. Hyatt, adjt.; Henry C. Murdock, adjt.; A. C. Miller, q.m.; Joseph B. Lamb, surg.; Perry C. H. Rooney, asst. surg.; Henry Schoenick, asst. surg.; James Schofield, chaplain.

This regiment formed a part of the brigade raised under the direction of Gen. Clinton B. Fisk, and left Benton Barracks, St. Louis, Dec. 22, 1862, serving subsequently at different points in Kentucky and Arkansas.

Fortieth Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Samuel A. Holmes, col.; A. G. Hequembourg, lieut.-col.; George Hoffman, maj.; Truman A. Post, adjt.; John F. Neville, q.m.; Homer Judd, surg.; Homer Judd, asst. surg.; J. F. Sneed, asst. surg.; Charles Ludwig, asst. surg.; R. Ratlinger, asst. surg.

Co. A.—Adam Bax, capt.; George A. Daggett, 1st lieut.; Frank Rhode, 2d lieut.

Co. B.—George W. Gilson, capt.; Charles A. Biggers, 1st lieut.; Julius Niehaus, 2d lieut.

Co. C.—Monroe Harrison, capt.; Emile Thomas, 1st lieut.; G. H. Coffey, 2d lieut.

Co. D.—Philip Anderson, capt.; Henry B. Kerone, 1st lieut.; John Melville, 2d lieut.

Co. E.—Herman Kullman, capt.; William J. Miller, 1st lieut.; George W. Sweeney, 2d lieut.; W. H. Winkelmaier, 2d lieut.

Co. F.—M. Greene, capt.; Jos. Harrison, Jr., 1st lieut.; Austin Drake, 2d lieut.

Co. G.—Wm. I. Whitwell, capt.; C. C. Coffinbury, 1st lieut.; Philip F. Coghlan, 2d lieut.

Co. H.—D. S. Stillinger, capt.; Charles D. Smith, 1st lieut.; Josiah F. Hinton.

Co. I.—John Ruedi, capt.; Charles Seep, 1st lieut.; Charles F. Knoll, 2d lieut.

Co. K.—Robert C. Allen, capt.; John J. Robertson, 1st lieut.; Winfield S. Smith, 2d lieut.

The regiment was raised in St. Louis, and its organization was completed on the 7th of September, 1864.

Forty-first Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Jos. Weydemeyer, col.; Gustav Heinrich, lieut.-col.; Henry F. Dietz, maj.; Henry Huhn, adjt.; Charles A. Snell, q.m.; Ernest Jahn, surg.; Ernest Jahn, asst. surg.; Gustavus Wieland, asst. surg.; Hugo Kluler, asst. surg.

Co. A.—Frederick Crutz, capt.; Frederick Crutz, 1st lieut.; Michael Best, 1st lieut.; William Steuder, 2d lieut.

Co. B.—August Thorwald, capt.; Lambert Mohr, 1st lieut.; William Steuder, 1st lieut.; William Keely, 2d lieut.

Co. C.—Henry J. Bischoff, capt.; Henry J. Bischoff, 1st lieut.; Matthias Barth, 1st lieut.; Dietrich Feldhush, 2d lieut.

Co. D.—Felix Lacis, capt.; Julius Fritsch, 1st lieut.; Otto Vermann, 2d lieut.

Co. E.—Philibert Melinand, capt.; Emanuel Grivaud, 1st lieut.; P. S. Whittaker, 2d lieut.

Co. F.—Christian Elrodt, capt.; Gustavus Clemen, 1st lieut.; F. F. Lebaume, 2d lieut.

Co. G.—Alex. Windmuller, capt.; A. Roetter, 1st lieut.; F. Wagenfenhr, 2d lieut.

Co. H.—Joseph Schubert, capt.; Joseph Schubert, 1st lieut.; Jacob Horn, 1st lieut.; Charles E. Moss, 2d lieut.

Co. I.—John E. Sanders, capt.; John E. Sanders, 1st lieut.; J. C. F. Boyd, 1st lieut.; Randall G. Butter, 2d lieut.

Co. K.—John G. Broemser, capt.; John G. Broemser, 1st lieut.; Charles Moeller, 1st lieut.; Jacob J. Broemser, 2d lieut.

This was one of the regiments raised in St. Louis under the terms of General Orders No. 134, Department of the Missouri, for twelve months' service. Its organization was completed Sept. 12, 1864, and it was employed in performing guard duty in the city of St. Louis.

Forty-third Regiment Infantry, Missouri Volunteers:

FIELD AND STAFF.—Chester Harding, Jr., col.; John Pinger, lieut.-col.; Berryman R. Davis, maj.; Joseph Thompson, adjt.; Henry R. Mills, adjt.; Francis Rodman, q.m.; Joseph Schmitz, q.m.; J. G. Eggleston, surg.; J. G. Eggleston, asst. surg.; E. W. Dill, asst. surg.; W. T. Drace, asst. surg.

The organization of this regiment as a twelve months' regiment was completed at St. Joseph in September, 1864, and Col. Chester Harding, Jr. (formerly adjutant-general of the State), was commissioned as its colonel.

Forty-ninth Infantry:

FIELD AND STAFF.—D. P. Dyer, lieut.-col.; Edwin Smart, maj. Wm. R. Hardin, adjt.; T. M. Guerin, q.m.; William D. Bush, q.m.; Oscar Monig, surg.; Thomas L. Ruby, asst. surg.

Second Regiment Cavalry (Merrill Horse), Missouri Volunteers:

FIELD AND STAFF.—Lewis Merrill, col.; William F. Schaffer lieut.-col.; Charles B. Hunt, lieut.-col.; John Y. Clopper, lieut.-col.; George C. Marshall, maj.; Charles B. Hunt, maj.; John Y. Clopper, maj.; Garrison Harker, maj. Jabez B. Rogers, maj.; Joshua W. Roher, adjt.; George Merrill, q.m.; R. B. Hughes, comm'y; Andrew S. Phelps, comm'y; S. B. Thayer, surg.; S. B. Thayer, surg.; Henry Douglas, surg.; W. H. Knickerbocker, asst. surg.; Henry Douglas, asst. surg.; A. D. Thomas, asst. surg.; J. W. O. Snider, asst. surg.; Robert W. Landis, chaplain.

In August, 1861, Capt. Lewis Merrill, Second Cavalry, United States army, received authority from Gen. Fremont to organize and concentrate a cavalry regiment at Benton Barracks for immediate service in the field. At this particular juncture recruiting for the United States service was of a slow and tedious nature; other officers had received similar authority, and after a severe effort abandoned the project as impracticable. Capt. Merrill, however, recruited and enlisted over eight hundred men in less than one month, commenced a system of military instruction and drill as soon as he organized the first squadron, and by dint of hard labor succeeded in raising the regiment to a high standard of discipline. In September, 1861, before thoroughly organized and equipped, this regiment received orders from Gen. Fremont to march to Springfield, Mo. It subsequently operated successfully against guerrilla organizations in different portions of the State.

Third Regiment Cavalry, Missouri Volunteers:

FIELD AND STAFF.—John M. Glover, col.; Walter C. Gantt, lieut.-col.; Robert Carrick, lieut.-col.; Thomas G. Black, lieut.-col.; Robert Carrick, maj.; Albert D. Glover, maj. Henry A. Gallup, maj.; John A. Lennon, maj.; James T. Howland, maj.; William S. Grover, adjt.; James C. Agnew, q.m.; William Johnson, comm'y; John L. Taylor, surg.; William W. Granger, asst. surg.; James Lester chaplain; R. H. McCoy, chaplain.

Sixth Regiment Cavalry, Missouri Volunteers

FIELD AND STAFF.—Clark Wright, col.; S. N. Wood, lieut.-col.; T. A. Switzler, lieut.-col.; Henry P. Hawkins, maj. Samuel Montgomery, maj.; Bacon Montgomery, maj. Matthew T. Kirk, adjt.; Horatio N. Stinson, q.m.; Stephen M. Wood, q.m.; Jerome B. Jenkins, comm'y; James L. Kiernan, surg.; B. K. Shirtliff, surg.; James K. Bigelow, asst. surg.; Thomas W. Johnson, asst. surg.; William Denly, chaplain.

Ninth Regiment Cavalry, Missouri Volunteers:

Co. C.[1]—E. C. Pike, capt.; George F. Meyers, capt.; John Kolley, capt.; George F. Meyers, 1st lieut.; William A. Northrop, 1st lieut.; Henry Capin, 1st lieut.; George Born, 1st lieut.; William A. Northrop, 2d lieut.; James W. Rutter, 2d lieut.; Peter Cigrand, 2d lieut.

Co. D.—E. P. Rice, capt.; E. G. Fisher, 2d lieut.; Jacob S. Williams, 1st lieut.; E. S. Biden, 2d lieut.; Thatcher G. Conant, 2d lieut.; Frederick B. Howe, 2d lieut.

Co. E.—Ferdinand Meyer, capt.; Charles S. Kintzing, 1st lieut.; Richard D. Compton, 1st lieut.; Richard D. Compton, 2d lieut.; Emil Gessler, 2d lieut.

Co. F.—William B. Parker, capt.; J. C. Dubuque, 1st lieut.; E. Mawdsley, 2d lieut.

Co. G.—Henry Kleinschmidt, capt.; William L. Bingham, 1st lieut.; James Martin, 2d lieut.

Co. H.[2]—Constantine Magwire, capt.; Patrick Sullivan, 1st lieut.; David Woods, 2d lieut.

Co. I.—B. Doran Killian, capt.; J. P. Cuddy, 1st lieut.

Eighth Regiment Enrolled Missouri Militia:

FIELD AND STAFF.—John Knapp, col.; Asa S. Jones, lieut.-col.; Fred. B. Holmes, maj.; William L. Catherwood, maj.; A. G. Hequembourg, adjt.; Charles C. Whittelsey, q.m.; John Lebrecht, surg.

Co. A.—George Knapp, capt.; George W. Gilson, 1st lieut.; George W. Purnell, 2d lieut.

Co. B.—D. Woestendrick, capt.; James Smith, 1st lieut.; Alex. H. Moore, 2d lieut.

Co. C.—Rudolph Wagner, capt.; Herman Sparkle, 1st lieut.; Albert E. Vermann, 2d lieut.

Co. D.—William L. Catherwood, capt.; D. S. Stellinger, capt.; Asa S. Jones, 1st lieut.; D. S. Stellinger, 1st lieut.; Charles A. Bohannon, 1st lieut.; D. S. Stellinger, 2d lieut.; John Graham, 2d lieut.

Co. E.—M. P. Hawthorn, capt.; J. R. Boggs, 1st lieut.; James V. Fisher, 2d lieut.; Mosely Green, 2d lieut.

Co. F.—James Mitchell, capt.; John T. Holmes, 1st lieut.; Louis P. Fuller, 2d lieut.

Co. G.—John C. Blech, capt., F. W. Hirsch, 1st lieut.; H. Lagerman, 2d lieut.

Co. H.[3]—John Kolley, capt.; George Born, 1st lieut.; Julius Lefold, 2d lieut.; Peter Cigrand, 2d lieut.

Co. I.[4]—Daniel G. Taylor, capt.; B. D. Killian, capt.; Charles W. Horn, 1st lieut.; Edward Bryne, 1st lieut.; J. P. Cuddy, 1st lieut.; B. D. Killian, 2d lieut.

Co. K.[5]—Constantine Magwire, capt.; Patrick Sullivan, 1st lieut.; Daniel Woods, 2d lieut.

Ninth Regiment Enrolled Missouri Militia:

FIELD AND STAFF.—John M. Krum, col.; Henry H. Catherwood, col.; Henry H. Catherwood, lieut.-col.; Oscar F. Lowe, lieut.-col.; Henry H. Catherwood, maj.; Oscar F. Lowe, maj.; Edward Morrison, maj.; Ernest W. Decker, adjt.; Oscar F. Lowe, q.m.; Charles H. Bailey, q.m.; Henry C. Marthens, surg.

Co. A.—Henry Cleveland, capt.; John C. Porter, 1st lieut.; Hiram H. Sleeth, 2d lieut.

Co. B.—Edward Morrison, capt.; John D. Ready, 1st lieut.; John O. Mohana, 2d lieut.

Co. C.—John Evill, capt.; Philip C. Taylor, 1st lieut.; S. T. Chapman, 1st lieut.; William G. H. Becker, 1st lieut.; Joseph A. Brown, 2d lieut.

---

[1] Afterwards consolidated with Company A.

[2] Formerly Company K, Eighth Regiment, and transferred to this regiment.

[3] Transferred to Seventh Regiment as Company C.

[4] Transferred to Seventh Regiment as Company I.

[5] Transferred to Seventh Regiment as Company H.

Co. D.—Daniel M. Grissom, capt.; E. J. Montague, 1st lieut.; George Mck. Luken, 2d lieut.

Co. E.—Charles R. Lyman, capt.; George Lewis, 1st lieut.; William A. Albright, 2d lieut.

Co. F.—Munson Beach, capt.; Charles Klunk, 1st lieut.; George T. Lewis, 1st lieut.; George Scott, 2d lieut.; William R. Babcock, 2d lieut.

Co. G.—William H. Crawford, capt.; John H. Field, 1st lieut.; A. B. Pearson, 2d lieut.

Co. H.—Hugh McDermott, capt.; Timothy McNamara, 1st lieut.; Hammond P. Farber, 2d lieut.

Co. I.—William McKee, capt.; Richard W. Moran, 1st lieut.; Theodore C. Albright, 2d lieut.

Sixteenth Regiment Enrolled Missouri Militia:

Field and Staff.—M. W. Warne, col.; W. H. Stone, lieut.-col.; O. B. Filley, maj.; E. W. Warne, adjt.; F. H. Hearum, q.m.

Co. A.—William H. Stone, capt.; George W. Fisher, 1st lieut.; William O'Brian, 2d lieut.

Co. B.—Frederick Maurer, capt., Victor Klatz, 1st lieut.; James Schaeffer, 2d lieut.

Co. C.—Gerard B. Allen, capt.; O. B. Filley, 1st lieut.; Albert D. Wells, 2d lieut.

Co. D.—Elijah Wells, capt.: M. W. Hagaman, 1st lieut.; James R. Dunnivant, 2d lieut.

Co. E.—James H. McCord, capt.; John L. Moon, 1st lieut.; James E. Fox, 2d lieut.

Co. F.—E. A. Corbet, capt.; William J. Tillay, 1st lieut.; G. William Katzung, 2d lieut.; Charles Goedeke, 2d lieut.

Co. G.—Robert Barnett, capt.; D. D. Chandler, 1st lieut.; Charles Deming, 2d lieut.

Co. H.—Stephen Glass, capt.; Charles Hagar, 1st lieut.; Rudolph Jackson, 2d lieut.

Co. I.—Louis Espenschied, capt.; John Cook, 1st lieut.; Justus Spectre, 2d lieut.

Co. K.—E. J. Sterling, capt.; John J. Grimsley, 1st lieut.; Edward Logan, 1st lieut.; P. J. Peters, 2d lieut.; Henry S. Carlon, 2d lieut.

Seventeenth Regiment Enrolled Missouri Militia:

Field and Staff.—Charles L. Tucker, col.; S. G. Sears, lieut.-col.: Jonathan O. Pearce, maj; William C. Wilson, adjt.; George P. Plant, q.m.; F. W. White, surg.

Twenty-second Regiment Enrolled Missouri Militia:

Field and Staff.—Thomas Miller, Jr., col.; Joab Lawrence, lieut.-col.; Nathan Cole, maj.; J. F. Parsons, adjt.; D. B. Pearce, q.m.

Field and Staff.—George R. Taylor, col.; T. McKissock, lieut col.; E. W. Wallace, maj.; James W. Way, adjt.

Third Regiment Cavalry (formerly Tenth), Missouri State Militia:

Field and Staff.—Edwin Smart, col.: Richard G. Woodson, col.; Frederick Morsey, lieut.-col.; James O. Broadhead, lieut.-col.; Richard G. Woodson, maj.; Henry L McConnell, maj.; James Wilson, maj.; H. M. Mathews, maj.; Henry C. Campbell, adjt.; John F. L. Jacoby, q.m.: H. R. Woodruff, com.; William L. Short, surg.; Wm. L. Short, asst. surg.; H. E. Jones, asst. surg.; James Hollister, asst. surg.

Fifth Regiment Cavalry (formerly Thirteenth), Missouri State Militia:

Field and Staff.—Albert Sigel, col.; Joseph A. Eppstein, lieut.-col.; Haveland Tompkins, maj.; John B. Kaiser, maj.; Waldemar Fischer, maj.; George E. Leighton, maj.; Oliver P. Newberry, maj.; William C. Kerr, adjt.; Henry W. Worth, adjt.; Louis Bergean, q.m.; Louis Rugen, com.; John Fetzer, surg.; John Fetzer, asst. surg.; Alexander Fekete, asst. surg.; John H. Williams, asst. surg.

Twelfth Regiment Calvary, Missouri State Militia:

Field and Staff.—Albert Jackson, col.; Samuel P. Simpson, lieut.-col.; Bazel F. Lazear, lieut.-col.; Bazel F. Lazear, maj.; Frederick W. Reeder, maj.; George E. Leighton, maj.; J. A. Greason, adjt.; Philip R. Van Frank, q.m.; H. M. Matthews, surg.; H. M. Matthews, asst. surg.; Henry Douglass, asst. surg.

[The foregoing lists of officers of the Missouri regiments under the different organizations of United States Reserve Corps, or Home Guards, Missouri Volunteers, and Enrolled Missouri Militia, were compiled from official sources, but are necessarily incomplete owing to the defective character of the returns made to the adjutant-general of the State. Owing also to the lack of information in the adjutant-general's reports as to the localities from which the various regiments were recruited, and the fact that officers and men were frequently transferred from one command to another or merged into new organizations, it is impossible to trace out all the officers whose commands were organized in St. Louis, but it is believed that the lists given are as full and accurate as it was possible to make them with the material in our possession.]

The following is a complete roster of the commanders-in-chief and their staffs, major-generals commanding and staffs, and brigadier-generals commanding the Missouri State Militia and Enrolled Missouri Militia and their staffs from 1861 to Dec. 31, 1864:

UNDER GENERAL ORDERS No. 96, WAR DEPARTMENT, SERIES 1861.

Nov. 24, 1864	John F. Philips	Brigadier-General	Nov. 23, 1864	

Confederate Organization in Missouri.—Owing to the fact that no official records have been preserved (if any were ever prepared), it is impossible to present a complete list of those citizens of St. Louis who became officers in the Confederate service. In the following list, however, of the field officers of the Missouri State Guard as published in the *Missouri Army Argus* (issued at Pineville, McDonald Co., Mo., Nov. 16, 1861), will be found many well-known St. Louis names:

General Staff and Field Officers of the Missouri State Guards, Claiborne F. Jackson, Governor and commander-in-chief; Thomas C. Reynolds, Lieutenant-Governor; Brig.-Gen. Warwick Hough, adjutant-general; Capt. William H. Brand, assistant adjutant-general; Brig.-Gen. James Harding, quartermaster-general; Col. John Ried, commissary-general; Col. Thomas H. Price, chief of ordnance.

Aids to the Governor, Cols. M. C. Goodlet, F. T. Mitchell, William M. Cooke, Richard Gaines, Thomas L. Snead, William Jackson, Edward W. Shands, Robert C. Woods.

Sterling Price, major general and commander in-chief; Col. Henry Little, adjutant-general; Col. H. H. Brand, inspector-general; Cols. A. W. Jones and Robert Woods, aides-de-camp; Cols. R. H. Dyer, Edward Haren, Jr., and Maj. H. A. Galliher, assistant quartermaster-generals.

First Division, Brig.-Gen. M. Jeff. Thompson.

Second Division, Brig.-Gen. Thomas A. Harris; Col. B. C. Brent, adjutant-general; Lieut.-Col. J. A. Vaughn, quartermaster-general; Lieut.-Col. John S. Mellon, commissary; Lieut.-Col. E. H. C. Bailey, division surgeon; Lieut.-Col. Robert Shacklett, division inspector; Lieut.-Col. M. McElhaney, division judge-advocate; Lieut.-Col. E. C. McDonald, paymaster; Lieut.-Cols. William B. Littleman and D. W. Vowels, aides-de-camp. Infantry Battalion, Lieut.-Col. S. A. Rawlings commanding; Maj. C. Adams; Capt. John Combs. Infantry Battalion, Maj. J. W. Robinson commanding; Capt. McPheeters, adjutant. Cavalry, Col. Martin E. Green commanding; Lieut.-Col. J. C. Porter; Maj. Robert Shacklett; Capt. W. F. Davis, adjutant. Cavalry, Col. J. Q. Burbridge commanding; Lieut.-Col. E. B. Hull; Maj. R. D. Dwyer; Capt. J. T. Turpin, adjutant. Cavalry, Col. Thomas Bruce commanding; Lieut.-Col. W. C. Splaun; Maj. G. B. Milton; Capt. H. McClure, adjutant. Cavalry, Lieut.-Col. B. W. Hawkins; Maj. John L. Owen; Capt. George F. Hatch, adjutant. Cavalry, B. H. Franklin, colonel; Capt. C. Whaley, adjutant.

Third Division, John B. Clark, brigadier-general commanding; Lieut.-Cols. William O. Burton, Robert Walker, and Joseph Finks, aides-de-camp; Col. Caspar W. Bell, adjutant-general division; Dr. W. C. Boone, division surgeon. Cavalry, Col. J. P. Major; Lieut.-Col. Hoskins; Maj. A. H. Chalmers. First Regiment, Col. John B. Clark, Jr.; Lieut.-Col. S. Farrington; Maj. Thomas Boyce. Second Regiment, Col. Congreve Jackson; Lieut.-Col. J. R. White; Maj. Joseph Vaughn. Third Regiment, Col. Edward Price; Lieut.-Col. Hyde. Fourth Regiment, Col. McKinney; Lieut.-Col. Singleton; Maj. Peacher. Fifth Regiment, Col. R. S. Bevier; Lieut.-Col. X. J. Pindall; Maj. James Lovern; Surgeon Dr. B. G. Dysart. Sixth Regiment, Col. Poindexter; Lieut.-Col. Fort; Maj. Perkins.

Fourth Division, Brig.-Gen. Wm. Y. Slack commanding, Col. A. H. Conrow, adjutant-general; Lieut.-Col. William Hill, quartermaster; Lieut.-Col. D. H. McDonald, commissary; Lieut.-Col. Peter Austin, surgeon; Lieut.-Col. William Keith, division inspector; Lieut.-Col. W. H. Lyday, judge-advocate; Lieut. Col. William Peory, paymaster; and Lieut.-Cols. William E. Walker and Walter Scott, aides-de-camp. First Infantry, Col. J. T. Hughes commanding; Lieut.-Col. James A. Pritchard; Maj. William Mirick; Capt. S. H. McWilliams, adjutant. Second Infantry, Col. Thomas Patton commanding; Lieut.-Col. Robert A. Hewitt; Maj. William R. Gause; Capt. J. H. Cook, adjutant. Extra battalion infantry attached to Col. Hughes' command, Maj. C. B. Housand; Capt. Churchill Clark's battery, also attached to Col. Hughes' command. First Cavalry, B. A. Rives, colonel; Lewis Bohannan, lieutenant-colonel; John B. Corner, major; and Capt. F. L. Hubbell, adjutant. Extra battalion cavalry, Lieut.-Col. Richard Chiles, Maj. John Patton.

Fifth Division, Brig.-Gen. A. E. Stein commanding; Col. D. W. Flowerree, assistant adjutant-general; Lieut.-Col. S. R. Shrader, quartermaster; Lieut.-Col. B. Roberts, commissary. Lieut.-Col. Charles N. Palmer, surgeon; C. T. Hart and Wm. S. Wright, assistant division surgeons; Lieut. Col. Thomas W. Shields, inspector; Lieut.-Col. Alexander Harris, judge-advocate; Lieut.-Col. James M. Loughborough, paymaster; Lieut.-Cols. Wright Schnumburg and John W. Gillespie, aides-de-camp. First Regiment Infantry, Col. J. P. Sanders commanding; Lieut.-Col. W. H. Cundiff; Maj. D. Todd Samuel; Adjt. G. D. Shackleford; Asst. Surgs. John S. Teasdale and A. B. Nephler. Second Regiment Infantry, Col. John H. Winston commanding; Lieut.-Col. W. P. Chiles; Maj. J. Murphy; Adjt. John W. Rose; F. M. Johnson, surgeon; B. F. Johnson, assistant surgeon. Third Regiment Infantry, Col. L. M. Lewis commanding; Lieut. Col. C. C. Thornton; Maj. G. W. Thompson; Adjt. G. B. Howard, Jr.; Surg. C. H. Shotwell; Asst. Surg. A. B. Ralph. First Battalion Infantry, Lieut.-Col. John R. Boyd; Maj. John J. Hush; Adjt. S. Quinan; Surg. O. B. Knode; Asst. Surg. S. T. Gregory. Fifth Regiment Infantry (mounted), Col. A. W. Slayback commanding; Lieut.-Col. Welfrey; Maj. Florence; Adjt. John Kemper; Surg. C. M. France; Assist. Surg. B. S. Howard. First Regiment Cavalry, Col. J. T. Carneal commanding; Lieut.-Col. Elijah Gates; Maj. Nay Bostick; Adjt. J. H. Lawther; Surg. E. McD. Coffey; Asst. Surgs. W. W. S. Kelly and W. F. Stark. First Battalion Artillery, Maj. John Landis; Adjt. Toole.

Sixth Division, Brig.-Gen. M. M. Parsons.

Seventh Division, Brig.-Gen. J. H. McBride.

Eighth Division, Brig.-Gen. James S. Rains, commanding; Col. L. A. Meacham, adjutant-general; Lieut.-Col. John McMurtry, quartermaster; Lieut.-Col. William M. Dunn, commissary; Lieut.-Col. George W. Taylor, surgeon; Lieut.-Col. William E. Arnold, division inspector; Lieut.-Col. George S. Rathburn, division judge-advocate; Lieut.-Col. Warner Lewis, division paymaster; Lieut.-Cols. B. H. Woodson and William M. Briscoe, aides-de-camp; George W. Haymaker, sergeant-major. First Infantry, Col. Thomas H. Rosser, commanding; Lieut.-Col. William Martin; Maj. Eugene Erwin; Adjutant, Capt. J. E. Harwood. Second Infantry, Col. Benjamin Elliott, commanding; Lieut.-Col. L. W. Councilman; Maj. Samuel F. Taylor; Adjutant, Capt. George W. Lewis. Third Infantry, Col. Edgar V. Hurst, commanding; Lieut.-Col. J. L. Tracy; Maj. Frederick Routh; Adjutant, Capt. Robert Gibson. Fourth Infantry, Lieut.-Col. W. S. O'Kane, commanding; Maj. Elbert Feaster. Fifth Infantry, Col. James Clarkson, commanding; Lieut.-Col. Robert W. Crawford; Maj. Alexander C. Lamar; Adjutant, Capt. M. W. Buster. Second Cavalry, Lieut.-Col. James McCown, commanding; Maj. Moses W. Smith; Capt. William M. King. Third Cavalry, Col. R. L. Y. Peyton, commanding; Lieut.-Col. Martin White; Maj. W. S. Tyler; Adjutant, Capt. D. H. Williams. Fourth Cavalry, Col. B. F. Walker, commanding; Lieut.-Col. H. K. Hartley; Maj. Thomas H. Hartley; Adjutant, Capt. James L. German. Fifth Cavalry, Col. Jesse L. Cravens, commanding; Lieut.-Col. H. Slover; Maj. W. Langston; Adjutant, Capt. J. H. Williams. Sixth Cavalry, Col. John T. Coffee, commanding; Lieut.-Col. John W. Payne; Maj. M. W. Smith; Adjutant, Capt. A. Chilcutt. Seventh Cavalry, Col. Dewitt C. Hunter, commanding; Lieut.-Col. Richard A. Vaughan; Maj. C. W. Bolton; Adjutant, Capt. B. O. Weidemeyer. Eighth Cavalry, Lieut.-Col. Owens, commanding; Maj. R. K. Murrell; Adjutant, Capt. N. D. Short. Ninth Cavalry, Lieut.-Col. Cummings, commanding; Maj. J. Alexander Smith; Adjutant, Capt. H. C. Purcell. Tenth Cavalry, Col. Erwin, commanding; Lieut.-Col. Cunningham; Maj. Fleming. Eleventh Cavalry, Col. Talbot, commanding; Lieut.-Col. Pearsey; Adjutant, Capt. A. A. Hussley. General Provost Guard, Chief Marshal, Maj. Phineas M. Savery; Deputy Marshals, Capt. Edward Aldrich, and Lieuts. Carroll Wood, Henry C. Kerr, and John E. Brooks; Marshals of Military Commission, Carroll Wood and John Taylor.

The divisions were designated from the congressional districts into which the State was divided.

The Capture of Camp Jackson and the Events of May 11 and June 17, 1861.—The history of St. Louis would not be complete without a record of the exciting events of the year 1861 which preceded and accompanied the outbreak of the civil war. Public opinion is not heated now as it was then; but it is probably as much divided now as then upon the character, propriety, and policy of the several acts which were done during the period from the meeting of the Missouri Legislature, in January, 1861, and the date of the capture of Camp Jackson and the organization of the Missouri State Guard. It is not our province to decide where those chiefly interested have agreed to differ; we will therefore confine ourselves strictly to the task of collecting here and arranging in intelligent chronological order the facts, documents, and all the other authentic and indisputable evidence upon which public opinion is formed in every case, and upon which, in the end, it will rest in this case. Let others argue as much and how they please, we will be content to supply the materials for argument just as they exist, and no matter which side of the controversy they may tend to make or mar.

At the beginning of 1861, while there was great and wide-spread excitement everywhere, it was most intense in Missouri, some parts of which had been literally converted into a camp by the border troubles with Kansas. The city of St. Louis was Republican by the force of the German vote; the State was Democratic, and pro-slavery Democratic by a large majority, though the influence of Sterling Price and men of that stamp had enabled Douglas to carry it for the Presidency. The leader of the supporters of Mr. Lincoln in the exciting struggle of the Presidential election was Frank Blair, Jr., a man of intense views and impulsive, violent energy in enforcing them. The secession movement in the Southern States after the election had the effect of preventing the political armies from disbanding. The "Wide Awakes," who had borne torches and banners and shouted themselves hoarse for Lincoln and Hamlin, now undertook to form Union Clubs, and from this to form Union Companies, and call the muster-roll and drill. In St. Louis Frank Blair and the Germans fraternized and organized with terrible intensity, calling themselves the "Black Jägers," drilling and practicing rifle-shooting. On the other hand, the "Minute-Men" of the Democratic party kept up their organization and their headquarters, and in these places often not only was there drill going on, but recruiting also for the Confederate States army.

Frank Blair, defeated for Congress for the short term, had been elected for the long term by a large majority over the regular Democratic and the Bell and Everett candidates. The mayor of the city of St. Louis, O. D. Filley, was an energetic, advanced Republican, and afterwards a member of the "Committee of Safety" of the organized Unionists, and prominent in the Advisory Committee, to whom Mr. Lincoln left pretty much all the affairs of the city, civil as well as military. In the State elections, on the other hand, Claiborne F. Jackson was elected Governor, and Thomas C. Reynolds, Lieutenant-Governor, by a plurality of nearly eight thousand votes, which yet lacked ten thousand of being a majority over all opponents. The Legislature was strongly Democratic, and McAfee was elected Speaker of the House by a vote of seventy-six to forty-eight for all others. He

was an avowed Southern sympathizer. Governor Jackson, in his inaugural address, had declared it to be the duty of Missouri and Kentucky to stand by the South, and in the first days of the session a commissioner from the Confederate government at Montgomery, Ala., had been "received" by the Legislature. The military bill, which would probably not have passed but for the Camp Jackson excitement, was introduced the first week of the session, and at the same time a bill was introduced, which speedily became a law, giving St. Louis a metropolitan police system, and creating a board of police commissioners appointed by the Governor. This bill deprived the mayor of appointment and control of the police, and made the commissioners custodians of the public peace. A bill was also passed providing for the election of a State Convention, which was to determine the destinies of the State in the crisis which every one now saw was rapidly approaching.

In the mean time that crisis was coming more rapidly than people wished or expected, in consequence of the precautions each side took to protect itself from the supposed dangers which gathered on every side. Some of the organizations of minute-men, who had their headquarters at the Berthold mansion (where later the Confederate flag was hung out), were received into the State militia as regular bodies of uniformed volunteers, being which they could receive equipments and uniforms from the State. On the other hand, the "Wide Awakes," including many Germans of the Turner and other associations, already *quasi*-military in their organization, began to form regular companies, to drill, to raise money, to buy arms, and to provide themselves with ammunition. The secret and nightly drill of all these various clubs and companies could not but cause excitement and uneasiness.

St. Louis was a military position of great importance; it was a military station of great value, and in the event of war both parties would naturally seek to control it for the sake of the advantages which they might derive from its possession. The place had been a centre for troops and arms for two generations, and the barracks and the arsenal were treasures to whoever held them. The arsenal was the key to St. Louis. Whoever held that held the city. Besides, it contained military stores, arms, and ordnance of great value and in great quantity. There can be no doubt but that both parties looked with eager and hungry eyes upon the arsenal. The United States government held it, and the Unionists determined it should not be wrested away from them. The States rights party wished possession of it, and would have attempted to seize it, if in their power, upon occasion of the first overt act of violence or the first State act of secession. There is no need to go into the mass of charges and replies which are extant in regard to the possession of the arsenal. It is enough to know that, as was natural, nay, necessary under the circumstances, the arsenal was the main bone of contention between the opposing forces whose antagonism was being so rapidly crystallized, and that every effort made for its capture would intensify the steps and precautions taken for its defense, and *vice versa*. The evidence for all this is cumulative, and must be taken in connection with the action of the Legislature and the State military. Jan. 5, 1861, the following letter was addressed to ex-President Buchanan

"ST. LOUIS, Jan. 5, 186

"*His Excellency James Buchanan:*

"DEAR SIR,—In the present excited condition of the country I cannot help feeling concerned in regard to the safety of the government funds in my hands, its arms and munitions of war, which are at the arsenal, and within the limits of the city.

"I am satisfied that if either the Republicans or the secessionists should seize the arsenal here, war would at once begin in this section, as neither would submit to its possession by the other peacefully.

"I have now over four hundred thousand dollars of government money on hand, which might be seized, and I have thought proper, under all the circumstances, to submit to you whether it is not advisable, without delay, to concentrate troops at the arsenal for the protection of the government property there (which I think is very large), and the treasure in my care, if it should become necessary. I am satisfied that both sides here have their eyes fixed upon these two points, the arsenal and treasury, and that the taking possession of them by either will lead to conflict, and it therefore seems to me that the sooner provision is made to guard them the better. A week later and the excitement may arrive at that point here that any suggestion of bringing a force here for their protection would precipitate the seizure of them.

"I wish very much that the amount at this place, to the credit of disbursing officers, the United States treasurer, and the Post-Office Department, could be placed at a point where there would be less danger of its seizure. There may be none here, but I fear there is; I fear we are arriving at a point in our troubles that at this place there is danger from both sides.

"I should be glad if you would advise me, if there should seem to be imminent danger, what course to pursue, and what officer to apply to for protection.

"I sympathize most deeply with you in the trying and delicate position in which you are placed, and nothing shall be wanting on my part to render you all the aid I can command here or elsewhere.

"I am most respectfully and truly yours,

"ISAAC H. STURGEON,

"*Assistant Treasurer U. S., St. Louis, Mo.*"

In response to this letter the President at once ordered a force to be placed at the disposal of the assistant treasurer in this city, and they were marched to the custom-house and temporarily placed in that building by the military authorities. In the evening

after consultation with the officer in command, they were removed to the arsenal, where it was the design at first to have placed them.

After the police bill had become a law, Mr. Sturgeon wrote again to the President and also to Gen. Scott on the subject. When the bill providing for the State Convention became a law and the matter of the convention began to be canvassed and discussed, he wrote a third time (February 9th) to Gen. Scott, urging the necessity of defending the arsenal with every available military force. This last letter had its effect upon the lieutenant-general, who wrote to Gen. W. S. Harney, commanding at St. Louis, as follows:

"HEADQUARTERS OF THE ARMY,
"WASHINGTON, Feb. 13, 1861.

"BRIG.-GEN. W. S. HARNEY, *commanding the Department of the West:*

"SIR,—The following dispatch was sent you by telegraph to-day: 'Have you in the St. Louis arsenal troops enough to defend it? Ought you not to send up all the men from Jefferson Barracks? *Winfield Scott.*' The general-in-chief desires to strengthen that dispatch by calling your attention to these considerations: that it is best to move in advance of excitement; that it is possible, when an emergency arises, reinforcements may be cut off, and that all the force may now be usefully employed at work in adding to the defense of the arsenal.

"I am, sir, very respectfully, your obedient servant,

"GEORGE W. LAY,
"*Lieut.-Col. and Aide-de-Camp.*"

This was reiterated to Gen. Harney in other shapes, but he had come to the conclusion that no serious movement against the arsenal was contemplated, and that "the secession party is in a minority in St. Louis, and there is every reason to suppose that in the event of a movement from any quarter upon the arsenal its garrison would be promptly succored by an overwhelming force from the city." It may be added that about this time (February 9th) Maj. (afterwards Gen.) David Hunter was in St. Louis in conference with Mr. Sturgeon. Hunter was known then and later as the most stalwart of radical generals; he was on his way to Washington, and Mr. Sturgeon impressed his views on him of the urgency of the occasion. While they were talking, Gen. (then Capt.) Lyon came in,—also known as an ardent Republican,—and suggested that *he* would like to be the commander at the arsenal, in order to make sure of its protection and defense. The appointment of Capt. Lyon to the post soon after Hunter's arrival at the capital makes it probable that Gen. Hunter had actively recommended it.

In the meanwhile, to show the animus on the other side, the following letter is now in order:

"ST. LOUIS, Mo., Jan. 24, 1861.

"HIS EXCELLENCY C. F. JACKSON, *Governor of Missouri:*

"DEAR SIR,—I have just returned from the arsenal, where I have had an interview with Maj. Bell, the commanding officer of that place. I found the major everything that you or I could desire. He assured me that he considered that Missouri had, whenever the time came, *a right to claim it as being upon her soil.* He asserted his determination to defend it against any and all *irresponsible mobs*, come from whence they might, but at the same time gave me to understand that he would not attempt any defense against the proper State authorities.

"He promised me, upon the honor of an officer and a gentleman, that he would not suffer any arms to be removed from the place without first giving me *timely information*, and I in return promised him that I would use all the force at my command to prevent him being annoyed by irresponsible persons.

"I at the same time gave him notice that if affairs assumed so threatening a character as to render it unsafe to leave the place in its comparatively unprotected condition, that I might come down and quarter a proper force there to protect it from the assaults of any persons whatsoever, to which he assented. In a word, the major is with us, where he ought to be, for all his worldly wealth lies here in St. Louis (and it is very large), and then, again, his sympathies are with us.

"I shall therefore rest perfectly easy, and use all my influence to stop the sensationists from attracting the particular attention of the government to this particular spot.

"The telegraphs you received were the sheerest *canards* of persons who, without discretion, are extremely anxious to show their zeal. I shall be thoroughly prepared with the proper force to act as emergency may require. The use of force will only be resorted to when nothing else will avail to prevent the shipment or removal of the arms.

"The major informed me that he had arms for forty thousand men, with all the appliances to manufacture munitions of almost every kind.

"This arsenal, if properly looked after, will be everything to our State, *and I intend to look after it*, very quietly, however. I have every confidence in the word of honor pledged to me by the major, and would as soon think of doubting the oath of the best man in the community.

"His idea is that it would be disgraceful to him as a military man to surrender to a mob, whilst he could do so without compromising his dignity to the State authorities. Of course I did not show him your order, but I informed him that you had authorized me to act as I might think proper to protect the public property.

"He desired that I would not divulge his peculiar views, which I promised not to do, *except to yourself.* I beg, therefore, that you will say nothing that might compromise him eventually with the general government, for thereby I would be placed in an awkward position, whilst he would probably be removed, which would be *unpleasant* to our interests.

"Grimsley, as you doubtless know, is an unconscionable jackass, and only desires to make himself notorious. It was through him that McLaren and George made the mistake of telegraphing a falsehood to you.

"I should be pleased to hear whether you approve of the course I have adopted, and if not, I am ready to take any other that you, as my commander, may suggest.

"I am, sir, most truly, your obedient servant,

"D. M. FROST."

What action Governor Jackson took is not known, but the following letter from the President of the

Southern Confederacy appears to be addressed to him in answer to one on the subject of the arsenal:

"MONTGOMERY, ALA., April 23, 1861.

"HIS EXCELLENCY C. F. JACKSON, *Governor of Missouri:*

"SIR,—I have the honor to acknowledge yours of the 17th instant, borne by Capts. Green and Duke, and have most cordially welcomed the fraternal assurances it brings.

"A misplaced but generous confidence has for years past prevented the Southern States from making the preparation required by the present emergency, and our power to supply you with ordnance is far short of the will to serve you. After learning as well as I could from the gentlemen accredited to me what was most needful for the attack on the arsenal, I have directed that Capts. Green and Duke should be furnished with two 12-pounder howitzers and two 32-pounder guns, with the proper ammunition for each. These, from the commanding hills, will be effective both against the garrison and to breach the inclosing walls of the place. I concur with you as to the great importance of capturing the arsenal and securing its supplies, rendered doubly important by the means taken to obstruct your commerce and render you unarmed victims to a hostile invasion.

"We look anxiously and hopefully for the day when the star of Missouri shall be added to the constellation of the Confederate States of America.

"With best wishes, I am, respectfully yours,

"JEFFERSON DAVIS."

The Capts. Duke and Green referred to are the gentlemen named in the following report from a St. Louis journal of Feb. 14, 1861, and who afterwards formed part of the force assembled at Camp Jackson. Basil Duke during the war was second in command to Gen. John H. Morgan, the independent partisan:

"The Missouri Minute-Men, who for some weeks have been drilling at their headquarters, corner of Fourth and Pine Streets, to prepare themselves for soldiers in the regular militia, were last evening sworn into the service of the State by Gen. Frost. Our reporter was not permitted to witness the proceedings, nor could the official list of officers be obtained; therefore the names given below, kindly furnished by an outsider, may not be correct.

"Each company is composed of fifty men. The uniform adopted, we learn, will be very simple, similar to that used in the United States army.

"As some inaccuracies appeared in our report of the election of officers in yesterday's paper, we give the following correct list:

"*Company A.*—Captain, Overton W. Barrett: first lieutenant, Louis E. Kennerly; second lieutenant, Edward Blennerhassett; third lieutenant, T. Sidney Russell.

"*Company B.*—Captain, Basil Wilson Duke; first lieutenant, James Douglass; second lieutenant, Aubrey C. Howard; third lieutenant, John V. Schmitt.

"*Company C.*—Captain, James R. Shaler: first lieutenant, W. W. Sanford; second lieutenant, Samuel Farrington; third lieutenant, Robert Duffey.

"*Company D.*—Captain, Colton Green; first lieutenant, Chas. Throckmorton; second lieutenant, —— Harrington; third lieutenant, Alton Long.

"*Company E.*—Captain, G. F. Hubbard; first lieutenant, J. Hammersly; second lieutenant, J. R. Champion; third lieutenant, W. C. Potter."

The secret meetings and secret drilling on both sides of citizens of the same community, yet arming palpably to cut one another's throats, and each side profoundly ignorant and profoundly mistrustful of the other's intentions and actions, must have tended greatly to complicate the situation and augment its inherent difficulties. About February 1st the active Union men had a meeting, at which the military form was finally agreed upon for all organizations and the initial company regularly enrolled. Frank Blair was made colonel, provisionally, of the force, and as he expected soon to have to go to Washington, to attend the extra session of Congress, the advisory Committee of Safety was selected, to act in his absence. This committee, which at one time (Frank Blair was a member *ex officio*) ruled the State of Missouri almost without appeal, with Nathaniel Lyon for its lieutenant and executive officer, consisted of O. D. Filley, John How, Samuel T. Glover, James O. Broadhead, and J. J. Witzig. In two weeks, according to Peckham, fourteen hundred and forty men were enrolled, divided into companies and arranged in battalions. Money was raised to buy arms, and the arms were procured and smuggled in, some from Governor Yates, of Illinois. The money raised for the support of the volunteers by contributions in every part of the country exceeded thirty thousand dollars. Frank Blair wanted the War Department to give him unvouched control of one hundred thousand dollars, and wrote to Governors Morton, of Indiana, and Yates, of Illinois, for control of men, munitions, and movements. But these things the Secretary of War declared to be inadmissible.

March 11, 1861, Frank P. Blair categorically demanded of Secretary Cameron, in the name of "our friends," the appointment of Capt. Lyon to have command of troops at the arsenal, Maj. Hagner (in command at the time) to control only the ordnance department. This appointment was accordingly made March 13th, but Lyon chafed under the restrictions put upon the sphere of duty to which he fancied himself called in some special manner, and in his private talk he did not scruple to inform "our friends" of his intention to resort to summary proceedings, law or no law. In fact, those who urged and insisted upon Lyon's having this command, seem to have gone principally upon the idea that he was the man to do something audacious, something out of the pale of law or precedent, so as to provoke a crisis and relieve the community from its state of unnatural and unpleasant tension. By successive orders Lyon was authorized to fortify the arsenal strongly (besides undermining it), he was largely reinforced, he was given discretionary authority to muster State militia into his

service, and he became commander-in-chief by the fact of Gen. Harney's being ordered to the East, nominally to be examined upon the merits of the San Juan del Fuca controversy, upon which, as he had agreed with sundry publishers, he was to write a book. The telegram from Adjt.-Gen. Lorenzo Thomas announcing this measure to Gen. Lyon was couched thus:

"ADJUTANT-GENERAL'S OFFICE,
"WASHINGTON, D. C., April 21, 1861.

"CAPT. N. LYON, *Second Infantry, East St. Louis:*

"Gen. Harney has this day been relieved from his command. The Secretary of War directs that you immediately execute the order previously given to arm the loyal citizens to protect the public property and execute the laws. Muster four regiments into the service."

On April 30th, by special order of President Lincoln, indorsed by Secretary Cameron and Gen. Scott, this power of enrollment given to Lyon was made to include ten thousand men.

But the local scene must be looked at again. It is charged, in evidence of an old and maintained plot to capture the arsenal, that so early as the 8th of January Gen. Frost issued the following

"GENERAL ORDERS No. 4.

"HEADQUARTERS FIRST MILITARY DISTRICT,
"ST. LOUIS, Jan. 8, 1861.

"I. With a view to facilitate a prompt assemblage of the troops in this district, whenever it may be necessary so to do, it is hereby ordered that all officers and soldiers in the command shall assemble at their armories and headquarters, in full dress uniform, as soon as they may hear the bells of the churches sounding a continual peal, interrupted by pauses of five minutes. The troops having thus assembled will await in their quarters orders from their commanding officers.

"II. Commanding officers of corps will be held responsible that this order is communicated and explained to their commands.

By order,

"BRIG.-GEN. FROST, *Commanding.*

"WILLIAM D. WOOD, *A.A.G.*"

and that this was only the revealed part of a plot to be consummated in January, but which fell through in consequence of mistakes of the conspirators, or unconscious precautions taken by the defenders—regular and irregular and self-constituted—of the arsenal.

Lyon had scarcely become acquainted with his position at the arsenal before we find him writing the following letter to Frank Blair:

"ST. LOUIS ARSENAL, Feb. 25, 1861.

"HON. F. P. BLAIR, JR., *Washington, D. C.:*

"DEAR SIR,—I have recently written to Maj. Hunter, who, you must know, accompanied Mr. Lincoln to Washington, upon the wants of the service here, and with the hope that through his energy and zeal the proper measures might be adopted to meet existing emergencies here. The subject-matter, and which I stated to you verbally, I will here repeat, for such consideration and action as you may think it deserves.

"It is obvious that the fine stone wall inclosing our grounds affords us an excellent defense against attack, if we will take advantage of it; and for this purpose platforms should be erected for our men to stand on and fire over; and that artillery should be ready at the gates, to be run out and sweep down a hostile force; and sand-bags should be prepared and at hand to throw up a parapet to protect the parties at these pieces of artillery; inside, pieces should be placed to rake the whole length, and sweep down on each side a party that should get over the walls, traverses being erected to protect parties at these pieces; a pretty strong field-work, with three heavy pieces, should be erected on the side towards the river, to oppose either a floating battery or one that might be established on the island; and, finally, besides works about our houses, every building should be mined, with a train arranged so as to blow them up successively as occupied by the enemy. Maj. Hagner refuses, as I mentioned to you, to do any of these things, and has given his orders not to fly to the walls to repel an approach, but to let the enemy have all the advantages of the wall, to lodge himself behind it, and get possession of all outside buildings overlooking us, and to get inside and under shelter of our outbuildings, which we are not to occupy before we make resistance. This is either imbecility or d—d villany; and in contemplating the risks we run, and the sacrifices we must make in case of an attack, in contrast to the vigorous and effective defense we are capable of, and which, in view of the cause of our country and humanity, the disgrace and degradation to which the government has been subject by pusillanimity and treachery, we are now called upon to make, I get myself into a most unhappy state of solicitude and irritability. With even less force and proper disposition, I am confident we can resist any force which can be brought against us, by which I mean such force as would not be overcome by our sympathizing friends outside. These needful dispositions, with proper industry, can be made in twenty-four hours. There cannot be, as you know, a more important occasion nor a better opportunity to strike an effective blow at this arrogant and domineering infatuation of secessionism than here; and must this all be lost by either false notions of duty or covert disloyalty? As I have said, Maj. Hagner has no right to the command, and under the sixty-second article of war can only have it by a special assignment of the President, which I do not believe has been made; but that the announcement of Gen. Scott that the command belongs to Maj. Hagner is his own decision, and done in his usual sordid spirit of partisanship and favoritism to pets and personal associates and toadies; nor can he, even in the present straits of the country, rise above this in earnest devotion to justice and the wants of his country. If Mr. Lincoln chooses to be deceived in this respect, as I fear he will be, he will yet repent of it in misfortune and sorrow, for neither supercilious conceit nor unscrupulous tyranny was ever a veil for patriotism or ability. Maj. Hagner is not accustomed to troops, and manages them here awkwardly; but this is nothing compared to the great matter in hand, and, as I have plainly told him, this is of much more importance than that either he or I should conduct it. You may see in the *Missouri Democrat* of the 23d an account of our defenses, which sets forth what ought to be our state, but not what it is, and was given to frighten the secessionists. A simple order countermanding that assigning Maj. Hagner to duty, according to brevet rank, would give me command. With a view to defense here, it would be well to add that I should assume control, and avail myself of all means available for the purpose. With respect to those men discharged, either an investigation should be ordered or all who remain be discharged; this latter would be the better plan, and save government an expense for which they are rendering no necessary or compensating service.

"If I should have command I would have no trouble to arm any assisting party, and perhaps, by becoming responsible for the arms, etc., I might fit out the regiment we saw at the garden the other day; but most I concern myself with a view to sustain the government here, and trust to such measures as may be found available.

"Yours truly,

"N. LYON."

The matter of the State Convention had come to the front as soon as the bill passed, and on February 4th there was a meeting at Washington Hall, in St. Louis, to nominate a Union ticket. After much discussion a degree of unanimity was secured, and an "Unconditional Union ticket," comprising men of all former parties, was put in the field and elected, February 18th, by nearly six thousand majority. The Legislature had appointed peace commissioners to go to Washington, under the provisions of the Crittenden Compromise Act, but there was no abatement of the local political excitement. In April the municipal election came off to choose a successor to Mayor O. D. Filley. Daniel G. Taylor, a moderate man and a compromise candidate, was elected. He acted admirably well under very trying circumstances. A few days after this election Governor Claiborne F. Jackson gave the bill for the new police commissioner his approval and named the commissioners. They were Charles McLaren, Basil W. Duke, James H. Carlisle, and John A. Brownlee, the mayor being *ex officio* president of the board.

The new board proceeded at once to organize, and elected James McDonough chief of police. The board also issued a variety of orders, of which the following are examples:

"TO THE CITIZENS OF ST. LOUIS.

"OFFICE OF THE POLICE COMMISSIONERS
FOR THE CITY OF ST. LOUIS.

"April 23, 1861.

"WHEREAS, In consideration of the great excitement prevailing throughout the country and in this city, and of the danger to be apprehended from mobs of partisans, and the consequent destruction of life and property, and of the fact that these dangers are greatly increased by the variety of rumors and reports that are constantly being circulated by designing partisans and thoughtless persons, and by misrepresentations that are made of the objects and intentions of those in whose charge the protection of the city has been placed, it is thought proper that this board should make to the citizens this

PROCLAMATION.

"That all law abiding and peaceable citizens shall be protected in their persons and property so far as this board has the power; that all mobs or riots shall and will be suppressed; and that in the discharge of these duties no discrimination will be made as against one class of citizens and in favor of another.

"The preservation of the peace of the city should be the paramount object of all good citizens. Our laws, if enforced, will afford ample protection; they can and will be enforced if our citizens will only second the efforts of the proper legal officers. To this end we earnestly and solemnly appeal to the citizens of St. Louis, as they value their lives and their property to discountenance in every manner the assembling, arming, and drilling of men acting without authority of law, and consequently without restraint or responsibility; that they will obey the laws of the State and the ordinances of the city, and endeavor, so far as in their power lies, to maintain the peace and dignity of our city.

"J. A. BROWNLEE, *President.*"

The need for such an order was obvious, as will be seen from the following paragraphs, selected from numberless others current in the newspapers of the day. We give the dates without naming the journals:

—12th February.—"*Arming for the Conflict.*—We have good authority for stating that large quantities of arms were distributed in various beer-saloons in the First Ward on Sunday, and that leading black Republicans were in attendance, and that a constant drill was kept up during the day. Instructions were issued for their guidance between this time and the election, and a great improvement is promised on the 'Wide Awake' organization of last year, when thousands of fraudulent votes were polled."

—23d February.—"*Military Parade.*—Missouri Volunteer Militia, First Military District. Staff: Gen. D. M. Frost, commander of the brigade; Maj. R. S. Veorhis, acting adjutant general; Col. A. R. Easton, colonel of the First Regiment; Capt. Buchanan, adjutant; Capt. Hatch, commissary; Maj. F. M. Cornyn, M.D., surgeon; Col. J. N. Pritchard, major battalion engineer corps.

"Missouri Dragoons, Capt. Gaeffel, thirty-five men, attended by the Jackson Cornet Band.

"Engineer Corps, National Guards, Maj. J. N. Pritchard commanding, seventy-four men, rank and file. First Company, Capt. Hazeltine; Second Company, Lieut. Pike, attended by the Engineer Corps Cornet Band.

"St. Louis Grays, Capt. Burke, thirty men, two musicians (fifteen privates and one sergeant are with the Southwest expedition).

"Missouri Guard, George W. West, forty men, [illegible] and two musicians.

"Independent Guard, Capt. C. H. Fredericks, twenty-two men, four officers, two musicians.

"Washington Blues, Capt. Kelly, thirty nine men, rank and file.

"Montgomery Guard, Lieut. Russell.

"City Guard, Capt. J. J. Morrison, thirty men combined.

"Sarsfield Guard, Capt. Rogers, thirty men, rank and file.

"Washington Guard, Lieut. Tucker, thirty men, two musicians."

25th February.—"Military parade and review of the Black Guards, or Jaegers. A whole battalion drilling. Frank Blair the originator of the movement.

"So far as could be ascertained the officers in command were the following: Major of the battalion, J. S. Schuttner, adjutant, Sigismund Hornberg; First Company, seventy five men, Capt. Dahmer; first lieutenant, August Boecuteen. Second Company, one hundred and thirty eight men, captain, Christian Goerisch; first lieutenant, George Strickler. Third Company, one hundred men, captain, George Schuttg, first lieutenant, C. Shuttg."

March 4th.—"The Fifth Street excitement. The removal out of the 'State Rights' flag from the Missouri Minute Men's headquarters yesterday produced an unusual excitement. The large crowds of people that congregated on Fifth Street were called together, it seems, more from curiosity than from any

"OFFICE OF THE POLICE COMMISSIONERS
FOR THE CITY OF ST. LOUIS.

"April 12, 1861.

"It being of absolute necessity for the peace and quiet of the city that the law in respect to the Sabbath, commonly called the Sunday law, shall be strictly observed, it is hereby ordered that all shows, games, exhibitions, plays, and fights of man and beast, sales of liquor, or other violation of said law are forbidden, and notice given that the penalties against the violation of said laws will be strictly enforced.

"J. A. BROWNLEE, *President*."

"OFFICE OF THE POLICE COMMISSIONERS
FOR THE CITY OF ST. LOUIS.

"April 12, 1861.

"Hereafter no permits or authorization of whatever nature or kind of negro parties, or other assemblages of negroes, shall be issued by the chief of police; and all saloons, or public-houses of whatever character, kept or owned by negroes are forbidden, and will be suppressed.

"J. A. BROWNLEE, *President*."

"OFFICE OF THE POLICE COMMISSIONERS
FOR THE CITY OF ST. LOUIS.

"April 12, 1861.

"Crowds or assemblages of idlers, loafers, or others on the prominent thoroughfares of the city, interfering with the free and legitimate use of the public streets and sidewalks, and the safety and security of the good and orderly citizens, are positively prohibited; and the Chief of Police is strictly enjoined to see that the spirit of this order is enforced.

"J. A. BROWNLEE, *President*."

desire to do injury to the defenders of said flag. Some did go so far as to say, 'That flag must come down,' yet no one seemed willing to commence the attack upon it. The mayor, thinking some bad results might follow the assembling of the crowd, sent a letter to some of the minute-men asking them very politely to take it down. They gave him some encouragement that his wishes should be granted, but up to a very late hour last night the flag was still there.' The vast crowd kept swaying to and fro all the afternoon and evening, but they did no harm. A few passed back and forth on the balcony of the 'Berthold mansion,' but that was the only appearance of fighting we observed."

"March 6th.—The flag at Fort Berthold. Another flag of similar description was run out from the Breckenridge and Lane headquarters, on Locust Street between Third and Fourth streets. A few Good fire-eaters gathered around to admire the flag, but none others came to do it reverence."

"April 14th.—Keep cool. Yesterday was a day of great excitement in St. Louis. It was known that a brisk cannonading had been commenced by the forces of the Confederate States, under the command of Gen. Beauregard, against Maj. Anderson, in command of a small party of United States troops in Fort Sumter. The dispatches were by no means satisfactory, as to regards the attack there was no question. Some doubt was felt, too, as to the immediate cause of the commencement of hostilities,—a point as to which there was a good deal of tenderness on each side,—the United States claiming the right to provision, if no more, the forces under Maj. Anderson without interfering with the status of a pre-existing arrangement, and the Confederate States claiming that Capt. Fox, in command of a supply vessel, had availed himself of his position to get into Fort Sumter, with a view of perfecting a plan for the relief of the fort both in men and provisions."

"OFFICE OF THE POLICE COMMISSIONERS.
"ST. LOUIS, April 12, 1861.

"Churches for negroes, or churches wherein negroes or mulattoes officiate as preachers, will not be allowed to open unless an officer of the police is present and appointed to be there by the undersigned or the Chief of Police.

"J. A. BROWNLEE, *President*."

"OFFICE OF THE POLICE COMMISSIONERS
FOR THE CITY OF ST. LOUIS.

"April 12, 1861.

"The requirements of law in regard to slaves hiring their own time, in violation of law, will be rigidly enforced.

"J. A. BROWNLEE, *President*."

"OFFICE OF THE POLICE COMMISSIONERS
FOR THE CITY OF ST. LOUIS.

"April 12, 1861.

"Notice is hereby given that all free negroes found within the limits of this city without *license* from and after *five days* from this date will be dealt with according to law.

"The Chief of Police is ordered to arrest all free negroes, mulattoes, or slaves found selling liquor, or keeping any house where liquor of any kind is sold, and to disperse all unlawful assemblages of free negroes, slaves, or mulattoes.

"The Chief of Police is further ordered to arrest all persons keeping *public gambling-houses* or *rooms* wherein gambling is allowed, for the purpose of bringing them to trial under the laws of this State and the ordinances of the city."

"OFFICE OF CHIEF OF POLICE.
"ST. LOUIS, MO., April 13, 1861.

"All night assemblages of negroes and mulattoes in this city, either for religious or other purposes, will hereafter be prohibited.

"By order of the Board of Commissioners.

"JAMES MCDONOUGH, *Chief of Police*."

"NOTICE TO FREE NEGROES AND MULATTOES.

"By order and direction of the president of the Police Commissioners of the city of St. Louis, I hereby notify all free negroes and mulattoes who have no license, or are not permitted by law to reside within this State, to leave the State forthwith; and all such who may be found in the city of St. Louis after the expiration of five days from the date of this notice will be arrested and dealt with according to law.

"JAMES MCDONOUGH, *Chief of Police*.

"April 12, 1861."

"OFFICE OF THE CHIEF OF POLICE.
"ST. LOUIS, April 15, 1861.

All negroes found in the street after the hour of ten o'clock without a proper pass will be arrested and brought before the recorder.

"JAMES MCDONOUGH, *Chief of Police*."

These various and rather stringent orders in relation to the colored people were as necessary, perhaps, for their protection as for the preservation of order. The "color line" was drawn very closely at that time of excitement and exasperation. But the Republicans naturally made capital out of these things, which they construed to mean fear of a servile outbreak. As Capt. Peckham has said in his highly colored memorial of Gen. Lyon, "The conspirators must have feared what the Republicans had entirely overlooked. No one of the Unionists thought at that time of re-

lying upon the three or four thousand negroes in the city for assistance in case of armed resistance. The idea of allowing Sambo to fight was a later development of the war."

The last of these police orders is as follows:

"OFFICE OF THE POLICE COMMISSIONERS
FOR THE CITY OF ST. LOUIS.

"April 24, 1861.

"In order that this board may have the means more effectually to suppress mobs or riots, and to protect the lives and property of the people, it has been deemed proper to call upon responsible citizens to form themselves into companies, elect officers, and perfect such an organization as will render them effective when their services may be required. It is recommended that two companies be formed in each ward and sworn into the service, to act under the orders of this board and of the Chief of Police.

"All companies so formed are requested to report at once at this office, where instructions more in detail will be furnished.

"J. A. BROWNLEE, *President*."

"NOTICE TO CITIZENS.—In consequence of the numerous burglaries which of late have been committed in our city, and which are almost nightly occurring, it is thought advisable to give the following notice in order to prevent crimes, if not detect the offenders.

"The police are instructed to stop all persons found on the streets or highways after the hour of 1 o'clock A.M., and respectfully inquire of them their residence, and if necessary to accompany them home. Persons not giving satisfactory answers, or against whom suspicion may be aroused, will at once be taken to the police office.

"JAMES MCDONOUGH, *Chief of Police*."

The conflict had fairly begun now. Every one admitted that it was war when Fort Sumter was fired upon. According to the Republican conception of things there had been war before that, conducted, as Frank Blair said, in his bitter and exasperating way, "by stealing empty forts and full treasuries." But now the appeal to arms had come from both sides. Which one would Missouri answer?

The President called for seventy-five thousand volunteers, and ordered persons in arms against the government to disband and go home. Missouri had her quota assigned to her, four regiments,—between three and four thousand men. Governor Jackson immediately telegraphed to Washington, upon reading the proclamation, that "Missouri would not furnish a single man to subjugate her sister States of the South." This language simply showed that a man may sometimes be a good politician without being a good prophet. The Secretary of War sent to Governor Jackson an estimate of Missouri's quota. He responded at once:

"EXECUTIVE DEPARTMENT OF MISSOURI,
"JEFFERSON CITY, April 17, 1861.

"To Hon. SIMON CAMERON, *Secretary of War, Washington City*:

"SIR,—Your dispatch of the 15th inst., making a call on Missouri for four regiments of men for immediate service, has been received. There can be, I apprehend, no doubt but these men are intended to form a part of the present army to make war upon the people of the seceded States. Your requisition, in my judgment, is illegal, unconstitutional, and revolutionary in its objects inhuman and diabolical, and cannot be complied with. Not one man will the State of Missouri furnish to carry on such an unholy crusade.

"C. F. JACKSON,
"*Governor of Missouri*."

Frank Blair returned to St. Louis on the day this answer was written, and learning its contents (it was published immediately), telegraphed at once to Washington that he would be able to furnish four regiments forthwith for active service, if an officer should be sent to muster them in. On the same day and the next (April 17th and 18th) Maj. Schaeffer and Col. John N. Pritchard, Surgeon Florence M. Cornyn and Adjt. John S. Cavender peremptorily resigned from the St. Louis State militia. In his letter of resignation Maj. Schaeffer used the following language:

"I cannot reconcile it with my ideas of military fealty and discipline that a part of your command has hoisted another flag than the only true flag of these United States."

This was pronounced by Gen. Frost to be "*conduct unworthy of an officer and a gentleman*," and that officer, in command of the First Military District of Missouri, ordered a court-martial to try the [illegible]. It may be interesting to know the names of the persons constituting the court. They were Col. Alton R. Easton, president of the court; Lieut.-Col. John Knapp, Lieut.-Col. John S. Bowen, Maj. James R. Shaler, Capt. Joseph Kelly, Capt. George W. Wes[illegible], Capt. William Wade, Capt. Martin Burke, Capt. Charles S. Rogers, Capt. William B. Hazeltine, Capt. Charles H. Frederick, Capt. Henry W. Williams, judge-advocate.

Maj. Schaeffer refused to acknowledge the order of arrest, and entering the army afterwards, was killed in command of a brigade at Murfreesboro'.

The letter of Surgeon Cornyn was couched in similar language. These resignations were followed by a general stampede of the active Union men of the rank and file; but there were still more, however, who continued in the State militia and paraded at Camp Jackson who afterwards did gallant service under the Federal colors.

The following correspondence shows that Governor Jackson did not treat overtures from the Confederates as curtly as he did the directions of the Federal government. The documents are official:

"MONTGOMERY, April 26, 1861.

"GOVERNOR C. F. JACKSON, *Jefferson City, M[illegible]*

"Can you arm and equip one regiment of infantry for service in Virginia, to rendezvous at Richmond? Transportation

will be provided by this government. The regiment to elect its own officers, and must enlist for not less than twelve months, unless sooner discharged.

"L. P. WALKER."

"EXECUTIVE DEPARTMENT,
"JEFFERSON CITY, Mo., May 6, 1861.

"HON. L. P. WALKER, *Secretary of War, Montgomery:*

"SIR.—Yours of 26th ultimo *via* Louisville is received. I have no legal authority to furnish the men you desire. Missouri, you know, is yet under the tyranny of Lincoln's government, so far at least as forms go. We are wofully deficient here in arms, and cannot furnish them at present; but so far as men are concerned, we have plenty of them ready, willing, and anxious to march at any moment to the defense of the South.

"Our Legislature has just met, and, I doubt not, will give me all necessary authority over the matter. If you can arm the men, they will go whenever wanted to any point where they may be most needed. I send this to Memphis by private hand, being afraid to trust our mails or telegraphs. Let me hear from you by the same means. Missouri can and will put one hundred thousand men in the field, if required. We are using every means to arm our people, and until we are better prepared must move cautiously. I write this in confusion. With my prayers for your success, I remain,

"Very respectfully,
"Your obedient servant,
"C. F. JACKSON,
"*Governor of Missouri.*"

On April 20th the arsenal at Liberty, Mo., was entered and plundered of the arms and ammunition gathered there, and it was supposed that an attempt would be made upon the St. Louis arsenal the next night. Every precaution was taken for its safety, and the Union volunteers in the city slept on their arms. Arrangements were made for mustering these volunteers into the regular service and arming them, and a part of them were admitted into the arsenal to provide for its defense. For the next few days there was such an intense state of excitement and so many apprehensions of violence on every side that even so fearless a man as Frank Blair sent his family out of town. He was at this time engaged in officering, arming, and equipping his four regiments and having them mustered into the service. The excitement was farther increased by the shipment of arms from the St. Louis arsenal to Kentucky, which was bitterly opposed by the Southern element.

On April 22d, Governor Jackson issued a proclamation summoning the Legislature to meet in the State Capitol on May 2d. At the same time an order was issued by him for the State militia to assemble in their respective military districts on May 3d and go into encampment for the period of six days, as allowed by law. The Governor also borrowed fifty thousand dollars of the banks to arm and equip the militia.

It is claimed, on the one hand, that this annual drill was ordered at that inopportune time for the purpose of forcing the secession of Missouri and capturing the arsenal; that it was an overt act, to which the capture of the camp was a proper retort in the sense of a defensive measure.

It is argued, on the other hand, that there was no occasion for interference with Camp Jackson; that the muster expired by limitation two days after the seizure of the camp; that the act, not warranted by the President's proclamation (under which Gen. Lyon claimed to act), was the wanton illicit act of an ambitious man, and its effect was to plunge Missouri into the civil war which all good citizens hoped might be kept beyond her borders.

We will simply state these two propositions. Nor will we argue the question of the policy or expediency of a military encampment of holiday soldiery at such a time. As to the *legality* of Camp Jackson there can be no doubt at all. There has never been any pretense even that it was an unlawful assemblage or an illegitimate muster. On this point the statement of Gen. Frost, prepared with great care and published in 1882 in the *Missouri Republican*, is accepted on all hands as substantially accurate and complete. He says,—

"Camp Jackson was formed under and in accordance with the requirements of a bill framed in 1855, with the assistance of the Hon. B. Gratz Brown, by the person who commanded the camp, and which became a law, after many vicissitudes, in 1858.

"The measure was urged upon the Legislature during the years which intervened between its introduction and passage as one which, in view of the threatening relations between the North and South, the conservative views of the people seemed to demand.

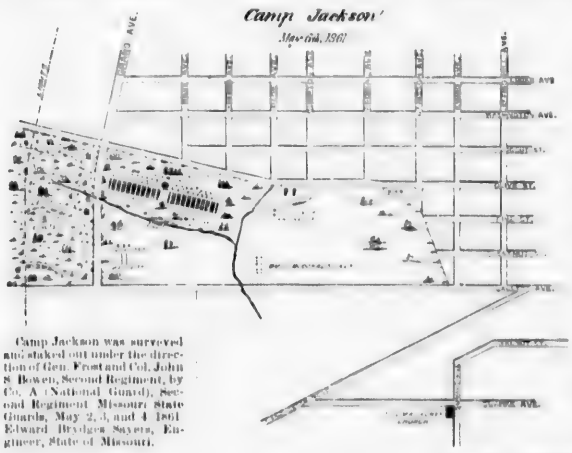
"Missouri, being a border State, would, in the event of hostilities between the sections, be among the first, as well as the greatest sufferer.

"Her people were also made up, in nearly equal proportions, from the North and the South, and for both these reasons an internecine strife threatened her with peculiar horrors.

"The law, then, was intended and regarded from its inception by its movers as a peace measure,—a measure which it was hoped and believed would be adopted by the other Border States, and thus enable them each to raise, organize, and discipline, under the Constitution of the United States, a militia force sufficient to command and enforce the peace between the hostile sections. But its power in Missouri for the main object had in view, viz., a large force, was destroyed by the refusal of pecuniary aid from the State, and all that remained of its value was that it gave to the patriotic citizen-volunteer the poor privilege of regarding himself as a soldier of the State, with a State law to govern him, whilst he gave his own time to instruction, and his own money to his equipment.

"Such, then, was the origin and truly patriotic intention of the law under which Camp Jackson was held."

And Gen. Frost adds,—



"In order to a better comprehension of the Camp Jackson question, it is considered necessary to say something of its precursor, Camp Lewis. By a provision of the law of 1858 an

encampment was required to be held annually in each military district, whenever there should be a certain number of uniformed companies mustered into service in that district.

"Under the stimulus given by the new act to military enterprise, a sufficient number of companies had been organized and mustered into the service of the State in the First Military District (embracing the city and county of St. Louis) to call for a brigade formation within a few months after its enactment. A brigadier-general was accordingly chosen by those companies, and commissioned as such by Governor Robert M. Stewart on the 23d day of August of that year. During the next year means were found to purchase the requisite camp equipage, and the advent of 1860 found the militia of the district ready and anxious to enter upon the varied and pleasant duties of camp life.

"The 'St. Louis Agricultural and Mechanical Fair Association' tendered the use of their beautiful grounds in the suburbs of the city, and there the first encampment of Missouri militia was pitched, and was named Camp Lewis, in honor of the great explorer of the West, and there its varied duties were performed for the period limited by law. Many of the citizens of St. Louis will doubtless still remember the pleasure they enjoyed in witnessing its guard mountings, parades, and reviews. The elements of Camp Lewis were as varied as the nationalities and occupations of the citizens of the country.

"An event of some interest may be mentioned in connection with the German element. It was found that some of them could not comprehend the word of command and the method of execution as given in the tactics, and to cure that difficulty it was proposed by Capt. Chris. Stifel, commander of a cavalry company, that a synopsis of them should be prepared and printed in the German language, and at the same time be suggested Mr. Franz Sigel (then a school-teacher) as a person quite competent for the work. He was accordingly employed upon it, and gave full satisfaction.

Camp Jackson was surveyed and staked out under the direction of Gen. Frost and Col. John S. Bowen, Second Regiment, by Co. A (National Guard), Second Regiment Missouri State Guards, May 2, 3, and 4 1861 Edward Bridges Sayers, Engineer, State of Missouri.

"Thus did that subsequently distinguished general render his first service to his adopted country by facilitating the instruction of the troops of Camp Lewis, the precursor of Camp Jackson.

"The existence of Camp Lewis having left none but pleasant memories to the inhabitants of the city, its successor of the following year was looked forward to as a desirable event."

Gen. Frost further claims that

"the Missouri Convention had been elected, and a majority of eighty thousand for the Union candidates showed that at least three-fourths of the people were in favor of preserving their relations with the Federal Union. The convention had met, and by its first resolution declared with but a single dissenting vote against secession."

But he is in error in contending that in consequence of this there was "a benignant calm" prevailing at the time of the issuance of the order for this encampment. We have shown the contrary.

The encampment was ordered under General Orders No. 7 of the adjutant-general of the State. There was a large and cheerful turnout. The tents were pitched in Lindell Grove, now the Fair Grounds, a wooded valley near the intersection of Olive Street with Grand Avenue. Gen. Frost's narative says:—

"This point was chosen in preference because of the existence of a street railway leading towards it, which afforded facilities for citizens to visit the camp, and the denizens of the camp to visit their homes from time to time and give at least necessary attention to their various professions, business, and trades.

"It was named Camp Jackson, in honor of the governor of the State, who, though he afterwards died in exile, was the probably the most popular Governor the State had had.

"The first duty performed in the camp was the hoisting of the United States flag to the tall centre-pole of the commanding officer's tent, from which it continued to wave its graceful folds until it was captured, pulled down, and carried off in triumph by the captors of the camp.

"Having thus installed the flag of the United States in the place of honor, the flag of Missouri in a subordinate position, the military duties of the camp were entered upon with the regularity and precision that had characterized those of its predecessor, 'Camp Lewis,' and as its predecessor, it at once became a popular and fashionable resort of citizens of all ages, classes, and conditions of society who thronged its shady avenues all the day and into the night, until the last lingering beat of the 'tattoo' warned them to retire.

"Thus happily passed the hours and days of that ill-fated camp. Its every feeling hoped for and expected as undesirable incident of its existence was just developing into maturity between its members, and continued to increase until the premature and violent closing on Friday the 10th of May."

The camp, in fact, was begun on May 3d, Friday, when the lines were traced. It was laid out according to military rules and some of the avenues were named by the officers after men prominent in the cause of the Southern Confederacy, as Beauregard, Jefferson Davis, Lovell. The following is the organization of the camp as given in Peckham's "Memorial of Gen. Lyon

ORGANIZATION OF STATE TROOPS AT CAMP JACKSON, MAY 3, 1861.

"Brig.-Gen. D. M. Frost, commanding; Lieut.-Col. R. S. Voorhies, adjutant-general; Maj. N. Wall, commissary; Maj. Henry W. Williams, quartermaster; Joseph Scott, M.D., surgeon; Maj. William D. Wood, aide-de-camp.

"FIRST REGIMENT.—Lieut.-Col. John Knapp, commanding; Capt. N. Hatch, A. Q. M. and A. C. S.; Capt. John B. Drew, paymaster; Lieut. W. C. Buchanan, adjutant; A. J. P. Garesche, judge-advocate; Louis T. Pimm, M.D., surgeon.

"*Company A, St. Louis Grays.*—Martin Burke, captain; Stephen O. Colman, first lieutenant; H. B. Belt, second lieutenant; R. N. Leonori, third lieutenant. Fifty-one rank and file.

"*Company B, Sarsfield Guards.*—Charles W. Rodgers, captain; Thomas Curley, first lieutenant (absent on Southwestern expedition); Hugh McDermott, second lieutenant. Forty-six rank and file.

"*Company C, Washington Guards.*—Robert Tucker, first lieutenant (commanding); Thomas Moylan, second lieutenant; Cornelius Heffernan, third lieutenant. Forty-eight rank and file.

"*Company D, Emmet Guards.*—Philip W. Coyne, captain.

"*Company E, Washington Blues.*—Joseph Kelly, captain; J. M. Furbar, second lieutenant. Forty-five rank and file.

"*Company F, Laclede Guards.*—Fraser, captain.

"*Company G, Missouri Guards.*—George W. West, captain.

"*Company H, Jackson Guards.*—George W. Fletcher, captain; J. M. Henning, first lieutenant; William Morony, second lieutenant; John Bullock, third lieutenant. Forty six rank and file.

"*Company I, Grimsley Guards* (organized Thursday night, May 2, 1861).—R. N. Hart, captain; Thomas Keith, first lieutenant; R. C. Finney, second lieutenant; John Gross, third lieutenant. Forty eight rank and file.

"*Company K, Davis Guard.*—James Longuemare, captain; I. Kretschmar, first lieutenant; A. Hopton, second lieutenant; Louis Ladue, third lieutenant. Sixty-five rank and file.

"*Company G, Dixie Guards* (*Minute-Men*).—Campbell, captain. Forty eight rank and file.

"*Company H, Southern Guards* (*Minute Men*).—J. H. Shacklford, captain. Forty-five rank and file.

"*Company I, Carondelet Rangers.*—James M. Loughborough, captain. Fifty rank and file."

Col. Peckham says,—

"The State law, under the old militia bill, authorized the annual existence of such a camp as this in each military district for six days. Since Jackson had issued his order for this gathering of the militia the Legislature had organized, and every indication pointed to a speedy adoption of the new military bill. It was expected to continue the camp under the provisions of the latter. The design of the conspirators was to fill Camp Jackson with secessionists from the interior of the State, and such were constantly arriving after the formation of the camp. By Thursday and Friday, so numerous were the arrivals, that it was contemplated forming a third regiment."

Several of these statements do not appear to have any authority, and some of them seem to have proceeded principally from the writer's imagination.

But this which follows from the same source can be corroborated:

"On Wednesday night, May 8th, the steamer 'J. C. Swon,' just from New Orleans, loaded with arms, cannon, and ammunition from the arsenal at Baton Rouge, La. (which the traitors had surprised and captured from the United States government), discharged her freight at the Levee at St. Louis. The material above described, which had been obtained through the agency of Colton Greene, acting as an agent of Claib Jackson, from the rebel authorities of the seceded States, was that same night removed to Camp Jackson. It is stated that from fifty to one hundred dray-loads were included in this murderous freight. Greene saw the goods safely lodged inside the camp, and on the morning of the 10th of May, accompanied by a company from the camp, he proceeded on the cars to Jefferson City with some of the stolen munitions of war.

"Lyon was cognizant of the whole proceeding, and had a strong notion to seize the boat at the Levee before she could unload; but after conversing with Mr. Blair, he agreed with the latter, and concluded to allow the material to be received in the camp, thus furnishing additional evidence of the treasonable nature of the camp. The Safety Committee met at the same time, and were strongly urged to seize the property before it could be taken to Lindell Grove, but they also agreed with the plan adopted by Lyon. The latter had already designed capturing the whole camp, but the opposition of a majority of the Safety Committee, upon a merely legal point, caused him to delay the movement. He now felt it his duty to act."

The Committee of Safety, and especially those agreeing with Mr. Glover, took a legal view of the case: The camp would end soon. It was a lawful assembly. It did not constitute a real menace to the arsenal. It would cause great excitement to attack it. But Lyon resolved that he would not take the lawyer's but the military man's view of it. He thought compulsion should be used to make the Southern sympathizers acknowledge the authority of the Federal government. He looked upon the camp's existence as an intimidation of Union men. He was therefore very eager to get Col. Blair to use his influence with the Safety Committee, without whose sanction he could accomplish nothing. This was effected by informing the committee that Gen. Harney would arrive and resume his command on Sunday. When he heard that even Mr. Glover consented to act, and Lyon began his preparations forthwith.

Gen. Frost knew or feared that his camp would be attacked by the forces under Gen. Lyon, which also he knew he had no means of effectively resisting. Lyon had arranged to capture the camp on the morning of the 10th. On that morning Frost wrote to Lyon. As he says in his narrative,—

"Having known Capt. Lyon from the period of his cadetship at West Point in 1840, the commander of the camp believed him to be possessed of a fair proportion of good sense, and of that conservative patriotism that long military service begets, and as neither good sense nor patriotism could prompt an attack upon his camp, he did not believe he would make it, and it was not until early on the morning of the 10th that a private communication from a friend in the councils of the conspirators undeceived him, and he was forced to the conclusion that Lyon, too, had been stricken by the more than midsummer madness that seemed to afflict the whole community. Nevertheless he determined to make a last effort to avert from his State the horrors of anarchy and civil war, which he foresaw the capture of his camp would necessarily invoke. Therefore he hastily penned the following letter:

"'HEADQUARTERS CAMP JACKSON,
"'MISSOURI MILITIA, May 10, 1861.

"'CAPT. N. LYON, *commanding U. S. Troops in and about St. Louis Arsenal:*

"'SIR,—I am constantly in receipt of information that you contemplate an attack upon my camp. Whilst I understand that you are impressed with the idea that an attack upon the arsenal and United States troops is intended on the part of the militia of Missouri, I am greatly at a loss to know what could justify you in attacking citizens of the United States who are in the lawful performance of duties devolving upon them under the Constitution in organizing and instructing the militia of the State, in obedience to her laws, and therefore have been disposed to doubt the correctness of the information I have received.

"'I would be glad to know from you personally whether there is any truth in the statements that are constantly pouring into my ears. So far as regards any hostility being intended towards the United States or its property or representatives by any portion of my command, or, as far as I can learn (and I think I am fully informed), of any other part of the State forces, I can positively say that the idea has never been entertained. On the contrary, prior to your taking command of the arsenal I proffered to Maj. Bell, then in command of the very few troops constituting its guard, the services of myself and all my command, and if necessary the whole power of the State to protect the United States in the full possession of all their property. Upon Gen. Harney taking command of this department I made the same proffer of services to him, and authorized his adjutant-general, Capt. Williams, to communicate the fact that such had been done to the War Department. I have had no occasion since to change any of the views I entertained at that time, neither of my own volition nor through orders of my constitutional commander.

"'I trust that, after this explicit statement, we may be able by fully understanding each other to keep far from our borders the misfortunes which so unhappily afflict our common country. This communication will be handed to you by Col. Bowen, my chief of staff, who will be able to explain anything not set forth in the foregoing. I am, sir,

"'Very respectfully,
"'Your obedient servant,
"'D. M. FROST,
"'*Brigadier-General Commanding Camp Jackson.*'

"This letter was dispatched by the hands of Col. John S. Bowen, at about eleven o'clock A.M. Soon after midday he returned with it, and reported that he had proffered it to Capt. Lyon, who had refused to receive it. He also reported that he had found Lyon mustering his forces, with the evident intention of at once leaving the arsenal. There could no longer be any doubt as to his intention of marching upon the camp, and the question of how he was to be met was considered. The encampment having been formed for instruction alone and not for war, no more than five rounds of ammunition had been supplied, and that only for the uses of the guard. Resistance, therefore, being out of the question, nothing remained but to calmly await events. In the mean time the same gentleman who had a few hours before given the first authentic information of Lyon's intentions returned in haste to say that he was on the march, but that he intended no act of immediate hostility, that he was advancing merely as a *posse comitatus* to the United States marshal, who was coming to make a formal demand for a body of arms believed to belong to the United States, and which had been deposited on the evening of the 8th in the camp."

Lyon, in fact, had resolved to capture the camp, as well as the contraband material in it, the soldiers as well as the equipments. His force was ample. He had five regiments of Missouri volunteers and five regiments of "Home Guards," then called the "United States Reserve Corps." He had several companies of the old "Citizen's Guard," organized in January, and five or six companies (nearly four hundred men) of United States regular troops, with abundant supplies of artillery, arms, and ammunition.

For the capture of Camp Jackson Gen. Lyon had made elaborate preparations. All the orders were given out, every colonel instructed, and every detail arranged.

In order to secure his "mounts," says Col. Peckham, "on the 9th of May, some time previous to his visit to Camp Jackson, Capt. Lyon dispatched Lieut. Thurneck with a note to Giles F. Filley, requesting that gentleman to procure and send to him at the arsenal by four o'clock P.M. thirty-six horses. Mr. Filley called at once upon Mr. James Harkness (Glasgow & Harkness) for assistance in purchasing the horses. Twenty-two were purchased at the stables of Messrs. Glasgow & Harkness and forwarded by Lieut. Thurneck to the arsenal, while Messrs. Filley and Harkness visited other places in order to secure the balance of the desired number. Enough were bought to make up, with some few which were loaned by Union citizens, to fill the order; and Giles F. Filley and O. D. Filley signed their names as securities to Mr. Harkness for their payment." Lyon in this matter disregarded army regulations because of his personal distrust of Maj. McKinstry, the department chief quartermaster.

The regiments selected by Lyon for the march and assault were the First, Second, Third, and Fourth

Missouri Volunteers and the Third and Fourth Home Guards. The other troops, with the regulars, were left at the arsenal to do guard duty. A few of the regulars, under Maj. Sweeney, acting as brigade commander, marched at the front of Col. Blair's regiment, which approached Camp Jackson by way of Laclede Avenue; Col. Boernstein's regiment marched up Pine Street, Col. Schüttner's up Market Street, Col. Sigel's up Olive Street, Col. Brown's up Morgan Street, and Col. McNeil's up Clark Avenue. In this way the camp would be surrounded, while six field-pieces were planted on adjacent heights so as to command the camp. Lyon marched at the head of the battalion of regulars. The marching was timed so that the heads of the different columns converged at their destination almost simultaneously. As was naturally to be expected, great excitement was the result of these unusual military movements.

In a contemporary account, written fresh from the scene for use in a newspaper the following morning, and thus not biased by any after-thoughts, we read:

"Unusual, and to some extent alarming, activity prevailed early yesterday morning at each rendezvous of the "Home Guard" and in the vicinity of the arsenal. The men recently provided with arms from the arsenal to the number of several thousand were ordered, we understand, to be at their different posts at twelve o'clock, in readiness to march as they might be commanded. A report gained some currency that Gen. Harney was expected on the afternoon train, and that the troops were to cross the river to receive him and escort him to the city. Very little reliance, however, was placed in this explanation of the military movements, and at about two o'clock P.M. the whole town became greatly agitated upon the circulation of the intelligence that some five or six thousand men were marching up Market Street, under arms, in the direction of Camp Jackson. The news proved to be correct, except as to the number, and in this case the report rather underestimated the extent of the force. According to our best information there were probably not less than seven thousand men, under Capt. Lyon commanding the United States troops at this post), with about twenty pieces of artillery.

"The troops, as stated above, marched at quick time up Market Street, and on arriving near Camp Jackson rapidly surrounded it, planting batteries upon all the heights overlooking the camp. Long files of men were stationed in platoons at various points on every side, and a picket-guard established covering an area of say two hundred yards. The guards, with fixed bayonets and muskets at half cock, were instructed to allow none to pass or repass within the limits thus taken up.

"By this time an immense crowd of people had assembled in the vicinity, having gone thither in carriages, buggies, rail-cars, baggage-wagons, on horseback, and on foot. Numbers of men seized rifles, shot-guns, or whatever other weapons they could lay hands upon and rushed pell-mell to the assistance of the State troops, but were, of course, obstructed in their designs. The hills, of which there are a number in the neighborhood, were literally black with people, hundreds of ladies and children stationing themselves with the throng, but, as they thought, out of harm's way."

When his dispositions were fully made, Gen. Lyon sent Maj. B. G. Farrar to Gen. Frost with the note which follows:

"HEADQUARTERS UNITED STATES TROOPS,
"ST. LOUIS, MO., May 10, 1861.

"GEN. D. M. FROST, *commanding Camp Jackson:*

"SIR,—Your command is regarded as evidently hostile to the government of the United States.

"It is for the most part made up of those secessionists who have openly avowed their hostility to the general government, and have been plotting at the seizure of its property and the overthrow of its authority. You are openly in communication with the so-called Southern Confederacy, which is now at war with the United States; and you are receiving at your camp from said Confederacy and under its flag large supplies of the material of war, most of which is known to be the property of the United States. These extraordinary preparations plainly indicate none other than the well-known purpose of the Governor of this State, under whose orders you are acting, and whose purpose, recently communicated to the Legislature, has just been responded to in the most unparalleled legislation, having in direct view hostilities to the general government and co operation with its enemies.

"In view of these considerations, and of your failure to disperse in obedience to the proclamation of the President, and of the eminent necessities of State policy and welfare, and the obligations imposed upon me by instructions from Washington, it is my duty to demand, and I do hereby demand of you, an immediate surrender of your command, with no other conditions than that all persons surrendering under this demand shall be humanely and kindly treated. Believing myself prepared to enforce this demand, one-half hour's time before doing so will be allowed for your compliance therewith.

"Very respectfully,
"Your obedient servant,
"N. LYON,
"*Captain Second United States Infantry, Commanding Troops.*"

Gen. Frost then had, he says, six hundred and thirty-five militia on duty in the camp. The newspaper account goes on to say that "immediately upon the receipt of Gen. Lyon's letter, Gen. Frost called a hasty consultation of the officers of his staff. The conclusion arrived at was about as follows: The brigade was in no condition to make resistance to a force so numerically superior; with but a few field-pieces

of small calibre, and with less than a dozen rounds of cartridges for his command, a battle must necessarily be of short duration and of but one result,—the total rout and defeat of the State troops; to have withstood an attack would have been sheer recklessness and cruelty to the men of Gen. Frost's command; in short, the brigade was not by any means in a war condition. Gen. Frost stated, moreover, that he had no war to wage upon the United States or its troops; that he was only acting in cheerful obedience to the orders of his superior officer, and in compliance with the laws of the State; that he had anticipated no conflict, and would not willingly jeopardize the lives of his men in anything that might be construed into hostility to the United States government. 'Only one course was to be pursued, and that was quickly agreed upon, viz., a surrender."

Gen. Frost, in his narrative, says,—

"The events following the demand above recited may be briefly stated as follows: A hasty council of the chief officers was called, the demand read to them, and their opinion asked for. A moment's consideration of our hopelessly defenseless condition was sufficient to elicit a unanimous vote to surrender, and reply was made accordingly in the following words, to wit:

"'CAMP JACKSON, Mo., May 10, 1861.

"'Capt. N. LYON, *Commanding U. S. Troops.*

"'SIR.—I never for a moment conceived the idea that so illegal and unconstitutional a demand as I have just received from you would be made by an officer of the United States army.

"'I am wholly unprepared to defend my command from this unwarranted attack, and shall therefore be forced to comply with your demand. I am, sir, very respectfully,

"'Your obedient servant,

"'D. M. FROST,

"'*Brig.-Gen. Comdg. Camp Jackson, M. V. M.*'"

The contemporary account proceeds: "The demand of Capt. Lyon was accordingly agreed to. The State troops were therefore made prisoners of war, but an offer was made to release them on condition that they would take an oath to support the Constitution of the United States, and would swear not to take up arms against the government. These terms were made known to the several commands, and the opportunity given to all who might feel disposed to accede to them to do so. Some eight or ten men signified their willingness, but the remainder, about eight hundred, preferred, under the circumstances, to become prisoners. (A number of the troops were absent from the camp in the city on leave.) Those who declined to take the prescribed oath said that they had already sworn allegiance to the United States and to defend the government, and to repeat it now would be to admit that they had been in rebellion, which they would not concede.

"The preparations for the surrender and for marching as prisoners, under the escort of the arsenal troops, occupied an hour or two. The brigade was then formed in line, headed by Gen. Frost and his staff on horseback, and with colors flying and drums beating marched through the wood skirting the road up to an opening that had been made in the fence near the turnpike. Here a halt was ordered for some reason, and the opportunity was improved by a large crowd of excited citizens to draw near the officers of the staff and salute them with cheers. The men appeared dejected and rather sad, but evidently were not conscious of having done anything cowardly. One of the officers achieved a volley of deafening huzzas by riding up to a fence and hacking away at it with his sword, breaking and bending it so as to render it useless. It was a very handsome sword, costing one hundred dollars, and was a recent present from some military friends. This example was followed by others amidst shouts of applause."

Gen. Frost's narrative is clearer and more graphic. He says,—

"Orders were at once sent to the companies (still engaged at their military exercises) to march to their camp grounds, stack their arms, and form into line by battalions. These orders having been executed, Capt. Thos. W. Sweeny, with his regulars, was sent forward by Capt. Lyon to take possession of the camp and its property, public and private, whilst Lieut. John M. Schofield, of the regulars, was delegated to conduct the prisoners out of the camp on their way to imprisonment in the arsenal. Preparatory to departure from the camp, the prisoners had been formed into line, facing to the right flank, with the First Regiment leading, closely followed by the Second, and in this order they were closed up, so that the leading files had passed out at the northeast corner of the camp-ground, at which point the fence had been torn down to admit of egress upon the road, and proceeded about a block and a half along Olive Street towards the city. Then a halt was ordered, and the prisoners kept standing in their ranks, unarmed of course, and in a line nearly parallel with the Olive Street road, and at a distance varying from a few feet to perhaps seventy yards therefrom. The road itself was occupied by a portion of Lyon's command, drawn up in open battle facing the line of prisoners, and extending both east and west far beyond the extremities of that line. Lieut. Schofield, a thorough soldier and polished gentleman, having fulfilled his orders in thus placing the prisoners, remained beside the late camp commander, who, surrounded by his mounted staff, formed a small cavalcade at the head of the column. In this position the troops and prisoners were held stationary for a long time, probably two or three hours, whilst an anxious consultation seemed to be in progress between the leading captors.

"By the terms of the surrender officers were permitted to retain their side-arms,—*i.e.*, their swords; but whilst the prisoners were held at a halt in front of Lyon's troops, a German officer came down the line demanding the swords of all officers, and claiming to act by order of Capt. Lyon. When he made this demand, Col. Knapp, of the First Regiment,—that officer wore at his side a valuable weapon that had been presented to him by his command,—finding remonstance against its seizure of no avail, determined to break rather than surrender it into the

hands of captors who, by even making the demand, violated their honor. He accordingly broke the blade over a fence-post, thus preventing the weapon, especially valued as a memento, from being seized as a trophy in violation of the assurance previously given not to take their swords from the officers of the command. This act directed attention to what the German officer was doing, and immediately after it all swords that almost had been taken were restored to their owners by the orders of Lieut. Schofield, who had been reminded of the terms of surrender by the camp commander.

"In the mean time hordes of men, women, and children, hearing of the movement of Lyon's force, came flocking after it and filled all the avenues of the camp, crowding around the prisoners, and filling the narrow space that separated them from the troops occupying the Olive Street road. As all St. Louis was excited to madness that day, the natural result of so long a halt in the midst of a furious multitude soon showed itself. Injurious and insulting remarks were hurled from the crowd against Lyon's troops. Their military appearance was criticised and ridiculed. Still the fatal halt (which has never been explained) was maintained, whilst the wild excitement of the unthinking crowd and the animosity of the raw, undisciplined troops were rapidly increasing."

Col. Peckham says that "Capt. C. Blandowski, of Company F (Third Missouri Volunteers), had been ordered with his company to guard the western gateway leading into the camp. The surrendered troops had passed out and were standing passively between the inclosing lines on the road, when a crowd of disunionists began hostile demonstrations against Company F. At first these demonstrations consisted only of vulgar epithets and the most abusive language; but the crowd, encouraged by the forbearance and the silence of the Federal soldiers, began hurling rocks, brickbats, and other missiles at the faithful company. Notwithstanding several of the company were seriously hurt by these missiles, each man remained in line, which so emboldened the crowd that they discharged pistols at the soldiers, at the same time yelling and daring the latter to fight."

Then ensued a dreadful scene. The troops fired with fatal effect. Many were killed and wounded, and a feeling of bitter hostility engendered which before it could be allayed desolated half the State of Missouri with fire and sword, and deluged it in the blood of its best and bravest citizens.[1]

Col. Peckham says, "Not until one of his men was shot dead, several severely wounded, and himself shot in the leg did the captain (Blandowski) feel it his duty to retaliate, and as he fell he commanded his men to fire. The order was obeyed, and the multitude fell back, leaving upon the grass-covered mound some twenty of their number dead or dying. Some fifteen were instantly killed, and several others died within an hour. Several of Sigel's men were wounded and two killed."

Among the wounded were Dr. Roepke, Thomas Meek, John J. Weigart, Michael Davy, Mr. Chapman, Jerome Downey, W. L. Carroll, John Rice, C. Wilson, John Scherer, Fred. D. Allen, Mr. Bradford, John Matthews. Numbers of the wounded were not officially reported. Capt. Lyon, in his own report of the disturbance, says,—

"The first firing was some half-dozen shots near the head of the column, composed of the First Regiment, which was guarding the prisoners. It occurred in this wise: The artillery were stationed upon the bluff northeast of Camp Jackson, with their pieces bearing on the camp. The men of this command were most insultingly treated by the mob with the foulest epithets, were pushed, struck, and pelted with stones and dirt. All this was patiently borne until one of the mob discharged a revolver at the men. At this they fired, but not more than six shots, which were sufficient to disperse that portion of the mob. None of the First Regiment (Col. Blair's) fired, although continually and shamefully abused by both prisoners and the mob. The second and most destructive firing was from the rear of the column guarding the prisoners. The mob at the point intervening between Camp Jackson and the rear of the column, and in fact on all sides, were very abusive; and one of them, on being

her face cold and white from the sudden touch of death. We counted fifteen dead persons, and half as many wounded lying around. The only bodies recognized last night were those of Walter McDowell, living on Elizabeth Street, killed by a shot in the temple; Emily Sommers, a girl of fourteen, whose parents live on Carr and Seventeenth Streets; Thomas A. Haren, residence on Sixth Street above O'Fallon; and Nicholas Knobloch, an artilleryman. A son of Capt. Andrew Icenhower was killed by a gunshot in the chest. A man named Carl, a Mrs. McCauliff, and a mechanic at the Pacific Machine-Shop, Christian Dean, were recognized after being taken to the dead-house.

"The wounded who were unable to be moved were suitably cared for on the grounds. Mr. Claiborne Wilson was wounded in the thigh, the ball entering through his coat pocket, and forcing a handkerchief with it into his body. Dr. Roepke, living at Eleventh and Madison Streets, was wounded in the side. Trueman Wright received two balls in the hip. Frank Dallen, living on Spruce Street, between Sixth and Seventh, was wounded in the leg. Denis Keliher injured in the same manner. These were all the names that could be learned at the time, owing to the removal of the injured by their friends. The most of the people exposed to the fire of the soldiers were citizens, with their wives and children, who were merely spectators and took no part in the demonstration whatever. As night closed in and hid the ghastly horrors of the scene, a German regiment took possession of the bloodstained camp and the tents of the State soldiers."

[1] An eye-witness, who went over the camp immediately after it was captured, says, after the firing began, men, women, and children were beheld running wild and frantically from the scene. "Many while running were suddenly struck to the ground, and the wounded and dying made the late beautiful field look like a battle-ground. We went over the ground immediately after the occurrence, and a more fearful and ghastly sight is seldom seen. Men lay gasping in the agony of death, and staining the green grass with their blood as it flowed from their wounds. Children of eight or ten years of age were pale and motionless, as if asleep under the trees, and women cried in pain as they laid upon the ground. One, a girl of fourteen, presented a mournful picture as she reclined against a stump,

expostulated with, became very belligerent, drew his revolver and fired at Lieut. Saxton. The man who commenced the firing, preparatory to a fourth shot, laid his pistol across his arm, and was taking deliberate aim at Lieut. Saxton, when he was thrust through with a bayonet, and fired upon at the same time, being killed instantly.

"Here, the column of troops having received the order to march, Lieut. Saxton's command passed on, and a company in his rear became the object of a furious attack from the mob. After several of them were shot they came to a halt and fired with fatal effect. The mob in retreating from both sides of the line returned the fire, and the troops replied again.

"The sad results are much to be lamented. The killing of innocent men, women, and children is deplorable. There was no intention to fire upon peaceable citizens. The regular troops were over in the camp, beyond the mob, and in range of the firing. The troops manifested every forbearance, and at last discharged their guns, simply obeying the impulse, natural to us all, of self-defense.

"If innocent men, women, and children, whose curiosity placed them in a dangerous position, suffered with the guilty, it is no fault of the troops."

Gen. Frost's narrative of the occurrence is as follows:

"Suddenly, and without warning, some shots of musketry were delivered at the head of the column of prisoners of Col. Knapp's regiment, followed almost immediately by volley after volley, extending in regular succession down the line of Lyon's troops from east to west, until apparently every regiment had thus 'fired by company.' The regularity and precision of the firing indicated beyond question that it was done [illegible] order each captain repeating the command of his predecessor.

"In an official statement of this affair, authorized by N. Lyon (Peckham, page 154), will be found these words: 'After several of them were shot they came to a halt and fired with fatal effect. The mob in retreating from both sides of the lines returned the fire, and the troops replied again. The command was then given by Gen. Lyon to cease firing, and the order was promptly obeyed,' etc. . . . As the technical command to 'cease firing' was so promptly obeyed, the order to 'commence firing' may very properly be assumed to have preceded it.

"But again in the paper above referred to will be found these words, 'There was no intention to fire upon peaceable citizens.' The intention to fire upon the prisoners of war is therefore to be inferred from Capt. Lyon's own statement. Certainly he does not deny the intention nor its execution.

"The observations of the commander of the camp led him to believe at the time, and he still believes, that the firing was stopped by Lieut. Schofield, who, being reproached for allowing unarmed prisoners of war to be murdered, galloped rapidly in the direction of the firing, which ceased only when he reached the scene of it.

"The reputed sins of Camp Jackson having now been avenged in the blood of fifteen citizens and prisoners dead upon the ground, including a babe in its mother's arms, and (at the usual computation of five to one) at least seventy-five more wounded, many of whom afterward died, the extraordinary halt before referred to was quickly broken and the prisoners were rapidly marched between two regiments to their prison in the arsenal, where they arrived at dusk. The rank and file were all huddled together in a single empty store-room, capable only of holding them when standing close together, and exit from which for any purpose whatever was prevented by armed guards. A movement was inaugurated by Lyon, as soon as the prisoners were safely secured, looking towards getting happily rid of captives whom he had no law, civil or military [illegible] as such.

"To that end a proposition was made that they [illegible] their parole not to bear arms against the United States [illegible] that be released. In reply to this it was asserted [illegible] such parole would leave the inference that there was [illegible] tification for their capture, and it was at once refused [illegible]

"They were accordingly rigidly confined to their [illegible] kept standing all night (because there was not room [illegible] even if the filth which covered the floor had permitted [illegible] Thus were the rank and file of the prisoners held for [illegible] hours almost without food or water or light, in order [illegible] come their obstinate determination to refuse to be paroled [illegible] to promise not to serve against a government which they [illegible] already sworn to support.

"At the end of that time the persuasive eloquence [illegible] prison-house had removed all hesitancy as to the manner of getting out of it, which to most of them had become a matter of life or death, and so on the evening of the 11th the parole was given and they were discharged.

"The commissioned officers, thanks to Capts. Totten, Saxton, Sweeny, Schofield, and others of the regulars, were as well treated as the circumstances of their captors permitted. They shared with them their rooms, their provisions, and their beds as far as they would go, and but for the armed sentinels at the doors they might have fancied themselves, although rather numerous, still honored guests."[1]

[1] An event of this exciting and deplorable character always leads to much confusion of statements. In the case of Camp Jackson there was a coroner's inquest, and a good many facts also came out from eye-witnesses. Below we give a summary of such of these things as seem worthy to be preserved, and constitute part of the "record" which the future historian will need in order to form his own judgment.

Capt. West's Report (*Missouri Republican*, May 14th).

"MR. PASCHALL,—In compliance with my note of this morning, I herewith submit a statement, upon honor, of what actually occur on the right of the command, where the first firing took place, in answer to the statement furnished to Capt. Lyon, as published in the *Democrat* of the 13th inst.

"We had been marched out of camp at the head of the [illegible] Regiment, and were halted on Olive Street, with a [illegible] pany in the centre of our company, on the north side of Olive, and immediately opposite to a brick dwelling with a wooden front, and distanced two hundred and fifty yards from the terminus of the Olive Street Railroad. On the hill above mentioned was posted a body of men with muskets, three [illegible] four deep, and commanded by a German, who was addressed as major. The artillery were stationed in the rear of the hill, in a more elevated position. The first firing took place on the hill, and not among the artillery, as stated in Capt Lyon's report to the *Democrat*.

"The west front of this hill was graded to the [illegible] street, and on the level space in front of it was congregated a number of men, women, and children, who, together with the crowd in the rear of this column of troops, were heaping on them a great amount of wordy insult, but not [illegible] was [illegible]

"The officer in command swore that if they did [illegible] would make them, and the crowd answered by a howl, and ordered his men to charge bayonets and [illegible] loading.

"His order was obeyed, and whilst the crowd [illegible] and children were fleeing before the bayonets [illegible] them, not six, but at least twenty or thirty [illegible]

"I immediately cried to him to stop his men from killing defenceless men and women, and added that he was neither an officer nor a soldier to have given such a command. He ordered his men back to the ranks, and turning to me, denied having given the order to fire. I replied that the order to charge was equally criminal. I then looked up and down the line in the hope of seeing some officer whom I knew, and perceiving Capt. John S. Cavender, requested him to approach. He came within the lines, when I told him that if he possessed any feelings of humanity to report that officer, and have his men arrested for firing upon a retreating crowd. He replied that he would attend to it, and started in search of Capt. Lyon, returning in a few moments with him.

"An inspection of arms was at once ordered, and *whilst* it was taking place Capt. Lyon, finding that they had fired without orders, commanded the officer to march his men off the ground and report himself and them under arrest.

"I would add that when their commander fired on the crowd, the escort on each side of my men cocked their pieces and brought them to bear upon us, and only came to a shoulder when I ordered them to throw up their muskets, adding, 'You infamous scoundrels, do you intend to fire upon unarmed prisoners?'

"GEORGE W. WEST.
"Captain Co. G, First Regiment M. V. M.

"P. S.—In addition, I will add that I have the sworn statement of twenty-five members of my company to the correctness of the account which I have given of this affair."

Capt. Saxton's Statement.

"ST. LOUIS, May 14, 1861.

"In consequence of some delay in the march of the column of which the battalion of regular soldiers under my command formed a part, my company was halted for a short time near the scene of the tragedy near Camp Jackson. At that point persons in the crowd became very insulting and abusive towards the soldiers under my command and myself, threatening to kill me: and subsequently, as I am credibly informed, shots were fired at myself, which, fortunately, did not take effect. One shot passed through Sergt. Hudson's cap. The regular soldiers displayed great coolness, and did not fire upon the mob; the only injury inflicted by them was to strike down with the bayonet a man who was taking deliberate aim with a pistol at Capt. Totten or myself. I was marching my company onward, and the firing was commenced immediately afterwards by the volunteer regiment immediately in my rear.

Signed) "R. SAXTON,
"Capt. U. S. A."

After a protracted and thorough sifting of the whole evidence presented at the inquest, the following verdict was rendered: "That the several victims of the events which took place at Camp Jackson on the 10th of May came to their death from gunshot wounds inflicted by musket-balls discharged by certain United States volunteers, under the command of Gen. N. Lyon, and Cols. F. P. Blair, H. Boernstein, and others."

In the case of Nicholas Knoblock, an artillery-man, found dead in a tent, was that his death was caused by fracture of the skull and laceration of the brain, caused by some [illegible] to the jury; and in the case of Philip Lester, but from the effect of their wounds): Philip Leister, John Sweikhardt, Casper H. Glencoe, William Eisenhardt, P. Doane, Henry Jungle, Walter McDowell, Nicholas Knoblock, Jacob Carter, Emma Somers, that he came to his death by a pistol-shot through the breast, inflicted by some unknown Union Home Guard.

Statement of Dr. Johnston.

"ST. LOUIS, May 14, 1861.

"EDITOR *Republican*,—It is with regret and sorrow that I refer to the scene of unprovoked murder and slaughter of unoffending citizens of last Friday afternoon. I left my residence on Pine Street, near Thirteenth, to come down town to my office, but on reaching Twelfth Street, my attention was directed to Olive Street, where I saw a column of soldiers going west, out Olive. I immediately joined this column of soldiers, for the purpose of ascertaining what was going on, when I was informed by some gentleman that the troops from the arsenal were on their way to take Camp Jackson. I followed this column of soldiers, and nothing occurred to attract my attention until we got up to Twentieth Street, when a song was struck up by some soldiers in German (for to me they all seemed to be Germans). When I asked what was the meaning of this, I was answered that it was a German war-song, for it was not in my language. When the column arrived at the edge of the grove, or right opposite to Mr. Coleman's house, part of the column with a battery was filed off immediately to the northeast, with the left resting on Coleman's house. During the whole of this time I did not hear one word from any *citizen* which was calculated to offend the ear of any one. I now immediately turned north, and when I arrived on top of the hill, about one hundred yards from where the battery was planked, the first thing that attracted my attention near the battery was a German soldier beating a young man with his sword, and on ascertaining the cause, I found that he did not move his horse and buggy soon enough to suit this brute of a soldier. I now looked to the west, and saw a column of soldiers filing into Olive Street from Grand Avenue. This column marched up Olive until it met the column already stationed on Olive. I then left the top of the hill north of Olive, and went near Grand Avenue, and joined the column in the rear of Olive, and walked behind this column to the eastward, occasionally conversing with the soldiers, and about one hundred yards west of the pond I stopped a few moments and held a short conversation with an officer whom I took to belong to the United States regular service, who spoke and acted like a gentleman. But how different it was when I arrived at the end of the column on Olive Street and immediately opposite Mr. Coleman's house. Here I first learned that Camp Jackson had surrendered by hearing a little German, who really had a sword in his hand, exclaim to another that the 'damn scoundrels had surrendered, and that they could have no fight.' I replied to this neophyte Napoleon not to be uneasy, that he might have fighting enough to do yet, and I was now marched off and put under guard; but, luckily for me and my companion, I happened to know by sight Col. Bishop, whom I called, and he immediately had us released. And with all due deference to Capt. Lyon, I must say that I did not hear any citizen use one word which was calculated to insult any of his soldiers, or to wound their very sensitive feelings, and even if they had used all the foul language known to both the English and German vocabulary, would this have been a cause sufficient to justify his soldiers in brutally murdering women and children, as was done on last Friday afternoon? I now appeal to the soldiers and to their officers, both North and South, in this

John Roepke (or Koeper), William Juenhower, William Sheffield, William Patton Summers,[1] Patrick Enright, Capt. Blandowski, Armand Latour, John Waters, Thomas A. Huhren, J. J. Jones, Eric Wright, James McDonald, Francis Wheelan, Charles Bodsen, Mrs. Elisa McAuliff, Christopher Dean, John Underwood,[2] John English, Jacques Yerdi, Benjamin Dunn, Frank D. Allen, and a private soldier.

Intense excitement very naturally followed this bloody event. Popular feelings had been worked up already to a very high pitch, and now St. Louis seethed like a volcano in eruption. The mob filled the streets, and practically usurped the functions of government. Business was suspended everywhere; stores and even the fronts of dwellings were closed. There were numerous collisions, bloody assaults, and more than one murder, and Col. Peckham says that on that Friday night and the ensuing Saturday "it was a bold act for any known Union man to show his face on the street north of Walnut, south of Cass Avenue, and east of Twelfth Street." He adds, and with apparent justice, that

"fortunate, indeed, was it for the city of St. Louis in general, and the proprietors of the *Missouri Democrat* in particular, that the police force were under the control, during those troublous times, of such a chief as James McDonough. Whatever may have been his sympathies or predilections in the great political issues of that day, he did not allow them to interfere with his official duties. Regarding himself as a conservator of the peace, he struggled to prevent violence and enforce order. On the night in question he was exceedingly vigilant, and with admirable foresight had so arranged his force that he could furnish assistance to any of the newspapers which might be threatened by a mob. As the crowd rushed down Locust Street and across Second Street, they were greeted by a platoon of thirty policemen, who, with bayonets fixed, were in line extending across the street and facing the mob. The chief soon gave them to understand that his duty was to keep the peace, and he intended faithfully to discharge that duty. The crowd reflected, and hearing orders given, in case of resistance, to use both ball and bayonet, set up a shout of derision, but did not advance. Finally, convinced they were wasting time in that locality, they turned around, and shouting '*Anzeiger!*' '*Anzeiger!*' moved off to attack that office. McDonough had some of his men there also, but they were strongly backed by a company or two of Sigel's soldiers. The mob then moved off towards the Planters' House and the Berthold mansion, and until after midnight groups were standing in many places throughout that portion of the city, engaged in boisterous conversation upon the events of the day and cursing the 'd—d Dutch.'"

unholy and unnatural war, to spare the unoffending women and children.

"WILLIAM JOHNSTON, M.D."

Another Statement.

"We were standing on Olive Street, immediately in the rear of the company who commenced the firing. They were facing towards the south side of Olive, and were forming in ranks two deep. There was a dense crowd of citizens—men, women, and children—lining the south side of Olive Street, and back on a slight rise in Lindell's Grove. The crowd had been abusing the soldiers, cursing, and hurrahing for Jeff. Davis, but had not thrown a stone nor fired a shot at the soldiers. They had been assailed with nothing worse than words. Finally a citizen, slightly in advance of the crowd, by some means gave offense to some of the soldiers, who jumped out of their ranks (some five or six of them) and presented their bayonets at him. He threw up his hands and said, What are you going to do? One of the soldiers drew back his gun and stabbed him with the bayonet. The soldier immediately upon his right fired at the same moment. The company then commenced an irregular volley, firing right into the densest of the crowd, who turned and ran up the hill through Lindell's Grove. We stood for a few minutes until the firing became general down the line, and then turned and ran across the common north of Olive Street. When we were about twenty or thirty steps distant we could hear the bullets whistling around us and see them striking in the water of the pond just ahead of us. After getting over on the hill we turned to look at them. The soldiers were, some of them, still pursuing the crowd. We saw an officer, a large, tall, and fleshy man, strike a man who was down twice with his sword. We do not know the officer's name, but know him well by sight. He wore a dark-blue uniform, and had been mounted on a bay horse previous to the commencement of the butchery.

"We were standing only some five or six feet in the rear of the company who commenced the firing. It was a German company and not in uniform. We were looking directly at the men who fired the first shots, and again state positively that there had not been a stone or other missile thrown, nor a pistol fired at them, and that the firing was not provoked by anything more than words, and that the account as published in the *Democrat*, that they were assailed by rocks, brickbats, and other missiles, and that pistols were fired at them, or a soldier of Corps H was killed before the troops fired on the defenseless crowd of men, women, and children, is untrue in every particular.

"The company which first fired was the rear-guard; immediately beyond them in line, towards the east, were the prisoners, who were in the centre of the street, with a rank of Federal soldiers on either side of them.

"In giving the above statement we have desired to state nothing but the plain unvarnished facts of the first firing on the crowd, without prejudice to one or the other party, believing that the truth should be known by all, and we do not believe that any one was in a better position to see, or did see more of the commencement of the affray than ourselves.

"We did not hear the officers of the company give orders to fire on the crowd.

"VOLNEY A. WOODFOLK.
"PATRICK CONNALLAN.
"J. B. HENTHORNE."

[1] W. P. Summers was shot by a Minié rifle ball while standing some distance north of Olive Street. He was cashier of a bank at Newark, N. J., and was on a visit to St. Louis. He went to Camp Jackson through curiosity.

[2] John Underwood was eighteen years of age. "It appears," says the *Republican* of May 15, 1861, "that he was stabbed in the thigh by a bayonet in the hands of the United States volunteers. According to a statement which he made previous to his death, he in company with several others were taken prisoners, although present at the camp-ground as spectators. After being taken prisoner, young Underwood sat down upon the ground. He had been seated but a short time when the troops suddenly approached, and one of them stabbed him with a bayonet."

There was very little congregating on the street corners. Everybody was on the move, and rapid pedestrianism was turned to account. Thousands upon thousands of restless human beings could be seen from almost every point of Fourth Street, all in search of the latest news. Imprecations loud and long were hurled into the darkening air, and the most unanimous resentment was expressed on all sides at the manner of firing into the crowds near Camp Jackson. Hon. J. R. Barret, Maj. Uriel Wright, and other speakers addressed a large and intensely excited crowd in front of the Planters' House, and other well-known citizens were similarly engaged at various other points in the city. All the drinking saloons, restaurants, and other public resorts of similar character were closed by their proprietors almost simultaneously at dark, and the windows of private dwellings were fastened, in fear of a general riot. Theatres and other public places of amusement were entirely out of the question, and nobody went near them.

Crowds of men rushed through the principal thoroughfares, bearing banners and devices suited to their several fancies, and by turns cheering and groaning. Some were armed, and others were not armed, and all seemed anxious to be at work. A charge was made on the gun-store of H. E. Dimick, on Main Street; the door was broken open, and the crowd secured fifteen or twenty guns before a sufficient number of police could be collected to arrest the proceedings. Chief McDonough marched down with about twenty policemen armed with muskets, and succeeded in dispersing the mob and protecting the premises from further molestation. Squads of armed policemen were stationed at several of the most public corners, and the offices of the *Missouri Democrat* and *Anzeiger des Westens* were placed under guard for protection. A great deal of excitement was exhibited in the neighborhood of the Health Office, where the bodies of some of the killed were brought. Others who were wounded and dying were also deposited there for whatever relief could be administered by surgical aid.

The family from which Gen. Daniel M. Frost, the commander of Camp Jackson, descended, emigrated to this country and settled near Jamaica Plains, Long Island, while that region was yet a wilderness, and became one of the best-known and most influential families of that portion of New York. One of his grandfathers served in the Revolutionary war, and his (Gen. Frost's) father was a man of fine attainments. He was a member of the Legislature, and was the referee of his neighbors in all matters requiring for their settlement a clear judgment and sound common sense. Mr. Frost was one of the most accomplished surveyors and civil engineers of his day, and was employed by the State to survey the upper part of the Hudson River, and made the first complete survey, soundings, and map of that stream. He was also engaged by the State to survey its wild lands in the northern counties, and located the railroad from Albany to Schenectady. He raised a company for the war of 1812, and was very active in his services to the government during that conflict.

Gen. D. M. Frost was born in Schenectady County, N. Y., Aug. 9, 1823. He received an excellent common-school education, and enjoyed a course of instruction at the Albany Academy, then presided over by Dr. T. Romeyn Beck, a noted teacher and author, upon whose recommendation he was admitted, when sixteen years of age, to the Military Academy at West Point. Here he graduated in 1844 with high honors, being the first up to that time in the institution who had been "among the first five" in every branch he had studied. He was also conspicuously proficient in fencing, wrestling, and the other athletic accomplishments which form part of a soldier's training.

Among his fellow-graduates and intimate acquaintances at West Point were many young men who became famous subsequently in the civil war and otherwise. Among the best known may be mentioned Gens. Grant, McClellan, Rosecrans, Franklin, Beauregard, and Lyon. Stone Pasha, the Egyptian celebrity of recent years, was a member of his class.

Upon graduating young Frost was assigned to the First Regiment of artillery as brevet second lieutenant, and passed two years in uneventful service, at the expiration of which, learning that his regiment was expected to guard sea-coast points, and desiring a more active career, he was at his own request transferred in 1846 to a regiment of mounted riflemen, which he joined at Jefferson Barracks, St. Louis, and in the same year went to Mexico, and fought under Gen. Scott. Upon entering West Point he had presented a letter to this great soldier, who had received him kindly. Scott always took a more than common interest in the young cadet, often encouraged him by friendly commendation, and paid him numerous little attentions, naturally very flattering and cheering to the young soldier. Frost had the good fortune to be near Scott in the bloody battle of Churubusco, and even now cannot recall without emotion the demeanor of the old hero on that critical occasion. Lieut. Frost participated in all the engagements from Vera Cruz to Mexico, and at Cerro Gordo was, on Gen. Harney's

recommendation, breveted first lieutenant for gallant and meritorious conduct.

Peace having been declared he returned in the fall of 1848 to St. Louis, and in the spring of 1849 was ordered with his regiment across the plains to Oregon, being charged as regimental quartermaster with the conduct of the immense train which accompanied the expedition,—a most arduous and important service, which he performed to the entire satisfaction of the commanding officer. The next year he returned to St. Louis, and in April, 1851, married Miss Graham, granddaughter of John Mullanphy, and daughter of the late Maj. Graham, a brave soldier, and one of Gen. Harrison's aides-de-camp in the war of 1812.

Lieut. Frost's judgment and ability had always been held in the highest regard by his superior officers, and on the recommendation of Gen. Scott he was dispatched to Europe to gather information concerning cavalry drill and discipline. In 1852 he returned and joined his regiment in Texas, where in pursuit of a band of marauding Indians he was seriously wounded and nearly lost the sight of one eye.

In 1853 he returned to St. Louis, and considerations of a domestic character induced him to resign his commission; but his interest in military matters still continued, and he was soon after elected and for five years was commander of the Washington Guards, an organization then forming which afterwards became locally famous.

From this time for some years he engaged largely in business, first in the lumber trade, and later, under the title of D. M. Frost & Co., in immense fur operations on the upper Missouri, having numerous large trading stations throughout that region.

In 1854 he was elected to the State Senate as a Benton Democrat, serving four years. He was active in shaping the legislation of that period, but took especial interest in two measures. The first was a bill to secure the closing of all beer gardens and saloons in St. Louis on Sunday. Being then, as he is now, a strong opponent of sumptuary legislation, Mr. Frost energetically combated this measure and succeeded in defeating it.

The other measure was the military bill under which the famous "Camp Jackson" was organized in May, 1861. As a student of the political history of his country, and particularly of the exciting controversies on the slavery question, Mr. Frost had become convinced that war between the North and South was sooner or later inevitable; and at an early period of his career in the Senate he delivered a speech predicting that in 1856, or at the latest in 1860, the differences between the two sections would culminate in bloodshed unparalleled in history. He argued that in the event of such a catastrophe Missouri, being a Border State, would be among the first and the greatest sufferers, and that civil war would visit her with peculiar horrors. In order to avert the war, or at least to lessen the chances of its precipitation, Gen. Frost conceived that the Border States should organize a militia sufficient to command and enforce the peace between the hostile sections. At one time there was reason to think that Kentucky and Maryland would fall in with this view. The bill was framed by Gen. Frost and B. Gratz Brown, solely, as this explanation shows, as a sort of police measure between the States; but Frost's Cassandra prophecies fell on deaf ears and his warnings were unheeded, and it was not until 1858 that, after many vicissitudes, the bill became a law, and then only after having been shorn of that which would have made it effective, namely, the provision appropriating sufficient money to raise an effective force. But the patriotic intention of the law was none the less clear, and should not be forgotten when the incidents of the capture of Camp Jackson come to be considered.

Upon the passage of this measure Mr. Frost was elected brigadier-general commanding the First Military District of Missouri, embracing the city and county of St. Louis. While acting in this capacity he was in charge of Camp Jackson, in May, 1861, when it was captured by Gen. Lyon. "Probably no single event of the war," says a friend of Gen. Frost from whom we received the material facts of this sketch, "has ever been discussed as this has been, and although more than twenty years have elapsed, the affair is yet misunderstood by many, who persist in declaring that the camp was established to aid Governor Jackson's secession designs, that Gen. Frost and his command sympathized with the South, and had treasonable designs upon the arsenal, and that, consequently, it became Gen. Lyon's patriotic duty to break it up. The latter conclusion would follow legitimately, perhaps, if the facts were as alleged, but Gen. Frost denies the premises as stated above.

"The camp was established by virtue of a law passed in 1858, in the hope that all the Border States would unite in raising a body of militia strong enough to keep the peace between the North and South. Whether that result would have been accomplished by such means may be questioned; but there is no doubt that such or similar united action on the part of those States would have exerted an incalculable moral influence on the two sections, and would, beyond dispute, have compelled an adjustment of the difficulties; for had it been well understood that Missouri, Ken-

D. H. Frost

tucky, Virginia, and Maryland would not secede, the South assuredly would not have taken the fatal plunge into secession, and the war would, for a season at least, have been stayed. At any rate, the object of the law was patriotic; and who can now say that the result would not have been what Gen. Frost anticipated had the other Border States joined in such action?

"Under this law encampments had been held in previous years, and the assembling of troops at Camp Jackson in 1861 was, therefore, in pursuance of well-known law and established custom. The camp was named in compliment to probably the most popular Governor Missouri ever had. It was organized May 6, 1861, and was composed mainly of citizens of St. Louis, many of whom had long served in the militia, and who had thus assembled, as they had done before, as a matter of military obligation, and without the slightest reference to the existing agitation. While no doubt some of them sympathized with the South, there is no proof that the great body of them did so to a greater extent than might have been predicated of men gathered from a city so closely bound to the South as St. Louis had always been. However, its members were serving under an oath to support the Constitution of the United States, and they were presumably 'loyal;' the Stars and Stripes waved commandingly above the flag of Missouri, and to all external appearances the camp was a loyal gathering, assembled, as it had a right to assemble, under the laws of Missouri.

"It was, however, reported in Union circles that the Confederate flag was displayed over the camp; that recruits in large numbers were being mustered in for service in the Confederate armies. It was also charged that even the streets of the camp were named after Davis, Beauregard, and other Confederate leaders. Gen. Frost explicitly denies that there was ever to his knowledge a Confederate flag in the camp, that troops were ever enrolled for the Southern service, or that the streets were named as alleged, except as may have been done through the whim or caprice of some humorous soldier. In any proper encampment the streets are never named, and in Camp Jackson they were not named by any authority. Supposing 'the boys,' either playfully or in earnest, to have designated any of the streets after Southern leaders, Gen. Frost would have regarded it as a matter quite unworthy of his notice, and would not have paid any attention to it subsequently, but that it was prominently assigned by Gen. Harney as one of the reasons why the camp was broken up.

"As to the graver allegation that he had designs upon the arsenal, Gen. Frost submits the following: He had no force for that purpose, the troops under his command numbering only six hundred or seven hundred men. The camp having been formed for instruction and not for war, it was practically without ammunition, there being but five rounds, and that, which was exclusively for the guards, had been nearly exhausted. Now, had he actually entertained designs against the arsenal, he submits whether an officer of his experience would have contemplated so grave a step against a place so well guarded as the arsenal then notoriously was with such an inadequate force, and with one so inadequately equipped for such an undertaking?

"But it is further charged that the camp, even though conceded to have been lawfully convened, was still intended as a nucleus for hostile demonstrations upon the government property at St. Louis, and that its capture by Lyon was a strategic necessity. Had it been designed as a centre for offensive operations, however, would it, Gen. Frost asks, have been located in a valley, where, as was shown when the capture took place, it was easily commanded by cannon on the hills on every side? Such a location seems to have been singularly chosen if the design was to mass a large body of troops at Camp Jackson, either to proceed against the arsenal or overawe the loyal sentiment of St. Louis.

"Furthermore, Gen. Frost asserts that the camp was easy of access to all who chose to visit it; that it was daily thronged with people from St. Louis, and that Gen. Lyon or any of his subalterns had the amplest opportunity of learning the condition of affairs there. He could easily have convinced himself that no such alleged hostile preparations were being made, and if he believed such to be the case, he came to the conclusion only through blindness to well-known and notorious facts.

"When, on the 10th of May, Lyon proceeded against Camp Jackson with eight thousand men, planted cannon on all the neighboring heights, and demanded its surrender, Gen. Frost could only submit; but he made a manly and energetic protest against the illegality and unconstitutionality of Lyon's action, who, without the color of authority or excuse, as he (Frost) viewed it, had undertaken to make war upon the State of Missouri by attacking an encampment of her militia, assembled not in hostile array but for purposes of instruction, as had been done annually under a law of many years' standing.

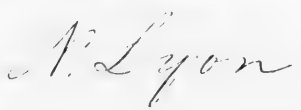
"Gen. Frost was a witness of the deplorable slaughter which took place later on that memorable day, accompanied his men as prisoners to the arsenal, and joined in the parole that Lyon exacted of them as the read-

iest way out of the existing difficulty, although he protested against it as falsely assuming that he had borne arms against the United States. His parole lasted until the latter part of 1861, when he was exchanged for Col. Mulligan."

He then entered the Confederate army, serving until the latter part of 1863, and was in the battles of Pea Ridge and Prairie Grove. His services in the field were without marked distinction, but by the introduction of a system of drill and discipline in the Army of the Trans-Mississippi he rendered the Confederacy essential service. As commander at Little Rock he had charge of the Federal prisoners, and discharged the delicate and responsible duties of his position in accordance with the instincts of a humane and generous gentleman.

During the war his wife (who had remained on the plantation near St. Louis) was "banished," her only offense being that she had a husband in the Confederate army, and the fact that she and her five little children were homeless and uncared for induced Gen. Frost to tender his resignation, in the fall of 1863, to Gen. E. Kirby Smith. It was accepted, and Gen. Frost went to Montreal, where he was joined by his family. He remained in Montreal until the latter part of 1865, when he returned to his farm near St. Louis. He was actively engaged in the management of this property until 1876, when he retired, and since then his chief care has been to look after the estates of his children.

Gen. Frost's first marriage has been mentioned. His second wife was the daughter of Jules Chenier, the granddaughter of Antoine Chenier and the niece of Henry Gustave Soulard. His third wife was (like the first) a granddaughter of John Mullanphy.



Gen. Frost has eleven children living. Public interest attaches to one of them, the son, who when the war broke out was a mere boy, and who is now the Hon. R. Graham Frost, member of Congress from one of the St. Louis districts.

Nathaniel Lyon, who commanded the forces that captured Camp Jackson, was born at Ashford, Windham Co., Conn., on the 14th of July, 1819, and was the son of Amasa Lyon and Keziah Knowlton. Two members of his mother's family, Thomas and Daniel Knowlton, were distinguished in the Revolutionary war, and his father was a respectable farmer and a leading member of the community in which he lived. Nathaniel worked on a farm and attended the village school until his eighteenth year, when (July 1, 1837) he entered the Military Academy at West Point, from which he graduated in 1841, being the eleventh in order of merit of his class. On leaving the academy he was appointed second lieutenant in the Second Regiment of infantry, and was ordered to Florida, where he served in the latter part of the Seminole war. He afterwards served at various posts in the western country, and behaved with conspicuous gallantry during the Mexican war. He took part in the bombardment and capture of Vera Cruz, and at the battle of Cerro Gordo his company was the only one to reach the crest of the hill in time to engage the Mexicans before their retreat. At Contreras his regiment performed important service in repelling a cavalry charge, and his own company, held in reserve in the centre of the hollow square, acted with great coolness and courage. On the following day, at the head of his men, he pursued the fleeing Mexicans and captured several pieces of artillery. He also distinguished himself at Churubusco, and the commander of his regiment in his report on the action recommended him to the special notice of the colonel commanding the brigade. He was promoted to the rank of brevet captain for his behavior in this action, and in the assault upon the City of Mexico again distinguished himself, being wounded while fighting near the Belen Gate. After the war with Mexico Capt. Lyon was ordered to Jefferson Barracks, St. Louis, and in 1847 was dispatched with his regiment to California, by way of Cape Horn. He remained in California until 1853, his time being chiefly employed in fighting Indians in California and Oregon, and was afterwards employed in similar service in Kansas and Nebraska.

During the slavery agitation in Kansas he took an active part in favor of abolition principles, and in the summer of 1860, while stationed at Camp Riley, Kan., contributed a series of articles to a local paper, the *Manhattan Express*, advocating the election of Abraham Lincoln, which were afterwards collected and printed in a volume entitled "The Last Political Writings of Gen. Nathaniel Lyon." In the spring of 1861, Capt. Lyon was in command of the United States arsenal at St. Louis. On the 7th of May the police commissioners of the city demanded the removal of United States troops from all places occupied by them outside the arsenal grounds. The demand was refused by Capt. Lyon, and the matter was referred by the commissioners to the Governor and the Legislature, the position taken by the commissioners being that "Missouri had sovereign and exclusive jurisdiction of her whole territory," and "had delegated a portion of her sovereignty to the United States over certain tracts of land for military purposes, such as arsenals, parks, etc." The conclusion was that the United States government had no right

to occupy any portion of the soil of the government except that which had been ceded to it, and that the presence of troops should therefore be restricted to the arsenal. Capt. Lyon, anticipating that an attempt might be made on the part of the State troops assembled at Camp Jackson to seize the arsenal, collected a large force of Home Guards, and, as

already stated, took possession of Camp Jackson, and made the State troops prisoners. On the 14th of May the first four regiments of United States volunteers were formed into a brigade as the First Brigade Missouri Volunteers, and Capt. Lyon was elected brigadier-general. The next day he sent an expedition against the secessionists at Potosi, and the troops routed a Confederate cavalry company, captured fifty prisoners and a Confederate flag, and destroyed a lead manufactory. In the latter part of May, Gen. Lyon ordered the steamer "J. C. Swon" to be seized at Harlow's Landing, below St. Louis, and taken to the arsenal, his reason for this action being the allegation that the vessel had transported arms from Baton Rouge, La., to the Missouri troops under Gen. Frost at Camp Jackson. About five thousand pounds of lead, said to be on its way to the South, was also seized, in accordance with Gen. Lyon's orders, at Ironton, on the Iron Mountain Railroad.

On the 31st of May, Gen. Harney, in command at St. Louis, was relieved, and Gen. Lyon was left free to prosecute his vigorous policy. An interview with him was sought by Governor Jackson, Gen. Sterling Price, and other secession leaders, and was granted. In the course of the conversation which ensued and which lasted four hours, the Governor and his associates demanded that no United States troops should march through or quarter in Missouri. Gen. Lyon refused to accede to this demand, asserting that the government possessed the right to send its troops wherever it pleased, and announced his intention to protect all loyal citizens and to attack all disloyal ones wherever he found them. Governor Jackson returned to Jefferson City, and learning that Gen. Lyon was on his way with a strong force to take possession of the capital, withdrew on the morning of the 14th, together with the members of the Legislature and the State troops, to Boonville. Gen. Lyon followed in pursuit, and in a sharp skirmish defeated and dispersed the Confederate troops under Gen. J. S. Marmaduke on the 17th of June. On the 3d of July he left Boonville with a force of about two thousand men for the southwestern portion of the State, where the Confederate forces, under Gens. Sterling Price and McCullough, were rapidly augmenting. Gen. Lyon's little army, however, received large accessions as he advanced, until on the 20th it numbered about ten thousand men. After his arrival at Springfield his force decreased, owing to the expiration of the time for which many of the men had enlisted, and on the 1st of August it had diminished to six thousand. Anticipating an attack by Gen. McCullough, who was reported to have an army of fifteen thousand men, Gen. Lyon moved to Crane Creek, ten miles south of Springfield. On the morning of the 2d the column reached Dug Springs, where the Confederates were found drawn up in line of battle. After a short engagement the Confederate force retreated, but on the 6th, Gen. Lyon, being confronted by a large force, determined, after consultation with his officers, to retire towards Springfield. His position was now critical, and he applied to Gen. Fremont for reinforcements, but they were not forthcoming. On the evening of the 6th, the Confederate forces under Gen. McCullough and Gen. Sterling Price having effected a junction, established a camp on Wilson's Creek, about ten miles from Springfield, on the Fayetteville road. Gen. Lyon formed a project of surprising them by night, but afterwards abandoned it. On the 9th he determined to attack them simultaneously at either end of the camp, which extended about three miles along the banks of the creek. Gen. Sigel was in-

structed to make the attack on the extreme left, and Gen. Lyon led the main assault on the right.

The whole army left Springfield about sunset of the 9th, the left column taking the Fayetteville road, and the right the road leading to Mount Vernon. Early on the morning of the 10th they came upon the enemy strongly posted on Wilson's Creek. A desperate and stubbornly-contested engagement followed, and at a critical juncture Gen. Lyon, who had already been twice wounded, placed himself at the head of an Iowa regiment, whose colonel had fallen, and led it to the charge, crying, "Forward, men! I will lead you!" While thus advancing he was struck in the breast, just above the heart, by a rifle-ball, and fell dead from his horse. Maj. Sturgis then took command, and after the conflict had waged fiercely for some time with disastrous results to the Union forces, ordered a retreat to Springfield. Sigel's column was also badly routed and compelled to fall back. It is said that for several days before the battle of Wilson's Creek, Gen. Lyon appeared much depressed, and that on one occasion he said to a member of his staff, "I am a man believing in presentiments, and ever since this night surprise was planned I have had a feeling I cannot get rid of that it would result disastrously. Through the refusal of the government to properly reinforce me I am compelled to abandon the country. If I leave it without engaging the enemy the public will call me a coward. If I engage him I may be defeated, and my command cut to pieces. I am too weak to hold Springfield, and yet the people will demand that I bring about a battle with the very enemy I cannot keep a town against. How can this result otherwise than against us?"

The body of Gen. Lyon was temporarily interred on the farm of Hon. John S. Phelps, near the battle-field, on the afternoon of the 13th, and on the 26th it was taken to St. Louis on a special train. It was met at the Fourteenth Street depot by a detachment of Col. McNeil's Home Guards, and conveyed to an undertaker's establishment. On the 25th the following orders in relation to the battle of Wilson's Creek and the death of Gen. Lyon were issued by Gen. Fremont:

"General Orders No. 4.

"Headquarters Western Department,
"St. Louis, Mo., Aug. 25, 1861.

"1. The official reports of the commanding officer of the forces engaged in the battle near Springfield, Mo., having been received, the major-general commanding announces to the troops embraced in his command with pride and the highest commendation the extraordinary services to their country and flag rendered by the division of the brave and lamented Gen. Lyon.

"For thus nobly battling for the honor of their flag he now publicly desires to express to the officers and soldiers his cordial thanks, and commends their conduct as an example to their comrades whenever engaged against the enemies of the Union.

"Opposed by overwhelming masses of the enemy in a numerical superiority of upwards of twenty thousand against four thousand three hundred, or nearly five to one, the successes of our troops were nevertheless sufficiently marked to give to their exploits the moral effect of a victory.

"2. The general commanding laments, in sympathy with the country, the loss of the indomitable Gen. Nathaniel Lyon. His fame cannot be better eulogized than in these words from the official report of his gallant successor, Maj. Sturgis, United States Cavalry, 'Thus gallantly fell as true a soldier as ever drew a sword; a man whose honesty of purpose was proverbial; a noble patriot, and one who held his life as nothing when his country demanded it of him.' Let all emulate his prowess and undeviating devotion to his duty.

"3. The regiments and corps engaged in this battle will be permitted to have 'Springfield' emblazoned on their colors as a distinguishing memorial of their services to the nation.

"4. The names of the officers and soldiers mentioned in the official reports as most distinguished for important services and marked gallantry will be communicated to the War Department for the consideration of the government.

"5. This order will be read at the head of every company in this department.

"By order of Maj.-Gen. Fremont.

"J. C. Kelton,
"*Assistant Adjutant-General.*"

Gen. Lyon's remains were removed from the undertaker's to Gen. Fremont's headquarters on the 27th, escorted by Company K of Col. McNeil's regiment, and on the following day the following orders were issued by Gen. Fremont:

"Special Orders No. 98.

"Headquarters Western Department,
"St. Louis, Mo., Aug. 28, 1861.

"The remains of the late Brig.-Gen. Nathaniel Lyon, United States army, having arrived in this city on the way East, will be escorted with proper ceremonies, at one o'clock this afternoon, from the quarters of Maj.-Gen. Fremont to the depot of the Ohio and Mississippi Railroad, where they will be delivered to the Adams Express Company, to be conveyed East under escort of officers.

"The escort, commanded by Brig.-Gen. Sigel, will consist of Capt. Tiedman's and Capt. Zagony's companies of cavalry, a section of Capt. Carlin's battery of artillery, and the First Regiment Missouri Volunteers.

"The following-named officers will act as pall-bearers:

"Col. Blair,	Col. Albert,
Col. Osterhaus,	Col. Wolf,
Maj. Sturgis,	Maj. Schofield,
Maj. Conant,	Maj. Shepherd.

"As many officers now present in this city as can be spared from their duties will join the procession in uniform with side-arms.

"The city judges, the mayor, Common Council, city officers, and citizens are invited to attend.

"The rear of the procession will be closed by a section of Capt. Carlin's battery and the Third Regiment United States Reserve Corps, Col. McNeil.

"By order of Gen. Fremont.

"J. C. Kelton,
"*Assistant Adjutant-General.*"

In accordance with these orders, the remains were escorted to the railroad depot and forwarded thence to Eastford, Conn., where they were interred in the family burial-ground. At St. Louis, Cincinnati, Pittsburgh, New York, and Hartford (Conn.) the remains lay in state, and were visited by thousands of people. At Eastford the funeral obsequies were of the most imposing character, and addresses were delivered by Hon. Galusha A. Grow, (Speaker of the United States House of Representatives), Governor Buckingham (of Connecticut), Governor Sprague (of Rhode Island), and others. On reading his will it was discovered that Gen. Lyon had bequeathed thirty thousand dollars (nearly the whole of his estate) to the United States government for the prosecution of the war. To Nathaniel Lyon must be ascribed the chief share of credit for the preservation of Missouri to the Union, his energetic measures having contributed immensely to inspire the Union party in the State with confidence and courage, and to baffle and dishearten the secession leaders. He was an ardent patriot, a man of rare energy and decision of character, and an able and intrepid soldier.

In 1868 a public meeting of the admirers of Gen. Lyon was held at the St. Louis court-house, and an association was formed for the purpose of erecting a monument to his memory. About fifteen thousand dollars was raised by private subscription and by a grant from the county court. In 1870, I. Wilson Macdonald was selected as the artist and intrusted with the execution of the work. Congress, by the act of July 25, 1868, amended March 3, 1869, and July 11, 1870, granted that portion of the grounds of the St. Louis arsenal lying between Carondelet Avenue and Fourth Street to the city of St. Louis as a public ground, on condition that the city should within three years complete the erection of a monument thereon to the late Brig.-Gen. Nathaniel Lyon. These facts were communicated to the mayor by Isaac T. Shepard, secretary of the Lyon Monument Association, as the Secretary of War, William W. Belknap, had requested to be informed whether it was "the intention of the city authorities to accept the grant, and, if so, whether steps are being taken to comply with the conditions thereof within the time fixed by Congress." Mr. Shepard showed that all payments and subscriptions had been made, but for the completion of the statue, with its pedestal, more funds were needed, and added that as fast as they were received the work would be pushed to completion.

The day following the capture of Camp Jackson (May 11th) there was, if possible, greater excitement and more bloodshed, as must always happen if troops raw and undisciplined are permitted to march indiscriminately through crowds of excited citizens. In this case, as in that of Camp Jackson, there are conflicting accounts. Col. Peckham says that the troops were assaulted, stoned, and fired at, and became bewildered. We can well believe it, but this does not explain why they should be marching at will through the streets, a regiment just mustered in, of whom some had never handled a musket in their lives. A contemporary account of this terrible affair is as follows:

"At about half-past five o'clock on Saturday evening, May 11th, a large body of the German Home Guards entered the city through Third Street from the arsenal, where they had been enlisted during the day and furnished with arms. Large crowds collected to witness their march, and they passed unmolested along until they reached Walnut, when they turned up that street and proceeded westward. Large crowds were collected on these corners, who hooted and hissed as the companies passed, and one man standing on the steps of the church fired a revolver into the ranks. A soldier fell dead, when two more shots were fired from the windows of a house near by. At this time the head of the column, which reached as far as Seventh, suddenly turned and, leveling their rifles, fired down the street, and promiscuously among the spectators who lined the pavements. Shooting as they did, directly towards their own rear ranks, they killed some of their men as well as those composing the crowd. The shower of bullets was for a moment terrible, and the only wonder is that more lives were not lost. The missiles of lead entered the windows and perforated the doors of private residences, tearing the ceilings and throwing splinters in every direction. The house of Mr. Mathews was entered by three bullets, and Mr. Mathews' daughter was struck slightly by a spent ball. On the street the scene presented as the soldiers moved off was sad indeed. Six men lay dead at different points, and several were wounded and shrieking with pain upon the pavements. The dead-carts, which have become familiar vehicles since the scenes of the last two days, were soon engaged in removing the corpses from the ground. The wounded were carried to the Health Office. Four of the men killed were members of the regiment, and two were citizens. Last night the former had not been recognized. Jerry Switzelan, an engineer on the river, was passing by the door of Mr. H. Glover's residence, on Seventh Street, next to Walnut, when a ball struck him in the head, and scattered his brains over the door and walls. A pool of blood marked the spot where he fell after his body had been removed. Jeremiah Godfrey, a hired man of Mr. Cozzens, county surveyor, was working in the yard of Mr. Cozzens at the time of the occurrence. While stooping over in the act of fastening some flowers to a frame, three soldiers entered the gate, and approaching within the yard fired three shots into his body. Fortunately none of them were fatal, being all flesh wounds. The family witnessed the affair, and says that the man had not been out of the yard, and was unaware of the approach of his assailants until stricken down by their bullets. Charles H. Woodward, a clerk in Pomeroy & Benton's store, was shot in the shoulder, and will have to have his entire arm amputated. He was carried into the residence of Mr. Mathews and kindly cared for. James F. Welsh, living at No. 189 Wash Street, between Fourteenth and Fifteenth Streets, was shot through the foot." Michael Davy, residing

between O'Fallon and Cass Avenue and Sixth and Seventh, received a ball through the ankle, and amputation will be necessary. John Nelus was wounded in the cheek. Several others were injured slightly. The houses on the right side of Walnut from Fifth to Seventh were considerably injured by bullets, and the inmates in several cases had very narrow escapes. At a late hour in the night the bodies of John Garvin, whose brother keeps a livery-stable on Market Street, William Cody, a book-peddler from New Orleans, and John Dick were recognized among the dead. Immense crowds of people filled the streets after the occurrence, and the whole city presented a scene of excitement seldom witnessed.

"Mayor Taylor made an address to the people from the steps of the church on Fifth and Walnut Streets, exhorting them to disperse peaceably, and promising that they should be fully protected from violence. The address evidently had a good effect, and the streets became more quiet. The action of the soldiers in retaliating upon two or three individuals by firing recklessly among the crowd and into houses excited universal indignation."

A newspaper correspondent the next day visited the scene of conflict on Walnut Street, and described it as follows:

"The scene of Saturday's fatalities, on Walnut and on Seventh Streets, was visited during the day by multitudes of people. The appearance of the residences on the north side of Walnut and west side of Seventh was the subject of a great deal of animated conversation. The sides of the houses were scarred in dozens of places by niches in the brick or stone and mortar, made by the Minié-bullets, whilst shutters, doors, windows, and casements were shattered by the same terrible instruments of destruction. The force of these leaden messengers was truly astonishing. Notches large enough to hold a man's fist were made in solid stone. In many spots whole bricks were crumbled to fragments. Shutters and window sashes were riddled into splinters. Panes of glass were perforated by balls, leaving holes as nicely cut as if done with a diamond. Some forty or fifty marks of this kind, by as many bullets, upon the walls and sides of dwellings showed what fearful work powder and lead are capable of doing; and the universal wonder on surveying these mute testimonials was that there had not been a much greater amount of fatality.

"On the corner of Seventh and Market Streets lay the carcass of a noble-looking gray horse, which, having received a terrific shot in the forehead, had fallen dead beneath his rider. The latter escaped by lying down, with great presence of mind, behind the prostrate animal."[1]

[1] As a part of the record of this tragical collision, we have deemed it of sufficient importance to append the following statements from other contemporary accounts:

"St. Louis, May 13, 1

"N. Paschall, Esq.:

"Dear Sir,—Having been an eye-witness of the commencement of the tragical affair on Walnut Street on last Saturday afternoon, and not having seen in the papers of this city any correct report of the same, I am induced, at the request of many citizens, to send to you for publication a brief statement of facts as they occurred. In proceeding from my office to my home on Seventh Street, between Walnut and Elm, I met the head of a column of soldiers called the 'Home Guard,' marching west on Walnut Street, and walked on the north side of the street, nearly opposite the head of the column, until I got nearly opposite the door of Mr. Mathews (some three or four buildings from the corner of Sixth and Walnut, on the north side of Walnut). I stopped at the point mentioned to see if I could recognize any persons in the ranks, as they passed me, with whom I was acquainted, in order to ascertain whether the troops were citizens of St. Louis or not. Having recognized a number of familiar faces as citizens of St. Louis, my attention was drawn to the crowd of persons collected at the corner of Fifth and Walnut, many of whom I could see standing on the south end of the church steps, on the northwest corner of Fifth and Walnut. There was at this time considerable hooting and abusive language used, and a pistol-shot fired from the steps of the church, as I supposed from the flash and smoke. Immediately after the firing of the pistol from the crowd on the steps of the church, a man stepped out from the ranks of the troops and returned the fire with a pistol, which was almost immediately followed by a general fire from the rear ranks of troops, which I supposed dispersed the crowd on Fifth Street, as the fire of the whole body of troops (at this time extending from near Fifth Street to Seventh) became general, the fire being mainly directed to the north side of Walnut and up Sixth and Seventh Streets, although there was, so far as I could discover, nothing to fire at but a few quiet men, women, and children to be seen on Walnut Street, and, I have been told also, on Sixth and Seventh, who had gathered to see the soldiers pass. I did not leave the spot I occupied on Walnut Street at the commencement of the firing until the troops had nearly all discharged their pieces and retired, some down Sixth Street to Elm, and some through the alley between Sixth and Seventh, but the main body rallied at the church on the corner of Eighth and Walnut, and commenced reloading their guns, at which time I entered the house opposite to which I had been standing, and observed what was going on. I heard a few scattering shots about the time I entered the house, and afterwards ascertained that a man was wounded in Mr. Cozzen's garden, and another I saw brought up Walnut. My children and servants were pursued in the alley between Seventh and Eighth Streets with pointed bayonets by the 'Home Guard,' and I suppose were not shot in consequence of their guns being discharged. The report of persons firing from windows of houses in the neighborhood, unless it took place after the general firing commenced, I know to be untrue, and it is not at all probable anything of the kind took place at any time during the firing. I also know the statement to be untrue that any person was shot down and killed from the firing of any pistol-shot from the crowd at the corner of Fifth and Walnut Streets. If any person was hurt by the fire from the crowd, they were able to walk away, and have died since, and if such is the fact, I have not been informed of it. I have not made this statement with any view to create more excitement than now exists. I deprecate the indiscretions of persons in a mob firing upon the soldiers, though God knows the shooting down of innocent women and children would seem to be at least some palliation, and if language would serve me to express the loathing or abhorrence I have for those who would deliberately do such an act (without any provocation), or their apologists, and those who actually approve of their acts, I would at least make an effort to reach their consciences, but I think the hot iron has long since been applied to them, and they are seared beyond all hope of reaching a soft spot, unless it is by bullets and bayonets, with which they are so ready to act.

"Mortimer Kensell."

The mayor issued a proclamation on this momentous Saturday morning which was calculated to promote quiet and tend to reduce the multitudes thronging the streets. It was in the terms here set forth:

"MAYOR'S OFFICE, CITY HALL,
"May 11, 1861.

"In view of the prevailing excitement, and for the purpose of removing, as far as practicable, all causes of additional irritation, and of maintaining the public peace, I, Daniel G. Taylor, mayor of the city of St. Louis, hereby respectfully request all owners and keepers of bars, drinking-shops, beer-houses, and other places where intoxicating liquors are sold to close the same forthwith, and keep them closed during the continuance of the present excitement.

"I also, by virtue of the power in me vested by act of the Legislature, require all minors to keep within doors three days next succeeding the issuing of this proclamation. I also request of all good citizens to remain within doors after nightfall, as far as practicable, and to avoid all tumultuous gatherings or meetings.

"Relying upon the loyalty and good judgment of his fellow-citizens, the undersigned confidently expects a cordial compliance with these requests.

"DANIEL G. TAYLOR, *Mayor.*

"Attest: WM. S. CUDDY, *City Register.*"

But, besides the rioting, there was much to disquiet and disturb the people. Troops were marching and countermarching in the city, and the danger of a general collision between them and the citizens was terribly imminent. They seized upon what seemed to be strategic points, and it was feared that in a moment of exasperation a general conflagration and massacre would result. The depot of the Pacific Railroad was seized by them, as the following correspondence shows:

"PACIFIC RAILROAD, PRESIDENT'S OFFICE,
"ST. LOUIS, May 12, 1861.

"COL. JOHN MCNEIL:

"SIR,—I have the honor to address you as the president of the Pacific Railroad Company, having been referred to you by one of the officers under your command. I learn that armed troops under your command have taken possession of and are quartered in the depot and freight buildings of this company, situated on Fourteenth Street, and the purpose of this note is to respectfully inquire the object and purposes of those men in possessing themselves of private property. You will greatly oblige, by allaying the excitement of the traveling public and the anxiety of the officers of this road, by an early reply.

"I have the honor to be, your obedient servant,
(Signed) "G. R. TAYLOR, *President.*"

"HEADQUARTERS U. S. RESERVE CORPS,
"May 12, 1861.

"SIR,—In response to your note of this morning, I will state that the only object which was aimed at in occupying the Fourteenth Street depot of your railroad company was to aid in preserving the peace of the city.

"The ordinary business of the road was left to be conducted as heretofore, and no interference therewith will take place.

"Very respectfully, etc.,
"CHESTER HARDING, JR.,
"*Acting Ass't Adj't.-Gen. U. S. Reserve Corps.*
"TO GEORGE R. TAYLOR, *President Pacific Railroad.*"

There was an ulterior object in this, of course, viz., to prevent militia from the country from coming in to add to the excitement and perhaps attack the arsenal. Troops were also busily engaged all day in removing the captured military stores from Camp Jackson to the arsenal, a proceeding which did not tend to promote the public quiet.[1]

That night at Jefferson City the military bill was passed, and the whole State was thrown into an uproar, the enrollment of State troops beginning at once, and attended with musterings, bridge-burnings, seizure of railroads, arsenals, etc. But that night Gen. Harney returned to St. Louis, and a measure of quiet and confidence returned with him. None too soon, for many of the best citizens of St. Louis were preparing for flight and contemplating the necessity of expatriation.[2]

"The subscribers, residents of Walnut Street, between Fifth and Sixth, eye-witnesses of the melancholy transaction of Saturday evening, assert in the most positive manner that there was not a pistol nor any other arm fired from the windows of any house in our square on either side of the street; that the only firing not done by the troops or persons in the street was one shot from a pistol by a boy from the church steps, and there is a difference of opinion among us whether that was fired in the air or at the troops.

"A. Miltenberger, R. P. Hall, W. T. Miller, Robert A. Reilly, R. C. Shackelford, B. M. Runyan, W. A. Doan, John Matthews, Jr."

The coroner's jury of the Walnut Street tragedy returned the following verdict: "That six of the persons shot on Walnut Street came to their death by gunshot-wounds, inflicted by musket-balls discharged by volunteer United States soldiers, under the command of certain officers unknown to the jury; that two of the parties shot at the same time came to their death by pistol-shots fired by persons unknown to the jury."

The jury was composed of Richard Ivers, foreman; N. P. Thayer, Richard Owen, James F. Maude, J. B. Breed, and J. Thayer.

[1] These stores and munitions were considerable. Among other things carried off were the following: Three thirty-two-pounders; three mortar-beds; a large quantity of balls and bombs, in ale-barrels; artillery pieces, in boxes of heavy plank, the boxes marked "marble," "Tamaroa, care of Greeley & Gale, St. Louis—Iron Mountain Railroad;" twelve hundred rifles of late model, United States manufacture; tents and camp equipage; six brass field-pieces; twenty-five kegs of powder; ninety-six ten-inch bomb-shells; three hundred six-inch bomb-shells; six brass mortars, six inches diameter; one iron mortar, ten inches; three iron cannon, six inches; five boxes of canister-shot; fifty artillery-swords; two hundred and twenty-seven spades; thirty-eight hatchets; eleven mallets; one hundred and ninety-one axes; forty horses; several boxes of new muskets; a very large number of musket-stocks and musket-barrels; together with lots of bayonets, bayonet-scabbards, etc.

[2] A rumor was current in the city that there was a revolt among the German volunteers against Gen. Harney's authority, and that a detachment of four hundred regulars, who had been ordered for service under the command of the police commissioners for the preservation of the peace of the city, would not be allowed to depart from the arsenal. This alleged rebellion against the peaceful measures of Gen. Harney produced the greatest consternation and dismay among the citizens, and many hastened to leave the city.

Gen. Harney's first efforts upon his return to St. Louis were directed to arresting panic and allaying excitement. He was fortunate in possessing the confidence of the majority of the citizens, especially among the thinking and influential classes. He brought the four companies of regular soldiers from the arsenal into the heart of the city, and expressed his determination to put down all rioting and bloodshed with the strong hand.[1] At the same time he avowed himself a firm upholder of the government

"Frenzied imaginations added extrinsic terrors," says the *Republican*, "to even the most exaggerated rumors, and the wildest conjectures were indulged in as to what might be expected. In some parts of the city a perfect panic prevailed. Had there been notice of a destructive hurricane or an earthquake about to visit the city, there could scarcely have been a more disturbed sense of impending peril than existed in many quarters. Trunks were hurriedly packed, and directions given for an immediate departure. Vehicles of all descriptions were in sudden demand, the railroad ticket-offices thronged, and steamboat clerks kept busy in registering the names of passengers. Hasty adieus were exchanged among relatives and friends, and from three to six o'clock in the afternoon the streets presented much the same appearance as on the last day of one of our great fairs. We can hardly underestimate the extent of the stampede by placing the number of persons fleeing the city at about four thousand. The windows of dwellings were like picture-frames, groups of people being there congregated to view the preparations in the streets for this terrified *hegira*. Capt. McDonough, chief of police, hearing of the facts, posted messengers about to quell the alarm, and assure the citizens that there was no danger by contradicting the reports in circulation.

"About six o'clock Mayor Taylor rode in amongst the railroad omnibuses, crowded with passengers, which were ready to start from the Planters' House, and addressed the people as follows:

"'*Citizens of St. Louis*,—I am extremely sorry to observe such a stampede of citizens from the city, as I have convinced myself that you need fear no danger from any quarter. The rumor which has been extensively circulated this afternoon in all parts of the city that there is much insubordination among the armed men known as 'Home Guards' is entirely without foundation. These men are all under the command of their officers, and there is no probability that there will be riot and bloodshed. I assure each and every one of you that no danger threatens your persons or property at this time. There is no disturbance at the arsenal, and the regulars are already in the city for the purpose of aiding the police, if necessary, in preserving peace and quietness and restoring confidence to our citizens.'

"The address was received with long-continued cheering from the crowd, and the railroad coaches drove off on their way across the river."

To close out the history of Camp Jackson, it may be added here that all the prisoners were discharged on parole between five and six o'clock Saturday evening, excepting Capt. Emmet McDonald, who insisted upon a free discharge, and, that being denied to him, sought his legal remedy in a writ of *habeas corpus*. He refused to give his parole, on the ground that he had already taken the oath of allegiance and had never been guilty of any act of disloyalty. When the writ was served at the arsenal the return of *non est* was made. He had been spirited away across the river to Illinois, to prevent the question of the legality of his imprisonment from being tested in the courts. He was taken from the arsenal on Monday, May 13th, in a skiff, under the escort of four soldiers and Capt. Cole. An attempt would have been made to rescue him had he not forbidden his friends to do anything of the sort. The boat nearly sunk in crossing the river, but finally Caseyville, Ill., was reached, where there was a large encampment of Federal troops under Col. McArthur. Gen. Harney made answer to the process of the court, saying that he was not in command when the prisoner was taken, and that McDonald was not in his custody, adding, however, with characteristic frankness, that "while I am not therefore responsible for the proceedings at that camp, and under ordinary circumstances should not feel at liberty to comment upon them officially, I am not disposed, in the existing state of things, to shrink from the responsibility of acknowledging that my predecessor in command saw in the proclamation of the President of the United States ordering the dispersion of all armed rebels hostile to the United States, as described in the proclamation, a high and imperative duty imposed upon him with respect to the camp in question, the evidences of its treasonable purposes having been to his mind indisputably clear. His action in the premises I recognize, therefore, as imposing upon me the obligation of assuming the consequences of his proceedings, so far as to abstain from pursuing any course which, by implication, might throw a doubt upon the sufficiency of his authority.

"Upon looking into the circumstances attending the detention of Emmet McDonald, I find they are such, if I had him in charge, that I could not give orders that might set him at large, unless some sufficient evidence should be furnished that he was not of the number of those in Camp Jackson who gave to that camp its character by which it came under the class of disaffected men hostile to the government of the United States, according to the terms of the proclamation referred to."

Another writ was served upon Col. McArthur and the other officers of the Illinois camp, but they refused to respect it, saying that they had no orders from the government to release the prisoner. Soon after this, however, Capt. McDonald was discharged. The rest of the paroled prisoners were regularly exchanged in December, 1861, by Gen. Price for Federal prisoners whom he had taken. This was to prevent possible complications, for Gen. Harney had said that if he caught a paroled Camp Jackson prisoner with arms in his hands he would hang him on the spot.

[1] In consequence of the general panic which spread among a portion of the citizens, Capt. McDonough and Mr. Brownlee, president of the board of police commissioners, on Sunday, May 12th, made arrangements with Gen. Harney for detachments of United States regular soldiers, to be stationed in the central portion of the city, to insure the preservation of the public peace. Accordingly, late in the afternoon several detachments of troops, amounting in all to about four hundred regulars, left the arsenal and marched up Carondelet and Fourth Streets to the Union Armory, over Thornton's livery-stable, on Walnut Street, between Third and Fourth, where they were stationed. The officers in command of the regulars were Capt. James Totten, of the Second Artillery; Capt. Sweeney, of the Second Infantry; Capt. R. Saxton, of the Fourth Artillery; and Lieut. Lathrop, of the Fourth Artillery. They had four pieces of artillery, which were placed in the archway of the livery-stable, in readiness for service at a moment's warning. Crowds of people lined the streets through which the regulars marched, and general approbation was manifested at their appearance.

and its measures, but willing to employ, in extraordinary times, unusual means for accomplishing his object and aim. In fact, his mere presence restored quiet by bringing back confidence, and people returned at once to their ordinary avocations as soon as they appreciated the fact that the reign of terror was over. As the press said, "A confident belief is expressed that his government of the department will be productive of the greatest good to the greatest number. A service of forty years in the regular army, and the high character for energy and impartiality which this gentleman so justly bears, may well inspire confidence that his best efforts will be used for preserving the peace of the city and protecting old friends and neighbors. Let our citizens continue to put a proper value upon his experience and qualifications, and second his plans to the best of their abilities. Such a course will immediately restore quiet and safety to all."

On the second day after his resumption of command Gen. Harney issued the following proclamation:

"MILITARY DEPARTMENT OF THE WEST.
"ST. LOUIS, May 14, 1861.

"TO THE PEOPLE OF THE STATE OF MISSOURI:

"On my return to the duties of the command of this department, I find, greatly to my astonishment and mortification, a most extraordinary state of things existing in this State, deeply affecting the stability of the government of the United States, as well as the governmental and other interests of Missouri itself.

"As a citizen of Missouri, owing allegiance to the United States, and having interests in common with you, I feel it my duty, as well as privilege, to extend a warning voice to my fellow-citizens against the common dangers that threaten us, and to appeal to your patriotism and sense of justice to exert all your moral power to avert them.

"It is with regret that I feel it my duty to call your attention to the recent act of the General Assembly of Missouri, known as the military bill, which is the result, no doubt, of the temporary excitement that now pervades the public mind. This bill cannot be regarded in any other light than an indirect *secession ordinance*, ignoring even the forms resorted to by other States. Manifestly its most material provisions are in conflict with the Constitution and laws of the United States. To this extent it is a nullity, and cannot and ought not to be upheld or regarded by the good citizens of Missouri. There are obligations and duties resting upon the business people of Missouri, under the Constitution and laws of the United States, which are paramount, and which I trust you will carefully consider and weigh well before you will allow yourselves to be carried out of the Union, under the form of yielding obedience to this military bill, which is clearly in violation of your duties as citizens of the United States.

"It must be apparent to every one who has taken a proper and unbiased view of the subject, that whatever may be the termination of the unfortunate condition of things in respect to the so-called 'Cotton States,' Missouri must share the destiny of the Union. Her geographical position, her soil, and, in short, all her material interests point to this result. We cannot shut our eyes against this controlling fact. It is seen, and its force is felt throughout the nation. So important is this regarded to the great interests of the country, that I venture to express the opinion that the whole power of the government of the United States, if necessary, will be exerted to maintain Missouri in her present position in the Union. I express to you, in all frankness and sincerity, my own deliberate convictions, without assuming to speak for the government of the United States, whose authority, here and elsewhere, I shall at all times, and under all circumstances, endeavor faithfully to uphold.

"I desire, above all things, most earnestly to invite my fellow-citizens dispassionately to consider their true interests, as well as their true relation to the government under which we live, and to which we owe so much.

"In this connection I desire to direct attention to one subject, which, no doubt, will be made the pretext for more or less popular excitement. I allude to the recent transactions at Camp Jackson, near St. Louis. It is not proper for me to comment upon the official conduct of my predecessor in command of this department, but it is right and proper for the people of Missouri to know that the main avenue of Camp Jackson, recently under command of Gen. Frost, had the name of Davis, and a principal street of the same camp that of Beauregard, and that a body of men had been received into that camp by its commander which had been notoriously organized in the interests of the secessionists, the men openly wearing the dress and badge distinguishing the army of the so-called Southern Confederacy. It is also a notorious fact that a quantity of arms had been received into the camp which were unlawfully taken from the United States arsenal at Baton Rouge, and surreptitiously passed up the river in boxes marked 'marble.'

"Upon facts like these, and having in view what occurred at Liberty, the people can draw their own inferences, and it cannot be difficult for any one to arrive at a correct conclusion as to the character and ultimate purpose of that encampment. No government in the world would be entitled to respect that would tolerate for a moment such openly treasonable preparations.

"It is but simple justice, however, that I should state the fact that there were many good and loyal men in the camp, who were in no manner responsible for its treasonable character.

"Disclaiming, as I do, all desire or intention to interfere in any way with the prerogatives of the State of Missouri, or with the functions of its executive or other authorities, yet I regard it as my plain path of duty to express to the people in respectful, but at the same time decided, language that within the field and scope of my command and authority the 'supreme law' of the land must and shall be maintained, and no subterfuges, whether in the forms of legislative acts or otherwise, can be permitted to harass or oppress the good and law-abiding people of Missouri. I shall exert my authority to protect their persons and property from violations of every kind, and I shall deem it my duty to suppress all unlawful combinations of men, whether formed under pretext of military organizations or otherwise.

"WM. S. HARNEY,
"*Brig.-Gen. U. S. Army, Commanding.*"

The next day the following significant papers appeared in the newspapers:

"MILITARY DEPARTMENT OF THE WEST,
"ST. LOUIS, May 15, 1861.

"My attention has been called to publications in several of the city papers to the effect that the volunteers under my command at this post were disorderly, and that they were acting, to some extent, in defiance to the discipline of the army.

"I deem it my duty, and it affords me great pleasure to say

that these publications are wholly unfounded and do great injustice to the volunteers. These troops have submitted cheerfully and with alacrity to the discipline of the service, and nothing has come under my observation or been reported to me that should subject them to the injurious publications to which I have alluded.

"I beg to express my entire disapproval of such unfounded publications, as they are only calculated to injure the public service, and create disquiet and ill-feeling in the community.

"W. S. HARNEY,
"*Brig.-Gen. U. S. Army, Commanding.*"

"TO THE ROMAN CATHOLICS OF ST. LOUIS:

"BELOVED BRETHREN,—The deplorable events which have lately occurred admonish me to renew the exhortation I addressed you on a former occasion, and recall to your minds the great principles of our holy religion, as the only effectual means of calming the excitement that prevails. In no case is the Christian justified in forgetting the precept of universal charity inculcated in the teaching and exhibited in the practice of the Son of God. Listen not to the suggestions of anger, but banish from your thoughts, as well as from your hearts, every feeling incompatible with the duty of subjecting it to the dictates of reason and religion. It is not in the excitement of the moment that you can hope to find the remedy of the evils from which the community is suffering, and which have brought so much bereavement and distress to individuals.

"Remember that any aggression by individuals or bodies not recognized by the laws, from which the loss of life may follow, is an act of murder, of which every one engaged in such aggression is guilty, no matter how great and galling the provocation may have been; and bear in mind that under the influence of such unholy feelings as lead to such acts the innocent are confounded with the guilty, or those who are presumed to be such.

"A firm reliance on the superintending care of Providence, an humble submission to His will, which has permitted the present trial to befall us, doubtless for our correction, and to remind us of our dependence on Him, and a generous sacrifice of every feeling incompatible with that spirit of brotherhood with which all men, and especially the inhabitants of the same city, should be animated, are dispositions which will be more efficacious in restoring public tranquillity and maintaining order than the promptings of vindictiveness, which would surely increase and aggravate our evils. 'Dearly beloved, let us love one another; for charity is of God. And every one that loveth is born of God, and knoweth God. He that loveth not knoweth not God; for God is charity.' (1 John, iv. 7, 8.)

"PETER RICHARD,
"*Archbishop of St. Louis.*"

Mean time, however, State affairs were approaching a crisis. The new military law began to be put in force with vigor. It was first promulgated, and next the following general order was published:

"HEADQUARTERS OF THE
"COMMANDER-IN-CHIEF OF THE FORCES OF MISSOURI,
"JEFFERSON CITY, May 16, 1861.

"*General Orders No.* 2.

"1st. For the purpose of carrying into effect the militia laws of the State, the brigadier-generals in their respective districts will, with the least possible delay, proceed to organize the militia according to law, and hold them in readiness for active service should the emergency arise to require it.

"2d. The brigadier-generals will, as soon as possible, forward to the adjutant-general of the State full returns of the strength of their respective districts, and will appoint for temporary service such staff officers as may be necessary to aid them in carrying into effect the foregoing orders.

"3d. The militia, when organized, will, until further orders, remain in their respective neighborhoods.

"4th. All officers and soldiers of the militia are enjoined to use every lawful authority and means in their power to protect the persons and property of the citizens of the State, without reference to political opinions.

"5th. The object of organizing the militia being simply to protect the people in their rights under the Constitution of this State and of the United States, all officers and soldiers of the militia will be careful to avoid collision with any armed bodies, unless in an emergency it should be necessary to protect the lives, liberty, and property of the people.

"6th. The only flag to be used by the militia will be the flag of the State of Missouri, which will be furnished to the respective districts from these headquarters.

"STERLING PRICE,
"*Commander-in-Chief.*"

This was speedily succeeded by another general order, officering the army which Governor Jackson intended to call out. These appointments were as set forth below:

"ADJUTANT-GENERAL'S OFFICE,
"JEFFERSON CITY, MO., May 21, 1861.

"*General Orders No.* 16.

"The following appointments by the Governor of the State in the 'Missouri State Guard' are announced for general information. The officers appointed will take rank in order and from the date set opposite their respective names:

"GENERAL STAFF.

"*To be Major-General Commanding.*

"Sterling Price, May 18, 1861.

"*To be Brigadier-Generals, Commanding Districts.*

"5th District, A. W. Doniphan, May 14, 1861.
"6th District, M. M. Parsons, May 15, 1861.
"8th District, James S. Rains, May 16, 1861.
"9th District, M. L. Clark, May 16, 1861.
"3d District, John B. Clark, May 16, 1861.
"1st District, N. W. Watkins, May 17, 1861.
"2d District, Bev. Randolph, May 17, 1861.
"4th District, W. Y. Slack, May 18, 1861.
"7th District, J. H. McBride, May 18, 1861.

"*To be Assistant Adjutant-General, with the Rank of Colonel.*

"Henry Little, May 18, 1861.

"*To be Aides-de-Camp to the Major-General commanding, with the Rank of Lieutenant-Colonel.*

"Alfred W. Jones, May 18, 1861.
"Richard T. Morrison, May 18, 1861.

"*To be Surgeon, with the Rank of Lieutenant-Colonel.*

"W. N. Snodgrass, May 18, 1861.

"*To be Assistant Surgeon, with the Rank of Captain.*

"Henry W. Cross, May 18, 1861.

"WARWICK HOUGH,
"*Adjutant-General M. S. G.*"

The same day on which this order was promulgated, Gens. Harney and Price had a conference in St. Louis, at which a *modus vivendi* was happily established between them, as the contemporary account of the interview shows: "An important interview took place yesterday in this city between Gen.

S. Price, of the Missouri State Guard, and Gen. Harney, of the United States army, for which purpose Gen. Price left Jefferson City the day previous. The interview was a long one, and resulted in the adoption of a declaration which, if seconded by the people of the State, and faithfully adhered to by the people of the United States, as we have no doubt it will be, must end in restoring peaceful relations throughout our borders. Of course a friendly and full interchange of sentiments and opinions was indulged in; and being thus possessed of each other's views, little danger need be apprehended, while they have the direction of military affairs, of any real disturbance of the public peace. The arrangement thus entered into has, as will be observed, the sanction of Governor Jackson; and we take it for granted that the State troops now encamped at Jefferson City, as well as in any other encampments, will be disbanded, and that no incursions of the United States forces into any section of the State will be necessary or authorized:

"'THE DECLARATION.

"'ST. LOUIS, May 21, 1861.

"'The undersigned, officers of the United States government and of the government of the State of Missouri, for the purpose of removing misapprehensions and allaying public excitement, deem it proper to declare publicly that they have this day had a personal interview in this city, in which it has been mutually understood, without the semblance of dissent on either part, that each of them has no other than a common object, equally interesting and important to every citizen of Missouri, that of restoring peace and good order to the people of the State in subordination to the laws of the general and the State governments.

"'It being thus understood, there seems no reason why every citizen should not confide in the proper officers of the general and State governments to restore quiet; and, as the best means of offering no counter-influence, we mutually recommend to all persons to respect each other's rights throughout the State, making no attempt to exercise unauthorized powers, as it is the determination of the proper authorities to suppress all unlawful proceedings, which can only disturb the public peace.

"'Gen. Price, having by commission full authority over the militia of the State of Missouri, undertakes, with the sanction of the Governor of the State, already declared, to direct the whole power of the State officers to maintain order within the State among the people thereof; and Gen. Harney publicly declares that, this object being thus assured, he can have no occasion, as he has no wish, to make military movements which might otherwise create excitements and jealousies, which he most earnestly desires to avoid.

"'We, the undersigned, do therefore mutually enjoin upon the people of the State to attend to their civil business, of whatsoever sort it may be; and it is to be hoped that the unquiet elements which have threatened so seriously to disturb the public peace may soon subside, and be remembered only to be deplored.

"'WM. S. HARNEY,
"'*Brig.-Gen. Commanding.*
"'STERLING PRICE,
"'*Maj.-Gen. Missouri State Guard.*'

"As one immediate effect of the arrangement between Gen. Harney and Gen. Price, we hear that the prisoners taken by the United States troops at Potosi, and since confined at the arsenal, will be discharged.

"'TO THE PEOPLE OF THE STATE OF MISSOURI:

"'I take great pleasure in submitting to you the above paper, signed by Gen. Price, commanding the forces of the State, and by myself on the part of the government of the United States. It will be seen that the united forces of both governments are pledged to the maintenance of the peace of the State and the defense of the rights and property of all persons, without distinction of party. This pledge, which both parties are fully authorized and empowered to give by the governments which they represent, will be by both most religiously and sacredly kept, and, if necessary to put down evil-disposed persons, the military power of both governments will be called out to enforce the terms of the honorable and amicable agreement which has been made. I therefore ask of all persons in this State to observe good order and respect the rights of their fellow-citizens, and give them the assurance of protection and security in the most ample manner.

"'WM. S. HARNEY,
"'*Brig.-Gen. Commanding.*'"

Maj.-Gen. Sterling Price was a native of Virginia, born in Prince Edward County, Sept. 14, 1809. After a school and academy course he was sent to Hampden-Sidney College, and there graduated at the age of nineteen. For two years after this he acted as deputy in the clerk's office of his native county, getting thus a knowledge of business and of legal forms. Having attained his majority, he obeyed the impulses of an enterprising and energetic disposition and went West, arriving in Missouri in 1830, and settling in the Boon's Lick country, his permanent residence being made in Chariton County. Soon after he became known to his fellow-citizens he was appointed brigadier-general of the State militia, and having passed the bar, entered into politics. He was an ardent and active Democrat, and as early as 1836 was elected to represent his county in the General Assembly of the State. He made a useful, practical member, not given to declamation, but knowing and helping to promote the public interests. In 1840, and again two years later, he was member of the Legislature and Speaker of the Assembly.

In 1844 he was elected to Congress from the then Third District of Missouri, entering the House of Representatives in time to support the administration of President Polk. The Mexican war breaking out, he was authorized by President Polk to raise a regiment of cavalry for service in Mexico, was mustered in Aug. 12, 1846, and early in the war marched to Santa Fé with one of the best volunteer cavalry regiments raised during the war. It was known as the Second Missouri Mounted Volunteers. Col. Price soon distinguished himself by the prompt manner in

which he suppressed the insurrection of the New Mexicans and Pueblo Indians in his district of Gen. Kearney's Department of New Mexico. The insurrection began on Jan. 14, 1847, with the murder of Governor Charles Bent, at San Fernando de Taos. The news of this and other outrages reached Santa Fé on January 20th, and Col. Price, with three hundred and fifty men and four twelve-pounder guns, marched to

MAJ.-GEN. STERLING PRICE.

punish the organized insurgents. He came up with their main force, mumbering fifteen hundred, on January 24th, near the small village of Canada. Price at once opened upon them and their village, and after a brief struggle the rebels were dispersed with a loss of thirty-six killed and a large number wounded. Price's loss was only two killed and six wounded. The pursuit was continued up the valley of the Rio del Norte, and on January 29th, at Lafaya, another serious blow was inflicted upon the insurgents by Price, adding largely to the number killed and wounded, and to the demoralization of the enemy. On the 3d of February Price had reached San Fernando de Taos, the scene of Governor Bent's murder. He found the insurgents in possession, strongly fortified, and awaiting an attack. Price assaulted the position on the 4th, and succeeded during the night in occupying some abandoned houses commanding the rebel position. The enemy sued for terms next day. Price demanded and received the persons of the chief insurgents, and hung them a few days subsequently. This brief campaign, which would to-day be considered so insignificant as to hardly deserve recital, made Price a brigadier-general of volunteers, his commission dating July 20, 1847. His second battle in Mexico is known as that of Santa Cruz de Rosales, and was properly a siege. The principal battle of the siege was fought March 16, 1848, against a very superior force of Mexicans under Don Angel Freas, Governor of Chihuahua, and resulted in the capture of the place and the entire garrison. Price was wounded in the engagement at Canada, Jan. 24, 1847.

At the next general election after his return from Mexico, Price was elected Governor of Missouri, with a majority over his opponent of fifteen thousand votes. He was the compromise candidate, the one man on whom the factions in the party originating in Benton's course on the slavery question were capable of uniting. He filled the executive chair during four years, from 1853 to 1857, with great credit to himself and to the State. He was afterwards bank commissioner. During the excitement in the early part of the year 1861, Gen. Price was a staunch, earnest, and devoted Union man, using the whole of his powerful influence in opposition to the secession of this State from the Union. He was elected a delegate from the Chariton district (where he lived) to the Constitutional Convention, and such was the pronounced character of his Unionism that he was elected president of that body by a vote of seventy-five to fifteen. This convention, after refusing by a most decided and almost unanimous vote to adopt resolutions setting forth that there was adequate cause for the secession of Missouri from the Union, adjourned on the 21st day of March, 1861, to the third Monday of the following December.

A military bill had been pending in the Legislature of Missouri since the beginning of the session. In the whirlwind of excitement which followed the capture of Camp Jackson and the bloodshed attendant upon that movement this bill became a law. It conferred upon Governor Jackson very large and, indeed, almost sweeping powers, and he proceeded at once to exercise them by appointing Sterling Price major-general commanding the State Guards of Missouri. Price was well fitted for a military career, though he never had the West Point education which was by many deemed essential. He had the warrior presence and the warrior tact, the soldier's pleasure in campaigning, and the born commander's careful and tender solicitude for the health and comfort of his men, besides which he was as brave a man as ever walked. He had strong native powers, remarkable coolness and presence of mind, and he had learned much while in Mexico, where he was often thrown entirely upon his

own resources. In the language of the late E. A. Pollard, "He had a commanding presence; his plain, hearty manner endeared him to the populace, and the strength and virtue of his personal character, the Cato-like purity of his life, gave him influence over all classes of men. He was over six feet in height, with a frame to match, full, but not portly, and as straight as a son of the forest. His carriage was marked with dignity, grace, and gentleness, and every motion bespoke the attitude and presence of the well-bred gentleman. He had a large head, covered with a growth of thick white hair, a high, broad, intellectual forehead, florid face, no beard, and a mouth in whose latent smiles lurked the good humor of the man, while its straight and clear-cut line bespoke the precise mind and the exacting will."

Price was very anxious to preserve the peace, though his mind was filled with forebodings after the Camp Jackson affair, and after the failure of his armistice with Gen. Harney, in consequence of the removal of that officer and the commissioning of Capt. Lyon as brigadier-general. But he sought to make an accommodation of some sort with Lyon also. On the 11th of June, 1861, a conference was held at the Planters' House, in St. Louis, between Governor Jackson and Gen. Price on the one hand, and Gen. Lyon and others on the other, with the ostensible view to the preservation of the peace. Its result was unsatisfactory to the State authorities, who at once returned to Jefferson City and made preparations to resist what were called the encroachments of the national power. Gathering many of the archives of the government and collecting as many men, horses, equipments, etc., as possible, Governor Jackson, accompanied by Gen. Price, fled the capital, the latter issuing a proclamation calling upon the men of Missouri to fly to the standard of the State. Gen. Lyon quickly pursued with his troops, and overtook the State militia at Boonville, where (June 18th) the first battle of the war occurred. Gen. Price was not present in person, he having proceeded to the neighborhood of Fayette, and only joining his forces after the defeat. He was pursued by Col. Franz Sigel, whom he encountered at Carthage, July 5th, and after an engagement of two hours succeeded in opening his obstructed route, and continuing his flight towards the southern counties of the State. Here he collected a large force, which was soon after so strengthened by Gen. Ben McCullough's forces that Gen. Price was enabled to offer Lyon battle at Springfield, and succeeded in defeating him. He advanced farther north into Missouri, gaining strength daily, and on September 16th began the siege of Lexington by a brisk bombardment of that city. This place and its garrison of three thousand five hundred men were, after three days' fighting, captured on September 20th. This was the last triumph of Gen. Price's Missouri campaign of 1861, as soon after he was forced to retreat by Gen. Fremont, and was subsequently driven out of the State by Curtis and Halleck.

During this time Price was not regularly in the Confederate service. On his expulsion from Missouri he was entered on the list as major-general and placed in command of a division of troops. This division, with that of Van Dorn, was transferred in April, 1862, from Arkansas to Corinth, Miss., and participated, May 9, 1862, in the battle of Farmington. He retreated with the rest of Beauregard's forces from Corinth, and remained at Tupello, Miss., until the following September, when his division and that of Van Dorn were moved to Iuka. Here a portion of Gen. Grant's forces, under Rosecrans, attacked and defeated them after a hard fight, the Southern loss left on the field being one thousand four hundred and thirty-three men. Oct. 4, 1862, Price and Van Dorn attacked Rosecrans in Corinth and met with a signal repulse. Price labored under this trouble for many months, being idle for the greater part of 1863. Feb. 6, 1864, he again assumed command of the Department of Arkansas, relieving Gen. Holmes. In the following month (April 19th) he attacked and captured a foraging train of two hundred wagons belonging to Gen. Steele's command near Camden, Ark.

In August, Price was relieved by Gen. Magruder of the command of the District of Arkansas, and began his last and most memorable invasion of Missouri. Of this campaign, which was the last attempt made by the Confederate forces west of the Alleghanies to carry the war into the Border States, Price himself said, in his official report:

"In conclusion, permit me to say that in my opinion the results flowing from my operations in Missouri are of the most gratifying character. I marched fourteen hundred and thirty-four miles, fought forty-three battles and skirmishes, captured and paroled over three thousand officers and men, captured eighteen pieces of artillery, three thousand stand of small-arms, sixteen stand of colors (brought out by me, besides others destroyed by our troops who took them), at least three thousand overcoats, large quantities of blankets, shoes, and clothing, many wagons and teams, numbers of horses, and great quantities of subsistence and ordnance stores. I destroyed miles upon miles of railroad, burning depots and bridges. Taking this into the calculation, I do not think I go beyond the truth in saying that I destroyed in the late expedition

to Missouri ten million dollars worth of property. On the other hand, I lost ten pieces of artillery, two stand of colors, one thousand stand of small-arms, whilst I don't think I lost over one thousand prisoners, including the wounded left in their hands."

The invasion was ended by a single blow dealt Price at Newtonia by Gens. Blunt and Sanborn, and Price was glad to retreat. Gens. Marmaduke and Cabell were captured, and the Confederate army badly dispersed. Price retired to Arkansas, where he collected the remnants of his corps together, but there was nothing afterwards at all brilliant in his career, and the above, we believe, includes the main features of his military history. That he was a general of great ability no one can doubt, yet it does not appear that he was properly appreciated at Richmond.

Price was an especial and prime favorite with his soldiers, who loved him devotedly and had the most unlimited confidence in his ability and generalship. They used to say they would rather die under his command than fight under any other, and they nicknamed him with all sorts of whimsical but endearing epithets, such as "Old Dad Price," "Old Pap," the "Old Tycoon," etc. He was always accessible, always just, and he was kind-hearted to all.

After the war, feeling like a man whose heart was broken and his home lost, Gen. Price retreated into Mexico and entered the service of the Emperor Maximilian, attempting, but unsuccessfully, to organize a wholesale scheme of colonization. His people invited him back to Missouri, and finally he returned, but with broken and debilitated health. He dwelt, after coming back to his old State, in St. Louis, where he died on Sunday morning, Sept. 29, 1867, at two o'clock A.M.

Not many men in public life have had fewer enemies than Sterling Price. Few have had so many warm and devoted friends. His generous, benevolent, impulsive nature had a magnetism about it which attracted every one, and none were repelled by anything discordant between his noble, dignified presence and his character and abilities.

The arrangements entered into between Generals Harney and Price on May 21, 1861, gave great offense to the Union people of St. Louis, especially to the more exiguous class who preferred the "thorough" policy of Gen. Lyon and Col. Frank Blair. Lyon had now been duly commissioned as brigadier-general of the Missouri Volunteers, and an active intrigue had begun in Washington between the men who wished Harney retained in command in Missouri and those who sought to have him superseded by Gen. Lyon. In the Federal city, indeed, this contest assumed the character of a struggle for influence between Attorney-General Bates and Postmaster-General Blair. Bates had Scott on his side and much conservative influence from St. Louis; but the Blairs were active and indefatigable, and they were supported by every radical influence in and out of the army, as well as by the Secretary of War himself. They stood to win, of course. The same envelope which covered Lyon's commission as brigadier-general of volunteers contained a special order of the War Department, dated May 16th, and signed by the adjutant-general, to the effect that "Brig.-Gen. W. S. Harney is relieved from command of the Department of the West, and is granted leave of absence until further orders." This order in effect relieved Harney from the prospect of further service upon the field of action. It was, however, not delivered forthwith, for it was accompanied by a letter to Frank Blair, as follows:

"WASHINGTON, D. C., May 18, 1861.

"HON. F. P. BLAIR:

"MY DEAR SIR,—We have a good deal of anxiety here about St. Louis. I understand an order has gone from the War Department to you, to be delivered or withheld in your discretion, relieving Gen. Harney from his command. I was not quite satisfied with the order when it was made, though on the whole I thought it best to make it; but since then I have become more doubtful of its propriety. I do not write now to countermand it, but to say I wish you would withhold it, unless in your judgment the necessity to the contrary is very urgent. There are several reasons for this. We better have him a *friend* than an *enemy*. It will dissatisfy a good many who otherwise would be quiet. More than all, we first relieve him, then restore him; and now if we relieve him again the public will ask, 'Why all this vacillation?'

"Still, if in your judgment it is *indispensable*, let it be so.

"Yours very truly,

"A. LINCOLN.

"(Private.)"

But this letter only caused a delay of a few days. Disquieting rumors came to St. Louis of invasion of Missouri from Arkansas, and on May 30th Blair sent the special order to Harney. The next day, having to appear in court in connection with the McDonald *habeas corpus* case (according to the report of a St. Louis newspaper at the time), "Gen Harney's amended answer to the writ in the case of Capt. McDonald was read, in which he stated that on the previous evening he had been relieved from the command of this department by an order dated at headquarters on the 16th of May, but which was not made known to him until the time stated. Where it has been, or how delayed, are matters about which the public can know nothing, and we have not inquired. Gen. Harney assumed command of his department on the 12th of May, immediately following the occurrences on the 10th and 11th at Camp Jackson and on Walnut Street.

On Sunday he issued a proclamation tending to quiet the excitement which pervaded the public mind, lest other excesses should be committed in St. Louis. Each day thereafter witnessed some action which served to restore confidence, and on the 21st he and Gen. Price had the interview which resulted in the arrangement that gave peace to the State. Since that time a better and more secure feeling has prevailed, and no one doubted the ability of the two generals, by the understanding and confidence reposed in each other, to maintain perfect quiet. The reason for this order for relieving him of the command here, without assigning him to duty elsewhere, at a time, too, when the government is sadly in want of experienced officers, is now known, and, of course, comment is precluded; but this we will say for Gen. Harney, that his eighteen days' service was of infinite benefit to St. Louis in reinstating the peace of the city, and that he has the thanks of the people for his judicious and unwearied efforts to secure that end."

It is not compatible with the scope of this work to give more than a rapid sketch of the long, adventurous, and highly honorable career of Gen. William Selby Harney. He was born in Davidson County, Tenn., Aug. 22, 1800, and was the youngest of eight children. His father was a man of great resolution, as was shown in a controversy with Andrew Jackson, then a judge, in which he won Jackson's respect, and which, no doubt, was the cause of the friendliness which Jackson showed for Gen. Harney throughout his whole career.

Young Harney's elder brother was a surgeon in the army, and the boy was early thrown into the companionship of men of arms, and made the acquaintance of such courtly members of the profession as Scott, Macomb, Wool, Gaines, and Brady, then fresh from the war of 1812. His youthful imagination became fired by an ardent longing for a career such as theirs, and in 1818 his wish was gratified, he having been appointed by President Monroe a lieutenant in the First Regiment of infantry. His command was then stationed in Louisiana, and Harney's first military experience was gained on an expedition against the notorious pirate Lafitte.

Several years of rather uneventful service followed, extending from the lakes to the Gulf, and from Maine to Florida. In 1823 he visited St. Louis, on his way to Council Bluffs, where an Indian outbreak was anticipated; but the war not taking place, he wintered at Bellefontaine, near St. Louis, and the next year accompanied a peace commission, composed of Gen. Atkinson and Maj. O'Fallon, to the upper Missouri, where treaties were made. Upon this expedition he met Gen. Ashley, the great fur-trader of St. Louis, and Ashley, who was greatly pleased with the young soldier, proposed to Harney to fit out a trading expedition to the Yellowstone, Harney to have charge of it and to receive half the profits. The young lieutenant, who possessed no fortune except his pay, no doubt found it hard to decline the tempting offer, but ultimately did so, preferring to remain in the profession of his choice, which he was destined so conspicuously to adorn.

From this expedition Harney returned to Council Bluffs, where (in 1824) he was made a captain. In 1827 he was ordered to Jefferson Barracks, and in 1828 participated in an excursion against the Winnebagoes in Wisconsin. In the fall of that year he was ordered to Fort Winnebago, Wis., where he spent two monotonous years.

At this time Capt. Harney was one of the handsomest men in the army, six feet three inches tall, of a slim and graceful figure, with dark red hair, expressive eyes, and a clear, ruddy complexion. Jefferson Davis, who was stationed at Fort Winnebago in 1829, wrote of him in 1878 as follows:

"MISSISSIPPI CITY, MISS., January, 1878.

"*L. U. Reavis, Esq., St. Louis, Mo.:*

"SIR,—It gives me pleasure to comply with your request of the 30th ult. for some reminiscence in connection with my old friend, Gen. W. S. Harney. In the spring of 1829 I reported as brevet second lieutenant to the commanding officer at Fort Winnebago. Gen. Harney was then stationed at that post, and captain of Company K, First United States Infantry. At that period of his life he was, physically, the finest man I ever saw. Tall, straight, muscular, broad-chested and gaunt-waisted, he was one of the class which Trelawney describes as 'nature's noblemen,' against whom the plague in the East 'never made an attack.' Had he lived in the time of Homer he would have robbed Achilles of his sobriquet of the 'swift-footed,' for he would run faster than a white man, farther than an Indian, and in both showed that man was organized to be master of the beast. To elucidate the last clause of the preceding paragraph requires the recital of an anecdote. Capt. Harney carefully attended to his company's garden, which, on the frontier, was necessary for the comfort as well as the health of the men. The beds had been carefully spaded and roped, when one of his numerous dogs, a half-grown mongrel hound, came walking across the carefully-prepared ground, and the captain, storming at him in tones and language not suited to the pupil, frightened the dog so that, instead of going out by the walk, he ran across the bed towards the gap in the fence. The captain started in full run after the dog, which had to jump on the fence and then off it, fatal disparity to the dog! for the captain cleared the fence at a bound, which brought him a jump nearer to the dog, and then began an even run up the long slope which led to the fort, before reaching which Harney mastered the dog, and 'Rover' suffered in proportion to the length of the chase. Capt. Harney was also a bold horseman, fond of the chase, a good boatman, and skillful in the use of the spear as a fisherman. Neither drinking nor gaming, he was clear of those rocks and shoals of life in a frontier garrison, and is no doubt indebted to this abstinence for much of the vigor he has possessed to his

present advanced age. By long service on the Indian frontier, together with the practice since which tests all theory by actual observation, he has acquired that knowledge of Indian character which is often conspicuously exhibited in his military career.

"Of the incidents thus generally referred to you have so many other sources of information that it would be needless for me to enter into detail, but I should do injustice to the subject of this letter if I did not call your attention to the project of the Indian treaty he made with the Sioux in 1855 or 1856. I think it constituted the best basis for an arrangement between the United States government and an Indian tribe that has ever been devised, and if carried out would impress the Indians with their responsibility, and bind them to more faithful observance of it than ever did any of those verbose, miscalled treaties which are to be found spread over the records of the United States.

"Very respectfully,

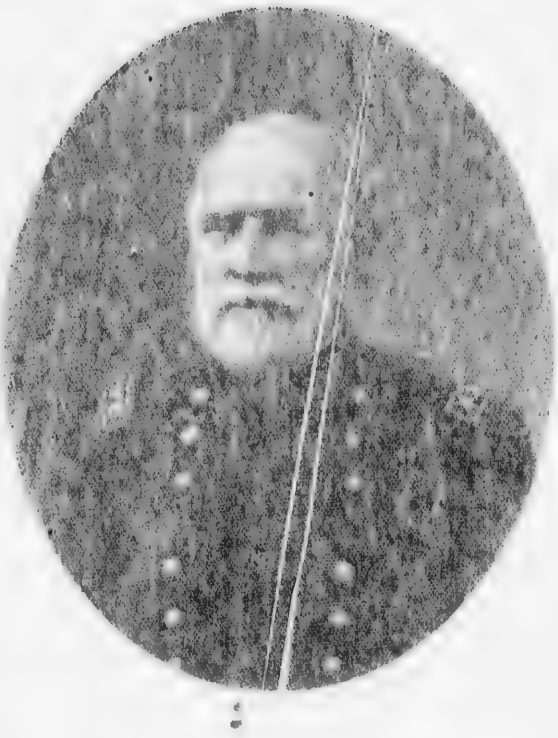
"JEFFERSON DAVIS."[1]

Capt. Harney's next conspicuous service was in the Black Hawk war, in which he conducted himself with great distinction. This being over, he obtained leave of absence, which he spent at St. Louis. The handsome young captain always greatly enjoyed the elegant and polite society of St. Louis, and his gallantry and graces of person and manner made him an especial favorite with the ladies. During one of his visits to the town he made the acquaintance of Mary Mullanphy, daughter of Hon. John Mullanphy, the distinguished citizen and philanthropist, and in January, 1833, he married her.

From this union resulted John M. Harney, still a citizen of St. Louis; Eliza Harney, Countess de Noüe, whose husband is a general in the French army; and Anna B., married to the Viscount de Thury, an officer in the French navy, who served under Maximilian in the invasion of Mexico in 1864. Mrs. Harney died in Paris in 1864.

In 1832, Capt. Harney was appointed a paymaster with the rank of major, and soon after President Jackson promoted him to a lieutenant-colonelcy. When the Seminole war in Florida broke out, Harney was dispatched thither, and served in several campaigns with conspicuous energy and courage. On more than one occasion movements of great responsibility were entrusted to him, and he always acquitted himself with prudence and credit. His previous service on the Northwestern frontier had given him a knowledge of the Indian character that was utilized to great advantage in this emergency. The Seminole war was one of the least satisfactory and least glorious wars ever waged by United States troops. The ablest generals of the country, who had successfully fought Wellington's veterans, and who later covered themselves with glory in Mexico, were baffled and humiliated by the adroit and able leaders of the savages; but there seems to be no doubt that Col. Harney's services were more efficient than those of almost any other officer in the field. In April, 1841, he was breveted colonel for "gallant and meritorious conduct in several successive engagements with hostile Indians in Florida."

Years of peace followed until the Mexican war gave the soldiery something more to do. In this struggle Col. Harney's exploits were of the most brilliant character. At the outbreak of hostilities he was promoted to the colonelcy of the Second Dragoons. Gen. Taylor at first placed him in command of the troops protecting the Texan frontier, but his position was unendurable, as he was separated from his regiment, and had no share in the engagements which marked the advance of the United States forces into Mexico. He demanded permission to rejoin his regiment, and having received instructions to do so reported to Gen. Scott, by whom he was ordered to return to Taylor. For refusing to obey this order he was court-martialed and sentenced to six months' suspension and a reprimand, but the sentence was never executed, and Gen. Scott finally directed him to join his regiment. He subsequently participated in all the leading engagements on the memorable march to the City of Mexico. His dragoons were ever in front and on the flank of the main army, constantly making reconnoissances and feeling for the enemy and pricking him up. At Madeline, contrary to Gen. Scott's commands not to engage the enemy, he turned a reconnoissance in force into a fight, routed the enemy, and gained an important advantage. Gen. Scott forgave this brilliant act of disobedience in consideration of the results achieved. Gen. Frost, of St. Louis, who was much with Harney in that campaign, asserts that the world never saw such fighting as occurred in that war. Col. Harney's participation throughout was characteristically impetuous and dashing. His storming Cerro Gordo was one of the most desperate of his many deeds of daring, and stands out in bold relief as one of the conspicuous events of the war. For his conduct in this engagement he was breveted brigadier-general in July, 1848.



The capture of the City of Mexico terminated the war, and from 1848 to 1852 Gen. Harney was stationed at Austin, Texas, where he organized several expeditions against hostile Indians. He was then granted leave of absence to spend some time with his family abroad; but soon after a general Indian war was threatened, and he, being regarded as the man of

all others to bring it to a successful conclusion, was recalled. On his arrival in Washington President Pierce said to him, "Gen. Harney, you have done so much that I will not order you to the frontier, but I do wish you would assume the command and whip the Indians for us." In two campaigns he brought the Indians to terms, and although he had no authority to treat with them, he ventured to make a treaty, which was ratified by the United States Senate, and was warmly approved in all quarters. It was based on the fact that the character of the Indian was being greatly modified by the increasing scarcity of his game supply of food, and that, therefore, he would ultimately have to betake himself to labor, but that in order to make a beginning it was necessary that he should have help. This Gen. Harney agreed, on behalf of the government, to supply by furnishing the Indians with tools, seed, etc., and instructing them in the art of agriculture. The Sioux, on their part, granted Harney's demands for past grievances, and promised to keep the peace in future. Jefferson Davis, the Secretary of War, subsequently described it as the "model treaty;" but unfortunately for its permanence, the government was lax in fulfilling the obligations which it had voluntarily imposed upon itself.

Gen. Harney's next important service was in Kansas, then seething with excitement over the slavery question. He acted with such sagacity and prudence that he succeeded in preserving peace between the two factions, and the danger of a bloody outbreak was averted.

During President Buchanan's administration he was ordered to proceed to Oregon to put down Indian troubles there, and with Father de Smet, a noted missionary, started thither, but on arriving at San Francisco he learned that the dread of his name had induced the Indians to make peace as soon as they heard that he was coming. He, however, proceeded northward to Fort Vancouver, where trouble had for some time been brewing with the British over the ownership of San Juan. Being appealed to by the American residents for protection, he took possession of the island, just in season, no doubt, to prevent like action on the part of the British commander, who had a large fleet in the harbor. This bold *coup* threatened for a time to cause a war between the United States and England, but peace was maintained, and years later, when, under the treaty of Washington, the question as to the ownership of the island was submitted to the arbitration of the Emperor of Germany, the claim of the United States was sustained, and Gen. Harney's judgment was thus conspicuously vindicated.

During the period preceding the outbreak of the civil war Gen. Harney was at Washington, and conferred with President Buchanan daily on the situation. Buchanan's vacillation dismayed him, and it becoming apparent that the President was giving ear to other counselors, Gen. Harney lost patience, and remarked to Mr. Buchanan one day, "Some one has your ear who is neither a friend of the Union nor of yours."

When the war began Gen. Harney was stationed at St. Louis, and was a keenly interested and anxious observer of affairs. His own loyalty to the Union was not disguised, but his Southern birth and associations caused some who little knew his patriotism to affect to distrust him. On his way to Washington, in April, 1861, he was arrested by the Confederates at Harper's Ferry, but was soon released, and it was represented in the press that he was a willing prisoner of the State of Virginia, and intended to throw up his commission in the United States army and follow Lee and Beauregard into the Confederate service. In order to disprove these assertions Gen. Harney addressed a letter to Col. John O'Fallon, in which he eloquently proclaimed his devotion to the flag under which he had fought for forty years, and warmly implored his fellow-citizens "not to be seduced by designing men to become the instruments of their mad ambition by plunging the State into the vortex of secession." Many Southern officers had left the United States service for that of the Confederacy on the plea that their first allegiance was due to their States, but in his letter to Col. O'Fallon, Gen. Harney combated this doctrine, and declared that "the soldier's and citizen's primary duty is due to the United States government, and not to the government of his State."

On the 10th of May, 1861, he was appointed to the command of the Department of the West, and on the following day arrived in St. Louis. He found the city, as we have before stated, in an indescribable state of excitement over the capture of Camp Jackson and the scenes which followed. Gen. Harney's arrival inspired confidence, and he received the cordial support of the intelligent and prudent. The situation was critical in the extreme, but Gen. Harney was thoroughly convinced that there was no need of firing a gun in Missouri, and that a policy of firmness tempered with prudence and moderation would suffice to allay the agitation. Governor Jackson was undeniably in favor of secession, and was reported to be preparing to use the State militia to force Missouri out of the Union; but the improbability of his having a strong following was shown in the fact that the State by eighty thousand majority had declared against secession. In view of such an overwhelming sentiment in favor of

the Union, and in the absence of any overt act on the part of Governor Jackson, it seemed to Gen. Harney sufficient for the present simply to keep the peace; therefore on the 14th of May he issued his famous proclamation. This document denounced the "military bill" just passed by the Legislature as in effect a secession ordinance in disguise, and unworthy, therefore, of obedience by the people. The capture of Camp Jackson was approved, because in Gen. Harney's opinion the treasonable nature of the encampment could not be doubted. He urged the people, however, to use prudence, in order to avert the danger which threatened the State, and showed them how their interests were indissolubly bound to the Union. In addition, he resolutely affirmed it to be his purpose to maintain the authority of the supreme law of the land, and to suppress all unlawful and treasonable combinations of men.

Gen. Harney then addressed himself to the work of pacification, but a party which he then thought and now charges was led by Col. Francis P. Blair was dissatisfied with his policy, and sought to secure his removal. His course, however, was approved by many of the leading citizens, who sent two of their number, Messrs. Gamble and Yeatman, to Washington to impress on the President the probability that Harney's policy would effect a peaceful solution of the difficulty.

The next stage in this controversy was the celebrated agreement of Gen. Harney with Gen. Price, commanding the Missouri State Guard, which is to be found in full elsewhere. This compact began by reciting that the two had met and agreed that they had only a common object, namely, to restore peace and order under the laws of the national and State governments. To effect this Gen. Price undertook, with the sanction of the Governor, to direct the whole power of the State officers to maintaining order within the State, and this being assured Gen. Harney declared that he had neither occasion nor wish to make military movements that might create excitement and jealousy, which he most earnestly desired to avoid.

This agreement was hailed with general approval, and the *Missouri Democrat*, the organ of the administration, said the terms of the negotiation would give satisfaction to all but traitors. It congratulated Harney on having concluded a peace which would keep Missouri in the Union and guaranteed ample protection to every Union citizen, and invoked a curse on the hand that should first be raised to violate the compact.

On the 31st of May, Gen. Harney received a special order relieving him from the command of the Department of the West. "Johnson's Encyclopedia" says he was relieved for making an unauthorized truce with Gen. Price, but this is an error, for the agreement with Price was published May 21st, while the order of removal was dated May 16th. It is asserted that the removal was the work of the Blairs, and that Montgomery Blair prepared the memorandum on which the order was issued. President Lincoln signed the order, but evidence goes to show that he did so with great reluctance. It arrived in St. Louis May 20th, among dispatches for Francis P. Blair, who withheld it until the 31st. Among the literature on the subject is a letter from Mr. Lincoln to Mr. Blair, expressing the hope that events would not render it necessary to serve the order upon Gen. Harney, and presenting reasons why his removal would be unwise. Reading this remarkable letter "between the lines," it is apparent how averse he must have been to the action urged upon him by Montgomery Blair, and how conscious he was of the character of the indignity to which he had been persuaded into subjecting the trusty soldier and patriot, Harney. When Gen. Scott heard of Harney's removal he said it would cost the government immense treasure and thousands of lives. President Lincoln is reported to have admitted that it was one of the greatest blunders of his administration.

Why, then, was he removed? This reason is assigned: His policy was yielding golden fruit; confidence and tranquillity were rapidly resuming sway, and those who were anxious for war in Missouri saw the opportunity fast slipping away. They are said to have filled the President's ear with doubts of Harney's loyalty, and to have carried to him curdling tales of the outrages to Union people which his policy was bringing forth. Among the desperate means resorted to by his enemies, as Gen. Harney charged, were manufactured reports of indignities heaped upon Unionists by secessionists, the manifest intent being to prove that Missouri was a disloyal State, and should be treated as such, and that Harney's policy of conciliation was simply strengthening the secession designs of Governor Jackson. On the other hand, there seems to be no doubt whatever that Gen. Harney was fully prepared to fight the secessionists if a conflict became unavoidable, but he strove to postpone bloodshed as long as possible. In fact, he was "between two fires." Governor Jackson was endeavoring to take Missouri out of the Union, and seemed to be anxiously waiting for some act of Federal aggression (like that of the capture of Camp Jackson) as an excuse for a hostile movement, while the radical Unionists were equally anxious to precipitate a conflict, suspecting Governor Jackson of an intention to proceed to extremities. A

collision probably could not have been prevented but for the prudent and patriotic course of Gen. Harney. In the interval, under the beneficent operation of his policy, the sentiment of loyalty to the Union continued to grow and strengthen, and every day served to render more and more apparent the hopelessness of the designs of the secession leaders. But the extremists among the pronounced anti-Southern men could not wait, and Mr. Lincoln deputed Col. Frank Blair to remove Harney, if necessary, with the result already stated. Under the circumstances Gen. Harney was justified in feeling that he had been made the foot-ball of designing politicians, but he gave no sign of impatience, having learned the soldier's duty of silent obedience. He might have erred in the trying period under consideration, but his motives were unquestioned, and he never doubted that his fellow-citizens of Missouri would one day do him justice.

This episode ended Gen. Harney's military career, and soon after the war he was retired on half-pay. After laying down the command of the department to which Missouri belonged he retired to a farm which he had purchased in Jefferson County, Mo., and engaged actively in agricultural life. During the years which followed he simply waited for orders from his military superiors that never came, although the President was strongly importuned to place him in command of the Department of the Pacific. The general remained in Jefferson County for two or three years, and then established himself on a large farm which he had bought near Mount Olive, Mo., and the "hero of a hundred fights" might have been seen cutting his way through the brush and building new roads, etc. He next purchased a farm of eighteen hundred acres in Crawford and Franklin Counties, where he built a large castle-like house with twenty rooms and costing many thousand dollars. He lived there until about 1879–80, when his great age and the state of his health impelled him to seek a more southern climate, and he settled at Pass Christian, La., on the Gulf of Mexico, where he has one of the handsomest villas in the South, which he makes his winter home, spending the summer in visits to St. Louis and the North and East.

Gen. Harney's closing public service was rendered in 1865, when he served as a member of the Indian Peace Commission which established the Sioux reservation. He brought to this task the rich stores of forty years of intimate acquaintance with the savages, and such was the confidence of the government in his honesty and judgment that warrants were drawn for one million dollars of supplies for the Indians on his bare requisition without examination.

Gen. Harney inherited from his wife large estates, located chiefly in St. Louis, and he himself has purchased property at various times in Texas, Florida, and Mississippi. The appreciation of most of this property has added largely to his wealth, the care and management of which form the chief occupation of his declining years. The storms and toils of eighty-two years have dealt lightly with him. His tall form is but slightly bent with age, and his bearing is still as gallant as ever. Only failing eyesight and a treacherous memory warn him that he is growing old. The nation has never sheltered a nobler or more unselfish heart than that of William S. Harney. A born leader, he is one of nature's captains, whose tall plume was always in the forefront of battle, and of him it has been eloquently written that he possessed all those elements of manhood which in earlier times produced the patriarch who combined the functions of the warrior, the legislator, and the judge. He has made laws for savage tribes, and has governed them with justice and moderation. Vexed questions of diplomacy have come before him for settlement, and he has found for them a ready solution. He has been the valued companion and associate of chieftains, explorers, travelers, scholars, statesmen, and divines, and was the friend and adviser of every President from Monroe down to Gen. Grant. In his green old age there is no man in the whole country who enjoys a larger measure of well earned and thoroughly merited popular respect.

In a few days after the removal of Gen. Harney from the command of the Department of the West, followed Governor Jackson's proclamation calling out the militia and plunging Missouri into the civil war:

"To the People of Missouri:

"A series of unprovoked and unparalleled outrages have been inflicted upon the peace and dignity of this Commonwealth, and upon the rights and liberties of its people, by wicked and unprincipled men professing to act under the authority of the United States government. The solemn enactments of your Legislature have been nullified; your volunteer soldiers have been taken prisoners; your commerce with your sister States has been suspended; your trade with your own fellow-citizens has been, and is, subjected to the harassing control of an armed soldiery; peaceful citizens have been imprisoned without warrant of law; unoffending and defenseless men, women, and children have been ruthlessly shot down and murdered; and other unbearable indignities have been heaped upon your State and yourselves.

"To all these outrages and indignities you have submitted with a patriotic forbearance which has only encouraged the perpetrators of these grievous wrongs to attempt still bolder and more daring usurpations.

"It has been my earnest endeavor under all these embarrassing circumstances to maintain the peace of the State, and to avert, if possible, from our borders the desolating effects of a civil war. With that object in view I authorized Maj.-Gen.

Price several weeks ago to arrange with Gen. Harney, commanding the Federal forces in this State, the terms of an agreement by which the peace of the State might be preserved. They came, on the 21st of May, to an understanding which was made public. The State authorities have faithfully labored to carry out the terms of that agreement. The Federal government, on the other hand, not only manifested its strong disapprobation of it by the instant dismissal of the distinguished officer who, on its part, entered into it, but it at once began, and has unintermittingly carried out, a system of hostile operations in utter contempt of that agreement and in reckless disregard of its own plighted faith. These acts have latterly portended revolution and civil war so unmistakably that I resolved to make one further effort to avert these dangers from you. I therefore solicited an interview with Brig.-Gen. Lyon, commanding the Federal army in Missouri. It was granted, and on the 10th inst., waiving all questions of personal and official dignity, I went to St. Louis, accompanied by Maj.-Gen. Price.

"We had an interview on the 11th inst. with Gen. Lyon and Col. F. P. Blair, Jr., at which I submitted to them this proposition: that I would disband the State Guard and break up its organization; that I would disarm all the companies which had been armed by the State; that I would pledge myself not to attempt to organize the militia under the military bill; that no arms or munitions of war should be brought into the State; that I would protect all citizens equally in all their rights regardless of their political opinions; that I would repress all insurrectionary movements within the State; that I would repel all attempts to invade it from whatever quarter, and by whomsoever made; and that I would thus maintain a strict neutrality in the present unhappy contest, and preserve the peace of the State. And I further proposed that I would, if necessary, invoke the assistance of the United States troops to carry out these pledges. All this I proposed to do upon condition that the Federal government would undertake to disarm the Home Guards, which it has illegally organized and armed throughout the State, and pledge itself not to occupy with its troops any localities in the State not occupied by them at this time.

"Nothing but the most earnest desire to avert the horrors of civil war from our beloved State could have tempted me to propose these humiliating terms. They were rejected by the Federal officers.

"They demanded not only the disorganization and disarming of the State militia and the nullification of the military bill, but they refused to disarm their own Home Guards, and insisted that the Federal government should enjoy an unrestricted right to move and *station* its troops throughout the State whenever and wherever they might, *in the opinion of its officers*, be necessary, either for the protection of the 'loyal subjects' of the Federal government or for the repelling of invasion; and they plainly announced that it was the intention of the administration to take military occupation, under these protexts, of the whole State, and to reduce it, as avowed by Gen. Lyon himself, to the 'exact condition of Maryland.'

"The acceptance by me of these degrading terms would not only have sullied the honor of Missouri, but would have aroused the indignation of every brave citizen, and precipitated the very conflict which it has been my aim to prevent. We refused to accede to them, and the conference was broken up.

"Fellow-citizens, all our efforts towards conciliation have failed. We can hope nothing from the justice or moderation of the agents of the Federal government in this State. They are energetically hastening the execution of their bloody and revolutionary schemes for the inauguration of a civil war in your midst, for the military occupation of your State by the armed bands of lawless invaders, for the overthrow of your State government, and for the subversion of those liberties which that government has always sought to protect: and they intend to exert their whole power to subjugate you, if possible, to the military despotism which has usurped the powers of the Federal government.

"Now, therefore, I, C. F. Jackson, Governor of the State of Missouri, do, in view of the foregoing facts, and by virtue of the powers vested in me by the Constitution and law of this Commonwealth, issue this my proclamation, calling the militia of the State, to the number of *fifty thousand*, into the active service of the State, for the purpose of repelling said invasion, and for the protection of the lives, liberty, and property of the citizens of this State. And I earnestly exhort all good citizens of Missouri to rally under the flag of their State for the protection of their endangered homes and firesides, and for the defense of their most sacred rights and dearest liberties.

"In issuing this proclamation, I hold it to be my solemn duty to remind you that Missouri is still one of the United States; that the Executive Department of the State government does not arrogate to itself the power to disturb that relation: that that power has been wisely vested in a convention, which will, at the proper time, express your sovereign will; and that meanwhile it is your duty to obey all the *constitutional* requirements of the Federal government. But it is equally my duty to advise you that your first allegiance is one to your own State: and that you are under no obligation whatever to obey the *unconstitutional* edicts of the military despotism which has enthroned itself at Washington, nor to submit to the infamous and degrading sway of its wicked minions in this State. No brave and true-hearted Missourian will obey the one or submit to the other. Rise, then, and drive out ignominiously the invaders who have dared to desecrate the soil which your labors have made fruitful, and which is consecrated by your homes!

"Given under my hand as Governor, and under the great seal of the State of Missouri, at Jefferson City, this 12th day of June, 1861.

"By the Governor,

"CLAIBORNE F. JACKSON.

"B. F. MASSEY,

"*Secretary of State.*"

June 17th was another day of excitement and bloodshed in St. Louis, caused by the undisciplined "Home Guards." As the *Missouri Republican* said in its comments on this affair, "The vital principle of all military bodies is discipline. What kind of soldiers are those who pay no regard to the orders of their superiors, but who are seized with a panic the moment an explosion of fire-arms takes place, like so many timid women? If a battalion of four or five companies can be thrown into such utter confusion and anarchy as were witnessed on Monday by the accidental discharge of a gun, or even say a premeditated pistol-shot from a window, what would be their conduct on the field of battle, amidst the continuous rattling of bullets and the thunders of hoarse cannon? If our troops cannot learn to behave themselves like soldiers, let them doff the garb of soldiers. At all events they should see to it as Home Guards, organized to protect the hearths and family circles of our

citizens, they do not, on every pretext, send grief and poignant affliction into the hearts of parents and wives and children by taking away precious and innocent lives."

The occurrence happened in this wise, to follow once more a contemporary narration: "An unprovoked and wanton outrage, involving the lives of several peaceful citizens, was yesterday committed on our streets by a battalion of Col. Kallmann's 'Home Guards.' We shall not attempt to find any excuse or palliation for it in the character of the cause in devotion whereto these men became possessed of the means to commit it. We can never sanction such brutal and murderous acts, nor shelter them under any apology whatever. Their conduct was ill advised, rash, and culpable to the last degree, and we feel that in so denouncing it we are but performing a duty which would be almost criminal to be left undone. When we shall have stated the facts without bias or prejudice, every fair reader will, we think, agree with us in this.

"About ten o'clock yesterday morning, a detachment of Col. Kallmann's regiment, returning from a trip up the North Missouri Railroad, whither they had been under orders to guard the bridges, passed down Seventh Street to their rendezvous in the lower part of the city. As usual in cases of military movements in the city, curiosity prompted large numbers of people to assemble on the sidewalks and at the doors and windows of residences to survey the manœuvres of the troops. Their passage was in no way interrupted, and, as far as we can learn, there were no exhibitions of any kind calculated to arouse the least feeling of hostility. There was no hooting or abusive language on the part of the spectators. On the contrary, while many cheered the men as they marched along, those who did not feel disposed to join in these demonstrations remained silent and passive observers.

"On reaching a point midway between Olive and Pine Streets, the centre of the column showed signs of extraordinary commotion, consequent upon an explosion of fire-arms. Immediately afterwards the troops in advance wheeled, and almost simultaneously a volley of bullets was showered upon the houses on the east side of Seventh Street, extending the whole length of the block, from Pine to Olive. The greater part of the fire seems to have been directed towards the balcony of the recorder's court, situated in the second story of the building known as the Missouri Engine House, where a number of persons, officers of the court, policemen, and others, were standing. The marks of seventy-two bullets were counted upon the walls, doors, shutters, and windows in the neighborhood, but it is supposed, from the indiscriminate and awkward character of the firing, that a much larger number of guns were discharged, the balls passing above the houses. The disaster from this volley was, under the circumstances, comparatively small, and almost miraculous. Four persons were instantly killed, two mortally wounded, and a few others slightly hurt. The crowd was of course seized with a panic, and fled in every direction. Preparations, we believe, were made for a second fire, but this was withheld, as by that time there was no enemy in sight.

"Meantime, Capt. J. W. Bissell, who had assumed command of the battalion, made himself busy by warning persons in the neighborhood to remove their valuables, etc. He told a young man in attendance at Armfield's drug-store, corner of Seventh and Olive, to take out all the books, money, and papers, for they would blow up the engine-house adjoining in less than five minutes. The same warning, we are informed, was extended to the proprietors of a grocery and provision store next door. For some reason, however, the threat was not carried into effect.

"It was reported that the first shot previous to the wheeling of the head of the column was fired upon the troops from the balcony of the recorder's court, and this would seem to explain the attentions of the Home Guards in that direction. But we have the most positive and convincing statements of trustworthy witnesses that such was not the case.

"The scene in the recorder's court was frightful. Dead men lay on the floor, and pieces of the iron balcony in front of the windows and splinters of wood covered their bodies, and were stained in the blood that had flowed from their wounds. Pools of gore were collected around the recorder's desk and near the witness-stand, and the whole interior of the room looked as if a mob had been wreaking their fury upon it. Those who were in the court at the time state the scene as frightful when the terrible Minié missiles came whizzing through the windows, striking down people on every side.

"The number of those killed are four, and wounded two. The names of the former are N. M. Pratt, a policeman, whose home was on Eleventh Street, between Cass Avenue and O'Fallon. Mr. Pratt had been on the police force since 1850, and was one of the most skillful officers in the city. Keren Tracy, an Irishman by birth, was also killed; residence on Gay Street, between Fifteenth and Sixteenth. Charles Cella, an Italian fruit dealer on the corner of Seventh and Pine, and a man named Burns completed the

victims. Officer Pratt was killed by a ball entering his side and passing through his heart as he stood at the window. Keren Tracy received a ball in his left side, from thence it passed over to his right, and lodged in his shoulder. Cella was killed by a ball in his breast, and Burns received one in his head, which passed completely through it, tearing the skull to pieces. Deputy Marshal Frenzel was mortally wounded, receiving three balls in his left and one in his right leg. There were one or two others slightly wounded."[1]

Jefferson Barracks.[2]—Under the Spanish *régime* the troops stationed at St. Louis occupied the barracks erected for their accommodation in the inclosure known as the "Fort on the Hill," which was bounded by what are now Fourth, Fifth, Elm, and Market Streets. The barracks were located near the line of Fifth Street, and parallel with it. After the transfer of the country to the United States, in 1804, the barracks were occupied for about two years, when the

[1] "E. G. Brooke, deputy city marshal," says the *Republican*, "states that he was standing on the balcony in front of the recorder's court, leaning against the south window, looking at the troops. When the first shot was discharged, he was looking towards the southwest corner of Olive and Seventh Streets. The head of the column was then near Pine Street. Marshal Brooke observed the troops 'obliquing' around a wagon that was backed up against the curbstone. While they were going through this manœuvre, he saw a gun discharged from the ranks, saw the blaze from the muzzle and the smoke, and then turning towards Pine Street, he saw the front ranks turn in considerable disorder and level their muskets at the balcony. Then stepping inside the court-room, Marshal Brooke gave the alarm to the persons in the room, who immediately hastened out of the range of the volley that in a moment after thundered along the street.

"Officer Pratt was standing on the balcony in front of the north window; he was shot below the heart, the ball passing through his body, and never spoke afterwards. Marshal Brooke states most positively that the first and only firing was done by the Home Guards. He pronounces the report that some one fired a pistol from the recorder's court balcony a lie. There were two or three other persons on the balcony besides Brooke and Pratt.

"When the commotion took place in the recorder's court, the prisoners in the dock inquired what they should do. Marshal Brooke told those who had been arrested on trifling charges to leave, but required those arrested on State charges to remain. There were two or three of the latter, among whom was St. Clair, held for murder. They rushed for the windows to escape, when Deputy Marshal Frenzel followed as far as the balcony, but was mortally wounded in the legs, receiving four balls.

"Dr. Newman, who lives in the first house north of Olive Street, and saw the whole affair, says he was sitting on the steps, and had been counting the soldiers as they passed his house. Whilst doing so, they commenced capping their guns, when the loud clicking of the locks alarmed his wife, and she got up and asked him what it meant. He told her not to be alarmed, all was quiet, and there was no danger. Immediately after, and just as the rear-guard had passed his house, he observed the discharge of a musket in the ranks. At once the whole body wheeled and fired into the recorder's court and buildings adjoining. There was not a shot previous to the general firing, except that of the soldier in the ranks. If there had been he would have noticed it. No disorder of any kind, not even a word addressed to the soldiers, was indulged in, as far as he could see, by any one in the vicinity. The troops as they passed his house exhibited a good deal of disorder. Mrs. Newman and her daughter also witnessed the affair, and saw the musket discharged by the soldier, and were positive no other shot was fired in the vicinity.

"Mrs. Hough, the wife of the president of the Marine Insurance Company, witnessed the commencement of the firing. She was sitting in the window of her house, gazing at the troops as they passed. While doing so her daughter asked why they were cocking their guns. Immediately after she saw one of the muskets pointed up into the air and discharged, followed by a general firing from the whole ranks. She at once drew back from the window, when a ball struck close to the sill, tearing away a brick. She knew no shot preceded the general firing, except the discharge of the musket by the soldier, as her residence is situated close to where the occurrence took place, and she would have noticed it. She was positive no pistol or other weapon was discharged from any place in the vicinity.

"Mr. Wm. H. Langdale, whose store is directly opposite the place where the firing occurred, says he was standing in the door when the troops passed; he saw several putting caps on their guns. The man who fired the shot he saw get a cap from a soldier on his right, and after placing it on his musket, was doing something with the lock when the piece went off. The sergeant, who was only a few feet from him, turned and reprimanded him sharply for it. He then looked up the street, and saw the head of the column turn around in disorder and shoot. The officers did not give any command, but seemed to do all in their power to prevent the firing. He was positive there had been no other shots fired whatever. He was standing in his door at the time, and the shot fired took place directly in front of him, and only distant a few feet, so that he could not be mistaken.

"The reporter of the *Evening News*, who was in the recorder's court at the time of the firing, gives the following statements, obtained immediately after the occurrence:

"Henry Siebert, a German, who was standing on the sidewalk near the drug-store, southeast corner of Seventh and Olive, states positively to us that as the rear rank of the detachment passed the point where he stood, one of the soldiers took his rifle from his shoulder and seemed to be placing a cap on the tube, or doing something else to it. While holding his gun in this position it was discharged, apparently by accident. Immediately thereafter, Mr. Siebert says, he heard something like an order given, but is not certain whether it was a command to fire or not. At any rate the detachment commenced firing, chiefly at the engine-house in which the recorder's court was sitting, and at the houses near by.

"Mr. John G. Dill, clerk of the recorder's court, was standing on the balcony at the second story of the engine-house, overhanging the street, as the soldiers passed by. His statement coincides with that of Mr. Siebert. He says he saw the gun discharged, apparently by accident, in the ranks, when a volley was discharged at the engine-house."

[2] The author of this work is greatly indebted to Col. Albert G. Brackett, of the Third Cavalry, U.S.A., in charge of Jefferson Barracks, for much valuable material and important assistance furnished in the preparation of the accompanying sketch of the barracks.

troops were removed to the cantonment at Bellefontaine established by Gen. Wilkinson. Subsequently the commandant's house and the stone tower situated in the inclosure were used by the courts. The barracks at Bellefontaine were the buildings which had belonged to the old Spanish fort of "St. Charles the Prince," and, as elsewhere stated, from six hundred to a thousand American troops were usually quartered there. These barracks continued to be used until the completion of Jefferson Barracks. The latter, famous in the traditions of the United States army, and cherished in the affections of the older army officers, are situated on the west bank of the Mississippi River, on the St. Louis and Iron Mountain Railroad, about three miles south of the limits of the city of St. Louis, on a tract of land containing seventeen hundred and two acres, belonging to the United States government. The buildings were erected in 1826 and 1827, and are of limestone, which is readily obtained here, the whole barracks resting on extensive ledges that extend nearly to the river-bank, several of these ledges having been worked down so as to admit the building or construction of roadways and laying of railroad tracks. The grounds are most eligibly situated, being high, airy, and well drained on all sides, and commanding a fine view of the river. Gen. Albert Sidney Johnston, who was stationed at the barracks for a number of years, once wrote in a letter to a friend, "The position is a good one, and particularly excellent in a military point of view because of the facility of transporting troops to any other position in the West. The celerity of the recent (1827) movement of the First and Sixth Regiments up the Mississippi and Wisconsin sufficiently attests that. . . . The site of the barracks rises gradually from the river and swells to a beautiful bluff covered with oak- and hickory-trees, almost far enough apart to permit military manœuvres, and with no undergrowth to interrupt a ride on horseback in any direction."

The War Department having determined to establish an extensive cantonment in the West for a *corps de reserve*, from which detachments could be sent to reinforce or relieve the garrisons stationed on the lakes, the Missouri, Mississippi, Arkansas, Red, and Sabine Rivers, and at New Orleans, Maj.-Gen. Jacob Brown, the commander-in-chief of the American army, selected the site of Jefferson Barracks for that purpose.

The ground being a portion of the extensive commons belonging to the unincorporated village of Vide-Poche, now known as Carondelet, application was made to the authorities of the town for the lease to the government of the tract now occupied by Jefferson Barracks. Accordingly, in 1824, the village of Vide-Poche leased to the United States that portion of its commons known as Jefferson Barracks, embracing over seventeen hundred acres. The object of the Vide-Pochers in effecting the lease was to secure the market for their products which would result from the location of a military post at this point.[1]

The buildings were planned and their erection was commenced in 1826, under the superintendence of

[1] Afterward, when Vide-Poche was incorporated as Carondelet, the corporation desired to sell a portion of its commons, and in order to be able to give a clear title, it was deemed essential that a patent for the grounds should be procured from the government. Application for such patent was accordingly made to the Department of the Interior, but Jefferson Davis, who was then Secretary of War, advised the Secretary of the Interior to withhold the patent for that portion of the Carondelet commons occupied by the government as a barracks, on the ground that the government should maintain control of it as an important military position. The patent was granted for the balance of the commons on condition that the town of Carondelet should give to the United States a quit-claim for the portion occupied by Jefferson Barracks. The corporation claimed that it was entitled to the whole, but eventually accepted the partial patent, giving the required quit-claim under protest. This protest was served on the President of the United States (Franklin Pierce), the Secretary of War, and the Secretary of the Interior.

In 1852 suit was commenced by the town of Carondelet in the Court of Claims at Washington against the United States for the recovery of the barracks tract, but there was a division of opinion in the court as to whether a suit could be brought against the United States, and as there was not the requisite majority on the affirmative of the proposition, the case was thrown out of court.

The following bill was then drawn up and presented to Congress for the purpose of authorizing the Court of Claims to try the case, but no definite action could be obtained then, and the bill dragged along until March, 1873, when Hon. Erastus Wells succeeded in bringing it to a vote, and it was carried without opposition:

"AN ACT *to confer jurisdiction on the Court of Claims to hear and determine the suit of Carondelet vs. the United States.*

"*Whereas* doubts exist touching the jurisdiction of the Court of Claims over the suit now pending in said court against the United States for the recovery of a tract of land claimed to be a part of the commons of Carondelet, instituted by the city of Carondelet; therefore be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, that jurisdiction be, and hereby is, granted to the Court of Claims to hear and determine said case, and the matters in controversy therein, subject to the right of appeal by either party to the Supreme Court of the United States; and that the depositions heretofore taken in said case may be read at the trial thereof, with the same effect as if taken after the passage of this act."

Approved March 3, 1873.

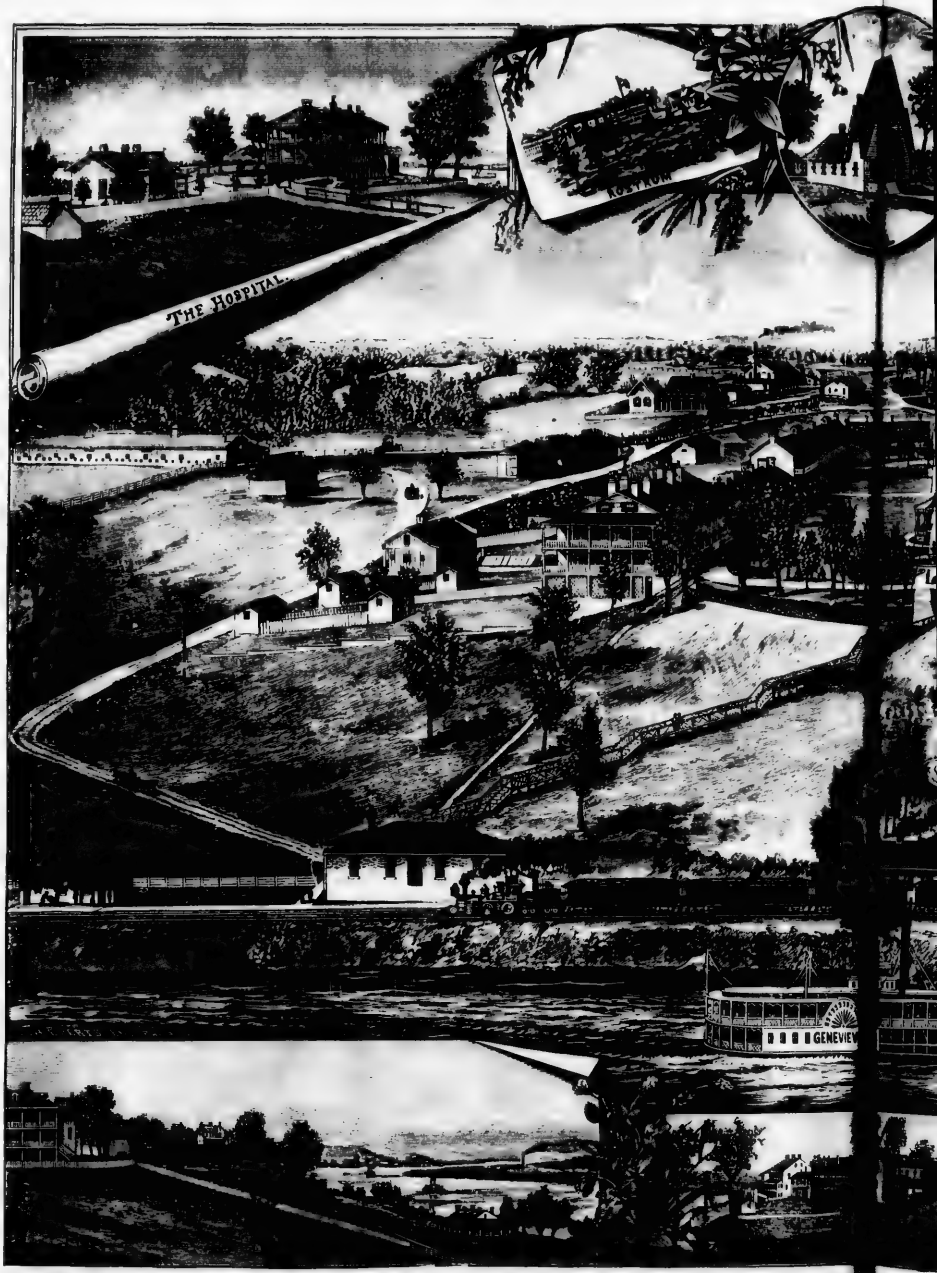
The case is now properly before the Court of Claims, and a decision will be reached in time. It is said that no able lawyer entertains any doubt as to the suit terminating in favor of the plaintiff. Carondelet having, since the commencement of the suit, been incorporated into St. Louis, of course the property, if recovered, will belong to the latter city.

Brevet Brig.-Gen. Henry Atkinson, and they were so far completed in the following year as to admit of their occupation by the soldiers.

The first regular troops sent here were those belonging to the First Regiment of infantry, who were followed by the Sixth Regiment of infantry in the summer of 1827, under Col. and Brevet Brig.-Gen. Henry Atkinson, Sixth Infantry, who had been stationed far to the westward at Council Bluffs (now Fort Calhoun), Nebraska. It must be understood that the original Council Bluffs, named by Lewis and Clark, belongs in Nebraska, and not in Iowa. Gen. Atkinson immediately commenced work with the men of his regiment, and did a great deal towards beautifying the grounds and rendering the barracks comfortable dwellings for the men. Most of the older officers with Gen. Atkinson had served in the war of 1812, and had been retained in the army on account of their superior military qualities and attainments. The main buildings of the barracks were constructed chiefly of limestone, and a considerable portion of the masonry was erected by the soldiers. The parade-ground at that time was six hundred and eighty-four feet long and two hundred and eighty feet wide. The quarters of the officers and soldiers were built on the north, south, and west sides of the parade-ground, the east side or front being left open to the river. There were four blocks of officers' quarters, one of which was situated on each eastern extremity of the range of buildings, and the other two formed the western boundary of the parade-ground, with a sally-port between them. They were all two stories high, with garrets and basements, and with porticos in front. The first two were each one hundred and ten feet by thirty-six, with sixteen rooms in each; the others were each one hundred and twenty feet by thirty-six, with twenty rooms in each. The quarters of the soldiers extended east and west between the quarters of the officers, and were one story high with basements in the rear. The barracks were originally intended to accommodate twenty-two companies, but during the civil war several thousand men were quartered in them very comfortably. About five or six hundred yards from the barracks to the north, on a ridge parallel with the one on which the barracks were built, was situated the hospital, a fine building of brick, one hundred and twenty feet by twenty-four, surrounded with porticos. It stood in a large yard, inclosed and shaded by trees, and was divided into four large wards and two smaller ones, a dispensary, store-rooms, mess-rooms, etc. It was capable of accommodating eighty or ninety patients. On the same ridge with the hospital were two large houses occupied by the chaplain and sutler. The commanding officer's quarters were near the river and north of the barracks, in a handsome house built in cottage style. A little to the south of the barracks, on the river-bank, was a substantial building ninety by thirty feet and two stories high, affording ample room for the storage of subsistence and quartermaster's stores. There was also at the post stabling for a large number of horses. There had been expended on the buildings prior to 1840 about seventy thousand dollars.

On the 1st of January, 1827, a ball was given at the barracks, to which many of the prominent families of St. Louis were invited, and in return a ball was given to the officers by the citizens at the residence of Governor Clark, which is described as having been a very brilliant affair.

Before the Mexican war Jefferson Barracks was a grand rendezvous for the troops in the West, and soldiers and munitions of war were generally distributed from this point to the frontier garrisons. Many of the most important military and exploring expeditions made the post their starting-point, and when unemployed the reserve of the Western army was usually quartered at this salubrious and attractive place, where, in the midst of a country abundantly supplied with provisions, the troops were supported at very little expense.



The wife of Gen. Atkinson, the commander of the post for many years, was a daughter of Alexander Bullitt, one of the original settlers of Louisville, Ky., and the eldest of a family celebrated for beauty, wit, and charm of manner. Mrs. Atkinson, aided, after the lapse of some years, by her brilliant and beautiful sisters, made Jefferson Barracks something more than a mere military post, and transformed it into a delightful and elegant home for the gay and gallant young soldiers serving here their apprenticeship in arms. The barracks were near enough to St. Louis to allow the officers to mingle freely in its gay and hospitable society, in which the influence of the old French element was still predominant. The descendants of the first settlers had preserved in their colonial isolation some of the best features of the old *régime*, lost even in France itself through the Revolution. To innocent sprightliness was joined decorum, and the inherent grace and polish of the French race were united with the cordiality and generous freedom of intercourse which mark a young and prosperous community. The Chouteaus, Cabannés, Prattes, Soulards, Menards, Gratiots, Sarpys, Vallés, Cerrés, and many other French families among the descendants of the early settlers were erudite, accomplished people, who would have felt at ease and whose society would have

been coveted in the gay saloons of Paris. The benefits and enjoyment of such a society were thoroughly appreciated and keenly relished by the officers, whose commissions in that happy day of the republic accredited them to the best society everywhere. Many of the young officers, without allowing themselves to fall into fashionable dissipation, indulged freely in the pleasures and amusements of the city, and found in St. Louis attachments which lasted during life. The O'Fallons, the Clarks, the Bentons, the Chouteaus, the Gratiots, the Mullanphys, the Lucases, and other noted and estimable families were among the chosen and remembered friends of the accomplished and dashing officers stationed at Jefferson Barracks from 1826 to 1860.

At a ball at Mr. Chouteau's, Lieut. Albert Sidney Johnston met for the first time Miss Henrietta Preston, who afterwards became his wife. She was the eldest child of Maj. William Preston, a member of the Virginia family of that name, and an officer of Wayne's army, who had resigned and settled at Louisville, Ky. Maj. Preston's wife, Mrs. Caroline Hancock Preston, was the daughter of Col. George Hancock, of Fincastle, Va. (an aide to Pulaski, a colonel in the Revolutionary war, and a member of the Fourth Congress), and belonged to a family distinguished for beauty and talents. Mrs. Preston's youngest sister had married Governor William Clark, of Missouri, and her husband's niece was the wife of Hon. Thomas H. Benton. Governor Clark was one of the foremost men of the West. A younger brother of the great George Rogers Clark, he possessed the latter's boldness and sagacity without his infirmities, and reaped the legitimate rewards of energy and intellect from which unthrift debarred the hero. He had early in life obtained great celebrity by his explorations, in conjunction with Lewis, of the sources of the Columbia River and in the far West. He was Governor of Missouri for many years, and, as Indian agent, justly enjoyed the confidence both of his government and of the Indian tribes. With wealth, intelligence, an elevated character, and popular manners, he was well fitted for his place as a leader in a young republic. His first wife, Miss Julia Hancock, was a woman of eminent graces and singular beauty. After her death he married her cousin, Mrs. Radford. Governor Clark's descendants and collateral relations are prominent citizens of St. Louis and Louisville. Thomas H. Benton's wife was a daughter of Col. James McDowell, of Rockbridge County, Va., and sister of the eloquent Governor of Virginia. She was the niece and favorite kinswoman of Maj. Preston, and spent four or five years in his house, devoting herself for the most part, as a matter of choice, to the education of his daughter Henrietta, then a little girl. Miss Preston was visiting these relations in St. Louis when she met Lieut. Johnston, and the interest which she at once inspired was reciprocated. Their mutual attachment continued unbroken; and Lieut. Johnston, having been sent on recruiting service to Louisville, Ky., where Miss Preston resided, and where he remained for a great portion of the year 1828, became engaged to her. They were married Jan. 20, 1829.

On the 1st of April, 1832, Brig.-Gen. Atkinson, then commanding the right wing of the Western Department, received an order, dated March 17th, from the headquarters of the army, announcing that the Sacs and Foxes, in violation of the treaty of Prairie du Chien of 1830, had attacked the Menomonees, near Fort Crawford, and killed twenty-five of that tribe, and that the Menomonees meditated a retaliation. To preserve the pledged faith of the government unbroken, and keep peace and amity among those tribes, he was instructed to prevent any movement on the part of the Menomonees against the Sacs and Foxes, and to demand of the Sac and Fox nation eight or ten of the party engaged in the murder of the Menomonees, including some of the principal men. For these purposes he was empowered to employ the regular force on the Mississippi, or so much as could be dispensed with after providing for the security of the several posts. The remote position of Fort Snelling, at the Falls of St. Anthony, surrounded as it was by powerful bands of Indians, precluded the possibility of withdrawing any portion of the garrison at that point. The expeditionary force therefore would have to be made up of such of the troops as could be spared from the slender garrison at Prairie du Chien, the troops at Fort Winnebago, at the portage of the Fox and Wisconsin Rivers, and at Fort Armstrong, at Rock Island, and the companies of the Sixth Regiment at Jefferson Barracks, amounting in all to about four hundred and twenty men. In compliance with his orders, Gen. Atkinson set off for the upper Mississippi with six companies of the Sixth Infantry (two hundred and twenty men), which were embarked at the barracks on April 8, 1832, in the steamboats "Enterprise" and "Chieftain."[1] The troops arrived at their destination in due time, and in

[1] It is a noteworthy and somewhat remarkable coincidence that thus early in life, and while of inferior rank in the army, there should have met as co-workers in this remote field four men who, thirty years later, measured swords in a contest which shook the world,—Lieuts. Albert Sidney Johnston, N. J. Eaton, Robert Anderson, and Jefferson Davis.—*Life of Albert Sidney Johnston*, by his son, William Preston Johnston, p. 36.

an engagement with the Indians under Black Hawk, near Bad Axe River, on Aug. 2, 1832, the savages were subdued, and their principal chiefs, including Black Hawk, were captured and detained as prisoners of war in Jefferson Barracks to await the orders of the government.

Upon the cessation of hostilities the Sixth Infantry returned to the barracks. While stationed here some of the younger officers were somewhat hot-blooded, and Second Lieut. Charles O. May was killed in a duel on the 19th of January, 1830.

After the close of the Black Hawk war Congress deemed it necessary to add a regiment of dragoons to the military establishment for service against the Indians on the plains and in the Rocky Mountains, and in the spring of 1833 the First Regiment of dragoons, now First Cavalry, was organized at this point under Col. Henry Dodge, Lieut.-Col. Stephen Watts Kearney, and Maj. Richard B. Mason. Among the captains were David Hunter and Edwin V. Sumner, afterwards colonels of cavalry, and Nathan Boone, a son of the famous Daniel Boone, of Kentucky. Jefferson Davis, afterwards President of the Southern Confederacy, was a first lieutenant, as was Philip St. George Cooke, subsequently colonel of cavalry and brigadier-general. A portion of the Second Dragoons, now Second Cavalry, under Col. David E. Twiggs, was organized here in 1836, and in the following summer marched hence to participate in the Florida war, where it rendered excellent service. William S. Harney, well known in St. Louis, was lieutenant-colonel of this regiment.

In the autumn of 1842 the headquarters and all of the companies of the Fourth Infantry were at Jefferson Barracks, where the regiment remained until May, 1844, when it went to Louisiana. The regiment had been serving in Florida against the Seminole Indians, and was sent to the barracks for a brief rest.

Gen. Atkinson, who was from North Carolina, died at Jefferson Barracks on June 14, 1842. He entered the army as captain of the Third Infantry, July 1, 1809, and was appointed assistant inspector-general with the rank of major, and inspector-general with the rank of colonel, April 25, 1813. On April 15, 1814, he was appointed colonel of the Forty-fifth Regiment of infantry, and in the same month was transferred to the Thirty-seventh Infantry. Upon the reorganization of the army he was retained as colonel of the Sixth Infantry. On May 13, 1820, he was promoted to the rank of brigadier general, and declined June 1, 1821, the position of adjutant-general with the rank of colonel. In August, 1821, he was retained as colonel of the Sixth Infantry, with the brevet of brigadier-general commanding the Western army.

Another distinguished officer died at Jefferson Barracks,—Brevet Brig.-Gen. Richard B. Mason, colonel of the First Regiment of United States dragoons, who expired at his headquarters at the barracks on July 25, 1850, of cholera, leaving a wife and two daughters. Gen. Mason was a native of Stafford County, Va., and was descended from a family eminent for their services in the war of the Revolution. On the 2d of September, 1817, he was appointed from civil life to a second lieutenancy in the old Eighth Regiment of infantry, and in the same month was made first lieutenant. In July, 1819, he was made captain, and in May, 1821, upon the breaking up of the Eighth Regiment, he was transferred to the First. In 1825 and 1826 he was with the forces that ascended the Missouri to the mouth of the Yellowstone. In fact, his whole service in the army was spent on the Northern and Western frontiers. Upon his return from the expedition he was engaged in the erection of Jefferson Barracks. In May, 1832, during the Black Hawk war, he was appointed captain of ordnance, which position he declined. On the organization of the dragoons he was appointed, March 4, 1833, major of the First Regiment. He served through the Black Hawk war, and subsequently was for several years stationed at Fort Gibson. On the 4th of July, 1836, he was made lieutenant-colonel of the First Dragoons, and colonel June 30, 1846. For two years previous to the Mexican war he was stationed in the East on recruiting service. When that war broke out he joined Gen. Kearney in California, where he was made, in 1847–48, military commander and civil Governor of the Tenth (California) Department. He was breveted brigadier-general "for meritorious conduct" in March, 1849, to date from May 30, 1848. He was relieved from his command in 1849, and enjoyed but a short respite from duty with his family before he died.

During the Mexican war many troops were fitted out at Jefferson Barracks and departed for the scene of hostilities. The regiment of mounted riflemen, now Third Cavalry, originally intended for the protection of emigrants on the way to Oregon, was organized here in the summer of 1846, and after being carefully trained by Maj. Sumner, started for the battle-fields of Mexico. Maj. Sumner did not belong to the regiment, but had been specially detailed to give it the preliminary training, as the colonel and lieutenant-colonel were both absent in the field. The companies were recruited in different portions of the Union, and

the men were sent here to be embodied and properly drilled. At the same time the place was used as a depot for recruits, and was kept well filled. The regiment of mounted riflemen became famous in the Mexican war, and participated in several hard-fought battles. Several of the infantry regiments, or portions of them at least, were here from time to time, and many of the older officers remained here for longer or shorter periods. After the close of the Mexican war the Seventh was at the barracks, succeeded for a few years after by the Sixth. The Fifth and Eighth were here also, for a brief season, as also was the Third, all of which had done excellent service in Mexico.

Shortly after the war Brevet Col. Braxton Bragg, who afterwards became a distinguished general in the Confederate army, was ordered to Jefferson Barracks, where he organized his famous flying artillery company, which practiced firing at a target on the other side of the river. His lieutenants were Looser and Ayres, the latter of whom is now a distinguished general in the United States army.

The gun sheds used by the battery are now standing, though not in good condition, time having worked considerable change in their appearance. There was not a very good drill-ground near by, the surface being broken by ravines and covered with a thick growth of bushes and trees. Underneath there was a tangled mass of vines and weeds, forming in some places an impenetrable jungle.

In 1853, Brevet Brig.-Gen. Newman S. Clarke, colonel Sixth Infantry, commanding the Sixth Military Department, had his headquarters at Jefferson Barracks, and with him was his adjutant, Winfield S. Hancock, who has since become so famous throughout the republic. This military department then comprised a considerable portion of the West.

On the 22d of August, 1853, occurred the death at Jefferson Barracks of Brevet Capt. Hachaliah Brown, first lieutenant of the Third Regiment of artillery, in the thirty-first year of his age. Capt. Brown graduated at the Military Academy in 1842, and entered the service as a brevet second lieutenant in the Fourth Regiment of artillery, in which he continued to serve until March, 1845, when he was transferred by promotion to the Third Artillery. He remained on duty on the Atlantic sea-board for some time after the commencement of hostilities between the United States and Mexico, and received orders for the field shortly after the administration had determined upon a new line of operations, beginning with Vera Cruz. He joined at Tampico the battalion of light infantry under the command of Col. Steptoe, and served with it until the evacuation of the country by the army. During the siege of Vera Cruz he was detached with a body of troops under Gen. Harney, and participated in the affair of Medellin, "for gallant and meritorious" conduct in which he received the brevet of captain. He was also distinguished in the battle of Cerro Gordo; and in the valley of Mexico, while attached with his company to Gen. Quitman's division, served in the battle of Chapultepec and the attack upon the Belen Gate. Soon after he returned from Mexico he was appointed adjutant of his regiment, in which capacity he served until 1851, when, after a brief sojourn in Boston Harbor, he was ordered to duty with Col. Bragg's battery, and died near the close of his period of service with it.

In 1853 and 1856, Gen. Joseph E. Johnston, the eminent soldier and statesman, commanded the post. He was then lieutenant-colonel of the First Cavalry, which was stationed at Fort Leavenworth, commanded by Col. Edwin V. Sumner. It is said that a little bad feeling sprang up between Sumner and Johnston at Fort Leavenworth, which was the cause of Johnston being put in command at Jefferson Barracks. This ill feeling is thought to have existed to the day of Sumner's death, and was especially vented in the battles of Fair Oaks and Malvern Hill.

While Gen. Johnston was enjoying the emoluments of shoulder-straps at the barracks in 1857, there was an humble farmer who sometimes visited the post with a wagon-load of "garden sass," or perhaps now and then a cord of wood, who has somewhat outfigured the military individuals noted above. That farmer was no less a personage than Ulysses S. Grant, who actually sold wood by the load at the barracks during the command of Col. Joseph E. Johnston. Jefferson Davis, the late President of the Confederate States, has also been an inmate of the barracks. Before the Mexican war, while Davis was a lieutenant in the regular army, his company remained for a considerable time at these barracks; and visitors are now shown where the chief of the great Rebellion knelt in prayer in the chapel. In the same chapel the Johnstons and Lee attended divine worship. There are those still remaining at the barracks who well recollect the appearance and manner of Gen. Lee, and he is remembered as a mild, affable, and elegant gentleman of the old school.

Visitors are also shown a large locust-tree, which is much stooped and bent, though still growing, and are told that when quite a sapling it was prostrated by Gen. Mansfield Lovell (of New Orleans surrender memory), who, attempting a display in artillery prac-

tice before some ladies who were present, drove a caisson over it.

Col. Francis Lee was another of the distinguished officers who were stationed at Jefferson Barracks. At the time of his death in St. Louis, on the 19th of January, 1859, he was colonel of the Second Regiment of United States Infantry. His funeral services were held at the Second Presbyterian Church, corner of Walnut and Fifth Streets, and the remains were escorted by his regiment to the barracks, accompanied by the general, regimental, and battalion staffs and a large number of citizens.

Col. Lee was born in Pennsylvania, April 13, 1802. At the age of sixteen he entered the Military Academy at West Point as a cadet, and four years afterwards, July 1, 1822, received his commission as second lieutenant of the Seventh Infantry. Two years later, in September, 1824, he was promoted to a first lieutenancy, and from May, 1826, to May, 1834, was assistant quartermaster. Upon the reorganization of the army in September, 1836, he was made first lieutenant, and captain in July, 1838. Upon the breaking out of the war with Mexico, in 1846, he was appointed chief engineer of the army commanded by Brig.-Gen. Wool, and on April 18, 1847, while in command of the Fourth Regiment, was breveted major "for gallant and meritorious conduct" in the battle of Cerro Gordo. On August 27th he was breveted lieutenant-colonel "for gallant and meritorious conduct in the battles of Contreras and Churubusco," and colonel on September 13th of the same year for similar conduct in the battle of Chapultepec, in which he was wounded. He had previously distinguished himself at the siege of Fort Brown, and his conduct on the occasion of the taking of the City of Mexico was also highly meritorious. He was made superintendent of the West Point Military Academy Sept. 1, 1852, and succeeded to the colonelcy of the Second Regiment of infantry, Oct. 18, 1855, which rank he held at the time of his death. He was commander of the Department of the West, stationed in St. Louis, until the fall of 1858, when he was relieved by Col. E. V. Sumner. His services in the war with Mexico, wherein he earned such deserved renown, were not without their sacrifices. Like many others, he contracted a disease which undermined his constitution and eventually brought him to his death-bed.

Col. Lee, besides being a gallant officer, was in all respects an upright and honorable man. His many amiable traits, his sociable disposition, and his frank, punctilious integrity won the regard of all with whom he was brought in contact.

One of the most interesting events connected with Jefferson Barracks was the organization there of the famous Second Regiment of cavalry, which was intended for immediate service in Texas. It was formed in 1855 by Jefferson Davis, then Secretary of War, and was known as "Davis' pet regiment." It is doubtful whether any other regiment furnished an equal number of distinguished officers to the two contending armies during the great civil war. Albert Sidney Johnston, a brave and skillful soldier, was appointed colonel of the regiment, with rank from March 3, 1855. Johnston was a native of Kentucky, and after graduating at West Point, and serving some time in the Sixth Infantry Regiment, resigned and offered his services to the republic of Texas. They were accepted, and he passed through the various grades of brigadier-general, general, commander-in-chief, and secretary of war of the republic. On account of some misunderstanding in relation to the command of the army, he fought a duel with Gen. Felix Houston, was wounded, and always afterward walked a little lame. He became a planter in Texas, but upon the breaking out of the Mexican war he was chosen colonel of a Texas infantry regiment, and served some time. This regiment was disbanded, and he continued in service on Maj.-Gen. William O. Butler's staff as acting inspector-general. While thus serving he participated in the battle of Monterey, and shortly after was appointed a paymaster in the regular army, with the rank of major. In 1855, as we have stated, he was appointed colonel of the Second Regiment Cavalry, and although afterward breveted brigadier-general for his services in Utah, was in fact the head of that regiment when the civil war broke out, and when he resigned. He was killed while in command of the Confederate army at Shiloh. Gen. Johnston was a very gentlemanly man, and a chaste and fluent writer. He had a fine military presence and carriage, with the most gentle and winning manners.

Brevet Col. Robert E. Lee was the lieutenant-colonel of this regiment, and afterwards became the commander-in-chief of the Confederate army. He was a Virginian by birth, and a graduate of the West Point Military Academy. He was first in the engineers, and for some time was engaged in deepening the channel in the harbor of St. Louis. He gained a fine reputation during the Mexican war, at the close of which, although but a captain, he had the brevet rank of colonel. For some years he was superintendent at West Point, and in 1855 was promoted lieutenant-colonel of the Second Cavalry. He served some time in Texas with the regiment, and for a time had command of that department. This great soldier died Oct. 12, 1870.

Lee was a refined American gentleman, courteous and affable in his deportment, and kindly in his feelings. His personal appearance was striking, and impressed one with the idea that he was a great soldier, as he proved himself to be. He was wounded at Chapultepec, in Mexico.

Maj. and Brevet Lieut.-Col. William J. Hardee, of this regiment, became afterwards a lieutenant-general in the Confederate army. He was a Georgian by birth, and a graduate of West Point. "Hardee's Tactics," so called, is a translation from the French.

George H. Thomas, the major of the regiment, was afterwards a distinguished general in the Union army. He was born in Southampton County, Va., July 31, 1816, and died in San Francisco, Cal., March 28, 1870. He graduated at West Point, and won great distinction in the army during the war with Mexico, and during the civil war of 1861–65. At the close of the latter war he was made major-general of the United States army from Dec. 15, 1864. On March 3, 1865, he received the thanks of Congress for his eminent services during the war, and from the Legislature of Tennessee, Nov. 2, 1865, a vote of thanks and a gold medal. In February, 1868, President Johnson having offered him the brevet of lieutenant-general, he declined the compliment, saying he had done nothing since the war to merit such promotion. Gen. Thomas was remarkable for simplicity of character, modesty, stability, and discretion.

The next in rank in the Second Regiment of cavalry was Capt. and Brevet Maj. Earl Van Dorn. He was born in Mississippi in 1821, graduated at West Point, and was killed by Dr. Peters at Spring Hill, Tenn., May 8, 1863. He served with distinguished gallantry in the Mexican war, and in the Confederate army as a major-general.

Edmund Kirby Smith, another captain in the regiment, was born in Florida about 1825, graduated at West Point, and served with distinction in the war with Mexico. He resigned his commission April 6, 1861, and joined the Confederacy. He received various promotions in the Confederate army until in October, 1862, he was appointed lieutenant-general. Early in 1863 he took command of the Trans-Mississippi army, which he surrendered to Gen. Canby May 26, 1865.

The other captains in the regiment were the following distinguished officers: George Stoneman, born in New York, Aug. 8, 1822, graduated at West Point in 1846, and served throughout the civil war in the Union army. He was chief of cavalry of Gen. Hooker's army, and at the close of the war was made brevet major-general United States army, and retired in 1871. He is now (1883) Governor of California.

James Oakes, a thorough Union man during the war, was from Pennsylvania. He served with distinction in Mexico, and was wounded in an Indian fight in Texas. On account of this wound, which disabled him, he was obliged to decline a brigadier-generalship tendered him by the President.

Innis N. Palmer, of New York, was a brigadier-general of volunteers in the Union army. He served in Mexico as lieutenant of rifles, and was severely wounded at Chapultepec.

Theodore O'Hara and Charles E. Travis were originally appointed in the regiment, but served with it only a short time. The former was from Kentucky and the latter from Texas. Travis was the son of Col. Travis, the hero of the Alamo, and died in 1860. O'Hara served in the Cuban expedition under Lopez, and was severely wounded. He was aide-de-camp to Gen. A. Sidney Johnston at the battle of Shiloh. William R. Bradfute, of Tennessee, left the Federal service and joined the Confederates. He served in Mexico, and was considered a very brave man.

Albert G. Brackett, of Indiana, is a colonel in the regular army. He served in the Mexican war, and was wounded by the Confederates in Arkansas. Charles J. Whiting, of California, served faithfully during the war on the Union side, and was major in the Second Cavalry, formerly the Second Dragoons. Richard W. Johnson, of Kentucky, was a distinguished Union officer during the late civil war, and retired with full rank on Oct. 12, 1867, as brevet major-general of the United States army. Nathan G. Evans, of South Carolina, was a major-general in the Confederate service, and fought at Bull's Run, Ball's Bluff, and Hatcher's Run. He died Nov. 30, 1868.

Among the first lieutenants were McArthur, Charles W. Field, Garrard, Jenifer, William B. Royall (who became a colonel in the regular army), Chambliss, Eagle, Swert, Shaaf, Cosby, W. W. Lowe, and John B. Hood; and second lieutenants, Witherell, Minter, Gibbs, Major, Phifer, Harrison, Porter, Owens, Fitzhugh Lee, Kimmel, and Cunningham.

Kenner Garrard, who was born in Kentucky, subsequently distinguished himself in the Union army, being at its close a brevet major-general, United States army. He resigned Nov. 9, 1866. W. W. Lowe graduated at West Point July 1, 1853, and was assigned to duty in the Second Dragoons. He was afterwards transferred to the Second Cavalry, and took an active part in recruiting and organizing the regiment. During the civil war he commanded the Fifth Iowa Cavalry, and the posts of Forts Henry,

Hindman, and Donelson. He was a brevet brigadier-general. McArthur, Harrison, Owens, Arnold, and Swert remained true to the Union. Lieut. John J. Swert was killed at the battle of Gaines' Mill, Va., June 27, 1862. Lieuts. Chambliss and Phifer were generals in the Confederate army, and Cosby, Jenifer, Shaaf, Field, Gibbs, Major, Minter, and Kimmel served in the same army. John B. Hood was born in Bath County, Ky., about 1830, and graduated at West Point in 1853. He resigned his commission April 16, 1861, and entered the Confederate service, in which he soon rose to the rank of lieutenant-general. He died in New Orleans after the war. Fitzhugh Lee was born in Virginia, and graduated at West Point. On the breaking out of the civil war he resigned his commission and entered the Confederate service, where he acquired the rank of major-general of cavalry.

The Second Regiment of cavalry was rapidly recruited, and was composed of farmers' sons and other daring young men. Its complement (eight hundred and fifty men) was made up about the middle of August, 1855, and the recruits were rendezvoused at Jefferson Barracks, under the command of Maj. Hardee, with orders to march to the frontiers of Texas in October. Cols. Johnston and Lee had been directed to proceed to Fort Leavenworth to sit on a general court-martial, to be held September 24th. They were relieved early in October, and joined their regiment, which started for Texas on the 27th. Its route of march from Jefferson Barracks lay through the Ozark Mountains, in Southwestern Missouri, and passed by way of Springfield and Neosho into the Indian Territory. It reached Tahlequah November 28th, and, proceeding by way of Fort Gibson and Fort Washita, entered Texas at Preston on the 15th of December. From Preston the column moved to Belknap, and thence to Fort Mason, its destination, where it arrived Jan. 14, 1856. Four companies were left on the Clear Fork of the Brazos, under Maj. Hardee.

The regiment fought the Comanche, Lipan, Apache, and Kiowa Indians over forty times between the years 1856 and 1860, and in nearly every fight was successful.

While the regiment was at Green Lake, Texas, after the ordinance of secession had passed, and prior to starting for the North, Van Dorn, then a colonel in the Confederate service, visited it and tried to induce some of the officers and men to join the Confederates. It is said that not a man left the regiment.

During the civil war the regiment did excellent service for the Union cause, and shed its blood on many a well-fought field. When the Union army crossed the Potomac, in May, 1861, the only cavalry force with it was three companies of this regiment, and at the battle of Bull Run four out of the seven cavalry companies on the field belonged to it. It is a noteworthy fact that in that terrible battle the Union cavalry force did not number much over three hundred men.

Lieut.-Col. Edwin V. Sumner, who was superintendent of the mounted recruiting service, was stationed at the barracks in 1855, and upon being promoted to the colonelcy of the First (now Fourth) Cavalry, in that year, went to Fort Leavenworth, where he formed his regiment. He was succeeded as superintendent by Brevet Col. Charles A. May.

The barracks continued to be used as a cavalry depot for several years, during which time many recruits were sent from it for service in the far West. It remained an important military post until the great civil war broke out in 1861, when it was transformed into a general military hospital. The site was thought to be particularly adapted for the treatment of diseases as well as wounds, and some remarkable recoveries certainly were made. The quiet no doubt added to its sanitary condition, and steamboat after steamboat loaded with men who had been broken down in the South were landed here, and received medical treatment. In those days many steamboats were regularly fitted up as hospital boats.

In the fall of 1862, by order of the government, the work of erecting additional buildings for hospital wards was commenced, and by the following spring they were completed, and many other buildings and quarters arranged and adapted to the purposes of a hospital. The most elaborate improvements were made. The new buildings comprised nine one-story houses, six hundred and ten feet in length, in their position forming nearly a half-circle of about half a mile in diameter. These buildings comprised wards, surgeons' quarters, nurses' rooms, secondary dispensaries, cook-houses, etc., and were kept in a state of most perfect neatness and order.

About the centre of the grounds was the water-works building, containing four iron tanks, which held one thousand gallons of water each, which was pumped from the river by a steam-engine. This reservoir distributed water to every building on the grounds, and was an admirable convenience. The works cost twenty-seven thousand dollars.

The capacity of the entire institution was for three thousand patients; but in February, 1864, there were but few patients there, though quite a number of convalescents. Among the most noteworthy conveniences at the barracks at this time was a printing-office,

which was kept going by the convalescent soldiers, where all the printing of the hospital was done. This, which was formerly no mean item of expense, was in 1864 an entire saving, with the exception of the cost of paper and ink. The printers also commenced the issue of a small weekly paper called the *Convalescent*, a very neat little sheet, the first number of which was published Feb. 14, 1864.

There was on the grounds a hotel for the accommodation of persons visiting sick friends, with a ten-pin alley and billiard-room attached. Near this was the post-office, which sent off twenty-three thousand letters during the month of January, 1864.

Near the centre of the grounds was a neat and commodious chapel, where religious services were held. Attached to this, and occupying the vestibule, were a library and reading-room, the latter containing all the principal newspapers and periodicals of the country. There was also a branch library in each ward.

The Rev. Mr. Fish was at this time (February, 1864) the post chaplain, and had served in this capacity for more than ten years.

Surgeon John F. Randolph, United States army, took charge of the hospital in February, 1863, and commanded the post. He was a native of Virginia, and was one of the few army officers from that State who remained true to the Union. He had been attached to the army for more than ten years, and in 1861 returned from a long period of service in Oregon and California. The following assistant surgeons and officers of the post were all men of the highest qualifications, and manifested the deepest interest in the operations of the hospital:

Asst. Surg. H. R. Tilton, U.S.A., executive officer.
Capt. A. R. Smith, U.S.V., commissary of subsistence.
Capt. J. H. Corns, U.S.V., commanding Company K, Eighth Regiment Invalid Corps, and assistant provost-marshal.
Second Lieut. S. C. Wildman, Second Illinois Cavalry, commanding Sixty-second Company, Second Battalion Invalid Corps.
Rev. J. W. Fish, U.S.A., post chaplain.
Rev. Samuel Pettigrew, U.S.A., hospital chaplain.
Acting assistant surgeons, H. Latham, U.S.A.; W. H. Martin, U.S.A.; A. L. Allen, U.S.A.; T. F. Humbold, U.S.A.; T. W. McArthur, U.S.A.; S. Leslie, U.S.A.; J. A. Rolls, U.S.A.; W. M. Welch, U.S.A.; J. J. Marston, U.S.A.; P. C. McLane, U.S.A.; P. C. H. Rooney, U.S.A.
Hospital stewards, S. Ravenburg, U.S.A.; H. J. Thompson, U.S.A.; E. W. Klipstein, U.S.A.; R. H. Dawson, U.S.A.

For a short time after the close of the war the barracks were again used as a garrison for troops, were soon thereafter abandoned, and finally, in the autumn of 1867, were transferred to the engineer corps of the army, to be used as an engineer depot, and garrisoned by one company of the engineer battalion, commanded by Brevet Lieut.-Col. P. C. Hains. The instruction of the engineer soldiers was similar to that of the infantry, and in addition they were taught something in regard to siege operations. Earthworks were thrown up, and the siege of a place imitated on a small scale, and drill taught on pontoon-boats.

In the mean time a great deal of ground had been set aside for the Ordnance Department, and a large depot for storing gunpowder formed, which was for a time under command of Col. Franklin D. Callender, brevet brigadier-general.

A large national cemetery is also located on a portion of the ground close to the barracks, and the cemetery itself, carefully kept, is a beautiful place in summer. The remains of more than ten thousand soldiers who have fallen in our wars here find a resting-place on a gentle elevation overlooking the Mississippi River. There are several handsome monuments that have been erected by relatives of deceased individuals, and regulation headstones have been provided by the government for others.

The engineers retained possession for a limited period of time, when the whole place and reservation with the exception of the national cemetery passed into the hands of the ordnance corps, and so remained until July, 1878. For a time Capt. James H. Rollins had command, who was succeeded by Capt. Lawrence S. Babbitt, who was followed by Maj. John W. Todd.

Maj. Todd was thrown from his buggy on May 7, 1879, and received fatal injuries, from which he died on the 10th. He was born in 1830, at Bowling Green, Ky., and graduated at the West Point Military Academy in 1852. As second lieutenant in the Ordnance Department, he was first assigned to duty at the St. Louis arsenal, whither he repaired in company with a class-mate, S. V. Benét, afterwards Gen. Benét, chief ordnance officer of the United States army at Washington. He had been on duty at Augusta arsenal, at Columbus, Ohio, Watervliet arsenal, near Troy, N. Y., Detroit, Mich., Baton Rouge, and other points.

In 1859–60 he went on leave of absence to Europe, and visited the principal establishments, acquiring information of service to the profession. He was in command of Baton Rouge arsenal at the time it was surrendered to the Louisiana State troops, sent from New Orleans. His mother was with him at the time, and was taken prisoner. The conditions of the surrender allowed the major to march out with his colors and his men, and he reported at the St. Louis arsenal. During the civil war he was also on duty at the Dry Tortugas during the bombardment.

He removed to St. Louis from Indianapolis in 1876, relieving Capt. L. S. Babbitt, in command of Jefferson Barracks. Maj. Todd was a man of superb figure, being six feet one inch in stature. He was a man of extensive reading, and well posted by study and a wide experience in his profession. By his suavity and kind-hearted, generous hospitality he became endeared to a host of friends while in St. Louis, both among the military and civilians. The major was a relative of the Underwoods in Kentucky, and of numerous members of the Todd family in that State and Missouri, but he was not a relative of Mrs. Lincoln, who also was a Todd, as has been erroneously stated.

After the death of Maj. Todd, Maj. James R. McGinness took command of that portion of the reservation known as the powder depot, where there is a detachment of ordnance soldiers. There are several large buildings on the ground, in which gunpowder is stored.

From what has already been said it will be seen that the barracks have at different times been garrisoned by men of the ordnance corps, engineer corps, cavalry, artillery, and infantry, and, as has been shown, many of our most famous officers have served at the barracks and have kindly recollections of the place. Gen. Grant was here as a subaltern for some time, besides others who have achieved great fame. In fact, in old times it was considered a most desirable station on account of its proximity to St. Louis and the comfortable quarters provided for officers and men. The fine roads near by render carriage-driving a pleasure, and there are many points of interest within easy access of the place. The stone houses built by Gen. Atkinson over fifty years ago are in as good condition as they ever were, probably better, as the ordnance corps when in possession of the place put in many modern improvements. In summer the eastern portion of the parade-ground is really beautiful, being adorned with trees and rare flowers. Here, too, is a band-stand, and an excellent band performs every afternoon when the weather is good, excepting Saturdays, and there is dress-parade of the troops three times a week. The greatest care is taken to keep the place in good order in summer and winter, and it always presents a handsome appearance.

On the 1st of July, 1878, Brevet Brig.-Gen. John I. Gregg, colonel of the Eighth Cavalry, who was at that time superintendent of the mounted recruiting service, moved the cavalry depot down to Jefferson Barracks from the old St. Louis arsenal. The arsenal was altogether too small, and was almost surrounded by dwellings and shops. In fact, it was totally unfitted for the purposes for which it was used, and a more roomy place became absolutely necessary. The War Department wisely moved the depot to the barracks, where it had been in former years, and where there was ample shelter for the recruits that are found in different places throughout the Union. Brevet Maj.-Gen. Cuvier Grover, colonel of the First Cavalry, succeeded Gen. Gregg in command of the depot on the 1st of October, 1878, and Grover was succeeded by Brevet Brig.-Gen. Thomas H. Neill, colonel of the Eighth Cavalry, on the 1st of October, 1880. Gen. Neill remained here two years, and was relieved by Col. Albert G. Brackett, of the Third Cavalry (who is still in charge), on the 1st of October, 1882.

The ordnance grounds are separate and distinct from those of the barracks, although on the same reservation. The recruits are embodied in a battalion of four companies, and receive such drilling as can be imparted in three or four months before they are sent to the regiments on the frontier. This keeps everybody busy, and as there are usually from six to seven hundred recruits at the place, no one need complain of its being dull, especially in good weather, when the men can be drilled on the parade.

Decoration Day is the great event of the year at the barracks, when people from all portions of the country flock there to decorate the graves of the soldiers in the cemetery. The exercises are of the most touching character, and after it is over the whole ground looks like a garden of rare and exquisite flowers. Thus is kept green the memory of those brave men who sacrificed their lives in the defense of the republic.

The United States Arsenal is situated on the west bank of the Mississippi, in the southern portion of St. Louis, and within sight of Jefferson Barracks. The establishment of the arsenal at St. Louis was determined upon in accordance with the recommendations of the following report, which was rendered to the War Department in the spring of 1826:

"I have the honor to state that an arsenal at St. Louis or its vicinity is considered to be very necessary at this time.

"All the military posts on the Missouri and the Upper Mississippi Rivers must be supplied from the depot in that section of the country. Many of these posts are so remote that the supplies annually sent to them are forwarded from St. Louis early in the spring, commonly in the month of March. For this reason it is necessary that the supplies should be placed in depot at St. Louis the previous autumn.

"It was found necessary immediately after the close of the late war, in 1815, to establish a military depot in that section of the country for the supply of the new posts then about to be established in that quarter. An old cantonment, consisting

entirely of log buildings, at Bellefontaine, on the Missouri, five miles from its junction with the Mississippi, was made use of for that purpose. This position was soon found to be be very unsuitable and inconvenient. The town of St. Louis, which is twenty-three miles distant, had of necessity to be resorted to whenever boats were required to transport supplies to any of the upper posts; and the approach to Bellefontaine by water is very difficult, if not dangerous.

"It was proposed as early as 1816 to erect a permanent establishment nearer to St. Louis, but as the stores were already deposited at Bellefontaine, and as that place could be made to answer for a time, nothing further appears to have been done than to explore the country with a view to select a suitable site.

"The inconvenience of Bellefontaine has proved so manifest that store-houses have been rented in the town of St. Louis, for several years past, for the storage of all such military supplies as were destined for an early shipment to the upper posts.

"The reason, however, why a new establishment is called for by the exigencies of the service at the present time is that the log buildings at Bellefontaine have become so much decayed that a part of them have recently fallen down, and the remainder are so rotten that they can be kept up but a little longer. There is a considerable quantity of arms and other military stores now at Bellefontaine, which are so insecurely sheltered in these log buildings that it is feared they will suffer material injury if not soon better provided for.

"A position in the immediate vicinity of St. Louis is preferred, because it is the only principal place of business between the Ohio and Missouri Rivers. It is the place of deposit and of departure of all supplies destined for the remote regions of the Upper Mississippi and Missouri Rivers, whether military stores or articles of merchandise and trade. It is the place, therefore, which possesses the most abundant means of transporting supplies, and would be resorted to for that purpose even if the arsenal should be established at a distance from it.

"An extensive establishment is not considered necessary at St. Louis. One suitable for the exigencies of the service in that section of country, it is conceived, would consist of the following, viz.:

"One building for an arsenal, to be about thirty by eighty feet, to contain small-arms, accoutrements, and artillery equipments; a magazine for gunpowder and ammunition; a dwelling-house for an officer and a military store-keeper; two small workshops for repairing arms, fixing ammunition, etc.; a small building for a few artificers and laborers; a shed for artillery-carriages; and a store-house about twenty-six by sixty feet, with a wharf adjoining. The latter will be required more particularly for the subsistence and the quartermaster's departments, and will be used for the reception and storage of packages in bulk received from the interior, and designed for transmission in the same state to the frontier posts. An establishment upon this scale, it is believed, would be found sufficient for the present exigencies of the service. It would, however, be advisable to secure a site of sufficient extent, and to arrange the buildings in such manner as to admit of any future extension of the works which the exigencies of the service may hereafter render necessary."

On the 2d of August, 1827, it was announced that "the commissioners appointed to select a site whereon to locate an arsenal have purchased the beautiful place of Mr. A. Rutgers, situated on the river-bank, about three miles below the city. The proximity of this situation to the new military position, Jefferson Barracks, gives it a decided superiority over any that could have been obtained above the city."

The erection of the buildings was commenced in the autumn of 1827, and was continued from time to time until about 1840, when they were finished and ready for use.[1]

They are constructed in the most substantial manner, and, except the laboratories and sheds, are of stone with slate roofs. The arsenal proper is one hundred and twenty feet in length, and forty feet in width, and is three stories high, besides a cellar and attic. In addition to the arsenal there is an armory or work-shop for repairing small-arms, including smiths' forges, etc., a smith's shop, shop for preparing the iron and wood of artillery-carriages, and a large steam-engine for the heavier work. There are also a store-house for quartermaster's stores, three laboratories for manufacturing fixed ammunition and pyrotechnic preparations, a magazine of the same, barracks for the workmen and officers' quarters, office, etc., a gun-carriage house, timber sheds or houses, and a large powder magazine about half a mile from the arsenal. The arsenal commands a beautiful view, and is kept in the very best order. It was in its day by long odds the largest and finest arsenal in the United States. The walls of massive limestone inclosing the grounds are ten feet high and three feet thick, and surround some thirty-eight or forty acres of beautiful sloping land, extending from Carondelet Avenue to the Mississippi. The trees, lawns, paths, and walks are neatly kept, and equal those of any gentleman's park. The foundries and store-houses, soldiers' barracks, hospital and prison-house, powder magazine, dragoon stables and officers' dwellings, with their handsome yards and gardens, make up a perfect village in size. These buildings are of elegant architectural designs and proportions, and even the sentry-boxes are constructed in a tasteful and ornamental manner. The grounds are drained by sewers running to the river, and abound in wells of clear, pure water. The whole arsenal property is worth to the government a large sum of money.

During the late civil war all the arms, etc., were removed for greater safety to Jefferson Barracks. The work of removing the muskets, cannon, and cartridges

[1] On the 30th of October, 1841, the *Republican* announced that "the gentlemen appointed by the President to constitute a board for the selection of the site of the western armory are now in the city. Brig.-Gen. Armistead arrived day before yesterday from the upper Mississippi; Lieut.-Col. H. S. Long arrived in this city from the South some days ago; Surg.-Gen. Dr. T. Lawson has arrived."

was done wholly by the officers in garrison, aided by the volunteer regiments which encamped in April, 1861, within the arsenal walls. During the exciting times in St. Louis in April and May, 1861, earthworks were thrown up at nearly all available points, and mounted with columbiads and mortars. A huge new building, erected just outside of the main gate on Carondelet Avenue, was occupied by two companies of regulars, who constructed a strong earthwork, topped with sand-bags, and mounted with formidable pieces of ordnance. Other elevated positions, some of them a quarter of a mile from the arsenal, were occupied by volunteers as outposts, and afterwards were intrenched and mounted with cannon.

In 1860, Hon. J. R. Barret, member of Congress from St. Louis, succeeded in procuring the passage by the House of Representatives of a bill authorizing the location of the arsenal at Jefferson Barracks, and providing for the sale of the arsenal grounds, some thirty-five or forty acres. In announcing the fact the *Republican* said, "There is not, we apprehend, a man in St. Louis who will not rejoice at the success of this measure. At the time of the location of these public buildings, no one supposed, we imagine, that for many years yet to come the arsenal would be within the precincts of the city, and therefore not so agreeable to the citizens. But it has so turned out, and it is not surprising that many thousands of persons signed petitions to Congress, praying for the removal of the establishment to Jefferson Barracks." The measure failed to become a law, but in the summer of 1868 an act authorizing the sale of the arsenal grounds was passed by Congress and became a law. This law, however, was never carried into effect.

The arsenal is now used as a military recruiting rendezvous and clothing depot, and is occupied by a small garrison of soldiers under the command of Capt. W. P. Martin, U.S.A.

Naval Operations at St. Louis in the War of 1861-65.—Among the successful operations of the civil war, none were more gallant or more skillfully conducted, and none contributed more substantial results for the restoration of the Union, than those executed by the gunboats of the Mississippi squadron. Immediately upon the breaking out of the war the government became convinced of the military importance of the Western rivers and waters, and in April, 1861, Attorney-General Bates wrote to the distinguished civil engineer, James B. Eads, of St. Louis, who had been engaged in removing obstructions from the Mississippi and its great tributaries, respecting the use of steam gunboats upon those rivers. Mr. Eads immediately responded, and his plan was referred to Commodore Paulding, who reported favorably upon it, and Capt. John Rodgers, a distinguished officer of the United States navy, was detailed to go to St. Louis and consult with Mr. Eads. The result of this conference was that in the latter part of May and in June the steamers "Conestoga," "Taylor," and "Lexington" were secured, and altered at Cincinnati, Ohio, and fitted out as gunboats. These steamboats were not plated, but were protected by oak bulwarks against musket-balls.[1]

[1] At the time of the launch of the gunboat "Winnebago," on July 5, 1863, Hon. Edward Bates made a speech, in which he referred in very complimentary terms to the services rendered by James B. Eads in constructing the naval vessels which had rendered such good service on the Western waters in defeating the Confederates. Mr. Eads, in reply to Mr. Bates, said,—

"GENTLEMEN OF THE UNION IRON-WORKS,—You do not know, as I do, how appropriately your gift comes to the Union Iron-Works through Missouri's honored statesman, nor do you know how much more dearly I value the gift; but it is right that you should know that to no one man is the nation more indebted this day than to Attorney-General Bates for the glorious inland navy that has won such imperishable fame upon the Mississippi. This is a fact, and I utter it in no fulsome praise, but as a truth that will be vindicated by history when the whole record of this war is written. Scarcely had the guns of Charleston startled this once happy land with the first terrors of fratricidal war than I received from the attorney-general a letter upon the subject of putting armed vessels upon the Mississippi River. Very soon afterward I was summoned to Washington by telegraph, at the time traitors had prevented loyal men from passing through Baltimore, and I was forced round by Annapolis, going and coming. When I reached Washington I learned that the cabinet had, at the earnest solicitation of Attorney-General Bates, called me to that city to give my views as to the practicability of altering some of our Western steamboats into gunboats, and on other matters connected with the placing of armed vessels on the Mississippi River. The Secretary of War, Mr. Cameron, told me, somewhat sneeringly, that the putting of gunboats on the Mississippi and the military occupation of Cairo was Mr. Bates' hobby. The matter was referred to the present able Secretary of the Navy, to whom, with other members of the cabinet, I was introduced by Mr. Bates, with praises far beyond my merit; and after consultation with Mr. Welles and Commodore Paulding, who was then assisting him, and both of whom entered most heartily into the matter, the preliminary steps were soon arranged for placing armed vessels upon this river. Mr. Cameron, who at first thought so lightly of the conception of Mr. Bates, then claimed that the execution of the scheme properly belonged to his department, and Mr. Welles courteously yielded the point, and in a polite letter referred me to the War Department. This delayed the matter for some time, but the attorney-general rode his hobby so energetically that the Secretary of War had no peace until he had undertaken to put armed vessels upon this river. He pressed the matter so persistently and with such determination, that the Secretary of War told him to write his own order for the purpose; and that order, which is on file in the War Department at Washington to-day, sent Capt. John Rodgers to the West, and authorizing the construction of the first three wooden gunboats, the 'Conestoga,' 'Lexington,' and 'Taylor,' was blocked out in the handwriting of the attorney-general. I know this, for my own name was in the order, and it was shown

In July following, Quartermaster-General M. C. Meigs advertised for proposals to construct a number of entirely new ironclad gunboats for service on the Mississippi River. The contract was awarded on August 7th to Mr. Eads, who agreed to construct the seven vessels decided upon by the department according to the plans and specifications furnished by Capt. Rodgers, who was to superintend the building of the flotilla. The contract specified that the boats were to be completed and delivered at Cairo by the 5th of October, 1861, under a forfeiture of two hundred dollars per day on each boat until the contract was fulfilled.[1]

The utmost dispatch was required on the part of Mr. Eads to finish the gunboats within the time specified in his contract, and to insure success three of the boats were built for him by Messrs. Hambleton & Collier, at Mound City, and the remaining four were constructed at his marine railways at Carondelet, South St. Louis. The energy and perseverance of Eads, Rogers, Foote, and others at this trying period (like that of Chauncey, Perry, and McDonough on the lakes in the war of 1812) can only be estimated by those whose experience has enabled them to form some idea of the magnitude of the undertaking which these men had to execute. With the exception of a few naval officers, all those to whom was intrusted the construction of the flotilla were ignorant of naval affairs, and they encountered also the additional disadvantage of having to contend against sectional disaffection on the one hand and vacillation on the part of the army and navy authorities on the other. Thus the difficulty of procuring outfits, armaments, and ammunition at a point so remote from the navy-yards and arsenals was very greatly increased. Notwithstanding all this, however, the building of the seven gunboats was begun and carried forward by Mr. Eads with immense energy, and the vessels were finished and ready for armament within one hundred days after the signing of the contract. The gunboats thus constructed were about one hundred and seventy-five feet long, fifty-one feet beam, six feet depth of hold in the clear, and when ready for service drew about five feet of water, and made nine miles per hour. They had five five-flued boilers twenty-four feet long and thirty-six inches in diameter, and two cylinders, each twenty-two inches in diameter, with seven feet stroke. The shaft was made of wrought iron, worked by both engines. A casemate inclosed the wheel, which was placed in a recess near the stern of the vessel. The hulls were made of wood, the bottoms of five-inch plank, and the sides of four-inch, and the vessel was sealed all over with two-inch plank. The sides projected from the bottom of the boat to the water-line at an angle of about forty-five degrees, and from the water-line the sides fell back at about the same angle to form a casemate about twelve feet high. This slanting casemate extended across the hull near the bow and stern, forming a quadrilateral gun-deck. The casemates were made of three-inch plank, and well fastened. The knuckles of the main deck, at the base of the casemates, were made of solid timber, about four feet in thickness. The boats were calked all over, both inside and outside, and sheathed on the outside with two-and-a-half-inch iron, thirteen inches wide, and rabbited on the edges to make a more perfect joint. The plating covered the casemates above and below the water-line. The boats were bulkheaded into compartments to prevent their sinking in case of damage to any particular part. The gun-deck was about one foot above water, and the vessels were pierced to carry thirteen heavy guns. Three 9- or 10-inch guns were placed in the bow, four smaller ones on each side, and two smaller ones astern.

The first of these gunboats, and, indeed, the first United States ironclad, with her boilers and engines on board, was launched from Mr. Eads' ship-yard at Carondelet on the 12th of October, 1861. She was named the "St. Louis" by Admiral Foote, but when the fleet was transferred from the control of the War Department to that of the Navy Department, this

---

to me by him, to know if it was complete in every detail. This was, I believe, in April or May, 1861.

"You see, therefore, gentlemen of the Union Iron-Works, how appropriate it is that your gift to this establishment, built for the purpose of constructing war vessels, should reach it through the honored hand of the attorney-general, that it should come through him whose sagacious mind gave the first impulse which resulted in the creation of a navy that has done so much to save Missouri and the Northwest from harm, to uphold the integrity of the Constitution, to adorn history with gallant deeds and noble names, and to strike terror to the hearts of the enemies of the republic."

[1] In the mean time Gen. Fremont, the commander of the Western Department, was not idle in organizing an army at Cairo, and on July 29th considerable excitement was created on the Levee at St. Louis by the extensive preparations made by the government for transporting troops by steamboat. The following boats were chartered by the government for this purpose: "G. W. Graham," Capt. John A. Scudder; "New War Eagle," Capt. H. L. White; and "Empress," Capt. James Abrams. The "City of Alton," Capt. Barnes, also came from Alton with troops on board. The "City of Louisiana" left for Cairo with troops on the 28th, and the "D. A. January," Capt. Beebe, from Quincy, bristled with bayonets bound for the same point. On August 1st the steamers mentioned above, together with the "Jennie Deans," Capt. E. A. Sheble, and the "Warsaw," Capt. J. W. Malin, left St. Louis with soldiers for Cairo.

name was changed to the "De Kalb," there being another commissioned vessel at that time named the "St. Louis." Then followed the "Carondelet," "Cincinnati," "Louisville," "Mound City," "Cairo," and "Pittsburgh."

Shortly after, in December, 1861, the most powerful vessel of them all, and one which played an important part in the war as the flag-ship of Admiral Foote, the "Benton," was altered and plated. The

THE IRONCLAD "BENTON."

"Benton" was at first the United States snag-boat "Tom Benton," and afterwards Messrs. Eads & Nelson's submarine wrecking-boat "No. 7." She was sold by Messes. Eads & Nelson to the government for the sum of twenty-six thousand dollars, and Gen. Fremont then ordered her to be changed into a gunboat by Messrs. Morse & Daggett, of the St. Louis Dry Dock Company, the work to be done under the superintendence of James B. Eads.

The "Benton" was one hundred and eighty-six feet long on deck, and seventy-five feet wide at the beam; her hold was eight and one-half feet in depth, and she drew about five feet of water. She had a double hull, with the wheels working in the recess near the stern. Her hull was of four-inch plank and timbers eight by ten inches, and was divided by five fore-and-aft bulkheads and thirteen cross bulkheads, making forty-five water-tight compartments. The deck-frame beams were ten inches square, and the main deck was planked with four-and-one-half-inch plank. The forward casemate ran down to the two feet water-line, and was of twenty-four-inch timber, all sheathed with two-and-one-third-inch iron plating. The entire boat was sealed with three and four-inch oak plank, calked, and made perfectly tight. Casemates extended around the whole vessel, and was made of twelve-inch timber. At the knuckle on the main deck the timber was from three to four feet in thickness.

The "Benton" was pierced for and carried eighteen heavy guns, from 32-pounders to 42-pounders calibre, some rifled and some smooth-bore. There were also two nine inch Dahlgren guns in the forward part of the boat, and two smaller ones at the stern.

The machinery, boilers, etc., were all under the deck. The cylinders were twenty inches in diameter, with seven feet stroke. There were four boilers twenty-four feet long and forty inches in diameter, double-flued. The wheels were twenty feet in diameter, with nine-and-one-half-feet bucket, the wheel-house being protected by timber from six to eight inches in thickness and sheathed with heavy iron. The pilot-house was protected by twelve-inch oak timber placed at an angle of about thirty degrees with the upper deck, and was conical in shape, and sheathed with heavy iron.

Her crew consisted of about two hundred and fifty men in all, and Capt. John Scott, a well-known pilot, acted as sailing-master.

Capt. Andrew H. Foote, of the United States navy, was appointed on the 30th of August, 1861, to the command of the naval operations in the Western waters, and was ordered to proceed to St. Louis with all practicable dispatch, and place himself in communication with Maj.-Gen. John C. Fremont, U.S.A., who commanded the Army of the West.

Upon his arrival at St. Louis, Capt. Foote, on Sept. 6, 1861, assumed command of his flotilla, which consisted of three wooden vessels in service, purchased, equipped, and armed as gunboats by Commodore Rodgers. There were also nine ironclad gunboats and thirty-eight mortar-boats in process of building. Seven of these gunboats, as we have seen, had been contracted for with James B. Eads by Quartermaster-Gen. Meigs, under authority of the War Department, and the two remaining boats were purchased and converted into gunboats by order of Maj.-Gen. Fremont. The thirty-eight mortar-boats were also built by order of Gen. Fremont. They were constructed of solid timber, without motive-power, and were each designed to carry a single mortar. Capt. Foote at once infused new vigor into the work of organizing his squadron. Material improvements were made in the plating and armament of the vessels, the casting of the guns at Pittsburgh was hastened, mortars and shells were contracted for to a large extent, and many other things were done to expedite the work of preparation. Finally the flotilla was completed, under the successive commands of Rodgers and Foote, especially the latter, who brought the original idea to perfection and carried it into operation. The fleet consisted of twelve gunboats, seven of them ironclad, and able to resist all except the heaviest solid shot, and costing, on an average, eighty-nine thousand dollars. The

vessels were built very wide in proportion to their length, so that on the smooth river waters they might have almost the steadiness of stationary land batteries when discharging their heavy guns. This flotilla, carrying one hundred and forty-three guns, was as follows:

"Benton," 16 guns; "St. Louis," 13 guns; "Essex" (built at Carondelet), 9 guns; "Mound City," 13 guns; "Cincinnati," 13 guns; "Louisville," 13 guns; "Carondelet," 13 guns; "Cairo," 13 guns; "Pittsburgh" (built at Carondelet), 13 guns; "Lexington," 9 guns; "Conestoga," 9 guns; and "Taylor," 9 guns. Some of these guns were 64-pounders, some 7-inch rifled guns carrying a shell weighing eighty pounds, and none were less than 32-pounders. Each boat also carried a Dahlgren 10-inch shell-gun, the "Benton," Foote's flag-ship, having two of these in her forward battery.

"Foote's flotilla" rendezvoused at Cairo, and the "Benton" and "Essex," formerly called the "New Era," left St. Louis for that port on the 3d of December, 1861. In the fight at Fort Henry a 32-pound shot struck the "Essex" just above one of her bow guns, killing a young officer, Samuel B. Brittain, master's mate, then passing into the flue of the centre boiler, occasioning an escape of the steam and hot water which dreadfully scalded all on the forward gun-deck and the two pilots, who were almost immediately over the front of the boilers. Twenty men and officers were instantly killed or scalded by this explosion. Among the injured was the commander of the vessel, the gallant Capt. W. D. Porter. The "Essex" was completely disabled and was obliged at once to withdraw from the combat.

After the capture of Fort Henry the "Essex" returned to St. Louis, on the 23d of February, for repairs. She was lengthened forty feet, her boilers and machinery were placed below the water-line, and her casemates were raised from six and a half to seven and a half feet in height. She received entirely new boilers and was generally reconstructed. This was the third reconstruction the boat had undergone, and altogether her cost to the government at this time amounted to ninety-one thousand dollars, which was twenty thousand dollars less than that of any other of the gunboats built in the West.

The officers of the "Essex" were Capt. W. D. Porter, commander; Robert K. Riley, first master and executive officer; G. W. Walker, second master; D. P. Rosenmiller, third master; Spencer Kellogg, fourth master; Joseph H. Lewis, paymaster; Thomas Rice, surgeon; Joseph Heep, chief engineer; —— Sterns, first assistant engineer; J. Wetzell, second assistant engineer; Thomas Fletcher, third assistant engineer; Matthew Snyder, gunner; J. H. Mammon, boatswain; E. H. Eagle, boatswain's mate; Thomas Steele, carpenter. Officers and crew numbered one hundred and fifty men.

Her armament was as follows: three 9-inch Dahlgren shell-guns, one 10 inch Dahlgren shell-gun, two 50-pound rifled Dahlgren guns, one long 32-pounder, and one 24-pound boat howi[illegible]

The defenses were specified as follows: "Her forward casement, of wood thirty inches thick, is plated with India-rubber one inch thick and one and three-fourths inch iron; side casemates, of wood sixteen inches thick, plated with one inch India-rubber and three-fourths inch iron. The roof is bomb-proof. The pilot-house is of wood, eighteen inches thick, plated with one inch India-rubber and one and three-fourths inch iron. She has false sides, which render it impossible for anything like a steam ram to attack her effectively. Her hull cannot be reached by any such contrivance, and even if it could, the water-tight compartments into which the hold is divided by bulk-heads, being forty in number, would render the sinking or otherwise disabling of the boat by collision an impossibility. If one or more of the compartments should be broken into, the disadvantage to the craft from taking water would be comparatively slight.

"The 'Essex' is two hundred and five feet in length and sixty feet in width. Her hold is five and a half feet in depth. She is provided with two engines, with cylinders twenty-three inches in diameter and six feet stroke. She has three boilers twenty-six feet long and forty two inches in diameter, working two wheels twenty-six feet in diameter and eight feet bucket. She has much more power than any of the other Western gunboats, will be proportionately faster than any of them, and having two wheels adds greatly to the precision of her movements."

The gunboat and ram "Fort Henry" was launched from the Marine Railway Company's yard at Carondelet on Sept. 22, 1862. The "Fort Henry" was two hundred and eighty feet in length and about forty feet in width. She was designed by Capt. Porter, formerly of the "Essex," and carried six or eight guns. She was constructed more especially to be used as a ram. The "Choctaw," another gunboat, was designed by Capt. Porter and launched a few days before the "Fort Henry." The "Choctaw" was two hundred and twenty-five feet in length, and was originally designed for a turret and two heavy guns. She was afterwards altered so that she could be used either as a ram or gunboat. The rams on both vessels were two feet in length, made of bell metal.

The proprietors of the Union Marine Works at Carondelet, Messrs. James B. Eads & Co., having a contract with the government to build five new gunboats for the Western rivers, launched another gunboat on the 13th of January, 1863. This vessel was named the "Osage," and was the smallest of her class. She was one hundred and eighty feet long by forty-five feet wide, with four feet depth of hold, and had an iron hull divided into six compartments. When fully completed and armed she had a draft of only three and a half feet of water. She was of the monitor pattern, and carried two long-range eleven-inch guns placed in a turret on the forward deck. Her hull was strengthened on the outside and two feet below the water-line by a plating of four-inch iron. Her deck, the outer edges of which extended but twelve inches above the water, was slightly oval, instead of being flat, as was the case with the other gunboats built on the Mississippi.

The other four boats then building at the Union Works, Carondelet, were named the "Neosho," "Milwaukee," "Chickasaw," and "Winnebago." The three last named were propellers. The "Winnebago" was launched July 5, 1863, and the "Chickasaw" Feb. 10, 1864. The launching of the "Chickasaw" was attended with a distressing calamity, which is thus described by an eye-witness:

"At half-past ten o'clock the stays were let loose and the immense iron structure slid from the ways and plunged into the river, rising again and floating like a cork. Nearly all eyes were turned toward the river to see the effect of the awful plunge, and only those forming the immediate party around Miss Stewart witnessed the ceremony of breaking the wine-bottle and naming the boat, which was nevertheless done, and the 'Chickasaw' was baptized, being named with a beautiful name by a beautiful lady. But the launch was no sooner fairly afloat than a cry of alarm was heard from the bow, and a confused movement noticeable among those stationed there. The excitement created by the launch was now increased. The anchor was jerked overboard, and the immense rope was being paid out with fearful rapidity. The huge coils swept everything before them. Miss Jenny Eads, daughter of J. B. Eads; Miss Mary Maguire, daughter of Mr. John Maguire; Mr. O. B. Filley, son of Mr. O. D. Filley, and Mr. and Mrs. Wm. P. Bradley were carried overboard almost instantly; others were knocked down and saved by the merest chance. The chair on which Miss Stewart sat was pulled into the river, and she herself thrown on the coil of ropes, where she was grasped by two gentlemen and literally dragged away from the rope. The unfortunate persons supported themselves in the water by getting hold of pieces of timber, until two skiffs pushed out into the river and picked them up, all save Mrs. Bradley, who was supposed to have been stunned by striking one of the timbers, and drowned."

In 1863 the government decided to build at St. Louis two light-draft ironclad monitors of the Ericsson pattern. The contract was awarded to Messrs. McCord & Steel, of the "National Iron-Works," and the construction of the monitors "Etlah" and "Shiloh" was immediately begun, under the supervision of D. G. Wells, government engineer. These vessels were of the class then known as "light-draft monitors," for twenty of which the Navy Department contracted in 1863. The keel of the "Etlah" was laid in August of that year, but owing to alterations found necessary, from actual experiments with monitors of this class, the completion of the vessel was delayed beyond the original contract time. The "Etlah" was the largest vessel ever built on the Mississippi up to that time, and when [illegible] launched, on July 2, 1865, a vast concourse [illegible]ed to witness the trial.

The "Etlah's" weight was about eighteen hundred tons. The two vessels carried two guns, one 11-inch Dahlgren and one 150-pounder rifled Parrott. Their extreme length was two hundred and twenty-five feet; breadth of beam, forty-five feet; depth of hold, eleven feet; thickness of side armor, three inches; thickness of deck armor, one inch; internal diameter of turret, twenty feet; thickness of turret, eight inches; internal diameter of pilot-house, six feet; thickness of pilot-house, ten inches; number of motive-engines, two; diameter of cylinders, twenty-two inches; length of stroke, thirty inches; propellers, two; diameter of propellers, nine feet.

Messrs. McCord & Steel had considerable difficulty in launching the "Shiloh," but she was finally gotten into the w[illegible] This vessel was built in three separate divisions [illegible]rtments. Her turret was composed of one hundred and sixty plates of iron one inch in thickness by forty inches in width and nine feet high, each plate weighing about twelve hundred pounds. The plates were riveted together by bolts of one and a half inches in thickness, which, with the arrangement of the planed joints of the plates, rendered it one solid mass of iron weighing over one hundred tons. The turret, when occasion required it, was revolved by two turret engines, and moved upon a stationary ring.

The services performed by the gunboats built at St. Louis in the military and naval operations against Fort Henry, Fort Donelson, Island No. 10, Lucas' Bend, Fort Pillow, Pittsburgh, Tenn., Vicksburg, New Orleans, and Mobile, and the expeditions and reconnoissances on the Ohio, Cumberland, and Tennessee Rivers, belong more properly to the history of the country, but we cannot refrain from alluding to the gallant and meritorious services performed by many of the Mississippi pilots from St. Louis during the civil war.

Immediately upon the breaking out of the war the services of the Mississippi pilots were brought into

requisition, and the very efficient aid rendered by these men—often under circumstances of the greatest difficulty and hardship, and always with a high degree of patriotic disinterestedness—entitles the pilots of the Western flotilla to honorable mention in every work professing to relate the gallant deeds and self-denying bravery of that eventful era in the civil war. Barton Able, in the capacity of master of transportation under Gen. John C. Fremont, was engaged in the preparatory organization of an auxiliary force of armed steamers designed for the work of keeping open the navigation of Western waters, and rendered effective assistance to the government.

A writer upon this subject says,—

"It has been alleged that the pilots of the Mississippi and Ohio Rivers were disloyal to the government in the time of the late Rebellion. In the dark hours of 1861, when a call was made for pilots to go in the wooden gunboats 'Tyler,' 'Lexington,' and 'Conestoga' (these vessels were mere wooden shells, hastily gotten up, and were pronounced by even 'loyal' editors to be nothing more than slaughter-pens), everything that could be brought to bear to prevent or deter pilots or engineers from risking their lives in them was brought forward by the opposing element in our midst. Yet more than double the number required to pilot those vessels came forward, offered their services, and went in these gunboats, well knowing that they would be a special mark for the enemy's sharpest practice, for to kill the pilot would be equivalent to disabling the vessel. The pilot-house, being a target for the enemy, was truly named the slaughter-pen of these gunboats. In the fall of 1861 a call was made for fifteen pilots to go in the (so-called) ironclads, and in a few days the flag-officer received over fifty applications for the position. In the battle of Fort Henry two pilots were killed, Marsh Ford and James McBride; in the battle of Fort Donelson two more, Frank Riley and William Hinton, and others were wounded, two of our gunboats dropping out of the action partially on that account. Another pilot was killed just above Fort Donelson. Many distinguished names might be added to those mentioned who were killed or wounded in these pilot-houses. Among the killed were Capt. G. W. Rodgers and Paymaster Woodburry, and the wounded, Commodores Foote and Kilty, of our own navy, and Capts. Buchanan and J. N. Brown, of the Confederate navy, with their pilots in each case. It was, therefore, sufficiently proved that the pilot-house was always the most dangerous part of the vessel, while it was at the same time the only place from whence the pilot or captain could see how to manage the gunboat. Notwithstanding pilots came forward voluntarily to fill the places of the gallant men who had sealed their loyalty with their lives, and numbers were clamorous for appointment as pilots in the Mississippi flotilla."

The Western Sanitary Commission was the outgrowth of the military operations in Missouri during the civil war. In the summer of 1861 the battles of Boonville, Dug Spring, Carthage, and Wilson's Creek were fought in this State. The battle of Wilson's Creek was one of the most desperately contested engagements of the war, and the number of killed and wounded was very large. The wounded, numbering seven hundred and twenty-one, were transported all the way from the battle field (about twelve miles south of Springfield, near the Fayetteville road) to Rolla in ambulances and army-wagons, and thence by cars to St. Louis. The first hundred arrived at night, and were placed in furniture-wagons and carried to the "New House of Refuge Hospital," which had been established and opened by the government on the 1st of August, 1861, under the supervision of Medical Director De Camp, with Dr. Bailey in charge. This hospital, situated about two miles south of St. Louis, was soon filled beyond its capacity with sick and wounded soldiers, and as the arrivals continued it was necessary that other accommodations should be obtained without delay. All the available wards of the St. Louis Hospital, which was under the charge of the Sisters of Charity, and of the City Hospital were immediately taken and filled, but there was still a pressing need of additional facilities.

The sad and neglected condition of the soldiers who had been brought from Springfield and the interior of Missouri excited the benevolent and patriotic sympathies of the Union citizens of St. Louis, and they resolved to form the Western Sanitary Commission, for the purpose of ministering to the physical and spiritual wants of the Union soldiers. At the suggestion of Miss D. L. Dix, the philanthropist, who was then in St. Louis, Mrs. Jessie Benton Fremont, and other persons of humane and patriotic motives, Maj.-Gen. Fremont was requested to give his approval of the Sanitary Commission, which was to act in aid of the Medical Department. Gen. Fremont immediately approved the suggestion, and on the 5th of September issued the following order, appointing the Western Sanitary Commission and defining its duties and sphere of action:

"Its general object shall be to carry out, under the properly constituted military authorities, and in compliance with their orders, such sanitary regulations and reforms as the well-being of the soldiers demand.

"This commission shall have authority, *under the directions of the medical director*, to select, fit up, and furnish suitable buildings for army and brigade hospitals, in such places and in such manner as circumstances require. It will attend to the selection and appointment of women nurses, under the authority and by the direction of Miss D. L. Dix, general superintendent of the nurses of military hospitals in the United States. It will co-operate with the surgeons of the several hospitals in providing male nurses, and in whatever manner practicable, and by their consent. It shall have authority to visit the different camps, to consult with the commanding officers and the colonels and other officers of the several regiments with regard to the sanitary and general condition of the troops, and aid them in providing proper means for the preservation of health and prevention of sickness by supply of wholesome and well-cooked food, by good systems of drainage, and other practicable methods. It will obtain from the community at large

such additional means of increasing the comfort and promoting the moral and social welfare of the men in camp and hospital as may be needed and cannot be furnished by government regulations. It will, from time to time, report directly to the commander-in-chief of the department the condition of the camps and hospitals, with such suggestions as can properly be made by a sanitary board.

"This commission is not intended in any way to interfere with the medical staff or other officers of the army, but to co-operate with them and aid them in the discharge of their present arduous and extraordinary duties. It will be treated by all officers of the army, both regular and volunteer, in this department with the respect due to the humane and patriotic motives of the members and to the authority of the commander-in-chief.

"This Sanitary Commission will for the present consist of James E. Yeatman, Esq., C. S. Greeley, Esq., J. B. Johnson, M.D., George Partridge, Esq., and the Rev. William G. Eliot, D.D."

As soon as this order was issued the gentlemen named in it, acting as a Sanitary Commission, commenced their labors in connection with the Medical Department. Their first important work was the fitting up of a new hospital sufficiently large to accommodate at least five hundred patients, and negotiations were opened for renting the large five-story marble-fronted building corner of Fifth and Chestnut Streets, which was secured at a reasonable rent. Necessary alterations were made, arrangements for bathing introduced, special diet kitchens were fitted up, and the whole building furnished with beds and bedding. On the 10th of September it was opened for the reception of patients, under the charge of Surgeon John T. Hodgen, United States volunteers, with a competent corps of assistant surgeons, apothecary, steward, ward-masters, nurses, etc., under the title of the "City General Hospital."

It was rapidly filled with patients, and continued as a military hospital until the autumn of 1863, under the charge of Dr. Hodgen, whose able and faithful services and great surgical skill were fully recognized and appreciated by the Medical Department and by the Western Sanitary Commission.

Being located in a central part of the city, convenient to the railroad depots and the river, it was the place of reception of nearly all the severely wounded and the hopelessly sick on their arrival.

It was in this building that the Western Sanitary Commission commenced its useful and arduous labors, having its office in a small room at the left of the entrance, in the second story, and a store-room for sanitary goods in the basement, its members meeting every day for consultation and action; its president, James E. Yeatman, giving his whole time to the work, and having only one man to act as store-keeper, porter, and clerk; each member of the commission lending a helping hand, boxes of sanitary stores arriving from New England, and from the various towns and cities of the West, prepared and forwarded by the willing hands of the wives and mothers and daughters of the land, and being distributed as needed to the hospitals and camps and regiments in and around St. Louis, and at more distant posts in the interior of the State.

From September 12th to September 21st occurred the siege, the battle, and surrender of Lexington, Mo which threw some three hundred more wounded men upon the hospitals of St. Louis. During the two months in which these events happened, besides the hospitals already named, several more were added. On the 13th of September the hospital near Camp Benton was opened, and on the 15th the Good Samaritan, located at the corner of O'Fallon Street and Pratte Avenue. On the 24th of October the new hotel building on Fourth Street, between Morgan and Franklin Avenue, was converted into a hospital. The Receiving House, on Spruce Street between Seventh and Eighth, was used by the Sanitary Commission for receiving and giving temporary shelter to the sick and wounded soldiers arriving at night by the respective railroads, but was taken possession of November 4th by the medical director and converted into a hospital, and named the Pacific Hospital. The Western Sanitary Commission also fitted up a number of hospital cars, furnished them with beds, cooking-stoves, and nurses, and supplied all necessary stores, to render the transit of the patients over the railroads as comfortable as possible.

In the same month extensive additions were made to the Small-pox Hospital on Duncan's Island; and the Hickory Street Hospital was opened for the especial use of the Reserve Corps of State troops.

During the months of December and January, 1862, the number of sick and wounded in all the hospitals of St. Louis and vicinity had reached over two thousand, and the labors of the Sanitary Commission were greatly increased. Meetings were held every few days; frequent inspections were made of all the hospitals and camps; reports were prepared and submitted to the commanding general; improvements were introduced, and supplies were forwarded wherever needed.

In the enlargement of its work it became necessary for the Sanitary Commission to procure additional store-room for goods, and to employ a secretary. For a period of three months this position was filled by Rev. J. G. Forman, of Alton, Ill., who resigned it to enter upon his duties as chaplain of the Third Missouri Volunteers, and L. B. Ripley succeeded him for several months, when he also resigned and became the quartermaster of the Thirty-third Missouri Volun-

teers. In May, 1863, Rev. Mr. Forman again became permanently secretary of the commission. In February, 1862, the small room in the Fifth Street Hospital was vacated for the larger rooms, No. 10 North Fifth Street.

In December, the Medical Director, Surgeon De Camp, with whom the commission had labored in establishing and fitting up the new military hospitals, was superseded by Dr. J. J. B. Wright, U.S.A. The commission undertook the laborious task of hiring suitable nurses for the hospitals, and was especially instrumental in introducing female nurses in them, a system not recognized in the army and hospital regulations of the United States, but which, through the advocacy and influence of Miss Dix, found favor with the then Secretary of War, Mr. Cameron, and was approved by the President.

On the 13th of March, 1862, a Soldiers' Home for discharged and furloughed soldiers passing through the city was established by the Western Commission at 29 South Fourth Street, St. Louis, capable of accommodating from fifty to one hundred soldiers daily. It was placed in charge of Rev. Charles Peabody as superintendent, with Miss A. L. Ostram as matron. During the first two years of its existence the Soldiers' Home at St. Louis furnished meals and lodgings to twenty thousand eight hundred and forty-six soldiers, most of them invalids partially restored to health, passing on furlough to their homes or returning to their regiments.

The number of meals furnished to soldiers for the two years ending March 12, 1864, was eighty-five thousand nine hundred and ninety-two, and the number of lodgings for the same period was twenty-four thousand two hundred and ninety. In no case was any charge made to any of the guests. Besides these, many near relatives, fathers, mothers, and wives, of sick or furloughed soldiers, accompanying them, received the hospitality of the home, of which no account was made.

The expense incurred by the commission in maintaining this institution was about three thousand dollars a year, and the value of the rations and fuel furnished by the government was about two thousand dollars more.

During the year 1862 three military hospitals were added to those already established in St. Louis,—the Marine, the Jefferson Barracks, and the Lawson Hospitals. The necessity for this arose from the large number of sick brought by the hospital steamers from the armies of the frontier, the Southwest, the Tennessee, and the Mississippi.

The Marine Hospital was a government institution originally intended for persons engaged in the navigation of the Mississippi River. It was a four-story stone and brick edifice, surrounded by extensive and well-shaded grounds, and a garden in which the convalescent patients performed a part of the labor, and had every convenience of a model hospital.

It was opened as a military hospital May 4, 1862, and then had accommodations for one hundred and fifty patients. From that date till May 1, 1864, it had received fifteen hundred and seventy-four patients, and its percentage of deaths was nine. During the summer of 1863 its accommodations were enlarged for one hundred more patients by the addition of wooden barracks.

The officers at the hospital were Assistant Surgeon James H. Peabody, U.S.V., in charge, L. H. Calloway, M.D., acting assistant surgeon, and Rev. James A. Page, chaplain.

In April, 1862, Jefferson Barracks was converted into a hospital. Besides the old buildings, the government, during the summer of 1862, erected others on the ample grounds belonging to it on the west side, so as to afford accommodations for two thousand five hundred patients. These new buildings were one story high, in triple rows six hundred feet long, divided into wards of three hundred feet each. There were three groups or sets of these new hospitals, some distance apart, the entire grounds in every direction being beautifully shaded by large oak-trees. They were so arranged that each group had the central row appropriated to a dining-room and surgeons', nurses', and stewards' quarters, the outside rows being for sick wards. Besides these improvements, a system of water-works was introduced, with reservoir and pipes, by which the water of the Mississippi was carried through all the buildings.

The institution was in charge of Surgeon J. F. Randolph, U.S.A., assisted by Dr. H. R. Tilton, U.S.A., and P. C. McLane, M.D., A. L. Allen, M.D., T. F. Rumbold, M.D., Hiram Latham, M.D., S. Leslie, M.D., and J. J. Marston, M.D. The post chaplain, Rev. J. F. Fish, had been stationed here many years, and continued his services, in connection with Rev. S. Pettigrew, hospital chaplain.

The number of patients received and treated in this hospital in two years, ending April 30, 1864, was eleven thousand four hundred and thirty-four.

The Lawson Hospital was situated on the corner of Broadway and Carr Streets, and was fitted up during the latter part of the fall of 1862. The edifice was originally intended for a hotel, was seven stories high, and was divided into eight wards, besides office-rooms, nurses' quarters, linen-room, kitchen, dining-hall, and

store-rooms. It was opened Jan. 17, 1863, and was in charge of Surgeon C. T. Alexander, U. S. Army, assisted by W. H. Bradley, M.D., L. H. Bottomley, M.D., and William Fritz, M.D. Rev. Philip McKim was hospital chaplain.

About the latter part of December, 1862, the large amphitheatre building in the old Fair Grounds at Benton Barracks, a few miles northwest from St. Louis, and north of the St. Charles road, was taken possession of by the government for hospital purposes. It was inclosed, provided with windows, floored, partitioned, divided into wards, thoroughly whitewashed, furnished with iron bedsteads and good beds, and converted into one of the largest, most thoroughly ventilated, and best hospitals in the United States, capable of accommodating two thousand five hundred patients. Numerous other buildings near the main edifice, on the same grounds, formerly used by the Agricultural Society for its exhibitions, were used for officers' quarters, medical dispensary, commissary rooms, special diet kitchens, etc., and the fine walks and splendid shade added much to the beauty and attractiveness of the place.

The institution was at first placed in charge of Surgeon Ira Russell, U.S.V., under whose administration it was conducted with entire success. It was opened March 1, 1863, and during the following three months received two thousand and forty-two patients. From June 1, 1863, to May 1, 1864, there were four thousand eight hundred and ninety-eight patients received.

For a few months of the autumn of 1863, Surgeon Russell was relieved by Surgeon J. H. Grove, U.S.V. In the winter of 1863–64, Benton Barracks became a recruiting station for colored troops, and hospital accommodations being needed for the sick of the colored regiments, several of the wards were appropriated for their use. Dr. Grove having been assigned to another position, Dr. Russell was again placed in charge.

Besides the general hospital, there was also a post hospital at Benton Barracks, likewise in charge of Surgeon Russell. During the fall of 1863 and winter of 1864 many of the sick of the new colored regiments were treated there. The whole number of patients received was six thousand one hundred and forty. Female nurses were provided for this hospital by the Western Sanitary Commission, the government only allowing them to the general hospitals.

Notwithstanding these extensive arrangements, the accommodations for sick and wounded soldiers proved insufficient, and several new hospitals were established, —one on Hickory Street and one at Benton Barracks, the Gratiot Prison Hospital and the Smallpox Hospital on Duncan's Island. The first of these was originally a general hospital, and there was formerly a post hospital at Schofield Barracks, in the immediate vicinity, on Chouteau Avenue, which was consolidated with it Nov. 1, 1863. The whole number of patients received at Hickory Street to that date was one thousand eight hundred and twenty-six, and at Schofield Barracks the number of patients received was two hundred and six. At the Military Prison Hospital in McDowell's College, Gratiot Street, the number of patients received up to May 1, 1864, was three thousand five hundred and fourteen, and the percentage of deaths eleven and four-tenths. The surgeon in charge was B. B. Breed, U.S.V. The number of patients received at the Smallpox Hospital to June 1, 1863, was eight hundred and seventy-one, and the percentage of deaths twenty-two and nine-tenths. The number of prisoners received at the same institution for the same period was one hundred and sixty-two, and the percentage of deaths thirty-four and one-half.

The number of patients treated at the post hospital on Hickory Street from Nov. 1, 1863, to May 1, 1864, was one thousand four hundred and twelve. The institution was in charge of Frank W. White, M.D., A. A. Surgeon, U. S. A.

The Good Samaritan, the Fifth Street, the Eliot, and the New House of Refuge Hospitals were discontinued.

The whole number of patients treated in the hospitals of St. Louis, including those at Jefferson and Benton Barracks, up to May 1, 1864, was 61,744; the number that died was 5684, and the percentage of deaths 9.1.

The military prisons of St. Louis from the beginning of the war received the constant attention of the Western Sanitary Commission, and sanitary stores were issued to them in all cases of urgent need upon the requisitions of the surgeon in charge.

The following general, post, and regimental hospitals were among the number that were supplied by this commission: New House of Refuge, St. Louis and City Hospitals, General Hospital (corner of Fifth and Chestnut Streets), Good Samaritan, Eliot (Fourth Street), Pacific, Hickory Street, Jefferson Barracks, Marine, Benton Barracks, Lawson, and Smallpox Hospitals, hospitals in Arnot's and Thornton & Pierce's buildings, Schofield Barracks and Military Prison; hospitals in Cairo and Mound City, Ill.; at Paducah and Columbus, Ky.; Pittsburgh Landing, Union City, Jackson, Lagrange, Memphis, Nashville, and Murfreesboro', Tenn.; Corinth and Vicksburg, Miss.; Huntsville, Ala.; Helena, Clarendon, Brownsville, Duval's Bluff, Fayetteville, Salem, and Little Rock, Ark.; Fort Blunt, Cherokee Nation; Young's Point, Milliken's Bend, Goodrich's Landing, and Duckport, La.; hospitals of the Sixth, Thirteenth, Fourteenth, Fifteenth, Sixteenth, and Seventeenth Army Corps: and of Quimby's, Hovey's, Stoole's, Logan's, McPherson's,

Herron's, Kimball's, McArthur's, and Blair's divisions; and of Thayer's, Irving's, Wilder's, and the marine brigade; hospitals at Otterville, Pacific City, Rolla, St. Joseph, Sulphur Springs, Sedalia, Tipton, Commerce, St. Charles, Ironton, Pilot Knob, Cape Girardeau, Lebanon, Patterson, Jefferson City, Kansas City, Springfield, Mo.; Fort Scott, Fort Leavenworth, Kan.; Fort Halleck, Idaho; Evansville, Ind.; Quincy, Ill.; and Keokuk, Iowa.

Many stores were also issued to convalescent camps, and personally to large numbers of convalescent soldiers.

The hospital steamers supplied by the Western Sanitary Commission were

the "City of Louisiana," fitted out March 20, 1862, but afterwards refitted and named the "R. C. Wood," the "D. A. January," the "Empress," the "Imperial," the "Crescent City," the "Red Rover," the "City of Alton," the "City of Memphis," the "Nashville," and of the transports conveying the sick and wounded, the "Ruth," the "Glasgow," the "Diana," the "Nebraska," the "Champion," and the "Baltic."

Of the gunboats of the Mississippi naval squadron, supplies were sent to nearly all, among which the following may be named:

The "Louisville," "Mound City," "Carondelet," "Chillicothe," "Judge Torrence," "Lafayette," "Naumkeag," "Ratler," "Autocrat," "Black Hawk," "Petrel," "General Price," "Romeo," "Choctaw," "Benton," "Avenger," "Tyler," "Monarch," "Switzerland," "Pawpaw," "Tawha," "Key West," and "No. 11."

In this connection it may be appropriate to mention the names of those female nurses who, by long and faithful service and special devotion to the care of the sick and wounded soldiers in the St. Louis hospitals, earned the gratitude of those who were the objects of their kind solicitude and self-sacrificing labors. The list is as follows:

Mrs. M. I. Ballard, Mrs. E. O. Gibson, Mrs. L. D. Aldrich, Mrs. Houghton, Mrs. S. A. Plummer, Miss Carrie C. McNair, Mrs. Harriet Colfax, Mrs. Sarah A. Barton, Miss Ida Johnson, Miss Clark, Mrs. A. L. Ostram, Mrs. Lucy E. Starr, Mrs. Olive Freeman, Mrs. Anne M. Shattuck, Mrs. E. C. Brendell, Mrs. E. J. Morris, Mrs. Dorothea Ogden, Mrs. E. C. Witherell, Miss N. A. Shepherd, the Sisters of Charity at the New House of Refuge Hospital, Miss Emma L. Ingalls, Miss Emily E. Parsons, Miss Fanny Marshall, Miss Louisa Maertz, Miss Harriet N. Phillips, Mrs. Elizabeth A. Nichols, Miss Rebecca Craighead, Mrs. H. A. Haines, Mrs. H. A. Reid, Miss Hattie Wiswall, Mrs. Reese, Mrs. Maria Brooks, Mrs. Mary Allen, Mrs. Bickerdike, Miss Cornelia M. Tompkins, Mrs. M. A. Steller, Mrs. Carrie Gray, Mrs. M. J. Dykman, Misses Marian and Clara McClintock, Mrs. Otis, Mrs. Sager, Mrs. Peabody, Mrs. Rebecca S. Smith, Miss Melcenia Elliott, Mrs. C. C. Hagar, Mrs. J. E. Hickox, Mrs. Lucy L. Campbell, Miss C. A. Harwood, Miss Deborah Daugherty, Miss Phebe Allen, Mrs. Wells, Mrs. Ferris, and Miss Lucy J. Bissell.

The Union refugees also received a share in the labors of the Western Sanitary Commission. During the fall and winter of 1861–62 many refugees were driven by the Confederates from the interior and southwest parts of Missouri to St. Louis, and were in a condition of want and suffering. A home on Elm Street was opened for the most helpless and destitute, and others were assisted according to their necessities. John Cavender, an old and respectable citizen, eminent for his integrity and Christian character, devoted his whole time to their care. A fund was raised at first by a call of the Western Sanitary Commission, amounting to about three thousand eight hundred dollars, besides a large amount of clothing. A further sum of fifteen thousand dollars was raised by an order of Maj.-Gen. Halleck, by assessing the wealthy class of Southern sympathizers in St. Louis for this object, and from this resource Mr. Cavender was able to render very important aid to these destitute people. For two years he took almost the entire charge of this work, in which he had the counsel of the members of the commission, and was sometimes aided with funds for the purpose when other sources failed. During the winter of 1863, Mr. Cavender, whose health had been failing, was taken sick and died.

In August, 1863, there began to be further arrivals of destitute refugees from Arkansas, Tennessee, Mississippi, Alabama, Louisiana, and Texas. Many of them were women with small children, poorly clad, often barefooted, brought up the river on government steamers, and landed in St. Louis without the means of procuring a place of shelter for a single night. There was no alternative but to open another refugee home. The president of the commission rented the house 39 Walnut Street for the purpose on the 1st of September, and from that date to May, 1864, not less than fifteen hundred refugees were sheltered, provided for, or sent on their way to friends or places of employment in the free States. By an arrangement with Gens. Schofield and Rosecrans, rations and fuel were allowed from the government, and the rent was paid by the quartermaster, but the incidental expenses of the home and the charities in clothing, money, etc., were provided by the commission. The home was under the superintendence of Rev. Mr. Forman, the secretary of the commission, and its domestic arrangements were conducted by Miss M. Elliott as matron, who, in a spirit of true self-sacrifice, devoted her time and strength to the service of the poor outcasts. The expenses and charities of the home and for destitute refugee families in the city, and to those going beyond St. Louis, were about one thousand dollars in six months, beyond the aid received from the government in rations, fuel, rent, and transportation.

The resources of the Western Sanitary Commission were made up of voluntary contributions from

the people of the loyal States. Men and women in the leading towns and cities of New England, in the Northwest, and in the cities of Boston, Providence, New York, and Philadelphia gave liberally of their means to support the commission in its noble work. Besides all this, the city and county of St. Louis and the Legislature of Missouri acted with great generosity. In addition to the liberal contributions of the citizens, the Convention of Missouri appropriated fifty thousand dollars, and in the winter of 1864 the Legislature of Missouri made another appropriation of twenty-five thousand dollars to the commission to be used in the same way, and the county court of the county of St. Louis made a donation of two thousand dollars. Besides these gifts there was raised at the Merchants' Exchange, St. Louis, a liberal subscription of money and goods to the commission for the army of Gen. Grant during the siege of Vicksburg, amounting in value to about five thousand dollars, and Dec. 25, 1863, a committee of merchants, of which Joseph C. Cabot was chairman, raised another subscription of twenty-five thousand dollars additional for the general purposes of the commission.

Besides a constant flow of contributions from Boston and neighboring towns and cities of Massachusetts, that city at one time, through a committee, of which R. C. Greenleaf was treasurer, in response to an appeal from Rev. Dr. Eliot, on behalf of the commission, contributed fifty thousand dollars; and the distant State of California, stimulated by the eloquence and patriotism of the lamented Thomas Starr King, subscribed fifty thousand dollars, being part of a donation of two hundred thousand dollars, the balance of which went to the United States Sanitary Commission. These contributions of money, with the gifts of friends in New York City, through James A. Roosevelt, and from other towns and cities of the loyal States, amounted in the aggregate to two hundred and seventy-five thousand dollars, while the stores contributed from the same sources, and from the Ladies' Union Aid Societies of almost every village and city from Maine to Minnesota, and from Boston to St. Louis, consisting of blankets, comforts, sheets, pillows, pillow-slips, socks, slippers, mittens, bandages, lint, salves, cotton and woolen shirts and drawers, hospital garments, dressing gowns, dried and canned fruits, tomatoes, jellies, domestic wines, blackberry cordial, butter, vegetables, etc. amounted in value up to May 9, 1864, to more than a million and a quarter of dollars.

The great success which had attended the fairs held in the large cities of the East and in Chicago and Cincinnati in aid of the United States Sanitary Commission, as we have seen elsewhere, suggested the idea of a Mississippi Valley Sanitary Fair at St. Louis, for the benefit of the Western Sanitary Commission. The net proceeds of this fair amounted to over five hundred and fifty thousand dollars, which was used in the sanitary work of the army, and in furnishing supplementary supplies to the hospitals and to the troops.

A generous contribution was made to the fair by the St. Louis County court of the Smizer farm, the proceeds of which, as a part of the combination sales, amounted to forty thousand dollars. Considering the source of this gift, and the large amounts received from St. Louis in other ways, it was thought proper by the Western Sanitary Commission to establish a soldiers' orphans' home near the city. Accordingly, the building and grounds previously known as Webster College, near the Webster Station, on the Pacific Railroad, in St. Louis County, ten miles west of the city, were secured at a cost of twelve thousand and sixty-one dollars. The property consisted of a large stone edifice and twenty acres of land, admirably suited to this purpose. The sum of five thousand dollars was also appropriated towards the expenses of furnishing the institution and providing its first supplies, and the property and the management of the home were placed in the hands of a committee of the Ladies' "National League" of St. Louis, and an advisory committee of gentlemen associated with them, with the offer from the commission that the whole should be conveyed to a board of trustees of their own selection, on condition of their raising an endowment of fifty thousand dollars and assuming the responsibilities of the trust. A public meeting was held soon after; an organization was effected, and the undertaking commenced. A portion of the money was soon raised, and the State Legislature appropriated five thousand dollars a year for ten years towards the support of the institution. Subsequently the commission expended an additional sum of twenty thousand dollars in new buildings, so as to enlarge the accommodations of the home for one hundred and fifty orphans, and offered an appropriation of ten thousand dollars additional funds, provided the trustees would complete the fifty thousand dollars endowment fund by the 22d of February, 1866, making a sum more than equal to the amount received from the gift of St. Louis County in the Smizer farm.

On the 7th of January, 1865, the Legislature of Missouri passed an act incorporating the institution, by the title of "The Soldiers' Orphans' Home of St. Louis," and on the 31st of the same month made the yearly appropriation already mentioned. The follow-

ing incorporators were named in the act as the board of trustees, and the following members of the Ladies' "National League" as a board of lady managers:

"*Board of Trustees.*—E. W. Fox, N. C. Chapman, A. S. W. Goodwin, D. B. Gale, Dwight Durkee, T. B. Edgar, John H. Fisse, Henry Kennedy, M. L. Linton, John H. Lightner, S. H. Laflin, James Richardson, Henry S. Reed, Henry A. Homeyer, and their successors.

"*Lady Managers.*—Mrs. Mary A. Ranlett, Mrs. Rebecca Webb, Mrs. Evelina C. Dickinson, Mrs. Mary E. Allen, Mrs. Clara C. Partridge, Mrs. Anna E. Filley, Mrs. Susanna Ware, Mrs. Elizabeth W. Clarke, Mrs. Mary L. Woodruff, Mrs. Sophia C. Goodwin, Mrs. Catharine R. Springer, Mrs. Melinda J. How, Mrs. Henrietta E. Cunningham, Mrs. Sophronia Barth, Mrs. J. O. Pierce, Mrs. Mary Gempp, Mrs. Charity Barnard, and Mrs. Sarah R. Avery."

The Soldiers' Orphans' Home thus provided for and organized was opened in the winter of 1865 with sixty orphans, under the care of Mrs. S. A. Plummer as matron, and Miss S. F. McCracken as teacher. In the following spring it was dedicated with appropriate ceremonies, consisting of prayer and addresses, by Rev. W. G. Eliot, D.D., and Rev. H. A. Nelson, D.D., of St. Louis, on which occasion a large company of friends of the institution were present.

In consequence of the invasion of Missouri by the Confederate forces under Gen. Price, there was a great increase in the number of destitute Union refugees in the fall of 1864, who came from all parts of the State to St. Louis. For a while it was necessary to transport them in wagons (on one day fifteen government wagons were thus employed) from St. Louis to Benton Barracks for shelter, but in the winter of 1865 the Lawson Hospital building in the city was procured as a temporary home for them, and retained for their use until the following July.

In the summer of 1864 the Soldiers' Home of St. Louis was removed from No. 29 South Fourth Street to the building formerly known as the Pacific Hotel, on Spruce Street, between Seventh and Eighth Streets.

The whole number of soldiers entertained at this home from its establishment, March 13, 1862, to Dec. 31, 1865, was seventy-one thousand and seventy-seven. The whole number of meals furnished was three hundred thousand nine hundred and seventy-two, and the whole number of lodgings, eighty-five thousand and fifteen.

On the 4th of October, 1864, Rev. Charles Peabody, who had conducted the home from the beginning, having resigned, was succeeded by Rev. William Bradley, whose wife became the matron.

The accommodations at Benton Barracks being unsuited to their purpose, the Western Sanitary Commission addressed a communication to the military authorities on the subject in November, 1864, and the building formerly known as the Lawson Hospital, on Broadway, fitted up for this purpose by the government, being empty, was secured for a refugee and freedmen's home, and made capable of receiving six hundred persons. It was entirely furnished by the commission, and placed under the superintendence of the secretary, Rev. J. G. Forman, who, as a chaplain, was also assigned to the same duties by the department commander.

The Ladies' Union Aid Society and Ladies' Freedmen's Relief Association also gave their co operation in the management of the institution. Mrs. H. M. Weed was appointed matron, and Miss Jones and Miss Catharine Dunning for a time were in charge of the freedmen's department of the home. Miss Richardson was afterwards assistant matron. Miss Samantha Monroe, Miss Peduzzi, and Miss Esther Orton fulfilled the duties of teachers to the white and colored refugee schools in the building; Mrs. Mary A. Whittaker kept the registry of the home, and detached soldiers took charge of the commissary department of the building, and filled the stations of steward, guards, watchmen, etc. The hospital department of the home was in charge of surgeons employed for the purpose by the medical director, and was frequently visited by Surgeon William Carpenter, M.S.V., medical director of the district.

For nearly six months, from Feb. 1, 1865, to July 10, 1865, this institution gave shelter, food, medical care, clothing, and instruction to several thousand refugees, freed people, and their children, commencing with six hundred, continuing so for the greater part of the winter, and gradually diminishing to three hundred by the next July, with hospital treatment to two hundred sick refugees and freedmen at one time. The whole number taken into the home and discharged or furnished with transportation either to the free States or to their homes in the South was not less than three thousand. On the 10th of July, 1865, between two and three hundred remaining, either sick or helpless, were admitted by the city authorities and the county court to the city hospital and the poor farm, and the institution was closed.

In the management of the internal affairs of the home, the furnishing of material for clothing, and the making of it into garments to supply the destitute inmates, most valuable aid was rendered by Mrs. Alfred Clapp, president of the Ladies' Union Aid Society, and a committee of ladies of the same society (of whom Mrs. Joseph Crawshaw specially devoted herself to this work), and by Mrs. Lucien

Eaton, president of the Ladies' Freedmen Association, and Mrs. N. Stevens, and other ladies of this society, who, in conjunction with Mr. Yeatman and Mr. Forman, the superintendent of refugees and freedmen for St. Louis, devised the plan of the institution. A portion of the time the superintendent was assisted in his duties by Lieut. Charles E. Moss, of the Thirty-first Missouri Infantry, and by his clerk, the venerable Henry C. Weatherby, of the Thirtieth Iowa Infantry.

Among the organizations of ladies in St. Louis engaged in ministering to the sick and wounded and to destitute refugees, the Ladies' National League was conspicuous for its energy and zeal. About the time of the battle of Wilson's Creek the Ladies' Union Aid Society was formed, and through efficient management attained an influence for good which was felt not only in St. Louis but in the camps and hospitals throughout the South and West. Its membership, however, did not embrace all the loyal women of St. Louis, and with a view of ascertaining their strength and extending their influence, it was proposed that an organization called the Ladies' National League should be formed. For this purpose a meeting was held in the hall of the Mercantile Library on the 2d of May, 1863. Twelve hundred names were enrolled as friends of the government, pledging their sympathies and labor in behalf of those who were struggling for its defense. At a subsequent meeting officers and managers were chosen, and a star was adopted as a badge of loyalty. Although the league was not originally designed as an active organization, its members were ever ready to aid the cause to which they had pledged themselves. By various means the sum of two thousand and eighty-four dollars and ten cents was raised during the first year, a portion of which was appropriated to the Union Aid, Freedmen's, and Refugees' Societies. When the sanitary fair was inaugurated it was proposed by the Rev. Dr. Eliot that the league should assume its management, but as a society it declined the responsibility, and with the desire that it should be more catholic in its character a new association was formed for the purpose of conducting the work, in which the members of the league labored with untiring zeal.

At the first annual meeting of the Ladies' National League, held on the 1st of July, 1864, the following officers and managers were elected: President, Mrs. T. M. Post; Vice-Presidents, Mrs. George Partridge, Mrs. F. P. Blair, Mrs. R. P. Clark, Mrs. Wyllys King, Mrs. Charles D. Drake, Mrs. Charles W. Stevens; Treasurer, Mrs. R. H. Morton; Secretary, Mrs. A. M. Debenham; Managers, Mrs. A. W. Dean, Mrs. Henry Stagg, Mrs. S. M. Breckenridge, Mrs. F. H. Fletcher, Miss Ellen Filley, Miss Olive Partridge, Mrs. E. Cheever, Mrs. J. Van Norstrand, Mrs. E. M. Weber, Mrs. Adolphus Meier, Miss Belle Holmes, and Miss Ella Drake.

During the winter of 1865, Congress passed the act creating a Refugee and Freedmen's National Bureau. The position of commissioner of this bureau was tendered to Mr. Yeatman by President Lincoln, through the Secretary of War, but declined. Maj.-Gen. O. O. Howard was afterwards appointed, and in answer to his request for information from all associations and individuals who had been in any way engaged in aiding the refugees and freedmen, Mr. Yeatman addressed him a communication, giving many facts of interest to the bureau concerning these people in the valley of the Mississippi.

Among the great labors of the Western Sanitary Commission on behalf of the freedmen was the purchase of suitable property for a Freedmen's Orphans' Home in St. Louis, on Twelfth Street between Cass Avenue and O'Fallon Street, at a cost of seven thousand dollars, and the appropriation of four thousand dollars additional to furnish the home and assist in sustaining it the first year. This purchase was made in June, 1864, and on the breaking up of the Refugee and Freedmen's Home on Broadway the colored orphan children of the institution, numbering twenty-four, were removed to this new institution. In August eighty other colored orphans were brought from Helena by order of Brig.-Gen. Sprague, and received into this home.

The management of the home was placed in the hands of an association of ladies called the Freedmen's Orphans' Home Association, of which Mrs. Alfred Clapp was the first directress. The matron of the home was Mrs. H. M. Weed.

The home had a school in connection with it, in which the teacher, Miss Hess, was sustained by the commission.

Besides this school, the commission during the school year ending in September, 1865, appropriated one hundred dollars per month to aid the colored people of St. Louis to sustain schools for their children. An excellent high school, in the basement of the church on the corner of Locust and Eighth Streets, was taught through the same year by Miss Anna E. Wall and Miss Ida M. Eliot, of New Bedford, the latter a daughter of the Hon. T. D. Eliot, member of Congress from Massachusetts. The school, which was for the advanced scholars among the colored people, numbered from fifty to sixty pupils, and was equal to the same grade of schools in any city of the Union. It was sustained by funds

contributed from friends in Massachusetts, through Rev. Dr. Eliot, of the Western Sanitary Commission.

At the close of the war there were five schools for colored children in the city, taught by colored teachers, and supported by tuition fees. These schools contained about four hundred pupils. Although the colored people were taxed for the support of the public schools of St. Louis, there had been up to that time no provision made for the education of their children.

Soon after the death of President Lincoln, a remarkable and spontaneous movement commenced with a colored woman, named Charlotte Scott, at Marietta, Ohio, and was taken up by the colored soldiers, to erect a monument at Washington to the memory of Abraham Lincoln, to be called "The Freedmen's National Monument." The contributions for this object were placed in the hands of the Western Sanitary Commission at St. Louis.

On the 1st of January, 1873, the whole amount received and in the hands of the treasurer of the commission, C. S. Greeley, was nineteen thousand six hundred and thirty-four dollars and thirty-four cents.

After the war closed the Soldiers' Orphans' Home, at Webster, reverted to the Western Sanitary Commission, owing to the resignation of the first board of trustees and board of lady managers, and in consequence of an act of the Legislature. A new board of trustees was then created, consisting of the members of the commission with the addition of two other gentlemen, and was as follows: James E. Yeatman, C. S. Greeley, J. B. Johnson, M.D., George Partridge, William G. Eliot, D.D., E. W. Fox, and T. B. Edgar. On the organization of this board James E. Yeatman was elected president, and T. B. Edgar secretary and treasurer.

After this organization was effected the commission appropriated $25,000 for the future maintenance of the home, which, added to the $5000 a year for ten years ($50,000) appropriated by the State Legislature, and to the $20,000 subscribed by individuals as an endowment, and placed at interest, secured the future usefulness of the institution for the destitute orphans of deceased soldiers. The new buildings were completed in April, 1865, and were occupied on the 1st of May, 1865, making the entire accommodations of the home sufficient for one hundred and sixty orphans.

The Soldiers' Home of St. Louis was continued during the winter of 1866, but was closed on the 1st of May. Arrangements were made to continue the care beyond that date of some twenty-five disabled indigent, discharged soldiers, for whom the military authorities set apart quarters at Jefferson Barracks, at the request of the commission; leaving it, however, to meet the other expenses of their support until the general government made further provision for such cases.

The commission also employed Mrs. S. A. Plummer and Miss N. A. Shepard as relief visitors to the families of invalid and disabled soldiers, through whom it continued to extend relief to this class of sufferers by the war. The labors of these noble women proved very useful in this work, and they carried not only physical aid, but often spiritual comfort (of an unsectarian kind) to many sad homes.

Such were some of the ways in which this noble, self-sacrificing, and patriotic commission expended the balance of funds left on hand after the close of the war.

The whole amount of cash received by the commission for sanitary purposes during the war was $770,998.55, and the estimated value of sanitary stores received was $3,500,000, making a total of $4,270,998.55 contributed to this commission from private benevolence for sanitary and humane objects, and, except the balance on hand, reserved for the completion of its humane work, distributed by this commission as stated above.

Much of the success with which the labors of the commission were crowned was due to the fidelity and skill with which its finances were managed by the treasurer, Carlos S. Greeley, who also devoted a large share of his time and labor to assisting the general work of the organization. Mr. Greeley, as we have seen, was one of the original members of the Commission, and served as its treasurer from the date of its appointment by Gen. Fremont, in September, 1861, until it disbanded in 1866.

Of the heavy, harassing, and exhausting work which devolved upon this body Mr. Greeley cheerfully performed his share, as a duty from which a loyal citizen with time and means could not shrink; and he feels a just pride at having had the inestimable privilege of laboring with such noble and self-sacrificing men in such a cause, and of having his name associated with theirs on the page of history. As treasurer there passed through his hands seven hundred and seventy-one thousand dollars; and of this amount five hundred and fifty-four thousand five hundred and ninety-one dollars was turned over to him at one time, being the net receipts of the Mississippi Valley Sanitary Fair in May, 1864; and such was the confidence reposed in Carlos S. Greeley that nobody thought of asking a bond of him. In its final report the commission, while averse to speaking of the indi-

vidual labors of its own members, could not forbear remarking that "its funds have been kept, and its finances managed with great care, faithfulness, and good judgment by its treasurer, Carlos S. Greeley, Esq."

After the war Mr. Greeley was one of the trustees of the Soldiers' Orphans' Home at Webster, and of several similar institutions established by the commission. He is yet prominently interested in several benevolent enterprises founded by funds appropriated by the Sanitary Commission, or assisted by moneys which the commission had on hand when it ceased its labors as a *sanitary* commission. For years, in common with his colleagues on the commission, Mr. Greeley left his business and gave his whole time to the work in hand, serving, as they all did, without compensation other than the consciousness of having faithfully tried to serve his country in a tremendous crisis.

Carlos S. Greeley also enjoys the distinction of being at the present time at the head of one of the largest wholesale grocery houses in the United States, and his long and highly successful career presents many points of interest. He was born at Salisbury, N. H., of a family descended from the English pioneers, and his ancestors on both sides were well-known and influential people of that region. His uncle, Moses Greeley, was prominent as a politician, and was a man of influence, while his mother's family were noted for their enterprising and energetic qualities.

His father, Benjamin Greeley, was a farmer, and the boy's life was that of a farmer's son of that period,—working on the farm in the summer and attending school in the winter. He received, however, an academic education at Salisbury in addition to that afforded by the common country school.

In the spring of 1832, when twenty years old, he started for the West, having become satisfied that no money was to be made at farming in New Hampshire, and that, as the saying went, "New Hampshire was a good State to emigrate from." Besides, his tastes inclined to mercantile life; he had a Yankee boy's passion for "swapping," and when he left home all the money he possessed (less than one hundred dollars) had been made by trading steers and other stock that had come into his possession.

He began his business career at Brockport, N. Y., as clerk in the retail grocery-store of Pettingill & Sanborn. Mr. Pettingill is now a prominent resident of Peoria, Ill.; Mr. Sanborn will appear again later in this sketch. One peculiarity of this establishment was that it would sell no liquor,—an unusual course in those days when the use of liquor was much more common in that section than at present, and when the legitimacy of its sale was questioned by very few. Young Greeley remained in this capacity for two years, and then an opportunity occurring of buying out Pettingill's interest,—a quarter-share in the business,—he borrowed the money from his father and made the purchase.

This connection proved a prosperous one and lasted until 1836, when Sanborn sold out and removed to St. Louis. Greeley remained behind at Brockport for a few years to close up the business, and then in the fall of 1837 he was induced by Sanborn to follow him to St. Louis. During the winter he visited his father, who had removed to Tazewell County, Illinois; and in March, 1838, having returned to St. Louis and spent some time in looking over the situation, he commenced the wholesale grocery business with Mr. Sanborn. Soon after, Mr. Gale, an old acquaintance from Salisbury, N. H., came on and bought Mr. Sanborn's interest, and Greeley & Gale continued the business. Mr. Sanborn engaged in speculation, became a well-known stock dealer, and died some years later, greatly respected.

Greeley & Sanborn began business on the Levee on a very moderate scale, Mr. Greeley's contribution to the business being less than five thousand dollars. They repeated the Brockport experiment of selling no liquor, a conclusion they reached from a firm belief that the use of liquor was destructive of health and morals, and its sale was therefore wrong. Their convictions were laughed at by their rivals, and abundant predictions of their failure were made; nevertheless, although the only house in this city that did not sell liquor, their business prospered beyond precedent, and by close attention, economy, and perseverance they made money every year, and soon occupied a very commanding position.

The partnership of Greeley & Gale lasted until about 1858, when C. B. Burnham (now president of the Bank of Commerce) was given an interest in the firm, and the house continued under the name of C. B. Burnham & Co. until 1876, conducting the same business and on the same temperance principles as before mentioned. In 1876 the title was changed to Greeley, Burnham & Co., and in 1879 the firm was incorporated as the Greeley-Burnham Grocer Company, with C. S. Greeley, president; C. B. Burnham, vice-president; Dwight Tredway, secretary; C. B. Greeley, treasurer; A. H. Gale, assistant secretary; and this is the existing organization.

Although the house has passed through several panics and through a period of social and political agitation unmatched in history, its career has been

was that it would sell no liquor,—an unusual co
in those days when the use of liquor was much more agitation unmatched in history, as

one of uninterrupted and remarkable prosperity. The only incident of an unfortunate character was the destruction of its store by fire in February, 1881, entailing a heavy loss, but not in the slightest degree affecting the soundness of the establishment. Mr. Greeley immediately rebuilt the store at a cost of seventy-five thousand dollars for building and ground, and now boasts of occupying not only the largest wholesale grocery establishment in the United States, but probably the most perfectly equipped and conveniently arranged of any in the world. The building, which is situated at the corner of Christy Avenue and Second Street, is a five-story brick structure seventy-three and a half by one hundred and fifty feet in area, with a deep cellar, and has a floor-room of over six acres. The foundations were laid with proper regard to solidity, stability, and the storage of the heaviest stocks, while the arrangements are designed to allow of the receipt, handling, and shipment of goods in the most economical and the speediest manner. Two large engines supply power to two elevators that are constantly employed in shifting goods where occasion may demand. In the arrangement of wardrobe, lunch-rooms, etc., a proper and philanthropic thoughtfulness for the comfort of the employés has been observed.

An idea of the magnitude of the business of the firm may be obtained from the fact that the house continually carries from two hundred and seventy-five thousand to three hundred and twenty-five thousand dollars in stock. The financial standing of the establishment is not excelled by that of any house in the country, and it is as well known in foreign markets almost as in St. Louis as one of irreproachable honor and unimpeachable strength. This grand result has been accomplished by close attention to business on the part of Mr. Greeley and his able associates and the management of its affairs in the most economical manner. Speculation has been avoided; there has been no gambling in "futures" or anything of that sort; no partner has ever lived beyond his means. In short, there has been only a steady and faithful application of the ordinary and honest principles of business by men who believe that "honesty is the best policy," but who practice honesty for its own sake, and not merely because it is the best policy.

Mr. Greeley is a public-spirited citizen, and has been engaged in many important public enterprises. He was a prominent subscriber to the Kansas Pacific Railway, and in 1878 sold to Jay Gould the controlling interest that made him owner thereof. As is well known, this road extends from Kansas City to Denver. Mr. Greeley's connection with it lasted from 1865 to 1878, and for much of the time he was treasurer of the company and had charge of its financial affairs. In this capacity he was largely instrumental in lifting it out of its pecuniary embarrassments and finishing it and putting it in successful operation. His connection with the line involved the building of several important "feeders" to develop the western country. Mr. Greeley also assisted in building the railroad from Sedalia to Warsaw, and for some years retained a considerable interest therein. He is now a director and largely interested in the St. Louis and Illinois Railroad and Coal Company, and more recently has purchased an interest in the Madison County Ferry Company. He is now president of the Washington Land and Mining Company, and president of the Union Mining and Smelting Company, the two representing thirteen thousand acres of mineral and agricultural lands in Washington County, Mo. He is also largely interested in banks and bank stocks; is the largest stockholder but one in the Bank of Commerce; is president of the Provident Savings Institution, a director in the Boatmen's Savings-Bank, and a trustee in the State Savings Association. He is also a director in the Belcher Sugar Refinery Company, the St. Louis Cotton-Factory, and the Crystal City Plate-Glass Company, and is president of the National Land Company of Kansas, a concern that originally held two hundred thousand acres of land, and which yet has fifty thousand acres unsold. In addition to these he is a director in many other companies, among which may be mentioned the State Mutual Insurance Company, the Mutual Insurance Company, the St. Louis Gold-Mining Company of Colorado, and the Greeley Mining Company of Colorado. These business associations, so varied and embracing so many important interests, indicate that he is a man not only of unusual activity, but one thoroughly awake to whatever has seemed likely to conduce to the prosperity and advancement of St. Louis. For nine years he was a member of the board of education, being president the last year; and for many years he has been a director of Washington University, St. Mary's Institute, etc.

Mr. Greeley has been for many years a member of the Second Presbyterian Church, and is chairman of its board of trustees. He is also a trustee in the Drury College, at Springfield, Mo., and the Lindenwood Seminary, at St. Charles, Mo.

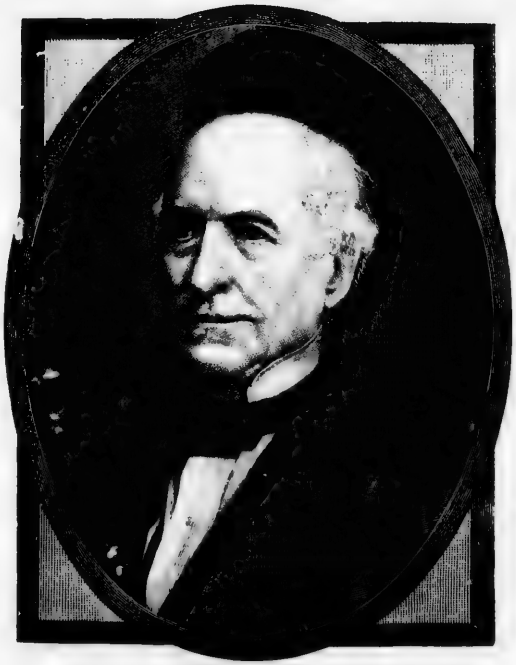
In 1841 he married Miss Robbins, of Hartford, Conn. Two children resulted from this union,—C. B. Greeley, who is a member of the firm, and a daughter, who married Dwight Tredway, the secretary and managing partner of the Greeley-Burnham Grocer Company.

Mr. Greeley is a gentleman of quiet and unassuming manners, and his career is an illustration of the fact that quiet and persistent work, honestly and faithfully applied, is sure of its reward.

In self-sacrificing devotion to duty James E. Yeatman, C. S. Greeley, J. B. Johnson, George Partridge, and William G. Eliot, the members of the Western Sanitary Commission, were not in the least behind the bravest heroes on the battle-field. With hearts full of sympathy for their fellow-man, they answered every call for aid and assistance, and never hesitated to sacrifice themselves when they could alleviate suffering or minister to the comfort of others.

James E. Yeatman, whose distinguished services as president of the Sanitary Commission have been narrated, was born in Bedford County, Tenn., Aug. 27, 1818. His father was a merchant, manufacturer, and banker in Nashville, and the son, who was reared amid the surroundings of affluence, enjoyed the advantages of a liberal education. His studies were shaped with a view to engaging in commercial life, and immediately after leaving school he began his business career in the manufacture of iron at Cumberland, Tenn., and in 1842 removed to St. Louis and opened an iron house as a branch of the Nashville establishment.

From 1850 to 1861 he engaged successfully in the commission business, and in 1850 assisted in organizing the Merchants' Bank (now the Merchants' National Bank), of which he was one of the first directors. In 1861 he devoted himself exclusively to the bank, and for many years has been its president.



Meanwhile other public enterprises had engaged his attention. He served as member of a commission appointed to obtain from the Legislature the passage of an act authorizing the city to subscribe five hundred thousand dollars to the Ohio and Mississippi Railroad, was one of the incorporators of Bellefontaine Cemetery, assisted in the establishment of Washington University, and for many years has been a trustee of that institution, and was the first president of the Mercantile Library. He has also been active and prominent in promoting various public charities, among them the Blind Asylum, much of whose usefulness (if not its very existence) is due to him. He was the first president of that institution, which for nearly thirty years has been the object of his watchful solicitude and care, and to hundreds of its hapless wards he has proved a kind and bountiful protector.

Throughout the trying period preceding and during the civil war, Mr. Yeatman was a strenuous supporter of the Union, but labored earnestly for peace and reconciliation. His mother's second husband was John Bell, of Tennessee, the candidate for President of the United States on the Union ticket in 1860, and Mr Yeatman belonged to the Union school in politics. When war could no longer be avoided he strove to avert its horrors from Missouri, and was deputed by some of the most loyal and honored citizens of St. Louis to accompany Hon. H. R. Gamble to Washington to lay the situation in Missouri before President Lincoln. Gen. Harney was then in command of the Department of the West, and his policy was the subject of much contention before the President. Messrs. Yeatman and Gamble were firmly persuaded that it was the only one that would lead to a peaceful solution of the problem, but they failed to impress Mr. Lincoln with this view, and Gen. Harney was soon removed, and the vigorous counsels of Francis P. Blair's party adopted by the government. Mr. Gamble subsequently, as Provisional Governor, served the State and the country through a period of unexampled difficulty with great ability, while Mr. Yeatman performed the most arduous and self-sacrificing labor in connection with the Western Sanitary Commission, which was called into existence by Gen. Fremont in September, 1861, in order to mitigate the horrors of the war then actually in progress in Missouri, as well as in the more Southern States. As previously stated, Mr Yeatman was president of the commission, and is universally conceded to have been its guiding spirit throughout the war. Indeed, from the very moment of his acceptance of this delicate and sacred trust he put business and home and friends behind him and consecrated himself, in the true sacrificial spirit, entirely to the noble work of relieving distress and misery. His task was dual in its character, for he was called upon to systematize the impulsive, disorderly, and uninformed sympathies and efforts of the loyal people of the West, and then to make effective with the least waste of time, labor, and money the agencies employed for the relief and care of sick and wounded soldiers. In this great emergency Mr. Yeatman exhibited a capacity and aptitude for organization on a large scale scarcely equaled and certainly never excelled in the history of the country. His duties led him all over the war stricken regions of the Southwest, wherever men were suffering or were likely to suffer and to need relief. Like Howard, he must look with his own eyes on the misery he was charged to relieve, and it has been well said that "the hostile armies were filled with a new feeling—that of tenderness—as they beheld his unselfish efforts."

this connection is identical with the history of the commission itself. In the West the work of the Sanitary Commission assumed an eminently practical character. The commission established hospital steamers, founded soldiers' homes and homes for their children, and took the earliest steps to relieve the freedmen, whom they promptly recognized as the "wards of the nation." They sent them teachers, nurses, and physicians, and the labors of the commission in connection with the freedmen during 1864–65 were quite as arduous to Mr. Yeatman and his associates as were those during some of the periods in which the great battles of the war had been fought. The Freedmen's Bureau was organized on the plan devised by Mr. Yeatman, who, once a holder of slaves, now became a benefactor of the negro race. His report to the Western Sanitary Commission favoring the leasing of abandoned plantations to freedmen was declared by the *North American Review* (April, 1864) to contain in a single page "the final and absolute solution of the cotton and negro questions." Mr. Yeatman's report was so favorably received that he was sent to Washington to lay his views before the government. The President was greatly impressed, and urged him to accompany a government officer to Vicksburg to put them into effect. This Mr. Yeatman did, although he declined an official appointment in that connection. When the Freedmen's Bureau was instituted President Lincoln offered him the commissionership, but he declined, disliking, possibly, the semi-military features of the establishment. Its main features, however, he heartily approved.

The Sanitary Commission disbursed seven hundred and seventy-one thousand dollars, and distributed over three and a half million dollars worth of goods. It was brought into very close relations with the military authorities, yet its affairs were managed so discreetly that all the generals in the field—Grant, Sherman, Fremont, Halleck, Curtis, Schofield, and Rosecrans—were on the most friendly and confidential terms with its agents, and did their utmost, by means of military orders and the exercise of their personal influence, to advance their humane work. When it is considered that the history of war afforded no precedent for sanitary work among the soldiers on so large a scale, the magnitude of the labor of the commission and the splendor of its success are the more conspicuous.

When the war closed, Mr. Yeatman returned to his business and his charities. There is hardly an institution in the city that has not been blessed by his benefactions, which have always been bestowed in a truly catholic spirit, yet guided by a discriminating and business-like judgment that never squanders. Among the more recent objects of his benevolent interest is the "Memorial Home" for aged and infirm people, lately established in St. Louis. But the good which he has performed will never be fully known, as much of it has been done in so quiet and unostentatious a manner as not to be apparent to the outside world. His long and stainless life is illuminated with an active benevolence that is unmatched in the history of St. Louis, and his charities throw a golden lustre on the city of his adoption.

The Mississippi Valley Sanitary Fair.—The great success attending the sanitary fairs which had been held in several of the large cities of the country suggested a similar enterprise in the city of St. Louis, with the view of replenishing the funds of the Western Sanitary Commission, and of the kindred and co-operative associations, so that they might prosecute their noble and philanthropic labors during the continuance of the war. The great fairs held in the large Eastern cities and in Chicago in aid of the United States Sanitary Commission had contributed nothing to the funds of the Western Commission. Illinois, Indiana, and Ohio, neighboring States, transmitted their great and generous contributions chiefly through that channel and their own agencies, while the reports of the Western Sanitary Commission show that the regiments of those States were the constant care of the Commission, both in the field and in its soldiers' homes at St. Louis, Columbus, Ky., Memphis, Tenn., Helena, Ark., Vicksburg, Miss., and Duvall's Bluff, in Arkansas.[1]

With large and increasing demands upon its treasury and supplies, the resources of the commission had begun to fail, and on the 1st of February, 1864, a large preliminary meeting of "the loyal men and women of St. Louis" was held at Mercantile Library Hall for the purpose of effecting an organization for holding a grand Mississippi Valley Sanitary Fair in St. Louis. George Partridge called the meeting to order, and on his motion Chauncey I. Filley, mayor

[1] The extent of the benefit conferred on the Union soldiers by the soldiers' homes sustained and conducted by the Western Sanitary Commission may be appreciated by noting how many soldiers shared their hospitality during the war. Adding the statistics together from their official reports, we find that these homes entertained four hundred and twenty-one thousand six hundred and sixteen soldiers, furnished nine hundred and eighty-two thousand five hundred and ninety-two meals and four hundred and ten thousand two hundred and fifty-two lodgings without charge. The home at St. Louis continued after the war, and entertained an average of two thousand guests per month, being as useful and necessary as at any former period.

of the city, was unanimously chosen to preside. On motion of C. S. Greeley, Samuel Copp, Jr., was appointed secretary. Rev. J. J. Porter opened the proceedings with prayer, and Rev. Dr. William G. Eliot, at the request of the chairman, explained the objects of the meeting. On motion of Edward Wyman, a committee on organization was appointed, which soon after made a report, which was adopted. The purpose in holding the fair was to raise a sufficient fund for the sanitary uses of the armies of the Mississippi valley, and for the relief of the sick and wounded under the general direction of the Western Sanitary Commission, whose headquarters were in St. Louis. Speeches were made by the mayor, and by Rev. William G. Eliot, D.D., Brig.-Gen. C. B. Fisk, Maj.-Gen. W. S. Rosecrans, Maj. McKee Dunn, and Professor Amasa McCoy. A letter was read from Gen. Grant, in which he said,—

"The gratuitous offerings of our loyal citizens at home to our brave soldiers in the field, through the agency of sanitary commissions, have been to them the most encouraging and gratifying evidence that whilst they are risking life and health for the suppression of this most wicked rebellion, friends, who cannot assist with musket and sword, are with them in sympathy and heart.

"The Western Sanitary Commission has distributed tons of stores (amounting to thousands) to the armies under my command. Its voluntary offerings have made glad the hearts of many thousands of wounded and sick soldiers, who otherwise would have been subjected to severe privations. Knowing the benefits already conferred on the army by the Western Sanitary Commission, I hope for a full and enthusiastic meeting to-morrow night, and a 'fair' to follow which will bring together many old friends who have been kept apart for the last three years and unite them again in one common cause,—that of their country and peace."

The following officers and committees were then elected to organize and conduct this great enterprise:

Maj.-Gen. W. S. Rosecrans, president; Governor Willard P. Hall, first vice-president; Mayor Chauncey I. Filley, second vice-president; Brig.-Gen. Clinton B. Fisk, third vice-president (afterwards Mayor James S. Thomas was made fourth vice-president, and Brig.-Gen. J. W. Davidson fifth vice-president); Samuel Copp, Jr., treasurer; Maj. Alfred Mackay, corresponding secretary.

Honorary Members.—His Excellency Abraham Lincoln, President of the United States; Hon. Hannibal Hamlin, Vice-President of the United States; the Governors of the several loyal States; Maj.-Gen. U. S. Grant, commanding, etc.

Standing Committee (members of the Western Sanitary Commission).—James E. Yeatman, William G. Eliot, George Partridge, Carlos S. Greeley, John B. Johnson.

Executive Committee of Gentlemen.—James F. Yeatman (chairman), J. H. Lightner, E. W. Fox, Samuel Copp, Jr., George D. Hall, S. R. Filley, Charles B. Hubbell, Jr., James Blackman, William D'Oench, William Patrick, J. O. Pierce, Gustavus W. Dreyer, H. C. Homeyer, B. R. Bonner, Adolphus Meier, Charles Speck, William Mitchell, William Adriance, George E. Leighton, M. L. Linton, William H. Benton, Dwight Durkee, Amadee Valle, Wyllys King, George P. Plant, Morris Collins, J. C. Cabot, N. C. Chapman, John D. Perry, S. H. Laflin, James Ward.

Executive Committee of Ladies.—Mrs. Chauncey I. Filley (president), Mrs. Anna M. Debenham (recording secretary), Mrs. Gen. V. P. Van Antwerp (corresponding secretary), Mrs. Phebe W. Couzins (corresponding secretary), Mrs. Robert Anderson, Mrs. George Partridge, Mrs. J. E. D. Couzins, Mrs. E. M. Weber, Mrs. Truman Woodruff, Mrs. Clinton B. Fisk, Mrs. F. A. Dick, Mrs. Alfred Clapp, Mrs. Dr. E. Hale, Mrs. A. S. W. Goodwin, Mrs. H. T. Blow, Mrs. Amelia Reihl, Mrs. N. C. Chapman, Mrs. Washington King, Mrs. S. A. Ranlett, Mrs. T. B. Edgar, Mrs. C. S. Greeley, Mrs. W. T. Hazard, Mrs. Charles D. Drake, Mrs. Dr. Haeusler, Mrs. Samuel C. Davis, Mrs. McKee Dunn, Mrs. B Gratz Brown, Mrs. William McKee, Mrs. Gen. William S. Rosecrans, Mrs. Dr. O'Reilly, Mrs. S. B. Kellogg, Mrs. S. A. Collier, Mrs. W. A. Doan, Mrs. Isaac Rosenfeld, Mrs. Samuel Copp, Jr., Mrs. F. P. Blair, Mrs. Elizabeth W. Clark, Mrs. H. Dreyer, Mrs. Ulrich Busch, Mrs. John Wolff, Mrs. Waltenburg, Mrs. John J. Hoppe, Mrs. Adolphus Abells, Mrs. C. Piper, Mrs. R. H. Morton, Mrs. William D'Oench, Mrs. J. C. Rust, Mrs. Adolphus Meier, Mrs. Bernard Poepping, Mrs. John C. Vogel, Mrs. R. Barth, Mrs. H. C. Gempp, Mrs. O. D. Filley, Mrs. Henry Stagg, Mrs. E. W. Fox, Mrs. Charles Eggers, Mrs. A. S. Dean, Mrs. Rombauer.

Various subordinate committees were afterwards appointed, representing all the trades and branches of business in St. Louis, and a committee was appointed to conduct a department in the fair for the benefit of freedmen and Union refugees, so that contributions might be made for this charity by itself, and kept separate from the general sanitary work of the army.

Appeals were immediately sent out to the people of the Mississippi valley and to the whole country; the newspaper press of St. Louis lent its columns with great generosity to the promotion of the enterprise and published largely in its interests, and friendly papers abroad gave it all the publicity that could be desired.

The merchants and private citizens, the noble men and women of St. Louis, took hold of the enterprise with generous zeal, and determined to make it a decided success. Sympathizing friends in Boston, New Bedford, Providence, Salem, Worcester, New York, Brooklyn, Philadelphia, and many smaller cities and towns made handsome donations, and some of them sent representatives to aid in the work. Many valuable trophies of the war and donations in money were received from the army. Fifteen gold and silver bars, amounting to over forty-five thousand dollars, were received from Nevada Territory, and several shipments of goods were sent also from England and Germany by generous sympathizers in the cause. Besides these contributions in goods, two hundred thousand dollars in money was given towards the object, of which much the largest portion came from the citizens of St. Louis, a city that probably suffered more from the war than any other city of the Union.

While these labors were being performed, a splendid building was erected on Twelfth Street, from Olive Street to St. Charles Street, five hundred feet long and one hundred and fourteen feet wide, with wings on Locust Street one hundred feet each in length beyond the main building and fifty-four feet wide, with an octagon centre seventy-five feet in diameter and fifty feet high. The whole was arranged, decorated, divided into apartments, and filled with contributions from art and nature of the most valuable kinds.

On the 17th of May, 1864, this immense building, filled with its splendid contributions of merchandise, art, and manufactures, ornamented with flags, trophies, mottoes arbors of evergreens and flowers, and superintended by fair ladies and noble men, was opened to the public with appropriate ceremonies, on which occasion speeches were made by Gen. Rosecrans, Governor Hall, and Gen. Fisk. The attendance was very large from the start, and for three weeks the influx of people from St. Louis and the neighboring country, and from the towns and cities of the adjoining States, continued in a steady stream.

The building in all its departments—its refreshment saloons, its gallery of fine arts, its counters for the sale of merchandise, its floral park, its room for the exhibition of trophies of the war, and its display of agricultural implements, of sewing-machines, of works of art, and of the gold and silver bars from Nevada—was filled with multitudes, who passed along the various walks and avenues, purchasing and admiring what they saw, from morning till evening, up to the close of the fair in the early part of June.

No written description can begin to do justice to the grand exhibition, but it will long be remembered by those who participated in its labors, and by the hundreds of thousands of visitors who gave their presence, their sympathy, and their money to aid the noble object for which the fair was held. Among these were many of the leading merchants and bankers of St. Louis, who were the main strength and support of the undertaking; the commanding general of the department and other officers of the army, stationed at St. Louis, or co-operating from their distant posts; the members of the Western Sanitary Commission; the Union ladies of St. Louis, including the members of the Ladies' Union Aid Society, the Freedmen's Aid Association, the Ladies' Loyal League, and the teachers and pupils of the universities, the colleges, the female academies, and the public schools of the city, all of whom, in their several spheres, contributed to the grand results of the fair.

The net receipts from the fair amounted to five hundred and fifty-four thousand five hundred and ninety-one dollars, being, it is believed, greater than those of any sanitary fair that has ever been held in the United States.[1]

St. Louis had occasion to be proud of this result, and Mr. Yeatman, chairman of the executive committee, in his official report of the fair said,—

"The city of St. Louis, situated comparatively upon the frontier of loyalty, has raised about three dollars and fifty cents for each inhabitant, while the cities of New York and Philadelphia, at their fairs, raised about one dollar and sixty-seven cents for each inhabitant."

The generous support extended by the Union citizens of St. Louis to the armies of the Union during the civil war, their sympathy and aid in sanitary and religious work for the sick and wounded soldiers, and the relief afforded by them to the freedmen and homeless Union refugees, are without a parallel in history. Besides the liberal contributions from the people of St. Louis to the Mississippi Valley Sanitary Fair, the Western Sanitary Commission was the recipient of hundreds of thousands of dollars in money and sanitary goods from the same patriotic sources contributed from time to time during the whole progress of the war.

[1] The *Republican* of July 6th contained the following:

"*A Letter from Gen. Hancock.*—We publish below a letter, kindly furnished us by Mr. Yeatman, received last Saturday from Maj.-Gen. Hancock, acknowledging the receipt of the magnificent jeweled sword voted by his former fellow-citizens at the sanitary fair: . . .

"'HEADQUARTERS SECOND ARMY CORPS,
"'June 27, 1864.

"'DEAR SIR,—Your favor of the 18th instant, informing me that the handsome sword donated to the Mississippi Valley Sanitary Fair has been awarded me, has been received. Such a mark of consideration from the citizens of St. Louis is truly gratifying, and having married in that city and resided there for many years, I regard it as a home. Only the soldiers can fully appreciate the benefit of your noble efforts in behalf of the Sanitary Commission, and the effects of its kind offices in the amelioration of our wants and suffering are felt with grateful remembrance throughout every part of our vast army.

"'I am sir, very respectfully
"'Your obedient servant,
"'W. S. HANCOCK, *Maj.-Gen. U.S.A.*'

"'TO JAMES E. YEATMAN, ESQ., *Chairman of the Executive Committee, Western Sanitary Commission, St. Louis, Mo.*'"

CHAPTER XVII.

POLITICAL PROGRESS.[1]

Upon the cession of Louisiana to the United States, Capt. Amos Stoddard succeeded the Spanish commandant at St. Louis, and in 1804, by act of Congress, March 26th, the Territory was divided into the Territory of Orleans (afterwards the State of Louisiana) and the District of Louisiana (known as Upper Louisiana), which became the Territory of Missouri. The same act provided that the Territorial government of Indiana should be extended to the District of Louisiana (Missouri), and the Governors and judges of Indiana were empowered to frame laws for the new district. Gen. William Henry Harrison was then Governor of Indiana, and associated with him were Judges Griffin, Davis, and Vanderberg. On the 3d of March, 1805, Congress passed an act transforming the district into the Territory of Louisiana, and Gen. James Wilkinson was appointed Governor, with Joseph Browne as secretary. The legislative power was vested in the Governor and the three Territorial judges, J. B. C. Lucas, John Coburn, and Rufus Easton.[2]

The first Legislature of the Territory, composed of the Governor and judges, assembled on the 11th of June, 1806, and continued to exercise its functions until the 9th of October, 1811, when it adjourned *sine die*.[3]

At the time of final adjournment the members were Frederick Bates, Secretary of the Territory and acting Governor, and John Coburn and Otto Strader, judges. Judge Lucas, however, was still in office.

Frederick Bates, who had been appointed Secretary of the Territory May 7, 1807, was born in Belmont, Goochland Co., Va., of Quaker parents, June 23, 1777. He did not possess facilities for obtaining a liberal education, but, like many others of his time, educated himself in the pursuit of the practical affairs of life by the exercise of his acute powers of observation. He thus developed the character which distinguished him through life, that of a clear-headed, energetic man fully competent to grapple with the difficulties which he encountered, and to give direction to the circumstances by which he was surrounded.

He was one of a family of seven brothers, four of whom, including himself, passed several years in the offices of the clerks of the Circuit Court in their native State.

At the age of twenty he went to Detroit, where he engaged in mercantile pursuits, and he was for a time postmaster at that place. Frequent intercourse with the French-Canadians enabled him to become to some extent acquainted with the French language. The knowledge thus acquired was improved by subsequent study, and proved of great advantage to him during his residence in Missouri. In 1805 he was appointed by President Jefferson the first United States judge for the Territory of Michigan.

In 1806 he removed from Detroit to St. Louis. From the time of his arrival in Missouri until its admission as a State he was in some capacity a Territorial officer, and during many years was Secretary of the Territory, and, as we have seen, was acting Governor part of his term. He also occupied several judicial and legislative positions, and in 1808 compiled the "Laws of the Territory of Louisiana," printed by Joseph Charless, the first book printed in St. Louis.

In 1824 he was elected Governor of the State of Missouri, to succeed Alexander McNair, the first incumbent of the office. On the 4th of August, 1825, he died, having administered the government only about a year. He was an earnest admirer of Thomas Jefferson, and held offices in the Territory under Presidents Jefferson and Madison. It is worthy of remark that he was elected Governor without solicitation or effort on his part.

He was married, March 4, 1819, to Nancy Ball, daughter of Col. John S. Ball, of St. Louis County, and took up his residence in Bonhomme township. They had four children, of whom the eldest, Mrs. Emily Walton, of St. Charles, and the second, Lucius Bates, survive. The latter lives on the old homestead where he was born.

[1] The history of the Territorial government has been fully narrated in a preceding chapter of this work, but in order to a clear understanding of the political development of St. Louis and Missouri the principal facts are recapitulated here.

[2] The commissioners to examine land titles were J. B. C. Lucas, Clement B. Penrose, and James L. Donaldson. In 1807, Frederick Bates was substituted in place of Donaldson.

[3] This Legislature was called to assemble on the 3d of June, but, as stated, did not meet until the 11th. The records of Edward Hempstead, clerk of the Legislature, show that James Wilkinson, Governor, Return J. Meigs, and John B. C. Lucas composed that body, Rufus Easton, one of the judges, not being present. One of the earliest entries on the records is a spicy correspondence between the Governor and Judge Lucas as to the proper manner of calling the Legislature together. After many delays and adjournments, the Legislature met on the 25th of June, and proceeded to the election of a clerk. Robert Wescott, Andrew Steel, and Edward Hempstead were placed in nomination, but there was no election until the 28th, when Mr. Hempstead was chosen. In the record of the proceedings, on the 26th of June, it is stated that a law respecting the District of Arkansas, which was then a portion of the Territory, had been discussed and agreed to and ordered to be engrossed, and that the Legislature had under consideration a law to prevent the discharging of fire-arms in the town of St. Louis.

Of the other members of the Territorial Legislature, Hon. Otto Strader had succeeded Judge Meigs. In 1807, Capt. Meriwether Lewis was appointed Governor of the Territory by President Jefferson. In June, 1808, the Legislature was composed of Hon. Meriwether Lewis, Governor, and John B. C. Lucas and Otto Strader, judges. Upon the death of Governor Lewis, in 1809, President Madison appointed Benjamin Howard Governor of Louisiana Territory. His first legislative act was dated Oct. 25, 1810. In 1813 he resigned the Governorship to accept the position of brigadier-general of Rangers, in which he served with great credit, and died in St. Louis, Sept. 18, 1814.

By an act of Congress, June 4, 1812, the Territory of Missouri was created, and on the 1st of October, 1812, Governor Howard issued a proclamation[1] dividing the Territory (which had previously been divided into districts) into five counties, and ordering an election for representatives to the Territorial Assem-

[1] The text of the Governor's proclamation is as follows:

"*By Benjamin Howard, Governor of the Territory of Louisiana, commander-in-chief of the militia thereof, and superintendent of Indian affairs in and over the same,*

"A PROCLAMATION.

"In discharge of those duties enjoined on the Governor of this Territory by an act of the Congress of the United States of America, approved the 4th of June, 1812, entitled 'An Act providing for the government of the Territory of Missouri,' I have made the following arrangements preparatory to the new organization of government to be instituted by the said act, and which will commence its operation on the first Monday of December next: that is to say,

"I have divided the future Territory of Missouri into five counties, excluding from the civil jurisdiction of each of said counties any tract or tracts of country which may fall within the respective general limits, as hereinafter set forth, the Indian title to which may not have been extinguished.

"The portion of territory situated north of the Missouri River, and usually known by the name of the Forks, as lying between that river and the river Mississippi, shall compose one county, and shall be called the county of St. Charles.

"That portion of territory bounded by the Missouri River on the north, by the Mississippi on the east, on the south by the Plain Creek from its mouth to its source, thence by a west line to the Missouri River, or to the western boundary of the Osage purchase, and on the west by the said western boundary of the Osage purchase shall compose one other county, and be called the county of St. Louis.

"That portion of territory bounded by the county of St. Louis on the north, on the east by the Mississippi, on the south by Apple Creek from its mouth to its source, thence by a due west line to the western boundary of the Osage purchase, and on the west by the said western boundary of the Osage purchase shall compose one other county, and be called the county of Ste. Genevieve.

"That portion of territory bounded on the north by the south limit of the county of Ste. Genevieve, east by the Mississippi, west by the western boundary of the Osage purchase, and south by that line which formerly separated the commanderies of Cape Girardeau and New Madrid, and known more recently as the boundary between those two districts, shall compose one other county, and be called the county of Cape Girardeau.

"That portion of territory bounded north by the south limit of the county of Cape Girardeau, east by the Mississippi, south by the thirty-third degree of north latitude (the southern boundary of this Territory, as settled by act of Congress), west by the western boundary of the Osage purchase, and from the southern extremity thereof to the thirty-third degree of north latitude aforesaid, shall compose one other county, and be called the county of New Madrid.

"And I do hereby make known and declare that elections of representatives to serve in the General Assembly of the future Territory of Missouri shall be holden throughout the Territory on the second Monday of November next at the respective seats of justice of the present districts, which are hereby declared to be the seats of justice for the several future counties respectively, except that the town of New Madrid shall be the seat of justice of the future county of New Madrid, which said future county will comprehend the present districts of New Madrid and Arkansas, to wit: at the town of St. Charles for the future county of St. Charles, at which time and place there will be chosen for the said county two representatives; at the town of St. Louis for the future county of St. Louis, at which time and place there will be chosen four representatives; at the town of Ste. Genevive for the future county of Ste. Genevieve, at which time and place there will be chosen for the said county three representatives; at the town of Cape Girardeau for the future county of Cape Girardeau, at which time and place there will be chosen for the said county two representatives; and at the town of New Madrid for the future county of New Madrid, at which time and place there will be chosen for the said county two representatives.

"And I do, moreover, make known and declare that on the said second Monday of November next an election will also be holden at the several seats of justice aforesaid for a Territorial delegate to the Congress of the United States. And I do enjoin and require that these elections be holden by the sheriffs of the present districts, or, in their absence or inability to act, by the coroners respectively; that the said sheriffs or coroners shall take the polls of those qualified to vote; that the clerks of the courts of the present districts or their deputies shall respectively write down the names of the voters in a fair and legible manner, and that the presiding judges of the courts of the present districts respectively, or, in case of absence or inability to act, the next in commission, shall attend and be judges of the qualification of the voters; that the said election shall be opened at the respective seats of justice aforesaid on or before nine o'clock in the morning of the said second Monday of November, and close at sunset of that day.

"And the sheriffs or coroners, respectively, after having caused the *proces verbal* of said polls to be signed by the clerks or their deputies who may have respectively committed the same in writing, and countersigned by the judges respectively who may have attended the elections, will themselves certify the same, explicitly stating at large the names of the persons elected as representatives, and the name of the person having the greatest number of votes as a delegate to Congress, and make immediate return thereof to the Governor of the Territory.

"And I do lastly enjoin and require that the representatives of the several future counties so as aforesaid to be elected do convene in the town of St. Louis on the first Monday of December next, as provided by the act of Congress aforesaid.

bly, and of a delegate from the Territory to Congress. The candidates for delegate to Congress were Edward Hempstead, Rufus Easton, Samuel Hammond, and Matthew Lyon. Edward Hempstead was elected.[1]

The Legislature was composed of a House of Representatives of thirteen members elected by the people, and a Council or Senate of nine nominated by the President of the United States and confirmed by the Senate. The House elected in November, 1812, held its first meeting in the house of Joseph Robidoux,[2]

"In testimony whereof I have caused the seal of the Territory of Louisiana to be hereunto affixed.

"Given under my hand at the town of St. Louis, the first day of October, in the year of our Lord one thousand eight hundred and twelve, and of the independence of the United States of America the thirty-seventh.

"BENJAMIN HOWARD."

[1] A full sketch of the life and services of Edward Hempstead is given elsewhere. Matthew Lyon, one of his principal competitors, was born in Wicklow County, Ireland, and having emigrated to this country when thirteen years old, participated to some extent in the Revolutionary struggle, having in 1777 been appointed temporary paymaster of the Northern army, and in 1778 deputy secretary of the Governor of Vermont, and at the same time clerk of the Court of Confiscation. He settled in Vermont after the war, and was elected a member of the State Legislature in 1799 and the three following years. In 1788 he founded the town of Fairhaven, where he built saw-mills, grist-mills, established a forge or iron foundry, manufactured paper from basswood, and established a newspaper called *The Farmers' Library*. He served that town in the Legislature ten years. In 1786 he was assistant judge of Rutland County. He was a representative in Congress from Vermont from 1799 to 1801, and it was during his first term that he had a personal difficulty on the floor of Congress with Roger Griswold, of Connecticut, when an unsuccessful effort was made to have him expelled. The fact of his giving the vote that made Jefferson President is well known, and caused him much persecution. At the end of his second term as a representative from Vermont he removed to Kentucky, served two years in the Legislature of that State, and was a representative in Congress from that State from 1803 to 1811. On Nov. 13, 1811, the Speaker of the House of Representatives presented a petition from him, setting forth that he had many years before been prosecuted and convicted under the sedition law of John Adams, had been made to pay the sum of $1060.90, and that he wished to have the money refunded to him. On July 4, 1840, a law was passed paying back to his heirs the specified sum, with interest from February, 1799, which made between three and four thousand dollars. It was while he was in prison at Vergennes that he was elected to Congress from Vermont, and at the close of his services as Congressman from Kentucky he was employed to build gunboats for the war, but became bankrupt from the speculation. In 1820 he was appointed a factor among the Indians in Arkansas. When that Territory was organized he was elected the first delegate to Congress, but did not live to take his seat, having died at Spadra Bluff, Ark., Aug. 1, 1822.

Matthew Lyon removed to St. Louis from Kentucky, but only remained a short time, during which, as stated above, he became a candidate for Congress.

While living in Vermont he had a son born, whom he named Chittenden Lyon, after the distinguished man of that name in that State. He also became a member of Congress from Kentucky, and served from the years 1827 to 1835, and died in Kentucky.

Kentucky honored Matthew Lyon's memory by naming a county after him, "Lyon" County, on the right bank of the Cumberland River.

[2] Joseph Robidoux, at whose house the Territorial Legislature assembled on the 7th of December, 1812, was born in St. Louis, Aug. 10, 1783, of French-Canadian parentage. About 1800 he made his first voyage up the Missouri, in search of a favorable location to establish a trading-post, stopping at the site of the present city of St. Joseph, Mo., but eventually removing to Council Bluffs. After four years' traveling and trading among the Indian tribes of the West, he returned and opened an Indian trading-store immediately above the Black Snake Hills, at the mouth of Roy's Branch, in the interest of the American Fur Company, for which he was agent. At a later day he removed to the mouth of the Black Snake, and built a store on or near the site of the "Old Robidoux Row." In 1843 he returned to St. Joseph and laid off that city, and population and wealth soon settled in the place. Previous to coming to St. Joseph, Joseph Robidoux located at Chicago, or rather on the present site of that city, but was plundered by Indians and left.

At the age of eighteen he married Eugenie Deaille, in St. Louis, by whom he had two children. At the time of his death, in May, 1868, but one of his children by his first wife, Joseph E. Robidoux, of St. Joseph, was living. Four years after the marriage of Joseph Robidoux his wife died. In 1815 he was married to Angelique Vaudry, who died in St. Joseph, Jan. 17, 1857. Three of his sons by his last wife—Jules C., Edmund, and Felix Robidoux—survived him in St. Joseph, and a daughter, Mrs. Sylvanie Beauvais, resided in St. Louis. He left also thirty-two grandchildren.

Joseph Robidoux was possessed of a remarkably strong constitution. For thirty years before his death he was never unwell for more than a day or two at a time. The day before his death he walked the streets of St. Joseph as erect and with as steady and elastic step as most men of forty-five.

His brother, Antoine Robidoux, died at St. Joseph on the 29th of August, 1860, after a long illness, in the sixty-sixth year of his age. He was born in St. Louis in 1794, and was possessed of a sprightly intellect and a spirit of adventure.

When not more than twenty-two years of age he accompanied Gen. Atkinson to the then very wild and distant region of the Yellowstone. At the age of twenty-eight he went to Mexico, and lived there fifteen years. He then married a very interesting Mexican lady, who returned with him to the States. For many years he traded extensively with the Navajoes and Apaches. In 1840 he removed to St. Joseph with his family and resided there until his death. In 1845 he went out to the mountains on a trading expedition and was caught by the most terrible storms, which caused the death of one or two hundred of his horses and stopped his progress. His brother Joseph, the founder of the city of St. Joseph, sent to his relief and had him brought in, or he would have perished. He was found in a most deplorable condition and saved.

In 1846 he accompanied Gen. Kearney as interpreter and guide to Mexico. In a battle with the Mexicans he was pierced with lances in three places, but survived his wounds and returned to St. Joseph in 1849. Soon after that he went to California, and remained until 1851. In 1855 he removed to New Mexico with his family, and in 1856 he went to Washington and remained there a year, arranging some business with the government. He then returned to St. Joseph, where he remained to the time of his death.

between Walnut and Elm Streets, on the 7th of December, 1812, the following being the members:

St. Charles, John Pittman, Robert Spencer.

St. Louis, David Musick, Bernard G. Farrar, William C. Carr, and Richard Caulk.

Ste. Genevieve, George Bullett, Richard S. Thomas, Isaac McGready.

Cape Girardeau, George F. Bollinger, Spencer Byrd.

New Madrid, John Shrader and Samuel Phillips.

The oath was administered by John B. C. Lucas, one of the judges. William C. Carr was elected Speaker, and Thomas F. Riddick, clerk *pro tem.* Andrew Scott was elected permanent clerk before the close of the session.

The House of Representatives then proceeded to nominate eighteen persons, from whom the President of the United States, with the Senate, was to select nine for the Council, and out of the number thus named the President and Senate chose the following:

James Flaugherty and Benjamin Emmons, of St. Charles; Auguste Chouteau, Sr., and Samuel Hammond, of St. Louis; John Scott and James Maxwell, of Ste. Genevieve; William Neely and Joseph Cavener, of Cape Girardeau; and Joseph Hunter, of New Madrid. Samuel Hammond was chosen president of the Council.

Governor Howard was succeeded by Capt. William Clark, the distinguished explorer, and the associate of Lewis in the famous Lewis and Clark expedition. The administration of Governor Clark, which commenced in 1813, continued until the admission of Missouri as a State, when, being nominated for Governor without his consent, he was defeated.

During the interval between the resignation of Governor Howard and the qualifying of Governor Clark, Frederick Bates, Secretary of the Territory, again acted as Governor, and on the first Monday of July, in pursuance of a call issued by him, the Legislature met, and Governor Clark entered upon the discharge of his duties.

Laws regulating weights and measures, fixing the office and duties of sheriffs, and the mode of taking the census, establishing the seats of justice in counties and defining their boundaries, providing for the compensation of officers, defining crimes and punishments, and incorporating the Bank of St. Louis, were passed at this session of the Legislature.[1] The counties into which the Territory was divided were St. Charles, St. Louis, Ste. Genevieve, Cape Girardeau, and New Madrid. At the same session a part of Ste. Genevieve County was formed into Washington County.

At the election for delegate in 1814 the candidates were Rufus Easton, Samuel Hammond, Alexander McNair (afterwards Governor), and Thomas F. Riddick. Mr. Hempstead declined re-election, and Mr. Easton was chosen by a small majority. The candidates to represent the county of St. Louis in the Territorial Legislature and their respective votes were: Caulk, 376; Carr, 303; Harris, 352; Emmons, 282; Simpson, 346; and Caldwell, 214.

At the election for delegate to Congress in 1816,

Mr. Robidoux was a very remarkable man,—tall, slender, athletic, and agile. He possessed the most graceful and pleasing manners, and an intellect of a superior order. In every company he was affable, graceful, and highly pleasing. His conversation was always interesting and instructive, and he possessed many of those qualities which, if he had remained in the States, would have raised him to positions of distinction.

[1] At this session the following law establishing the boundaries of St. Louis and St. Charles Counties was enacted:

"AN ACT *establishing counties and county lines.*

"*Be it enacted* by the General Assembly of the Territory of Missouri, that all that portion of territory lying north of the river Missouri and bounded as follows, to wit: Beginning at the junction of the river Missouri with the river Mississippi; thence up the Missouri River, in the main channel of the same, to a point immediately opposite to the mouth of the Gasconade River; thence in a direct line so as to strike the river Jessrion, at the distance of thirty miles from its mouth; thence down the said Jessrion River to the Mississippi River; thence down said river Mississippi in the main channel of the same to the place of beginning, shall compose a county and shall be called and known by the name of the county of St. Charles; provided, nevertheless, that if the Indian title shall be extinguished to any land bordering on the north or west of the county of St. Charles, in the recess of the General Assembly, it shall be the duty of the Governor at the time being by proclamation to annex the same to the said county, and the territory so annexed shall, to all intents and purposes, be within the limits and compose a part of the county of St. Charles.

"All that portion of territory bounded north by the south line of the county of St. Charles, east by the main channel of the river Mississippi, south by a line to commence in the main channel of the Mississippi immediately opposite to the upper line of a tract of land owned by Auguste Chouteau, which is about half-way between the mouths of the Plattin and Joachim Rivers; thence running in a direct line to a point on the dividing ridge between those waters where Wright's road falls into the road leading from the town of Herculaneum to the mine at Burton; thence along said road to a point thereon immediately opposite a spring called the Dipping Spring, which spring is situated about two hundred yards to the south of said road; thence on a direct course to the mouth of Mineral Fork of Grand River; thence such a course as shall leave all the persons now settled in that settlement, usually known by the name of Richwood settlement, to the south of said course or line, and in the county of Washington; thence southwest to the western boundary of the Osage purchase; thence northwardly on said line to the river Missouri; thence down said river Missouri in the main channel of the same to the southwest corner of the county of St. Charles shall compose one county, and shall be called and known by the name of the county of St. Louis."

the honor passed from St. Louis to Ste. Genevieve, John Scott, of Ste. Genevieve, defeating Mr. Easton. Mr. Scott continued to represent the Territory until Missouri was admitted as a State. The returns, as footed up by Governor Clark, under the law, gave Scott 1816 and Easton 1801 votes, a majority of 15 for Scott in a total vote of 3617. He received the certificate of election, and took his seat in the Fourteenth Congress Dec. 2, 1816. His election was contested by Easton on the score of fraud. The case was referred to the Committee on Elections of the House, who reported that Easton was elected by 7 votes, they having thrown out as illegal 22 votes cast for Scott in a certain precinct. The House refused to concur in this, and adopted a resolution that the election was void and the seat vacant.

A special election took place to fill the vacancy on Aug. 4, 1817, at which Scott received 2406 and Easton 2014 votes; majority for Scott, 392; total vote, 4420; increase, 22½ per cent. This election was of great interest to the politicians and immediate friends of the rival candidates. Heretofore the elections had been uniformly conducted in a quiet and peaceable manner, but on this occasion, according to Mr. Charless, editor of the *Missouri Gazette*, it was quite the reverse. The election in St. Louis was held at Baird's large old frame house on South Third Street. "The United States then kept up a recruiting rendezvous in this place. On the day of the election the soldiers were marched several times around the place of election (a part of the town they seldom visited when recruiting) with music and tickets on their hats, hurrahing for Scott." Riotous altercations occurred about the polls, in which prominent individuals of the place participated.

The *Missouri Gazette* of Aug. 9, 1817, thus describes the scenes attending the election:

"The night preceding the election the soldiers and music of a recruiting party paraded the streets in the vicinity of the election ground, and early on Monday the soldiers, with labels or tickets on their caps on which was printed 'John Scott,' etc., were in possession of the ground, with two stands of United States colors, on which 'True Republican nomination, John Scott,' was printed or painted. A large shed covered with boat-sails was erected by some of the Governor's family and others near the door of the election, under which was spread tables covered with whiskey, etc., and at which presided the most thoughtless assemblage ever witnessed, armed with daggers, pistols, and clubs, insulting every person whom they believed would vote for Col. Easton, and inducing the inexperienced to drink ardent spirits until they would vote for their candidate. A great number of persons who intended to support Col. Easton were deterred from appearing at the election, preferring the relinquishment of their right of elective franchise than to risk the dagger, pistol, or club.

"Fighting, stabbing, and cudgeling occurred. The street near the court-house door and whiskey-tables were so crowded by the mob that a person, in pushing through the crowd, was in danger of being assassinated without knowing who did it. Governor Clark himself, as if willing to excite the flame, exclaimed in a loud voice (although we vote by ballot) that he voted for John Scott for Congress.

"The timid and uninformed male population were brought in like sheep to the slaughter, under convoy, many under the influence of fear, and more ignorant of the consequences of a vote.

"A lieutenant of the regular army having attacked a mechanic of this place, a nephew of Governor Clark stabbed him with a dagger, and afterwards begged his pardon, saying 'he had mistaken him for one of Easton's friends.'

"We believe that in despotic England the laws ordain that the military shall retire three miles from any election. How different the practice here!

"Since the election attacks and clubbing has been the order of the day, aggression always coming from the above-mentioned persons.

"A few days ago one of Governor Clark's nephews assailed a citizen of this place, who would have sent him 'to that bourne from whence no traveler returns' had not his pistol, aimed at his breast, flashed.

"We have seen, we have heard of many outrages at elections, but we never expected to live to see the flag of the United States prostituted to electioneering purposes, and their officers and soldiers subserving the same ends.

"We have not been able to procure correct election returns. Owing to the causes above assigned, Mr. Scott got in this township two hundred and fifty-eight and Mr. Easton ninety-one votes."

A writer in the *Gazette* of the same issue thus narrates his experiences on this eventful day:

"Without attempting to describe the scenes of Monday last I shall briefly relate some transactions in which I was immediately concerned, leaving for more able pens a description of the extraordinary proceedings of that day. I was absent from town on Monday, the day of election, until two o'clock. When I returned, I was advised not to go to the election ground, as it was probable I should be insulted. I answered that as an independent voter I would run all risks in the exercise of my rights and accordingly proceeded to the place where the election was held. There was a considerable concourse of people collected at the door of the house, the United States flag was flying, on which was inscribed the words 'true republican nomination, John Scott for Congress,' near which was one or more tables with whiskey, porter, etc. In the crowd I saw several military officers. I made my way into the house, gave in my ticket and was standing conversing with a gentleman, when some person gave me a considerable jostle as he passed, whom I afterwards recognized to be Capt. John O'Fallon, of the United States army, nephew to the Governor of the Territory. He asked me if I took it as an insult; I answered him, 'No, sir; I assure you I did not.' He then said, 'Sir, I intended it as an insult.' My first impulse was to shoot him on the spot; a little reflection convinced me the provocation was not sufficient to justify my taking the life of a fellow-being, and although I was much agitated at being insulted by a man I scarcely knew I calmly replied that I should notice his conduct in another way, and after some moments I resumed my conversation with the gentleman and we walked out together. I am here under the necessity of noticing the conduct of another officer of the army. At the moment of my receiving the insult this officer sprang from his seat and placed himself at my right side. What his intentions were I know not. I am charitable enough to

presume they were pure. After witnessing scenes I never expected to see realized in this republic, the elective franchise completely destroyed, and the public voice controlled and overawed by a combination of executive and military influence, aided by the potent god whiskey, I retired with a friend, who exclaimed as we walked on, 'Good God! are these the blessings of a republic? Is the majesty of the law to be thus trampled on by those appointed to guard them? Are these the advantages we are to derive from the seat of government, the capital of Missouri? If so, may those who want it take it with all its appendages, and all good and peaceful citizens will say amen.

"To return to myself, on the morning after the election I received from Ben O'Fallon (another of the Governor's nephews) a note demanding a personal interview, which I requested his friend to tell him I should decline granting.

"On Wednesday morning I was standing in the street near my door, conversing with a friend, when Capt. John O'Fallon came up and demanded why I had not noticed him as promised; I answered that I intended to take legal notice of him, but should decline it. He immediately said, 'Then I pronounce you a liar and a coward.' I stepped back one step and told him he was a liar. The captain had in his hand a large stick, apparently cut for the purpose of aiding him in the character he performed on the Monday before, with which he struck at me, perhaps hit me. I had my big coat thrown over and buttoned across my shoulders, from which I could not conveniently extricate myself. I, however, succeeded in getting my pistol presented within a few inches of his breast, but, fortunately for him, it flashed, and saved me the after-reflection of having sent, unprepared, a human being to another world.

"The captain was so much occupied in endeavoring to strike my pistol from my hand and avoiding its contents that I escaped unhurt."

In fact, the incidents of the election recall some of the most turbulent demonstrations on similar occasions in the recent history of American politics, and the sensitiveness displayed by Mr. Charless at the presence of troops at the polls finds a parallel in the indignant protests frequently recorded against similar acts which are doubtless still fresh in the memories of our readers.

The agitation for the admission of Missouri as a State began in 1817,[1] but it was not until the session of Congress in 1819–20 that the question of admission became complicated with that of slavery. At the previous session a bill had been introduced for the admission of the State, and Mr. Tallmadge, of New York, moved an amendment prohibiting the further introduction of slavery within the Territory, and requiring that all children born therein after its admission should be free at the age of twenty-five years. The amendment was adopted by the House of Representatives by a vote of seventy-three to sixty-seven, and being disagreed to in the Senate, the bill was lost at that session. Upon the receipt of information in St. Louis as to the action of the House, public opinion was greatly agitated. "It has been reserved for the House of Representatives of the present Congress," said the *Missouri Gazette* of April 7, 1819, "to commit the most gross and barefaced usurpation that has yet been committed. They have ingrafted on the bill for our admission into the Union a provision that 'the State Constitution shall prohibit the further introduction of slavery; and that all children born of slaves shall be free at the age of five and twenty years.' Bear in mind, fellow-citizens, that the question now before you is not whether slavery shall be permitted or prohibited in the future State of Missouri, but whether we will meanly abandon our rights and suffer any earthly power to dictate the terms of our Constitution."

At the April term of the grand jury of the Circuit Court for the Northern Circuit of Missouri the following presentment was made:

"At a Circuit Court for the Northern Circuit of the Territory of Missouri, begun and held at the town of St. Louis, within and for the county of St. Louis, before the Hon. Nathaniel Beverly Tucker, judge of said circuit, the grand inquest for the body of the county of St. Louis return here into court the following presentment, which is ordered by the court to be spread upon the record in the following words, to wit:

"At a Circuit Court begun and held for the county of St. Louis, in the town of St. Louis and Territory of Missouri, on Monday, the 5th of April, 1819, we, the grand jury from the body of the county aforesaid, beg leave to present to the honorable court that they conceive it not only their privilege, but their solemn duty to present all grievances whatever of a public nature; that among these the greatest which they have ever witnessed, and which, through a sense of duty to themselves and the good people generally of this Territory, they are now constrained, however painfully and reluctantly, to animadvert upon, do present that the late attempt by the Congress of the United States to restrict us in the free exercise of rights in the formation of a Constitution and form of State government for ourselves is an unconstitutional and unwarrantable usurpation of power over our inalienable rights and privileges as a free people; that these privileges do not now depend upon the will of Congress, or any other power or body politic whatever, since our emancipation from British tyranny and oppression, but were virtually and essentially secured to us by the original Declaration of American Independence, as set forth in our Bill of Rights, and secured to us by the Constitution of the United States; that it is a restriction and assumption of power never before attempted or assumed, as it regards any of the other States or Territories, and, moreover, is a violation of the third article of the treaty of cession between the United States and France, which guarantees that we shall be maintained and protected in the free enjoyment of our liberties and property, and that we shall be admitted into the Union upon the same terms, and with all the rights, privileges, and immunities of the other States. Although we deprecate anything like an idea of disunion, which next to our personal liberty and security of property is our dearest right and privilege, and cannot entertain for a moment the most distant probability of such an event, yet we feel it our duty to take a manly and dignified stand for our rights and privileges, as far as is warranted by the Constitution

[1] "We have seen in the last *Emigrant* the copy of a petition stated to be 'The Memorial of the Citizens of Missouri Territory,' praying to be admitted into the Union of States within certain limits."—*Missouri Gazette*, Oct. 11, 1817.

of the United States and the act of cession, and from which we will not depart, and request that the clerk of the court may be directed to hand this to the printers in this town for publication.

"Attest, ARCHIBALD GAMBLE, *Clk.*"

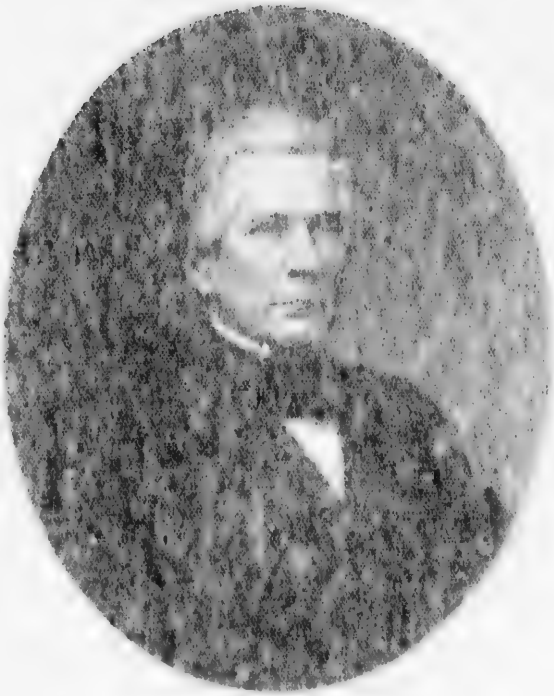
During the same month (April, 1819) the grand jury of the Superior Court made the following presentment:

"The grand jurors of the Superior Court for the Territory of Missouri, sitting at St. Louis, for the northern circuit, April term, 1819, avail themselves of their assemblage to express their sentiments on the late attempt in the Congress of the United States to dictate an article in the Constitution of the future State of Missouri.

"They would view such an attempt as fraught with danger to the State sovereignties if carried into effect in the most inconsiderable article, but in the one proposed, the prohibition of the further introduction and continuance of slavery in the future State of Missouri, they believe that all the slaveholding States are vitally menaced and threatened with eventual destruction, as the transition is easy and direct from prescribing a Constitution in a new State to that of altering it (for the same cause) in an old one; and if it is conceded to be anti-republican to hold slaves, it will then become the duty of Congress, as the guarantee of Republican Constitutions to all the States, to make war upon those whose Constitutions admit of that doctrine.

"They further view the attempt in the House of Representatives as a direct violation of the treaty of cession, and so unfriendly to the slaves themselves, by confining them to the planting regions of the South, instead of letting them spread to the agricultural countries of the North, that they are at a loss to conceive how such an attempt could have been advocated by seventy-eight men in Congress, without believing that the interested motives and political views of some designing characters had taken advantage of the honest intentions of many who oppose slavery on principle to array them in favor of a measure nominally an abridgment of slavery, but in fact an aggravation of all its hardships.

"They believe that the Territory of Missouri had a right to be admitted at the last session of Congress, to form a Constitution on an equal footing with the original States, and that an adherence to their votes by seventy-eight members in the House of Representatives, by which the Missouri State bill was lost, was a gross violation of this right, and they believe it the duty of the people of Missouri to make it known in the most public manner that they are acquainted with their own rights and are determined to maintain them, for the better manifestation of which in this country they would recommend a public meeting of the citizens at the court-house in St. Louis on Saturday, the 15th day of May next, at four o'clock in the evening; and request this court will direct the publication of this presentment in the newspapers printed in this town.



"In behalf of the grand jury,

"CH. W. HUNTER, *Foreman.*

"ST. LOUIS, April 30, 1819."

A memorial from the people of that part of Massachusetts which now forms the State of Maine, praying admission into the Union, was presented in Congress Dec. 7, 1819, and the advocates of the unrestricted admission of Missouri immediately seized upon it as a means of effecting their object. The debate and excitement incident to this, the first great struggle between slavery and anti-slavery, are too well known to require description in this work. They terminated in the famous "Missouri Compromise," and the State was admitted without restriction of any kind, the act of Congress being approved on the 6th of March, 1820. The advocates of unrestricted admission based their demands not on the constitutionality of slavery, but upon the inherent right of the people to be absolutely free from all restraint from any source in framing a State Constitution. They claimed that under both the Constitution and the treaty ceding Louisiana to the United States they enjoyed this right, and that Congress could not impair it by imposing conditions. The treaty provided that the inhabitants of Louisiana were to be "incorporated into the Union, and to be admitted as soon as possible, according to the principles of the Constitution, to the enjoyment of all the rights, advantages, and immunities of citizens of the United States," and it was argued that Congress could not in good faith abridge this provision or impair it by imposing any condition whatever upon the people of the State; that the local policy of a State was beyond the constitutional province of the Federal government; that the Constitution declared that "the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people;" that the right to hold slaves was one of these rights, and the guaranty applied to new States as well as to old States; that Congress might refuse to admit the State, but could not impose a condition upon the Constitution of the State. The "Compromise" postponed the final conflict between slavery and anti-slavery for more than half a century, but was declared unconstitutional by the Supreme Court of the United States, which decision in the Dred Scott case, confirmed the position taken by Missouri and her friends.

The news of the action of Congress admitting Missouri was received with great rejoicing in St. Louis. "The town," we are informed by a local chronicler, "was generally and splendidly illuminated ... transparencies were displayed, among others a very handsome one displaying the American eagle with mounting the Irish harp, and another representing slave in great spirits, rejoicing at the permis-

Wm G. Pettus

granted by Congress to bring slaves into so fine a country as Missouri."

At a meeting in April, 1820, of "about one hundred citizens of the town of St. Louis, who wish to prevent, as early as possible, the further introduction of slaves into the new State of Missouri," at which Joseph Charless presided, the following resolutions were unanimously adopted:

"1st. *Resolved*, That this meeting is decidedly opposed to any interference with the slaves now in the Territory. Justice and expediency demand that they should be left in their present condition.

"2d. *Resolved*, That the further introduction of slaves should be stopped as early as possible, and that we recommend to the members when elected to the convention from this county to use their most zealous efforts to effect so desirable an object.

"3d. *Resolved*, That any attempt to restrict the right of suffrage to freeholders and election by *viva voce*, thereby giving them undue weight in the community, and rendering the industrious poor man a slave, is aristocratical and subversive of our liberties, and shall always meet our decided disapprobation.

"4th. *Resolved*, That this meeting do request the candidates for a seat in the convention to declare their sentiments relative to the above resolutions, and that in our opinions none but such persons as do express their opinions ought to be supported."

Missouri adopted her State Constitution on the 19th of July, 1820. The convention which framed it assembled in the Mansion House, afterwards known as the City Hotel, at the corner of Third and Vine Streets, St. Louis, on the 12th of June, 1820, and was composed of the following delegates from the fifteen counties into which the State was then divided:

Cape Girardeau.—Stephen Byrd, James Evans, Richard S. Thomas, Alexander Buckner, Joseph McFerron.

Cooper.—Robert P. Clark, Robert Wallace, William Lillard.

Franklin.—John G. Heath, Nicholas S. Burckhartt, Duff Green, John Ray, Jonathan S. Findlay.

Howard.—Benjamin H. Reeves.

Jefferson.—Samuel Hammond.

Lincoln.—Malcolm Henry.

Montgomery.—Jonathan Ramsey, James Talbott.

Madison.—Nathaniel Cook.

New Madrid.—Robert D. Dawson, Christopher G. Houts.

Pike.—Stephen Cleaver.

St. Charles.—Benjamin Emmons, Nathan Boone, Hiram H. Baber.

Ste. Genevieve.—John D. Cook, Henry Dodge, John Scott, R. T. Brown.

St. Louis.—David Barton, Edward Bates, Alex. McNair, William Rector, John C. Sullivan, Pierre Chouteau, Jr., Bernard Pratte, Thomas F. Riddick.

Washington.—John Rice Jones, Samuel Perry, John Hutchings.

Wayne.—Elijah Bettis.

The following was the return of votes for members of the convention, as made to the Executive office from eleven of the counties:

	Votes.		Votes.
New Madrid	314	Pike	492
Cape Girardeau	837	Cooper	797
Washington	453	Howard	1735
Jefferson	265	Franklin	.....
St. Charles	628		
Montgomery	359	Total	6128
Lincoln	248		

David Barton, of St. Louis, was elected presiding officer, and William G. Pettus secretary.[1]

William Grymes Pettus was one of the most prominent among the early citizens of St. Louis, and, as indicated by the fact that he was chosen secretary of its first Constitutional Convention, one of the leading men in the then infant State of Missouri. He was born in Mecklenburg County, Va., on the 31st of December, 1794, and was the second son of William Pettus and Elizabeth Poindexter. His parents were born in the same county in 1764, and were married in 1789. At the age of eighteen Mr. Pettus served as a volunteer in the war of 1812, and soon after was appointed deputy clerk of Lunenburg County, Va. In 1818 he removed to St. Louis, in company with Gen. Walter Taylor, United States senator from Indiana, taking with him a letter of introduction to Governor William Clark. The long journey was made on horseback, and Ashland, the home of Henry Clay, being on the route, Mr. Pettus spent several days with that distinguished statesman. On his arrival in St. Louis, Mr. Pettus became at once identified with public affairs. In June, 1818, he entered the Missouri land-office at St. Louis, as assistant under Alexander McNair, register, and continued to serve in that position until McNair was chosen first Governor of Missouri in 1820, when he was appointed private secretary to the Governor. In June, 1820, as we have seen, the convention to frame a Constitution for the new State of Missouri met, and Mr. Pettus was chosen secretary over three other competitors, viz., Thompson Douglas, Archibald Gamble, and J. V. Garnier. The vote on first ballot stood: Douglas, three; Gamble, twelve; Garnier, two; and Pettus, twenty-one. At the close of the convention a complimentary resolution, introduced by Mr. Jones, was adopted unanimously, thanking their secretary for the faithful and correct manner in which he had performed the duties of his office.

Compliments of this character were seldom bestowed by legislative bodies at that day, except for meritorious services actually rendered. When the Constitution was finally adopted by the convention it was necessary that it should be engrossed on parch-

[1] The expenses of Mr. Pettus, for stationery, inks, paper, books, etc., amounted to twenty-six dollars and twenty-five cents.

ment, on which it was very difficult to write. Mr. Pettus completed the whole instrument in a single night, and in the morning delivered it to Mr. Findlay, chairman of the committee. When the convention reassembled, Mr. Findlay presented the Constitution to the convention, saying,—

"It has been enrolled on parchment by your secretary, and permit me, Mr. President, to add that my business has been for many years to read proof-sheets, having been a newspaper editor, and I am free to say that I never saw such a paper as this. There is not an interlineation; there is not one word misspelled, there is not a 't' uncrossed nor an 'i' undotted in the whole instrument, and as such, as chairman of the committee, I present it to the convention for signatures."

In 1821, Mr. Pettus held the office of clerk of the Supreme Court and Court of Chancery, from which, in June of that year, he was appointed Secretary of State, which office he retained during the administration of Governor McNair. In 1824 he was elected secretary of the State Senate, during Governor Frederick Bates' administration, and subsequently was appointed by Governor Bates judge of the Probate Court of St. Charles County, which office he retained until September, 1826. On the 31st of December of this year he married Caroline R., daughter of Maj. James Morrison, of St. Charles, and entered into business at St. Charles, where he remained for several years. During his residence at St. Charles he was elected to the State Senate, and served during the session of 1832–33. From 1834 to 1842 he was engaged in mercantile and banking business in St. Louis. Later he was appointed secretary of the St. Louis Floating Dock Insurance Company, and continued to act in that capacity until 1855, when he accepted the position of secretary of the United States Insurance Company, which place he filled until 1862, when ill health compelled him to resign. He died on the 25th of December, 1867, leaving a widow, four daughters, and two sons.

GOVERNOR McNAIR'S MANSION.

In all the relations of life Mr. Pettus was distinguished by an unwavering integrity, great industry, and a warm and generous benevolence. His solid worth of character was held in the highest esteem by the people of St. Louis, and throughout his career he enjoyed the fullest confidence and respect of the business community. That he was a man of unusual capacity and superior education is demonstrated by the fact that while still very young, and a comparative stranger in the country, he was chosen secretary of the first Constitutional Convention, and afterwards occupied a number of prominent positions requiring great intelligence, reinforced by thorough and comprehensive knowledge of public affairs and an intimate acquaintance with men. As a man of probity and culture, he was always sought and esteemed, and his influence was exerted only for good and worthy objects. There are, in fact, few names among those of the early business men of St. Louis which carry with them as marked a suggestiveness of high and honorable principles consistently applied throughout a long and active life as does that of William G. Pettus.

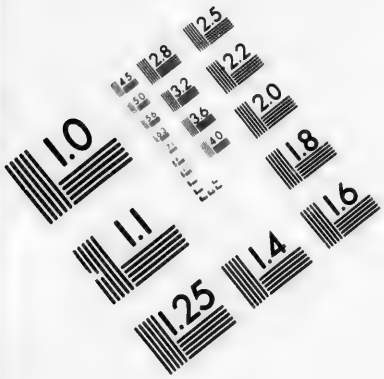
When the Missouri Constitutional Convention assembled on June 12, 1820, each member took an oath, administered by Judge Silas Bent, to support the Constitution and to faithfully perform the duties of his office. Samuel Hammond, of Jefferson County, and Thomas F. Riddick, of St. Louis, were chosen respectively president and secretary *pro tem.*, and Messrs. Thomas, Emmons, Jones, Cook, of Madison, and Riddick were appointed a committee to draft and report rules and regulations for the order and government of the convention. The ballot for

permanent president resulted as follows: David Barton, 28; John Rice Jones, 3; Richard S. Thomas, 6; Samuel Hammond, 1. The doorkeeper was George W. Ferguson. The Constitution was framed and ratified in due time, and a limited number of copies printed in pamphlet form by Jonathan Smith Findlay, of Franklin, Mo. On the 26th of June, 1821, the General Assembly of Missouri formally complied with the provisions of the act of Congress of March 2d of that year, providing for the admission of Missouri as a State, and on the 10th of August the following proclamation was issued:

"Now, therefore, I, James Monroe, President of the United States, in pursuance of the resolution of Congress aforesaid, have issued this my proclamation, announcing the fact that the said State of Missouri has consented to the fundamental conditions required by the resolution of Congress aforesaid, whereupon the admission of the said State of Missouri into this Union is declared to be complete."

Prior to the formal admission of Missouri, however (on the 28th of August, 1820), an election was held for Governor, Lieutenant-Governor, representative for the remainder of the Sixteenth Congress and one for the Seventeenth Congress, members of the Legislature, and sheriffs and coroners. The candidates for Governor were William Clark, then Governor of the Territory, and Alexander McNair; and for Lieutenant-Governor, William H. Ashley, Nathaniel Cook, and Henry Elliott. The vote resulted as follows: For Governor, McNair, 6576; Clark, 2556; McNair's majority, 4020. Lieutenant-Governor, Ashley, 3907; Cook, 3212; Elliott, 931; Ashley's majority over Cook, 695.

GOVERNOR ALEXANDER McNAIR.



Alexander McNair, a native of Pennsylvania, was appointed lieutenant of infantry in 1799, but his regiment having been disbanded in the following year, he removed to Missouri, and in 1812 was appointed adjutant and inspector-general of the territorial forces. In 1813 he was made colonel of a regiment of Missouri militia in the service of the United States, and subsequently held an important office in the Indian Department. As we have seen, he was elected first Governor of Missouri in 1820, and died in May, 1826.

At the same election John Scott, who was already Territorial delegate, was elected representative to both the Sixteenth and Seventeenth Congresses. The General Assembly chosen at this election met at the old Missouri Hotel, situated on the southwest corner of Main and Morgan Streets, St. Louis, on the 19th of September, 1820, and organized by the election of James Caldwell, of Ste. Genevieve, Speaker, and John McArthur, clerk of the House. Lieutenant-Governor Ashley was the presiding officer in the Senate, but Silas Bent, of St. Louis, was chosen president *pro tem.*

Governor McNair made the following appointments, which were confirmed by the Senate: Secretary of State, Joshua Barton; State Treasurer, Peter Didier; Attorney-General, Edward Bates; Auditor of Public Accounts, William Christy,—all of whom were citizens of St. Louis. At this session of the Legislature, David Barton and Thomas H. Benton were chosen United States senators, but were not admitted until December, 1821, owing to the fact that the bill for the admission of Missouri as a State did not pass Congress until March 2d of that year, after a protracted and exciting debate. Mr. Barton was elected without much opposition; but Mr. Benton was bitterly antagonized by Judge John B. C. Lucas, Henry Elliott, John R. Jones, and Nathaniel Cook, all of whom were candidates for the place. Mr. Barton gave his support to Benton, and it was finally discovered that the latter could be elected with the aid of one more vote. Marie Philip Le Duc, a member of St. Louis County, who had previously opposed Benton, was finally induced to transfer his vote to him; but when this was accomplished one vote was still lacking, owing to the serious illness of John Ralls, one of the Benton members. Mr. Ralls, however, was brought down stairs in bed and voted for Benton, thus securing his election, but died soon after. In honor of his memory the Legislature named a new county, organized at that session, after him, Ralls County.[1]

Prior to the President's proclamation of Aug. 10, 1821, the Presidential election of 1820 had been held, and an act had been passed authorizing the General Assembly to select three persons as electors to vote for President and Vice-President. The electors chosen

were John S. Brickey, John Shannon, and William Christy. Objections were made to including Missouri in the count of electors for President and Vice-President, because the State had not been formally recognized as admitted, and the vote was not counted.

In 1822 an act was passed dividing the State into three districts for the election of Presidential electors in each district.

The First District included the counties of Clay, Ray, Chariton, Howard, Boone, Callaway, Cole, Saline, Cooper, and Lillard (Lafayette).

The Second, Ralls, Pike, Lincoln, Montgomery, St. Charles, St. Louis, Franklin, and Gasconade.

The Third, Ste. Genevieve, Jefferson, Perry, Cape Girardeau, Scott, New Madrid, Wayne, Madison, St. Francis, and Washington.

In 1824, David Todd was nominated and elected Presidential elector in and for the First District; David Musick in the Second, and J. Logan in the Third. Todd received 1111 votes, and his opponent, John Bull, 610; Musick received 604, William Smith 239, and Ruluff Peck 159; Logan received 327 votes, to 317 cast for David Armour, and 32 cast for R. J. Dawson.

At this election the candidates for President of the United States were Henry Clay, John Quincy Adams, and Andrew Jackson.

In St. Louis the candidates were David Musick as the Clay elector, Ruluff Peck the Adams elector, and William Smith the Jackson elector. Henry Von Phul, Hubert Guion, and Thomas F. Riddick were judges of the election, and John J. Douberman and L. A. Benoist, clerks. Thompson Douglass was the justice of the peace who administered the oath of office to the clerks and judges and prefixed his verification of that act to the poll-book. The names of two hundred and ninety-five voters were recorded. Among those voting were the following:

For the Clay elector, George F. Strother, a lawyer of note, and afterwards a representative in Congress; John Simonds; Luke E. Lawless, afterwards judge of the Circuit Court; Henry S. Geyer, afterwards United States Senator; Henry Von Phul; L. A. Benoist; Spencer Pettis, killed in 1831 in a duel; Elias Rector, once surveyor-general of Illinois and Missouri; Peter Lindell; B. G. Farrar; Col. Thomas H. Benton; William Christy; William C. Carr, judge of the old Court of Common Pleas; James Wilgus, brother of the late Asa Wilgus; Elkanah English; Francis Duchouquette; Charles S. Hempstead; Gabriel Paul; Matthew Kerr, father-in-law of Hon. Samuel Knox, of Massachusetts; Thornton Grimsley; David B. Hill; Samuel Willi; Antoine Chenie; Robert Wash, once judge of the Supreme Court; Alexander McNair, Territorial Governor of Missouri; Phineas Block, John B. Sarpy, J. B. Belcour, Francis Tesson, Charles Keemle, Pascal Cerré, William K. Rule, James G. Soulard, and Auguste Brazeau.

For the Adams elector, John Simkins, Jr., Archibald Gamble, postmaster under President Fillmore; Edward Charless, once co-proprietor of the *Missouri Republican;* Josiah Spaulding, a prominent member of the bar; Sullivan Blood; Hamilton Gamble, afterwards judge of the Supreme Court and Governor of Missouri; Edward Bates, afterwards the distinguished jurist; Alfred Skinner; Joseph Charless, Jr., murdered while president of the Mechanics' Bank; Edward Tracy, afterwards city auditor; Col. J. B. Brant; Beriah Cleland, remembered as "the bard of the West;" Jesse G. Lindell, John D. Daggett, Benjamin Wilder, Daniel Hough, J. H. Gay, Frederick L. Billon, Daniel D. Page, John O'Fallon, William Risley, and George K. McGunnegle.

For the Jackson elector, Andrew Elliott, C. B. Penrose, Jr., afterwards a prominent politician of Philadelphia and office-holder at Washington, Silas Bent, N. B. Atwood, Joseph C. Laveille, Augustus Kerr, and David Sheppard.

The vote summed up: For Clay, 125; Adams, 99; and Jackson, 71.[1]

[1] Of the two hundred and ninety-five who voted only twenty-nine were known to be living in 1866, as follows: Andrew Elliott, Sullivan Blood, A. Skinner, L. A. Benoist, Ralph Clayton, Elkanah English, D. B. Hill, F. L. Billon, D. D. Page, Phineas Block, James G. Soulard, G. K. McGunnegle, Daniel Hough, James C. Sutton, Archibald Gamble, Edward Bates, Henry Von Phul, Frederick Dent, John D. Daggett, John H. Gay, S. Willi, Ben Ames, Emanuel Block, William K. Rule, David Sheppard, Bernard Pratte, Charles S. Hempstead, John B. Belcour, David Deshler.

Mr. Frederick L. Billon relates the following interesting reminiscences of the Presidential election of 1824:

"When the first Presidential election in Missouri took place, Nov. 1, 1824, we had but three votes in the electoral college, for our two senators and one representative in Congress, and for that purpose were divided into three electoral districts, and a somewhat singular circumstance connected with that first election is the fact that each one of the three candidates for that office for whom an elector presented himself in our own State—Clay, Adams, and Jackson—carried a district, showing a nearly equal diversity of opinion in our State as to the three candidates named. For the fourth name then before the people—that of William H. Crawford, of Georgia, one of the most popular men of the day in Congress, and with those who knew him personally, as is evinced by his receiving the largest vote in the congressional caucus—no polls were opened in our State, no one having presented himself as his elector.

"We had but three municipal townships in our St. Louis County at that period,—St. Louis, extending south to the mouth of the Maramec; St. Ferdinand's, along on the Mis-

Peter Lindelöf

Among those who were prominently identified with the commercial and political history of St. Louis at this time was Peter Lindell. He was a warm personal and political friend of Henry Clay, and took an active interest in his canvass. He was descended from an English gentleman who settled in Worcester County, Md., early in the last century, on a tract of land granted by the lord proprietary. Upon his death the first settler bequeathed this property to his son John, who managed the estate successfully, and was regarded as one of the most skillful farmers of that region. John Lindell had a large family, the eldest son being Peter, afterwards a resident of St. Louis, who was born March 26, 1776.

Until he attained his majority Peter Lindell worked on the farm and attended the schools of the neighborhood, but owing to the unsettled state of affairs resulting from the Revolutionary war, the colonists were able to pay little attention to educational matters. Whatever may have been the deficiencies of his early education, however, he more than supplied them in later life, as opportunity enabled him to indulge his taste for reading. He possessed a fine library, and was very well read in most matters of general interest.

At the age of twenty-one he went into business on his own account, and for some years conducted a store in the neighborhood with considerable success. Then, with his brothers Robert and John, he was seized with the prevalent fever to go West, and the three started out, reaching St. Louis in December, 1811. It seemed a promising place, and as they had no particular point in view they concluded to settle here, and established a general mercantile concern on Main Street, with a larger stock of goods than had ever been opened in the town before, and very soon were doing an extensive business. Peter Lindell was the resident partner, and his brothers represented the house abroad. This was before the days of steamboating, when goods had to be transported by wagon from Philadelphia to Pittsburgh, and thence by flatboat down the Ohio. The Lindells transacted business on such a scale that they found it to their interest to own their boats, and when steam navigation came into use they also owned and managed their

souri; and Bonhomme, embracing the back portion of the county,—with but one voting precinct in each township,—the city of St. Louis and the villages of Florissant and Manchester. St. Louis had just then reached the dignity of a city, having been incorporated as such the year preceding. We had had elections here for some twenty years, of various degrees, progressing onward from town and Territorial to city, county, and State, and generally they had excited but little interest with the people: but an election for a President of these United States was an entirely new sensation, which the voters of St. Louis had not as yet experienced, and occasioned considerable interest in the people at large, and no little excitement with the politicians, of whom we had our full share even at that day.

"I well remember on one occasion a general assemblage of the voters at large, called to take some action and express their views upon the momentous subject. The meeting was held on Friday, May 7, 1824, in the old Baptist Church at the southwest corner of Market and Third Streets (an unfinished and unplastered room of forty by sixty, abandoned by the Baptists, and then used for all purposes). Our then newly-made worthy mayor, the late Dr. W. Carr Lane, was called to preside temporarily, and took his position on a small temporary platform at the west end of the room that had originally served as a stand for the preacher, and Amos I. Bruce was named as secretary. There might have been present some one hundred and twenty or thirty persons, of all shades of opinions in regard to the different candidates. After a time quite a tumult arose in the meeting from various propositions offered, nearly all in the same breath, each aiming at the adoption of his particular views.

"The difficulty in the way was not so much diversity of opinion in political sentiment as it was to reconcile the personal preferences of those at the meeting in respect to their particular candidates. Finally, after considerable noise and confusion, which the presiding officer was unable to suppress, some one, in a loud voice above the tumult, proposed that we should divide, the friends of each retiring into one of the four corners, and the strongest party keep the house. Upon which proposition one of our prominent residents, a man of muscular frame, not very long since deceased, said 'this suited him exactly,' and prepared at once for the conflict by divesting himself of his coat and rolling up his sleeves, to the infinite amusement of the meeting. After several ineffectual attempts to 'count noses,' the Jacksonites present being, if not the most numerous, at all events the most noisy and vociferous, were allowed to retain the room, much the largest portion of the others having retired during the tumult, a few only remaining as spectators in the back room.

"This party then proceeded to reorganize their meeting with the same officers, some thirty or so participating in the proceedings, and adopted resolutions expressive of their choice of Andrew Jackson and John C. Calhoun for the positions of President and Vice-President. This meeting was mainly composed of politicians, prominent among whom were Duff Green, who in after-years contributed so largely to the first election of Andrew Jackson by the establishment of his paper at Washington City, and Patrick H. Ford, both newspaper editors, Dr. Simpson, John Shade, J. C. Laveille, Rocheblave, Elliott, Kerr, and others whose names do not recur to me.

"This meeting took place in the early part of May, fully six months before the day of election, giving, one would suppose, ample time for the anxious politicians and those personally interested in the matter to marshal their forces and prepare for the contest. Yet when the day of election finally arrived the total number of votes cast at St. Louis precinct was but 295, of which Clay received 125, Adams 99, and Jackson 71, exhibiting a very meagre vote in a population of about 6000 souls and a voting population of not less than 700, for St. Louis precinct included at that day all of what is now Carondelet township and a large portion of Central; and of these 295 voters, but 37 were of the original native French stock, evincing the little interest taken by that portion of our population in political matters."

own craft, and established the first packet-line to Pittsburgh. From the extent and variety of their operations the name of the Lindells became famous throughout the entire West.

After some years Robert Lindell married, and, having become wealthy withdrew from the firm and removed to Pittsburgh. Peter then sent for Jesse, a younger brother, whose father had died, and, taking him under his charge, sent him back to Philadelphia to complete his education, and then admitted him to the firm. Eventually Peter, in whom family affection was strong, collected the whole family in St. Louis.

Long before this Peter Lindell was recognized as one of the most substantial, safe, and enterprising business men of the place. He had built up a splendid fortune on strong common sense, integrity, industry, energy, and temperate business habits. Upon his settling in St. Louis the place was but little better than a town of log cabins, and Lindell, soon after his arrival, created general astonishment by building three brick houses, which were long the wonder of the place.

In that early period, when steamboats were unknown, and when the merchant went East to buy goods, he had to perform a long and fatiguing journey of one thousand miles, either on horseback or by the slow and tedious keel-boat. Lindell had his share of such experiences, which were not, indeed, unfraught with danger. He was then in the prime of a splendid manhood, and his strength and courage were often put to the test in the wild regions through which he was obliged to journey.

He continued as a merchant until 1824, and then turned his attention to the purchase and improvement of property in St. Louis. By buying land at a low figure and holding it for a rise in value as the city grew, the Lindell brothers became enormously rich. On one occasion Peter Lindell purchased for one dollar and seventeen cents an acre two hundred acres of land which is now in the very heart of St. Louis. Jesse died in 1858, leaving his widow two millions of dollars for life; and Peter's estate when he died (in 1861) was thought to be worth six millions of dollars, and was the largest that up to that time had ever been divided in St. Louis. It embraced about forty blocks in the very centre of the business portion of the city, and about twelve hundred acres (unimproved) in the suburbs (West St. Louis), now in the city, and a great part still unimproved.

By that magical power which some men possess, whatever he touched turned to money; and from his great wealth (phenomenal in an age when large accumulations of fortune were comparatively rare) he became almost as well known throughout the West as the great river that washed the city and once floated his boats.

He was, as might be inferred, a public-spirited man. He was one of the incorporators and directors of the old Missouri Insurance Company, and was also one of the directors of the Branch Bank of the United States in 1835. His name is perpetuated in the "Lindell Hotel," the greater part of the block on which it stands having been donated for that purpose by himself and Jesse Lindell. He was also the largest stockholder in the old "Lindell Hotel." In the improvement of his immense estate he built many houses, and dedicated many streets to the public, and was never (as so many land-owners have been) an obstacle to the progress of the city. "Lindell Avenue," the handsomest and most fashionable boulevard in West St. Louis, was named in loving tribute to his memory by his heirs, who, public-spirited like himself, presented it to the city.

In politics Mr. Lindell was an Old-Line Whig as long as the party existed, and then became a Democrat. He was a slaveholder, but was a thoughtful and kind master. He was brought up under Methodist influences, but never connected himself with the church, and never married. Mr. Lindell was a man of great natural warmth of heart, as was evinced by his treatment of less fortunate members of his family. In his business he was scrupulously exact in fulfilling his obligations to others, and insisted with rigor upon his dues from them, yet he was very considerate to the unfortunate but honest debtor, and did many an act of kindness to such of which the world never heard, and of which, also, the living witnesses are now few, for he survived nearly all those who were associated with him in the work of building up St. Louis. Of all his intimate companions only one is left, the honored Henry Shaw.

Born just before the Declaration of Independence was promulgated, he lived to see his country convulsed in the throes of civil war. Despite his great age, he was in harness to the last, personally supervising his large estate and adding to it. He died Oct. 26, 1861, full of honors, closing a long, well-spent life with pious resignation, and was regretted as one of the most unassuming as well as honored and respected citizens of his time. He was buried in his own family burying-ground in the centre of the large farm that had so long been the pride of his manhood and the consolation of his declining years.

long, singularly persistent, and successful business career abound in useful lessons for coming generations, and deserve long to be held in honorable remembrance.

Jesse G. Lindell, whose name is inseparably associated with that of Peter Lindell, his elder brother, was born on the Eastern Shore of Maryland, Dec. 16, 1790. The circumstances under which he was reared may be inferred from the above sketch of Peter Lindell, and, owing to the brotherly generosity and oversight of Peter, he enjoyed the advantages of an ex[illegible] education and received a good start in business life. At Peter's solicitation he removed to St. Louis, and for several years was associated with him in the dry-goods business on Main Street. He brought the energy of youth to the enterprise, and contributed his full share to the great prosperity which attended the wide-spread undertakings of the Lindell brothers. In 1825 he abandoned the mercantile business and engaged in operations in real estate, of which he made large purchases. He was a firm believer in the future of St. Louis, and had the satisfaction of seeing his judgment vindicated by the marvelous rise in values from 1825 to 1850 and later. While he was noted as a shrewd and careful manager, and by his foresight accumulated a large estate, he thought less of making large acquisitions than did his brother Peter, and often, when rallied upon letting a desirable opportunity to make money escape him, would reply that he had real estate enough.

Like Peter Lindell, he was connected with nearly all the important enterprises of the day. His public contributions were numerous and liberal, among the best remembered being the gift by himself and his brother of a large portion of the block on which the Lindell Hotel stands. Besides this princely donation, he subscribed many thousand dollars to the old hotel. He was a director in the old Missouri Bank, the Missouri Pacific Railroad, and many other of the great historic enterprises of his generation; and the recollections of his active and useful citizenship are fresh and vivid, although a quarter of a century has elapsed since he passed away.

On the 14th of December, 1825, Mr. Lindell married Mrs. Jemima Smith, widow of Oliver Smith. This union was childless. Mrs. Lindell is still living, and is fond of relating the interesting experiences of her early life in St. Louis. She is a native of Kentucky, and came with her parents to the city when but six years old. Her family was the [illegible]rth English-speaking one that settled in St. Louis.

Jesse Lindell was of a retired nature, with strongly-marked domestic tastes, and spent the greater portion of his time during the latter years of his life in the rational enjoyments of home, where his warm and genial disposition manifested itself without restraint. His doors were always open to the homeless, and many were the young people whom he thus befriended in the absence of children of his own. He died on the 2d of February, 1858, in the Episcopal faith, of which church he was a communicant.

The gubernatorial election of 1824 excited very great interest in St. Louis. The candidates, Frederick Bates and Gen. William H. Ashley, were men of personal popularity, each of whom had done the State good service. Frederick Bates, long a resident of St. Louis, had discharged the duties of important places under the Territorial government, and was well known and highly esteemed. Gen. Ashley had pushed with daring intrepidity into the wilds of the Rocky Mountains, carrying the trade of the city into unexplored regions, and, awing the savages, had opened profitable fields for the adventurous spirits of St. Louis. Such services among a dashing and enterprising people were calculated to balance the ties of long residence and familiarity with executive duties. The election, however, proved that the substantial virtues of probity and fitness were not to be eclipsed by heroic and romantic adventure. Mr. Bates was elected, but died August 4th of the following year. Abraham J. Williams, president of the Senate, acted as Governor until the special election to fill the vacancy, held in September, at which Gen. John Miller was elected over Col. Rufus Easton, Hon. David Todd, and Wm. C. Carr; and Col. B. H. Reeves was chosen Lieutenant-Governor.

David Barton was re-elected to the United States Senate on the 25th of November, 1824, and John Scott, candidate for Congress, received 5091 votes, against 4258 cast for George F. Strother, and 1125 cast for Hon. Robert Wash. Not one of the votes cast for the three candidates had been given with any expectation of the election of Mr. Adams. Mr. Clay was the favorite in Missouri, and Gen. Jackson numbered many friends both in St. Louis and the State. Missouri had expressed her preference for Mr. Clay, both at the polls and in her electoral college. Twenty-four States then composed the Union, and the confident expectation was that Mr. Adams would receive the votes of twelve States, Jackson those of seven States, and Crawford those of four States, requiring a second ballot. When the appointed day arrived, the expectation of a long and protracted struggle was general, and great was the astonishment and disappointment when John Quincy Adams was declared to have been elected on the first ballot. "It was

evident at a glance that Missouri's representative (Mr. Scott) had disappointed her expectations, and had seized on the pillars of the temple of hope for any other candidate and pulled down the whole fabric, and buried his political life beyond the power of resurrection in Missouri in the débris of the down-fallen political faith."[1] At the election in 1826 Mr. Scott was defeated for Congress by Edward Bates.

The State Legislature met in Jefferson City for the first time on the 20th of November, 1826,[2] and on the 29th of December, Col. Thomas H. Benton was re-elected United States senator.

At the Presidential election of 1828 the candidates for electors were:

Andrew Jackson electors, Dr. John Bull, of Howard; Benjamin O'Fallon, of St. Louis; Ralph Dougherty, of Cape Girardeau.

J. Q. Adams electors, Benjamin H. Reeves, of Howard; Joseph C. Brown, of St. Louis; and John Hall, of Cape Girardeau.

The vote for the Jackson electors was 8272, and for the Adams electors 3400.

Governor John Miller was re-elected, and Daniel Dunklin was elected Lieutenant-Governor.

The State being still entitled to only one congressman, there were three prominent candidates for the position. These were Edward Bates, William Carr Lane, and Spencer Pettis. Mr. Bates was the Whig candidate, and Lane and Pettis the Democratic candidates. So nearly were the friends of Lane and Pettis balanced that the question as to who should run was submitted to Benton, who promptly decided in favor of Pettis, and his election was secured by a large majority.

Thomas H. Benton and David Barton, both residents of St. Louis, still represented Missouri in the Senate of the United States. While these senators did not always agree in political matters, they maintained their respective views so ably, and their characters for sincerity and honesty were so well established with their constituents, that each retained the confidence of his fellow-citizens.

In 1827 or 1828 a meeting was held by Senators Barton and Benton, together with other leading politicians, for the purpose of devising measures looking to the extinction of slavery. The meeting was composed of about an equal number of Democrats and Whigs. It was unanimously agreed that a memorial opposing slavery should be prepared, and that both parties should exert themselves to obtain signatures throughout the State, but the project was defeated, owing to the popular excitement created by the publication in the newspapers of a statement that Arthur Tappan, of New York, had entertained some negro men at his table, and that they had ridden in his carriage with his daughters. The Barton-Benton meeting had taken decisive action in favor of emancipation, which it was hoped might be secured under the leadership of the two great senators, but, owing to the excitement in Missouri caused by the Tappan episode, the idea was abandoned.

In November, 1830, Alexander Buckner was chosen United States senator in place of David Barton, the vote being, Buckner, thirty-four; John Miller, twenty-seven; W. H. Ashley, two.[3]

During the same session the Legislature, in anticipation of an increase of one member of Congress and one elector under the census of 1830, provided for their election. The member of Congress was elected at large, and the electors by districts, as heretofore.

In 1831, ex-Senator David Barton was a candidate for Congress, but was defeated by Spencer Pettis. He was afterwards elected a member of the State Senate from St. Louis County, and served four years.

Mr. Pettis having on the 27th of August following his election lost his life in a duel with Maj. Biddle, the State was left without a representative in Congress. William H. Ashley was elected to the vacancy

[1] Note, Shepard's "History of St. Louis and Missouri," page 76.

[2] The first Legislature, as we have seen, had met in St. Louis in 1820, but the seat of government was afterwards transferred to St. Charles, and thence to Jefferson City.

[3] Alexander Buckner at one time ranked high as a politician in Missouri, particularly in the southern part of the State. He was born in 1785, in Jefferson County, Ky. Little is known of his earlier life, but in 1812 he was in Indiana, had entered the law, and was building up quite a practice. Eight years later he reached Missouri, induced to make this move, it is said, by reason of a duel in which he had become involved. He bought a farm in Cape Girardeau County, practiced law, seldom, however, in the St. Louis courts, and entered the political arena. He was a circuit attorney for a short time. The *Jackson Eagle*, noticing his death, which occurred the 6th of June, 1833, sums up the salient points of his life as follows: "In 1820 he was elected a member of the convention which formed the Constitution of this State; subsequently he was elected to the State Senate, and in 1830 to the House of Representatives; while in that body he was elected to the Senate of the United States, in which capacity he served two sessions. Since the residence of Mr. Buckner in this county he has invariably been elected to every office for which he offered. The loss of Col. Buckner's services in the Senate of the United States will fall with peculiar force on the southern end of this State." The same journal states also that he died of an epidemic which then prevailed extensively, and that his wife, who had premonitory symptoms of the same disease, would not leave his bedside, and cared for him with intense devotion. When he died she yielded to the destroyer, surviving her husband but little over an hour. Col. Buckner was genial, industrious, a good speaker, and in every sense a growing man in his community.

almost without opposition, and was also elected to the next Congress, defeating Robert W. Wells. Gen. Ashley was born in Powhatan County, Virginia, and emigrated to Missouri in 1808, settling near the lead mines. In 1822 he projected the scheme of the "Mountain Expedition," by combining the Indian trade in the Rocky Mountains with the hunting and trapping business. He enlisted about three hundred adventurous men in the business, and after experiencing many reverses and meeting with many romantic adventures he and his associates amassed handsome fortunes. He was the first Lieutenant-Governor of Missouri after its admission as a State, and a Representative in Congress from 1831 to 1837. He died near Boonville, Mo., March 26, 1838.

In 1832, at the August election, Dr. John Bull was the additional congressman elected. The Presidential electors chosen at the November election were Joel H. Haden in the First Electoral District, William Blakey in the Second, John Hume in the Third, and George Bollinger in the Fourth. They cast the vote of the State for Jackson and Van Buren. When the electors in those days failed to attend at the capital to cast the vote, the absence was reported to the Legislature and the vacancy filled by it. The Whig or Clay candidates for electors this year were E. Rutter, P. B. Pratte, B. G. Farrar, and John Wilson.

As elsewhere stated, the veto of the Bank bill by President Jackson, July 10, 1832, created an excitement without parallel in St. Louis, and produced more animated discussions throughout the State than almost any political act that had agitated the public mind since the settlement of the country. A meeting of the citizens of the city and county was at once called to express their disapproval of the action of the President. A large meeting was convened at the courthouse, and among those who participated in the proceedings were some who had been his most sincere friends and supporters for many years. Dr. William Carr Lane presided, and James L. Murray acted as secretary. A committee composed of Edward Bates, Pierre Chouteau, Jr., George Collier, Thornton Grimsley, Henry S. Geyer, and Nathan Ranney was appointed to draft resolutions expressive of the sentiments of the meeting. This committee reported resolutions highly commendatory of the conduct of the officers of the United States Bank and censuring the action of the President. The meeting was addressed by Dr. George W. Call, Frederick Hyatt, Matthew Kerr, Asa Wilgus, Thomas Cohen, and Richard McGill. These extraordinary proceedings attracted the attention of the friends of the President, and called forth counter action in the form of another meeting at the City Hall, over which Dr. Samuel Merry presided, with Absalom Link as vice-president, and Gen. William Milburn as secretary. Col. George F. Strother addressed the meeting in support of the President, and a committee composed of Edward Dobyns, John Shade, James C. Lynch, Llewellyn Brown, B. W. Ayres, John H. Baldwin, and Philip Taylor reported resolutions indorsing his course. President Jackson was sustained by the Missouri members of Congress in ordering the removal of deposits of public money from the United States Bank, and their action was ratified by their constituents.

The "great debate" between Webster and Hayne, in which many other senators participated, took place in 1830, and in it was made the first distinct enunciation of the doctrine of nullification,—*i.e.*, that a State while a member of the Union could by her authorities declare a law of Congress null and void, and forbid its execution within her borders. Its advocates professed to find their authority for the new theory of constitutional law in the nature of the Federal Union, and in the resolutions of 1798 and 1799 of the States of Virginia and Kentucky. The "Foote resolutions," which were the occasion of the "great debate," were offered on the 29th of December, 1829, and from the next day until the 21st of May following were discussed by the senators. The object of the resolutions was to confine the sale of public lands to those already surveyed and brought into market. They were vigorously opposed by Senator Benton of Missouri, on the ground that their passage would check emigration to the new States and Territories and limit their settlement. The senators most familiarly associated with the debate were Hayne, of South Carolina, and Webster, of Massachusetts. The policy of the government as to the disposal of the public lands was discussed from different stand-points, the one view being that it had been just and liberal to the new States, and the other, embracing all the Western senators, that the new States had been treated by the government in the spirit of a task-master. Mr. Hayne having given to his objections the form of an expression to the effect that the very life of our system was the independence of the States, and that no evil was more to be deprecated than the consolidation of the governments, was replied to by Mr. Webster in these famous words,—

"Consolidation!—that perpetual cry of terror and delusion,—consolidation! When gentlemen speak of the effects of a common fund as having a tendency to consolidation, what do they mean? Do they mean, or can they mean anything more than that the union of the States will be strengthened by whatever fur-

nishes inducements to the people to hold together? This is the sense in which the framers of the Constitution use the word consolidation, and in which I adopt and cherish it. They tell us in the letter submitting the Constitution to the consideration of the country that 'in all our deliberations on this subject we kept steadily in our view that which appears to us the greatest interest of every true American,—the consolidation of our Union, in which is involved our prosperity, liberty, safety, perhaps our national existence.' . . . This, sir, is Gen. Washington's consolidation. This is true constitutional consolidation." Mr. Webster also laid down the propositions that the Constitution was not a compact between the States, but a government by the people, in which the Supreme Court was the final arbitrator upon all laws enacted. Mr. Benton thought the power claimed by Mr. Webster for the Supreme Court was no less than a despotic power. That court was called Supreme in reference to inferior courts,—the District and Circuit Courts,—and not in reference to the States of the Union. A power to decide on the Federal constitutionality of the State laws, and to bind the States by the decision, was a power to govern the States.

While the "great debate" ranged over the whole field of constitutional construction it settled nothing, so far as legislation was concerned, the resolution which was the occasion of the debate being merely a matter of regulating land sales. But the principles of constitutional construction announced on both sides became vital and of supreme importance when the tariff of 1832 was under discussion.

The "protective system," against which the doctrine of nullification was directly leveled, took its first decided shape in the tariff of 1816. Calhoun and Lowndes, of South Carolina, were among the most zealous advocates of nullification; Webster and the New England members were equally emphatic in opposition. Clay then, as always afterwards, was in favor of protection. Great excitement was produced at the South, particularly in Georgia and South Carolina, by the tariff discussion and legislation in 1827 and 1828. The popular indignation against the tariff laws found vent through public meetings, the press, and the action of the State Legislatures in terms of extreme violence, and memorials to Congress were adopted entreating that body to "save them, if possible, from the conjoined grasp of usurpation and poverty." The citizens of Columbia and Richland, S. C., in their appeal said, "We exist as a member of the Union merely as an object of taxation. The Northern and Middle States are to be enriched by the plunder of the South." Retaliatory measures were proposed, such as the prohibition of the introduction of horses, mules, hogs, beef, cattle, bacon, and bagging from Ohio, Kentucky, Tennessee, and Indiana; whiskey, beer, cheese, etc., from New York and Pennsylvania; and also the laying of a municipal tax, amounting to prohibition, on all stock in trade, consisting of goods, wares, or merchandise, the produce of those States. As yet these were the mere suggestions of an excited and injured people. No official action by the State was taken until at the session of 1829, when protests from the Legislatures of Georgia and South Carolina against the tariff act of the preceding session were laid before Congress. The slight reductions made in the tariff act of 1831–32 were not unsatisfactory to the friends of protection, and were regarded in the South by the Union party as concessions, but by the State rights party as no less objectionable than the former laws, and the anti-tariff excitement was continued without abatement. Public meetings, especially in South Carolina, the addresses of McDuffie, Hayne, Hamilton, and other high officials, and the acts and proceedings of the Legislature kept the public mind in a state of effervescence.

The Legislature of South Carolina, convened on the 22d of October, 1832, passed an act calling a convention on the third Monday (the 19th) in November. On the 24th an ordinance declaring the tariff act passed by Congress in 1832 null and void was adopted, the action of the Legislature to take effect Feb. 1, 1833. Other ordinances to carry the same into effect, and to protect State officials and citizens in rendering obedience, were also adopted. The intelligence of the passage of the ordinance reached Washington just as President Jackson's message to Congress was delivered. On the 11th of December the famous proclamation combating the doctrine of nullification was issued by the President. Governor Hayne responded in a proclamation reasserting "nullification as a rightful remedy." The President's message of the 16th of January, 1833, suggesting the adoption of measures to meet the crisis, caused the introduction of the "Force Bill." Virginia assumed the office of mediator, and sent Benjamin Watkins Leigh to intercede with the authorities of South Carolina; while Mr. Clay brought forward and secured the passage of "the Compromise" act. South Carolina accepted the measure, and the nullification ordinance was repealed.

The people of St. Louis watched these alarming proceedings with great solicitude. At a meeting of the citizens held at the court-house on Saturday evening, the 29th of December, 1832, the assemblage was called to order by J. Newman. Dr. R. Simpson nominated A. L. Magenis as chairman, and he was

unanimously elected. J. L. Murray was chosen secretary.

H. R. Gamble stated the object of the meeting, and suggested the propriety of a committee to draft resolutions expressive of its opinions and feelings; and on motion it was resolved that a committee of seven should be appointed. The chair named as the persons to compose the committee Dr. G. W. Call, H. S. Geyer, William Milburn, P. Walsh, H. Chouteau, R. Simpson, and J. Newman. Afterwards, on motion of H. L. Hoffman, J. C. Laveille and H. R. Gamble were added.

The committee, after having retired for a short time, returned and reported resolutions, which being before the meeting for its consideration, James S. Mayfield arose, and after a few remarks proposed a preamble and series of resolutions in lieu of those reported. Mr. Mayfield, after his resolutions were seconded, supported their adoption by some further remarks. Dr. R. Simpson said a few words sustaining the resolutions prepared by the committee and against the substitute, and on the question being taken Mr. Mayfield's substitute was rejected.

Dr. J. Woolfolk then proposed a series of resolutions, to be added to those reported by the committee. Their adoption was opposed by Mr. Geyer at some length, and on the question being taken they were rejected.

The following resolutions were then adopted:

"1. *Resolved*, That, in the opinion of this meeting, the present state of affairs in South Carolina exhibits a crisis of fearful interest to the people of the United States, as threatening us, next to the loss of liberty, with the worst of evils, a 'dissolution of the Union.'

"2. *Resolved*, That at a period so full of peril to the republic, so fraught with danger to the cause of civil liberty throughout the world, it becomes the indispensable duty, as it is the undoubted right, of every citizen to express his sentiments on the momentous question now at issue.

"3. *Resolved*, That while we sincerely regret that any portion of our fellow-citizens, whether in South Carolina or elsewhere, should experience, or believe that they experience, serious injury from the course of legislation pursued by the Federal government, we cannot coincide with them as to the expediency or constitutionality of the remedy which they have thought proper to adopt; that we solemnly deprecate the means which have been used to defeat the operation of the laws of the United States, and view with dread and abhorrence the end to which they lead.

"4. *Resolved*, That the power to annul a law of the United States, assumed by one State, is incompatible with the existence of the Union, contradicted expressly by the letter of the Constitution, unauthorised by its spirit, inconsistent with every principle on which it was founded, and destructive of the great object for which it was formed.

"5. *Resolved*, That we concur in the opinion expressed by the President that the Constitution of the United States forms a government, not a league; that each State having expressly parted with so many powers as to constitute, jointly with the other States, a single nation, cannot possess any constitutional right to secede from the Union.

"6. *Resolved*, That in the legal and constitutional discharge of his executive authority in enforcing a just observance of the laws of the Union, the President of the United States at this conjuncture ought to receive the aid and hearty support of every American citizen.

"7. *Resolved*, That, so far as depends on us and our efforts, the Constitution of the United States shall descend as we have received it, uncorrupted by sophistical construction, to our posterity; and the sacrifices of local interest, of State prejudices, of personal animosities that were made to bring it into existence shall again be unreservedly offered for its support.

"8. *Resolved*, That we warmly sympathize with that portion of our countrymen in South Carolina denominated the Union party; that we admire the firmness they have displayed, and have entire confidence that they will remain true to their principles and unshaken in their support of the Constitution of our country.

"9. *Resolved*, That a copy of these resolutions be forwarded to the President of the Senate and Speaker of the House of Representatives of the General Assembly now in session, to be laid before their respective Houses, with the request of this meeting that the Legislature of the State will tender to the President of the United States that support which the State is bound to give and the head of the nation is entitled to receive in the present exigency.

"10. *Resolved*, That a copy of the foregoing resolutions be transmitted to the President of the United States.

"On motion of Mr. Geyer, the tenth resolution was adopted by the meeting and added to the report."[1]

Before the terms of office of President Jackson and Vice-President Calhoun expired it was apparent that these two names would not appear again together on the Democratic ticket. The "caucus" system had been abandoned, and that of the convention adopted. Gen. Jackson's popularity made his renomination certain, and a convention called to select a candidate for the Vice-Presidency assembled in Baltimore in May, 1832, and nominated Van Buren. Mr. Clay was the Presidential candidate of the opposition, with John Sargeant, of Pennsylvania, for Vice-President. The aggregate Democratic vote was overwhelming in every district of Missouri for the Democratic candidates.

Missouri was represented in Congress on the 4th of March, 1833, by Thomas H. Benton and Lewis

[1] In its notice of the meeting the *Republican* (Jan. 1, 1833) said, "The meeting at the court-house on Saturday evening to respond to the sentiments of the President's proclamation was the most numerous ever held in this city. It was composed of citizens of both the late political divisions of the country, and the best spirit, a passionate devotion to the Union, seemed to animate the assembly almost to a man. An attempt was made to substitute a proposition for a general convention of the States, but the resolution for this purpose met the marked disapprobation of the meeting. The resolutions which were adopted express the sentiments of the people of the State at large, and they are mistaken who expect that we can be brought to approve of nullification in any form."

F. Linn in the Senate, and by Wm. H. Ashley and John Bull in the House of Representatives.

Dr. Lewis F. Linn was elected United States senator to succeed Senator Buckner on the death of the latter senator. Dr. Linn was a man of remarkable abilities, and throughout his political career was identified with the interests of the Mississippi Valley, which he advocated with signal ability and success. He was born near Louisville, Ky., Nov. 5, 1796, and was descended from a highly respectable family, who emigrated to Kentucky at a very early period. His mother was born in Carlisle, Pa., and was the sister of George Hunter, who at one time represented Scott County, Mo., in the Legislature. She emigrated to Kentucky, and was first married to Israel Dodge, at the Iron Banks, at that time a military station. She was afterwards married to Ashael Linn, the father of the doctor, who was born in Virginia, and who had emigrated to Kentucky with his father, William Linn. William Linn had rendered important services in the army during the Revolution, having joined it when but fifteen years of age. On his arrival in Kentucky he was elected colonel of a regiment, and afterwards one of the judges of the court, then first organized in the country. When on his way from his station to Louisville, to take his seat at the first court then to be held at that place, he was killed by the Indians, leaving several children, all yet very young. Col. Pope, the father of John Pope, late member of Congress from Kentucky, became the guardian of Ashael Linn. When residing in the family of Col. Pope, an incident occurred which was very near changing the entire destiny of his life. When on a hunting excursion, in company with his older brother, William, and two other young men of the name of Brashear and Wells, they were captured by the Shawnee Indians and taken captives to their village. These four boys remained with the Indians in the interior of the country (now Indiana) upwards of three years, adopting their language, manners, and customs; and indeed Ashael Linn, who was the youngest of the four, had adopted a father and mother, whom he afterwards left with tears of regret. The three older boys finally availed themselves of the favorable moment, when all the warriors of the nation were out on a hunting expedition, to make their escape, taking Ashael with them. To effect this they were, however, compelled to kill the adopted father and mother of Ashael, who had charge of the captives. Ashael Linn often spoke, many years afterwards, of the feelings which he experienced at the time of this occurrence as the most painful he had ever felt in his life. The brave boys, after making their escape from the Indians, had to surmount another great difficulty before they could reach their families. When they got to the Ohio River, opposite to Louisville, they ascertained that they had no means of crossing; and to remain on the other side during the whole night, they ran great risk of being recaptured by the Indians. The three older boys were able to swim, but Ashael was too young, and yet they were unwilling to leave him behind. Having taken a gun with them when they effected their escape, with it they killed a bear, and making a kind of a sack with the skin, they placed Ashael in it, and with grapevines attached to it, they succeeded in swimming over the stream, and pulling the bear-skin with its contents across.

Ashael, on his return to his family, was placed under the care of a carpenter, for the purpose of learning the trade. He lived in Louisville or its environs up to the time of his death, leaving behind him three children, viz., Mary, Lewis, and William. Lewis, at the time of his father's death, was about ten years of age. William died very young, on his way to West Point, to which place he had received the warrant of a cadet. Lewis had the advantage of such schools as were at that early day kept in Louisville, and at the requisite age began the study of medicine under the instruction of Dr. Galt.

His half-brother, Henry Dodge, afterwards delegate from the Territory of Wisconsin, having been appointed by Governor Wilkinson sheriff of Ste. Genevieve County, he was induced to visit Missouri as early as the year 1811 or 1812. He, however, returned to Louisville to finish the study of his profession. When prepared to practice he again went to Missouri and settled in Ste. Genevieve about the year 1815. On his arrival there he was placed by his brother Henry in the office of Dr. Henry Lane, a gentleman eminently skilled in his profession, and with whom he shortly afterwards formed [illegible] nership.

From this time up to the time when he was appointed one of the commissioners under the act of Congress of the 9th of July, 1832, to investigate and report on the French and Spanish claims, he devoted himself with great assiduity both to the study and the practice of his profession. The professional brethren of Dr. Linn all bore testimony to his learning and skill in his profession. For its practice he seemed to have been especially calculated by nature. There is no doubt that he impaired his health and abridged his life by a too close and rigid discharge of the duties of his profession. His reputation extended over the most of the southern counties of the State; he was called upon to visit the sick at all seasons of the year, and

frequently compelled to travel fifty to sixty miles on horseback over rough roads, and not unfrequently in the night. Some time before he abandoned his practice he began to feel his constitution giving way, and he became satisfied of the necessity of changing his mode of life, if not altogether abandoning the practice of his profession. When, therefore, the appointment of commissioner under the act of the 9th of July, 1832, was tendered to him he readily accepted it. Believing that the salary would enable him to remove from Ste. Genevieve to St. Louis, where the practice of medicine would not be so arduous, he accordingly removed to St. Louis in June, 1833, and formed a partnership with Dr. E. H. McCabe. From this time up to October following he devoted himself with great zeal to the discharge of the duties of his office. At the first meeting of the board of commissioners, composed of himself, Hon. Albert G. Harrison, and Frederick R. Conway, it was important to settle the principles which should guide them in the investigation of the titles of the different claimants, and Dr. Linn accordingly introduced ten resolutions, laying down the policy pursued by the Spanish government in the granting of land, and the policy which should be pursued by the government of the United States in the final confirmation of these grants. These resolutions are a monument to his wisdom and liberality, and would alone entitle his memory to be respected by all classes of people. In September, 1833, his old friends at Ste. Genevieve, who were severely afflicted with the cholera, requested him to pay them a visit, and he, in obedience to a call from such a source, abandoned his own business in St. Louis to visit them. He found them in the greatest affliction; the cholera was scattering death among them; he had ventured there for the purpose of administering relief, and to this benevolent object he devoted himself with increasing assiduity. While at Ste. Genevieve he was called to visit the Hon. Alexander Buckner, at Jackson, in the county of Cape Girardeau, who had been prostrated by this fell disease. He arrived there too late; he either found him dead or so far gone as to be beyond the reach of medical skill. He returned immediately to Ste. Genevieve, and it was then his turn to be prostrated with the same terrible disease. He suffered long and acutely, and it is more than probable that his constitution received such a shock at this time as never to have entirely recovered from it. He was, however, appointed by Governor Dunklin, in October of this year (1833), to supply the vacancy in the Senate occasioned by the death of the Hon. Alexander Buckner, and he took his seat in this body at the session of 1833–34. He was elected nearly unanimously at the session of the Legislature of 1834–35, and re-elected by a large majority at the session of 1836–37, and again by a large majority at the session of 1842–43. His services as a senator will long be remembered by the people of Missouri. Although he had never made politics his study, he soon acquired a high and honorable position in the Senate. Firm yet conciliating, candid yet courteous, he sat in that body during a time when party spirit ran higher than at almost any other time in the history of our government; and without abandoning a jot or tittle of the principles upon which he had been elected to that high station, he maintained terms of personal friendship and respect, with one exception, with every member of the Senate.

As a senator, he knew neither friend nor foe, willing alike at all times to serve his constituents, belonging to whatever party they might. His industry was untiring, and it was not confined to the Senate chamber, but extended to the different offices and departments of the government. For the last five years of his life his mind had been much preoccupied with the settlement of the Oregon Territory, and he labored assiduously to promote the organization and settlement of the Territory. He died on the 3d of October, 1843, and on the 11th a meeting was held at the court-house, at which, on motion of Judge James B. Bowlin, Hon. John M. Wimer, mayor of St. Louis, was called to the chair, and Nathaniel Paschall was appointed secretary. In his address on taking the chair, Mayor Wimer characterized the death of Senator Linn "as the greatest loss and the severest chastisement ever inflicted upon St. Louis." On the motion of Lewis V. Bogy, a committee was appointed to draft resolutions of respect to Senator Linn's memory, and during the absence of the committee Senator Benton delivered an address, in which

"He said that great as the grief of all present was, he had more to lament than any one. As a citizen of the State he felt, in common with all other citizens, the sorrow which oppressed their bosoms; as a senator, still having some time to serve, he felt the loss of a colleague from whom he always received the kindest, the most cordial, the most efficient aid; as a friend, he had to lament the loss of one of his earliest friends. He (Mr. Benton) had arrived in Missouri above a quarter of a century ago, while the lamented deceased was still a youth at school, and from the first moment of his arrival had found in him and in all his connections the most generous friendship, never interrupted for an instant, and which never glowed with more warmth than in the last interview a few weeks before, when they spent the day together. The loss of such a colleague and of such a friend was to him the addition of a private to a public loss, and doubled the weight of the grief which he felt.

"The worthy mayor, said Mr. Benton, who presides on this melancholy occasion has opened the subject with just and appropriate remarks. The respectable committee which has been appointed will report resolutions which will cover the merits of the deceased and attest our feelings; and some one of the com-

mittee will doubtless be designated to illustrate with his observations the resolutions which shall be submitted. He would not trench upon his province, but would confine himself to points in the public life and character of his deceased friend and colleague less generally known, but equally honorable to the *man* and the *senator*. He would speak of his generous kindness and amenity, which conciliated good will from all parties, which softened the acerbities of party, which composed many differences, and which flew to the sick-bed of every member without regard to party, and joined the assiduities of nurse and friend to the profound skill of the accomplished physician. He would speak of his punctual attendance in his place and his faithful discharge of every public duty. He would speak of his instant and ready attention to every call from his constituents, whether opponents (for he had no foes) or supporters. He would speak of his success in carrying great measures which could not have been carried by any one save himself. There was a charm in the goodness of his heart, the gentleness of his manner, and the amiability of his temper which gave power to talents, and enabled him to do for his State what none but himself could have done.

"He was not using the language of eulogy, but speaking the words of truth, and saying that which should pass into history. Perhaps the most important measure ever carried in Congress for the benefit of Missouri was the acquisition of that superb territory known as the Platte country,—the lamented Linn was the author of that measure. True, he was supported by his colleague, but they could not have carried it. His colleague in the Senate, older than himself, and who now addresses you, could not have carried it. It required not only sagacity and tact and discretion to carry that great and delicate measure, but it required also the sweetness of temper which wins hearts, and which our deceased friend so eminently possessed. As an historical truth which should be known now and forever to every Missourian, this statement is now made on this solemn occasion to this large and respectable assembly that the knowledge of it may be spread as wide and last as long as the acquisition of the Platte has been auspicious and glorious for the State.

"The old inhabitants of this country,—those who viewed all the new emigrants with such kindness on the change of government, and whose grants of land from Spain and France had in so many instances suffered from want of confirmation,—these old inhabitants, and all claiming under them, owe a debt of gratitude to the illustrious deceased; for to him is owing the passage of the last act of Congress which has done so much towards the final and equitable acknowledgment of these long delayed grants.

"This is not the time, said Mr. Benton, to enumerate the services of the deceased; another occasion will present itself for that act of justice. To mourn the loss of a statesman, a patriot, a friend, a good man—to weep for him rather than to speak of his public acts—is now the feeling of every one. But how can we omit the last great act, as yet unfinished, in which his whole soul was engaged at the time of his death? The bill for the settlement and occupation of Oregon was his; and he carried it through the Senate when his colleague, who now addresses you, could not have done it. This is another historical truth, fit to be made known on this occasion, and which is now declared to this large and respectable assemblage under all the circumstances which impart solemnity to the declaration. He carried that bill through the Senate, and it was the measure of a statesman. Just to the settler, it was wise to the government. The settler has a right to have a home in the new country which he reclaims from the wilderness and the savage; the government of the United States can only save its domain on the Oregon by planting its citizens there. Land is the inducement and the reward to emigration, and that land was granted by the bill, liberally granted to the wife and the children, to the young man and the widow, as well as to the husband and the father. That bill is the vindication and the assertion of the American title against the daring designs of England, and it was the only way to save the country. It was carried through the Senate at the last session, and its author was preparing to carry it again. Called this summer to the Atlantic States on private business, he availed himself of all opportunities to collect fresh materials for the support of his darling measure. The last day that he spent in this town, only three weeks ago, on his return from the East, he spoke of these materials, of the daring pretensions of England, and of his determination to push the measure which was to save the country's rights with renewed vigor at the ensuing session. Alas! that he should not have been spared to put the finishing hand to a measure which was to reward the emigrant, to protect his country, to curb England, and to connect his own name with the foundation of an empire. But it is done, the unfinished work will go on; it will be completed, and the name of Linn will not be forgotten. That name will live and be connected with the Oregon while its banks bear a plant, or its waters roll a wave.

"A great man of the early days of the French Revolution died while he had a great measure depending; it was Mirabeau, who was surprised by death while his bill for the division of estates was still depending before the Legislative Assembly. The terrors of death could not stifle his regard for his bill. He made a bequest of it to a friend. He willed the unfinished work to the celebrated Talleyrand; and this deputy read to the Assembly the speech prepared for the occasion by the great orator, and carried the measure. If inexorable fate had allowed a few minutes to our departed friend, he would doubtless have done the same. Death had no terrors for him, and a moment would have been snatched from the agonizing cares of friends and family to have commended and committed the crowning measure of his life to the faithful hands of a successor. He had not that time,—not a moment to think, nor to speak,—and now the whole representation from Missouri, the whole delegation from the Great West, must constitute themselves his political legatees, take his great measure to themselves and carry it through.

"Mr. Benton would still confine himself to points not so generally known, and among these was the great development of mind which their lamented friend was undergoing at the time of his death. Of the nine years he had served in the Senate, the last two or three were fullest of improvement to himself and benefit to his country. His faculties were maturing every day, and his delivery becoming truly beautiful. Bred to a profession which did not admit of public displays, he required practice to perfect and develop his powers; and practice was doing its part in perfecting genius. A natural gift for speaking was improved into eloquence; a mind originally good was enriched with the acquisitions of study and observation. Thus improved, he spoke without effort, and seemingly without a consciousness of the power and beauty of his own discourse. The Senate listened to him with astonishment and admiration, and some have been heard to exclaim, *the man is inspired*. A few years more would have doubled his powers. That such a man should have perished in the meridian of his days, and so suddenly and unexpectedly, is forever to be deplored. He lay down to sleep a few moments, and awoke no more. It was the sleep of death,—sleep converted into death,—eternal sleep. He died unseen; and he whose skill had saved so many, whose sympathy had carried consolation to so many death-beds was without help and without consolation until the mortal struggle was over and the inanimate clay had become insensible to the efforts of skill or the sorrows of friends and family.

Joel H. Conn

"On another occasion, Mr. Benton said, it would be his privilege to speak more deliberately of the merits of the deceased; at present he only followed the impulses of the heart in giving vent to feelings of sorrow and affection which found a response in all bosoms, and which so many had met this night to manifest."

Mr. Bogy, from the committee for that purpose, reported the following preamble and resolutions for the action of the meeting:

"WHEREAS, the safety and prosperity of our country mainly depend on the virtue and ability of the statesmen and representatives to whom the duties of government and the making of laws are delegated by the people; and wherens, when Providence has removed from amongst us to another and a better world a representative of eminent merit, it becomes our duty to declare in a public and solemn manner our respect for his memory and our sense, with all submission to the Divine Will, of the loss sustained; and whereas an occasion has presented itself of so testifying our sentiments in the sudden death of the Hon. Lewis F. Linn; it is therefore

"*Resolved*, That we have received the sad tidings of the recent sudden decease of the Hon. Lewis F. Linn, one of the senators from this State in the Congress of the United States, with feelings of profound regret, and deplore the event as a public misfortune.

"*Resolved*, That the conduct and deportment of Lewis F. Linn during his too brief existence was distinguished in private and professional life, as in high public station, by a rare combination of qualities, commanding our respect while they won our affections; and that our lamented senator has given to those who shall succeed him in the councils of the nation a salutary and bright example.

"*Resolved*, That in his senatorial action on the relation and interests of these United States and Territories in their whole vast expanse, from the Lake of the Woods to Cape Sable, and from the shores of the Pacific Ocean to the boundary line of Maine and New Brunswick, we acknowledge and appreciate the wisdom, energy, and high sense of national right and honor exhibited by Lewis F. Linn.

"*Resolved*, That the efforts of Lewis F. Linn to obtain justice for that portion of our population whose rights of property were especially guaranteed to them by the treaty of cession of the 30th April, 1803, alone entitle his memory to the respect of every American citizen who can appreciate the value, to the individual or to the mass, of national good faith and honor.

"*Resolved*, That we respectfully tender to the bereaved and afflicted family of our deceased senator the assurance of our sympathies, and that a copy of the proceedings of this meeting be forwarded to his widow by the chairman, with an appropriate letter."

The report having been adopted by the meeting, Gen. Ranney offered a resolution, which was afterwards modified to read as follows:

"*Resolved*, That a committee of three persons be appointed by the chairman, whose duty it shall be to select some person to deliver an appropriate address on the occasion of the death of Senator Linn, and to appoint a time and place for its delivery."

The chair appointed Messrs. Ranney, Hudson, and Bennerhassett to act as this committee.

Judge Lawless, Lewis V. Bogy, and T. B. Holt then in succession addressed the meeting in eloquent eulogiums of the deceased.

At the time of his death Senator Linn left several relatives living in Missouri, among whom was his nephew, the late Joseph H. Conn, one of the best-known merchants of St. Louis. Mr. Conn was also a nephew of Hon. Henry Dodge, who represented Wisconsin in the United States Senate at the time of the death of Senator Linn. Mr. Conn was born in Cincinnati, Ohio, about the year 1816, and was the son of Joseph Conn, who emigrated at an early day from Pennsylvania to Cincinnati. His mother, Nancy Dodge, was a native of Kentucky, and belonged to a family that was ever ready to serve its country in field and council. Her father, Israel Dodge, was of an adventurous type, and left his home in Kentucky about 1800 in search of a wider field of usefulness on the western bank of the Mississippi River. He found a suitable location at Ste. Genevieve, at that time under Spanish domination, and far in advance of St. Louis. In these days of luxurious travel it is almost impossible to fully realize how much of spirit and determination such a journey involved, yet there still remain some descendants of those early pioneers who have heard from their lips recitals of their stirring adventures, which now read like the incidents of romance. The settlement of the country demanded men of a dauntless spirit, and such a man was the elder Conn, who belonged to the class that pluck success from danger, and whose hardy spirit led him to make repeated voyages as early as 1800 down the Mississippi to New Orleans, returning overland to his Ohio home. It seems a small matter now to make this holiday jaunt by steam and rail, but it was a very different undertaking at that far-off day, and required a steady nerve and great endurance to journey alone through those solitary forests, haunted by the wild beast and the wilder Indian. On one occasion the elder Conn and his party, returning from New Orleans, were attacked by Indians and robbed, each escaping with only a blanket.

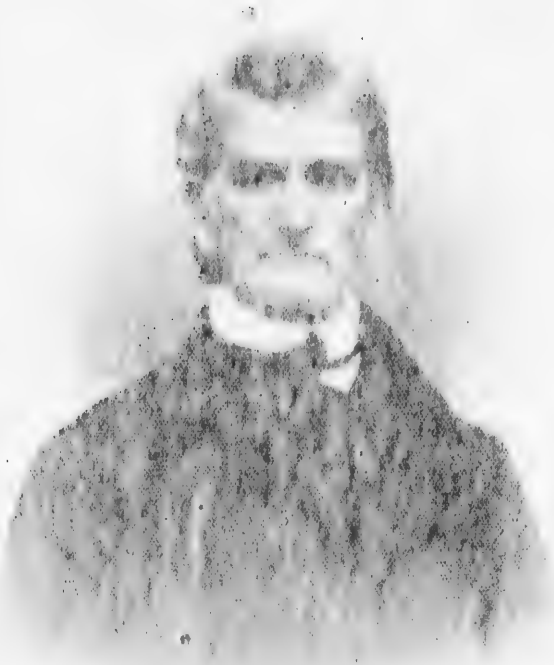
Of Mr. Conn's early life little is recorded. He came to St. Louis in 1835, and for forty years was identified with certain prominent interests of the city. He soon earned a reputation for business integrity and for sincerity and fair dealing which he enjoyed without interruption to the day of his death. He very soon became a member of the firm of Conn, Sprigg & Greene, a large auction and commission enterprise, and afterwards a partner in the house of Anderson & Conn, in the boat stores business, his associate being a son of Maj. William C. Anderson, whose daughter Elizabeth he had married in 1837.

Maj. Anderson was a Cincinnatian who had removed to St. Louis. Subsequently Mr. Conn was a member of the firm of Carter & Conn (Walter R. Carter), who were also in the boat stores business.

Mr. Conn was essentially a business man, and was possessed of more than ordinary abilities. Uniform success attended all his ventures until the later years of his life, when he met with serious reverses. His firm was largely interested in the Red River trade as owners or part owners of some eight or ten vessels plying in those waters, but the sinking or exploding of several of these vessels (which chanced not to be insured) entailed heavy losses on the company and on himself personally.

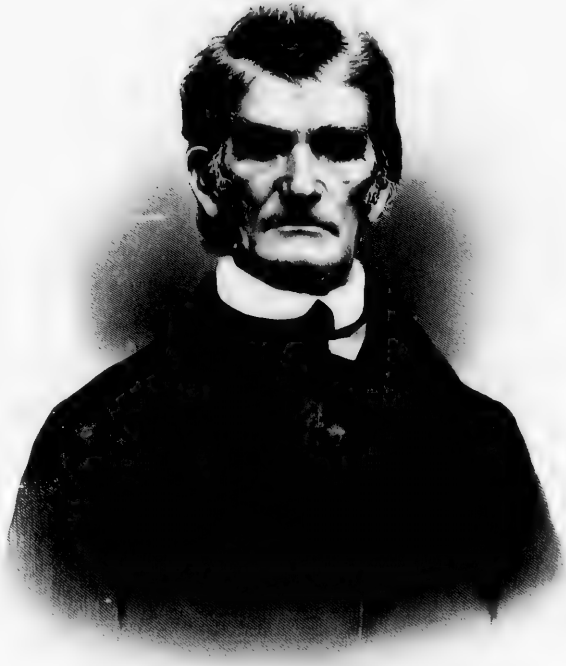
Mr. Conn was a man of no common amiability of character, and this with an ardent temperament and unrestrained geniality caused him to be held in the highest esteem by a very large circle of loving friends. He was of unostentatious character, and never sought place or preferment, and although often urged to accept office, chose rather the private station which he was eminently fitted to adorn. He died suddenly, May 7, 1874, of heart-disease, leaving a wife and six children and several sisters. In politics, Mr. Conn was a lifelong Democrat, and to the very last exhibited the deepest interest in the political questions of the day.

Among the questions in which Missouri was most particularly interested about 1833 was that of the removal of the Indians from her territory. In that part of the State beyond the old west line of Missouri and the Missouri River was included territory that afterwards constituted seven counties, unsurpassed in point of healthfulness, beauty, and fertility, but which was then in the possession of the Indians. The transfer of the savages farther westward was a labor that has had no parallel in the political history of the State. It embraced two propositions, both of which presented obstacles that were generally supposed to be insurmountable,—the one to enlarge the area of slavery by adding to it free territory, and thus to alter the line of the Missouri compromise; and the other to remove the Indians from lands they had just received in exchange for their former possessions to others in a more distant region, where they would have no river like the Missouri to protect their feeble remnants from the incursions of their more powerful neighbors. Notwithstanding these difficulties, such were the indefatigable efforts of the Missouri delegation in Congress that they succeeded in accomplishing the task, and in enlarging the area of slavery without exciting the animosities of its enemies. In 1836 the Senate confirmed the Indian treaty, by which Missouri was freed from the presence of the savage tribes within her borders.



In 1834, William H. Ashley (anti-Van Buren) and William H. Harrison (Van Buren) were elected to Congress, defeating James H. Birch (anti-Van Buren) and George F. Strother (Van Buren).

In 1835 the Legislature again redistricted the State into four electoral districts, and being in doubt as to the number of electors to which the State might be entitled in the new apportionment under the census of 1835, authorized the Governor to redistrict it, if necessary to do so, between then and the general election. This authority has been continued in the statutes of the State ever since, although the purposes of it have long since ceased to exist. It is found in the present statutes, and is numbered Section 5120. The Governor never had any authority to district the State into congressional districts, nor did he at this or any other time divide it into electoral districts. This act and section, after the passage of the act of 1864, became a nullity, then as now.



In 1836, Albert G. Harrison and John Miller were elected to Congress. George F. Bollinger was chosen elector in the First Electoral District, Abraham Bird in the Second, John Sappington in the Third, and William Monroe in the Fourth. They cast the vote of the State for Van Buren and Johnson.

John Sappington, who was thus chosen Presidential elector, was a prominent figure in the political and social affairs of St. Louis at this time. At a very early period John and James Sappington came from England and settled in Maryland. John Sappington (2d) removed to Kentucky, and there John Sappington (3d), the subject of this sketch, was born May 28, 1790. He was one of a family of eighteen children, one of whom died young. The seventeen others became heads of families in Missouri, to which State they came with their father in 1806, settling on a tract of six hundred and forty acres which he purchased in Carondelet township.

On arriving at his majority, Mr. Sappington purchased the tract of land on which his son, Thomas J. Sappington, now resides, near Sappington post-office. He subsequently added to this other tracts, amounting in all to two thousand acres, all of which is owned by his five surviving children. In 1815 he established on his farm a tannery, the capacity of which was increased until it came to have thirty vats, and which he conducted in connection with his farm until 1845, when he discontinued the business of tanning and devoted himself to farming alone during the remainder of his life. As a farmer he was highly suc-

mies. In 1836 the Senate confirmed the Indian mainder of his life. As a farmer he was highly suc-

John T. Thompson

s a farmer he was highly suc-

cessful, and in 1859 received from the St. Louis Agricultural and Mechanical Association a premium for "the model farm."

In the war of 1812 he was a volunteer, under Col. Nathan Boone, son of Daniel Boone, the Kentucky pioneer, and was the first one of the fifteen hundred horsemen to plunge into the Mississippi River and lead the way across to Illinois, whither they went to join Governor Edwards. He was held in high esteem by Governor Howard, and was one of the trusty scouts who were sent in advance of the army to detect ambush and apprise it of danger.

He always felt a deep interest in the advancement of agriculture, and was active in the organization of the Agricultural and Mechanical Association. He was a Whig in politics, and was three times chosen to represent St. Louis County in the State Legislature, his services in which body met the entire approbation of his constituents.

He was married Jan. 8, 1815, to Miss Sarah Wells, daughter of Joseph Wells, of Carondelet. They had eleven children, of whom five, Tyrie Sappington, Mrs. Elizabeth Manro, Mrs. Jemima Sternhauer, Mrs. Mary Long, and Thomas J. Sappington are now living.

Mr. Sappington died March 17, 1864. His wife had died on the 31st of August, 1861.

John F. Long, who married Mary Nelson, daughter of Hon. John Sappington, is a member of a family which for many years has been conspicuously identified with the business and social interests of St. Louis, and has occupied many positions of trust and honor under the municipal government. Mr. Long has filled the offices of chief of police, county marshal, general superintendent of roads and bridges (for eight years), member of the City Council and of the school board, judge of the county court, and surveyor and collector of customs, in all of which he has acquitted himself honorably and to the satisfaction of all good citizens. His amiable wife is a member of the Second Baptist Church, and Mr. Long of the Compton Avenue Presbyterian Church.

The pioneer of the Long family in St. Louis was Capt. John Long, one of the earliest residents of the town. He was born in Port Royal, Va., in 1755, was a soldier in the Revolutionary war under Gen. Lafayette, and engaged in the battle of Brandywine. In 1781 he married Elizabeth Bennet, of Philadelphia, and raised a family of four children,—Isabella, wife of Capt. James Mackey; Nancy, wife of Eli Musick; William S., and John Long. After the Revolutionary war Capt. Long was commander of the vessel "Dolphin," which plied between Philadelphia and Liverpool some five years. In 1794 he removed with his family to Kentucky, and in the fall of 1796 with several other families removed to St. Louis and settled upon Spanish grant No. 415, near Bonhomme, issued by Don Zeñon Trudeau, Spanish commandant at that time. St. Louis was then a small village of Spanish, French, and Canadians, numbering some seven hundred inhabitants, and the dwellings were nearly all of logs or poles set on end and covered with boards, the openings being plastered with prairie-grass and mud. The out-houses and barns were thatched with straw. A few stone and some frame houses were also standing.

In 1807 he removed to Gravois, on survey No. 9, where he led the life of a farmer until 1826, when he died. His associates comprised many of the generous and noble-hearted French residents,—the Chouteaus, Soulards, Cerrés, Sarpys, Gratiots, Dr. Saugrain, the Lucases, etc., together with the Kents, Conways, Eastons, and Carrs. During Gen. Lafayette's visit to St. Louis in 1825, John Long, in company with many others, called upon him, and the reception accorded them by the general was of the most cordial character. Deep feeling was exhibited on the one side, and affectionate respect and gratitude for the venerable soldier and statesman on the other, eliciting tears from both parties. John Long was widely known as a man of honesty and integrity, and as one whose life was above reproach.

William S. Long, his son, was born Feb. 20, 1789, in Virginia, and with his father's family arrived in St. Louis in 1796. In July, 1808, he married Elizabeth Sappington, daughter of John Sappington, also a Revolutionary soldier under Gen. Greene. He located upon a part of survey No. 9, where he erected a comfortable frame house, still standing, and now owned by Gen. Grant, and known as White Haven. In 1813 he volunteered as a soldier under Gen. McNair, was appointed a lieutenant, and fought the Indians in Illinois and Missouri, from Cap Au Gris to Fort Madison and Sutro Island. In 1818 he purchased of Antoine Soulard survey No. 373, on the Maramec River, established a farm, and laid out the town of Fenton. In 1820 he removed with his family back to a part of survey No. 9 and fractional section 17, where he successfully cultivated a large farm, on which was situated a spacious and comfortable house, always open to his relatives and friends. Among the latter were the Soulards, Cerrés, Saugrains, Chouteaus, Sublettes, Bateses, Geyers, Gambles, Bentons, Bloods, Von Phuls, Hawkses, Browns, Dr. Simpson, etc. William S. Long's recollection of the early times and events in St. Louis was remarkably vivid, and he could relate incidents with great precision

and rare humor. Among other reminiscences of the early period he was wont to state that the French wagons and carts for hauling produce, wood, or other articles were destitute of iron, not a tire, band, pin, or nail of iron being used in the whole structure. They oiled the axles with tallow or bear's grease. There were, however, some fine two-wheeled gigs (iron-bound) from Pittsburgh, owned by Dr. Saugrain, Judge Lucas, and the Chouteaus, and used for riding and the doctor's medical practice. During the cholera scourge of 1849, Mr. Long visited a sick friend in the city, and a few days after was attacked with that disease. His wife was also taken ill, and died on the 3d, he on the 9th, his daughter, Mrs. Dr. Brown, on the 10th, and his son's wife, Mrs. H. S. Long, on the 14th of July, 1849. His children then living were Mrs. Ritchey, Harrison L., Mrs. J. Long, John F., Mrs. Berry, Thomas S., Mrs. T. E. Wright, and Miss Marion, afterwards Mrs. Brown.

Lilburn W. Boggs was elected Governor by the Democrats over William H. Ashley, the Whig candidate, by a vote of 14,815 to 13,057.

In anticipation of a visit from Daniel Webster, the friends of that statesman in St. Louis held a meeting at Masonic Hall on the 11th of June, 1837, for the purpose of making arrangements for his reception. William S. Johnson called the meeting to order, and Jonathan Thompson was elected chairman. The following persons were chosen vice-presidents: John I. Lanagh, John Barstow, Egbert Benson, James H. Braine, Jacob Drake, Samuel Roome, Joseph N. Lord, J. G. Rapelje, John Remick, Barzillai Wyer, Farris Finch, Nathaniel Weed, William Bakewell, Joseph Tucker, Richard Barnes, Edward Dayton, Charles Colgate. Thomas Fessenden and William P. Disosway were appointed secretaries.

In accordance with resolutions adopted by the meeting, when it was known that the steamboat "Robert Morris," on which Mr. Webster was expected, had passed the mouth of the Ohio, a committee appointed for the purpose proceeded to meet him on the steamboat "H. L. Kenney." At a point below Jefferson Barracks the committee boarded the "Morris," and were introduced to Mr. Webster. The two steamers then proceeded to Market Street landing, where Mr. Webster and his family were escorted to the National Hotel, afterwards the St. Clair Hotel, where they spent several days. The admiration entertained for Mr. Webster by the people of St. Louis was attested by one of the grandest demonstrations that ever took place in this country in honor of any public man. On June 13th, in a beautiful grove, where the Lucas Market was afterwards located, over five thousand persons assembled at a "barbecue" to which Mr. Webster had been invited by a committee composed of R. Wash, H. S. Geyer, Beverly Allen, and others. Col. Charles Keemle acted as chief marshal, assisted by a number of aids, and Gen. Ashley presided, with Richard Graham, William Carr Lane, John B. Sarpy, John Perry, James Clemens, Jr., and James Russell as vice-presidents. Mr. Webster was present, and acknowledged the honor done him in a speech of unusual power and felicity of expression. "He was frequently cheered by the enthusiastic crowd, who in their frenzy seemed desirous of bearing him aloft, if not to the skies, at least as high as their hands could carry him, and were only restrained from attempting it by a desire to have him continue the flood from the same fountain."[1] From St. Louis Mr. Webster went to Alton, Ill., being accompanied by a committee from both cities.

Among those at this time who took a gentleman's earnest part in politics, and were deeply and actively interested in the guidance of party ends and aims, but without seeking or looking for office, was John B. Sarpy, then one of the most active, influential, and enterprising citizens of St. Louis. He was an "Old-Line" Whig of deep and strong convictions, like Peter Lindell, Thornton Grimsley, James G. Soulard, Henry Von Phul, Col. John O'Fallon, and so many more of the prominent business men of St. Louis in those good old times, and we find his name in connection with many of the leading political movements of the period. Mr. Sarpy was a warm personal and political friend of Henry Clay, Daniel Webster, and many other distinguished men of his day, some of whom made his house their home when visiting St. Louis. Besides being a vice-president at the great festival and barbecue given in honor of Daniel Webster's visit to St. Louis in 1837, he was the next year a prominent member and worker of the famous Whig "Vigilance Committee" which "organized victory" for William Henry Harrison in 1840. John B. Sarpy's paternal grandparents, Charles Sarpy and wife, whose maiden name was Suzanne Trenty, were residents of Fumel, near Agen, on the river Garonne, which in the days of the *ancien régime* formed part of the province of Gascony, in France. Gregoire Berald Sarpy, the father of John B. Sarpy, born at the above place in the year 1764, was one of several brothers, two of whom, John B. and Silvestre D., had preceded him to Louisiana, where John B., the eldest, was established as a merchant in New Orleans prior to the founding of St. Louis in 1764.

[1] Shepard's History of St. Louis, MS., p. 137.

This John B. Sarpy came up to St. Louis in 1766, and was one of the earliest merchants of the place, being extensively engaged in business here for a period exceeding twenty years. He never married, and eventually returned to New Orleans, where he died in 1798. Silvestre Delor followed his brother to St. Louis some years thereafter, remaining here but a comparatively brief period, and then returned to New Orleans, where he married, and at his death, in 1799, left several children, two of his daughters having become the wives of the two brothers Burthe, from Paris, prominent gentlemen of New Orleans in the old French days. About the year 1786–87 a third brother of the above Gregoire, Pierre Lestamp Sarpy, arrived in St. Louis, and died Oct. 8, 1788, at the age of thirty-three years.

Gregoire Berald Sarpy (born in 1764), father of John B. Sarpy, came to St. Louis about the year 1786, a young man of twenty-two years, married in 1797 at thirty-three, and died May 15, 1824, aged sixty years.

In addition to these four brothers, who came at different periods to St. Louis, a fifth one, J. B. Lille Sarpy, was in New Orleans in the year 1809; and a sixth, Pierre St. Marc Sarpy, together with four sisters, Madames Suzanne D'Alverny, Thérèse Noirit, Helène Lanausse, and Marie Laporte, spent their lives in their native France.

On the mother's side, John B. Sarpy was a great-grandson of Madame Marie Thérèse Chouteau, *née* Bourgeois, the first white lady that settled in St. Louis in 1764, his descent from this lady being as follows:

Silvestre Labbadie, Sr., son of Dominique Labbadie and Anne Baclac, his wife, was born in the parish of St. Jean, town of Farbes, capital of Bearn, an ancient province of the south of France. He was an early merchant of St. Louis, and married Pelagie Chouteau, the eldest daughter of Madame Chouteau, on July 27, 1776. They were the parents of the following children:

1. Emilie Sauveur, born in 1778, married to Bernard Pratte, 1794.

2. Pelagie, born in 1780, married to Gregoire Sarpy, 1797.

3. Silvestre, born in 1785, married to Victor Gratiot, 1807.

4. A son, born in 1787, died in 1790, aged three years.

5. Auguste, born in 1788, died in 1794, aged six years.

6. Marie Anne Sophie, born in 1790, married to Aug. P. Chouteau in 1809.

7. Marie Antoinette, born in 1793; married, first, to John W. Honey in 1810; secondly, to John Little in 1816.

Silvestre Labbadie, Sr., died June 18, 1794, at the age of about forty-three years, but a short month following the marriage of his eldest daughter, Emilie, leaving his six children all minors. He left quite a handsome estate for those days, which he had acquired in a successful business career of some twenty years. His widow survived him about eighteen years, and died June 6, 1812, at the age of about fifty-five years.

Gregoire Berald Sarpy, as stated above, was married to Pelagie, the second daughter of the foregoing Silvestre Labbadie, Sr., and his wife, Pelagie Chouteau, on May 1, 1797. Their children were,—

1. John B. Sarpy, born Jan. 12, 1798.
2. Susanne, born Oct. 28, 1800, died young.[1]
3. Pierre Abadie, born in 1805, died unmarried.
4. Thomas Lestang, born in 1810, and some others who died in infancy.

John Baptiste Sarpy, son of Gregoire Sarpy and his wife Pelagie, aged twenty-two years, was married to Adèle, daughter of John P. Cabanné, and his wife, Julie Gratiot, aged fifteen years, on Sept. 14, 1820. They were the parents of some five or six children. Mrs. Adèle Sarpy died March 27, 1832, at the early age of twenty-seven years, leaving but one surviving child, a daughter.

After a few years of widowhood John B. Sarpy married his second wife, Martha Jane, daughter of James Russell, of Oak Hill, St. Louis Co. They were married April 14, 1835, by the Rev. William S. Potts, pastor of the First Presbyterian Church of St. Louis.

This lady died in New Orleans in the winter of 1845–46. Her remains were brought up to St. Louis and interred in the Catholic cemetery at the corner of Jefferson and Franklin Avenues, and subsequently removed to Calvary Cemetery.

John B. Sarpy survived his second wife about eleven years, dying at his residence at the northeast corner of Olive and Sixth Streets on April 1, 1857, in his sixtieth year, leaving by this second wife two children,—

1. John Russell Sarpy, who died unmarried in France in the year 1868. His body was brought to St. Louis in 1869 by his half-sister, Mrs. Virginia

[1] John B. Sarpy, his sister Susanne, and the first child of John P. Cabanné, named after his sponsor, Baptiste Gregoire, born Feb. 8, 1800, were all baptized at one ceremony on Feb. 22, 1801, by Father Janin, the parish curate.—*Cathedral Register.*

Berthold, and interred in his father's family lot in Calvary Cemetery.

2. Julia Anne Adèle, present wife of Col. James Lowry Donaldson Morrison, to whom she was married April 10, 1861, by Rev. F. J. Garesché, S.J.

Mr. Sarpy left a large and productive estate to his surviving children.

John B. Sarpy entered very early into business, and continued an active and energetic man of affairs for forty years, during which time he was prominently identified with the leading enterprises of the young and growing city. It was the custom of the merchants of those days to take an active part in the volunteer fire companies and the volunteer militia, and Mr. Sarpy was a fireman in the old Union Volunteer Fire Company No. 2, and being an accomplished and skillful horseman, and fond to enthusiasm of the saddle, he became a member also of Capt. Gabriel Paul's troop of horse, "the St. Louis Chasseurs," at one time the pride and boast of the city. He was from the beginning a leader in benevolent and charitable undertakings, and his name is most frequently found in the old subscription lists at those times when "the cheerful giver" whom the Lord loves is also in particular request among men.

Mr. Sarpy, in 1817, when only nineteen years old, became the partner of Auguste P. Chouteau and Julius DeMun in the fur trade. These young men had been upon a fur-hunting and trading adventure to Santa Fé, and were taken prisoners and detained some time in confinement in Chihuahua. Upon their return to St. Louis they succeeded to the business of the firm of Berthold & Chouteau, which expired by limitation, taking the brick house occupied by that firm, the first brick building erected in St. Louis, under the firm-name of Chouteau, DeMun & Sarpy. In 1819 the firm was Chouteau & Sarpy, and the place of business the building next to "the Indian council house," adjoining the residence of Sarpy's father, Gregoire.

The next year he was married, and in 1821 he is named in Paxton's first St. Louis directory as a "merchant, place of business 11 North Main Street." Continuing here for some years, Mr. Sarpy finally associated himself with Pierre Chouteau, Jr., and Joseph A. Sire, at first as clerk, afterwards partner in the firm of "P. Chouteau, Jr., & Co.," for many years the most eminent house in the West, if not in the whole country, in the fur trade. John Jacob Astor at one time was a member of this firm, which, indeed, was the Missouri and the American Fur Company, rivaled only by the Hudson's Bay, the Northwestern and the Rocky Mountain Company, the last of which was a home competitor for this lucrative trade, sometimes under the conduct of Manuel Lisa and Sublette, sometimes under Gen. Ashley and Maj. Ben O'Fallon.

Mr. Sarpy, at this time in the prime and vigor of early manhood, was a man of striking and handsome presence, active, well knit, sinewy, and shapely figure, of a little above medium height, erect, and sitting his horse like a centaur. He became the financial manager of the wealthy firm with which the best part of his active life was spent, and which owed so much of its wealth and its extensive business operations and connections to his management, and the steadfast, unremitting energy, fidelity, integrity, and tact and judgment with which he conducted its affairs. The company gradually came to depend upon Mr. Sarpy to manage all its internal concerns, just as it looked to Pierre Chouteau for the management of its external relations, and no great concern was ever better served than it, with Pierre Chouteau in the Rocky Mountains, at Fort Pierre, or Berthold, or Benton, or Casper, or at O'Fallon's Bluff or South Pass, while J. B. Sarpy kept the counting-room in order at home. One by one the partners died,—Berthold in 1831, Pratte in 1837, John P. Cabanné in 1841,—and the younger men who came in to take their places, Joseph A. Sire and John F. A. Sanford, would naturally defer more and more to the tried and skillful judgment of their seniors.

The community had learned to trust and respect Mr. Sarpy, as his business partners did, and to consult him in public matters of importance.

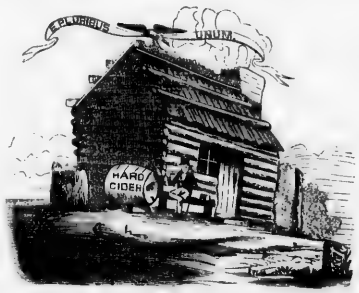
In 1839 John B. Sarpy and George Collier[1] were lected aldermen to represent the Third Ward in the Municipal Council, and they both served with great acceptability to their fellow-citizens, but could not be prevailed upon to serve for another term. The name of Mr. Sarpy is now preserved in Sarpy Avenue, St. Louis.

[1] George Collier was born on the Eastern Shore of Maryland, on the 17th of March, 1796, and arrived in Missouri in 1816, whither he had been preceded by an elder brother, John Collier. He settled in St. Charles, and conducted a mercantile business in a limited way. In 1827 he removed to St. Louis, where he became a large and successful merchant. About five years before his death, which occurred in July, 1852, he retired from active business life, and occupied himself chiefly in the erection of buildings and in superintending his large estate. Mr. Collier was married twice,—the first time to a daughter of James Morrison, of St. Charles, by whom he had two children, who survived him, and the second time to a daughter of John Bell, of Pittsburgh. The fruit of the latter marriage was five children. He left a fortune estimated at one million two hundred thousand dollars, which in those days was considered an enormous sum. The bulk of his estate was left to his wife and

Berthold, and interred in his father's family lot in | of which was a home competitor for this lucrative

or for this lucrative

At the time of the great flood in 1844 he was given a prominent place upon the advisory and relief committees. In 1846, when the Missouri volunteers were starting out to fight the battles of their country in Mexico, Mr. Sarpy was one of the most prominent of the subscribers to the fund for equipping and supplying these gallant soldiers. He had always been conspicuous for his interest in public improvements and the development of internal communication and transportation facilities. He was one of the founders of the Missouri Pacific Railroad. The first memorial to Congress in 1850 on this subject, asking for a land grant and the right of way through the public lands of Missouri, and the first list of incorporators both contain the name of John B. Sarpy, along with O'Fallon, Page, Meier, Brant, Lucas, Walsh, Yeatman, Wayman Crow, Collier, P. Chouteau, Jr., Campbell, Henry Shaw, Pratte, Angelrodt, and Benoist. It was among these men that Mr. Sarpy properly stood as a merchant, and as prominent as any of them. Unhappily he did not live to see the completion of this great railroad enterprise, the advancement of which he had so much at heart. Several years before his death, owing to the infirm state of his health, he retired from active business.



Mr. Sarpy was a man of very domestic habits and regular life. The time he could spare from his business, to which he was faithfully attentive, was devoted to his family, and he knew no higher pleasure nor wanted one more exciting than the quiet enjoyment of fireside comfort. His social qualities were of a superior order, but he never cared to display them except in that small inner circle of close friends whom he admitted to his intimacy. His home was the centre of his affections and of his daily life. He had three residences during his life in St. Louis besides his father's house, in which his youth was spent. In 1826 he bought a lot of forty feet front on Main Street, south of Vine Street, from John B. Cabanné. On this he built two store-houses, occupying the upper part of the building, as was then the custom, as his own residence. Ten years later he bought a fourth of block No. 117 from Peter Ferguson, and built on it, on the southeast corner of Olive and Sixth Streets, a large mansion of brick, a double house, fifty feet front, and having extensive back-buildings and domestic offices. Into this building he moved, and continued to make it his residence until the time of his death.

Only two daughters survive of Mr. Sarpy's numerous children,—Virginia, first the wife of Frederick Berthold, deceased, of St. Louis, and at present married to Armand Peugnet, residing in France, and Julia Anne Adèle, wife of Col. J. L. D. Morrison, one of the leading lawyers of the St. Louis bar.

In 1838, Messrs. Harrison and Miller were re-elected to Congress over Beverly Allen and John Wilson, Whigs. Mr. Harrison died before the expiration of his term. In 1839, John Jamison was elected to the vacancy over Thornton Grimsley, Whig. Van Buren and Johnson electors were chosen this year.

In 1840, John Miller and John C. Edwards were elected on the Democratic ticket to Congress, defeating E. M. Samuel and George C. Sibley, Whigs. Under the census of this year the State became entitled to five members of Congress.

In this year the carnival of mimic log cabins, cider barrels, gourds, coon skins, stag's antlers, beaver-traps, hunting shirts, etc., made so familiar by the Whigs in

WHIG LOG CABIN.

the Harrison campaign, overran the surface of St. Louis politics, but the State held fast to the Democratic party and cast her vote for Van Buren. A "log cabin" was erected by the Whigs on the square in

children, but he also bequeathed ten thousand dollars to the Methodist Episcopal Church South for the St. Charles College, and five thousand dollars to the Protestant Orphan Asylum. Bequests of various sums of from one thousand to ten thousand dollars were also made to different relatives and friends. During life Mr. Collier studiously avoided all ostentation, and in his will requested that his remains might be interred decently without vain display, enjoining upon his executors that there should be no extravagant adornment of his last resting-place, and that the cost of the monument erected to his memory should be limited to two thousand five hundred dollars. Mr. Collier's bequests to charitable objects by no means represented the amount of good of which he was the willing and cheerful instrument, for throughout his business career he was a ready and generous contributor to objects which he considered worthy of his benefactions. He was especially liberal in his donations to St. Charles' College, even before the acquirement of great wealth had made such contributions not only a pleasant but an easy task. On the 22d of February, 1868, Mr. Collier's sons—John P., William B., M. Dwight, and Thomas F. Collier—presented the sum of twenty-five thousand dollars to Washington University as a permanent endowment.

front of Mrs. Ashley's mansion, and the enthusiastic chronicler adds that "they have great pleasure in testifying to the warm encouragement Mrs. Ashley gave to the proposed celebration."[1] Hon. Thomas H. Benton said, "Log cabins, coon skins, and hard cider were taken as symbols of the Whig party, and to show its identification with the poorest and humblest of the people; and these cabins were actually raised in the public parts of the richest cities, ornamented with coon-skins after the fashion of frontier huts, and cider drunk in them out of gourds in the public meetings which gathered about them, and the virtues of these cabins, these skins, and this cider were celebrated by traveling and stationary orators. The whole country was put into commotion by traveling parties and public gatherings. Steamboats and all public conveyances were crowded with parties singing doggerel ballads made for the occasion, accompanied with the music of drums, fifes, and fiddles, and incited by incessant speaking. A system of public gatherings was got up, which pervaded every State, county, and town, which took place by day and by night, accompanied by every preparation to excite, and many of which gatherings were truly enormous in their numbers, only to be estimated by the acre, attempts at counting or computing such masses being out of the question."

Nathaniel Paschall and Charles G. Ramsey, in their newspaper, the *New Era*, rendered effective aid to the Whig party, already elated with its success at the municipal election in the month of April, 1840, at which the Hon. John F. Darby had been re-elected mayor.[2]

At the election in the fall of this year, Thomas Reynolds was elected Governor over John B. Clark, the vote standing 29,625 for Reynolds and 22,212 for Clark, and M. M. Marmaduke was chosen Lieutenant-Governor. The Democrats elected a decided majority of the members of the Legislature, but St. Louis sent a Whig delegation. The electoral vote of the State was cast for Martin Van Buren for President.[3]

In 1842, James M. Hughes, James H. Relfe, James B. Bowlin, and G. M. Brown were the congressmen elected. They were really the only candidates. Some votes were cast for John P. Campbell, W. Ranney, and William Gilpin, Whigs. There being some question raised as to the legality of electing the congressman at large under the congressional apportionment bill, the Whigs declined to make any nominations for Congress this year. The apportionment under the census of 1840 had been delayed until 1842, and then the act was so framed that there was much difficulty in determining what would be proper to do at the approaching election, as the State had not been divided into districts corresponding in number with her then apportionment. However, the election was ordered under the existing general ticket system. The ballot system was adopted in the same year.[4]

In 1843, David R. Atchison was elected United States senator from Missouri, and continued to serve until 1855.

In 1844, for Congress, the "Hards" or Benton Democrats nominated John S. Phelps, who received in the election which followed, 36,023 votes; Sterling Price, 35,128; James H. Relfe, 35,100; James B. Bowlin, 35,550; and D. C. M. Parsons, 18,850. Mr. Parsons died a short time before the election, which accounts for his small vote and the election of

[1] Republican, April 27, 1840.

[2] In the month of May of this year the laboring population of St. Louis forced upon their employers the adoption of the ten-hour system. The movement originated with the bricklayers, but soon extended until it embraced the journeymen of all trades.

[3] The Native American association nominated in 1841 the following ticket for the General Assembly as candidates for the August election: For senators, Adam L. Mills, Presley Cordell; for representatives, John Simonds, David B. Hill, Alfred Tracy, Thomas Sappington, Oley Williams, George H. Lanham, Fremon Delaurie.

The ticket stood politically divided thus: the two senators and four representatives were Whigs, and the three others were Democrats.—*Republican*, Dec. 4, 1841.

[4] Among the members of the State Legislature in 1842 was William Shields, who represented Cooper County in the House of Representatives. He was born on the 18th of February, 1808, married Miss Ann O'B. McIntyre, in Virginia, Nov. 6, 1831, emigrated to Missouri in 1836, and settled at Boonville. After serving in the House, he represented the district of which his county formed part from 1844 to 1848, and in 1845 was sent as a delegate from his county to the State Constitutional Convention. In 1856 he was selected as one of the delegates from Missouri to the National Democratic Convention, and at the breaking out of the war espoused the cause of the Southern Confederacy. For some years prior to 1860 he had been engaged in the banking business at Lexington, and when war between the States became imminent he was appointed by Governor Jackson fund commissioner and paymaster-general of the State forces. At the close of the war he made his home in St. Louis, and became the secretary of the Atlas Fire Insurance Company. Subsequently he was appointed cashier of the Western Savings-Bank, and afterwards cashier of the Union National Bank and finally receiver. In 1874 he was elected city auditor. In 1877 he was appointed by Mayor Overstolz collector and assessor of water rates, which office he retained until his death, the latter occurring Dec. 30, 1878. The deceased left a widow, four children, and nineteen grandchildren. The children were Capt. Thomas W. Shields, of St. Louis; Mrs. H. E. O'Bannon, of St. Louis; Mrs. A. M. Elliott, of Pettis County, Mo.; and Mrs. H. M. Hatch, of Galveston, Texas.

L. H. Simms, the leading candidate on the "Soft" or Calhoun ticket. Simms' associates on the "Soft" ticket were Thomas B. Hudson, Augustus Jones, Ralph Boone, and J. Thornton. The vote for this ticket averaged from 27,000 to 29,000. The Whigs had no candidates, but generally voted for the candidates on the "Soft" ticket. Gen. Price having resigned to go to Mexico, the vacancy was filled by the election of William McDaniel, Democrat. The seven votes of this State this year were cast for Polk and Dallas. At this election the vote cast in St. Louis was the greatest ever given at any election there. The whole number of votes was 4869.

In 1845 the Legislature changed the mode previously followed for the election of members of Congress, and divided the State for the first time into congressional districts as follows: First District, the counties of St. Louis, Jefferson, St. François, Ste. Genevieve, Perry, Madison, Shannon, Cape Girardeau, Wayne, Stoddard, Scott, New Madrid, and Ripley; Second, Marion, Ralls, Pike, Audrain, Callaway, Montgomery, Lincoln, Warren, St. Charles, Franklin, Gasconade, Osage, Pulaski, Crawford, and Washington; Third, Scotland, Clark, Lewis, Monroe, Boone, Howard, Charlton, Randolph, Macon, Shelby, Cooper, Morgan, Cole, Miller, and Camden; Fourth, Adair, Linn, Grundy, Livingston, Carroll, Ray, Caldwell, Daviess, Clay, Platte, Clinton, Buchanan, Andrew, and Holt; Fifth, Jackson, Lafayette, Saline, Van Buren, Cass, Johnson, Pettis, Henry, Benton, Bates, St. Clair, Dallas, Polk, Dade, Jasper, Greene, Newton, Barry, Taney, Wright, Decatur, and Ozark.

In this year the State was also divided into seven electoral districts for the election of one Presidential elector in each.

At the election in St. Louis on the 4th of August, 1845, for delegates to the State Constitutional Convention the vote was as follows:

Native American Ticket.		Democratic Ticket.	
Campbell	2645	Polk	2595
Wright	2608	Leslie	2558
Hyatt	2626	Edmonson	2547
Foster	2558	Wise	2489
Bassett	2656	Watson	2484
Adreon	2502	Mead	2463

The convention met at Jefferson City Nov. 17, 1845, and organized by the election of Robert W. Wells as president, Claiborne F. Jackson vice-president, and R. Walker secretary. The Constitution adopted by this convention was rejected by the people at the election in August of the following year by nine thousand majority. Among the measures adopted by the convention was one for the cession of St. Louis and adjacent territory to the United States as the site of the national capital. The *Republican* of Jan. 20, 1846, under the heading of "A Ridiculous Blunder," thus refers to the proposition:

"During the recent session of the convention a proposition was made and finally entertained to cede St. Louis and a goodly quantity of territory contiguous to it 'for the purpose of locating and keeping thereon the seat of government of the United States.' There are those among us who think that they may live long enough to see such a consummation, and so, doubtless, thought the convention, or they would not have inserted such a clause in the Constitution. There it is: they did attempt to cede St. Louis to the general government, and no doubt thought they were doing so, but, unfortunately for them and for us, the metes and bounds set forth with so much precision do not happen to touch St. Louis. The nearest approach to our city is the township line which strikes the United States arsenal tract below the city. The section of country ceded takes in the ancient and renowned city of Vide-Poche, otherwise denominated empty pocket, and reaches nearly to Jefferson Barracks. What effect this strange blunder may have upon the two towns we leave to those interested to find out, certain of one thing only, that Vide-Poche and not St. Louis is to be the future seat of the national government if the terms of our Constitution are to be regarded."

About this time the agitation for the abolition of slavery began to assume a formidable shape. At a public meeting of the citizens of St. Louis, held in September, 1846, a committee of one hundred was appointed to consider and adopt measures "for the protection of slave property against the evil designs of the abolitionists and others." On the 5th of October a large concourse of citizens assembled in the rotunda of the court-house to receive the report. John H. Ferguson, chairman of the former meeting, presided, and Henry B. Belt acted as secretary.

Mr. Norcom, chairman of the committee of one hundred, presented the report in the shape of a preamble and constitution of an anti-abolition society, which was read, considered, and adopted.

The committee also reported a list of officers provided for in the constitution, which, on being read to the meeting, were unanimously approved and elected. They were as follows:

For *President*, John O'Fallon.

Vice-Presidents.—County: St. Louis township, F. Norcom; St. Ferdinand, A. Sanford; Central, Thomas Skinker; Carondelet, William L. Long; Maramec, Henry Tyler; Bonhomme, W. H. Dorsett. City: First Ward, J. H. Ferguson; Second Ward, T. Grimsley; Third, Adam L. Mills; Fourth, J. B. Brant; Fifth, J. M. Wimer; Sixth, P. G. Camden.

Committee of Finance.—St. Louis township, R. W. Hunt, James Russell, R. I. Curle, H. M. Shreve, L. D. Martin; St. Ferdinand, James Bissell, Olley Williams, W. McKelvy, F. Hyatt, Frank Utz; Central, John Lay, J. H. Douglas, John Marshal, James

McDonald, Thomas Wash; Carondelet, F. Dent, John Sappington, William Pipkin, Antoine Barada, John Bingham; Maramec, P. Tippitt, B. G. Brown, W. Boxly, W. A. Hereford, William Berry; Bonhomme, Judge Higgins, William Bassett, W. Berry, John Hempstead, William B. Blackburn.

Committee of Finance from the City.—First Ward, Henry Pilkington and Samuel Black; Second Ward, Joseph S. Pease and Charles Robb; Third Ward, R. McO. Blenis and Enoch Price; Fourth Ward, H. Renard and J. W. Beachboard; Fifth Ward, J. B. Carson and John Leach; Sixth Ward, J. J. Childs and S. V. Farnsworth.

Mr. Norcom, from the same committee, then submitted the following resolutions, which, he said, had occupied the attention and received the sanction of the committee, and which they recommended for the adoption of the meeting:

"*Resolved*, That the president of this association request, in the name of this meeting, the city authorities to adopt such ordinances as may be necessary to prevent all negroes from leaving the homes of their masters after dark, whether with or without permission of their owner or employer; and that proper signals be given, in at least three points of the city, announcing the hour for negroes to retire.

"*Resolved*, That our fellow-citizens throughout the State be requested to organize similar societies, and adopt like means with our own, for the more effectual protection of their slave property, and the execution of laws against the abduction of slaves.

"*Resolved*, That this meeting consider all 'negro preaching' and 'negro teaching' dangerous to the happiness, quiet, and safety of our slave population, in view of which we earnestly request the city authorities to enact ordinances effectually to prevent the continuance of these evils."

The resolutions were severally adopted. The committee also presented for the consideration of the meeting a memorial to the Legislature setting forth the necessity for the passage of additional laws on this subject. The memorial was read and adopted.

On motion of Mr. Whittelsey, it was also

"*Resolved*, That the sheriff, marshal, and constables of the county be requested to put in force the laws now existing against free negroes, and that the county court be requested to appoint a patrol for the county."

Pending the consideration of the resolutions, Wilis L. Williams addressed the meeting, urging the necessity of prompt measures "to put an end to the evils arising from the success of the efforts of the abolitionists in this State."

In 1846, James B. Bowlin (Democrat) was elected to Congress in the First District over William Milburn (Democrat) and Uriel Wright (Whig); John Jamison in the Second over Preston P. Bradley; James S. Green in the Third over John G. Miller; Willard P. Hall in the Fourth over James H. Birch; and John S. Phelps in the Fifth over John P. Campbell.

In March, 1847, the distinguished statesman Henry Clay visited St. Louis. Mr. Clay had declined in advance the official reception with which it had been proposed to honor him, stating that his visit was entirely of a private character, and undertaken for business reasons. On his arrival, however, he was greeted by an immense assemblage, and was conveyed in a carriage with four fine bay horses down Commercial to Vine Street, down Main to Chestnut, and up Chestnut to the Planters' House. He remained in St. Louis some time, and during his stay a *soirée* was given in his honor at the Planters' House.

In 1848 Messrs. Bowlin, Green, Hall, and Phelps were re-elected, and W. V. N. Bay elected in the Second District. The electoral vote of the State was cast this year for Cass and Butler.[1]

In 1850 the congressmen elected were John F. Darby in the First District, Gilchrist Porter in the Second, John G. Miller in the Third, Willard P. Hall in the Fourth, and John S. Phelps in the Fifth.

On Jan. 15, 1849, Claiborne F. Jackson, senator from Howard County, reported to the Senate of Missouri a series of resolutions on the subject of slavery, which asserted that any attempt on the part of Congress to legislate on the subject so as to effect the institution of slavery in the States, in the District of Columbia, or in the Territories was "a violation of the principles upon which" the Constitution was founded; that the Territories ought to be governed for the common benefit of the people of all the States, and that any organization of Territorial governments which excluded the citizens of any part of the Union from removing to such Territories with their property

[1] The vote of St. Louis City and County was as follows:

Precincts.	Taylor.	Cass.	Lackland.	Hall.
First Ward	138	725	56	362
Second Ward	424	584	224	275
Third Ward	1477	756	701	394
Fourth Ward	1077	641	484	240
Fifth Ward	690	758	359	461
Sixth Ward	434	711	129	170
Central	55	82	23	19
St. Ferdinand	120	81	38	40
Bridgeton	57	80	47	26
Manchester	131	111	26	25
Carondelet	78	50	46	25
Gravois	35	106	2	62
Maramec	50	54	5	21
Washington House	66	14	22	6
Prairie House	35	23	19	11
Bellegrove	38	20	3	10
Lanham's Store	5	5	...	...
Total	4847	4801	2171	2097

Six votes for Taylor and Fillmore were rejected by the judges, the voters simply depositing Taylor and Fillmore tickets, without a list of the electors. These votes included, the Whig majority in the city will be one.—*Republican*, Nov. 9, 1848.

would be an exercise of power by Congress inconsistent with the spirit of the Constitution, insulting to the States, and calculated to dissolve the Union; that the conduct of the Northern States upon the subject of slavery had practically abrogated the Missouri Compromise of 1820, but that Missouri, for harmony, would sanction the application of that compromise to territory acquired from Mexico; that slavery can only be prohibited in any Territory by the people in the formation of a State Constitution; and that Missouri would heartily co-operate with the slaveholding States in such measures as they may deem necessary for mutual protection against congressional legislation upon this subject. These resolutions, adopted by a vote of 53 to 27, encountered the bitter opposition of Senator Benton, who on the 26th of May, 1849, opened a canvass against them. In the prosecution of this appeal from the Legislature to the people, Senator Benton canvassed the entire State during the spring and summer of 1849.

One of the immediate consequences of this "appeal" was a division of the Democratic party into "Benton" and "anti-Benton" factions. In this crisis the Whig party leaned towards Benton, rather than his party opponents. In the Legislature the Whig representatives had opposed the Jackson resolutions, and before the people they maintained the pro-Union principles which had always been advocated by that party. The Democrats of the Legislature were divided into "anti-Benton" or "Hards," and Benton or "Softs;" and even among the Whigs there appeared Benton and anti-Benton Whigs.

The joint convention to elect a senator met on Jan. 10, 1851, and from day to day until the 22d. On the fortieth ballot the result stood, for Henry S. Geyer, Whig, 80; Thomas H. Benton, 55; B. F Stringfellow, 18; scattering, 4.[1]

This defeat ended the thirty years' senatorship of Thomas H. Benton. The Jackson resolutions continued to be a source of discord and division in the politics of Missouri. At the special session of the Legislature, beginning Aug. 30, 1852, which was divided into Benton and anti-Benton, Free-Soil and Slave-Soil, Whigs and Democrats, the contest for Speaker of the House was long and bitter, presenting scenes of excitement never surpassed in the history of Missouri.[2]

The contest terminated with the election of Dr. Reuben Shelby, a Benton Democrat, on the resolution of Wm. D. Maupin, of Saline, a Whig. In the regular session of the Legislature, beginning Dec. 27, 1852, the same division of parties was exhibited, and similar bitterness in the election of Speaker. After many ballots Reuben Shelby was re-elected.

About 1850–51 St. Louis was the favorite rendezvous of the Mormons on their way to the West. In its issue of May 8, 1851, the *Republican* said,—

[1] "Benton is beaten! With this announcement, simple in its terms, but full of import, we give to the public the result of the canvass in this State for the last twelve months. It is hardly necessary to recapitulate the position of parties. It is known that Col Benton appealed to the people of Missouri against certain instructions passed by the Legislature two years since. It is also known that the members of the Legislature, and a majority of the Democratic party, took issue with him upon that 'appeal,' and in favor of the doctrines enunciated in the 'Jackson resolutions,' and it is furthermore known that the Whig party, standing upon their own ground, as they have always done, sought to elect, and did elect, a greater number of members of the present Legislature than either of the other parties. They did so without any concealment of their principles. They avowed their intention, if possible, to secure the choice of a sufficient number of senators and representatives to elect a Whig senator in the Congress of the United States. In this they failed by fifteen or sixteen votes. But they were and are the predominant party in the Legislature. First in point of numbers, though representing, as is contended, a less number of the popular votes than their party opponents, stand the friends of Col. Benton; and close upon them and better represented, because of their superiority in tact and talent, may be classed the anti-Bentonites. For nearly two weeks these parties have been engaged in the election of a senator of the United States in place of Col. Benton. It was perfectly competent at any time for the Whigs and anti-Bentonites to have secured an election, but as there was no affiliation between them, except in the desire to beat Benton, very little was done other than to vote for the candidates of the respective parties. This position was maintained until all expedients to bring the Benton and anti-Benton parties together had failed, and until a palpable trick had developed to the latter the heartlessness and insincerity of the former party. Then it was that there was an approximation to an election, and on Wednesday morning, and on the fortieth ballot, the election was consummated. The vote is thus declared by the *Telegraph*: For Geyer, 80; Benton, 55; Stringfellow, 18; Green, 2; Dunn, 2; Polk, 1.

"Mr. Geyer, we suppose, in the absence of telegraphic dispatches, received the votes of fifteen anti-Benton men and one Benton man. The whole of the Whig party adhered to him, and the votes of a majority of the anti-Benton men were given for different gentlemen. Of the entire Legislature, composing one hundred and sixty members, saving the absentees, Mr. Benton received only sixty-five votes, a little over one-third of the members, and representing less than that ratio of the popular voice of the State. Benton is beaten, not by any combination, but by the voice of the people, and if at any time he has exercised influence with the citizens of Missouri, that influence is now gone."—*Republican*, Jan. 24, 1851.

[2] Joseph A. Hay, Whig, of Lewis County, offered the following resolution:

"*Resolved*, That a veil be hung over the portrait of Col. Benton now hanging in the Representative Hall, that Claib Jackson be requested to absent himself from the House, and that the members drink no more grog till a Speaker is elected."

"Some two hundred Mormons left our city yesterday on the steamer 'Statesman' for Council Bluffs, where they will, we learn, proceed immediately to Salt Lake.

"Although we have no Mormon Church in St. Louis, and though these people have no other class or permanent possession or permanent interest in our city, yet their numerical strength here is greater than may be imagined. Our city is the greatest recruiting point for Mormon emigrants from England and the Eastern States, and the former especially, whose funds generally become exhausted by the time they reach it, generally stop here several months, and not unfrequently remain among us a year or two pending a resumption of their journey to the Salt Lake. Those from the Eastern States ordinarily leave their homes only when they have sufficient means to take them through their entire journey, and for that reason rarely stop here over a few days, or at most a few weeks. There are at this time in St. Louis about three thousand English Mormons, nearly all of whom are masters of some trade, or have acquired experience in some profession which they follow now. As was said, they have no church, but they attend divine service twice each Sunday at Concert Hall, and they celebrate their feasts and perform their devotional duties with the same regularity, if not in the same style, as their brethren in the valley. They apprehend none of the molestation here with which formerly and elsewhere they were visited. During the past winter they have not been behindhand with their fellow-citizens in devising modes to spend the time pleasantly. We heard frequently of Mormon balls and parties, and Concert Hall was on several occasions filled with persons gathered to witness Mormon theatrical performances. We have witnessed the congregation as it issued from the hall at the religious meetings on Sundays, and certainly we think it does not compare unfavorably with the other congregations."

In continuation of his "appeal," Col. Benton, defeated for the Senate, became a candidate in 1852 in the First Congressional District for Congress, and was elected.[1] A. W. Lamblin was chosen in the Second District, John G. Miller in the Third, M. Oliver in the Fourth, and John S. Phelps in the Fifth.

The distinguished lawyer, politician, and statesman, Thomas H. Benton, opened a law-office in St. Louis in 1815. A great flood of emigration set in about this time, and the interior of the State began to be settled rapidly. Col. Benton was retained in several important land suits, and won immediate reputation. His public services in after-life have become matters of national history. Thomas H. Benton was born near Hillsborough, N. C., March 14, 1782. His parents were Jesse Benton, a respectable lawyer, and Ann Gooch, of Hanover County, Va., and he was the eldest son of that marriage. His mother was the niece of Col. Thomas Hart, of Kentucky, and was a cousin of the wife of Henry Clay. His father, who died when Thomas was eight years old, had a tract of valuable land, some twenty thousand acres, lying twenty-five miles to the south of Nashville, Tenn., and to this region his mother removed with her two sons, Thomas Hart and Jesse. Soon afterwards Thomas H. was educated at Chapel Hill University, North Carolina; taught school in Middle Tennessee in 1896, was admitted to the bar in 1808, and opened an office in the town of Franklin, but shortly after removed to Nashville. In 1811 he was elected to the State Legislature, and during his term of service secured the passage of a law for the reformation of the judicial system of the State, and another by which the right of trial by jury was given to slaves. He joined the army in 1812, and was Gen. Jackson's aide-de-camp until shortly before the personal encounter between them, in which Jesse Benton participated. He then became colonel of a Tennessee regiment. The life, work, and character of Col. Benton have been subjected to alternate eulogy and criticism. He was a man of strong intellect, and a natural leader of men. Though sometimes amusingly egotistic and disagreeably overbearing, he could exert rare winning faculties, and his probity was unimpeachable. His "Thirty Years' View" will always be one of the books that a student of American history must read, for Benton's contemporaries were Webster, Clay, Calhoun, Seward, Sumner, Douglas, Crittenden, and men of almost equal eminence; and in his prime the people of the West, even including his political opponents, had a right to be proud of their representative. Foote, in his interesting volume upon the "Bench and Bar of the Southwest," lays peculiar stress upon Col. Benton's industry, perseverance, and fertility of resource, but adds that the great Missouri senator was "far more plenteously endowed with the dictatorial spirit than with the gentle graces of persuasion," and that his voice was always "harsh and untunable, his gesticulations clumsy and ungraceful." But Foote adds that Col. Benton could express himself on paper in a simple, nervous, and idiomatic English style which few men of his time could equal.

He was engaged in two personal encounters, one of which has been mentioned, the other being the sad and fatal duel with young Lucas, in 1817. In reference to the first, the noted conflict with Gen. Andrew Jackson, Parton throws the chief blame upon Col. Benton. It is proper, therefore, to give the following letter, printed by Col. Benton a few days after the affair, and republished in the *St. Louis Republican*,

[1] "The election is over. The battle has been fought, and we have been very completely beaten. There is no use of complaining over what cannot be remedied. Benton has made a Duke of Wellington affair of it,—a perfect Waterloo defeat to us,—and that, too, we believe, solely by the aid of Blucher and the Prussian forces.

"The smoke and dust of the battle having passed away, we can take a calm survey of the field.

"Such a contest has never been witnessed in the United States, and Col. Benton has a right to claim as great a *coup d'état* as Louis Napoleon."—*Republican*, Aug. 5, 1852.

Aug. 2, 1881. It is as follows, and gives a curious picture of the possibilities of daily existence in that duelistic age, when certainly life could not be termed monotonous:

"FRANKLIN, TENN., Sept. 10, 1813.

"A difference which had been for some months brewing between Gen. Jackson and myself produced, on Saturday, the 4th inst., in the town of Nashville, the most outrageous affray ever witnessed in a civilized country. In communicating this affair to my friends and fellow-citizens, I limit myself to the statement of a few leading facts, the truth of which I am ready to establish by judicial proofs:

"*First.* That myself and my brother, Jesse Benton, arriving in Nashville on the morning of the affray, and knowing of Gen. Jackson's threats, went and took our lodgings in a different house from the one in which he stayed on purpose to avoid him.

"*Second.* That the general and some of his friends came to the house where we had put up and commenced the attack by leveling a pistol at me *when I had no weapon drawn*, and advancing upon me at a quick pace without giving me time to draw one.

"*Third.* That seeing this my brother fired upon Gen. Jackson when he had got within eight or ten feet of me.

"*Fourth.* That four other pistols were fired in quick succession, one by Gen. Jackson at me, two by me at the general, and one by Col. Coffee at me. In the course of this firing Gen. Jackson was brought to the ground, but I received no hurt.

"*Fifth.* That daggers were then drawn. Col. Coffee and Mr. Alexander Donaldson made at me and gave me five slight wounds. Capt. Hammond and Mr. Stockley Hays engaged my brother, who, being still weak from the effects of a severe wound he had lately received in a duel, was not able to resist two men. They got him down, and while Capt. Hammond beat him on the head to make him lay still, Mr. Hays attempted to stab him, and wounded him in both arms as he lay on his back parrying the thrusts with his naked hands. From this situation a generous-hearted citizen of Nashville, Mr. Sumner, relieved him. Before he came to the ground my brother clapped a pistol to the breast of Mr. Hays to blow him through, but it missed fire.

"*Sixth.* My own and my brother's pistols carried two balls each, for it was our intention, if driven to our arms, to have no child's play. The pistols fired at me were so near that the blaze of the muzzle of one of them burnt the sleeve of my coat, and the other aimed at my head a little more than arm's length from it.

"*Seventh.* Capt. Carroll was to have taken part in the affray, but was absent by the permission of Gen. Jackson, as he has since proved by the general's certificate,—a certificate which reflects I know not whether less honor upon the general or upon the captain.

"*Eighth.* That this attack was made upon me in the house where the judge of the district, Mr. Searcy, has his lodgings. So little are the laws and its ministers respected. Nor has the civil authority yet taken cognizance of this horrible outrage.

"These facts are sufficient to fix the public opinion. For my own part, I think it scandalous that such things should take place at any time, but particularly so at the present moment, when the public service requires the aid of all its citizens. As for the name of courage, God forbid that I should ever attempt to gain it by becoming a bully. Those who know me know full well that I would give a thousand times more for the reputation of Croghan in defending his post than I would for the reputation of all the duelists and gladiators that ever appeared in the face of the earth.

"THOMAS HART BENTON,
"*Lieutenant-colonel Thirty-ninth Infantry.*"

There will always be divergent views about this affair. A writer in the *Republican* of Nov. 5, 1844, says, "Thomas H. Benton came to Missouri, I think, in 1815, much in the character he left North Carolina, as a fugitive from justice, having cast his Parthian arrow behind him in a letter giving an account of the bloody affray between him and Gen. Jackson."

The difficulty seems to have originated in a personal controversy between Gen. Jackson and Col. Benton's younger brother Jesse. Gen. Jackson received a painful wound, and from that time until the development of his policy as President in relation to the United States Bank and nullification he and Col. Benton were strangers. Finally, however, they were brought together and reconciled by the force of political sympathies.

The duel with Charles Lucas occurred in 1817. The trouble grew out of political controversy and excitement. In August of that year, Lucas, a son of Judge J. B. C. Lucas, and a young attorney of promise, challenged Col. Benton's vote at the polls. Benton called Lucas an insolent puppy, was challenged, and a duel took place August 12th on Bloody Island, L. E. Lawless being Benton's second, and Joshua Barton second for Lucas. They exchanged shots, and Lucas was shot in the neck and Benton in the knee. It was thought the affair would terminate here, but disparaging rumors and gossip angered the principals to such an extent that a second encounter took place September 27th, in which Lucas was mortally wounded and died in half an hour. It is said that mutual friends could by proper exertions have prevented this meeting, but at that time it was sanctioned by public opinion; and though Col. Benton was opposed to dueling, he was not willing to lose his place in public life by refusing to accept the challenge of Lucas in the first place, or by refraining from challenging him in turn.

Judge J. B. C. Lucas published a statement in the *Missouri Gazette* of Nov. 1, 1817, in which he says that his son made a methodical statement in writing previous to the first meeting. It is to the effect that in October, 1816, Col. Benton and himself were employed on opposite sides in a case and gave each other the lie. Benton then sent Lucas a challenge, which the latter declined, and nothing further occurred till the election of Aug. 4, 1817. Judge Lucas states that his son was the challenged party in this case also, and there is a conflict of authorities on the subject. After Lucas was wounded, Benton demanded a second meeting, but afterwards waived this right. The rest of the account agrees in the main with that previously given.

But the entire subject was reviewed at great length on the evening of March 14, 1882, the one hundredth birthday of the great statesman.[1] On that occasion, before a large assemblage in Memorial Hall, Hon. Thomas T. Gantt, by request of the Missouri Historical Society, delivered an address upon Benton's life and character. It is not likely that any more complete and able account from friendly hands can ever be given to the public. Col. Gantt drew largely upon the reminiscences of Judge Lawless in his story of the Lucas duel, and showed how the natural antagonism between the old French families of influence and the bustling new-comers was fostered, how political and social elements combined to intensify it, what causes urged on the high-spirited Lucas, and how absolute was the demand of society that the "code of honor" should be observed, else were a man disgraced forever. Altogether it was one of the saddest tragedies of the West, and Benton never ceased to [illegible] the fatal shot; the Lucases never forgave it.

Col. Gantt's version of the tragedy is as follows:

"Charles Lucas, a son of Judge Lucas, was a young man of unusual promise, both as a lawyer and a politician. To him his father looked as the representative of his interests, and on him was imposed the duty of taking aggressive measures to drive Benton from the political field. I speak as I have already said, from information received from Col. Lawless. According to him, there was no doubt in his own or Benton's mind of the plan proposed; and of course no one can doubt of the fierce opposition likely to be made to it by Benton. He was throughout his life the enemy of compromises and half-measures, and without the least injustice he may be called an extremist. He was a fast friend, but a bitter enemy; and when he drew the sword he cast the scabbard away.

"It was a somewhat perilous enterprise, that of driving Benton from the political field, which means from St. Louis, supposing it to have been really entertained. What was done in the execution of it was not judicious. It was resolved that Charles Lucas should challenge his vote at the August election in 1817, and should allege as the ground of his challenge that Benton had not paid his taxes. Col. Lawless stated that this course was agreed upon at a conference of the Lucas men, and that the choice of Charles Lucas as their spokesman was determined by lot.

"When the challenge was made Benton denied the ground of it, and on its repetition by Charles Lucas demanded to be sworn as the law directed. He advanced haughtily to take the oath, saying to Charles Lucas, 'Out of my way, you puppy!' The bystanders interfered, but in that day there could be but one issue to such an altercation. Benton had unequivocally placed what is technically called the *onus* on Charles Lucas, who promptly challenged him. They met, with pistols as the arms and ten paces as the distance, on Bloody Island, opposite St. Louis, and Charles Lucas was dangerously wounded.

"Judge Lucas was greatly disappointed. His exasperation was extreme. He had hoped for the death of Benton, and now his favorite son was dangerously, and it was at first believed mortally, wounded. The symptoms improved, however, and the sufferer was soon pronounced out of danger. Some of his friends spoke of his soon being able to renew the fight with Benton. 'I have no fight to renew,' said Charles Lucas; 'Benton could not have done otherwise than he did. I don't blame him in the least. In fact, I and my friends have been entirely in the wrong in this matter. I am glad I am getting well, but I have no quarrel with Benton.' It was told to Benton by a common friend of both that Charles had thus expressed himself. Benton authorized this gentleman to say to Charles Lucas that he, Benton, deeply regretted the meeting and its consequences; that he was delighted that these consequences were less serious than he had at first feared; that his best acknowledgments were due for the manly frankness with which Charles Lucas had spoken, and that no one more sincerely than himself wished for his early and complete recovery. This message was delivered, and Charles Lucas expressed himself much gratified, and sent word to Benton that as soon as he left his sick-room he would offer him his hand. Benton was much moved. He said that if Mr. Lucas would permit him he would be glad to anticipate the period of complete cure and in person express his own feelings. Charles Lucas replied that such a visit would give him great pleasure, and Benton, accompanied by a friend, waited upon him. Some friends of Mr. Lucas were also present, and the interview was most satisfactory. The reconciliation appeared to be complete.

"It appears that Judge Lucas had not been taken into the counsels of his son on this occasion, and when he became aware of what had passed his wrath was great. He was, as nearly every one is when in a violent passion, unreasonable and unjust. He proclaimed that cowardice had been Benton's motive in seeking a reconciliation with his son; that Benton was a practiced duelist, confident of his skill, but afraid of the deadly terms as to distance on which Charles had intended to renew the war, and that he had by abusing Charles' generosity and making abject professions of regret extorted a pacification which was his only means of safety. Very soon kind friends of the class from which the Spanish proverb declares it a happiness to be saved repeated to Benton these utterances of Judge Lucas. But Benton was determined to pay no attention to what Judge Lucas said, and so declared, greatly, of course, to the disappointment of the friends spoken of, and of Judge Lucas himself. Judge Lawless said that Judge Lucas was furious when he heard Benton's resolution; he repeated that Benton was a poltroon, and added, 'and Charles says so too.' The friends performed their office as before, and, greatly to the chagrin of Benton, he perceived that the matter was becoming complicated in a most annoying degree. At first he hesitated; but this

[1] At the Benton centenary celebration there was a notable gathering of the leading men of St. Louis. Seats on the platform were occupied by Col. George E. Leighton, Silas Bent, John F. Darby, Peter L. Foy, George Knapp, W. G. Eliot, Dr. Stevens, Richard Dowling, and Wayman Crow.

The meeting was called to order by Col. Leighton, who stated that in the absence of Edwin Harrison, president of the society, the duty of presiding devolved upon him. The place of Benton in the history of the State, of the Mississippi valley and the country had been already fixed. The events of the past thirty years had removed them so far from the state of society in which he lived that the Historical Society had deemed it proper to recall some of the events in the life of the great statesman. The society had therefore asked one of Benton's most appreciative friends to address them that evening, and the speaker had the pleasure of introducing Hon. Thomas T. Gantt. Col. Gantt's address was an exhaustive sketch of Benton's career, and an eloquent tribute to his services in behalf of Missouri and the Union.

only seemed to irritate to madness Judge Lucas, who repeated in every company his injurious remarks respecting Benton, and cited Charles Lucas as concurring with him. Obviously this could not last. Benton addressed a note to Charles Lucas, saying that he had heard that some persons claiming to be his friends had imputed the expression of such opinions to him Charles Lucas); that he (Benton) was satisfied that he (Charles Lucas) had said nothing of the kind, but that it was necessary that he (Benton) should have the means of effectually disproving the rumor, and that this means could only consist in the written authority of Charles Lucas. He begged Charles Lucas to enable him to make this disproof.

"On receiving this note Charles Lucas expressed in words his regret that any such rumor should be in circulation, and declared it to be groundless, adding that he would furnish Benton with a written statement to that effect. Benton's friend expressed himself highly gratified, and the interview closed. That day passed and the next without the promised letter being written by Charles Lucas, and Benton's friend called again. Charles Lucas put him off to the following day. On that evening Judge Lawless said that Charles Lucas and his father were seen walking backwards and forwards on the open ground west of where the Planters' House now stands. The elder man was vehement in his gesticulation and apparently earnest in his speech to the younger, who said little and appeared to be in deep dejection. What was actually said no one knew but the speakers themselves. Next morning, when Benton's friend called for the written statement, Charles Lucas, still appearing deeply dejected, told him that he could give no such statement, and added that if Benton wished for his blood he could have it.

"Benton's friend was Judge Lawless. When he brought to his principal this answer of Lucas, Benton was strongly excited, and remarked that from that point 'all the moves were forced.' He sent at once a pointed challenge to Lucas. He said that Lucas' refusal to disavow the infamous language imputed to him compelled Benton to treat him as its author, as charging him (Benton) with cowardice, etc.; that he thus made it necessary that they should meet again, and, with a view of enabling Lucas to make the terms of the meeting as deadly as he was alleged to wish, he (Benton), by challenging him, conferred on him the privilege of dictating the weapons, the distance, place, etc. In short, everything needed to make the fight desperate was done. Lucas named pistols, six paces, and an early day. It was very warm weather, perhaps early in September, but on this point I am speaking conjecturally. Lawless was the second of Benton, Maj. Clemson the second of Lucas. The parties met at Bloody Island. Both were dressed in black frock coats. It was agreed that the contestants should stand facing each other, with an interval of six paces; that one of the seconds should ask, 'Gentlemen, are you ready?' If no reply were given it would be assumed that both were ready, and then the words should be, 'Fire! one, two, three,' the firing to be after *one*, and not after *three*. Lots were cast to determine which of the seconds should give the word, and it fell to Maj. Clemson.

"The combatants were moving toward their places, when Benton, who was suffering extremely from the heat of the day, exclaimed, 'I can't stand this,' and stepped towards a pitcher of water and basin which had been brought to the ground (I think, but am not positive, that Col. Lawless spoke of an ice-bucket also), threw off his coat, rolled up his shirt sleeves, and bathed his hands and face in water. He was still drying them with the towel, when Maj. Clemson asked, 'Gentlemen, are you ready?' Benton turned sternly towards him and exclaimed, 'Don't you see that I am not ready?'

"It happened that his undershirt was of red flannel, and this was exposed by his baring his arms for the purpose of bathing them. He hurriedly and only partially adjusted his dress, stepped to his place, received his pistol, and turning to Clemson, said, '*Now* I am ready.' Col. Lawless said that Clemson seemed disconcerted by his own blunder and Benton's rebuke of it. In a somewhat broken voice he commenced counting, 'One, two,' etc., without uttering the command, 'Fire!' Every one was astonished. Benton started and looked toward Clemson, as if to interrupt him, when 'one' was pronounced, and Col. Lawless, a highly-impulsive man, suspected foul play on Clemson's part, and expecting to see Benton shot before the proper word was given, resolved, in that event, to shoot Charles Lucas; but just before the word 'two' was called Charles Lucas raised his pistol. Benton raised his own and fired 'like a flash of lightning,' to use the expression of Col. Lawless; the pistol of Lucas was discharged at nearly the same moment, but Benton's bullet passed through Lucas' body, while Lucas' bullet wholly missed Benton. Lucas felt that he was mortally wounded. He caused Benton to be brought to him, expressed himself perfectly satisfied with Benton's conduct, and took on himself the blame of the meeting. Benton was choked with emotion. He pressed the hand of the dying man and withdrew from the spot. That to the day of his death he regarded the death of Charles Lucas as a supreme misfortune to himself, second only to the alternative of being himself killed, is notorious."

Shortly after his removal to St. Louis, Col. Benton established a newspaper (afterwards the *Enquirer*) in opposition to the *Missouri Gazette*, and soon became conspicuous as an editor, lawyer, and politician. In 1820, as we have seen, when Missouri was about to be admitted to the Union, he was elected United States senator as the colleague of David Barton. He was chosen only after a fierce and obstinate struggle, his chief competitor then as afterwards being Judge J. B. C. Lucas, and the contest was waged with great bitterness on both sides. Thus amid the storm of personal and party strife, which was often afterwards to beat about him, began the senatorial career of Col. Benton, destined to continue without interruption for thirty years. At this time he was in the prime of manhood, temperate, industrious, resolute, and in every way fitted to represent the interests of the great West. In his public career Col. Benton accomplished many worthy reforms, and won many political triumphs. He never forgot that the interests of a frontier population were intrusted to his care, and he sympathized with their demands, though he showed at times that he was able to withstand a popular cry and resist even his own constituency. The hard times throughout the country in 1820 were especially felt by the Western land buyers, and Col. Benton urged measures for their relief. In 1824 he brought forward in the Senate a measure providing for the granting of pre-emptive rights to actual settlers, a periodical reduction in the price of public land, and a donation of homesteads to certain persons, and advocated with the ardor and persistence so char-

acteristic of him a bill embodying these features, until at last it was approved by Gen. Jackson in one of his messages, and enacted into a law by Congress. Through his efforts also the saline and mineral lands of Missouri were thrown open to occupancy and the salt tax was repealed. He was one of the earliest as he was one of the most earnest advocates of the construction of a railroad to the Pacific; and assisted largely in the formation of Western exploring expeditions, and in the development of trade with New Mexico, the extension of inland commerce and postal facilities, the establishment of military stations in the West, and the cultivation of friendly relations with the Indian tribes. Throughout his senatorial career he was the ablest, most energetic, and most influential representative of the interests of the Mississippi valley. His most elaborate speeches, however, and those on which his fame as a thinker chiefly rests, were made during the currency disputes about the charter of the Bank of the United States. Throughout his life he supported a gold and silver currency as the only rightful medium for government disbursements and receipts. From this financial policy he obtained the sobriquet of "Old Bullion." He was the mover of the famous resolutions by which the vote of censure passed by the Senate upon Gen. Jackson was, in 1837, expunged from the journal. From 1841 to 1852 he took a prominent part in the debates with regard to the "Oregon boundary," and during the Mexican war period he was the earnest advocate of a vigorous policy. At one time President Polk proposed that the title of lieutenant-general be conferred on him, and that he be given entire charge of the military operations in Mexico, but this idea was abandoned. Col. Benton had always been an uncompromising opponent of the doctrine of nullification, and was the most formidable Democratic antagonist of John C. Calhoun in the Senate.

But it was in the famous slavery agitation, commencing in 1849, that Benton figured most conspicuously before the people of Missouri. On the 15th of January in that year, as already stated, Claiborne F. Jackson, senator from Howard County, reported to the State Senate from the Committee on Federal Relations in a modified form a series of resolutions which had been introduced by Carty Wells, senator from Marion County. These resolutions as reported began by asserting that the Federal Constitution was the result of a compromise between the conflicting interests of the States that formed it; that in no part of that instrument was to be found any delegation of power to Congress to legislate on the subject of slavery, excepting some special provisions having in view the prospective abolition of the African slave-trade, made for securing the recovery of fugitive slaves, and that any attempt on the part of Congress to legislate on the subject, so as to affect the institution of slavery in the States, in the District of Columbia, or in the Territories, was, "to say the least, a violation of the principles upon which that instrument was founded." The resolutions further alleged that the Territories "acquired by the blood and treasure of the whole nation ought to be governed for the common benefit of the people of all the States, and any organization of the Territorial governments excluding the citizens of any part of the Union from removing to such Territories with their property would be an exercise of power by Congress inconsistent with the spirit upon which our Federal compact was based, insulting to the dignity and sovereignty of the States thus affected, calculated to alienate one portion of the Union from another, and tending ultimately to disunion;" also that "this General Assembly regard the conduct of the Northern States on the subject of slavery as releasing the slaveholding States from all further adherence to the basis of compromise fixed on by the act of Congress of March 6, 1820, even if such act ever did impose any obligation upon the slaveholding States, and authorizes them to insist upon their rights under the Constitution; but, for the sake of harmony and for the preservation of our Federal Union, they will sanction the application of the principles of the Missouri Compromise to the recent territorial acquisitions, if by such concession future aggressions upon the equal rights of the States may be arrested, and the spirit of anti-slavery fanaticism extinguished." The resolutions, moreover, asserted that "the right to prohibit slavery in any Territory belongs exclusively to the people thereof, and can only be exercised by them in forming their Constitution for a State government, or in their sovereign capacity as an independent State; that "in the event of the passage of any act of Congress conflicting with the principles herein expressed, Missouri will be found in hearty co-operation with the slaveholding States in such measures as may be deemed necessary for our mutual protection against the encroachments of Northern fanaticism;" and "that our senators in Congress be instructed and our representatives be requested to act in conformity to the foregoing resolutions."

In the Senate the resolutions were promptly adopted, but in the House an effort was made to pass a substitute. This, however, failed, and the Jackson resolutions were finally adopted by a vote of fifty-three to twenty-seven. Senator Benton had

been pronounced and uncompromising in his opposition to the resolutions from the outset, and on the 26th of May, 1849, he opened, in the hall of the House of Representatives at Jefferson City, a popular canvass against them, which soon stimulated the public mind to fever-heat. He denounced the resolutions in the strongest terms, and asserted that in them lurked the spirit of disunion and nullification. He also maintained that they were in conflict with the Missouri Compromise of 1820, and that their ultimate purpose was to disrupt the Union. Col. Benton made one of the most vigorous and exhaustive canvasses recorded in the political history of Missouri, or, indeed, of any State.

Thomas H. Benton.

During the spring and summer he labored incessantly, delivering many able speeches, and exerting to the utmost of his ability the immense personal influence which he had so long wielded in Missouri. The result was as disheartening to him as it was unexpected. Slavery was as yet too strong for even his resources, and he found it impossible to carry his party with him. The Legislature chosen in 1850 was divided into three separate parties,—Whigs and Benton and anti-Benton Democrats,—and at the election in the winter of 1851, Col. Benton was defeated and Henry S. Geyer elected United States senator. Benton, however, was not the man to submit patiently to such a rebuff, and in the following year he presented himself before the people of his district as a candidate for Congress, and was triumphantly elected.

During his term of service in the House of Representatives he at first sustained the administration of President Pierce, but subsequently, in view of the ascendency of the Calhoun party in its councils, withdrew his support. The Kansas-Nebraska bill was earnestly opposed by him, and one of his most memorable speeches was made in opposition to the bill. At the next election—1854—the new American party combined with his old opponents, and he was defeated. In 1856 he was persuaded to run as an independent candidate for Governor. His wit and eloquence drew immense crowds, and the campaign was a brilliant one, but there were three candidates in the field, representing the Benton Democrats, National Democrats, and Native Americans, and Trusten Polk, the National Democratic nominee, received a small plurality. It has been cited as an example of Benton's unselfishness that in 1856 he supported Buchanan as President in opposition to his own son-in-law, Fremont, thinking that the former would restore Jacksonian principles, and the latter's triumph might cause sectional parties, but he afterwards changed these views. The last two years of his life were devoted to literary pursuits. His "Thirty Years' View" was completed, and he then undertook to revise and condense the "Debates of Congress." Even on his death-bed he dictated portions of this work, which was published under the title of "An Abridgment of the Debates of Congress from 1789 to 1856."

In his later years Col. Benton became reconciled to many of his bitterest political antagonists. His popularity with the people of his State was always great, and towards the close of his senatorial career no Democratic candidate could be elected to the Legislature without pledging himself to support Benton's re-election. Personally he was reserved, and even austere, but his zeal to originate and carry out measures in the interests of the settlers gave him power over his constituency. His wife, Elizabeth, was a sister of Governor McDowell, of Virginia. She died in Washington, Sept. 10, 1854. Col. Benton had four daughters,—Mrs. Jessie Fremont, wife of Gen. Fremont, Mrs. William Carey Jones, Mrs. Sarah B. Jacob, and Madame Susan B. Boileau. One of his grandsons, Carey Jones, graduated at the University of California, and now holds an honorable position in that institution.

Col. Benton died in Washington, April 9, 1858, aged seventy-six, and both houses of Congress imme-

diately adjourned. He had for forty years filled a large place in the public estimation, and with one voice the leading journals expressed their sense of national loss. The citizens of St. Louis met at the court-house at noon April 10th to pass appropriate resolutions. The preliminary committee consisted of Col. John O'Fallon, Hon. H. R. Gamble, Edward Walsh, Charles F. Meyer, Charles D. Drake, S. M. Breckenridge, and Franklin A. Dick. John Brady Smith was chosen chairman of the meeting, and John O'Fallon, H. S. Geyer, Hon. O. D. Filley, Col. Robert Campbell, Henry Von Phul, Edward Walsh, and Adolphus Meier were vice-presidents.

The resolutions were drawn up by Hons. Henry A. Clover, James R. Lackland, Charles B. Lord, B. Gratz Brown, Samuel T. Glover, A. S. Gitchell, S. M. Breckenridge, and Franklin A. Dick, and expressed in fitting terms their sense of the loss the State had sustained. A committee consisting of the following citizens was appointed to take charge of arrangements for the public funeral exercises: Hon. O. D. Filley, Hon. John M. Wimer, Hon. Edward Bates, Hon. Wayman Crow, D. A. January, Col. Thornton Grimsley, Col. Charles Keemle, Col. D. D. Mitchell, John A. Brownlee, Wyllys King, Capt. J. W. Pritchard, Hon. John How, Capt. Henry Almstedt, Edward Eggers, Hon. B. Gratz Brown, Joseph Charless, John C. Rust, Alexander Kayser, H. I. Bodley, P. T. McSherry, Dr. M. L. Linton, John Doyle, N. Holmes, S. H. Gardner, A. S. Mitchell, Robert Barth, Hon. Lewis V. Bogy, Dr. J. O'F. Farrar, Hon. Samuel Reber, Dr. William Webb, Hon. Thomas Allen, Henry Boernstein, C. D. Drake, William D'Oench, William Lindsay, Dr. Charles A. Pope, Dr. Ellsworth Smith, Charles Daenzer, S. M. Breckenridge, Franklin A. Dick, Col. Robert Campbell, Col. A. D. Stuart, Col. Robert Renick, Col. George Knapp, John H. Lightner, Hon. Wm. S. Allen, R. J. Howard, Ferdinand Gottschalk.

On the afternoon of the 14th of April the remains arrived at the Mississippi River, in charge of Col. William Carey and Richard Jacobs, sons-in-law of the deceased, and were received by Mayor Filley, ex-Mayor Wimer, members of the City Council, city officers, and a committee of citizens composed of J. Brady Smith, Andrew Elliott, John D. Daggett, Adolphus Meier, Thomas Andrews, William T. Christy, Bernard Pratte, Sr., John H. Lightner, B. W. Alexander, William Finney, Sr., G. K. McGunnegle, Asa Wilgus, M. L. Cerré, Henry Kayser, Edward Eggers, John F. Darby, John McNeil, William Bennett, J. B. S. Lemoine, Henry T. Blow, Jacob Blattner, William Carr Lane, John H. Gay, James Castello, Dr. Prout, Samuel Willi, George R. Taylor, S. H. Gardner.

The remains of Col. Benton were escorted by the National Guard to the residence of Col. J. B. Brant, his brother-in-law, and the next morning, escorted by all the military companies of St. Louis, were taken to the Mercantile Hall, where they rested in state, guarded by the Washington Blues. On the 16th of April the funeral ceremonies took place. The Chamber of Commerce adjourned, and business was generally suspended throughout the city. The judges of the courts and the members of the bar marched in the procession, as also did the mayor, the City Council, the directors of the public schools,[1] and the members of all the benevolent societies of St. Louis. The remains were taken to the Second Presbyterian Church, where Rev. John F. Cowan preached the sermon. The cortege again formed for the march to Bellefontaine cemetery, and the St. Louis journals of the 17th state that the procession contained 890 military, 782 persons belonging to associations, and 384 persons in carriages, or a total of 2056. At least 40,000 people watched the procession pass. At the grave the Episcopal burial service was read by Rev. Mr. Schuyler. The pall-bearers were the following gentlemen: Col. John O'Fallon, Frederick Dent, William Carr Lane, Kenneth Mackenzie, Robert Campbell, Col. A. D. Stewart, John Shade, Bernard Pratte, Sr., Thomas Watson, Sr., Edward Walsh, Judge H. R. Gamble, John Brady Smith, Judge R. W. Wells, Henry Von Phul, O. D. Filley, Andrew Elliott, John D. Daggett, Thornton Grimsley, G. K. McGunnegle, John How, John M. Wimer, Samuel Hawken.

Col. A. R. Easton acted as chief marshal. During the day all public buildings were draped in mourning, the flags in the harbor were at half-mast, bells were tolled, and the great city that over forty years before, when it was a small town, had received the young, fiery, and eloquent lawyer into citizenship, mourned with heartfelt sorrow his death.

On the 22d of April, Edward Walsh, John O'Fallon, John How, M. L. Linton, and John Brady Smith issued a "call to the public" for a meeting to take steps with reference to erecting a monument to the memory of Col. Benton. This meeting was held April 24th, and the final result was the colossal statue of Col. Benton, by Harriet Hosmer, which now stands in Lafayette Park.

The Benton centenary speech of Col. Gantt, re-

[1] Edward Wyman, A. Carr, and J. Baker were appointed a committee to represent the board of public schools in the procession. The resolution of the board taking this action discloses the fact that Col. Benton was a member of the first school board organized in St. Louis, and the first secretary of that board.

cently referred to, gave rise to much discussion throughout the State, and revived many Benton remembrances. As time rolls on the animosities and bitter hatreds of those fiery days are forgotten, the greater storms of the war having swept them out of sight. An historic character, a passionate lover of his country, a giant in warfare, his clear-cut features soften more and more into fairer outlines, but lose little of their heroic strength. Only students of congressional history can realize how large a share of national legislation for thirty years bore for good or for evil the impress of Benton's powerful thought. And yet, though west of the Alleghanies there was none to cope with him, he was overthrown and his services lost to the nation because a certain enormous arrogance, superb, pompous, ungovernable, and always impolitic, wrought his ruin, and winged each shaft that weaker men hurled against him. Few men of greater mental power, however, have appeared in any generation. "Tom" Benton, it is said, could sit at his desk, after reading upon a subject, and write his speech, without change or erasure, throwing the numbered pages on the floor, and without another glance at the writing would the next day, or the day after, deliver his speech *verbatim*, crammed with figures and blazing with invective. With all his faults it will be long before Missouri possesses another such leader.

Under the census of 1850 and the apportionment bill which subsequently passed Congress the State became entitled to seven members of Congress. The Legislature which met in 1853 districted the State into seven congressional districts, as follows:

First, the county of St. Louis.

Second, the counties of Marion, Ralls, Monroe, Pike, Audrain, Boone, Callaway, Montgomery, Warren, Lincoln, and St. Charles.

Third, Lewis, Clarke, Scotland, Knox, Shelby, Howard, Randolph, Macon, Adair, Schuyler, Putnam, Dodge (now part of Putnam), Sullivan, Linn, Chariton, Carroll, Livingston, Grundy, and Mercer.

Fourth, Ray, Caldwell, Daviess, Harrison, Gentry, DeKalb, Clinton, Clay, Platte, Buchanan, Andrew, Nodaway, Atchison, and Holt.

Fifth, Jackson, Cass, Henry, Johnson, Lafayette, Saline, Pettis, Benton, Morgan, Moniteau, Cooper, Cole, and Miller.

Sixth, Bates, Jasper, Newton, McDonald, Barry, Lawrence, Dade, Cedar, St. Clair, Hickory, Polk, Greene, Stone, Taney, Ozark, Wright, Dallas, Laclede, Camden, Gasconade, Osage, Pulaski, Texas, and Oregon.

Seventh, Franklin, Jefferson, Ste. Genevieve, Washington, Crawford, Dent, Shannon, St. François, Perry, Madison, Reynolds, Cape Girardeau, Bollinger, Wayne, Scott, Ripley, Mississippi, Butler, Stoddard, New Madrid, Dunklin, and Pemiscot.

The congressmen elected in 1852 being residents of the First, Second, Fourth, Fifth, and Sixth Districts, the act provided that in 1853 elections should be held in the Third and Seventh for the two additional members. At this election James J. Lindley, Whig, defeated Claiborne F. Jackson, Democrat, in the Third, and in the Seventh Samuel Caruthers, Democrat, defeated English, Democrat, Jackson, Democrat, and Rozier, Whig. In 1852 the State cast her electoral vote for Pierce and King. The Democratic electors were E. D. Bevitt, Henry F. Gary, C. F. Jackson, C. F. Holly, Alexander Kayser, W. D. McCracken, John D. Stevenson, J. M. Gatewood, Robert E. Acock, and J. F. Jones; and Thomas L. Anderson, J. A. Brown, W. A. Cunningham, Charles B. Gibson, Robert A. Hatcher, D. E. Perryman, Ben Tompkins, and John S. Waddill the Whig electors. The popular vote of Missouri for President stood: Pierce, 38,353; Scott, 29,984. For Governor, Sterling Price, Democrat, 46,245; James Winton, Whig, 32,784.

In 1854, Samuel Caruthers, L. M. Kennett, Gilchrist Porter, James J. Lindley, M. Oliver, John G. Miller, and John S. Phelps were elected to Congress. Mr. Phelps was the only straight Democrat elected. Mr. Caruthers claimed to be a Democrat during this campaign, and denied being a Know-Nothing at any time.

In 1855 the State was again divided by the Legislature into congressional and electoral districts, but only a few changes were made in the districts as formed in 1853.

In 1856 the members of Congress elected were F. P. Blair, Jr., J. L. Anderson, James S. Green, James Craig, Samuel H. Woodson, John S. Phelps, and Samuel Caruthers. This year Thomas P. Ackers was elected to fill the vacancy caused by the death of John G. Miller, and in 1857, John B. Clark, Sr., was elected to fill the vacancy caused by the election of James S. Green to the United States Senate. The vote of the State in 1856 was cast for Buchanan and Breckenridge.

In 1855 the division of parties in the Legislature was so equal, standing anti-Benton, fifty-six; Benton, forty; Whig, fifty-nine, that no election of senator could be made, and after many ineffectual ballots the Legislature adjourned, December 13th, without electing a senator. In 1856, James S. Green, anti-Benton, was elected; and to succeed Senator Geyer, Trusten Polk was chosen.

The celebrated Dred Scott case entered into politics, State and national, about this time. The impression has been created that the case was got up and pushed to a final conclusion in the Supreme Court by the friends of the administration as a party movement. The true history of the matter seems to be as follows:

Scott instituted a suit in the Circuit Court of Missouri to obtain a discharge from servitude for himself and family. On the trial it was proved that he had been originally a slave in Missouri, that his master first took him to the military post at Rock Island, in Illinois, and subsequently to Fort Snelling, in Minnesota, at a point north of the Missouri Compromise line, and that he and his family subsequently returned with him to Missouri. It was contended in his behalf that, inasmuch as his owner had voluntarily taken him to places where slavery did not exist by law, both he and his family became free, and remained so after returning to a slaveholding State. The Circuit Court decided in his favor.

On appeal to the Supreme Court of Missouri, that tribunal held that he and his family, on returning to the State, continued slaves. Between the announcement of the opinion of the court and the filing of its mandate in the Circuit Court, Scott voluntarily dismissed his suit in the State Court, thus evading the decision against him, and thereupon instituted another in the Circuit Court of the United States. In this court the question of jurisdiction depended upon his being a citizen of Missouri, and the defendant a citizen of another State. If the court should be of opinion that he was a citizen, then he claimed that he was free, because his owner had taken him to Illinois, and also to part of the Louisiana Territory north of the Compromise line.

The Circuit Court rendered final judgment against him, and thereupon he appealed to the Supreme Court of the United States. The case came to trial in May, 1854, and the same questions were raised and twice argued by his counsel, and also determined against him. The cause was last argued by George T. Curtis, brother of Judge Curtis, and Montgomery Blair, son of Francis P. Blair, Sr., for the plaintiff, Scott; and by Senator Geyer and Reverdy Johnson for the defendant. Messrs. Curtis, Geyer, and Johnson were Whigs, while Mr. Blair's political sympathies were understood to be with his father. On the first argument neither Mr. Curtis nor Mr. Johnson took part.

The fact that the court ordered a reargument is ample proof of the importance of the questions involved and the difficulty of solving them. On the last argument the court-room was filled with intelligent and anxious listeners. The court took time to deliberate and prepare their opinions. Each judge formed and expressed his own convictions, and the reasons upon which they were founded. The owners of Dred Scott did that for him which the Supreme Court of the United States decided the law would not do,—they made him a free man. This favor was accorded to him May 26, 1857, in the Circuit Court, where Taylor Blow appeared and entered on record the papers necessary to secure the freedom of Dred Scott, his wife, Henrietta, and his two daughters, Eliza and Jane. Mr. Blow was merely the technical owner of the slaves, having become so in order to comply with the law of Missouri, which required that a person manumitting a slave should be a citizen of the State. To constitute him an owner the title must have passed from Dr. Chaffee, his wife and her child or children; and therefore they sold these slaves to him for a nominal consideration, perhaps, but still they were sold, and by such means Dred Scott and his wife and children were set free. The ownership was in Dr. Chaffee and his family, pending the trial in the courts.

In 1856, Trusten Polk, Democrat, was elected Governor, receiving 46,993 votes, as against 40,589 cast for Robert C. Ewing, American, and 27,618 for Thomas H. Benton, Independent. In 1857 a special election was held for Governor, at which Robert M. Stewart, Democrat, received 47,975 votes, and James S. Rollins, Whig, 47,641 votes.

In 1858, J. Richard Barret, Thomas L. Anderson, John B. Clark, James Craig, Samuel H. Woodson, John S. Phelps, and John W. Noel were elected to Congress. The candidates in St. Louis were Messrs. Barret, Breckenridge, and F. P. Blair, and their votes were: Barret, 7057; Blair, 6631; Breckenridge, 5728; Barret's majority, 426. Mr. Blair, however, contested the seat of Barret and ousted him, but Mr. Blair upon taking his seat tendered his resignation, to take effect on the day of the next general election in 1860. At this election Mr. Barret was elected to the vacancy, and to the seat from which he was ousted, and Mr. Blair was elected as Mr. Barret's successor.[1]

[1] In 1859, U. S. Grant, afterwards the distinguished general and President of the United States, applied to the commissioners of St. Louis County for the appointment of county surveyor. In a note to the editor of the *Missouri Republican*, dated Feb. 26, 1881, Hon. John F. Darby gives the following account of this episode in Gen. Grant's career:

"In your obituary notice of Henry B. Belt, Esq., in this morning's *Republican*, in speaking of the deceased, among other things, you say, 'He was one of the judges of the county court from 1854 to 1856, and was one of the two judges that voted favorably on the application of U. S. Grant for the appointment of county surveyor. The other judge was Phil. Lanham.'

"You have been misled in above statement. It is entirely untrue. U. S. Grant never applied to the county court for the appointment of county surveyor. In 1859, after the county court of St. Louis County had been abolished by the Legislature for alleged misconduct, and a new court established by law for St. Louis County, called the county commissioners' court, composed of Lightner, Taussig, Farrar, Easton and Tippet, U. S. Grant did apply to the county commissioners' court for the

In 1860, F. P. Blair, Jr., James S. Rollins, John B. Clark, C. H. Norton, John W. Reid, John S. Phelps, and John W. Noel were the members of Congress elected. Messrs. Clark and Reid being in sympathy with the Confederate cause, and having entered the Confederate army, were expelled. Mr. Clark lived to see his son elected and serving his fifth term in the hall from which he was expelled. William A. Hall was elected in place of Gen. Clark, and Thomas L. Price to the Reid vacancy. The nine electoral votes of the State were cast this year for Douglas and Johnson.

Following was the vote in St. Louis at the Presidential election of 1860:

WARDS AND PRECINCTS.		Lincoln.	Bell.	Douglas.	Breckenridge.

The news of the operations of Montgomery, the abolitionist leader from Kansas, on the southwestern border of Missouri having been authenticated, Governor Stewart at once issued orders calling out the militia "to prevent the threatened depredations upon the lives and property of Missourians." The military ordered to report for duty under command of Brig.-Gen. D. M. Frost, with Col. J. S. Bowen as assistant adjutant-general, were Col. A. R. Easton's regiment of infantry, Maj. Schaeffer's battalion of cavalry, Capt. Jackson's battery of artillery (four pieces), and Maj. Pritchard's battalion of engineers. Lieut.-Col. John Knapp commanded the First Regiment of Infantry.

At the State election of 1860 the vote for Governor was as follows: Claiborne F. Jackson, Douglas Democrat, 74,446; Sample Orr, American, 64,583; Hancock Jackson, Breckenridge Democrat, 11,415; James B. Gardenhire, Republican, 6135. Jackson's majority over Orr, 9863. Thomas C. Reynolds was chosen Lieutenant-Governor. The popular vote for President was: Stephen A. Douglas, Democrat, 58,801; John Bell, Union, 58,372; John C. Breckenridge, Democrat, 31,317; Abraham Lincoln, Republican, 17,028. Douglas' majority over Bell 429, and over Breckenridge 27,484.[1]

appointment of surveyor of the roads, etc., in St. Louis County against Mr. Solomon. I and other gentlemen advocated Grant's claim. Solomon was appointed by the vote of Taussig, Lightner, and Farrar, and Tippet and Easton voted for Grant. Consequently Belt and Lanham were not on the bench, and never voted upon any application for appointment by U. S. Grant. The records of the St. Louis County commissioners' court show this."

[1] Mr. William Hyde, of the *Missouri Republican*, relates the following interesting reminiscences of the political campaign of 1860 in Missouri:

Nathaniel Paschall, the editor of the *Republican*, had been the warm friend and advocate of a liberal policy on the part of the State towards the railroad enterprises then in progress,—the North Missouri, the Missouri Pacific, the Iron Mountain, and the Southwest Branch,—to all of which State aid had been extended by guaranteeing the interest on their bonds. The question of the completion of these roads through the State or, on the other hand, the sale of them for forfeiture was a vital one to the commerce of St. Louis and to the people at large. Claiborne F. Jackson was the recognized anti-railroad candidate for Governor. He also belonged to the extreme Southern school, and was, besides, bitterly opposed to Douglas, to whom Mr. Paschall was warmly attached personally, and whose (Douglas') aspirations for the Presidency were strongly supported by the *Republican*.

Previous to the State Democratic Convention, which was held early in April, for the purpose of nominating candidates for Governor and State officers and of sending delegates to the Charleston Convention, Mr. Paschall had declared boldly that his paper would support no gubernatorial candidate in favor of the sell-out policy respecting railroads, or who, as Governor Stewart had done would veto or use his influence to withdraw from them the State's loan of its credit.

The Hannibal and St. Joseph Railroad, to which the State had loaned three millions, was the only completed road in Missouri, and it was used as a feeder to the trade of Chicago. Its agents were abroad in all sections, and it was charged that they were "setting up the press" for Jackson. At all events, Maj. Jackson was nominated for Governor, and the convention placed a plank in its platform quite equivocal, and non-asserting relative to internal improvements. Of course the *Republican* promptly "kicked the platform overboard," to use Mr. Paschall's expression. Moreover, it had not a word to say

The General Assembly met at Jefferson City, Dec. 31, 1860, under peculiarly embarrassing circumstances. South Carolina had seceded from the Union, and Mississippi, Florida, Alabama, and Georgia were contemplating the same action immediately. Four political parties were represented in the General Assembly. The Senate, consisting of thirty-three members, was divided into Breckenridge Democrats, 15; Douglas Democrats, 10; Union, or Bell and Everett Whigs, 7; Republicans, 1. The House, consisting of 132 members, stood: Breckenridge Democrats, 47; Douglas Democrats, 36; Union, or Bell and Everett Whigs, 37; Republicans, 12. Great bitterness of feeling was developed between the Union and Southern elements, and many exciting episodes occurred.

John F. Mc[illegible] Shelby, a decided pro-slavery Democrat, was [illegible]ed Speaker of the House, and Claiborne F. Jackson, elected Governor at the preceding election, was inaugurated Jan. 4, 1861. As chairman of the committee which reported the famous "Jackson resolutions" of 1849, Governor Jackson was not expected to abandon the issue, now imminent, which he had so boldly invited when looming up in the distance. In his inaugural message he insisted that the destiny of Missouri was identical with that of the Southern States, that her fate could not be separated from theirs, that in the event of a failure to reconcile the conflict of opinions which threatened the destruction of the Union, interest and sympathy

relative to Jackson's nomination. There was no love lost between Paschall and Jackson. Paschall disliked Jackson, and Jackson hated Paschall.

Things went on in this way, no notice being taken of the State campaign, and powerful articles coming from Paschall's pen every morning for the nomination of Douglas, until the 1st of May. On that day there appeared in the leading editorial column a statement of the position of Maj. Jackson—that he would not veto any measure of State aid to the railroads passed by the Legislature, but would use his best endeavors to keep the control of the roads within the State—concluding, "These declarations of Maj. Jackson are satisfactory to us." And on that day the full Democratic ticket was swung to the breeze at the *Republican's* editorial mast-head. That circumstance told the story: Jackson had surrendered.

From the adjournment of the Charleston Convention till the reassembling at Baltimore in June the *Republican*, still battling vigorously for Douglas, poured hot shot into the secessionists. Jackson had been making a thorough canvass of the southwest, and had returned to Central Missouri when the news was received of the nomination of Douglas and the subsequent nomination of Breckenridge by the seceders. Jackson was in sore distress. His heart was with Breckenridge. The whole State was in commotion. Senators Green and Polk at once took the ground that neither Douglas nor Breckenridge was the regular nominee, and that Democrats were at liberty to support either without disloyalty to the party. In St. Louis steps were taken without delay to induce Maj. Jackson to espouse the cause of Breckenridge, accompanied with the threat that in case of refusal his friends would bring out another Democratic State ticket. At Washington the Missouri senators, together with Wm. A. Price, Peter S. Wilkes, Wm. Harris, and John S. Phelps, issued a circular, addressed to Missouri Democrats, recommending a convention at Jefferson City, September 17th, "to adopt measures to insure unity of action,"—all these, except Phelps, having already declared for Breckenridge. But meanwhile Nathaniel Paschall was not idle. He had caused notice to be served upon Jackson and Reynolds (the latter candidate for Lieutenant-Governor) that they must not expect to profit by a hasty nomination in their own cases and at the same time withhold from Mr. Douglas the advantage a nomination was expected to give *him*.

Maj. Jackson was billed to speak at Versailles, June 27th; California, 28th; Boonville, 29th; and Fayette, 30th. He had not opened his mouth on the subject of the Presidency, but devoted his whole time to State issues. Mr. Hyde had been sent out by Mr. Paschall with letters to Jackson, and instructions to follow him up and make confidential reports of the progress of the campaign. At California, Mr. Hyde occupied the same room with Maj. Jackson, and during the night of the 27th of June the gubernatorial candidate was awakened and summoned to "important business outside." The messenger was John M. Loughborough, who had ridden on horseback from the railroad terminus, and who was the bearer of a letter from the administration office-holders of St. Louis and others, imperatively demanding instant and faithful adhesion to Breckenridge. A long conference ensued, and when Maj. Jackson returned to his room he was in a terrible state of excitement. He paced the floor till near morning, uttering bitter imprecations, now upon Paschall and then upon the Breckenridge leaders, for putting him in the dilemma [illegible] having to choose between the warring factions. In his [illegible] the next day at California, Jackson was still silent, [illegible]'s private conversation would be de[illegible] more than depre[illegible]thappy divisions of the party. Mr. Paschall by dispatch authorized him to be notified that in case he did not "come out for Douglas," either at California or Boonville, the *Republican* would take his name down and proceed to organize for a straight-out Douglas ticket. By this time Reynolds had joined his chief, and his efforts were in the direction of a public recognition of Douglas and Johnson as the regular Presidential nominees. Jackson appealed for more time, saying he wished to consult with Gen. Clark at Fayette; Gen. Clark having been a member of the Baltimore Convention, and then at home. Mr. Paschall granted the extension of time, and awaited what might take place after the expected conference. The result was that in their speeches at the Fayette court-house both Jackson and Reynolds unequivocally declared for Douglas. A dispatch to this effect was sent by mounted messenger in hot haste to Boonville, the nearest telegraph station, in time to be transmitted to the *Republican* that night for publication the next morning. It struck consternation into the breasts of the Breckenridge phalanx, who for two days disputed its authenticity, and then, July 3d, by a mass-meeting, launched into the field new candidates for Governor and Lieutenant-Governor in the persons of Gen. Hancock Jackson (United States marshal), and Gen. M. M. Parsons. There were now four candidates for Governor before the people, there being beside the two Jacksons the Bell and Everett candidate (Sample Orr) and the Republican candidate, Gardenhire. The result of the contest was the election of Jackson.

It takes no very fine analysis of the vote to show that the course of the *Republican* carried Missouri for both Douglas and Jackson, and the moving power was Nathaniel Paschall.

alike demanded that she should unite her fortunes with those of the slaveholding States. He urged the Legislature to call a convention of the people of the State to take into consideration the condition of the State and the Union, and to prepare for emergencies which might and probably would arise. In accordance with these suggestions, a bill was introduced Jan. 17, 1861, and subsequently became a law, calling upon the people to elect delegates to a convention to assemble February 28th. The bill provided that no ordinance changing the relation of Missouri to the United States should take effect until submitted to a vote of the people and ratified by a majority at the polls. This proviso was intended to prevent the enforcement of any ordinance of secession that might be passed by the convention severing Missouri's connection with the Union. The Legislature entered heartily into the efforts which were made to prevent a collision between the United States and the Southern States. To this end Waldo P. Johnson, John D. Coalter, N. W. Doniphan, Harrison Hough, and A. H. Buckner were appointed delegates to the "Peace Congress" to assemble in Washington, Feb. 4, 1861. While thus holding out the olive-branch to the Union, the Senate of Missouri also adopted, March 9, 1861, the Dent resolutions, instructing the senators and requesting the representatives in Congress from Missouri to oppose with voice and vote all grants of men and money designed to be used in coercing the Southern States, and providing for the withdrawal from Congress of the members from Missouri if any such laws were passed. These resolutions were not acted upon by the House of Delegates. Waldo P. Johnson,[1] a Breckenridge Democrat, was elected March 15, 1861, to the United States Senate, to succeed James S. Green, whose term had expired.

Hon. James S. Green was born in Fauquier County, Va., Feb. 28, 1817, and in 1836, with no fortune beyond a common school education, removed to Alabama, where he remained one year. He then took up his residence in Missouri, with whose interests he was afterwards identified. He was admitted to the bar in 1840, and soon became a prominent figure in Missouri politics. In 1844 he was chosen Presidential elector, and in 1845 was elected a delegate to the State Constitutional Convention of that year. In 1846 he was elected a member of Congress, and served two terms. By appointment of the Governor of Missouri, he argued a boundary dispute between Missouri and Iowa before the United States Supreme Court, and in 1849 took the stump against Hon. Thomas H. Benton. In 1853, President Pierce appointed him *chargé d'affaires* and afterwards minister resident at Bogota, New Granada. In 1856 he was again elected to Congress, but before taking his seat was chosen United States senator, continuing to serve as such until 1861. He died at St. Louis on the 19th of January, 1870.

As has already been described in the preceding pages of this work, the news of the bombardment of Fort Sumter and its surrender, which soon followed, went through the country like a flame of fire. There had been some expectation of violence, but the actual shock came like a clap of thunder. The people of the towns and cities poured into the streets, and the country folk flocked to the villages to gather the tidings and to comment on the coming conflict. Gray-haired men talked gravely of the deed that was done, and prophesied as to its consequences. Public opinion in both the North and the South was rapidly consolidated. The surrender of Fort Sumter produced in the North a coalescence of the Union and anti-slavery elements; in the South it irresistibly carried whatever Union sentiment existed into secession.

The garrison of Fort Sumter lowered their flag and marched out of the work on Sunday, April 14, 1861. Next morning appeared the proclamation of the President of the United States, calling forth the militia, appealing to the people, and summoning an extra session of Congress.

The Governors of all the Northern States at once responded to the proclamation, and their action infused new energy into the administration. To an eye-witness there was something very impressive in the action of the Union-loving people. A foreign observer remarked, "With them all is sacrifice, devotion, grandeur, and purity of purpose,—with the poor, if possible, even more than the rich." In the large cities great meetings were held, in which men of all parties united. Party lines vanished. There was none of that frantic delirium which was manifested in the extreme Southern States, but a solemn acceptance of what was clearly recognized to be a fearful but unavoidable duty,—"Faint not, falter not; the republic is in peril."

In St. Louis the Union men intuitively saw the true position of affairs, and that the only course to be taken was an energetic support of the government. Under the leadership of Frank P. Blair, Giles F. Filley, James O. Broadhead, O. D. Filley, S. T. Glover, B. Gratz Brown, William McKee, Francis Whittaker, John J. Roe, Edgar Ames, Henry Ames

[1] By resolution of Mr. Foote, of Vermont, Jan. 10, 1862, Mr. Johnson was expelled from the Senate, as well as Trusten Polk. The vacancies were filled by the appointment of Robert Wilson and John B. Henderson.

Henry T. Blow, Hudson E. Bridge, B. G. Farrar, Henry Hitchcock, T. T. Gantt, Charles Gibson, Barton Able, and other patriotic citizens the Union men of St. Louis were roused to resistance, and active preparations were made for the suppression of treason to the government. Arms were purchased by private subscription and troops equipped, and on every side were heard the notes of preparation. Missouri was a slave-holding Commonwealth, but was retained in the Union by the vigilance and activity of its Union-loving citizens. The secessionists, however, were numerous and powerful; the Governor, as we have seen, favored their cause, and the State became a battle-field for the contending parties.

As it is a part of the plan of this work to give brief biographical sketches of leading and representative men, living and dead, who have borne an active part in the various enterprises of life, and who have become closely identified with prominent events in the history of the city and county of St. Louis, we cannot overlook the services of a few of those who were most active in support of the Union during this eventful period. The achievements of the living must not be forgotten, nor must the memories of those who have passed away be allowed to perish. Their deeds are recorded for the benefit of those who follow them,—they, in fact, form part of the history of their communities, and their successful lives add to the glory of their city and State.

Foremost among those in St. Louis who never tired in aiding the government in support of the Union were the Filleys,—Giles F., Oliver D., Chauncey I., E. A., and S. R. Filley.

Giles F. Filley was born Feb. 15, 1815, in what is now called Bloomfield, Conn. His boyhood was spent on a farm, and his early education was rather limited, being restricted to what was known as the common school system of the New England States. He, however, spent three terms at Wilbraham Academy, Massachusetts, where the higher branches were taught. Both his parents were natives of Connecticut.

In 1834 young Filley removed to St. Louis to learn the tinner's trade with his brother, Oliver Dwight Filley, who had preceded him in 1829. After learning the trade he became a partner with his brother, and continued the manufacture of tinware until 1841, when he sold his interest to his brother and went into the crockery business, in which he continued until 1849. In that year he sold out to Edward A. and Samuel R. Filley, his cousins. Both these business ventures were successful.

While in the crockery trade Mr. Filley was induced, from the wonderful abundance of potter's clay of all kinds in Missouri, to believe that earthenware might be profitably manufactured at St. Louis, and in 1844 he went to England and brought out several English workmen and established a pottery. For a season the experiment seemed likely to succeed. Excellent samples of earthenware and some very beautiful specimens of whiteware ("stone china") were produced, but the men gradually drifted away, and as it was impossible to fill their places except at great trouble and expense, the works were abandoned. The experiment, however, was not in one sense a failure, for it lasted three years, long enough to prove that earthenware could be profitably manufactured in St. Louis.

In 1849, Mr. Filley built what were known as the "Excelsior Stove-Works," for the manufacture of stoves. The start was made in rather a small way, the employés numbering twenty-five moulders and about twenty men in other departments. These works have been extended and enlarged from time to time until they now employ two hundred and thirty moulders and about three hundred and twenty men in other departments, five hundred and fifty in all at the works proper, which cover two large blocks in North St. Louis. In 1865 the works were incorporated into what is known as the "Excelsior Manufacturing Company," and the business now includes the furnishing of tinner's supplies as well as the making of stoves, and the whole number of employés is about six hundred and fifty.

In 1851, Mr. Filley invented what is known as the "Charter Oak Cooking Stove," which has since become popular throughout the country. He has also originated and introduced many improvements in the methods of stove-making, and is regarded as one of the most wide awake and successful manufacturers of stoves in the land.

Notwithstanding the successful superintendence of these large works might be thought sufficient to completely occupy the time and attention of one man, Mr. Filley has often engaged in other business enterprises of a nature likely to advance the interests of St. Louis, and has made an enviable record as an enterprising and public-spirited citizen. He furnished the stone for the "great bridge," and is glad to be remembered in connection with that great work. Perhaps his most prominent undertaking was the building of the Kansas Pacific Railroad. Among his colleagues were Adolphus Meier, John D. Perry, Carlos S. Greeley, and others of equal worth and prominence. Only those intimately conversant with the history of that enterprise know amid what giant difficulties Mr. Filley and his friends took hold of the project and pushed it forward, and it cannot be gainsaid that to

these energetic men the country owes the completion of this great link in the chain that unites the Atlantic and Pacific States.

Mr. Filley has kept aloof from the strife that attends office-seeking, but although never elected to office, he has in his day played quite an interesting *rôle* in the politics of the city. He is a man of intense earnestness of conviction, and in 1848 was one of the adventurous band that formed the "Free-Soil" or "Liberty" party in Missouri, and prominently assisted in establishing the *Barnburner*, yet well remembered as a Free-Soil organ.

Later, Mr. Filley was interested in an association which founded the *Union*, the paper established during the war as a national Union paper to support Mr. Lincoln in opposition to the *Democrat*, which was the "organ" of Gen. Fremont; and he was also for some time interested in the *Dispatch*, which was the lineal successor of the *Union*, and which was ultimately merged into the present *Post-Dispatch*.

Mr. Filley was also prominent in the stirring political agitation that preceded the breaking out of the war. He was intimately associated with Hon. Frank Blair in all his efforts to build up a Free Soil party, and in 1856 he cast one of the four electoral votes which were given by Missouri for Fremont, the Republican candidate for President. When the war came he was, as we have before stated, one of the foremost and most active of the anti-secession party, and armed a company of one hundred of his employés to help Gen. Lyon in defending the arsenal. These were among the first volunteer troops equipped in the whole country for the suppression of the secession movement. Later during the war he served on the commission to assess fines against Southern sympathizers in St. Louis,—a very unpleasant duty, which he performed with reluctance. Only one or two assessments were made, and to his great relief the commission was of short duration. Of late years he has been disposed to act independently in politics.

In September, 1844, Mr. Filley was married in Hartford, Conn., to Maria M. Farrington. Nine children, all boys, sprang from this union, six of whom are living.

Although Mr. Filley is nearing the psalmist's limit of "threescore years and ten," he is still actively at the head of his large and intricate business, with apparently little diminution of the energy of his younger years. The "tinner boy" of 1834 can now look back over a business career of nearly fifty years, which have been eminently characterized by an energy, industry, and rectitude that have not only brought Mr. Filley the satisfying return of a very large competence, but the general esteem of the community as being one of the most upright and honorable citizens of St. Louis. Mr. Filley has given a remarkable proof of high commercial honor, and one that has seldom been equaled in the business annals of the world. During the years ranging from 1864 to 1867 he had been a heavy indorser for a gentleman well known in the city, and whose financial and business character was above suspicion. Mr. Filley, with other friends, lent this gentleman his assistance, and indorsed for him heavily. Finally this well-known citizen failed, and Mr. Filley found, somewhat to his surprise, that his obligation as an indorser closely approached one million dollars. There were no assets applicable to any portion of this indebtedness. Mr. Filley's friends advised him to go into bankruptcy, and promised him such aid as he might require for his re-establishment in business, but he decidedly and energetically resisted every suggestion of this kind, and declared his intention of paying every dollar of this enormous debt if the creditors would only give him reasonable time. This was generally accorded, and for some years he applied himself to his heroic task, one sufficient to unnerve and drive to the wall any man of common mould. In 1881 he had the supreme satisfaction of seeing the last dollar of this mountain of obligation—now, with interest, one million three hundred thousand dollars—lifted from his ledger and from his heart. In all that period Mr. Filley not only kept the business of the company intact but largely extended it. He justly regards this exploit as the crowning triumph of a life distinguished for its successes. On the successful consummation of the heroic struggle his fellows in the National Association of Stove Manufacturers presented him with a bowl of sterling silver as a testimonial of the honor he had reflected upon their branch of trade through his unflinching devotion to principle.

Among those selected as a Committee of Safety in St. Louis, to whom was confided the guidance of all movements in the interest of the Union, was the distinguished lawyer and statesman, Hon. James O. Broadhead. Mr. Broadhead was born in Charlottesville, Albemarle Co., Va., May 29, 1819. His grandfather, Jonathan Broadhead, emigrated from Yorkshire, England, during the Revolutionary war, and settled in Albemarle County. His father, Achilles Broadhead, held many important public offices in Albemarle County, and was captain of a company of volunteer troops from Virginia in the war of 1812, and served during the war. He was a plain, earnest, sensible, religious man, and was trusted in every relation of life.

The mother of James O. Broadhead was Mary Winston Carr. She was of Scottish origin, and her ancestors occupied large estates in Virginia, where they settled at an early day. James was the oldest son; another was the distinguished geologist, Garland C. Broadhead.

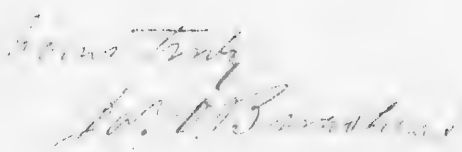
The parents belonged to the upper grade of country life, and were distinguished for their piety, staid integrity, and general public usefulness, with other high mental and moral characteristics, which they transmitted to their descendants.

Young Broadhead received a thorough classical training at the hands of his uncle, Dr. Frank Carr, a highly-educated gentleman, and at the age of sixteen entered the University of Virginia, supporting himself a year there wholly by his own exertions, and then was engaged as teacher of a private school in Baltimore. Meanwhile his father had removed to St. Charles County, Mo., and in June, 1837, he followed the family to Missouri, and settled in St. Louis. He first obtained employment as a tutor for the children of the Hon. Edward Bates, and his gentlemanly bearing and excellent attainments secured the confidence and regard of that gentleman, and indeed of all with whom he was associated. While so employed he was the law student of Mr. Bates, and spent three golden years under the guidance of that great lawyer and cultivated man.

In 1842 he was licensed to practice law by Judge Ezra Hunt, of Bowling Green, Mo., and began his practice in that circuit, opposed to a bar of eminent men, to contend with whom required not only extraordinary exertions but extraordinary abilities. The large and lucrative practice, however, which the young lawyer soon enjoyed demonstrated his unusually thorough equipment for the duties of his exacting profession. He also took a prominent part in public affairs, and his popularity and the general appreciation of his ability were shown by his election to the Constitutional Convention of 1845 from the Second Senatorial District. In 1847 he was chosen a member of the Legislature from Pike County, being elected as a Whig, and against a decided opposition majority, over N. P. Minor, a popular and influential Democrat. In 1850 he was chosen to represent his district in the State Senate, after a canvass of unusual warmth. The strength which he exhibited in these struggles confirmed his hold upon the public, and the ability with which he discharged his public duties demonstrated the wisdom of the popular choice. In his legislative career he proved to be an accomplished debater, and established an enviable reputation as a gentleman of character and worth.

In 1859, Mr. Broadhead removed to St. Louis, where he formed a law partnership with F. C. Sharpe, and immediately secured a large and remunerative business. He has continued in legal practice ever since, except when engaged in public service, and when there have devolved upon him responsibilities of unusual importance.

In the winter of 1860–61, in the midst of the agitation preceding the war, Mr. Broadhead was prominent in the vigorous measures then undertaken for the purpose of organizing and consolidating Union sentiment, and to defeat the alleged conspiracy to sweep Missouri into secession. In February, 1861, it was determined that force should be met with force, and to this end steps were taken to organize with arms for the protection of Union men, and to resist, if need be, assaults of Southern sympathizers. At the head of this movement, as previously stated, was placed a "Committee of Safety," and at the suggestion of Hon. Francis P. Blair, Jr., Mr. Broadhead was one of the five persons selected to act in this important capacity, and was made secretary of the committee. When the committee was organized there were but two companies of United States troops west of the Mississippi River, but it acted so promptly and successfully that six full regiments were soon mustered into the service of the United States and a most efficient military organization was perfected. This decisive action, no doubt, saved Missouri to the Union. In this work Mr. Broadhead was conspicuous for his activity; and such was the confidence reposed in his patriotism and judgment that at a public meeting of Union men he was nominated as one of fifteen candidates to represent them in the Constitutional Convention which had been called to determine the attitude of Missouri in the impending struggle. He was elected by nearly six thousand majority. In that convention he strongly advocated prompt and decisive action as the only means of saving the State and the Union. He was chairman of the committee which, in July, 1861, reported in favor of vacating the offices of Governor, etc., on the ground that Governor Jackson and his colleagues had left the State to join the Confederates; and the next day his recommendation was adopted, and a provisional government was established with Governor Gamble at its head.



In the same year, and at its most exciting period, Mr. Broadhead was appointed United States district attorney for the Eastern District of Missouri, to fill the vacancy occasioned by the death of Asa Jones, and in the discharge of the duties of this office, it is said, discovered much important evidence, unmasking the plans of Governor Jackson and his associates,

which opened the eyes of the Union men to the deliberate character of the plot to take Missouri from the Union, and caused the lines between loyalists and secessionists to be closely and distinctly drawn. Other duties, however, compelled Mr. Broadhead to resign in a few months, he having been appointed provost-marshal-general of the department embracing Missouri, Arkansas, Kansas, the Indian Territory, and the southern part of Iowa. He discharged the delicate and responsible duties of that office with judgment and vigor.

To give any accurate account of the services of Mr. Broadhead during the war would really involve a history of the entire struggle in Missouri. Suffice it to say that he was among the foremost of the energetic men whose patriotism and courage saved the State to the Union when feeble counsels would have lost it, and he will be forever honored, with Blair, Lyon, and others, for his inestimable services at probably the most critical period of the war, when, had Missouri yielded, the border States would have been precipitated into secession, and the Confederacy would probably have been speedily and firmly established.

In 1875, Mr. Broadhead was chosen a member of the Constitutional Convention of that year, and took a prominent part in its deliberations. At its close he resumed the practice of his profession in St. Louis, and for several years was at the head of the well-known law firm of Broadhead, Slayback & Haeussler, one of his associates being the lamented Col. A. W. Slayback, whose tragic death in October, 1882, shocked the community. The extent and variety of his practice afford the best evidence of his ability as a lawyer.

In 1882, in response to a general demand, Mr. Broadhead consented to become the Democratic candidate for Congress in the Ninth District for the Forty-eighth Congress, and also for the vacancy in the old Second District caused by the death of the Hon. Thomas Allen. He was, it is claimed by his friends, elected for the former, after a severe struggle, over a very popular and rich opponent; but his adversary received the certificate for the short term. His friends entertain no doubt that in the larger domain of national legislation he will acquit himself as ably and creditably as he has invariably done in State affairs, and many hope that still higher honors await him. In 1876 he was the choice of the Missouri delegation in the Democratic National Convention for President of the United States, and this circumstance demonstrates his standing among those who have closely watched his career during forty busy years.

In 1847, Mr. Broadhead was married to Miss Mary S. Dorsey, a native of Maryland, and an accomplished and estimable lady, belonging to a well-known and highly-esteemed family. The union resulted in three children,—Charles S. Broadhead, who has selected the profession of the law, under his father's guidance, and two daughters, Mary W. and Nannie D. Broadhead.

Col. Broadhead's industry and energy, his courage, and his fidelity to principle are sufficiently illustrated in the simple record of his career, and seem to require no further comment. His geniality has won for him the universal good will of his professional brethren, and their confidence in his ability, integrity, and fairness is implicit. The clearness and force of his opinions give him a great influence with the courts, and many most important controversies have been settled upon the strength of his judgment as an advocate. His standing among his legal brethren appears from the fact that in August, 1878, he was elected the first president of the American Bar Association, a society comprising the leading lawyers of the country, and organized to advance the science of jurisprudence and uphold the honor of the profession of the law. His treatment of younger attorneys is marked by forbearance and patience. The manly dignity of his presence and the unassuming simplicity of his manners are remarkably illustrative of his character, which is strong, direct, straightforward, candid, and truthful. As a speaker, he is severely logical, yet often graceful and eloquent, as well as forcible. He possesses a fine fund of humor, and is full of sympathy for the unfortunate and the suffering, is of inexhaustible kindness of heart, is stanchly faithful to his friends, is intensely fond of nature, and is of simple tastes.

Conspicuous among those who not only lent the government their moral support and approval, but contributed their personal services without stint and with little thought of the sacrifices involved was Capt. Barton Able. When hostilities began Capt. Able promptly placed himself on the side of the Union, and his experience at critical times was of acknowledged advantage to the authorities. Such was the confidence of Gen. Lyon, who was in command at St. Louis, that Capt. Able was placed in charge of the transportation department in the city, and had sole charge of the expedition that conveyed Lyon and Blair to Boonville. He also had charge of transportation for the troops dispatched south by river, and commanded the fleet that left St. Louis with Gen. Fremont and the expeditionary forces to Cairo, in August, 1861. He co-operated with the leading Union men in all measures for the support of the goveru-

ment, and headed a committee to visit President Lincoln in the interest of Western measures.

But when the Southern soldiers laid down their arms, he was among the first to welcome them back and extend the fraternal hand; and with the olive-branch of peace, he was a member of the conservative delegation to the Baltimore Convention in 1864, and the chairman of the delegation to the Philadelphia Convention in 1866, to consider the state of the country, where he was most prominent.

A famous dispatch, showing the warmth of his feelings, was sent home by Capt. Able at the time, in about these words:

"The delegates from Massachusetts and South Carolina have just entered the convention arm in arm. Glory to God!"

Barton Able was born in Trinity, Alexander Co., Ill., six miles above Cairo, on July 31, 1823. His father was of Irish descent, and settled about the year 1810 in Cape Girardeau, Mo., from which place he moved to Illinois in 1820. He was a soldier of the war of 1812, and from 1830 to 1840 served with credit in the Illinois Legislature, among his colleagues being such men as Lincoln, Douglas, John Hogan, Jesse K. Dubois, Governor French, Col. J. T. Hardin, and James Shields. His mother was of Scotch parentage, bearing the name of the Camerons. Both parents died in 1840, and Barton at the age of seventeen, with few advantages of early education, was left to seek his fortune. In 1845 he left the old homestead and removed to St. Louis, where he arrived with one hundred dollars in money as his sole capital with which to start in life. After various efforts to obtain employment he at length shipped on board the Keokuk packet "Ocean Wave" as receiving clerk at a salary of thirty dollars per month, holding the position two years, when he was chosen by the owners as captain at a salary of one hundred dollars per month, in place of Capt. Whitney, who retired. He continued in charge of the "Ocean Wave" two years, when he assumed command of the steamers "Time and Tide" and "Cataract," running them in the Illinois River trade until 1854, when he was transferred to the Missouri River trade, taking command of the steamers "Cataract" and "Edinburgh."

He remained in this business until 1858, when, retiring from the river, he engaged in commercial enterprises, and conducted until 1864 a large commission-house on the corner of Pine and Commercial Streets.

Capt. Able, although in early life a Democrat, became identified with the Free-Soil ticket, upon which he was elected to the Legislature in 1850. While in this position he put Col. Thomas H. Benton in nomination for the United States Senate, and cast the first vote ever given for emancipation in Missouri.

Capt. Able was an admirer of Benton to the extent almost of hero-worship. As a statesman, he was his model in the elements of haughty, defiant courage towards his enemies and congeniality and condescension to friends. In his intimate association with this great man, Capt. Able listened with appreciation to his writhing invectives in rhetorical periods, and the contemptuous scorn with which he rebuked pretentious opponents, and these masterpieces of his oratory Capt. Able could repeat with an imitation so perfect that those who heard the original pronounced it to be absolutely Bentonian, as regards voice, gesture, and even the very language.

He was a Benton delegate to the Cincinnati Convention in 1856, which nominated Buchanan for President, and a delegate to the Chicago Convention in 1860, which nominated Lincoln, though the Missouri delegation was instructed for Edward Bates. He also accompanied Francis P. Blair and B. Gratz Brown to the Cincinnati Convention, which nominated Greeley in 1872. He was always a warm personal friend of President Andrew Johnson, from whom, unsolicited, he received the appointment of collector of internal revenue at St. Louis. In 1865, Capt. Able was elected president of the Merchants' Exchange, in which position he acquitted himself with credit, his experience in commercial matters and skill as a parliamentarian being of a decided advantage to the mercantile community. He was also a member of the National Board of Trade for some years, and frequently represented that and the Merchants' Exchange at Washington and in various conventions in the interests of Western trade and commerce.

Capt. Able was married in 1847 at Prairie du Rocher, Ill., to Miss Mary Ann Hailmon, daughter of Dr. David Hailmon, of Kaskaskia, who survived him, together with an adopted daughter. A brother, Capt. Daniel Able, of St. Louis, and a sister, the wife of Capt. N. S. Green, of Memphis, were the only relatives that survived of his father's family.

Capt. Able's death occurred on the 6th of May, 1877, and elicited general and earnest expressions of regret throughout the community. Personally, he was the friend or acquaintance of thousands of people, and by reputation was known not to St. Louisans alone, but throughout the entire West. So thoroughly identified, up to the time when his illness robbed him of his physical power, had Capt. Able been with all great movements in which St. Louis was interested, that to be familiar with the growth and progress of the city was to know him well. No man

was more prompt to take the lead in the promotion of new enterprises, and his genial face and dignified presence had long been familiar to everybody from the frequency with which he was called upon to preside at public meetings, political or otherwise, and the prominent place he always occupied as a matter of course among those giving weight to any popular movement. Aside from his sound judgment and broad views, Capt. Able was peculiarly fitted by nature for the prominence he always acquired on such occasions. Few men showed such tact as a presiding officer, and few were readier with an apt address whenever occasion required. Personally popular, the regard entertained for him was strengthened by a confidence in his judgment certain to be justified. In everything that tended to the commercial advantage of St. Louis and the city's material progress, he was among the first and most energetic movers, and his advice and good judgment were always sought for and heeded, particularly on committees. In the many railroad, bridge, and other enterprises he took part in the incipient stages, and if the object was successful, he joined heart and hand in celebration of their completion; and in all philanthropic objects, when a sister city was devastated by fire or stricken down with pestilence, Barton Able was among the first to enlist sympathy and urge material assistance. More could not be said of his earnestness of purpose and goodness of heart.

Another warm supporter of the Union at the outbreak of the civil war, and who did as much, perhaps, as any citizen of St. Louis to aid the government during that terrible period, was Hudson E. Bridge. At the beginning of the war Mr. Bridge was among the first to announce his position as one of unqualified devotion to the Union cause, and was elected a member of the convention of 1861, whose prompt action in establishing a provisional government for the State secured the position of Missouri in the Union. He was a liberal contributor in the organization of the earlier regiments, when no assistance could be had from the government at Washington, and he was at all times a generous donor to all the sanitary and other associations growing out of the war. His membership in the convention of 1861, however, was the only political trust he ever consented to accept.

Hudson E. Bridge was born at Walpole, N. H., whither his parents had removed a short time before from Worcester, Mass., on the 17th of May, 1810. He was descended from that old Puritan stock which found its way from the shores of the Old World and settled in the vicinity of Boston about the middle of the seventeenth century. In his early childhood his parents removed to Bennington County, Vt., where, under the shadows of the Green Mountains, he grew up in the life of the ordinary New England boy, spending the greater part of the year in the labors of the farm, and eagerly availing himself of the limited facilities for education which were provided during the winter months. In the very month in which he was twenty-one, against the protest of his friends, he turned his face towards the West, full of confidence that in its boundless resources there was a wider field for what he considered his own capacity for business success. Mr. Bridge left the parental roof with only six dollars in his pocket, to save which he walked to Troy, N. Y., and there entered a store, where he remained some six months, accumulating sufficient to take him to Columbus, Ohio, the place he had originally selected as his destination. Arriving at Columbus in the autumn of 1831, his first care was to survey the field before him, and while so doing he opened a school for the winter months, in which he was so successful that he was urged to continue it. But teaching was but a temporary expedient, not at all congenial to his tastes or disposition, and at the earliest opportunity he entered the employment of a firm there doing, for the place and period, an extensive business. While connected with this house as salesman he made trips covering the whole West, from Detroit to Nashville, and from Columbus to St. Louis. To his knowledge of the West and Western people, acquired at this time, Mr. Bridge attributed much of his later success. He was a man of great enterprise, always adventurous, and to do something which had not been done before—to extend the facilities for business, to cheapen the cost of manufacture, to make at home something that others thought necessary to bring from abroad—was always with him an object to be attained. It was with this view that, in 1835, he left Columbus and went to Springfield, Ill., and, in connection with Jewett, Matther & Lamb, inaugurated the manufacture of plows in that city, which up to that time had been brought from Cincinnati. The Jewett plow manufactured by them became the leading plow of the time, and the business of the firm was one of uninterrupted success.

It was during one of Mr. Bridge's trips to the Cumberland River for iron that his attention was attracted to St. Louis as a promising point for business, and after endeavoring without success to interest his partners at Springfield in the proposed new location, he removed in 1837 to St. Louis, and in company with Hale & Reyburn established the business in this city. Mr. Hale dying soon after, the business was continued by Bridge & Reyburn, and the de-

partment of stoves and hollow-ware was added. At this period all manufactures of this character were brought from the Ohio River. Mr. Bridge, however, conceived that the cost might be lessened by having the plates manufactured on the Tennessee River and put together in his own shop, and this was the first innovation. But this did not satisfy him. With only the experience in iron manufacture acquired in Springfield, he determined to make the plates in St. Louis, and in 1838 a little foundry was established in connection with his store. Old stove dealers warned the young man, then only twenty-eight years of age, of his folly in endeavoring to compete with the older manufacturers of Cincinnati, and of the failure that must inevitably follow. But Mr. Bridge soon found that by careful economy the cost of manufacture was less than the cost of bringing from the East. At this time he was his own foreman and salesman by day and his own book-keeper at night, and though of very humble pretensions in comparison with the establishment of to-day, the foundation was thus laid of the Empire Stove-Works, which was destined to become one of the largest and best-known manufacturing enterprises of the Mississippi valley.

Before 1840 he had gathered into his own family circle his parents and brothers, all of whom have passed away under his own roof, leaving himself alone to rest with them at last in the family lot at Bellefontaine.

In the year 1842, Mr. Bridge associated with him his younger brother, Harrison Bridge, and the firm of Bridge & Brother was established. His brother's death in 1850 left him again alone for several years. In 1857, John H. Beach, who had been for several years connected with the house, was admitted as an associate, and the firm of Bridge, Beach & Co. has continued to the present time. Mr. Bridge's relation as founder to the great manufacturing interest with which his name has been so long and honorably associated is but a small portion of his public history, and while his name is enrolled high on the list of the merchants and manufacturers of St. Louis, he stands higher still as the pure-minded, public-spirited, and honored citizen. It is not stating the case too strongly to say that there are few left who command in an equal degree, not merely the esteem and confidence, but the affection of the citizens of St. Louis. Of singular purity and simplicity in his private life, during the thirty-eight years of his residence in St. Louis no breath of reproach was ever heard against his good name. Honorable in all his dealings, rigorously just even against himself, his delicate sense of public and private duty made his name in the community the synonyme of mercantile rectitude and honor. A successful business career did not separate him from his fellow-men, but to all alike, the highest and the lowest, he preserved the simplicity of character and frank, cordial manner which those who knew him will long remember.

For the entire period of his residence in St. Louis he was a part of its business life and activity. So far from retiring from business pursuits on achieving success, increased wealth only opened new avenues for investment in business enterprises. He was a constant and generous contributor, and for many years an active worker, in every new public enterprise that could conduce to the growth and prosperity of the city. He was an original subscriber and worker in the inauguration of the Missouri Pacific, the North Missouri, the Iron Mountain, and Ohio and Mississippi Railroads, the St. Louis and Illinois Bridge Company, and many kindred enterprises, and was one of the original incorporators of Washington University, the Polytechnic Institute, and Mary Institute. In all of these institutions he was a trustee, and contributed generously to their support. During portions of his residence in St. Louis he was a director in the Boatmen's Saving Institution, the Merchants' Bank, the Pacific Railroad for fifteen years, and twice president, and one of the founders of Bellefontaine cemetery, dedicated upon his fortieth birthday, of which he was the first president, continuing as such through many years. He was also one of the founders and managers of the Institution for the Education of the Blind as a private institution, before it was conveyed to the State, a director and twice president of the Mercantile Library Association, whose present edifice was erected during his administration, and was due largely to his influence and energy, and a director in the St. Louis and Illinois Bridge Company, and other institutions with which his connection was less conspicuous. It was one of his business maxims that no citizen should allow his name to be used as a director in any corporation, or in connection with any public trust, to which he was unable or unwilling to devote his personal attention, and on this ground he frequently declined the use of his name as a responsible manager even when he was largely interested as a stockholder.

Extensive as were his connections with business interests up to the day of his death, he did not allow such connections to rule his life or to absorb his mind. Having passed the years of his boyhood in the country, he always retained a strong inclination to rural pursuits. About thirteen years before his death he purchased a considerable estate a few miles west of the city, and devoted much of his time to improving it

beautifying his residence and grounds, bringing to it the same practiced method and personal supervision that characterized all his relations. With rarely an exception, he returned from the city to his house every day at noon. There at Glendale, in the midst of delightful surroundings, and in the enjoyment of the society of his children, to whom he was devotedly attached, and of friends, he passed one half of every day, dispensing a hospitality not less warm and generous than it was simple and unostentatious.

The first indications of ill health occurred in the winter of 1873, from which he apparently fully recovered, and it was the hope of his family that his strong constitution, preserved as it had been by an exceedingly simple and temperate life, would conquer. A recurrence, however, ensued in a few months, subsequent to which, with intervals of improvement and relapse, his well-preserved physical constitution contended with that inexorable malady, Bright's disease. Throughout the entire period his cheerfulness never forsook him, but looking death calmly in the face, he continually advised about the business and personal affairs, giving directions for enlargement and extension in certain departments after his death. To a member of his family but a short time before his death, which occurred Feb. 25, 1875, he stated that he regarded his life's work as complete perhaps as it would ever be, and though he would have preferred living three or four years longer, on account of his younger children, he felt perfectly resigned to God's will in the matter, thankful for so much as had been given him.

Mr. Bridge had been a member of the Church of the Messiah (Unitarian) since his arrival in St. Louis. In his benefactions during his lifetime Mr. Bridge was unostentatious, and it is difficult to estimate their amount. They will, however, largely exceed a quarter of a million dollars, chiefly to educational institutions, in which he was greatly interested.

His gifts to Washington University alone, including its several departments, amounted to one hundred and seventy-five thousand dollars, the whole of which was bestowed without solicitation, and without conditions annexed. He gave freely wherever he thought good could be accomplished, but never wished his name to appear if it could be avoided.

The secret of Mr. Bridge's success may be found in his scrupulous performance of every engagement and in his abhorrence of debt. He was ready to excuse almost any fault except the want of business integrity, and could not be tempted by the largest hope of profit into trading upon borrowed capital. His progress was, therefore, sure and steady, and although at the first slow, it ultimately became rapid, even to the accumulation of great wealth. There was no department of business life in St. Louis which did not feel his loss, and he left the enviable record of a good citizen, a practical philanthropist, and a faithful business man. Mr. Bridge left six children,—Isabella, the wife of Col. George E. Leighton; Emma, wife of J. G. Chapman; Mary, wife of N. C. Chapman; and Hudson Eliot, Harrison, and Amy, unmarried.

The country has produced few men who possessed the variety of virtues and accomplishments embodied in the person of Henry Taylor Blow. As a business man, legislator, diplomatist, and private individual, his merits were of the most superior character, and throughout his busy and useful life he was one of the most prominent figures in the commercial, political, and social circles of St. Louis, and one of their most conspicuous ornaments. Mr. Blow was the second son of Peter Blow, a planter of Southampton County, Va., and was born July 15, 1817. The family was of English descent, tracing its lineage to the days of Charles I., and tradition has always assigned it a good position in English society. The Blows came to St. Louis in 1830, and Mr. Blow engaged in business as keeper of what was then known as the Jefferson Hotel. Both the parents soon died, leaving seven children out of a family of twelve, all of whom were young and had comparatively small means of support. Their career proves Mr. and Mrs. Blow to have been persons of remarkable strength of character and mind. There were three daughters. One died unmarried, and one became the wife of the Hon. Charles D. Drake, a well-known lawyer of St. Louis, who subsequently became United States senator, and is now a judge of the United States Court of Claims at Washington. The other daughter became the wife of Joseph Charless, son of the founder of the *Missouri Gazette*, the first paper published in St. Louis, and who for many years was an honored and useful citizen. There were four sons,—Peter E., Henry T., Taylor,[1] and William T., all of whom became active and well-known business men of St. Louis, and are now dead.

Upon settling in St. Louis, Henry Taylor Blow entered the St. Louis University, an institution of extended reputation throughout the West, and then the only place in the city where the higher branches of education were taught. It would appear that his

[1] Taylor Blow was born in Huntsville, Ala., and was forty-nine years of age at the time of his death, which occurred August 20, 1869. Mr. Blow was one of the most influential citizens of St. Louis, and was a member of the firms of Blow, Curd & Co., Peter E. Blow, and Charless, Blow & Co.

father had determined that his sons should have a good education, even though he could leave them no great moneyed legacy.

Young Blow graduated with distinction at the St. Louis University, and for some time thereafter pursued the study of law, his father having designed him for that profession (for which he also seemed by nature to be fitted); but the purpose was abandoned, and in 1836 (when nineteen years old) he became a partner with his brother-in-law, Joseph Charless, in the sale of drugs, paints, oils, etc. The nature of the business suggested the manufacture of some of the articles in which they dealt, and they set up small mills and made castor and linseed oil and white lead. The establishment of oil-mills was truly a pioneer experiment, for little flax was raised in Missouri at that time. At first its culture was entirely unknown, and Mr. Blow having acquainted himself with the details, taught the farmers how to raise it. By following his advice they succeeded, and thus was begun an important industry.

In 1844 the partnership with Mr. Charless was dissolved, Mr. Blow retaining the manufacturing business, which he successfully conducted and enlarged until it finally became "The Collier White Lead and Oil Company" (of which for many years he was president), one of the largest manufacturing concerns in the city.

The manufacture of white lead directed Mr. Blow's attention to the manufacture of metallic lead from the ores. For some years before the war his brother, Peter E. Blow, had mined and smelted lead in Washington County, and just before the war had removed to Newton County, and there started very large mining and smelting works, in connection with Hon. Ferdinand Kennett. Henry T. Blow had an interest in these operations, and when Mr. Kennett died the brothers bought his interest. During the war the prosecution of the business was rendered impracticable, but when peace was declared the Blows associated others with them in "The Granby Mining and Smelting Company," and resumed work in Newton County, under Peter E. Blow's management. When Peter E. Blow died, Henry T. Blow, who had always been president of the company, assumed the chief care and responsibility of the business, and successfully managed it.

These two enterprises—the "Collier Lead-Works" and the "Granby Mining and Smelting Company"—were the most important in which Mr. Blow was engaged, and yielded him a handsome fortune. He participated actively, however, in many other enterprises disconnected from business. In the government of the city, and especially in the moral and social improvement of the community, he took a lively interest throughout his career. Mr. Blow was also prominently identified with the educational interests of St. Louis, and one of the public schools of the city bears his name. He also founded an association for the encouragement of art and to promote the love of it. He heartily co-operated with the merchants (often as a leader) for the advancement of commerce, and labored energetically for the improvement of river navigation. He was an earnest advocate of railroad development, and was once president of the Iron Mountain Railroad Company. In short, there was no enterprise that promised to advance the interests of St. Louis to which he did not lend his cheerful and untiring support, and few men ever had the prosperity of the city more genuinely at heart.

It is now our province to speak of Mr. Blow as a public man. In early years he was a Whig, and when that party was disbanded he became a Republican. This choice indicates an uncommonly tenacious adherence to principle, for in Missouri no hope of Republican success could then (in 1854) be entertained; and so great was the distrust in which that party was regarded, that to adhere to it was to endanger one's business and to jeopardize one's social relations. But

> "They are slaves who dare not be
> In the right with two or three;"

and Henry Taylor Blow did not hesitate to follow the dictates of conscience. In 1854 he was elected to the State Senate, and served for four years. At the beginning of his term he still regarded himself as a Whig, and held the important position of chairman of the Committee on Banks, the duties of which he discharged with ability.

Among his associates in that Legislature were Frank P. Blair and B. Gratz Brown, formerly Democrats, but then "Free-Soilers." Mr. Blow finally identified himself openly with the Republicans, and though he belonged to a party that was in an apparently hopeless minority, his personal worth commanded respect, and enabled him to do much for the good of the Commonwealth. In 1860 he was a delegate to the Chicago Convention which nominated Abraham Lincoln for the Presidency.

Mr. Blow adhered to the Republican party as long as he lived, and assisted prominently in building it up in Missouri. His espousal of the principles and candidates of this party was the more noteworthy because by birth, education, and associations he was essentially a Southern man. Although such, yet when the war commenced he became an earnest advocate of Union-

ism, and by his course did much to check the torrent of secession which threatened to sweep Missouri with the South, and by his influence and his stirring speeches no doubt averted much trouble that would otherwise have befallen St. Louis. His cool, clear-headed advice was a contribution to the Union cause that could not have been dispensed with. He participated prominently in the counsels of the Union men of Missouri, and assisted in raising and equipping troops. Later in that year President Lincoln appointed him Minister to Venezuela, and Mr. Blow, not realizing the magnitude of the coming struggle, and thinking he might be able to accomplish something of advantage to the commerce of the Mississippi valley, accepted the position; but as the war progressed and its dreadful character became apparent, he felt too deeply concerned to remain in a foreign country, and after about a year's service resigned the mission and returned to St. Louis. The next fall (1862) he was elected to the House of Representatives as a member of the Thirty-seventh Congress, and two years later was chosen to the Thirty-eighth Congress.

Upon these two Congresses devolved duties and responsibilities unprecedented in the history of the country. A war of unexampled magnitude had to be prosecuted, and when it was ended provision had to be made for the restoration of the seceding States to the Union, and for the revival of domestic industry. In each of these bodies Mr. Blow occupied responsible positions. In the first he was a member of the Ways and Means Committee,—a position seldom accorded to a new congressman,—and in the second he was a member of the Committees on Appropriations and Reconstruction. The importance of the duties of these committees in that trying period cannot be too highly estimated, as they had to deal with all the weighty and perplexing problems arising from the war. Mr. Blow performed his share of those labors with recognized usefulness to the country and with credit to himself.

Upon the expiration of his second term there was a general desire to continue him in the position, but he declined to become a candidate for re-election, hoping thus to be enabled to give his attention to his much neglected private business. But in 1869 President Grant appointed him Minister to Brazil, an honor he did not feel at liberty to decline. He spent two years at Rio Janeiro, and exerted himself there with considerable success to stimulate commercial relations between the two governments. In 1871 he returned home, with the hope and expectation of remaining in private life, but in 1872 he was called to the chairmanship of the Republican State Central Committee, and ably directed the movements of the party through the critical campaign of that year.

His last public service was performed in 1874. At that time the affairs of the District of Columbia were in a very unfortunate shape. In the belief that frauds of an alarming character had been committed, Congress had abolished the Territorial government ("Boss" Shepherd's), and had established a government by a board of commissioners, of whom Mr. Blow was appointed one. He held the position but a few months, but contributed much during that period to the production of order out of chaos, and to the restoration of public confidence. Upon his death a year later the board of commissioners of the District of Columbia adopted resolutions of respect to his memory which recited, among other things, that "he was highly intelligent, enterprising, and patriotic, and faithfully performed every private and public trust committed to his hands."

Mr. Blow was married in 1840 to Minerva, daughter of Col. Thornton Grimsley, one of the most prominent and influential citizens of St. Louis. She was in every way worthy to be the wife of such a man, a sympathetic assistant in the struggles of early life, and a happy participant in his later triumphs; his cheerful associate in numberless acts of benevolence to relieve the needy, comfort the distressed, enlighten the ignorant, and encourage the unfortunate; his valued counselor in all the troubles of life as well as the partaker of all its joys, dividing his griefs by making them her own, and doubling his pleasures by rejoicing in them also. She died on the 28th of June, 1875, and he very suddenly September 11th following at Saratoga, after an hour's illness, of congestion.

Of Mr. Blow in private life it is difficult to speak too warmly. He was possessed of such charming social qualities, such courteous manners, dignified bearing, exuberant spirits, and generosity of heart as endeared him to his friends. In manners he was quiet, but was sometimes impulsive, though never rude. He was cordial and kind to his friends, and often very tender to those dear to him.

His Southern parentage and associations contributed to make him hospitable to a princely degree. He was a liberal man, giving money freely for patriotic, scientific, artistic, religious, and benevolent purposes, and was charitable in the original sense of the expression, for his charity was of the kind that "thinketh no evil," but placed the most liberal construction upon the character, conduct, and motives of others. Thus, during the war, while no man could exceed him in love for the Union or in the determination to coerce the seceding States, he was utterly

without personal acrimony, and probably no man ever exerted himself more actively and successfully to relieve the distresses of public enemies. Very much of his valuable time was employed in examining the cases of individual "rebels" of whose sufferings he had heard, and procuring relief for them, often in the form of pardon and release from imprisonment.

Religion was a part of his nature; it pervaded his being; it was not worn as an outer garment, to be laid aside upon occasion, but accompanied him in his business transactions, and governed all his dealings with his fellows. Never obtrusive, it tempered his opinions and acts with a mellow radiance, and imparted a kindly tone to what might have appeared his harsh and inflexible justice. His religion was one of love and joyousness; it neither made him sad nor caused sadness in others. For many years he was a member of the Presbyterian Church.

Mr. Blow possessed a rugged constitution, and up to the close of his life had experienced scarcely a day's illness for many years. His sudden death, therefore, shocked the community to a peculiar degree. His body was borne to its last resting-place, by the side of his wife, amid such demonstrations of public and private grief as are seldom seen. The press and the various bodies to which Mr. Blow belonged joined in celebrating his virtues in strains of unexampled eulogy. He was widely known throughout Missouri, and many of the municipal assemblies placed on record their sense of the great loss occasioned by his death. A resolution of the St. Louis Board of Trade declared that "he possessed all the attributes of God's noblest work, an honest man." A gentleman of the Granby Mining and Smelting Company, in moving resolutions of respect, said,—

"He brought to the service of the company zealous activity, unflagging industry, large experience of business, broad and comprehensive intelligence, and a policy bold without rashness, cautious without timidity, liberal without waste, and economical without penuriousness, and, what was probably of greatest value, pure honor and truth, which exacted of all with whom he dealt corresponding trust and confidence. We were the frequent witnesses of his generous impulses, his scorn of meanness, his love of truth, his devotion to honor, his reverence for religion, his princely hospitality, his courageous defense of the right,—in short, we recognized in his character each and every one of those noble attributes which constitute a man without fear and without reproach."

But perhaps the most accurate and discriminating estimate of Mr. Blow was that which appeared in the *Globe-Democrat* the morning after his death, and which affords a graceful termination to this memoir:

"No death among the many whose names are intimately linked with the social and material history and progress of this community could occasion a more profound sorrow than that of Hon. Henry T. Blow, which occurred at Saratoga yesterday. Sad is the event of death at all times is, it is infinitely more sad when so entirely unexpected. . . . The malady which smote him was one against which the safeguards are few, and for which the remedies are uncertain. It has rarely made a conquest that will be more regretfully recorded."

The writer then refers to a sketch of Mr. Blow's life, published elsewhere in the paper; and after remarking that such a biography (necessarily hurried and unstudied) leaves the best and most important untold of that which most concerns us, the man, the eulogy proceeds:

"To know Mr. Blow only as one who held important public trusts and discharged important public duties was to know comparatively little of him; but to know him as a friend, an associate, and a companion was to be acquainted with one in whom all the best elements of human nature were developed to the highest degree. He was truthful, he was honest, he was honorable, and he was generous, in the broadest sense in which these terms can be used. He had a nature which seemed to attract without repelling any, and hence it was his rare good fortune to enjoy the warmest friendships without incurring the slightest enmities.

"In his public career Mr. Blow illustrated the best and most hopeful phase of American political life. He never sought office, and when he accepted a trust, the sense of responsibility incurred was greater than the sense of honor conferred. No man ever labored more faithfully to discharge a public duty to the credit of himself and the benefit of his constituents. He was a politician in the higher and better meaning of the term, and not in the selfish and sordid sense in which the word is properly applied to many. To him politics was a field of public usefulness, and not of private gain.

"He possessed a well-matured mind, a sound judgment, and a discriminating intelligence which enabled him to stand upon a higher plane as congressman and minister than many who were his superiors in the details of special study and information. He was a partisan only because he believed that under a government like ours the patriot must necessarily crystallize in the partisan; and he had lived to see it put to the test that the strongest partisan is the best pa-

triot. He was little of an orator, and yet his public utterances were always thoughtful and convincing, and were rarely surpassed in effect by the more brilliant and more ornate speeches of his contemporaries.

"Hastily-recorded thoughts like these, however, form but a very imperfect estimate of our departed friend and fellow-citizen. The feeling which shadows the community to-day is not easily voiced or written. It is with no simulated sorrow that the sad event will be learned and spoken of, but with a genuine and heartfelt regret for one whose death is a positive loss to the community, and a positive grief to all who enjoyed the pleasure of his personal acquaintance. And to the mournful story of to-day a tragic pathos will be added by the recollection of a death and a burial two months ago, when the generous heart, now mute and still, was bowed in sorrow at the tomb of a life's affection. When, a few days hence, the husband and father is laid to rest near the new-made grave of the wife and mother, who that knew them both will fail to repeat the beautiful language of David's matchless lament:

"'They were lovely and pleasant in their lives, and in death they were not divided.'"

At the breaking out of the civil war Hon. Charles Gibson, now one of the most distinguished and talented members of the St. Louis bar, took decided and active ground in favor of preserving the unity of the national government. He was willing to accord to the South the full measure of her claims under the Constitution, but regarded the preservation of the Union as of paramount importance. In the winter of 1860–61 he issued a patriotic and inspiring address to the people of Missouri, which provided a rallying-point for the Unionists of the State, and enabled them, by securing the election of a Union State Convention, to checkmate Governor Jackson's attempt to take Missouri out of the Union. Mr. Gibson was an acknowledged leader in that agitation, and among his able coadjutors were Gen. Francis P. Blair, Col. Jas. O. Broadhead, Hon. B. Gratz Brown, and men of equal calibre.

Mr. Gibson was born in Montgomery County, Va., in 1825. His ancestors were among the early settlers in that part of the State, and both his grandfathers were wounded in the Revolutionary war. His father, Capt. Hugh Gibson, moved to Missouri in 1836, and having the means to enable him to do so led the life of a quiet country gentleman. His mother was descended from the Rutledge family of South Carolina.

The schools of Missouri in those pioneer days afforded very meagre educational advantages, but young Gibson mastered all the branches taught, and was noted for his precocity. He read and studied with avidity what books he could obtain, and probably the lack of early tuition was to a great extent compensated for by the independence of thought and originality engendered by self-instruction. He was for a brief period a student at the University of Missouri, and his examination when admitted showed him to be perfect in all that he had studied.

In 1843, Mr. Gibson came to St. Louis, friendless and unknown, to hew out his own fortune. He brought a general letter of introduction from influential friends, but his only capital was a self-reliant and hardy spirit. His first acquaintance was with the Hon. Edward Bates, and a friendship sprang up between them which lasted until that eminent man's death, twenty-five years later.

Mr. Gibson spent much time in the office of Mr. Bates during the three years he was studying law with Josiah Spaulding, one of the most learned and upright lawyers of that period. He was also the first librarian of the Law Library. While reading law he applied himself to the study of French and German, and acquired sufficient proficiency in both to be able to transact legal business in either tongue.

In 1844, Mr. Gibson entered the political field, and made speeches in behalf of Henry Clay. In 1848 he advocated Gen. Taylor's election; in 1852 he was nominated an elector on the Scott ticket; in 1856 he supported the Old-Line Whig ticket, and he strove earnestly to secure the Presidential nomination for his old friend, Edward Bates. In 1860 the Whig party had ceased to maintain a national organization, and Mr. Gibson originated a movement to bring out Mr. Bates as the Republican candidate for the Presidency, although he did not belong to the Republican party; Mr. Gibson believing that the election of a Southern man who was opposed to slavery, but who was in all respects conservative, would avert the political crisis which otherwise seemed inevitable. But this scheme, which was supported by Horace Greeley, the Blairs, and others, fell through, and Mr. Gibson supported Mr. Bell on the "Constitutional Union" ticket.

In 1861, President Lincoln made Edward Bates his attorney-general, and the latter urged Mr. Gibson as a patriotic duty to give up his law practice and go to Washington, where he was needed, appointed him assistant attorney-general, and tendered him any office he might designate. Mr. Gibson complied with Mr. Bates' request and went to Washington, where he accepted the office of solicitor of the Court of Claims (now solicitor-general). At President Lincoln's request he wrote an opinion favoring the elevation of the Court of Claims from a mere commission

to a regular court of justice, and Mr. Lincoln embodied the paper in one of his messages, with the alteration of but a single word. Mr. Gibson then wrote the bill which was passed by Congress reorganizing the court. Mr. Gibson was thrown into friendly and even intimate relations with Mr. Lincoln and most of the great men of that period. Among those who specially confided in him was Mr. Stanton, "the great war secretary." Mr. Gibson strenuously exerted himself against many of the harsh and repressive measures of the war, especially those pertaining to Missouri, for he was the official agent of the State of Missouri at the national capital, and performed efficient service in regulating the affairs of the State with the Federal government. Mr. Bates and himself were the only representatives of four million "Border State" people in the administration, and therefore when Mr. Gibson found that the Lincoln administration was hopelessly given over to a radical policy, he resigned the office of solicitor-general and declared himself a Democrat. In 1864 he supported Gen. McClellan for the Presidency, and in 1866–67 sustained President Johnson in his contest with Congress. In 1868 he advocated Governor Seymour's election to the Presidency; in 1870 favored the Liberal Republican and Democratic coalition in Missouri which elected B. Gratz Brown Governor, and prepared the way for the revision of the ironclad Drake Constitution; and in 1872 warmly supported Mr. Greeley's election, although he do.bted the policy of his nomination by the Democratic National Convention, of which body he was a delegate-at-large from Missouri.

He supported Governor Tilden for the Presidency in 1876, and during the exciting controversy which arose in the following winter as to the result of the election, he was selected by the Democratic National Committee to visit Louisiana, in connection with other eminent gentlemen, to insure a fair count in behalf of Mr. Tilden. While there he was commissioned to go to Florida on a similar service, and took an important part in the proceedings which afterwards became so familiar to the country in connection with the Florida electoral case, creating a most favorable impression as a learned and modest gentleman. He was an old personal friend of Gen. Hancock, whom he supported in 1880 for the Presidency, and at his request delivered several speeches and performed other important services in Indiana in his interest. After the loss to the Democrats of Indiana in October, he took a very active and effective part in the election of Hon. Thomas Allen to Congress from the city of St. Louis.

Upon returning to St. Louis from Washington, in 1864, he became in a measure disengaged from the regular practice of the law, but has always been more or less actively employed in important litigation. From the outset of his career he always obtained his full share of business, especially in matters pertaining to land titles. He drew up the act creating the St. Louis Land Court, and when that tribunal was established, became one of the leading practitioners before it. As a lawyer he has been eminently successful. Without aiming at oratorical effects, his general reputation is that of a brilliant speaker in cases in which he is deeply interested and which are of a nature to draw out his powers.

As a business man, Mr. Gibson has been very successful, and a handsome fortune is the result of his exertions. Some of the finest enterprises in the city have been organized and perfected by him, and often these have been attended by protracted and delicate negotiations, in which Mr. Gibson's tact and ingenuity were exerted to the utmost to bring about a successful issue. Of this character were the circumstances preceding the erection of the old Southern Hotel (since burned) and of its successor, the present fine structure. The importance and effectiveness of his labors in the building and rebuilding of this hotel are universally acknowledged; and all was done by him without compensation, and after large and liberal contributions of his own money. In fact, the bargain concluded between Col. Robert Campbell and the Hon. Thomas Allen was brought about by him, and without it the building would not have been erected.

Our limited space forbids more than a reference to other public works in which he took a leading part. Mr. Gibson has always manifested a deep interest in matters tending to promote the welfare and happiness of the community, and has always been zealous in aiding the purchase and improvement of parks and other grounds for public resort. He aided very materially in the establishment and improvement of Lafayette Park, and, without injustice to others, might perhaps be called the originator of that beautiful resort. He drew up the first act establishing Forest Park, and when it was declared unconstitutional he was foremost in procuring the passage of another act which was declared valid, and it is not too much to say that St. Louis owes this fine park to his legal ability, good business sense, and untiring persistence. He is a man of large views, and some of his ideas have been far in advance of the people. Of these may be mentioned his proposition, advanced in 1853, to open Jefferson Avenue two hundred feet wide from St. Louis Place to the "Wild Hunter," and Grand Avenue three

hundred feet wide from the river on the north to the river on the south; and also, in 1868, his plan for a park of one thousand acres just east of the present Forest Park.

Some years ago Mr. Gibson organized the Laclede Gas Company. Its right to do business and supply the public with gas was contested by the old company, which claimed a monopoly of the city; but on Mr. Gibson's advice the new company proceeded to expend one million five hundred thousand dollars in works in the northern part of the city, and the result was a complete vindication of the soundness of his advice.

His career as a lawyer has been distinguished by several episodes of a singularly interesting character. In 1849 he served as junior counsel for the defense in the celebrated case against Counts Gonzalve and Raymond de Montesquieu, indicted for the murder of Kirby Barnum and Albert Jones, in the City Hotel of St. Louis. After two mistrials Mr. Gibson alone procured the pardon of Gonzalve (who was insane) and the "exoneration" of Raymond by the Governor. The incidents of the trial were romantic in the extreme. The defendants belonged to the highest and oldest of the nobles of France, and were cousins of Napoleon III. No case in Missouri has ever attracted so much attention as this one. The counts and their kinsman, Viscount de Cessac, expressed their regard and gratitude for Mr. Gibson's services by presenting him with a curious and valuable watch-chain and a splendid diamond ring, which he still owns. A few years ago he read an account of this trial before the Historical Society of Missouri, which was widely published both in this country and in France.

In 1858 he was retained as sole counsel in another celebrated case brought by the king of Prussia, and involving the nature and power of the kings of that country. He obtained from the Supreme Court of Missouri a decision establishing the autocracy of the government, in the same manner as recently claimed in the rescript of the emperor. The prince regent who is now the Emperor William) was so well pleased with his conduct that he ordered two large and splendid porcelain vases to be made at the royal porcelain manufactory in Berlin, embellished with enameled pictures of Sans Souci, the new palace at Potsdam, the old royal palace, and the monument to Frederick the Great in Berlin, and covered with the richest gilding and other devices, which were presented to Mr. Gibson, with the royal thanks, in due form. Each vase bears the following inscription: "The Prince Regent of Prussia to the Counselor Charles Gibson, the unselfish advocate of justice." The inscription was written by Baron Alexander von Humboldt. The vases are nearly four feet high, and far surpass anything of the kind in this country.

In 1882, twenty-three years after this, the same sovereign, who had then become king and emperor, and had achieved world-wide fame, and founded a great empire, tendered to Mr. Gibson, through the imperial consul at St. Louis, the appointment of his son Preston as a cadet officer in the imperial army, and offered to waive, by a special order from the emperor himself, any disabilities to his entry into the service. The young gentleman concluded to remain in his own country, but the incident shows the estimation in which Mr. Gibson is held in Berlin.

In 1881, Mr. Gibson was engaged as counsel to represent the Austrian government in the prosecution of Baron von Bechtolsheim, formerly Austro-Hungarian consul at St. Louis, who was charged with embezzlement. The baron had abandoned his title and his office, fled the State, and changed his name; but he was arrested, brought back to St. Louis, and incarcerated in jail for many months. He finally escaped, however, by pleading the consular immunity as a technical defense, although it was waived by his government. But although Mr. Gibson lost this case, he displayed such learning, fidelity, and ability that he received from the Austrian emperor the imperial thanks as a warm expression of approval. Mr. Gibson is perhaps the only member of the American bar who has received the high honor of the official thanks of two of the great powers of Europe on account of his professional conduct at the bar.

It is certainly a strange coincidence that a plain, unostentatious Missouri lawyer should have had three such extraordinary cases.

In 1851, Mr. Gibson married Miss Virginia, daughter of Archibald Gamble, one of the oldest and most widely known of the early settlers of Missouri. He has a large family, which has always lived in the same house.

In 1881, Mr. Gibson met with the great misfortune of his life. His son Archibald was a cadet at West Point, and while on parade a spider crawled into his ear. By the rules of the Military Academy, and still more by the spirit of the corps of cadets, it was a high offense to move in the ranks, and the boy remained unmoved for over an hour with the venomous insect working in and poisoning his vitals. When parade was over the ear was found full of blood, and the spider was not gotten out for two days. Archibald remained at the academy, was graduated with high honor, and was appointed lieutenant of the Seventh Cavalry, Custer's regiment. After remaining several months

at home under medical treatment, he joined his regiment and went to the field, where he remained campaigning until his captain and surgeon both ordered him to apply for sick-leave. Utterly broken down, he then returned home and died of brain fever. The singular circumstances of his death, his endurance and fortitude, his purity of character and great learning for one so young, caused a sensation in the city where he was born, raised, and died, and called forth letters of praise and sympathy from Gens. Sherman and Hancock, and many other distinguished men throughout the country. His funeral was attended by the chancellor and professors of Washington University (where he had been a student), all the army officers in the city or at the barracks, a company of regulars from the barracks, and a very large concourse of citizens.

Mr. Gibson enjoys a well-earned reputation as one of the most useful citizens St. Louis has ever had. Early thrown upon his own resources, without money or friends, he has made for himself an honorable name as a jurist, citizen, and neighbor, and has done much to make St. Louis a great city. During the past forty years few men have exercised a greater or more beneficial influence upon the material, legal, and political history of the city and State, and he is one of the best types of the self-made and progressive men of that eventful period.

When the civil war came on the packing-house of Francis Whittaker & Co. was recognized as being perhaps the leading one of the kind in the Southwest, and it was enabled to render the country a most important service.

St. Louis was, as we have seen, an important commercial and strategic point, and the centre of immense military preparations. The government, however, was without money or credit, and its representatives in St. Louis found themselves in the midst of a population which strongly sympathized with the South. The crisis was very grave, the fate of St. Louis and of Missouri trembled in the balance. At this juncture three firms whose courage and patriotism deserve to be held in especial remembrance and honor came to the rescue and lent their credit to the government, staking their chances upon the success of the Union arms for the ultimate repayment of their loans, and for furnishing supplies to the newly-organized Union regiments or "Home Guards." Repeatedly during the war they fed the troops quartered at St. Louis, and furnished food and other supplies in immense quantities to be forwarded to other fields. Thus they not only rendered the authorities priceless assistance and contributed materially to the success of the national cause in the Southwest, but retained for St. Louis the trade which otherwise would have been swept away, and enabled it to emerge from the war as the great metropolis of the Mississippi valley. The names of these patriotic pork-packers were Henry & Edgar Ames & Co., John J. Roe & Co., and Francis Whittaker & Co.

Francis Whittaker, the senior member of the firm of Francis Whittaker & Co., was born at Manor Hamilton, County Leitrim, Ireland, in 1810. He was a gentleman by birth, his father, John Whittaker, being sheriff of the county. The latter married quite young (his wife was Margaret Henderson, a lady of like station), and from the union a large family resulted, several of whom received a professional education at Trinity College, Dublin, the cradle of so many of the brightest geniuses of the Emerald Isle.

When old enough to enter upon the active duties of life, Francis Whittaker was apprenticed to Andrew Britton, a packer and provision merchant at Sligo, and upon the completion of his term was appointed an officer in the Sligo Branch of the Bank of Ireland. After several years' service as such he moved to the south of Ireland to establish a series of banks outside of those controlled by the government, a scheme suggested by his superior in the bank, which did not succeed.

Francis Whittaker then removed to Dublin, where resided his brother-in-law, John Motherwell, one of the leading lights of the then famous Dublin bar. In Dublin he engaged in the paper manufacturing business, and while visiting the scenes of his boyhood at Ballymote he married his only wife, Anne, daughter of John Motherwell, a disabled officer of the queen's army. He continued to live in Dublin, but in the course of years a growing family and the increasing discontent and destitution in the country compelled him to emigrate. He found it difficult to choose between the urgent solicitations of brothers in Melbourne and New York, but finally chose America, and in April, 1848, sailed for this country, the voyage lasting five weeks. At New York he was heartily welcomed by his brother, Dr. John H. Whittaker, who was then president of the New York Medical College.

After settling his family in Brooklyn, Francis Whittaker visited the West, with letters to the old and substantial house of James Hewitt & Co., of Louisville, Liverpool, New York, and St. Louis. In New York he had made the acquaintance of R. M. W. Kercheval, upon whose advice he accepted the position of general director of the packing-house of John Sigerson at St. Louis, and here he spent some months

Francis Whittaker

familiarizing himself with the situation. He was accustomed to relate that on his first Sunday, after attending Dr. Potts' Presbyterian Church, he walked out on the then wooded heights of St. Louis, and as he looked the town over, felt convinced that he could establish a footing here. Consequently, in the fall of 1849 he brought his family West, and then began his work in good earnest.

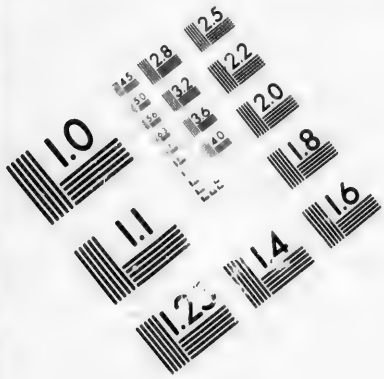
At first he was in business alone, but afterwards had John J. Roe for a partner. Mr. Roe was a congenial associate, and the connection continued until about the close of the war. The early years of his business experience in St. Louis were arduous and trying. His son relates that often he not only had to act as his own foreman, but frequently was compelled to work at the "cutter's table;" and when he came home and seated himself at the table to eat he could hardly ply the knife and fork, so great was his fatigue. A business laid on such solid foundations of personal industry could not but prosper.

After the war the business was conducted by Francis Whittaker & Sons, but Mr. Whittaker remained its directing and inspiring mind. He established branch houses in New York and New Orleans, but ultimately withdrew from them. At last he died, June 14, 1871, aged sixty-two years, leaving a large and lucrative business.

One of his favorite projects was the direct shipment of the products of his house to Europe. The experiment proved successful, and in later years the business in which he was a pioneer assumed immense proportions. He was also an advocate and one of the early stockholders of the Mississippi valley barge transportation system, which he supported as being an enterprise of great importance to St. Louis. He was not, however, permitted to witness the success of this movement.

Mr. Whittaker was interested in other public enterprises, and chiefly through his exertions the Bank of Commerce, one of the most important financial institutions of St. Louis, was firmly established. He was also a director in the old Merchants' Bank, and in the old St. Louis Insurance Company.

In private life, in the family and the church, Mr. Whittaker left a legacy of precious recollections. He and his wife were nurtured in the Church of England, but before leaving Ireland embraced the faith of the Dissenters, who find their closest affiliations in America among the Congregationalists. In St. Louis they became members of the First Congregational Church, under Dr. Post's ministry, and were soon recognized and esteemed as among the most devoted and useful members of that body.



In this connection mention may properly be made of Mr. Whittaker's charities, for with him systematic giving was a Christian duty. He bestowed his benefactions without regard to church or creed, and to several of the public institutions he made generous gifts annually. He was one of the founders of the Good Samaritan Hospital, and left it a handsome bequest. His will directed the payment of legacies amounting to sixty thousand dollars.

In 1852, Mrs. Whittaker died. She was a woman of great strength of mind, and Mr. Whittaker was wont to ascribe all his success to her calm and judicious advice. Her character was singularly amiable and gentle, and her marked influence for good was exerted steadily throughout her busy and energetic life.

From this time Mr. Whittaker's energies were devoted to the care of his family of seven young children, and to educate them properly and leave them in easy circumstances was his chief ambition. He was never so happy as when with them, and was often heard to say that while in their company life had no other charm for him. Next to his love of family was his love for his adopted country. It was his pride that he was an American, and that he had been privileged to live under free institutions, where class distinctions were unknown, and where all were permitted to contend for fortune on equal terms.

In 1869 his son Francis, the youngest of the family, died very suddenly. From that day Mr. Whittaker declined in health, and it may be said that the boy's death literally broke his heart. He passed away sustained by implicit faith in the religion that had inspired him throughout almost his entire lifetime, and died as he had lived, a Christian gentleman, leaving to a sorrowing circle of friends the fragrant memory of one of the most upright, active, and energetic men St. Louis ever knew. Mr. Whittaker left two sons and three daughters. Of the former only the elder, John Whittaker, is now living. He is the efficient head of the house of Francis Whittaker & Sons, and the father's mantle seems to have fallen on worthy shoulders.

Associated with Mr. Whittaker during the exciting period of the civil war was John J. Roe, who was largely interested with him in furnishing supplies to the military authorities in St. Louis at a critical time, when the government, as already stated, had neither money nor credit. Mr. Roe was a strong and active Union man when the war began, although originally of a conservative disposition, and at one time a slaveholder. Believing slavery, however, to be wrong, he had set his slaves free. For many years Mr. Roe was

one of the most prominent, if not *the* most prominent merchant-prince of St. Louis. His name, in fact, headed every large undertaking which was thought likely to advance St. Louis to the position of one of the chief mercantile cities of the Union, and it was his unceasing and untiring energy that gave an impetus towards certain success to every enterprise with which he was connected.

Like most of the indomitable wills that have left their impress upon the history of the city, he was emphatically a self-made man, and every dollar of the vast sums which he accumulated was the product of his calculating energy. His parents were plain farm people, living near Buffalo, N. Y., and here, April 18, 1809, John J. Roe was born. When he was six years old the family, having caught the Western fever, removed to Cincinnati, thence to Kentucky, and finally settled at Rising Sun, Ind., where the father bought a farm and owned a ferry, dying there in 1834.

Schools were few and far between in Indiana at that time, but young Roe made as much use of them as he could without interfering with the duty of helping his father on the farm and at the ferry. The latter employment seems to have given him his first taste for steamboating, the occupation which he was subsequently to follow so successfully; for already, in 1832 (two years before his father's death), he had left home and was engaged at Cincinnati in some humble capacity on a steamboat. From this position he rose by successive promotions until he became captain of the vessel, and at the very outset of his career he brilliantly demonstrated his wonderful business ability. By judicious trading he made such large profits jointly for himself and the owners of the vessel that in less than two years from the time he engaged on the boat, a poor boy with but a few dollars in his pocket, he was the captain and sole owner.

After such an auspicious beginning his success was uniform, and in a very few years he had built and was operating a fleet of the finest vessels on the Ohio River and its tributaries.

In 1837 he married Miss Martha A. Wright, daughter of Thomas Wright, of Cincinnati.

In 1840, Capt. Roe started from Cincinnati with a boat-load of merchandise for the upper Missouri River, and stopping at St. Louis, became so favorably impressed with its advantages from a commercial standpoint that he determined to make it in future the base of his operations. His first venture here was the establishment of a commission-house, which he personally took charge of, leaving his boats to be run by salaried captains. From this enterprise grew the firm of Hewitt, Roe & Co., which soon became widely known, then Hewitt, Roe & Kercheval, which developed a large business in packing pork for the English market.

A fire which occurred during this period left Capt. Roe, after paying all obligations, with nothing but a small interest which he had in several boats, but he began, with his wonted cheerfulness and courage, to repair his shattered fortunes, and soon had the firm of John J. Roe & Co., the successors of Hewitt, Roe & Kercheval, established on a solid basis, and maintained its high standing and credit to the day of his death.

During his business career Capt. Roe was one of the largest pork operators in the United States, and was often associated with the Ameses (Henry and Edgar), the Whittakers, the Ashbrooks, and others in transactions of very great magnitude. He was also a special partner in the houses of J. Eager & Co., of New York, and D. W. C. Sanford, of New Orleans, and for years was connected in business with Capt. "Nick" Wall in Montana, the Diamond "R" Transportation Line being one of the important interests of the Territory to this day.

Capt. Roe took a deep interest in all that pertained to the prosperity of St. Louis, and the great bridge especially received his hearty approval and support. At a critical moment, when the stockholders were disposed to abandon the project as hopeless, and refused to advance any more money, he infused new life into the project by pledging one hundred thousand dollars in cash, for when it was known that the enterprise was approved by his judgment it did not henceforth lack for supporters. As an evidence of the weight which justly attached to his opinion, it is related that at this dark hour in the history of the bridge he hastened to New York, had a meeting of the stockholders hastily called, and in thirty minutes from the time of assembling one million two hundred thousand dollars had been subscribed.

Among the great corporations with which Mr. Roe was connected and the offices he held may be mentioned the following: President of the Merchants' Exchange, president of the Atlantic and Mississippi Steamship Company, once the most powerful company on the river, director in the Ohio and Mississippi Railroad Company, director in the Illinois and St. Louis Bridge Company, the St. Charles Bridge Company, the Illinois and St. Louis Railroad and Coal Company, the North Missouri Railroad, and in several street railroad companies, and president and one of the organizers of the Life Association of America, at that time one of the largest and most successful life insurance companies in the United States. all of these he gave his personal attention, and died literally in harness, for while he was attending a meeting of the Memphis Packet Company, on the afternoon of Feb. 14, 1870, and chatting pleasantly with his friends, his head fell on one side, he gasped for breath, and suddenly expired.

His death, so sudden and unexpected, shocked the community and elicited the most poignant expressions of sorrow and regret, and his obsequies were the occasion of a general suspension of business by direction of the mayor.

What was the secret of this extraordinary popularity? For throughout his career he enjoyed the unbounded affection of his friends, and was endeared to the hearts of the people of St. Louis. The answer is readily found in the uniform kindliness and impulsive generosity of his character.

"What makes you look so blue?" said the captain to a young merchant he met on the street. "I have two thousand barrels of pork to deliver to-morrow, and the railroads inform me that they cannot reach here for three days, and pork has advanced two dollars per barrel." "I'll loan them to you," said the captain, immediately writing out the order.

"By the by, you said some two weeks ago that you wanted to get a book-keeper's situation: have you succeeded?" said the captain to a young man he had almost passed on the street. "No, captain." "Well, go up to ——, and tell Mr. —— that you are the young man I spoke about several days ago; if the place suits you he will give it to you."

"The bank does not seem to like this paper," said a business acquaintance as the captain was passing into one of the large banks in which he was not interested. "Why, what is the matter with it, Dick? If they don't want it I'll take it." The cashier overheard the conversation; his opinion changed, and the bank took the paper.

Thousands of incidents like these might be related illustrating his kind and helpful spirit, and his generous acts towards the embarrassed and struggling, acts which endeared him to all with whom he came in contact, and caused his death to be mourned as a public calamity. The poor found in him a generous and gentle benefactor, but his charities, although innumerable, were bestowed in quiet, and we may be sure they went up before him as a memorial to God. Though not a member of any church (for his views were too broad and liberal to be confined within the limits of a creed), he was a constant attendant at the Second Presbyterian Church (where his wife was a member), and no man had more reverence for the teachings of the Divine Master or wove them more visibly into the business of his life. He was not merely an honest man, as the world esteems honesty, but his private life was as unspotted as was his public career. He was a pure man in all that the word implies.

In disposition Capt. Roe was cheerful and genial. He was easily approached, even by the humblest, and lent a willing ear to their wants. A keen judge of character, when once he confided in a man his faith was implicit. This is illustrated in the following anecdote: An agent who was about starting into the country on a mission involving the disbursement of probably half a million dollars for pork called for his instructions, expecting to receive the twenty or thirty pages of foolscap usual in such cases. The captain succinctly answered, "All you have to do is to take care of your money, and see that you get all the property you pay for." The trust reposed in the agent put him on his mettle and made him doubly watchful.

Capt. Roe established a beautiful home at Lafayette and Compton Avenues, then in the suburbs, the grounds containing ten acres. Here he pleasantly welcomed his friends, threw off the cares of business, and became the simple gentleman that nature made him. Here his widow still lives amid memories too precious to be more than mentioned.

Henry Ames was born in Oneida County, N. Y., March 4, 1818. His father, who was an agriculturist, removed with his family to Cincinnati in 1828, and engaged in the pork-packing business. There his two sons, Henry and Edgar, received thorough instruction in all the branches of an English education, and were then taken into their father's establishment and carefully trained in all the details of his business. Henry, indeed, manifested a precocious aptitude for business, and was associated with his father as early as 1833, when but fifteen years old, and while yet a boy frequently went down the river on flatboats laden for the New Orleans markets. At that period navigation was most perilous, and on several occasions young Ames narrowly escaped with his life. Although but a boy, he was looked upon by the business men who knew him as possessing rare qualifications for mercantile life, and the foremost place was assigned him, a prediction which his subsequent career fully justified.

In 1841, Nathan Ames, the father, became convinced that St. Louis, from her geographical position, would in time become the great metropolis of the West, and established himself in the growing town, still pursuing the business of pork-packing, which he conducted with great success. Mr. Ames died in 1852, universally respected. After his death Henry Ames continued the business with his brother Edgar, and with such

signal success that the house ultimately ranked as one of the largest pork-packing establishments in the Union, and during the war its operations were of colossal magnitude. Besides the conduct of this immense business, other important enterprises engaged his attention. He was president of the Chamber of Commerce for two years, was vice-president of the State Savings Institution, and a director in the Merchants' Insurance Company and many other institutions. In 1864 the Ames brothers built the Lindell Hotel, and for many years owned and managed much other valuable property.

Henry Ames was also one of the original directors in the Belcher Sugar Refinery, Atlantic and Mississippi Steamship Company, United States Insurance Company, St. Louis Elevator Company, State Savings Association, and the Memphis and St. Louis Packet Company.

His devotion to the city of his adoption was proverbial, and he was foremost in whatever it was thought might conduce to its welfare. His energy and vigor of mind were remarkable, as was evinced in his latest years, when, prostrated by paralysis and totally unable to walk, he was driven to his place of business, and was carried into the office, where he personally dictated the management of a large and intricate establishment. Thus for several years he lived, manifesting amid the decay of his physical strength the most extraordinary intellectual powers and the keenest business capacity. During his illness he visited South America, California, Canada, and Cuba in search of health, but fruitlessly, and died Aug. 14, 1866, at Minneapolis, Minn., while on a tour of this character. In St. Louis his death occasioned universal regret, for during a quarter of a century his activity in the commercial walks of St. Louis had been daily before the public eye, and his integrity and openness of character had been the constant subject of popular admiration. His candor, frankness, and rugged truthfulness, his hearty devotion to the interests of St. Louis and the Mississippi valley, and his princely way of aiding those interests made him one of the most remarkable men of a period distinguished for great men. Upon his death the Chamber of Commerce voiced the public sentiment in the adoption of the following resolutions:

"The death of our fellow-citizen, Henry Ames, who at one time presided over this body with the intelligence, ability, and justice which characterized him most eminently in all the relations of life, makes it fitting and proper that we should obey the dictates of our feelings, and take this occasion to place upon our records and before the world an expression of our love and esteem for him as a friend and most honorable merchant, and our sincere sympathy with his bereaved family; therefore be it

"*Resolved*, That in the death of Henry Ames this Exchange has lost one of its brightest ornaments, a man recognized by us all as a model merchant, sagacious, prudent, and liberal, and that the community is deprived of one of the soundest minds that has ever led to commercial success, which was controlled by a nature so genial, benevolent, and kind that those of us who had the good fortune to know him well remember him with as much affection as a friend as we have admiration for him as a business man."

Mr. Ames married Mrs. William E. McCloud, daughter of Dr. Charles Scudder. Mrs. McCloud had one child, Miss Sallie McCloud, now Mrs. J. L. Pearce. Henry Ames left one child, a son, Henry Ames, Jr., who is vice-president of the Lindell Hotel Association, and secretary of the new Lindell Hotel Company.

His widow married again, Col. Vincent Marmaduke, of Saline County, Mo. Mrs. Ames rebuilt the Lindell Hotel in 1874.

Edgar Ames was born in Oneida County, N. Y., Oct. 26, 1824, and was the youngest of a family of three children, his father being Nathan Ames, of English descent, whose ancestors settled in Massachusetts in 1643. When he was four years old his family removed to Cincinnati, where, as stated above, his father resided for several years, engaged extensively in pork-packing, his establishment being one of the largest of the kind in the city. Young Ames enjoyed the advantages of instruction in Cincinnati College, and was thoroughly taught in all the useful branches of an English education. When Nathan Ames removed to St. Louis and resumed the business of pork-packing, Edgar, together with his brother Henry, was admitted to partnership with his father. On the death of their father the two brothers succeeded to the business, and under their management it grew to immense proportions. Their success was not, however, due to wild speculation, but was the result of thoughtful calculation, and the magnitude of their transactions and their remarkable success stamped them as among the great business men of the country. In St. Louis they enjoyed the friendly confidence and cordial personal regard of the leading members of the community.

Henry Ames died in 1866, and on the 9th of December, 1867, Edgar Ames followed him. Both were mourned by the entire community with a sincerity seldom witnessed. Long before their death the two brothers, between whom there existed the strongest ties of fraternal affection, were classed among the foremost business men of the city, not merely on account of their great wealth, but because of the free and generous use they made of it to advance the interests of St. Louis. A conspicuous illustration of the attachment existing between the two brothers is afforded in

an act of devotion seldom equaled on the part of Edgar Ames. His brother had been afflicted with gradual paralysis for some years before his death, and medical skill and science seemed powerless to arrest the slow but steady progress of the disease, which finally absorbed all power of physical action. It was advised to administer to him the poison of the *crotalus*, given in doses of increasing strength, with the hope that it might restore vigor and vitality to the powerless limbs. The terrible reptiles were procured and the poison extracted by one of the prominent surgeons of St. Louis, and properly prepared, but before Edgar Ames would permit his brother Henry to take one particle of the ophidian virus, which it was hoped might prove to him a healing remedy, but which was an experiment only, and given as such, he insisted upon first taking it himself, saying that from the effect produced upon him the physicians could argue as to the probable result were his brother to take it; and despite the arguments used by his friends, that the medicine so prepared, which might prove harmless to a man whose whole body was the prey of disease, might act upon him like a deadly poison indeed, he persevered in his design and actually swallowed six doses of the preparation, until nature would bear no more, and violent headache, numbness, and nausea supervened. The poison failed to produce any effect whatever upon Henry Ames, but what more could brother do for brother than this?

Edgar Ames was conspicuously identified with numerous public enterprises and institutions in which the commercial prosperity of St. Louis was involved. He was at one time vice-president of the Merchants' Exchange, and a director in the State Savings Institution, Pacific Insurance Company, Atlantic and Mississippi Steamship Company, United States Insurance Company, Memphis Packet Company, and Belcher Sugar Refinery. Besides these, every public enterprise sought his counsel and aid and commanded his liberal sympathy. As an illustration of this, when it was proposed to rebuild the Lindell Hotel he volunteered to subscribe one hundred thousand dollars to the enterprise.

In commercial circles his ripe wisdom and sound judgment gave value to his views, and made him a trusted example and guide.

The secret of his popularity was based on his high personal worth. Strict integrity characterized all his transactions. He was a pure, large-hearted, large-minded man, and intellectually was a person of broad and liberal culture. He loved wealth, not for itself, but for what it would bring. When asked once why he worked so hard and untiringly to increase his means when already possessed of an amount far beyond his needs, his prompt answer was, "I work to make money to beautify our city." He died suddenly, in the very prime of life, and in the full tide of success, at a time when his energies were engaged in plans from the execution of which it is believed the community in which he lived would have reaped large benefits.

The devotees of literature, art, and science found him a willing friend and patron. His private benefactions were many. His sympathies were quick and active, and often he did not wait for an appeal for help; in numberless instances, if misfortune overtook a friend, or only loomed up threateningly, he proffered both counsel and material assistance, and his timely and energetic action often arrested the imminent disaster. Personally, he was graceful and genial, and was distinguished for his suave and courteous manners; but only those who knew him well were fully aware of his many rare excellencies and virtues.

On June 5, 1860, Mr. Ames was married to Miss Lucy Virginia Semple, second daughter of Judge James Semple, of Illinois, who was also United States senator, and whose memory is cherished as one of the honored men of that State. Four children survive him,—Ada Semple Ames, Henry Semple Ames, Mary Semple Ames, and Edgar Ames.

Among the citizens of St. Louis who obtained great prominence and distinction in the army of the Union was Gen. John Willock Noble, now one of the leading members of the St. Louis bar. Gen. Noble was born in Lancaster, Ohio, Oct. 26, 1831. His father, a Pennsylvanian by birth, was Col. John Noble, an old and highly-esteemed citizen of Ohio, and John was the eighth of nine children. Among his brothers is Henry C. Noble, now a prominent lawyer of Columbus, Ohio. John W. Noble passed his early days in Columbus and Cincinnati, where he enjoyed good educational advantages. He attended Miami University, then presided over by the learned and scholarly Dr. McMasters, during the junior year, and afterwards passed through the junior and senior years at Yale College, graduating with honor in 1851. He here distinguished himself as a writer, carrying off a prize for composition, and becoming editor of the "Yale Literary Magazine."

Upon his graduation he applied himself to the study of law, entering the office of the Hon. Henry Stanberry (subsequently distinguished as attorney-general of the United States under President Johnson), and also the office of his brother, but after some time went West. He visited all the principal cities, and also some now famous which then hardly existed,

but of them all none offered to the observant young lawyer so many opportunities as St. Louis, and therefore, in 1855, he made this city his home, and was admitted to the bar. The Hon. Alexander Hamilton was circuit judge, James R. Lackland was judge of the criminal court, and Henry A. Clover was prosecuting attorney.

Mr. Noble was soon engaged in several very important cases, and in the successful defense of a man named Middleton for killing a person known as "Buffalo Bill" made a bright record as a promising criminal lawyer. His practice, however, not fulfilling his expectations, he removed in the following year (1856) to Keokuk, Iowa, and at once entered upon a most successful career, although brought into competition with many very able men, among them the Hon. S. F. Miller, now one of the justices of the United States Supreme Court. When the war broke out he had probably as extensive a practice as any lawyer in Iowa, and his professional prospects were of the brightest character, but when hostilities between the North and South began the lawyer was lost in the patriot, and leaving his office, Mr. Noble, in August, 1861, enlisted in the Third Iowa Cavalry, having previously, however, been engaged in some skirmishes along the border of Missouri (Athens, etc.) as a member of the Citizens' Guard. He enlisted as a private, but was soon elected first lieutenant, and subsequently became adjutant, devoting himself more particularly to the work of instructing the regiment in tactics, etc. When the regiment was at Benton Barracks, in 1862, Gen. Sherman, who was in command, offered Adjt. Noble a position on his staff, but he obtained permission to decline, preferring to remain with his regiment.

The Third Iowa Cavalry was actively engaged until the close of the war, and distinguished itself most honorably. Lieut. Noble was with it almost constantly, and rose step by step until in 1865 he became colonel. For several months, while Gen. Curtis was commanding the Department of the Missouri, with headquarters at St. Louis, he served as judge-advocate of the department.

Col. Noble participated in many important engagements. He was in the battle at Pea Ridge, the march to Batesville and Helena, Ark., the surrender of Vicksburg, several affairs about Little Rock, several movements in Tennessee and Mississippi against Forrest, and finally, under Gen. James H. Wilson, took part in the great cavalry raid into Alabama and Georgia. Ingersoll's "Iowa and the Rebellion" says, "There was not an engagement during the campaign where the Third Iowa did not behave with great gallantry, and the meritorious services of Col. Noble and his command were universally acknowledged throughout." At the close of the war Col. Noble was promoted to brigadier-general for meritorious and gallant services, and was mustered out in August, 1865.

During the war, and while yet a major, he was married at Northampton, Mass. (in February, 1864), to the daughter of Dr. H. Halstead, formerly of Rochester, N. Y. Two children were born of this marriage, but neither is living.

After the war Gen. Noble settled in St. Louis, and was enjoying a fair practice when, in 1867, upon the recommendation of Attorney-General Stanberry, his former law instructor, he was appointed United States district attorney by President Johnson. This office he retained some three years. As district attorney his services were principally directed to the enforcement of the internal revenue laws, involving the interpretation of new enactments which had been subjected to but little judicial scrutiny; but he also conducted numerous civil cases of much importance, among others that of the government against the Adams Express Company, which attracted great attention and in which he obtained a verdict for fifteen thousand dollars. In this practice he was brought into competition with the best lawyers of the Missouri bar.

After his resignation of the district attorneyship he resumed the general practice of the law, and has been thus steadily engaged ever since. The business of his firm in miscellaneous civil suits is probably larger than that of any other firm in St. Louis, and Gen. Noble has been honored by the confidence of some of the largest corporations and capitalists of the city. Among other important cases, his firm prosecuted the suit of Adolphus Meier & Co. *vs.* the St. Louis Insurance Company, and obtained a verdict for plaintiffs of sixty-four thousand dollars, which was paid without appeal.

This case was followed by others of the first magnitude, probably as large and important as have ever fallen to the lot of a lawyer in the United States. Of these the most conspicuous was the celebrated case of the city of St. Louis *vs.* the St. Louis Gas-Light Company, which involved the right of the city to the property of the company and to a million dollars which the city had collected for gas while the works were in the hands of a receiver. The gas company was defeated in the Circuit Court and the Court of Appeals, but took the matter to the Supreme Court and received a reversal of the judgment. For their services the gas company paid Noble & Orrick thirty-five thousand dollars in a single check. Mr. Noble's firm is also engaged in other suits brought by the gas company

against the city and involving nearly one million dollars.

Among other great cases in which Mr. Noble's firm has been successfully engaged, either alone or associated with others, are the following:

National Bank of Commerce of New York *vs.* the National Bank of the State of Missouri. Verdict for plaintiff for four hundred and thirty-four thousand dollars.

Foss & Hunter *vs.* Little Pittsburgh Mining Company, involving title to at least three hundred and fifty thousand dollars' worth of property.

Adolphus Jacobson, stockholder in the Granby Lead and Mining Company, *vs.* St. Louis and San Francisco Railway Company, involving at least three hundred and fifty thousand dollars.

The fees of Mr. Noble's firm in these three cases aggregated over twenty-five thousand dollars. His firm was also signally successful in conducting to a favorable termination, against two adverse decisions, the suit of Swope *vs.* Leffingwell and the Atlas National Bank, of Boston, Mass., involving over fifty thousand dollars.

The defense of the St. Louis Beef-Canning Company against the claims of the Wilson Packing Company *et al.* was another important victory of Mr. Noble's firm. They conducted the case from its commencement until the United States Supreme Court, in May, 1882, decided unhesitatingly in behalf of the defendant.

Gen. Noble has been frequently offered important and lucrative offices by his political friends, but has steadily declined them, preferring the honors and rewards of his profession, which, as has been seen, are great, and which his industry and ability have richly merited. That, however, which he prizes as of more worth than mere professional success is the respect and esteem in which he is held by his legal brethren and his fellow-citizens generally as a thoroughly honest lawyer.

The capture of Camp Jackson by Capt. N. Lyon, of the United States forces, on May 10, 1861, caused the intensest excitement throughout the State. At that time the Legislature was discussing the "Missouri State Guard Bill," but Governor Jackson deeming Jefferson City no longer a safe place for the deliberations of the Legislature, convened that body at Neosho, Sept. 16, 1861.

Finally the Legislature (or that portion of it which adhered to the fortunes of Governor Jackson) severed Missouri's connection with the Union as far as was in its power by an act which, having the sanction of no competent force to sustain its provisions, was of no avail. Governor Jackson appointed Sterling Price major-general, and N. W. Watkins, Thomas A. Harris, John B. Clark, W. Y. Slack, A. E. Steen, M. M. Parsons, J. H. McBride, and James S. Rains brigadier-generals of the Missouri State Guard. The Legislature adjourned Nov. 9, 1861, to meet at New Madrid on the first Monday in March, 1862.

The following titles of acts passed indicate the more conspicuous military legislation effected by that body:

"An Act to provide for the organization, government, and support of the military forces of the State of Missouri."

"An Act to raise money to arm the State, repel invasion, and protect the lives and property of the people of Missouri."

"An Act placing money at the disposal of the Governor for the defense of the State."

"An Act to perpetuate friendly relations with certain Indian tribes."

"An Act to authorize the Governor of the State of Missouri to suppress rebellion and repel invasion."

"An Act to create a special military fund for the use of the Governor."

"An Act prohibiting certain persons from holding office in the State of Missouri."

"An Act concerning railroads and telegraphs in Missouri."

When the President laid before the Senate the following communication from the Governor:

"*To the Senate and House of Representatives:*

"I have just received information that two regiments of Mr. Blair's are now on their way to the capital.

"C. F. JACKSON."

Senate bill entitled "An Act to raise money to arm the State, repel invasion, and protect the lives and property of the people of Missouri" was taken up and passed.

House bill entitled "An Act to provide for the organization, government, and support of the military forces of the State of Missouri" was also taken up, read a first time, rule suspended, read a second and third time and passed.

The State Convention called under an act of the Legislature passed in January, 1861, assembled in St. Louis in due time, and soon took decisive action in favor of the Union. Governor Jackson and the State Legislature having left Jefferson City, the State capital, the convention declared the offices of Governor, Lieutenant-Governor, Secretary of State, and members of the General Assembly vacant, and proceeded to elect the executive officers, with the proviso that their successors should be chosen at an election to be held on the first Monday in August, 1862. Accordingly, Governor Jackson was displaced, and H. R. Gamble elected Governor. Lieutenant-Governor Thomas C. Reynolds and Secretary of State Benjamin F. Massey were also ejected from office and their places declared vacant. A full history of the election

for members of the convention and the proceedings of that body is given in the chapter on the civil war.

In 1862 the convention, then in session, by ordinance, districted the States into nine congressional districts. In the election which followed F. P. Blair, Jr., Henry T. Blow, John W. Noel, S. H. Boyd, J. W. McClurg, Austin A. King, B. F. Loan, William A. Hall, and James S. Rollins were declared entitled to seats in the Lower House of the Federal Congress. Mr. Noel having died, John G. Scott obtained his seat.

In 1864 the electoral district system which existed hitherto was abolished by an act making the congressional districts electoral districts, the same number of electors as there were congressional districts to be chosen, one of whom should be a resident of the district, and, in addition, two electors to be chosen by the State at large. This year the following gentlemen were admitted to seats in the Lower House of the Federal Congress: John Hogan, Henry T. Blow, Joseph W. McClurg, B. F. Loan, George W. Anderson, Robert T. Van Horn, John R. Kelso, John F. Benjamin, and John W. Noel. The electoral vote of the State was cast for Lincoln and Johnson.

Thomas C. Fletcher was this year elected Governor by a vote of 71,531, against 30,406 cast for Thomas L. Price; and Abraham Lincoln received of the popular vote 71,676, against 31,626 cast for George B. McClellan.

In 1865 a State Convention to revise the Constitution was held, and the instrument as perfected was submitted to the people. The vote on its adoption stood: For the Constitution, 43,670; against the Constitution, 41,808.

"However the returns," said the *Republican* of June 15, 1865, "may be figured at Jefferson City, there is no escape from the fact that the vile thing has not the sanction of the people. Counting in the ballots of minors, aliens, etc., the vote for the Constitution will not reach much above one-half of that returned for Mr. Lincoln last fall. There is no candid man who will say that a measure declared carried by such an expression reflects the will of the State. The most monstrous expedients were resorted to and used to foist this Constitution upon us. Thousands of votes—the votes of as loyal and good men as any who dare to object to them—were not admitted when presented, or were kept out of the ballot-boxes by a system of high-handed intimidation. Thousands of men were disfranchised by the arbitrary *dicta* of unscrupulous judges. This is not bare assertion. Proofs ample and plentiful can be readily produced to sustain what we have said. We do not concede that the Constitution has been carried. On the contrary, we contend that it has been rejected by the people of the State. Whether the officials at the capital will let it appear so is a matter upon which we do not venture to advance an opinion at present.

"Below will be found an abstract of the result on the 6th, so far as the same has reached us. It is taken from our table, which was made up from the most reliable sources within our reach, and with much greater care than is usually bestowed upon such matters when prepared for the columns of a daily paper. At best, however, that was imperfect. From twenty-nine counties we have no returns whatever. From twenty-nine others we have only partial returns or estimated majorities, while of the returns given from the remaining fifty-six, not over one-half are official. The majority of the citizens' vote, it will be seen, is three thousand and two against the Constitution. After deducting the majority of the soldier vote, it is still four hundred and seventy-one.

	Against.	For.
"Citizens' vote	35,005	32,003
Soldiers' vote	675	3,206
Total	35,680	35,209
Majority against the Constitution		471"

The new Constitution adopted by the above vote abolished slavery, and the fact was announced in the following proclamation:

"EXECUTIVE DEPARTMENT,
"CITY OF JEFFERSON, MO., Jan. 11, 1865.

"It having pleased Divine Providence to inspire to righteous action the sovereigns of Missouri, who, through their delegates in convention assembled, with proper legal authority and solemnity, have this day ordained that hereafter in this State there shall be neither slavery nor involuntary servitude, except in punishment of crime, whereof the party shall have been duly convicted, and all persons held to service or labor as slaves are hereby declared free.

"Now, therefore, by authority of the supreme executive power vested in me by the Constitution of Missouri, I, Thomas C. Fletcher, Governor of the State of Missouri, do proclaim that henceforth and forever no person within the jurisdiction of this State shall be subject to any abridgment of liberty, except such as the law shall prescribe for the common good, or know any master but God.

"In testimony whereof I have hereunto signed my name, and caused the great seal of the State to be affixed, at the city of Jefferson, this eleventh day of January, Anno Domini eighteen hundred and sixty-five.

"THOMAS C. FLETCHER."

"By the Governor:
"FRANCIS RODMAN, *Secretary of State*."[1]

The following is a list of officers of St. Louis County who were compelled by act of the State Convention to vacate their offices on the 1st of May, 1865:

Justices: Of the County Court, Benjamin Charles, William Taussig, John H. Fisse, Barton Able, John

[1] The event was hailed in St. Louis with general rejoicing, and on the night of the day on which the Governor's proclamation was issued there was a grand illumination. The illumination of parts of Fourth Street was particularly fine, attracting to every square between Market and Washington Avenue great concourses of citizens and ladies and children. The display of fire-works from the dome of the court-house, beside the brilliant light shed far and wide by the full illumination of the Planters' House and other buildings of that neighborhood, made that quarter of the city a great centre of attraction. The appearance of Verandah Row and the buildings on the corner of Washington Avenue and Fourth Street was also very brilliant with flags and lanterns. Many private dwellings were illuminated.

Alf, Samuel James, John E. Yore; Circuit Court, James C. Moody; Common Pleas, Samuel H. Reber; Land Court, Charles B. Lord; law commissioner, Robert J. Rombauer; Criminal Court, Wilson Primm; Probate Court, William F. Ferguson.

Clerks: County Court, Samuel W. Eager; Criminal Court, Fred. Kretschmar; Common Pleas, Leon J. Papin; Circuit Court, F. A. Schneider; Land Court, Robert White; law commissioner, William C. Guffman; sheriff, John C. Vogel; recorder, A. C. Bernoudy; circuit attorney, J. P. Pastime; assistant attorney, W. C. Gantt. The whole number of officers throughout the State thus vacated was about 840. There were three supreme judges, 20 circuit judges, 114 circuit clerks, 114 sheriffs, 114 attorneys, 342 county justices in the State outside of St. Louis.

On the 14th of June, 1865, while the Supreme Court of Missouri was proceeding with its usual business, Gen. Coleman appeared in the court-room with an overpowering force, and by virtue of a military order of Governor Fletcher, arrested, and carried out of the court-room Judges Bay and Dryden, and seized and turned over to the new court the books, records, papers, and seals of the court.

"This act," says the *Republican* of June 15th, "was not only done without law, but after a solemn decision of the Circuit Court of St. Louis County that there was no legal validity in the ousting ordinance under which the new judges claimed seats upon the Supreme bench, and also in the face of an injunction already issued and pending against the very act in question. It was not done in the time of war, for there is no war now existing. There is no pretense of military necessity in the case, because there was no enemy against whom military force could be directed. It was not done by virtue of martial law, for the State of Missouri has never declared martial law, and Governor Fletcher was not the minister of that stern rule of action. The case presented a mere question of controversy between civil powers.

"The court whose authority was stricken down yesterday was a legal, constitutional, and loyal court, in relation to whose fidelity to the duties of its office, to the laws, to the Constitution, to the country no question had ever been made or could be made. This court was elected by the people of Missouri in 1863. Its members were sworn to support the Constitution of Missouri. They not only had the right, but it was their duty to support that Constitution as their best judgment dictated. The late convention passed an ordinance, or what is called an ordinance, turning them out of office. This so-called ordinance was not within the scope of the act calling the convention, and was not within the powers of the convention, and besides was not incorporated into nor made any part of the form of Constitution framed by them and submitted to the people of Missouri at the late election. The offense which the old judges therefore committed was that they were of opinion that this so-called vacating ordinance was not valid. The Governor thought it was; the court thought differently. If the court honestly believed that this vacating ordinance was not valid, it was bound to disregard it. This was done, whereupon the Governor sends a brigadier-general in force to turn the judges out of their places.

"But no sooner did it take effect by its terms than the question of its validity rose before Judge Moody, a member of the same party with the convention. The judge promply held it void. Why? Because he could not do otherwise. It was void, and he had to say so. The same question rose next before the court in Lafayette County. The Circuit Court, Judge Tutt, was then ready to adjudicate the question. The judge was of the same party with the Governor. The Governor had just appointed him. But this lordly tyrant was afraid to trust Judge Tutt to decide on the so-called vacating ordinance. He knew that every honest and intelligent lawyer would hold it void, so he sent a file of soldiers, who decided the question of law, held the ordinance perfectly constitutional, perfectly valid. These jurists had no difficulty in settling the knotty point.

"Not long after the same question arose on the validity of the ordinance in Pettis County. The Circuit Court of that county was compelled to rule the case and ready to do it. Why were not the rights of Mr. Lowe left to the very judge whom the Governor had so recently appointed? Why? Because the Governor was afraid to trust him, and because the narrow-minded and reckless fanatics who advise and govern him knew there was no certainty in sustaining the ordinance, so called, save by the soldiery. The same motive governed him here. It is not two months since Governor Fletcher appointed Judge Moody to his present office, and yet on yesterday he (Governor Fletcher), by an act of arbitrary lawlessness, has trampled upon the authority of Judge Moody, disregarding the injunction issued by him Tuesday morning, and overthrowing his court."

On the evening of Saturday, June 17th, an immense public meeting was held in the Court-House Square, St. Louis, to protest against the forcible removal of the judges by Governor Fletcher. Capt. George A. McGuire called the meeting to order, and on his motion Hon. John Riggin was elected chairman.

On motion of the Hon. James O. Broadhead, D. M. Grissom and Fred. M. Kretschmar were appointed secretaries, and on motion of Capt. Barton Able, A. G. Braun, John Finn, Benjamin Spellbrink, Charles Kintzing, and Bernard Stein were chosen vice-presidents. Addresses were made by Col. James O. Broadhead and Hon. Samuel T. Glover, after which a committee, appointed by the chairman and consisting of T. T. Gantt, Charles Gibson, Peter L. Foy, D. M. Grissom, and A. W. Alexander, reported a series of resolutions protesting in strong terms against the course of Governor Fletcher and advocating his impeachment. Col. T. T. Gantt and Maj. James S. Rollins also delivered addresses. The popular excitement on the subject was intensified by the fact that prior to the meeting orders were issued by Col. Blood, commanding the Second Militia District, requiring a general muster of certain militia organizations at half-past seven o'clock in the evening, an act which the opponents of Governor Fletcher claimed was designed to intimidate them.

The vote on the adoption of the new Constitution was clouded with uncertainty as to what oath should

be taken by voters prior to casting their ballots. Some persons were of the opinion that the oath prescribed by the old Constitution was the proper oath, while others were of opinion that the latter was the oath embodied in the new Constitution. The sixth section of the article providing for the enforcement of the Constitution contained the following provisions:

"At said election no person shall be allowed to vote who would not be a qualified voter, according to the terms of this Constitution, if the second article thereof was then in force. The judges of election shall administer to every person offering to vote, in *lieu of the oath now required to be taken by voters*, under the ordinance of June 10, 1862, the following oath, to wit:

"I, A. B., do solemnly swear that I am well acquainted with the terms of the third section of the second article of the Constitution of the State of Missouri, adopted by the convention which assembled in the city of St. Louis on the 6th day of January, 1865, and have carefully considered the same; that I have never, directly or indirectly, done any of the acts in said section specified; that I have always been truly and loyally on the side of the United States against all enemies thereof, foreign and domestic; that I will bear true faith and allegiance to the United States, and will support the Constitution and laws thereof as the supreme law of the land, any law or ordinance of any State to the contrary notwithstanding; that I will, to the best of my ability, protect and defend the Union of the United States, and not allow the same to be broken up and dissolved, or the government itself to be destroyed or overthrown under any circumstances if in my power to prevent it; and that I make this oath without any mental reservation or evasion, and hold it to be binding on me."

Notwithstanding these "ironclad" features, it was further provided that should any one decline to take said oath he could not vote; but the taking of said oath was not to be deemed conclusive evidence of his right to vote, but such right might be disputed and disproved.

In St. Louis City and County the vote on the adoption of the new Constitution was: For, 5272; against, 11,239; majority against, 5967.

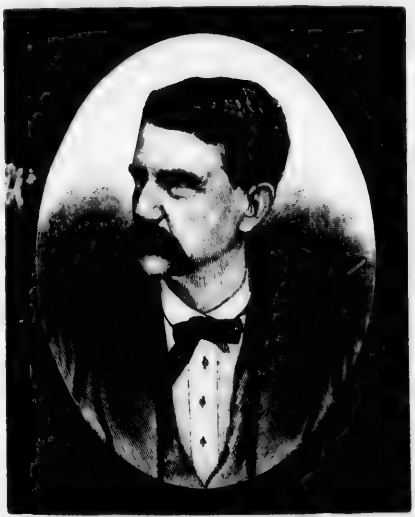
There were grave doubts existing in the public mind whether the new Constitution had been adopted. An extraordinary reticence was observed by all State officials for weeks after the vote was taken, and a dispatch was printed in the *Republican* of June 26th stating that "the Secretary of State positively denies all access to the poll-books, and refuses to allow any publicity until after the 1st of July to the returns received at his office." The following dispatch would seem to indicate a purpose to count in the Constitution whether rejected or adopted by the people:

"JEFFERSON CITY, June 24, 1865.

"BART. ABLE, ESQ.:

"The Secretary of State, Rodman, refuses to permit me to examine the returns now or hereafter. He says that after July 2d he will give me copies at fifteen cents per folio.

"A. W ALEXANDER."



In 1866 the following persons received certificates of election as members of Congress: W. A. Pile, C. A. Newcomb, T. E. Noel, J. J. Gowelly, J. W. McClurg, R. T. Van Horn, B. F. Loan, J. F. Benjamin, and George W. Anderson. Although the vote cast for Anderson was only 5039, and the vote for W. F. Switzler, his competitor, was 6161, Anderson received the certificate which admitted him to the seat. Callaway County gave Switzler 1463 votes and Anderson 163, and was not counted, and 240 of the votes of Pike County for Switzler were not counted. Callaway was not represented in the Federal Congress, in the State Senate, nor in the House of Representatives, and obtained thereby the title of "Kingdom," now in almost general use. Mr. Noel died before the expiration of his term, and was succeeded by James R. McCormick (war Democrat), and J. H. Stover took the place of McClurg, elected Governor by a vote of 82,107 against 40,958 cast for John S. Phelps, Democrat.

In St. Louis the Democratic ticket received a majority of 3000, electing Steger for street railroad commissioner and Cady for recorder, with eight out of ten aldermen, and sixteen out of twenty delegates, and all seven school commissioners. The suffrage amendments of the Constitution, striking out the word "white" from the Constitution, was defeated by a vote of 74,053 against to 55,236 in favor.

In 1867 the "oath of loyalty" received a severe blow from the Supreme Court of Missouri in the case of the Rev. D. H. Murphy, of Cape Girardeau, who was arrested for preaching the gospel without having taken the oath. He was tried, convicted, and sentenced to pay a fine of five hundred dollars. The case of Father Cummings, of Pike County, sentenced by Judge Fagg to pay a fine of five hundred dollars for preaching without taking the oath, went to the Supreme Court of Missouri, where the judgment of the Pike County Circuit Court was sustained. Thence it went to the Supreme Court of the United States and was reversed, that tribunal deciding that the provisions of the Constitution of Missouri enforcing the "test oath" partook of the elements both of an *ex post facto* law and a bill of pains and penalties, and was prohibited by the Constitution of the United States. The case of Rev. Mr. Murphy rested upon precisely the same grounds as that of Father Cummings. The Supreme Court of Missouri not merely yielded to the binding authority of the Supreme Court of the United States, but by elaborate argument proved that the decision of that court was sound law.

Prominent among the able lawyers who lent their

energies and talents to the work of restoring to the disfranchised citizens of Missouri their rights and liberties was Francis Preston Blair, Jr. Mr. Blair's course in this crisis was all the more significant and creditable from the fact that he had been among the earliest and most uncompromising advocates of those principles the practical enforcement of which had led, incidentally, to the enactment of the laws he now sought to have repealed. Francis P. Blair, Jr., was the son of Francis Preston Blair, who was born at Washington, Abingdon Co., Va., on the 12th of April, 1791, and whose father, James Blair, a Virginia lawyer, became attorney-general of Kentucky. Francis P. Blair, Sr., was a noted journalist, and one of the ablest political writers of his day. He was educated at Transylvania University, Kentucky, and studied law, but never practiced. He began at an early age to take an active part in politics, and in 1824 supported Henry Clay for the Presidency. In 1829, Mr. Blair published an article against the nullification movement, which attracted the attention of Gen. Jackson, and he was invited to become the editor of the administration organ, the *Globe*, then about to be established in Washington. That paper was issued for the first time in November, 1830, and continued to be the organ of Democratic administrations, with Mr. Blair as editor, until 1845, when President Polk, thinking a change in its control desirable in the interests of the party, offered him the position of minister to Spain, which he declined. Thereupon Mr. Blair retired to his farm in Montgomery County, Md., and in 1848 withdrew from the Democratic party and supported Mr. Van Buren for the Presidency. Upon the repeal of the Missouri Compromise he took a prominent part in the organization of the Republican party, and in 1856 supported Gen. Fremont for the Presidency.

Francis P. Blair

Francis Preston Blair, Jr., was born at Lexington, Ky., on the 19th of February, 1821. He graduated at Princeton College in 1841, and studied law with Lewis Marshall, and at the Transylvania Law School, and about 1842 removed to St. Louis, becoming partner of his brother Montgomery, who was already in possession of a considerable practice. Montgomery subsequently became Judge of the Court of Common Pleas, and Francis opened an office of his own. In 1845 he journeyed with St. Vrain and Bent to New Mexico, and when the troubles with Mexico began volunteered as a private, and served with much credit. Two years later he married Miss Appoline Alexander, of Kentucky, and resumed the practice of law in St. Louis, investing in real estate and becoming interested in political affairs. He had all the magnetism and fascination of a born leader of men, combining in a rare degree the qualities which awaken enthusiasm and defy opposition. Generous, hearty in speech and manner, gifted with a memory that never forgot a face nor a name, he was soon one of the spokesmen of his party. In 1848 he joined the Free-Soil wing of the Democratic party and indorsed the Van Buren ticket, and in 1849 supported Benton in his appeal to the people on the slavery issue. In 1852 he was sent to the Lower House of the Missouri Assembly, and re-elected in 1854. He also purchased an interest in the *St. Louis Democrat*, the organ of the anti-slavery leaders, and contributed many able articles to that journal.

Mr. Blair was not originally an abolitionist, but was strongly in favor of getting rid of the negro population of Missouri, and of preventing the extension of slavery to those Territories in which the institution had not been established. He believed that if Missouri became a free State her prosperity would rapidly increase, and he pronounced himself in favor of getting rid of negroes, as well as negro slavery, on the ground that negro labor could be utilized to better advantage elsewhere, and that Missouri would be better off without it. His position was, however, misinterpreted and misrepresented by his opponents,

who persistently denounced him as an abolitionist. In this connection Mr. Blair is said to have remarked upon one occasion,—

"Those fellows know very well how false the charge is, and therefore there is no good in trying to put them right. But what they do *not* see is that by calling *me* an abolitionist, who am not to be scared at such things, they are inuring those who secretly sympathize with me, but who are not as thick-skinned, to hear themselves also called by foul names without being terrified out of their senses. Let them go on. They will make the name of abolitionist respectable sooner than they dream."

In 1856 he was elected to Congress from Missouri as a Republican, and delivered a speech in favor of the colonization of negroes in Central America. He was again a candidate in 1858, but his Democratic opponent, J. Richard Barret, was elected. Mr. Blair, however, contested his seat, which was awarded to Blair by the House of Representatives. All that Mr. Blair had asked in making the appeal was a new election, and upon the awarding of the seat to him he declined it, and referred the controversy with his rival back to the people. In the summer of 1860 the election was held for the unexpired term, beginning with the first Monday of December, 1859, and the full term, beginning with the first Monday of December, 1861. Mr. Barrett, whom many believed to have been treated unfairly by the Committee on Elections, was chosen for the broken term, but Gen. Blair was, on the same day by a large majority, successful over him in the contest for the full term. Mr. Blair took high rank in the House of Representatives, not only as a ready, forcible debater, but as a persistent and successful worker, and a man of great personal influence and power. Among the early abolitionists of Missouri he was justly regarded as the ablest and most fearless of the leaders of the anti-slavery party, and his course throughout the critical period preceding the civil war was conspicuously strong and fearless. After his death *Harper's Weekly* printed an account of some of the scenes at the Chicago Republican Convention of 1860, when his ready wit reconciled the Giddings party, then about to withdraw, and "saved to the platform the consecrating phrases of the Declaration." But the greatest of his services to the Union was rendered when the whole weight of his influence was thrown against secession. In 1861 he was the heart and soul of the Union element, the adviser of Gen. Lyon, the first citizen of the State to appreciate the greatness of the inevitable conflict, and the most active spirit in the organization of volunteer troops for the defense of the Union. He telegraphed to the War Department for permission, raised two regiments, planned the capture of Camp Jackson, and on May 10th, with the aid of Gen. Lyon, accomplished that work. He was offered an appointment as brigadier-general, but declined in behalf of Capt. Lyon. For more than a year he sat in the National Congress. In 1862 he accepted a commission as major-general, raised a brigade of troops in St. Louis, and having resigned his seat in Congress, to which he had been elected in the fall of 1862, took the field under Grant, commanding the Second Division of Sherman's corps in the gigantic battles of the Vicksburg campaign, and leading some of the most desperate assaults of that eventful summer. In 1864, as the general commanding the Seventeenth Corps, he followed Sherman in his brilliant march and bore his full part therein. At this time he was in full accord with the Republican party. From 1848 he had been a "free-soiler;" slavery he thought a curse, an incubus, and his advocacy of these tenets had time and time again kindled the fiercest fires of political animosity. With tact, courage, tenacity, and independence, he had won regard, awakened admiration, fought his way to political leadership, shown his splendid loyalty on the battle-field, and might justly have claimed the highest political honors from the nation.

In 1866 he was appointed by President Johnson collector of customs for the port of St. Louis, but the nomination was rejected by the Senate. He was also a delegate to the Soldiers' Convention of 1866, and in December of that year was appointed a commissioner of the Pacific Railroad. In the mean time Gen. Blair's allegiance to the Republican party, which for years had been so ardent and unquestioning, had been considerably modified by the course of the leaders of that party on the subject of reconstruction at the South. When in 1865 he returned to St. Louis and found that thousands of those who had been his fiercest political foes were disfranchised, almost his first public act was to protest, and to begin in the courts a litigation to prove the illegality of that disfranchisement. His efforts never ceased until he had carried this point, to accomplish which he made common cause with his late opponents, and turned his back upon Republicanism. The step was regarded as almost treason, but this savage condemnation has been greatly modified. He was the first distinguished Republican to break with his party on reconstruction doctrines, but Greeley, Sumner, Schurz, Trumbull, and other men of note afterwards expressed similar views, and the party at large has long ago recognized the enormous blunders of that era. Blair was emphatic by nature, and when he broke with his associates he could not remain neutral. In 1866 he canvassed the State in opposition to the "proscription provisions" of the new Constitution, and incurred per-

sonal danger over and over again. He refused in person to take the oath of purgation required by the Drake Constitution of all voters, and brought an action against the judges of election who rejected his vote unaccompanied by that preliminary. The judgment of the Circuit Court was against him, but by a divided bench; he appealed to the Supreme Court, which again by a divided bench affirmed the judgment, and on a writ of error to the Supreme Court of the United States the judgment was again affirmed by an equal division (four to four) of the members of that tribunal. Great was the popular approval throughout Missouri of the course taken in this memorable "constitutional campaign" by Blair, Glover, Garesche, and their allies, and the success which finally crowned their efforts was a noble tribute to their courage, ability, and tact.

In 1868, Mr. Blair having been nominated with Horatio Seymour on the Democratic ticket, the country was soon after electrified by the noted "Broadhead" letter, which was characteristically defiant, and aided largely in his defeat. But whether or not Gen. Blair was wholly answerable for this production is a secret buried with him. In 1870 the people of Missouri declared in favor of ending the disfranchisement of so many citizens, and Gen. Blair re-entered public life as a member of the Assembly, and in January, 1871, was chosen to the United States Senate to fill the balance of the term of C. D. Drake, who had resigned.[1] In 1872 he aided in Greeley's nomination at Cincinnati, his popularity in Missouri meanwhile increasing steadily, and his re-election as senator being assured. But in November of that year came a stroke of paralysis from which he never permanently recovered, and he died in St. Louis, July 11, 1875, his wife, five sons, and three daughters surviving him. Mr. Blair left public life far poorer than when he entered it; his thoughts, time, and means had always been at the service of his friends and the public, and having lost a large portion of his estate by suretyships he died a poor man, bequeathing to his family, however, the imperishable heritage of a lofty reputation and a spotless name.

When the news that Francis Preston Blair was dead swept over the State a torrent of grief was evoked. Everywhere it was felt that a great man had fallen, and that pure-minded patriot was no more. The city was draped in mourning; the vessels in the harbor displayed their flags at half-mast; everything betokened an outburst of popular affection never surpassed. It was a grand tribute to the memory of the faithful statesman. The survivors of the First Regiment of Missouri volunteers (which he had commanded) met, passed resolutions, and attended the funeral in a body. The ex-Confederate soldiers of Missouri also met to honor the memory of the man who fought them bravely, and yet helped to re-enfranchise them. The Constitutional Convention was then in session, and Hon. J. S. Rollins and Col. T. T. Gantt delivered eloquent eulogies before that body, which appointed representatives to attend the funeral. Numerous public meetings were also held, and the bench and bar and numbers of fraternal societies passed appropriate resolutions.

The funeral services at the First Congregational Church were peculiarly impressive. Rev. Drs. Post and Brookes officiated, and delivered eulogies on the dedeceased. The pall-bearers were Hon. James S. Rollins, of Columbia, Mo.; Col. T. T. Gantt, Benjamin Farrar, Gerard B. Allen, Giles F. Filley, Samuel Simmons, Col. James O. Broadhead, and Maj. Arden R. Smith.

Sufficient has been said to give the reader some conception of the rank that this ardent, impetuous, and heroic man, whose errors were never of the heart, who attracted men of the most diverse views and established himself in their friendship, must rightfully hold in the history of Missouri. He was a sturdy figure, as full of vitality as an old Crusader or a free lance of the fifteenth century. Western politics have seldom been illuminated by more original, characteristic, and honorable principles than those which Frank P. Blair possessed and battled for to the end of his eventful life.[2]

Montgomery Blair, elder brother of Francis P. Blair, Jr., has also played a conspicuous part in national politics. He was born in Franklin County, Ky., on the 10th of May, 1813, and graduated at West Point in 1835. Entering the Second Artillery he served in the Florida war, but resigned his commission on the 20th of May, 1836. He studied law,

[1] At this time the St. Louis *Republican* said, "The cry had been that no one could be loyal without being a radical, that a Democrat could not in his heart be a Union man. Here was a soldier, who was one of the earliest in the field against rebellion, —a gallant Union commander,—who gave the lie to this declaration, and followed it up with an emphatic and unreserved avowal that he was thenceforth that despised and odious thing, a Democrat. In 1866, Frank Blair boldly made the fight in this State, with Phelps, Glover, Woodson, and other leaders, against the tyrannical registration law, going from point to point and organizing the Democracy. The considerable number of Liberal Republicans acting with the Democracy almost takes the contest out of the sphere of party politics."

[2] In 1848, Mr. Blair published the "Life and Public Services of Gen. William A. Butler."

and began the practice of his profession in St. Louis in 1837. He served as United States district attorney for Missouri from 1839 to 1844, resigning the position early in the latter year to accept that of judge of the St. Louis Court of Common Pleas. In 1852 he removed to Maryland, and in 1855 was appointed United States solicitor in the Court of Claims.

Prior to the repeal of the Missouri Compromise he had been a Democrat, but having subsequently joined the Republican party, was removed from his office by President Buchanan in 1858. In 1857 he acted as counsel for the plaintiff in the Dred Scott case, and in 1860 presided over the Republican Convention of Maryland, and was sent as a delegate to the Chicago Convention which nominated Abraham Lincoln for the Presidency. He took an active and prominent part in the campaign of that year, and in March, 1861, was appointed Postmaster-General by Mr. Lincoln, continuing to serve as such until Sept. 23, 1864. Mr. Blair was the only member of the cabinet who opposed the surrender of Fort Sumter in 1861, and throughout the war was the consistent advocate of an energetic policy. He strenuously opposed, however, the arrest of private citizens and other obnoxious measures, and in 1865 organized the movement that restored self-government to the people of Maryland, doing for that State what his brother, Gen. Frank Blair, did for Missouri. Mr. Blair was an earnest and powerful supporter of President Andrew Johnson, and threw the whole weight of his influence against the reconstruction measures of the Republican party. In the great political campaign of 1876 he espoused the cause of Mr. Tilden, the Democratic candidate for the Presidency, and in 1877 was elected a member of the Maryland Legislature. In 1882 he was the Democratic candidate for Congress from the Sixth District of Maryland, but was defeated. Mr. Blair now resides at the old Blair homestead at Silver Spring, Montgomery Co., Md. He is regarded as one of the ablest lawyers and political thinkers in the country, and his career has been one of remarkable activity in public affairs.

In 1868 the candidates for Congress were Erastus Wells and William A. Pile in the First District; J. J. Lindley and G. A. Finkelnburg in the Second; James R. McCormack and John F. Bush in the Third; Charles B. McAfee, John R. Kelso, and S. H. Boyd in the Fourth; John F. Phillips and Samuel S. Burdett in the Fifth; James Shields and R. T. Van Horn in the Sixth; M. Oliver and Joel F. Asper in the Seventh; John F. Williams and John F. Benjamin in the Eighth, and W. F. Switzler and David P. Dyer in the Ninth. Wells, Finkelnburg, McCormack, Boyd, Phillips, Van Horn (by not counting the vote of Platte and Jackson Counties), Asper, Benjamin, and Dyer (by not counting the vote of the county of Monroe) obtained the certificates admitting them to seats. The electoral vote of the State was cast for Grant and Colfax, with a popular vote of 85,671 for the Republican electors and 59,788 for the Democratic electors.

Erastus Wells, who was thus chosen to represent Missouri in the national House of Representatives for the first time, is conspicuously one of the self-made men of St. Louis. He was born in Jefferson County, N. Y., Dec. 2, 1823, of humble parentage. When a boy old enough to labor he worked on a farm, and during this period—from his twelfth to his sixteenth year—he enjoyed the only school privileges he ever had. These were obtained at a common country log-house school which he walked two miles in winter to attend.

When sixteen he struck out for himself, and, his father having died, he acted as clerk for a while in a store at Watertown, N. Y., at eight dollars per month, and is next heard of as being similarly employed at Lockport, N. Y., in a store in which ex-Governor Washington Hunt was a partner. The salary was but from eight to twelve dollars a month, but he managed with such thrift that in three or four years he had saved one hundred and forty dollars,—a large sum in those days for a boy in his station.

Glowing accounts of St. Louis as an enterprising frontier town were current throughout the East, and young Wells having caught the Western fever determined to settle here. He arrived in September, 1843, and at once began business aggressively. St. Louis was already a large city, and in passing from one business portion to another much walking was involved and a wasteful expenditure of time. Wells reasoned that a speedier mode of travel must soon be adopted. At that time the "upper ferry landing" at North Market Street was a prominent locality, and acting upon his conclusions, he formed in November of the same year a partnership with Calvin Case and started the first omnibus line west of the Mississippi. The rolling-stock comprised but one "'bus," built in the city, and Wells was proprietor, driver, fare-taker, etc. Business opened slowly, but the people gradually realizing that "time was money," began to patronize the new enterprise more freely, and additional vehicles were procured. Eventually Mr. Wells sold out favorably, and then for some years was variously employed, a white-lead factory and a saw-mill being among his enterprises. Finally, returning to his original business, he established a partnership in 1850 with Ca

Charles Wells

vin Case, Robert O'Blennus, and Lawrence Matthews, bought up all the "'bus" lines in the city, and for some years managed a very large and paying business. At one period one of the most profitable features of the enterprise was the running of a line of coaches to Belleville, Ill. In 1855, Mr. Case was killed in the bridge disaster at the Gasconade River, and the partnership was then dissolved. Mr. Wells is the only survivor of the four partners.

Another system of locomotion was about this time beginning to be discussed, and Mr. Wells was quick to foresee its popularity, magnitude, and profit. In 1859 he was prominent in organizing the Missouri Railway Company, and started the first car on the Olive Street line July 4th of that year. He was president of this company until 1881, when he sold out his interest and retired from street railroad management, having seen the system grow from small and doubtful beginnings to its existing magnitude.

Foremost in carrying out enterprises involving the city's welfare and prosperity, Mr. Wells has been prominent in many public undertakings. He is president of the Narrow-Gauge Railway, from Grand Avenue, West St. Louis, to Florissant; for several years was director in the Ohio and Mississippi Railroad; was president of the Accommodation Bank for six years, and was also a director and vice-president of the Commercial Bank; and is now president of the Laclede Gas-Light Company. He also contributed to the erection of the Southern Hotel.

As early as 1848, Mr. Wells' aggressive and energetic qualities had begun to attract attention, and in that year he was elected to the City Council. In 1854 he was again chosen, and for a period of fourteen years retained his seat in that body, relinquishing it only when he took his seat in Congress in 1869. During this long period, so eventful in the history of St. Louis, his voice and vote were always in favor of every judicious and timely measure that seemed calculated to advance the interests of the city. He was energetic in securing the adoption of sanitary measures and a better supply of water, and it was largely through his exertions that the Council was brought to the point of requesting the Legislature to authorize the three-million loan for adequate water-works for the growing city. Being strongly impressed with the inadequacy of the police organization of that period, he urged the adoption of the metropolitan police system, and it was mainly through his tireless and persistent labors against a combination of extraordinary strength that the Council was persuaded to recommend the Legislature to give St. Louis such a measure of reform, and the Legislature was prevailed upon to enact the law.

Having been thus faithful and capable in the City Council, the people chose him to represent them in a higher sphere, and in 1868 elected him to the national House of Representatives in the Forty-first Congress, returning him to the Forty-second, Forty-third, Forty-fourth, and Forty-sixth Congresses by majorities which indicate the confidence and esteem in which he was held. He brought to his new duties the same energy and industry he had exhibited in his own affairs and in the City Council. It was said that he really accomplished more for St. Louis in a practical way than any of his predecessors had done. He secured the first appropriation for the custom-house, and was instrumental in having the work inaugurated on a scale commensurate with the importance of St. Louis and the growing needs of the district. He procured the first money for the improvement, systematically and intelligently, of the Mississippi, was an ardent advocate of Eads' jetty system, and performed most valuable service, by his speeches and intercourse with public men, in directing attention to the importance of the Mississippi as the great water-way of the North American continent. His liberal views, unquestioned honesty, and rugged common sense gave him an influence at Washington far beyond that possessed by many more pretentious and prominent men. Since leaving Congress he has led the life of a private citizen.

In 1850, Mr. Wells married a daughter of John F. Henry, by whom he had three children, two sons and a daughter. Of the former, Rolla has been superintendent of the Missouri Railroad Company, and is now superintendent of the Robert G. Brown Oil Company. He is twenty-five years old, and has already shown exceptional business capacity. His wife having died, Mr. Wells in 1869 married Mrs. Eleanor P. Bell, widow of David W. Bell.

Mr. Wells possesses a large fortune, the fruit of his indomitable energy and industry. Success was won through great hardships and severe toil, but the unbefriended and penniless boy who boldly struck out into the virgin West to create for himself a sphere of action and a home, brought such physical and mental resources into action that fortune relented and freely showered her gifts upon him. With all his wealth, however, he is the same unostentatious, genial, and kindly "man of the people" as in the days of his struggling adversity, and is justly regarded as one of the most prominent of the self-reliant and hardy class of men of whom St. Louis has been so conspicuously fruitful.

J. J. Lindley, who, as the Democratic candidate for Congress from the Second District in 1868 against

G. A. Finkelnburg, was a conspicuous figure of the campaign, was born at Mansfield, Ohio, Jan. 1, 1822, but removed with his parents when but a boy to Cynthiana, Ky., where he lived several years. His education in good part was received at Woodville College, Ohio. Upon leaving that institution he began the study of law, and mastering the rudiments, he located in 1846 at Monticello, the county-seat of Lewis County, Mo., where he at once entered upon an active career in his profession. So marked was his success and so popular did he become that in less than two years he was elected State's attorney in a circuit embracing eight counties. To this office he was re-elected in 1852. Before his term expired he was in 1853 elected as a Whig in the Thirty-third Congress from the then newly-formed Third District of Missouri, defeating Claiborne F. Jackson, his majority being 152 in a total vote of over 13,000. In 1854 he was re-elected to Congress over Flourney by a majority of 767. Two years afterwards he was again a candidate, but the Whig party was then in its decadence, and he was beaten by James S. Green, afterwards chosen United States senator.

The record of the lives of successful men who influence and mould and in a degree control public affairs is always interesting and instructive, but it becomes more so when such lives present in combined view the elements of material success blended with the completeness of moral attribute and the attractions of unselfish public service. Such characters stand out as the proofs of human progress, the illustrations of human dignity and worth, and as the beacon-lights to guide the generations which follow.

In looking through the list of citizens of whom St. Louis may well be proud, to no one can such reflections apply with more force than to E. O. Stanard. His familiar and striking form, so often seen on the marts of business, and his name, associated so conspicuously with the material progress of St. Louis, as well as with the advancement of her moral and benevolent interests, have for many years marked him as a distinguished citizen. With such antecedents and a history such as his it is not remarkable that it should be so.

Governor Stanard comes of an ancient and honored ancestry, yet illustrating in his life the poet's thought, "'Tis only noble to be good." Past midway of the last century his family settled in the town of Newport, N. H., to which it removed from the older settlements in Connecticut. As a part of the ante-Revolutionary history, the name of his great-grandfather is found in the older records of settlement, and on the 20th of June, 1776, two weeks before the Declaration of Independence, signed to the following articles with the names of thirty-four other citizens:

"We, the subscribers, do hereby solemnly engage and promise that we will to the utmost of our power, at the risque of our lives and fortunes, with arms, oppose the hostile proceedings of the British Fleets and Armies against the United Colonies." This patriotic action was in conformity with the action of Congress, and of the New Hampshire Committee of Safety.

The grandfather of Governor Stanard, William Stanard, Jr., was born in that same eventful year of declared independence, and in later life moved to the State of Iowa. His son Obed, the father of the Governor, remained on the old homestead, married Elizabeth Ann Webster, the maternal branch dating back to 1795, and in 1836 moved also to Iowa, when the subject of this sketch was four years old. Thus, with a brief intermediate stay in Illinois on the way to the Western home, the early life of Governor Stanard was passed upon a farm and in farm labor, amid trials, privations, and hardships which only those know of who have experienced the vicissitudes of frontier settlements. From such experiences have come among the best, the truest, and most useful men of the times.

In 1852, when twenty years of age, he came to St. Louis to obtain the advantages of education, then but meagerly afforded in the frontier States, and here for four years he attended the schools, and became himself a teacher in order to defray his necessary expenses. At that time Alton was a thriving place of business, and the assumed rival of St. Louis, and thither he removed, spending a year most profitably as a clerk in a produce-store.

But his clear business perceptions saw in St. Louis the city of future progress and eminence, and thither he returned in 1857, opening a commission house, his first business venture. It was a success from the beginning, and very soon was enlarged by branches in Chicago and New Orleans. In 1868 he sold out his interest to his partners, embarking in the business of flour manufacture, in which he has achieved a great success, running large mills at St. Louis and Alton.

It was not to be expected that such talents and a business experience so eminently successful would remain in private station. In 1866 his fellow-merchants honored him with the bestowal of the presidency of their Exchange, a position only awarded to merit and experience, and he was also made vice-president of the National Board of Trade.

For fourteen years he was president of the Citizen's

Fire Insurance Company, that corporation under his administration becoming one of the most substantial and successful in the city.

In 1868 he was called into public life, being elected to the office of Lieutenant-Governor of Missouri. He filled the position with fairness, judgment, and dignity, became a master of parliamentary law, and proved himself one of the ablest presiding officers the Senate of Missouri ever had.

Thence he was called into the wider arena of national politics, being elected from St. Louis to the Forty-third Congress, where his valuable services as a legislator enlarged the measure of his national reputation. His appearance there was most opportune for Western interests. The question of cheap transportation by the river route was pressed with faithful industry and consummate ability, and it may be truly said that no voice ever raised in Congress was more potential in securing the favorable consideration by the government of the great water route, resulting directly in the establishment of the jetty system, and the liberal appropriations which after such an advocacy the government could not withhold. This line of comprehensive thought he actively followed up, being connected as presiding officer or in the executive handling of all the great conventions since held in the interest of river improvement, the very head and front, as it were, of the most vital commercial movement of the day.

Since his term in Congress, Governor Stanard has declined repeated invitations from his old friends and constituents to return to public life, preferring to devote his time to his large and constantly increasing business.

Governor Stanard inherits from his New England ancestry not only a stalwart frame, but a nature eminently regardful of moral obligations and well-defined religious convictions. He has been from his youth a consistent member of the Methodist Episcopal Church, and was selected by the Missouri Conference as a delegate to the great ecumenical gathering in London in 1881, a trust which he discharged most faithfully and acceptably.

Thus if the question is asked what he is and what he has done, it finds a ready response in the exhibition of a record to which any one can point. As a patriot, he stood by his country bravely and loyally in its dark hours of trial, sharing its disasters and rejoicing in its triumphs, and when the war was over contributed his part towards the new progress which peace and restored relations have brought.

As a public speaker, he has few equals. His large store of knowledge, his experience in public assemblages, his clear judgment and powers of reasoning, combined with a splendid physique, a voice of peculiar range and power, and a temperament full of ardor and enthusiasm in all good directions, make his appearance in public always a source of pleasure and profitable instruction. He is a true specimen of New England birth grafted on the vigorous stock of Western strength,—one of those rounded and complete characters, combining with capabilities of business success the high attributes of truth and humanity, and most endeared to those who know him best in the social and domestic circles. He is the firm and steadfast friend of the producing, manufacturing, and industrial classes, with whom his interests are closely linked, and brings to affairs, whether public or private, the worth of correct practical judgment, the grasp of statesmanlike thought, and an earnest sympathy for what is just and true.

Amid the decay of virtue and integrity in high stations, the country under weak and inefficient guidance, "to hastening ills a prey," it would be a day to be marked in white in the national calendar if men like Governor Stanard could be induced to assume the duties and responsibilities of civic career. In the prime of a vigorous manhood, with the backing of a large and well-earned fortune, and comprehensive views on all great questions of national polity, he is needed in the gathering emergencies of our national progress.

At the registration of voters for the election of 1868, Charles P. Chouteau, one of the most esteemed and highly respected citizens of St. Louis, was rejected as a qualified voter. During the war, said the *Republican*, he had faithfully supported the government of the United States, and "when Gen. Allen, of the quartermaster's department, had not a dollar to pay the women who had been engaged in making clothing for the Federal troops, he applied to Charles P. Chouteau for aid in the emergency, asking for twenty thousand dollars. Without one moment's hesitation the amount was advanced, at a time when scarcely a capitalist in St. Louis felt ready to advance money because of the uncertainty of the time when the government would refund. At the same time, when the credit of the government was low here, Charles P. Chouteau periled the credit of his own house to the extent of three quarters of a million of dollars in purchasing clothing, boots and shoes, and other supplies required by the War Department, charging for the same not one cent of profit nor one cent of commissions. When the commission ordered by the government, composed of Holt, Davis, and Campbell, to examine and audit accounts came here,

bills were presented exceeding in the aggregate millions of dollars, and while the accounts of some were cut down by the commission scores of thousands, the bills of P. Chouteau & Co. passed without a discount. It was noticed at the time as a surprising circumstance that this patriotic house presented no commission or interest claim for the heavy burdens they had assumed, offering as their vouchers simply the bills of the houses from which they had made their purchases. One of the Minnesota regiments stationed up the Missouri River, without pay far many months, received from the house of Charles P. Chouteau such supplies as the privates of that regiment required, and in gratitude for his liberality they, at the close of the war, sent to him a testimonial, which he cherished among his valuable records. The government placed at his disposal soldiers and arms for the protection of his warehouses and boats, in which were military stores. And yet this honored citizen and patriot, whose wealth has been used for the benefit of the government and for the prosperity of St. Louis, was by a board of registration officers refused the privilege of being registered as a qualified voter."

On the 15th of January, 1867, Charles D. Drake, Republican, was elected to the United States Senate from the 4th of March ensuing, the vote being: Senate, Drake, 23; F. P. Blair, 6; N. Holmes, 3. House, Charles D. Drake, 86; F. P. Blair, 33; Ben. Loan, 3; Henry T. Blow, 3; H. M. Voorhees, 1; John S. Phelps, 1.[1]

At this session of the Legislature it was decided to submit a constitutional amendment to the people to strike the word "white" from the second article, thus establishing negro suffrage in Missouri. At the election in the fall of 1868 the proposed amendment was defeated, the vote being: Against striking out, 74,053; for striking out, 55,236; majority against, 18,817.

At the session of the Legislature which began on the 7th of January, 1868, a new registry law more stringent than the old one was enacted. Under it the Governor was authorized to appoint a superintendent of registration in every senatorial district, with the view of providing for a still more rigorous enforcement of the law of 1865, which disfranchised many citizens who had sympathized with the Southern cause. As that law had been pronounced unconstitutional by the United States Supreme Court, this action of the Legislature created intense dissatisfaction throughout the State. A large Republican majority, however, was returned to the Legislature of 1869, which, on the 19th of January of that year, elected Carl Schurz United States senator, the vote being: Schurz, Republican, 114; John S. Phelps, Democrat, 44. But dissensions now arose in the Republican ranks, owing to the opposition developed within the party by the very measures which had been adopted with the view of insuring its continued ascendency. Under the leadership of Carl Schurz, B. Gratz Brown, and other prominent men, a new "wing," known as Liberal Republicans, in contradistinction to the more radical element, was organized for the purpose of securing the repeal of the ironclad oath of 1865 and the registration amendment of 1868. In this crisis the Democrats adopted the "passive" policy,—that is, the party organization as such took no part in the canvass, but the members individually allied themselves with the Liberal Republicans. On the 31st of August, 1870, the Republican State Convention met at Jefferson City, and, as chairman of the committee on resolutions, Carl Schurz made a majority report which proved obnoxious to the anti-Liberal members. It strongly recommended the removal of all political disabilities and "the extension of equal political rights and privileges to all classes of citizens." The minority report of the committee, on the other hand, declared in favor of "re-franchising those justly disfranchised for participation in the late Rebellion as soon as it can be done with safety to the State," and recommended that "the Legislature submit to the whole people of the State the question whether such time has now arrived." The report of the minority was adopted by a vote of 349 ayes and 342 noes, and immediately after this action had been taken about two hundred and fifty delegates of those who had voted for the majority report withdrew, headed by Mr. Schurz, organized a separate convention, and nominated a full State ticket with B. Gratz Brown for Governor. The regular convention nominated Joseph W. McClurg. At the election in the following November the vote was: B. Gratz Brown, Liberal, 104,374; Joseph W. McClurg, Republican, 63,336.

[1] Charles D. Drake was born in Cincinnati, Ohio, on the 11th of April, 1811, and was the son of Dr. Daniel Drake. He received an academical education, and entered the navy as a midshipman in 1827. In 1830 he left the navy, studied law, and was admitted to the bar in 1833. In 1834 he removed to St. Louis, where he engaged in the practice of his profession, and in 1859 was elected to the Legislature. During the early portion of the civil war he took an active and conspicuous part against the secession movement; in 1863 was elected a delegate to the Missouri State Convention, and in 1864 was chosen presidential elector on the Republican ticket. In 1865 he served as a member of the Missouri Constitutional Convention of that year, of which he was vice-president. In 1867 he was elected United States senator, and in 1871 was appointed chief justice of the United States Court of Claims. He is the author of a "Treatise on the Law of Suits by Attachment in the United States," and of a "Life of Daniel Drake."

Brown's majority over McClurg, 41,038. At the same election a new Legislature was chosen, which was found to be strongly "Liberal," and which at its session in the ensuing winter elected as the successor in the United States Senate of the Hon. Charles D. Drake, who had been appointed chief justice of the United States Court of Claims, Hon. Francis P. Blair, Jr.

A number of amendments to the Constitution were submitted to the people at the same time, among which were those abolishing the oaths of loyalty for jurors and voters, and "certain disqualifications to hold office on account of race, color, or previous condition of servitude, and on account of former acts of disloyalty." These amendments were adopted by majorities ranging from over one hundred and five thousand to over one hundred and twenty-two thousand votes. The success of this movement prepared the way for the national Liberal Republican "bolt" of 1872.

B. Gratz Brown, who was thus elected Governor of Missouri on the re-franchisement platform, was born at Lexington, Ky., May 28, 1826. His grandfather, John, son of Rev. J. Brown, was born in Staunton, Va., in 1757, and died in Frankfort, Ky., in 1837, widely known and everywhere respected. He had been a member of the Congress of 1787–88 from Virginia), and had served three times as senator from Kentucky in the national councils. His grandmother, Margaretta, daughter of Rev. John Mason and Catharine Van Wyck, was born in New York City in 1772, and died in Frankfort, Ky., in 1838. She organized the first Sabbath-school in the Mississippi valley.

Mason Brown, father of B. Gratz Brown, was a prominent judge. His son, B. Gratz, graduated at Transylvania University in 1845, and at Yale College in 1847, studied law at Louisville, removed to Missouri in 1849, and settled at St. Louis. Here he practiced law with great success, and in 1852 was elected to the Legislature, serving therein by successive re-elections until 1858. Mr. Brown entered public life as a Democrat and a follower of Benton, became identified at once with the large German population of St. Louis, and was put forward as their special representative among the public men of American birth. Though a Southerner by birth and extensive family associations, he proclaimed from the first his Free-Soil sympathies. To him belongs the distinction of having made the first speech in behalf of emancipation in a Southern Legislature. That speech, delivered in the Missouri House of Representatives, at the almost certain sacrifice of all hope of political preferment, was the rallying-cry of the little band of emancipationists who finally organized the Republican party of Missouri. The Germans, who had settled in large numbers in St. Louis, rallied to the support of Gratz Brown, and returned him to the Legislature after a bitter contest. About this time he became involved in a duel with Hon. Thomas C. Reynolds, afterwards Lieutenant-Governor of Missouri, and received a wound in the knee from the effects of which he suffered for several years.

From this time on his efforts were unceasing in the anti-slavery cause. He assisted in founding the *St. Louis Democrat*, as the organ of the Free-Soil party, and, as the fearless and brilliant editor of the only anti-slavery journal in a slave State, soon won a national reputation. In all these efforts he faced the most determined opposition. Both the great parties denounced and proscribed him, but opposition, threats, and proscription only intensified his devotion to the great principles of human freedom. Into the Kansas war he entered with all the power and fire of his nature. His editorials in the *Democrat*, incisive and eloquent, excited the whole country. He early foresaw that the Kansas trouble would extend to a broader field, and with his clear perception he warned the people of the magnitude of the coming struggle. In 1860 he called the first Republican Convention held in a slave State, and, in conjunction with the veteran Muench and Emil Preetorius, the latter afterwards associate editor with Carl Schurz in the *Westliche Post* and now editor of that paper, organized the Republican party of Missouri. At the outbreak of the war he promptly raised a regiment, took decided ground for immediate emancipation, and at once became the acknowledged leader of the advanced element of the Republican party in opposition to the conservative element, and was put forward as their candidate for United States senator. The contest was bitter and protracted, but the Germans throughout the State rallied to the support of Brown, and after a struggle in the Legislature of 1862–63 for several months he was elected. His course in the Senate was in harmony with his previous career. He was one of the very first to recognize impartial suffrage as the necessary corollary to emancipation, and protested against any form of reconstruction which failed to recognize this principle. His health failing, and large private interests demanding his attention, he declined, in 1866, a re-election, and until 1870, though an interested observer, did not actively participate in any of the political movements. The Constitution of the State, as has been indicated, was intensely proscriptive, and having opposed it in its inception, his views, whenever occasion called for

their expression, were in opposition to a continuance of a policy which it legalized. The oppressions under it finally became unendurable, when the Liberals, under the head of Brown and Schurz, with the same German element which had contributed such valuable service in the foundation of the Republican party, now demanded that the party recognize and declare the new order of things and remove all political proscription from the law. The result has been stated. Overpowered in the convention, the Liberals appealed to the people, with Gratz Brown as their standard-bearer. Seldom has a campaign been entered upon under more unfavorable auspices. The whole power of the State and national administration was invoked to crush the Liberal movement. But the Federal interference only strengthened the cause, and Governor Brown was elected by the unprecedented majority of forty-one thousand, receiving the support of about one-third of the Republicans of the State, including nearly all the Germans and all of the old leaders in the cause of freedom.

In 1872, Mr. Brown was nominated as the candidate for Vice-President on the Liberal Republican ticket with Horace Greeley, and Mr. Greeley having died he received eighteen electoral votes for President.

At the congressional election of 1870, Wells, Finkelnburg, and McCormick were re-elected. The other members elected were H. E. Havens, S. S. Burdett, A. Comingo, I. C. Parker, James G. Blair, and Andrew King.

Under the census of 1870 the State became entitled in 1872 under the congressional apportionment bill to two additional members of Congress, and thereby to two additional Presidential electors. The Legislature having adjourned before this fact became known, and Governor Brown having grave doubts as to his authority under existing laws to divide the State into electoral districts for the next Presidential election, called a special session of the Legislature for this purpose by proclamation on June 19, 1872. The authority to district the State into electoral districts was discussed. The conclusion having been reached that the most feasible way to get at the matter under existing laws was to divide the State into congressional districts, a resolution was passed on the fifth day looking to an adjournment, and for the reconvening of the Legislature to re-district the State. On the 24th the Legislature adjourned, and was immediately reconvened by proclamation of the Governor for that purpose. On the 27th it adjourned after having divided the State into congressional districts, as follows: the First, Second, and Third, composed of the county of St. Louis; the Fourth, of Dunklin, Pemiscot, New Madrid, Mississippi, Stoddard, Butler, Ripley, Scott, Wayne, Reynolds, Cape Girardeau, Bollinger, Madison, Iron, Perry, Ste. Genevieve, St. François, Washington, Carter, and Oregon; Fifth, Jefferson, Franklin, Gasconade, Osage, Maries, Crawford, Phelps, Pulaski, Wright, Douglas, Ozark, Howell, Texas, Dent, Shannon, and Laclede; Sixth, Jasper, Barton, Newton, McDonald, Cedar, Dade, Lawrence, Barry, Stone, Taney, Christian, Webster, Greene, Polk, and Vernon; Seventh, Johnson, Pettis, Cooper, Moniteau, Morgan, Cole, Miller, Camden, Hickory, Benton, Henry, Dallas, and St. Clair; Eighth, Platte, Clay, Jackson, Cass, and Bates; Ninth, Atchison, Andrew, Nodaway, Holt, Buchanan, Clinton, DeKalb, Gentry, and Worth; Tenth, Harrison, Daviess, Caldwell, Livingston, Grundy, Mercer, Putnam, Sullivan, Linn, and Chariton; Eleventh, Randolph, Howard, Saline, Lafayette, Ray, Carroll, and Boone; Twelfth, Schuyler, Adair, Macon, Shelby, Knox, Scotland, Clarke, Lewis, and Marion; Thirteenth, Monroe, Callaway, Audrain, Pike, Lincoln, Montgomery, Warren, St. Charles, and Ralls. At the election following E. O. Stanard, Erastus Wells, W. H. Stone, Robert A. Hatcher, Richard P. Bland, H. E. Havens, T. T. Crittenden, A. Comingo, Isaac C. Parker, Ira B. Hyde, John B. Clark, Jr., John M. Glover, and A. H. Buckner were elected to Congress, and the State carried for Greeley and Brown. The vote cast by the electors for President was six for Thomas A. Hendricks, eight for B. G. Brown, one for Jeff. Davis; for Vice-President, six for Brown, five for Julian, three for Palmer, and one for Groesbeck. Mr. Greeley died before the electoral college met. The popular vote of the State was 151,434 for Greeley, 119,096 for Grant, and 2439 for Charles O'Conor. Silas Woodson, Democrat, received for Governor 156,714 votes, to 122,272 cast for John B. Henderson, Republican.

Among those who took a leading part in the National Liberal Republican campaign in Missouri in 1872 was Charles P. Johnson, now an eminent member of the St. Louis bar. Mr. Johnson was born in Lebanon, St. Clair Co., Ill., Jan. 18, 1836. His father, Henry Johnson, was a native of Pennsylvania, and his mother, whose maiden name was Elvira Foulke, was born in Kaskaskia, Ill., and saw much of frontier life. Her ancestors were among the early pioneers of Illinois, and many of them filled high and honorable positions. Young Johnson received all the advantages offered in the public schools of the neighboring town of Belleville, but to the culture of his intelligent mother is due to a very great extent the excellences of his mental as well as moral character.

Second, and Third, composed of the county of [illegible] excellencies of his mental as well as moral [illegible]

Chas. P. Johnson

Mrs. Johnson is still living, and adds to the charms of her son's family circle.

The best part of Mr. Johnson's education (in his own estimation) was derived at "the case;" and having learned the printer's trade, he published in his eighteenth year a paper at Sparta, Ill. He disposed of this enterprise in 1854, and for one year attended McEndree College at Lebanon, Ill., where he pursued a course of study suited to his probable future profession. In 1855 he removed to St. Louis, and studied law, and in 1857 was admitted to the bar. Party spirit ran high at this period in Missouri, and in St. Louis the political contests were exceedingly bitter. The teachings of Mr. Benton in opposition to Calhounism had culminated in the formation of a definite anti-slavery party, which, however, was almost entirely confined to St. Louis, and which had to meet the combined power and influence of the pro-slavery party in the entire State. Mr. Johnson's political bias threw him into the ranks of the Free-Soil party, of which he became a recognized leader, in company with Francis P. Blair and other intrepid men. Blair recognized in the eloquent young lawyer a promising adherent to the Free-Soil cause. In 1859, Mr. Johnson was elected to the office of city attorney. In 1860 he advocated the election of Mr. Lincoln to the Presidency, and in 1861, when the war broke out, promptly espoused the cause of the Union, and by his eloquence and influence greatly strengthened the hands of the anti-secession leaders in St. Louis. He enlisted under the first call for troops, but was elected lieutenant, and served for three months in the Third Missouri Regiment. He then assisted in raising the Eighth Missouri Regiment, and personally tendered the services of that organization to President Lincoln. While bearer of dispatches from Gen. Lyon to the President, the majorship of the regiment was tendered him, but he declined it because of his delicate health and lack of military knowledge.

In 1862 a division occurred in the ranks of the Republican party in St. Louis, one wing favoring prompt and vigorous measures for the coercion of the Southern States and the emancipation of the slaves, and the other a more moderate policy. Mr. Johnson placed himself firmly on the radical platform, and soon became a recognized leader in the advanced emancipation ranks. He was nominated for Congress against Francis P. Blair, but declined in favor of a more experienced standard-bearer. He, however, accepted a candidacy on the legislative ticket, and was elected. In the Legislature he was assigned to what at that time was the most important position in the body, the chairmanship of the Committee on Emancipation. In this capacity his zeal, energy, and ability as a debater gave him the leadership of the House. Failing to secure an acceptance of Mr. Lincoln's proposition to pay the loyal slave-owners for their property, he took the advanced stand for immediate emancipation without compensation, and presented the bill for the calling of a State Convention, which became a law at the adjourned session next year.

In the fall of 1864, Mr. Johnson was again nominated for Congress, but there was a split in the party on the war question, and he was defeated.

In January, 1865, the State Convention assembled at St. Louis. Its first act was the passage of an emancipation ordinance. It then framed and submitted to the people the celebrated "Drake Constitution," which was so harsh and intolerant that Mr. Johnson was constrained to oppose it. He canvassed the State on that issue, and ran for the Legislature again from St. Louis County at large, and was elected by a large majority. The Constitution was ratified by a very small majority, but was subsequently shorn of its despotic features on the grounds so ably urged by Mr. Johnson in this canvass.

Mr. Johnson served one winter in the Legislature, and in 1866 accepted the appointment of State's attorney for the city and county of St. Louis, and for six years filled this position in a manner that gained for him universal approbation, and laid the foundation for his subsequent brilliant career at the bar.

During the war Mr. Johnson favored immediate emancipation, because he recognized in slavery the only real danger to the perpetuity of the Union; but when the war was over and its cause forever removed, he offered his hand to every man who was disposed to live in peace with the government. Consequently, when (in 1870) the Liberal Republican movement was inaugurated in Missouri, he supported it with his usual zeal and determination, and strenuously advocated the re-enfranchisement of those who, on account of their adhesion to the South, had lost their citizenship. In the same year he was again nominated to Congress on the Liberal Republican ticket, but there being three tickets in the field he was defeated. In 1872 he earnestly favored the National Liberal Republican movement which culminated in the nomination of Greeley and Brown, and in the selection of the joint Democratic and Liberal Republican State ticket of that year was presented as a candidate for Lieutenant-Governor. He was elected, and during the two years he served became noted for his marked ability as a parliamentarian and presiding officer, being one of the few presidents from whose decision no appeal was ever taken.

It was during this session that Governor Johnson made a reformatory fight which attracted wide attention. An unsuspecting Legislature had given St. Louis a charter in which a power was granted to regulate houses of ill-repute. Under this grant was passed the celebrated social evil ordinance, which was simply a copy of the European system of licensing prostitution. Its establishment and the perceptible evil consequences flowing from it soon aroused the determined antagonism of the moral element of the community, and in the Legislature Governor Johnson successfully led the movement for the repeal of the obnoxious measure. He then retired from office, and resumed the practice of his profession until another moral question enlisted his services. The issue arose from the prevalence of public gambling in St. Louis, and the dangerous fact that the gamblers had become a ruling element in the politics of the city. Governor Johnson determined to lend the weight of his abilities and example to the suppression of this evil, and for that purpose became a member of the Legislature in 1880, and introduced and secured the passage of a bill making gambling a felony. The enforcement of the law was strenuously opposed by those whose interests it assailed, but after running the gauntlet of the courts it was put into operation, and accomplished all that Mr. Johnson had expected of it. No one familiar with the extent of the evil in question will gainsay that he thus effected one of the greatest achievements ever undertaken in this country by the legislator or social reformer.

There now remains the agreeable task of speaking of Mr. Johnson as a lawyer. He has made a specialty of criminal practice, and stands unquestionably at the head of that branch of the profession in Missouri, he having been employed on one side or the other in every criminal case of importance that has engaged the attention of the St. Louis courts for the last ten years, besides having been frequently called to professional engagements in other parts of the State. His reputation as an advocate is not confined to Missouri, but has extended throughout the great West, and in no case of importance has he ever been vanquished.

But his prominence as the head of the criminal bar must not be understood to derogate from his standing in other professional capacities, for years of study and experience have given him a mastery over the principles and authorities on which American jurisprudence rests. His mental attributes, moreover, specially qualify him to be a lawyer of eminence. His memory is remarkable; his judgment strong, sagacious, and vigilant; his cast of thought logical, analytic, and incisive; and his oratory calm, clear, and singularly persuasive. Having in his public career shown himself to be a man of broad and liberal views, and progressive and reformatory in his intellectual development, it may be inferred that he not only keeps abreast with his profession in the decisions, but adds thereto extended and continued culture in every department of literature and philosophy. Psychological studies have closely engaged his attention, and his familiarity with this science gives him remarkable power over a jury in cases involving the causation which lies behind the passions or destroys the mental equilibrium. He has written several valuable papers on this subject.

Governor Johnson, who has been a zealous supporter of every measure looking to the development and advancement of his State, takes great interest in the improvement of its railroad system, and was one of the principal promoters of the great immigration convention which met in St. Louis in May, 1880, and delivered the opening address before that body on the "Valley of the Mississippi."

He is yet young, having barely reached his prime, and though not robust, is active, vigorous, and healthy. He is of engaging manners, yet appears at his best in the family circle. He is fond of the society of his friends, and entertains them with delight. Social, genial, studious, cultivated, temperate, and honest, it may be said that he combines in himself as much of promise as any man of his age in the West, whether in his profession or in the broader arena of reformatory politics.

In 1874, Charles H. Hardin, Democrat, received for Governor 149,566 votes, to 112,104 cast for William Gentres, "people's" candidate. Messrs. Wells, Stone, Hatcher, Bland, Clark, Glover, and Buckner were elected to Congress, and Charles H. Morgan, John F. Philips, Benjamin J. Franklin, David Rea, and R. A. DeBolt elected as new members.

At the session of the Legislature in 1873 Lewis V. Bogy was elected United States senator, and continued as such until his death in 1877.[1]

In 1876 the members of Congress elected were Anthony Ittner, Nathan Cole, R. G. Frost, Robert A. Hatcher, R. P. Bland, Charles H. Morgan, T. T. Crittenden, B. J. Franklin, David Rea, Henry M. Pollard, John B. Clark, Jr., John M. Glover, and A. H. Buckner.

Although the State this year was carried by the Democrats by a majority of fifty-four thousand three

[1] A full sketch of Senator Bogy's life will be found in the chapter on the bench and bar of St. Louis.

hundred and eighty-nine over all, and the congressional districts by a still larger majority, four Republican congressmen secured seats.

The Presidential vote was: For Samuel J. Tilden, 202,687; for R. B. Hayes, 144,398; for Peter Cooper, 3498. For Governor, John S. Phelps, Democrat, received 199,580; G. A. Finkelnburg, Republican, 147,694; J. T. Alexander, Greenback, 2962.

In 1877, the Legislature being largely Democratic, and concluding to redistrict the State, passed an act dividing the State into districts as follows:

The First District, composed of the First, Second, Third, and Thirteenth Wards of the city of St. Louis, as they were constituted on the 1st day of July, 1876, Carondelet township of the county of St. Louis, and the counties of Madison, Jefferson, Washington, St. François, and Ste. Genevieve.

Second, the Fourth, Fifth, Sixth, Seventh, and Eighth Wards of the city of St. Louis, as they were constituted on the 1st day of July, 1876, Central, Bonhomme, and Maramec townships, and all that part of St. Louis township lying south of Page Avenue of the county of St. Louis.

Third, the Ninth, Tenth, Eleventh, and Twelfth Wards of the city of St. Louis, as they were constituted on the 1st day of July, 1876, St. Ferdinand township, and all that part of St. Louis township lying north of Page Avenue of the county of St. Louis.

Fourth, the counties of Iron, Bollinger, Cape Girardeau, Scott, Mississippi, New Madrid, Pemiscot, Dunklin, Stoddard, Butler, Ripley, Oregon, Carter, Reynolds, Wayne, and Perry.

Fifth, Phelps, Franklin, Crawford, Dent, Shannon, Howell, Ozark, Taney, Christian, Douglas, Stone, Wright, Texas, Laclede, Pulaski, and Maries.

Sixth, Greene, Berry, McDonald, Newton, Jasper, Barton, Vernon, St. Clair, Bates, Cedar, Dade, Lawrence, Henry, and Webster.

Seventh, Cole, Miller, Camden, Hickory, Polk, Dallas, Lafayette, Johnson, Pettis, Moniteau, Morgan, Benton, and Cooper.

Eighth, Cass, Jackson, Clay, and Platte.

Ninth, Buchanan, Andrew, Holt, Atchison, Nodaway, Worth, Gentry, De Kalb, Clinton, Caldwell, and Ray.

Tenth, Randolph, Chariton, Linn, Sullivan, Mercer, Grundy, Livingston, Daviess, and Harrison.

Eleventh, Callaway, Boone, Howard, Saline, Carroll, Osage, and Gasconade.

Twelfth, Adair, Clarke, Macon, Knox, Lewis, Marion, Shelby, Scotland, Schuyler, and Putnam.

Thirteenth, Audrain, Monroe, Montgomery, Pike, Lincoln, St. Charles, Ralls, and Warren.

In September, 1877, Col. David H. Armstrong was appointed by Governor Phelps United States senator to fill the vacancy caused by the death of Col. Bogy.

David Hartley Armstrong was born in Nova Scotia, Oct. 21, 1812. In 1830 he entered the Wesleyan Seminary at Readfield, Kennebec Co., Me., and received an academic education preparatory to commencing a collegiate career. He sustained himself at school by his own exertions, and intended following the profession of civil engineer, but employment not presenting itself, he embraced an opportunity to teach school in New Bedford, Mass., and was so engaged from 1834 to 1837. In the latter year he drifted on the tidal wave of emigration to the West, and arrived at St. Louis September 16th. An opening not offering immediately, he taught in the Preparatory Department of McKendree College, at Lebanon, Ill., whence he returned to St. Louis to assume the position of principal of the public schools of the city (the first in the State of Missouri) on the first Monday of April, 1838. For four years he was at the head of "School No. 1" (now the "Laclede Primary"), and in 1842 was transferred to "Benton School No. 2," where he taught for five years.

Col. Armstrong looks back upon no portion of his career with more satisfaction than that during which he was employed as a public-school teacher, and he regards it as a high honor to have been associated so prominently with the school system of the city at its inception. He possessed many qualifications of the good teacher, and his counsels were freely drawn upon to aid in the extension of the system as required by the growing needs of the city. As a teacher he was very successful, and among his pupils were many who afterwards became conspicuous, and are now numbered among the representative citizens of St. Louis. These all cherish the highest regard and the warmest affection for their faithful instructor.

Mr. Armstrong resigned the charge of the public schools of the city June 8, 1847, to accept the office of city comptroller, which position he retained three years. In 1853 he was appointed by Governor Sterling Price his aid-de-camp on his military staff, with the rank of colonel. In April, 1854, he was appointed postmaster of St. Louis by President Pierce, and held that office until the spring of 1858. In 1873 he was appointed police commissioner for the city of St. Louis by Governor Woodson, and in 1877 was reappointed to the same office by Governor Phelps. In 1876 he was a member of the board of freeholders, by which the present city charter was framed. As we have before stated, on the death of the Hon. Lewis V. Bogy, in 1877, Col. Armstrong was appointed United States senator, and served as such until the meeting of the Legislature in 1879. All these offices were efficiently filled by him, and with the modest dignity which is his distinguishing characteristic.

Since early manhood Col. Armstrong has taken a deep interest in political affairs, and was always an active worker in the ranks of the Democratic party. He has been content to labor, leaving to others the

fruits of party success, and has never asked for office. For many years he was a member of the Democratic State Central Committee, and for much of the period was chairman of that body and a leader in its deliberations. In this capacity he directed the fusion of Democrats and Liberal Republicans in the memorable campaign of 1870, which resulted in the election of the first Democratic State administration since the war, but which had consequences far more important than the mere victory of a political party, for it led to the revision of the notorious "Drake Constitution" and the reinstatement of the people of Missouri in the full enjoyment of their political rights.

Amid all the changes of a somewhat checkered career Col. Armstrong has maintained a reputation for inviolable integrity, whether his private life or public employments are considered. Of a frank, positive, and somewhat aggressive nature, his is a marked personality, and these characteristics have no doubt secured him his full share of enemies, but they have also won a proportionate number of friends, and no one in St. Louis enjoys the deeper or more deserving regard of a larger circle than does Col. David H. Armstrong.

In 1878 the congressmen elected were Martin L. Clardy, E. Wells, R. G. Frost, L. H. Davis, R. P. Bland, James E. Waddill, Alfred M. Lay, S. L. Sawyer, Nicholas Ford, G. F. Rothwell, John B. Clark, Jr., W. H. Hatch, and A. H. Buckner, all Democrats except Ford, Greenback-Republican, elected by a small majority in a largely Democratic district.

In 1880, M. L. Clardy, Democrat, and Thomas C. Fletcher, Republican, were the candidates for Congress in the First District. Clardy received 11,681 votes; Fletcher, 10,982; scattering, 49. In the Second, Thomas Allen, Democrat, and M. A. Rosenblatt, Republican. Allen received 12,485 votes; Rosenblatt, 10,022. In the Third, R. G. Frost, Democrat, R. Sessinghaus, Republican, and D. O'Connell, Greenback-Democrat. Frost received 9487 votes, Sessinghaus 9290, and O'Connell 256. In the Fourth, L. H. Davis, Democrat, and —— Simpson, Greenback-Democrat. Davis received 19,949 votes, and Simpson 1251. In the Fifth, R. P. Bland, Democrat, and R. B. Palmer, Greenback-Democrat. Bland received 12,977 votes, and Palmer 10,799. In the Sixth, John B. Waddill, Democrat, and I. S. Hazeltine, Greenback-Republican. Waddill received 22,680 votes; Hazeltine, 22,787; scattering, 54. In the Seventh, John F. Philips, Democrat, and T. M. Rice, Greenback-Republican. Philips received 19,146 votes, and Rice 19,744. In the Eighth, D. C. Allen, Democrat; J. T. Crisp, Democrat; R. T. Van Horn, Republican, and —— Clark, Greenback-Democrat. Allen received 7656 votes; Crisp, 7459; Van Horn, 8050; Clark, 1084. In the Ninth, James Craig, Democrat, and Nicholas Ford, Greenback-Republican. Craig received 20,770 votes; Ford, 20,770; scattering, 14. On recount under Supreme Court mandamus two votes were taken from Craig, and thereby Ford was declared elected. In the Tenth, Charles H. Mansur, Democrat, and Joseph H. Barrows, Greenback-Republican. Mansur received 17,219 votes; Burrows, 17,284; scattering, 6. In the Eleventh, John B. Clark, Jr., Democrat, and Herberling, Greenback-Democrat. Clark received 17,921 votes, and Herberling 7370. In the Twelfth, Samuel A. Hatch, Democrat, and J. M. London, Greenback-Republican. Hatch received 17,403 votes, and London 15,236. In the Thirteenth, A. H. Buckner, Democrat, —— Haley, Greenback-Democrat, and —— Thurmond, Independent Democrat. Buckner received 17,233 votes, Haley 7394, and Thurmond 263. In 1880 the total vote for members of Congress was 376,703 and for Governor and State officers, 397,644.

It will be seen from the congressional returns in 1880, that the eminent Hon. Thomas Allen was elected from St. Louis district. Mr. Allen had long been identified with the best interests of Missouri, and no man had a higher claim to the distinguished honor which was conferred upon him.

Thomas Allen was born at Pittsfield, Mass., Aug. 29, 1813, and was a member of a family that had long been prominent in that State. His grandfather was the first minister in Pittsfield, officiating as such from 1764 to 1811, and was also a zealous Revolutionary patriot, taking part with his musket in the battle of Bennington, and serving as chaplain during several campaigns. He was married to Elizabeth Lee, through whom his descendants claim as their ancestors William Bradford, the second Governor of the Plymouth colony, and one of the most distinguished of the Pilgrim fathers. This interesting man, after whom the subject of this sketch was named, had a large family, all persons of exceptional ability. One of his sons, the Rev. William Allen, succeeded him in the Pittsfield pastorate, and subsequently was elected president of Bowdoin College.

Jonathan Allen, another son, and the father of Thomas Allen, was for several terms a member of the Legislature, serving in both branches. He was a prominent agriculturist, and was one of the first to import fine-wool sheep into Massachusetts. At the time of his death he was postmaster of Pittsfield. He was of a fine social disposition, kind and benevolent, of good ability, public-spirited and enterprising

Thomas Allen was the third of a family of ten children. His mother's maiden name was Eunice Williams Larned, and she was the daughter of Darius Larned, of Pittsfield. Mr. Allen received his early education at the village academy of Pittsfield, assisted on his father's farm, and later attended the Berkshire gymnasium at the same place, being prepared for college under the guidance of Professor Chester Dewey, a distinguished scholar and naturalist. In 1829 he entered Union College, then conducted by the venerable President Nott. His college career was creditable, but not remarkable. In 1832 he graduated, and began the study of law at Albany; but the cholera interrupted that occupation, and compelled him to leave the place. Family misfortunes and the loss of money prevented his returning, but his New England blood, education, character, and indomitable will prevented his giving way to despair, and with only twenty-five dollars (his entire capital) he set out for New York, arriving there in October, 1832, young, poor, and friendless. In answer to an advertisement he secured a position in the office of Cambreling & Hatch, on Wall Street, where, however, at first he received no money for his services, but gave his clerical labor for the privilege of reading the books in the office and receiving such instruction as he might pick up. His poverty compelled him to be very industrious. Ultimately he was regularly installed as clerk, but his salary was only three hundred dollars per year. He remained in this office for three years, spending his leisure hours in hard study, and earning a small income by copying for other lawyers. During this period he began to write for the newspapers, his taste inclining to criticisms upon current events, and in 1834 became editor of the *Family Magazine*, a position he held for eighteen months, attending to its duties in the spare moments from his law practice. The income thus derived, though modest, contributed materially to his support, and the magazine prospered under his management.

Mr. Allen was next employed by a prominent law-publishing house to compile a digest of the decisions of the New York courts, which became a standard work and was several times republished. In 1835 he was admitted to the bar, and during the same year he was made a Master of Arts by his *Alma Mater*, and was also elected an honorary member of the Phi Beta Kappa Society of New York, an honor that was bestowed on few persons.

In 1836 he entered the political arena and made several speeches for Martin Van Buren. In that year also he accepted an invitation from an uncle (Gen. Ripley) to remove to Louisiana, and the project, although not carried out, greatly influenced his future course. While in Illinois, in 1837, looking after some property interests of Gen. Ripley, he heard of the suspension of specie payments, and was invited by certain eminent friends to return to Washington and establish a new journal. He did so, and in August, 1837, the *Madisonian* appeared. It took ground against the sub-treasury scheme, and a few weeks later, when President Van Buren's message to Congress favored the idea, Mr. Allen was not daunted at the unexpected opposition of the Executive, but allowed his name to go in as candidate for public printer, and after a three days' contest was successful. He continued in opposition to the President, and in 1840, deeming a separate anti-Van-Buren organization unnecessary, he supported Gen. Harrison for the Presidency, as the representative of true Democratic-Republican principles. During the campaign his office was burned,—the work, presumably, of an incendiary,—but was re-established, and the *Madisonian* attained a very large circulation for those days. Mr. Allen took an active part in the Presidential campaign of 1840, and was warmly thanked by Gen. Harrison when he arrived at Washington. He was consulted by him on his selections for cabinet officers, and when Gen. Harrison expired Mr. Allen was among the number that stood at his bedside.

In the spring of 1842, Mr. Allen removed to St. Louis, and on July 12th following was married to Miss Ann C. Russell, the daughter of William Russell, of that city. Upon arriving here he opened a law-office, but did not continue the practice of his profession. His attention was at once turned to public interests, and through his instrumentality the St. Louis Horticultural Society was organized and established, and he was made its president.

In 1848 his voice began to be heard in favor of internal improvements in Missouri and the neighboring States, his first address being in behalf of the St. Louis and Cincinnati Railroad.

In 1849 a large meeting of citizens was held to take the necessary action towards building a railroad to the Pacific coast, and resolutions which he prepared in favor of this national central highway were not only unanimously passed by the meeting but approved by the Legislature. In October, 1849, he addressed a national convention held in St. Louis to consider the enterprise, and was requested to prepare an address to the people of the United States and a memorial to Congress. At a subsequent meeting he read an address that was so convincing that one hundred and fifty-four thousand dollars of the stock was taken immediately. In 1851, Mr. Allen

having been elected the first president of the company, the work was put under contract. During the same year he was elected State senator for four years, and as chairman of the Committee on Internal Improvements succeeded in securing a loan of the State credit for two millions of dollars to aid the railroad. He also proposed a plan of State aid to several railroad systems, but it was not adopted by the Legislature until some years afterwards, when it was substantially put into operation.

In 1854, Mr. Allen resigned the presidency and directorship of the Pacific Railroad, thirty-eight miles having been finished and one hundred miles more being under contract, and in the same year retired from the Senate, declining a renomination. In 1857 he was chosen president of the Terre Haute, Alton and St. Louis Railway Company, but as that road was then heavily in debt he declined the position.

In 1858 he founded the banking-house of Allen, Copp & Nisbet, furnishing the capital, and about the same time negotiated nine hundred thousand dollars of guaranteed Missouri bonds in aid of the Pacific road, and sold them to advantage and free of expense to the State.

When the civil war broke out Mr. Allen remained a Union man, and in 1862 was a candidate for Congress of the "Unconditional Union men" of the Second Missouri District, but was defeated. In 1865, accompanied by his eldest son and daughter, he visited Great Britain and the Continent.

In 1866 he presented an ingenious plan for the liquidation of the public debt by a grand patriotic subscription in commutation of taxes, and based in part on repayment in public lands.

The war being fully over, Mr. Allen's attention was again turned to great national improvements. In 1867 he purchased the Iron Mountain Railway, which had been surrendered to the State, and of which only eighty-six miles had been completed. In spite of great natural and political obstacles he extended the road to Belmont, a distance of one hundred and twenty miles farther, in 1869, and built a branch from Pilot Knob into Arkansas in 1871–72. He and his associates purchased the Cairo and Fulton Railroad of Arkansas, and completed that line in 1872–73 from Cairo to Texarkana, a distance of three hundred and seventy-five miles. The four railway corporations of which he was then president were consolidated in May, 1874, under the title of the St. Louis, Iron Mountain and Southern Railway Company, the aggregation then comprising six hundred and eighty-six miles of road. Thus Mr. Allen completed a grand railroad system, spreading over the great commercial empire of the Southwest, and securing to St. Louis a trade of one hundred millions per annum. He retained control of the road until the latter part of 1880, when he sold his controlling interest to Jay Gould for two millions of dollars cash.

Having finished the Iron Mountain road, Mr. Allen concluded to rebuild the Southern Hotel, which had been destroyed by fire in 1877. He engaged in this work not as a pecuniary investment, but as an ornament to the city. The result is the present hotel of that name, costing one million dollars,—a grand and enduring monument to his taste and public spirit.

In 1871, Mr. Allen endowed the Allen professorship of mining and metallurgy in Washington University, and in 1872, upon its organization, was elected president of the University Club, and remained such continuously until his death. In the same year he was chosen president of the Railway Association of America, and established a free library in Pittsfield, Mass., his native town, the building erected for its accommodation costing fifty thousand dollars. In 1875 he obtained a charter for a double-track steel railway in St. Louis, and constructed and equipped the Cass Avenue line within ninety days thereafter. His son, W. R. Allen, was made president of the company. During this year he was appointed president of the Missouri Board of Managers for the Centennial Exposition, and, owing to the lack of State funds, erected a building at his own expense in Fairmount Park, Philadelphia, which was used as the Missouri headquarters.

Among other offices which he held and titles that were conferred upon him are the following: President of the Alumni Association of his *Alma Mater*, the degree of LL.D., conferred by Union College, fellow of the American Academy of Design, and of the American Geographical Society, etc.

In 1880, in response to the unanimous desire of the Democratic party, and pursuant also to a general demand on the part of the people regardless of party, Mr. Allen consented to become a candidate for Congress from the Second Congressional District. He was chosen by over two thousand majority over an extremely popular opponent. Great hopes were entertained with regard to his congressional career, but when he reached Washington his health had failed, and he was able only to take the oath of office at the beginning of the term, December, 1881, and to occupy his seat for a few weeks. From a sense of duty, although suffering great pain, and contrary to the advice of his physician, he attended daily the sessions of the House until his strength no longer permitted

Thos: Allen

him to do so. He gradually yielded to disease, and died at Washington, April 8, 1882, and was buried in his much-loved native town.

For over thirty years Thomas Allen wielded a pervading and commanding influence in the industrial development of the city of St. Louis and State of Missouri as the originator and manager of many important enterprises. Many of these were undertaken at times when it required strong courage and a sublime faith in the possibilities of the great Mississippi valley. No man in St. Louis ever did so much to convert the Western village into a great central city, extending its arms to both oceans, and laying under tribute the far North and the fruitful tropics. Yet, notwithstanding his great enterprises, he remained the unassuming and scholarly citizen. He was not content to reap a merely personal benefit from his success, but derived a keen pleasure from contributing to the well-being and advancement of his fellow-men. He represented in his own tastes and pursuits that spirit of culture and refinement which opposes with increasing vigor the roughness of society in the crude stages of its development and the asperity of political contests. He was a remarkable combination of the accomplished scholar and gentleman and the hard-working business man, and in him were embodied the patience, the subtlety, the intelligence, the hardihood, the courage, and the magnanimity that are needed to fully win and adorn success. He was a splendid specimen of the true-hearted, strong-minded, courageous American. Broad-viewed, highly gifted, patriotic, generous, and honorable, he was a citizen that St. Louis cannot afford to forget.

Mr. Allen raised a large family to usefulness and honor, and left them a very large fortune. He left them, also, a name which is held in the highest estimation, not only in the city and State, but by the people of the South and Southwest generally, and by his native State, where he sleeps in eternal rest among his ancestors.

In December, 1882, a bust of Thomas Allen was unveiled at the Southern Hotel, and during the ceremonies Charles Gibson, for nearly forty years his close acquaintance, said,—

"It has been my fortune to be acquainted more or less with nearly all the leading men of this State, and many of those of the United States, for twenty-five years past, and I tell you, gentlemen, among them all you could count the equals of Thomas Allen on your fingers' ends. I think I know what it takes to become a great lawyer, and I assure you, gentlemen, that in all my observation for forty years past I have met no man who, if he had spent his energies and life at the bar, would have made a greater lawyer than Thomas Allen. In my judgment he would have ranked with such men as O'Conor, Black, and Curtis. . . . He is the type of man this city needs most and can least afford to lose, and he has not left his like behind him."

After a close and very exciting contest, Dr. J. H. McLean was declared elected at the fall election over Hon. James O. Broadhead to fill the unexpired term of Mr. Allen in Congress, and is now (December, 1882) discharging the duties of his office.

Dr. McLean is of Scottish ancestry, and the records show that he is of eminent lineage in that country. As early as the thirteenth century the McLeans were a very important family, and their services were always loyally at hand to defend the country against the invader. Thus, in 1263, we find Gillise McLean, of Duart Castle, leading his followers at the battle of Largs, and aiding Alexander III. of Scotland to win a brilliant victory over Hocco, king of Norway; this was the last invasion of the Northmen. In 1513, Hector the Swarthy, the fifth of the line, was killed at Flodden Field, and fell intrenched behind the dead bodies of his clansmen, who had formed a wall in his defense. Coming down to later times, Sirs Archibald and Hector McLean were both major-generals in the British army. Archibald conducted the brilliant defense of the castle of Matagorda, in the Spanish invasion by Napoleon, and for his services in that affair was knighted by Spain. Both Hector and Archibald greatly distinguished themselves at Waterloo.

To this heroic branch of the family, known as the "McLeans of Duart Castle," Dr. McLean is allied, his father's grandfather having been the son of James, a brother of Sir Allan McLean, the seventeenth lord of Duart Castle.

Allan McLean, the doctor's father, was a man of energy and skill, as is shown by the fact that he had the management of large mines in Ayrshire, Scotland, where James H. McLean was born, Aug. 13, 1829, the youngest of four sons.

Early in 1830 the family removed to Nova Scotia, Allan McLean having been sent thither as geologist and general superintendent of the Albion Mining Company, which controlled valuable mineral lands in that district. Here the boy grew up amid scenes of activity, and proved a quick-witted student of men and things. His educational advantages were limited, but his application was unbounded, and he very early gave evidence of the "snap" and "push" that characterized his maturer years. The child was "father of the man." It is a striking proof of his precocity that at the age of thirteen, and when most boys are

busy with their kites and marbles, he was contending with his father about starting out for himself, and was entertaining very decided ideas about his future profession. His father thought agriculture safer, if not at once so profitable, as the calling selected by his son, but the boy longed for business and medical pursuits, and his persistence prevailed over the caution of his parent, who forbore to thwart his strong predilections.

The particular bias of the young man was determined by his daily association with the physician of the mining company, an intelligent and observing man, who took much interest in him. Young James determined to become, like him, a doctor, and his father, finding his inclinations fixed, dispatched him on his career with a little money and his blessing.

Young McLean set out for Philadelphia, then, as now, offering exceptional facilities for the study of medicine; but his ocean journey to New York inspired him with a strong predilection for the sea, and he took a trip with the captain of the vessel to Bermuda. This episode somewhat unsettled his views, but he fulfilled his original design of going to Philadelphia, having on the way reduced his patrimony to such an extent that he entered the City of Brotherly Love with only fifty cents in his pockets. It will be remembered that the great Franklin made his entrance into the same city in not much better financial condition.

He at once obtained employment in a drug-store, under an arrangement with the proprietor to maintain him until he was twenty-one and pay for his course of medical lectures in the University of Pennsylvania; and in accordance with this agreement McLean attended one course. His employer then declined to carry out the contract, whereupon he left at once, and though not quite twenty-one years old accepted the managership of a large coal company at Minersville, Pa., the duties of which he performed with the greatest success. But he was not realizing his ambitious dreams; his thoughts continually turned to the West, which then offered glittering prizes to the young, the adventurous, and the courageous; and hither he made his way with the modest capital acquired by his industry and thrift, arriving in St. Louis in the fall of 1849.

Dickens relates that Scrooge had good reason to remember the death of Mr. Marley, his partner, for he solemnized the day of the funeral with an undoubted bargain. Dr. McLean, in like manner, solemnized his coming to St. Louis with a memorable bargain. Cholera was prevailing in the city; hundreds were dying daily, and it was a time of depression and gloom; but the young man, undismayed, began at once to look over the city, and with characteristic confidence in his own judgment, purchased a piece of land on the very day of his arrival, and with equally characteristic enterprise found a customer and sold the property before nightfall at a handsome profit. On the following day he obtained a situation, and in three months became a partner in the firm of Bragg & McLean.

At the end of a year this partnership was dissolved, and Dr. McLean, who received a stock of medicines as his share, went down to New Orleans to dispose of it, but such was his activity that he sold out on the route. He went on to New Orleans, however, and there, availing himself of a chance to buy the only lot of turpentine in that market, he cleared a handsome sum by his investment. His business talent made a decided impression, and he was recommended by his banker as a suitable purveyor for the Cuban Lopez expedition, which was then being fitted out. The failure of that ill-starred enterprise left him with three large cargoes of provisions on his hands, and he was threatened with financial ruin. But, as Shakspeare says, "out of the nettle danger is plucked the flower safety," and the business men whom McLean had impressed so favorably came to his help, advanced him money to make a "corner" and control that class of goods in the market, and in the resulting appreciation of prices he unloaded, throwing in the Lopez cargoes, and realizing enough to meet all drafts and leave a handsome profit. This was a narrow escape for a young man not twenty-two years old, but the business experience was invaluable.

In 1851 he returned to St. Louis, and with a very moderate capital began business for himself as a manufacturer of proprietary medicines. His right to make and sell certain preparations in opposition to the old firm was vigorously contested in the papers and the courts by Bragg, his former partner, and years of tedious and costly litigation followed, taxing the young doctor's resources to the utmost, but he pushed steadily ahead, and in a few years was in full possession of the field. His business, which in the first few years was easily dispatched by one or two hands, now began to assume large proportions.

Meanwhile, in order to thoroughly master his profession, Dr. McLean perfected his medical education by taking a full course in the St. Louis Medical College, where he graduated and received his diploma.

From this time he gave himself with renewed zeal to the manufacture and sale of his family medicines, which have become of world-wide fame, and whose remedial value is clearly indicated by the popularity

indicated by the popularity

which they everywhere enjoy, and the wealth which they have brought their inventor. His laboratory in St. Louis is an immense building of castellated architecture, like those occupied in feudal times by his fighting ancestors, wherein over one hundred people are employed. Another army of agents and travelers is on the road, looking after the outside interests of this vast business. In every quarter, almost, of the globe Dr. McLean has his agents stationed, and in America alone there are over seventy-five thousand, necessitating a floating capital of nearly two million dollars in merchandise. These large figures may afford a hint of the present magnitude of the business, but they give no adequate idea of the tremendous energy requisite to bring it to such a majestic volume, or the vigilance which is constantly requisite to maintain it at such a point. An idea of the size of the business may be obtained when it is stated that Dr. McLean edits and publishes a monthly paper called *The Spirit of the Age*, devoted to the advocacy of free schools and also to advertising his medicines, which has a circulation of over five hundred thousand copies per month all over the world. He also edits and prints a semi-annual and annual almanac, the combined editions of which last year were over eight million copies. Everything the doctor does is on the same mammoth scale.

Although the management of so large a business might well serve as an excuse for evading the ordinary responsibilities of the citizen, Dr. McLean has taken an active interest in public affairs, though not to the extent desired by his fellow-citizens. To their requests to allow them the use of his name as candidate for mayor, Congress, etc., he has several times felt constrained to return a decided negative. But upon the death of Hon. Thomas Allen a large number of the leading citizens of St. Louis prevailed upon him to run as a candidate against Hon. James O. Broadhead, at the fall election of 1882, to fill the unexpired term of Mr. Allen in Congress, and also for the regular ensuing term. After a warm and very exciting contest Dr. McLean was declared elected for the short term, and upon the assembling of Congress in December took his seat in that body. The contest for the regular term at this writing (December, 1882) has not been decided. Yet he has been an energetic promoter of several important public enterprises. For two years he was president of the Manufacturers' Savings-Bank; for three years he was president of the Masonic Hall Association, and in 1882 was chosen president of the Citizens' Committee, a body of influential citizens organized for the purpose of securing State, legislative, and municipal reform. He was also first vice-president of the Manufacturers' Exchange.

Dr. McLean has been ready at all times to aid with his means and labor the improvement of the city. In 1874–76 he built the "Grand Tower Block," on the corner of Market and Fourth Streets, one of the most beautiful buildings in St. Louis, at a cost of several hundred thousand dollars. In 1876 he rebuilt his medical laboratory at 312 and 314 Chestnut Street, a mammoth five-story building, nearly all of which is occupied by his immense business, which is carried on there under a very systematic arrangement. This building cost about one hundred thousand dollars. Dr. McLean has also built in various parts of the city some of the most substantial and handsome edifices of which St. Louis can boast, and in so doing has proved himself one of the most progressive of citizens.

As an inventor, Dr. McLean has taken high rank and occupies a conspicuous position before the world. The mining and mechanical knowledge which he acquired when a boy among the mines of Nova Scotia has proved of great value to him in this direction. One of his important inventions is a sand elevator, for raising sand from any depth in the river, thus affording an ample supply of this necessary building material at the almost nominal cost of fifty cents a square yard. Prior to this invention the city builders had to pay over three dollars per square yard, and then the sand was obtainable only when the river was low.

Dr. McLean has also projected an "elevated railroad" along the Levee, a work which has received the emphatic indorsement of the leading men of the city, who admit that it must sooner or later be built, and essentially as the doctor has devised it.

But his most interesting inventions are in a direction not to have been looked for, at first thought, from a life-saving physician,—that wonderful series of death-dealing guns known as "peacemakers." In an exhaustive treatise setting forth their qualities, Dr. McLean takes the ground that war will cease only when made so terrible and devastating as to shock the world. In his judgment the wars of the future will be conducted by cannon, battery-guns, and rifle-pits, for no charge of cavalry or onslaught of infantry could face such terrible weapons as he has devised. Inspired by the idea of making war as horrible as possible, Dr. McLean has invented and constructed several guns capable of being fired with a rapidity infinitely beyond that ever hitherto attained. Some of these deadly implements have been officially tested by the government at Washington, and found fully to substantiate Dr. McLean's claims. The merits of these great in-

ventions have been referred to a commission of the War Department, and Dr. McLean confidently expects a decision in his favor, and the adoption of these guns as the standard ordnance of all governments.

Meanwhile Dr. McLean has sent copies of his book to all the crowned heads of Europe, and everywhere his views concerning the possibility of putting a stop to war by such novel means have attracted great attention. From every court the doctor has received courteous acknowledgments of the receipt of his treatise, and often with the addition that "His Highness" or "His Majesty" (as the case might be) was deeply impressed with the importance of the subject, and with the author's treatment of the same. Among these were communications from the War Department of Germany and from Count Von Beust, Austro-Hungarian Minister of Foreign Affairs. From one of the nations—Turkey—Dr. McLean received the following:

"CONSTANTINOPLE, March 8, 1881.

"His Majesty the Sultan congratulates you on the success of your inventions. Send, exclusively for the Sultan, one gun for cavalry, one for infantry, and two pistols, with one thousand cartridges each. . . .

"R. AGLIB,
"*Secretary of the Sultan.*"

On the 28th of March, 1881, Dr. McLean received the following dispatch from Gen. Longstreet, United States minister to Turkey:

"CONSTANTINOPLE, March 28, 1881.

"The Sultan offers you direction of his artillery-works. If accept, wire conditions and instructions.

"JAMES LONGSTREET."

This offer, if accepted, would have made Dr. McLean second in command in the Turkish army; but, while expressing himself as deeply sensible of the honor, he declined it, because, in addition to his inventions already tested, he was finishing a rifle and shot-gun capable of fifty shots a minute, which he was anxious to complete in order that he might take them with him in his contemplated trip abroad to the governments which had invited him to visit them.

In addition to these death-dealing engines, Dr. McLean has invented a system of "infantry and rifle protection forms," and has devised the construction of floating and absolutely impregnable fortresses, of vessels that cannot be sunk by perforation, and of a peculiarly ingenious and effective torpedo. In urging the adoption of these destructive machines Dr. McLean exposes the fallacy of existing systems of warfare with a minuteness that shows him to have thoroughly studied the subject, and with a completeness of demonstration that produces irresistible conviction.

In April, 1862, Dr. McLean was married to Miss Sarah Lindeman Hart, daughter of John W. Hart, an old and prominent citizen of Alton, Ill. The union proved to be in all respects a suitable and happy one. They have two children,—Hart McLean and Sarah Grace McLean.

The doctor is a member of the Methodist Episcopal Church; was president of the trustees and one of the stewards of the First Methodist Episcopal Church of St. Louis, and for fifteen years has been choir-leader and musical director. He has been not only an open-handed contributor to the various enterprises of his own communion, but has always felt it his duty to respond liberally to other deserving objects. Churches and educational enterprises have ever found in him a steady defender and warm supporter.

Such is a brief sketch of Dr. McLean's most interesting and instructive career. It needs no eulogy, it is its own commentary. Among the remarkable men of whom St. Louis has been prolific beyond almost any other American city, there is no figure more pronounced or more deservedly conspicuous than Dr. James H. McLean. He is still in the prime of manhood, with a vigorous constitution and an active brain, and with a mind full of projects for the good of his fellow-men and the advancement of St. Louis. Genial, kind-hearted, and popular, he has a just idea of the value of wealth, and is seeking to make such use of it as will justify the application to him of Abou Ben Adhem's beautiful encomium,—

"Write me as one who loves his fellow-men."

A great city like St. Louis plays an important part in all political movements, and often gives shape and life to issues which are felt throughout the Union. The centre of trade, intelligence, and enterprise, the State feels her influence and respects her interests; and though there have been occasions when her vote and influence were not in harmony with those of the State, yet those occasions have been rare and infrequent. The impress of the virtue, intelligence, and energy of her citizens can be distinctly traced throughout the whole course of political affairs in Missouri, and the general direction of her influence has been distinctly in favor of intelligent, liberal, and conservative government.

NATIONAL AND STATE OFFICIALS.

EXECUTIVE OFFICERS OF THE UNITED STATES.

Barlow again from March 8 to April 22, 1844.[1]

[1] These lists are imperfect, owing to the failure to obtain reliable information before the publication of the work.

CHAPTER XVIII.

MUNICIPAL GOVERNMENT.

BEFORE the establishment of municipal government in St. Louis the local affairs of the town and the preservation of law and order were included in the jurisdiction of the Spanish, French, and United States officers. Under the last of these administrations the population grew rapidly, and in accordance with an act passed by the Legislature of the Territory of Louisiana on June 18, 1808, entitled "An Act concerning towns in this Territory," upon the petition of two-thirds of the taxable inhabitants, the Court of Common Pleas for the district of St. Louis on Nov. 9, 1808, incorporated the town.[2]

[2] The judges constituting the court at this time were Silas Bent, president, and Bernard Pratte and Louis Labaume, associates.

Louis Labaume de Tateron came to St. Louis at an early day, and the de Tateron being dropped in consonance with Democratic ideas, his name was changed to that of Louis Tateron Labaume. He was a gentleman of fine education, and under Zeñon Trudeau, the Spanish commander, filled the position of secretary. After the transfer of Louisiana to the United States, as we have seen, he was elected one of the judges of Common Pleas and colonel of militia. His wife was Susan Dubruil, who was connected with the oldest families of St. Louis. The Dubruil family then lived in an old-fashioned stone building with a portico, situated on the west side of Second Street near Pine. Mr. Labaume's sons were Louis A. Labaume, Louis Tateron Labaume, who was elected sheriff in 1849, and Theodore Labaume, who was deputy sheriff a number of years; and his daughters were Eugenia Labaume, who was the first wife of Peter E. Blow, and Susan Labaume, who married Joseph Newman.

Louis A. Labaume, son of Louis Labaume de Tateron, was born on the 13th of March, 1807, and received his early education at the Catholic college established by Bishop Du Bourg. At the age of sixteen he commenced his business career as clerk on a steamboat, and in 1827 visited France in order to look after an estate belonging to his father, who had died five years before. While in France he formed the acquaintance of Mlle. Melaine de Lapierre, whom he married Dec. 20, 1832. Returning to St. Louis in the spring of 1833, he formed a partnership with his brother, Theodore Labaume, and his brother-in-law, Joseph Newman, for conducting a wholesale grocery and railroad business, under the firm-name of Labaume & Co.

The partnership continued until 1841, when Mr. Labaume entered into partnership in the lead-mining business at Richmond, Washington Co., with his brother-in-law, Peter E. Blow, and Thomas M. Taylor, which continued until 1847. In 1841 he was elected a member of the board of delegates, and in 1842 a member of the board of aldermen. He introduced a bill for widening the Levee, which was not adopted until 1849, after the great fire. In 1844 he was elected to the Legislature as an "old-line" Whig, and opposed the election of Mr. Benton to the Senate. He was at one time president of the City Council. During President Fillmore's administration he was appointed United States sub-treasurer, and after filing his bond, resigned without having entered upon the duties of the office. It seems he

This first charter of St. Louis fixed the limits of the town as follows: "Beginning at Antoine Roy's mill, on the bank of the Mississippi; thence running sixty arpens west; thence south on said line of sixty arpens in the rear until the same comes to the Barrier Denoyer; thence due south until it comes to the Sugar-Loaf; thence due east to the Mississippi; from thence by the Mississippi along low-water mark to the place first mentioned."

The taxable boundaries of the town began "at the mouth of Mill Creek (where it enters the Mississippi River); thence with the said creek to the mill-dam; thence with the north arm of Mill Creek to the head of the same; thence by a line running parallel with the Mississippi River until it intersects the north boundary of the corporation."

The charter directed that the metes and bounds of the town be surveyed and marked, and a plat of the same filed for record in the clerk's office. David Delaunay and William C. Carr were at the same time appointed commissioners to superintend the first election of five trustees to whom was to be intrusted the government of the town. The election was to have been held on the 6th of December annually; but, as a critic of the day remarked, "in their eagerness to rank as a town," the inhabitants on Saturday, July 23, 1808, before the town was incorporated, met at the court-house and elected the following trustees for one year: Auguste Chouteau, Edward Hempstead, Bernard Pratte, Peter Chouteau, and Alexander McNair. The trustees elected Joseph V. Garnier as town clerk. On December 7th of the same year notice was given to the inhabitants of St. Louis to "meet at the house of Auguste Chouteau on Sunday, the 11th, at eleven o'clock A.M., on business of importance," probably for consultation over their contemplated form of government. It appears that under and by virtue of their authority the first trustees of the town enacted several ordinances, which were re-enacted from time to time by their successors, and when St. Louis was incorporated as a city in 1822 they were placed on the statute-books. Among the earliest ordinances were those for establishing rates of ferriage and regulating patrols and slaves. The two former ordinances can be found under their respective heads in this work, and the one concerning slaves is as follows:

"*Be it ordained by the Board of Trustees for the town of St. Louis*, That no person or persons shall sell nor give to any slave any spirituous or ardent liquor without a written permission from the master or mistress of such slave, under the penalty of ten dollars for each and every offense.

"SEC. 2. No person nor persons shall sell or furnish to any slave any kind of goods, wares, and merchandise without a written permission from the master or mistress of such slave, under the penalty of paying for each offense the sum of six dollars.

"SEC. 3. Every person who shall find any slave in a state of intoxication in the streets or other public place in the said town of St. Louis is hereby authorized to carry or cause to be carried such slave to the master or mistress of such slave, who shall immediately cause the said slave to receive and be whipped on his or her bare back ten lashes; and in case the said master or mistress shall neglect or refuse to cause such slave to be so whipped, such master or such mistress shall for every such neglect or refusal pay and forfeit the sum of five dollars.

"SEC. 4. Slaves shall not assemble together for amusement and recreation, unless at the house of their master or mistress, except in the daytime, and having previously obtained a written permission from the chairman of the board of trustees for the town of St. Louis for the time being, or in his absence from some two members of the said board; and if any number of slaves exceeding four shall be so found assembled together for amusement and recreation without such written permission, any person or persons are hereby authorized to carry or cause to be carried such slave to the master or mistress thereof, who shall immediately cause the said slave to receive and to be whipped on his or her bare back ten lashes; and in case the master or mistress shall neglect or refuse to cause the said slave to be so whipped, such master or mistress shall for every such neglect or refusal forfeit and pay the sum of five dollars.

"SEC. 5. Every free person of color giving balls, amusements, or public diversion and admitting a slave therein without the written permission of the master or mistress of said slave shall for every such offense forfeit and pay the sum of ten dollars, and the occupier of the house where such balls, amusements, or public diversions are held, and where a slave or slaves are admitted without such written permission, shall for every such ball, amusement, or public diversion as aforesaid forfeit and pay the sum of twenty dollars.

"SEC. 6. No slave shall take or ride the horse, mare, or

---

wanted the government to build a safe, as he was unwilling to undergo the risk.

Mr. Labaume was elected president of the St. Louis Gas-Light Company, and also a director of the Missouri Pacific Railroad, in 1851. In 1860 he went to Europe, and Asa Wiggus filled his place temporarily as president of the gas-light company.

In 1861, Mr. Labaume again visited Europe, this time for the benefit of his wife's health, and remained there until his death, although he never gave up his residence in St. Louis. He came back several times, the last time in 1875. At the solicitation of some of his friends in St. Louis, he was named by Governor Phelps one of the commissioners to the Paris Exposition, and was at his winter residence in Paris when admonished by failing health to repair to his country-seat.

Mr. Labaume died in August, 1875, leaving a large estate. His wife survived him, and he left three daughters,—one, Mrs. Hicks, widow of Charles W. Hicks, formerly of the St. Louis Court of Common Pleas, having three daughters; Mary, who married Capt. Edmond de Lapierre of the French army, and another daughter, twin sister of the latter, Bertha, who married Viscomte Amadee de Caix.

Mr. Labaume is remembered by the older citizens of St. Louis as a fine-looking man, with a frank, open countenance, and very polite and courteous in his address. He was for many years one of the most prominent and popular men in the city.

gelding of his master or mistress, or that of any other person without permission first had and obtained from the owner thereof; and any person finding a slave offending herein is hereby authorized to carry or cause to be carried the said slave to his or her master or mistress, and the said master or mistress shall immediately cause the said slave thus found offending to receive and be whipped upon the naked back of such slave twenty stripes; and in case the master or mistress shall neglect or refuse to cause the said slave to be so whipped, such master or mistress shall for every such neglect or refusal forfeit and pay the sum of ten dollars.

"SEC. 7. That if any white person, free negro, or mulatto shall at any time be found in company with slaves at any unlawful meeting, or shall harbor or entertain any slave without the consent of the owner thereof, such person shall for every such offense forfeit and pay the sum of three dollars, and on failure to pay the same on conviction shall receive on his or her naked back twenty lashes well laid on, by order of the chairman of the trustees, or the justice before whom such conviction shall be.

"SEC. 8. Every white person who shall associate with slaves at their balls or other amusements shall for every such offense forfeit and pay the sum of ten dollars, and for offenses committed against this ordinance by white persons under the age of twenty-one years, their parents, guardians, or masters shall be bound to pay the penalties imposed upon such minor, for which execution shall issue against the goods and chattles of such parent, guardian or master.

"SEC. 9. All offenses against this ordinance shall be heard, tried, and determined by the chairman of the board of trustees for the town of St. Louis, or by any justice of the peace of the said town, and all fines and penalties accruing therefrom shall be appropriated, the one-half to the informer, and the other half to the chairman for the use of the town. Provided, however, that notwithstanding such half part being for the benefit of the informer, such informer shall nevertheless be a competent witness under this ordinance.

"SEC. 10. This ordinance shall be in force from and after the twentieth day of September next.

"In testimony whereof we, Auguste Chouteau, Pierre Chouteau, E. Hempstead, B. Pratte, and A. McNair, have hereunto set our hands this twenty-seventh day of August, in the year of our Lord one thousand eight hundred and eight, and of the independence of the United States the thirty-third.

"A. CHOUTEAU,
"P. CHOUTEAU,
"E. HEMPSTEAD,
"B. PRATTE,
"A. MCNAIR."

At an election held Monday, Nov. 27, 1809, under the charter, "at Mr. Chouteau's house, lately occupied by Gen. Clark" (Block 6), Messrs. Auguste Chouteau, Edward Hempstead, Jean P. Cabanné, William C. Carr, and William Christy were elected town trustees. The first business of the trustees was the re-enacting of the ordinances passed by the trustees the year before. At this time complaint, the mother of improvement, was loud-voiced about "the putrid carcasses of cows, hogs, dogs, etc., which obstructed the streets of St. Louis," and asserted that there was nothing done towards paving the footways, filling up long stagnant ponds, etc.

At the Presidential election in 1809, St. Louis cast her first vote for Presidential candidates. The following vote, while it was ineffectual in that election, owing to the fact that Missouri had not then been admitted into the Union, is nevertheless indicative of the political principles and preferences entertained by the citizens of St. Louis at this early period:

For President.		*For Vice-President.*	
James Madison	122	George Clinton	118
Charles C. Pinckney	48	Rufus King	43
George Clinton	6	Scattering	15
Total vote cast	176	Total vote cast	176

At this period the business of the town was not definite or fixed. The value of the merchandise and imports was about $250,000 annually. Even this small sum was mainly due to the fact that St. Louis was the chief fitting out point for the trading establishments on the Mississippi and Missouri Rivers. The principal currency of the town, as elsewhere noted, was peltries, lead, and whiskey.

Products which were the growth or manufacture of the Territory were exempted from taxation by the ordinance of March 15, 1810, as well as provisions coming to the markets of St. Louis from Illinois. This ordinance provided for the collection of the following taxes:

"On all taverns, public-houses, or retailers of liquor of all and every description, $15.

"On all stores or retailers of merchandise not the growth or manufacture of the Territory of Louisiana, $15.

"On all boats or barges coming from any place or places without the said Territory, of five tons burden, or under, having on board goods or merchandise for sale, $5.

"And for every ton over that number, $1.

"On every pirogue arriving as aforesaid, $2.

"On every ferry per year, $15.

"On every carriage of pleasure of four wheels, $2.

"On every other carriage of pleasure, $1.

"On every carriole or sleigh, $1.

"On every billiard table or wheel of fortune, $100.

"On all real property, the one-fourth of one per centum on the assessment valuation.

"On every dog over and above one for each family, $2.

"And in all cases where a dog shall be owned or kept by a negro or servant, the master or mistress of such negro or servant shall be obliged to pay the tax aforesaid; the proprietors of all dogs for which the aforesaid tax has been paid shall put a collar round the neck of said dog, and all dogs not having said collar shall be liable to be killed.

"SEC. 4. Nothing in this ordinance contained shall be construed to extend to any family-boat or vessel in which nothing shall be found for sale not the growth or manufacture of the Territory of Louisiana, nor to any boat or vessel coming from the Illinois Territory loaded with provisions for the market of St. Louis, nor to any dogs kept on farms within the limits of the said town or corporation."

The financial outcome of this ordinance for 1810 is set forth in the following accounts of

"AUGUSTE CHOUTEAU, *Treasurer of the Town.*

DR.		CR.	
To twenty-three licenses from merchants, taverns, ferries, etc.	$350.00	Paid Mr. Garnier, services as clerk, room, fire, stationery	$115.86
To taxes received from the collector.....	163.68	Paid Mr. Delaunay, twenty-two days as road overseer.....	33.00
To fines for racing horses in the town, etc.....	16.00	Paid Mr. Charless, for printing laws.....	114.00
		Paid Mr. Greg Sarpy, for one-third the materials he is to furnish for the bridge at south end of village.....	33.33⅓
		Paid the collector ten per cent. commission	52.96
		Payment	$399.15⅓
		Balance in treasury..	130.52⅔
	$529.68		$529.68

"Dec. 11, 1810."

As the town began to grow in wealth and population a collector was required, and on Jan. 6, 1810, the following ordinance was passed by Messrs. Chouteau, Christy, and Cabanné for the appointment of one:

"*Be it ordained by the board of trustees for the town of St. Louis,* That there shall annually be appointed a collector for the said town, whose duty it shall be to collect all fines, taxes, and penalties imposed by virtue of any ordinance of the said board of trustees, and to serve and execute all processes for any breach of the ordinances enacted and which may be enacted by the trustees.

"SEC. 2. The said collector shall be appointed by the chairman of the board; he shall give bond with security for the faithful discharge of the duties of his office, to the chairman for the use of the town, in the sum of three hundred dollars, and be entitled to the same fees as constables are by law entitled to.

"SEC. 3. This ordinance shall be in force from the passage thereof."

On January 27th of the same year an ordinance was passed requiring the citizens to form themselves into fire companies, and enacted the laws regulating their government. Among other things they required that each inhabitant who owned a building should have the chimneys of the same swept once a month at least; and if a chimney caught fire, the presumption was that the chimney had not been swept according to law, and the occupier was fined ten dollars, unless he could prove that his chimney had been swept within a month. One of the ordinances provided that each occupier of a house should provide two buckets, to be kept in a convenient place for the contingency of a fire.

The improvement of roads, streets, and bridges was provided for in the following ordinance of the same date:

"*Be it ordained by the board of trustees for the town of St. Louis,* That there shall be annually appointed on or before the fifth day of March, within the said town, one overseer of roads, whose duty it shall be to make and keep in repair the streets, public roads, and bridges within the said town, and to remove all nuisances from the same, and there shall also on the same day be annually appointed two discreet road assessors, who, together with the overseer, shall assess on each householder, and on each able-bodied male person of twenty-one years or upwards within said town, a certain number of days to labor on the said streets, roads, or bridges, under the direction of the said overseer, not exceeding thirty days, nor less than two days in each year, which said assessment shall be made on each person in proportion to his or her property within the said town. And on the said number of days so assessed, each and every person by himself, or by his or her substitute (such substitute being an able-bodied man), shall labor and work on the public streets, roads, or bridges, as aforesaid.

"SEC. 2. Whenever occasion may require the said overseer shall notify all or a part of those liable to work, or cause labor to be done on the public streets, roads, or bridges, as aforesaid, and if any person so notified shall neglect or refuse to labor and work by himself, or sufficient substitute, conformably to the order of such overseer, every person so offending shall for every such offense, without a reasonable excuse therefor, forfeit and pay the sum of two dollars, to be recovered on the plaint of the overseer, who shall be a competent witness before the chairman of the board, or any justice of the peace in said town, which said fines shall go to the overseer, or be by him applied for repairing the said streets, roads, and bridges aforesaid.

"SEC. 3. The said overseer and assessors shall establish the rates or price of materials for building and repairing bridges, and for the use of oxen, horses, and carts per day, as also the price to be allowed for the labor of a man per day, in order that the said overseer may commute personal labor for such materials and the use of such oxen, horses, and carts when necessary.

"SEC. 4. The said overseer shall before he proceeds to erect any bridge lay the plan thereof before the board of trustees for the town of St. Louis, whose approbation thereof shall be his authority to erect the same."

Thus the work of improving the streets was early begun in St. Louis, and although not prosecuted with much zeal or efficiency, the fathers of the village, when their means and appliances are considered, were not more indifferent to its importance than are the city fathers of 1882.[1]

For the year 1811 the following appointments were made by the board of trustees: Pierre Didier, captain fire company; Edward Hempstead, first lieutenant; Gregoire Sarpy, second lieutenant; David De-

[1] A correspondent of the Baltimore *Sun* under date of Dec. 5, 1882, says, "St. Louis, while progressing so wonderfully in every other direction, has never enjoyed the blessings of good and clean streets, such as belong to other cities of equal population, commerce, and wealth, and such as ought to go with its many beautiful public and private buildings. The worn and broken paving, and mud and holes, and pools of slush and antique sidewalks of dirty brick that make up the most of its thoroughfares are as unsightly and uncomfortable as they are disgraceful to the community. The city has only one mile of stone block pavement, ten miles of Nicholson wood pavement, forty-nine miles of improved alleys, and three hundred and three miles of discreditable macadamized streets."

launay, overseer of roads; Charles Sanguinet, John Coons, assessors of roads.

The receipts and expenditures of the town of St. Louis for the year 1811 are set forth in the following statement:

Balance remaining in the treasury under the administration Col. Auguste Chouteau late chairman of board	$130.52½
Fines	4.00
Paid by Alexander Bellisime, town collector	16.87½
" " " " "	6.00
Paid by William Morris, town collector	450.90
Balance due to Ch. Gratiot, treasurer	84.57½
Total	$632.87½

Expenditures.

Paid D. Delaunay, overseer of streets	$4.87½
" J. V. Garnier, Esq., clerk	50.00
" for blank books, papers, etc	13.00
" to constable for the burial of a dead body found floating on the Mississippi near the Market Square	5.00
Paid to G. Sarpy, on account of part of the materials for building a bridge below the town	40.00
Paid to Dumoulin & Clement, by two orders from Helphinstine & Smith, for work at the market-house	200.00
Paid to Helphinstine & Smith, for work at the market-house	220.00
Paid to D. Delaunay, for his services as overseer of streets, etc	220.00
Paid to J. Charless, for printing ordinances, etc., by order of the board	50.00
Total	$632.87½

The boundaries of the town of St. Louis on Feb. 25, 1811, were made by ordinance to commence at the river Mississippi, at low-water mark, at or near the windmill of Antoine Roy, then due west to the east line of the forty arpens lots of the hill back of St. Louis, then along the line of said lots to Mill Creek, then down said creek to its mouth, thence up the river Mississippi, along the low-water mark, to the [illegible] of beginning."

In April of the same year the following ordinance was passed "to punish breaches of the Sabbath-day or Sunday":

"Sec. 1. It is ordained by the board of trustees in and for the corporation of the town of St. Louis that any person or persons who shall keep open any store for the purpose of vending goods or merchandise on the Sabbath-day or Sunday, between the hours of eight o'clock in the morning and sundown, shall for every such offense forfeit and pay the sum of ten dollars, as also a sum equal to the amount of the goods sold.

"Sec. 2. All fines and penalties accruing under this ordinance shall be appropriated, one-half to the informer and the other half to the treasurer of the corporation for the use of the town; provided, however, that notwithstanding such half part for the benefit of the informer, such informer shall nevertheless be a competent witness under this ordinance."

About this time also was passed an ordinance regulating the prices which boats had to pay which came to the wharf; and every boat of five tons burden within the territory of Louisiana had to pay a duty of two dollars. There was also passed that year "an ordinance for levying and collecting a tax within the limits of the town of St. Louis."

The new market-house on Centre Square,[1] for the materials of which Charles Gratiot, chairman of the town trustees, advertised on Jan. 29, 1811, was finished Sept. 5, 1812, and contained fifteen stalls. The ordinance regulating the same, passed Aug. 6, 1812, fixed the rent of stalls from ten dollars to thirty dollars per annum, and provided for a clerk of the market, to be paid one hundred and four dollars per annum.

On April 17, 1813, the citizens of St. Louis again expressed at the polls their political preferences as follows:

For President.		*For Vice-President.*	
James Madison	128	Elbridge Gerry	131
George Clinton	89	Ingersoll	86
Total vote	217	Total vote	217

The General Assembly of the Territory of Missouri passed an act on Jan. 15, 1813, respecting the incorporation of the towns of St. Louis and Ste. Genevieve, which required the publication in the *Missouri Gazette* of all moneys received and distributed for the use and benefit of either of the towns since they had been incorporated. The statement was required to be published in the French and English languages, and a like statement was required every six months thereafter. In accordance with this law, Elijah Babe, chairman of the town trustees, published the following account of the receipts and disbursements of the town of St. Louis for 1814 and 1815:

January 26, from Lyon's billiard license	$50.00	January 26, two quires of paper	$0.75
April —, from Maj. Christy for C. B. Penrose, late treasurer	47.33		
June 9, from Landreville, billiard license	25.00		
July 29, from Everhardt, license and fine	55.00		
August 30, license for wax figures	25.00	Balance in hands of the treasurer	201.58
Receipts	$202.33		$202.33

The population as returned by Sheriff J. W. Thompson for 1815 was for the town two thousand six hundred, and for the town and county seven thousand three hundred and ninety-five, being an increase of about twelve hundred in two years.

Again, on March 29, 1817, a vote of the people of St. Louis sustained the Republican (afterwards called Democratic) candidates for President and Vice-President, as follows:

[1] The name which had been given to the public square, which had been called during the French and Spanish dominations La Place d'Armes. This square was between Market and Walnut Streets, and Main and the river.

For President.		*For Vice-President.*	
James Monroe	183	David D. Tompkins	183
Rufus King	31		
	214		

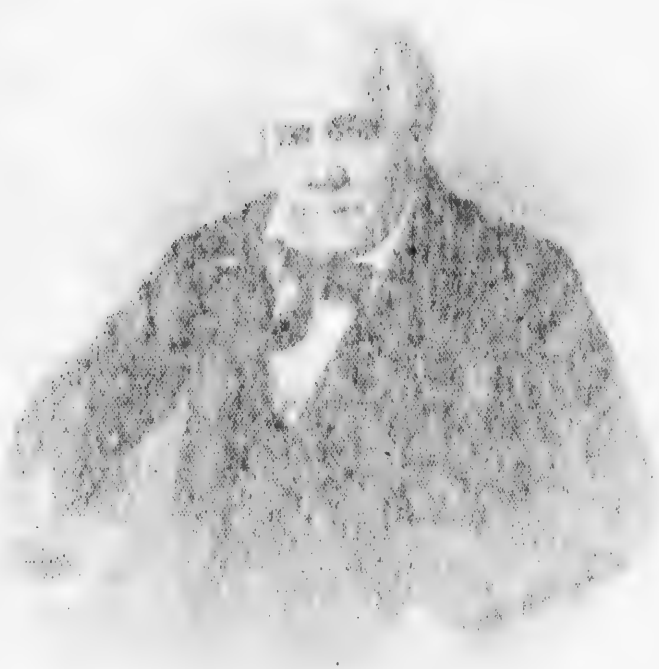
By an act extending certain powers to the trustees of the corporation of the town of St. Louis, approved Jan. 21, 1815, they were authorized to have a survey and plat of said town made, to ascertain and fix the exact dimensions of each lot and street. The lot on which Auguste Chouteau, Sr., lived was required to be surveyed first, and then taken for the base of beginning for making out and fixing the limits and dimensions of the other lots. The plat was required by the law to be preserved in the recorder's office of the Territory. The board of trustees were authorized and empowered, "whenever they think proper," to remove all obstructions in the streets or encroachments thereon, and otherwise to lay out the streets of the town. The trustees were invested with full power to license and regulate ferries and to levy and collect taxes.

In accordance with this law, a survey of the town was made in 1818 by "Joseph C. Browne, United States deputy surveyor," one plat of which was filed with Gen. Pratte, treasurer, and the other placed at the post-office. Every person owning a lot in St. Louis was required "to leave a statement of his claim with William G. Pettus, at Browne's office, near the new Baptist Church, so as to be accurately laid down on the plat about to be surveyed." About this time an agitation for a city charter was in progress, as appears from a statement in the *Republican* of Dec. 11, 1818, by a correspondent to the effect that "a gentleman called upon me a few days ago for my signature to a petition to the Legislature, praying for an act of incorporation, erecting St. Louis to the grade of a city. I told the gentleman who bore the petition that our town could not at this time bear the expense incident to such a police establishment, as a mayor, alderman, town register, captains, lieutenants, and a regiment of watchmen, with a number of other officers, whose salaries would eat up the proceeds of all our labor."

On Monday, Jan. 4, 1819, an election for five trustees for St. Louis took place agreeably to an act passed at the last session of the Legislature. On former elections very little interest had been taken by the inhabitants in the choice of trustees, and on some occasions the trustees were elected by fifteen or twenty votes. At that election, however, one hundred and sixty-eight votes were taken, with the result as follows (the first five forming the board for that year):

Julius De Mun	94	Fremon Delaurier	59
Thomas McKnight	83	Alexander McNair	59
William C. Carr	83	J. P. Cabanné	54
H. Von Phul	80	M. P. Leduc	42
Paschal Cerré	79	Antoine Dangin	34
Joseph Charless	78	Thomas H. Benton	34

The trustees elected for 1822–23 were Wm. Clark, A. Gamble, Henry Von Phul, Peter Ferguson, and George Morton.



No one among these trustees took a more active or prominent part in contributing to the welfare and prosperity of the city at this time than Peter Ferguson, who was long afterwards closely identified with all the leading affairs of the city. He was born Jan. 26, 1788, in Scotland, and Edinburgh is supposed to have been his native place. He early drifted to America, and settled at Norfolk, Va., where in 1809 he married a lady of Princess Ann County, whose English ancestors, the Cornicks, had obtained a patent to a large tract of land near Linhaven Bay. Mr. Ferguson was a captain in the war of 1812, and commanded a company at Norfolk. In the spring of 1817 he removed to St. Louis, and in that year was appointed a justice of the peace by Hon. Frederick Bates, who was then acting Governor of the Territory. Governor Bates afterwards offered to appoint him sheriff and collector of the county of St. Louis, but he declined the honor. He served as justice of the peace and in other similar capacities for many years, and was judge of the court which held Spencer Pettis and Maj. Biddle in bonds to keep the peace when the duel, which terminated fatally to both, was pending (in 1831), after the cowhiding of Pettis by Biddle.

Mr. Ferguson early became prominent in municipal affairs, and was chairman of the board of trustees of the town of St. Louis in 1818–19. In the latter year the first street-paving was done,—on Market Street, from Main Street to the Levee. Previous to 1833 he was a member of the board of aldermen for several years, and as such was chairman of several very important committees, made several very valuable reports relative to the public affairs of the growing city, and drew up some important memorials to Congress and the State Legislature. He labored long for the passage of a law authorizing the sale of the "commons" and to make them available for habitation. Mayor John F. Darby also took great interest in the matter, and after years of effort the result was reached, and the stimulus that was at once given to the progress of the city through the sale of these lands fully justified the wisdom of the proposed action.

In 1825, Mr. Ferguson had assisted Judge M. P.

that year).

In 1826, Mr. Ferguson had assisted Judge B.

Peter Ferguson

Leduc to organize a probate court, but the expense of maintaining the tribunal was more than the infant county could bear and consequently the experiment was abandoned, and its jurisdiction was transferred to the county court. In 1841 a separate probate court was again established, and Mr. Ferguson was elected the first judge thereof. He organized it upon the plan of 1825, and conducted its business upon a system that has been followed without material change by his successors. While Judge Ferguson was not a popular man in the usual acceptation of the term, so well satisfied were the people as to his sound judgment, his uprightness, his determination to take care of the interests of the widow and the orphan, and to administer the duties of his high office in strict accordance with the law, that no candidate could be found of sufficient strength or popularity to contest his election. Although his party (the Whigs) was decidedly in the minority, and consequently a nomination on the adverse ticket would probably have been equivalent to an election, Judge Ferguson was chosen for several successive terms without opposition on an independent ticket, and served as judge of probate continuously from 1841 to 1858. During all that period he failed to hold court during only one term (December, 1848), and a few days of the March term in 1849, sickness being the cause in both cases. His official integrity was never called in question, his judgment was rarely at fault, and he left the office enjoying the full confidence of the people, and was succeeded (it may be interesting to state) by his son, the Hon. W. F. Ferguson, who filled the position for over six years. Peter Ferguson died June 15, 1863, the only surviving member of his family being his son and successor. He left a handsome estate, the fruits of thrift and careful investment.

Soon after his death the bar of St. Louis passed appropriate resolutions in honor of his memory, and the character and standing of the gentlemen composing the meeting rendered the tribute unusually valuable and impressive. This testimonial eulogized the high character of the deceased, his incorruptible integrity as a judge, his fidelity and honesty as a man and a public officer, and his sound judgment, practical common sense, and high business capacity, all of which he devoted to the prompt discharge of the duties of his responsible office, and for which he was entitled to lasting honor and regard. Special mention was also made of his services as an early settler of St. Louis, and of the fact that as such he was identified with the city from its infancy, and aided in many ways unknown to the public, by his wisdom and advice, in organizing and building up many important municipal and State institutions, and in securing the passage of many laws that have conduced greatly to the prosperity and progress of the community. Peter Ferguson's long, useful, and well-spent life fully deserved this eloquent but well-considered and modestly-expressed eulogy.

From Dec. 5, 1817, to Jan. 11, 1819, the receipts and expenditures of the town of St. Louis were as follows:

Receipts.		*Expenditures.*	
Cash from fines, stalls, billiards, etc..	$522.11½	Watchmen	$768.50
Subscriptions	85.00	Bell-ringer	41.00
On account tax-list	700.00	Rent to Valois	66.00
		Register	338.25
		Warner, constable and collectors' services	56.25
		Sullivan, jail fees	9.00
		Charless, advertising	2.00
		Gamble, copy of bond	2.00
		Stove-pipe and chairs	45.00
		Firewood	13.62½
		Trumpets, for watchmen	3.50
		Stationery	15.75
		Removing nuisances	51.30
		Furniture	20.25
		Thomas F. Riddick, part of cash advanced by him for corporation	71.00
	$1307.11½		$1503.42½

THOS. F. RIDDICK,
Late Chairman.
MACKAY WHERRY,
Register.

The Territory of Missouri having been admitted into the Union as a State, the Legislature, on the 9th of December, 1822, passed an act to incorporate the town of St. Louis. By the first section of the act of incorporation the city was bounded as follows:

"Beginning at a point in the middle of the main channel of the Mississippi River due east of the southern end of a bridge across Mill Creek, at the lower end of the town of St. Louis; thence due west to a point at which the western line of Seventh Street, extended southwardly, will intersect the same; thence northwardly along the western side of Seventh Street, and continuing in that course to a point due west of the northern side of Roy's tower; thence due east to the middle of the main channel of the river Mississippi; thence with the middle of the main channel of the said river to the beginning, shall be and is hereby erected into a city, by the name of the city of St. Louis; and the inhabitants thereof shall be and are hereby constituted a body politic and corporate, by the name and style of 'THE MAYOR, ALDERMEN, AND CITIZENS OF THE CITY OF ST. LOUIS.'"

The corporate powers and duties of the city were

vested in the mayor and board of aldermen. The board of aldermen were to consist of nine members, for the election of whom the city was to be divided into convenient wards, and were to be chosen by the qualified electors for the term of one year. They were required to be at least twenty-one years of age, and citizens of the United States, and inhabitants of the city for one year preceding their election, and to possess a freehold estate within the limits of the city. The stated meetings of the board of aldermen were held on the first Mondays of March, June, September, and December in each year, except on extraordinary occasions, when they could be convened by the mayor. The aldermen were *ex officio* conservators of the peace throughout the city, with all the powers and jurisdiction then vested in justices of the peace in matters of criminal nature.

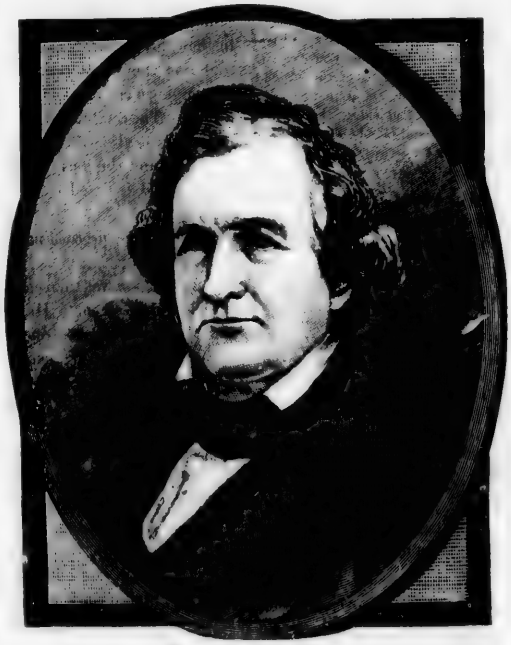
The mayor was to be elected by the qualified electors of the city, and to hold his office for the term of one year. He was required to be at least thirty years of age, a citizen of the United States, and a resident of the city at least two years preceding his election, and otherwise qualified as in the case of aldermen.

The mayor and aldermen were vested with almost the same power and authority as the mayor and city councilmen of St. Louis are at the present time. A register was to be appointed, who was to hold his office for one year. His duties were to keep a register of all the official acts of the mayor, and to perform the duties of clerk to the board of aldermen when in session, and register all the proceedings of the board, and be the custodian of all the records, public papers, and documents belonging to the city.

The elections for officers of the corporation were to be held on the first day of April in each and every year, in the several wards of the city, and "all free white male persons of the age of twenty-one years, and who have paid a city tax," were entitled to vote at all elections for city officers by ballot.

A city constable was also authorized to be appointed, whose duties were to serve all processes issued by the mayor or aldermen. The first election was to be conducted by the trustees of the town of St. Louis.

This act of incorporation was not to take effect until it was accepted by the inhabitants of the town at an election held on the first Monday of March, 1823, at the office of the register, at which all free white male persons, otherwise qualified, who had paid a corporation tax to the town of St. Louis, and who resided within the new corporate limits, were entitled to vote. If a majority of the votes cast were in favor of the city charter, then the town trustees were to determine on what day the first election for city officers should be held, which was not to be more than two months nor less than three weeks after the acceptance of the charter. If the charter was not accepted, the town trustees were authorized from time to time, whenever they should be petitioned to that effect by at least one hundred householders residing within the limits of the town, to cause an election to be held as aforesaid until the charter was accepted.



On the first Monday of March, 1823, an election of the qualified voters of the town was held for the purpose of taking the votes of the inhabitants "for or against the city charter." At the close of the polls the vote stood 107 in favor of the proposed charter and 90 against it. A great many persons were excluded from voting in consequence of the qualification required in the act,—by not having paid taxes to the town corporation.

The charter having been adopted, the town was divided into three wards. On the 7th of April, 1823, an election took place to select the mayor and nine aldermen, in whom the charter specified should be vested the corporate powers of the city, with the following result: For mayor, William Carr Lane, 122; Auguste Chouteau, 70; Marie P. Leduc, 28.

Dr. William Carr Lane, first mayor of St. Louis, was born in Fayette County, Pa., Dec. 1, 1789, and was the son of Presley Carr Lane, being the third son in a family of eleven children. His educational opportunities were those afforded by a common country school until he was thirteen years old, when he was sent for two years to Jefferson College. He then spent a year in the office of his brother, who was prothonotary of Fayette County, thus gaining some familiarity with legal matters and forms, which stood him in good service in after-years. After attaining his majority he spent two years at Dickinson College, Carlisle, Pa., where he graduated with honor. He commenced his medical studies in the fall of 1811, in Louisville, with Dr. Collins, who removed to New Orleans on account of his health in the summer of 1813. At this time Lane volunteered to fight the Indians in the Northwest (Indiana). The result of the various excursions against the Indians was not very successful, and when in quarters at Fort Harrison, about sixty miles north of Vincennes, many of the troops were sick with bilious and malarial fevers, and all available medical skill was called into requisition. Mr. Lane thus had an opportunity of utilizing the results of his two years' study, and was soon appointed surgeon's mate at Fort Harrison. In the autumn he resigned and returned to Vincennes, where he prosecuted his medical studies. In the winter of 1815–16 he attended lectures at the University of

Pennsylvania in Philadelphia, and in April, 1816, received an appointment as post surgeon, which he held for three years, serving at different points upon the upper Mississippi and at Fort Harrison. He resigned this position in May, 1819, and located in St. Louis, where he resided until his death, Jan. 6, 1863. Here he formed a partnership with Dr. Samuel Merry, an eminent and distinguished practitioner, with whom he was associated for some five years. Dr. Lane soon established himself in the favor of the people of St. Louis, and his popularity is attested by the fact that within four years after his arrival in the town he was chosen its mayor. He discharged the duties of his position so acceptably that he was re-elected in 1824, '25, '26, '27, and '28, and again in 1838, '39, and '40. In 1841 he was appointed to the chair of obstetrics and diseases of women and children in the medical department of Kemper College, which he resigned after holding it for about three years. Soon after the organization of the State government he was elected a member of the Legislature, and in 1852 was appointed Governor of New Mexico by President Fillmore, serving as such until the close of the Fillmore administration. Dr. Lane was not only an able and energetic public official, but a physician of fine attainments and a gentleman of great personal popularity. He was of lofty stature, splendid physique, and fine, commanding presence, and altogether one of the most notable and interesting figures in the early history of St. Louis.

In 1818, Dr. Lane married Miss Mary Ewing, daughter of Nathaniel Ewing, and the fruit of this union was three children, one of whom, Mrs. William Glasgow, is now residing in St. Louis.

Wm Carr Lane

The death of Dr. Lane in 1863 elicited general expressions of regret on the part of the community at large, to whom he had become endeared as one of the leading and most public-spirited citizens of St. Louis for many years back.

The vote for aldermen elected in 1823 was Thomas McKnight, 181; James Kennerly, 166; Philip Rocheblave, 133; Archibald Gamble, 124; Wm. H. Savage, 120; Robert Wash, 120; James Loper, 113; Henry Von Phul, 104; and James Laknan, 96. These were the first corporate officers of St. Louis. As the proceedings of their first meeting will naturally be of interest, an abstract of the minutes is given below. The record stands thus:

"City of St. Louis,
"Monday, 14th April, 1823.

"*Register's Office:*

"The board of aldermen for the city of St. Louis this day convened, in pursuance of a proclamation issued by William Carr Lane, mayor of said city; were present, Robert Wash, James Loper, James Laknan, Archibald Gamble, Wm. H. Savage, and Thos. McKnight, Esqs., who produced their certificates of election, with the oath of office thereon indorsed.

"Mr. Wash was chosen president *pro tempore*, and Joseph A. Wherry clerk *pro tempore*.

"Messrs. Gamble and Savage were appointed a committee to wait on the mayor and notify him that the board of aldermen had assembled and were ready to transact business."

The committee having reported, the mayor appeared and read the first mayor's message delivered west of the Mississippi. The message, which appears inscribed in full in the minutes, may be considered, in view of the embryonic condition of municipal affairs existing at the time, as being in every respect a remarkable document. It grapples fearlessly with the problems which naturally suggested themselves as demanding legislative solution, and to all appearances

the brief discussion which each topic receives is in every case marked by plain reasoning and good sense. It is perhaps safe to say that a large part of the work cut out in this message for the first board of aldermen has mainly occupied the attention of every city legislature since organized. Some of the passages indicate a rare foresight, and when read in the present day seem hardly less than prophecy. Here is what Mayor William Carr Lane said of the future great city in 1823, with the board of aldermen for an audience:

"The fortunes of the inhabitants may fluctuate, you and I may sink into oblivion, and even our families become extinct, but the progressive rise of our city is morally certain. The causes of its prosperity are inscribed upon the very face of the earth, and are as permanent as the foundations of the soil and the sources of the Mississippi. These matters are not brought to your recollection for mere purposes of eulogy, but that a suitable system of improvements may always be kept in view, that the rearing of the infant city may correspond with expectations of such a mighty maturity."

Even at that early day it seems the question of street reconstruction and street openings was beginning to be of considerable moment, though the subject of street-cleaning and repairs did not figure materially. On this point the message says,—

"The old streets must remain somewhat irregular. To straighten them, to make them parallel and cross at right angles, and to reduce the squares to the same superficial contents would be to purchase the ground and lay it off anew, an enterprise that we are by no means prepared for. The question then is, What are we to do? I answer, We can appeal to the intelligence of the ancient inhabitants, nay, to the venerable father of the city himself, and ascertain where the streets originally were. I speak of this because I know of no authentic record of their metes, widths, and bearings, and because encroachments upon them have been so great as not only to render them generally crooked, but in some of the cross streets to nearly obstruct them entirely."

It was but natural that the then mayor should appreciate the necessity for river improvement and should recognize the Mississippi as the highway by which his city was to travel to prosperity. He approaches the subject of harbor improvement thus:

"The erection of one or more wharves and the appointment of an officer for the port seems to me very necessary. We may disregard the hazard that boats are subjected to from the present form of the landing, the inconvenience that every one is subjected to who does business there, and the deformity of the object itself, but the pestilential influence of decomposing animal and vegetable matter and such an expanse of mud must assuredly be felt by everybody. The ferries will pass in review, and if they should be considered proper objects of taxation, of which I have doubts, the present tax ought to be raised. If they are not, you may inquire whether the present rates of fare may not be reduced and still afford adequate compensation for the capital and time employed."

Mayor Lane called the attention of the aldermen to the public health as follows:

"Health is a primary object, and there is much more danger of disease originating at home than of its seeds coming in from abroad. I recommend the appointment of a board of health, to be selected from the body of citizens, with ample powers to search out and remove nuisances, and to do whatever else may conduce to general health. This place has of late acquired a character for unhealthfulness which it did not formerly bear and does not deserve. I am credibly informed that it is not many years since a fever of high grade was rarely, if ever, seen. To what is the distressing change attributable? May we not say principally to the insufficiency of our police regulations? What is the present condition of yards, drains, etc.? May we not dread the festering heat of next summer?"

The message goes on to touch upon several other topics, and from one passage it would seem that even in that day it was becoming fashionable for the surrounding country to send all the sick, worn-out, and broken-down cripples and invalids to the city to be taken care of. The establishment of a hospital is suggested. Attention is also called to the need for a better supply of water, and the desirability of contriving some plan for that end is noted. The message is signed "Wm Carr Lane."

The further proceedings of the first session were as follows:

"An election was then entered upon, and Mr. Savage was elected president. He, however, declined to serve, and Mr. Gamble was elected in his place.

"Messrs. Wash, Laknan, and Loper were appointed a committee to draft rules.

"Messrs. Savage and McKnight were appointed a committee to consider the mayor's message and report thereon, and to inquire of the mayor whether he had any objection to its publication.

"Messrs. Wash and Savage were appointed a committee to examine and report on existing ordinances of the town of St. Louis.

"On motion, the board adjourned to the Bank of Missouri, nine o'clock A.M. to-morrow."

At the adjourned meeting on Tuesday, the 15th, the register's office, the mayor sent in nominations for the city officers. Mackay Wherry, who had been register under the town trustees, was nominated and confirmed city register. He was also appointed clerk of the market. Jean P. Cabanné was appointed treasurer, Réné Paul, surveyor (*vice* Joseph C. Brown), and Peter Ferguson and Marie P. Leduc assessors. Sullivan Blood was appointed constable, and confirmed "without a dissenting voice." Asher F. Cook was appointed lumber-master, and committees were appointed to revise the old ordinances and to draft rules and regulations to govern the proceedings of the board of aldermen. Henry Von Phul, afterwards the distinguished merchant, was appointed auditor, but only acted in that capacity for a short time. After a re-

eventful career Mr. Von Phul died in St. Louis on the 8th of September, 1874. In the Missouri volume of the "United States Biographical Dictionary and Portrait Gallery of Eminent Self-made Men" he is thus mentioned:

"The State of Missouri owes as much to Henry Von Phul as to any other for her prosperity as the commercial centre of the empire of the West. Simple and unostentatious in his manners, retiring in his disposition, he never sought office or notoriety. Indeed, either was to him in his lifetime exceedingly distasteful; but, in the line of his duty, he inaugurated and carried out a line of commercial policy that today is stamped indelibly on St. Louis' prosperity. The city owes him a debt, and her present leading citizens willingly pay this tribute to the man who helped to lay the foundation of her greatness.

"Henry Von Phul was the son of William Von Phul, a native of West Hafen, in Central Pfalz, Germany, who came to America in 1765, being then twenty-five years of age. He (the father) was married in 1775 at Lancaster, Pa., where he had settled, to Catherine Graff, from which marriage eight children were born, five of whom were sons, Henry being the third.

"Henry was born Aug. 14, 1784, in Philadelphia, where in 1792 his parents and all his brothers died from the yellow fever that was so fatally epidemic there during that year. In 1800, at which time he was the only support of his two sisters, he removed to Lexington, Ky., where he resided ten years in the employ of Thomas Hart, Jr., brother-in-law of Henry Clay, and after whose father the late Thomas H. Benton was named. In the interest of Mr. Hart, young Von Phul made numerous trips to the South, having in charge keel-boats loaded with flour, lead, bagging, and rope. He navigated the rivers in a keel-boat, and during the trip visited Natchez, and went up Red River, trading with both the Indians and planters. Aaron Burr while in Louisiana made Mr. Von Phul, then a young man, a flattering offer in connection with his secession movement, but he promptly declined it.

"In 1811, Mr. Von Phul determined to remove to St. Louis. At the time of his arrival St. Louis contained a population of about fourteen hundred, and the northern boundary of the town was formed by a loose bluff, rising from seventy-five to one hundred feet in height, in the neighborhood of what is now Washington Avenue. This was a sort of public observatory and resort, and the people of the town would assemble on and about this prominence of evenings to discuss the doings of the past day. The old trading-post was on the site now occupied by the Merchants' Exchange. The houses were built of logs, and the inhabitants, nearly all of whom were French, devoted themselves to the trade of lead and peltries. The country west of St. Louis, and across the river on the Illinois side, was in a wild and unsettled state. Shortly after Mr. Von Phul's arrival in St. Louis, when he was about twenty-eight years of age, word came that the settlers on the Missouri had been attacked by Indians, and were in extreme danger of being massacred. It required but a short time to raise a large body of volunteers, the command of which was given to Nathaniel Boone, a son of the old Kentucky pioneer, Daniel Boone. Henry Von Phul was a person of indomitable pluck, afraid of nothing when he knew he was in the right, and he was accepted by that great warrior as his aide-de-camp, and served on his staff with rank of major. During the war of 1812, when the Indians were unusually troublesome, he made several trips from St. Louis to Louisville on horseback, though, strange to say, during none of these journeys was he ever molested, nor did he ever meet with Indians manifesting hostile intent.

"Mr. Von Phul, in 1817, witnessed the arrival at the St. Louis wharf of the steamer 'General Pike,' which was the first steamer to land there. Subsequently he became largely interested in steamboats, and was at one time part owner of some of the finest boats on the Mississippi, and, together with Edward Walsh and Capt. John Daggett, was the first to run boats to New Orleans and up the Illinois River.

"On the 10th of June, 1816, Henry Von Phul married Miss Rosalie Saugrain, daughter of Dr. Antoine Saugrain, who was a graduate of one of the largest scientific institutes of France, and an advanced thinker of more than ordinary weight and capacity. Dr. Saugrain was a nephew of the celebrated Dr. Guillotine, the inventor of the beheading machine which took his name, and played such a prominent part in the French Revolution of 1793, and which is still known throughout the world as the 'guillotine.' From this marriage fifteen children were born, ten of whom, six sons and four daughters, survived him."

On the 10th of June, 1866, Mr. and Mrs. Von Phul celebrated their golden wedding, which was attended by nearly all the old citizens of St. Louis, together with the other friends of the venerable couple. The celebration commenced at seven o'clock in the morning at the Church of the Immaculate Conception, where the sacrifice of the mass was offered on their behalf, and the nuptial benediction was renewed. The father, mother, six sons, four daughters,

and many grandchildren received holy communion, after which a few remarks of an eloquent and touching character were made by the celebrant, Rev. F. P. Garesché, S.J.

"Henry Von Phul was the senior partner in St. Louis of the firm of Von Phul & McGill, subsequently Von Phul, Walters & Co., the oldest mercantile firm of the city. Commencing in the year 1811, when St. Louis was a village, conducting his business on principles of strict integrity, by degrees Mr. Von Phul built not only a trade, but a creditable commercial standing, which lasted with his life and descended to his sons in their commercial intercourse. Henry Von Phul had done much to build up the mercantile interest of St. Louis, and on the credit of his name alone had brought more commerce to the city and more credit to her firms than any one man of his generation. As an instance of his stern business integrity it may be stated that in 1872, while in his eighty-eighth year, after a successful business career in St. Louis of almost half a century, Mr. Von Phul was overtaken by misfortune. It was then that the grand qualities of the man, his unfailing integrity and his deep sense of justice, made themselves manifest. He determined on turning over all the property that remained to him for the benefit of his creditors, and this he did, even to his wife's dower. So rigid was his sense of right that he was unwilling to retain anything so long as his creditors were unpaid. This view was shared by his wife, and everything was given up to their creditors.

"In his favorite city he was frequently chosen to places of trust in the municipal government, and no word of just reproach was ever heard against him. He acted as one of the board of city commissioners for a number of years, and was also a member of the school board. He was president of the Union Insurance Company, a director of the Iron Mountain Railroad, a prominent member of the Chamber of Commerce, and a director in the Bank of the State of Missouri. In mercantile circles he was regarded as the patriarch of St. Louis trade, being the oldest merchant of the city.

"On the 10th of June, 1874, Mr. Von Phul celebrated the fifty-eighth anniversary of his wedding, which was about the last time he was able to go about home. He was then attacked violently with an inherited asthmatic complaint, from which he suffered acutely until his death, which occurred on the 8th of September, 1874. He died in the Catholic faith, and Bishop Ryan administered the holy sacrament. Archbishop Kenrick also called to lend comfort to the dying man.

"During the latter part of his illness his mental faculties were singularly unclouded, and he recalled with wonderful distinctness facts which had come under his knowledge half a century before, and had since been forgotten. He was perfectly reconciled to the inevitable, saying that whatever was God's will was his. He had tried to lead a sinless life, and was prepared for death. Nine of his ten living children, with his faithful and loving helpmeet, were at hand, and when death came it found a soul ready for a better and brighter world.

"An orator of the day thus spoke of him after his death:

"'With all his business cares to occupy his mind, the overflowings of a generous nature were being felt by all around him. Ever a true friend to those who merited his friendship, the circle that will feel the void which death has made has age and youth, the past and present. During his illness many of those among the poor who had been the recipients of his benefactions called to tender their sympathy to the afflicted family. From the house of Mr. Von Phul the poor never were sent away empty-handed, but were provided according to their needs.'

"A more fit eulogy could not be pronounced upon the deceased than is found in the words of the president of the new Chamber of Commerce Association, who said, at the laying of the corner-stone of the new building, June 6th, when referring to those whose energy and enterprise had raised St. Louis to her proud position of commercial prosperity, 'But there is one of these who has come down from a former generation, a last link connecting the present with the distant past, who still remains with us, to whom it will not be unbecoming in me to make special allusion. He first settled in St. Louis in 1811, when its population was only fourteen hundred, and since then has been continuously engaged in mercantile pursuits. Through all these long years he has lived a blameless life, and has borne a spotless character, his enterprise and his integrity never faltering in the most trying, nor flagging in the most prosperous times. What citizen does not honor the name of Henry Von Phul?'"

At a meeting of the Merchants' Exchange of St. Louis, held on the 11th of September, 1874, the following resolutions were adopted:

"The Union Merchants' Exchange of St. Louis, believing that it is not only eminently just, but also a solemn duty that appropriate tributes of respect should be at all times paid to those who perform their allotted duties in life, and realizing that an imperious obligation rests on those who survive to bear full testimony to the virtues of the departed, whose examples are worthy of all imitation and praise, so that the bright mem-

of his illness his mental
clouded, and he recalled

eries of these virtues may speak with an ever-living force and influence to the community which deplores and mourns for the lives of those who are dead;

"Therefore, in view of the great loss under which our city is now suffering by the death of Henry Von Phul, whose sixty-three years of business life were spent in this city of his adoption, and whose entire social, domestic, and commercial career was marked by the highest order of integrity, untiring industry, and a general kindness and purity of character which seemed to shed a benign and happy influence on all around him; it is

"*Resolved*, That in the death of Henry Von Phul, the oldest merchant of our city, whose integrity, enterprise, purity, and single-heartedness constitute a memorial consecrated by the hearts and judgments of those who knew him best, we, while bowing reverentially to the rule of Providence in this deprivation, yet may be permitted to mourn the loss of one so near and dear to us.

"*Resolved*, That we tender our heartfelt sympathies and condolence to the bereaved family of our departed friend, with an assurance that the example he furnished in his domestic, social, and commercial life has been highly appreciated by his fellowmen, and will be treasured in their memories forever.

"*Resolved*, That, as a token of respect to the memory of the dead, the hall of this Exchange be draped in mourning for the next thirty days.

"JAMES E. YEATMAN.
"S. M. EDGELL.
"GEORGE G. WAGGAMANN."

His portrait was presented to the Merchants' Exchange in St. Louis after his interment, and the following is a contemporary account of the proceedings on this occasion:

"Yesterday noon Mr. Web. M. Samuel, president of the Merchants' Exchange, called the members to order, and announced that a number of the old friends of the late Henry Von Phul desired to present to the association a full-length portrait of him, painted by Mr. Conant. Mr. Samuel introduced Hon. Lewis V. Bogy to the meeting, who made the following address in behalf of the gentlemen presenting the portrait:

"*Mr. President and Gentlemen of the Union Merchants' Exchange of the City of St. Louis:*

"No duty has ever before been imposed on me in which more heartfelt satisfaction was experienced than the one I am now called upon to fulfill. If it is a duty to speak with charity of the dead, and as far as is consistent with truth to throw a veil over acts which at the time of their occurrence were liable to be construed differently, it is yet a higher and nobler duty to give to the dead the just commendation which their acts and deeds during their lives justly entitle them to; for this at last is the only reward which this world can give. Viewing the long life of great usefulness of our departed friend, Henry Von Phul, from this stand-point, it would not be difficult if the occasion made it proper to say much in merely enumerating the incidents of his long, laborious, and eventful life, as a citizen of great public usefulness, and always ready and willing to discharge any duty devolving upon him in that capacity, as a merchant of remarkably long duration, and during all the time enjoying the highest standing among his associates, as a husband of most exemplary conduct, and as a father whose love and devotion to his children was without bounds. In speaking of so good a man as Mr. Von Phul was known to be by all his contemporaries, I am afraid to be drawn into language which might appear like undeserved praise. Yet, speaking to the merchants of this city, with whom he has been intimately associated for upwards of threescore years, no language could sound like fulsome praise; and yet he was so well known and so highly appreciated by the body of merchants of this his adopted city that but little new can be said to them. Although this was his adopted city, yet but very few of its native citizens can boast of a longer residence here than he, for he came here as early as the year 1811, when this present great State was then under the first rule of Territorial government, and when this present large and flourishing great city was the home of a small number of French inhabitants, who had been American citizens only about eight years. It was in the midst of these primitive people that he cast his lot for life, and from that early period, through all the vicissitudes and changes, both political and social, which have transpired he retained the high regard and esteem of the three generations with whom he associated socially and as a business man; never during this long period of time giving occasion for any one to entertain a doubt as to his truth, honesty, sincerity, fidelity, charity, and, indeed, I may say, generosity. Yet he was firm and decided in all business matters as well as in all the relations of life, and amiable without the slightest sycophancy, firm without being dictatorial, pursuing the even tenor of his way, and fulfilling all the obligations devolving upon him with a scrupulous devotion, an unswerving fidelity, and the most delicate integrity. A sense of duty to the memory of this singularly good man compels me to relate an incident of his life which of itself will be a key to the whole of it. When a few years ago he found himself most unexpectedly overwhelmed by pecuniary embarrassments, and he saw the honest accumulations of a long and laborious life, amounting to perhaps one million of dollars, swept away from him, he honored me with his confidence,—for I feel it to be an honor to be thought fit to give counsel to one of his experience and intelligence. After telling me the probable amount of his liabilities, he said he had property enough to pay everything and everybody and desired his large estate so to be placed legally as to effect this object, desiring to pay all and everything although it might leave him at his advanced age, being then upwards of fourscore and ten, without a cent. I requested time for reflection as to the mode of effecting his object. Knowing that the bankrupt law might interfere with his well-meant intentions, I called the next day and a plan was adopted. I then stated to him that, knowing his high standing and the peculiar hardship attending his embarrassments, application should be made to his creditors to abandon the interest on the deferred payments which he proposed to make. With dignity, but showing a good deal of feeling, and with the blood coloring his generally mild face, he sternly and positively said that under no circumstances would he ask his creditors to give up one cent of principal or interest if there was property enough to pay; he was determined to do it regardless of the fact that he might be left without one cent; and then and there he particularly directed me to make no such application to the creditors, and, to my surprise, at the meeting of the creditors he presented himself, so that this proposition should not be made as it was my intention to have done. The question of interest would have made a difference of upwards of fifty thousand dollars in his favor. This determination to pay principal and interest was not from mere empty pride or love

of appearance, or to gain the esteem of the world, for it was up to this time a secret between us, but was from a high sense of moral obligation. This one act, gentlemen of the Exchange, is enough to give you a correct insight into the character of your departed brother. Of him you have a just right to be proud, for he was an ornament to your honorable body, and his memory should be cherished by you and your successors as a jewel of great value. This beautiful and correct portrait of our departed friend, the work of our esteemed fellow-citizen, Mr. Conant, I am directed, Mr. President, to present to the Merchants' Exchange of St. Louis, as a gift of a few of the old friends and associates of your departed brother and fellow-member, Henry Von Phul, who, after a long life of great usefulness in this city as a merchant, departed this life on the eighth day of September of this year, at the advanced age of ninety years, surrounded in his last moments by the worthy woman who had been his companion for upward of half a century, by his sons and daughters, and grandsons and granddaughters and great-grandchildren. It is the wish of the friends who make this present to your association that this good likeness of their late associate should remain suspended in this hall as an object of love and veneration, not only by his contemporaries, but by those who will in after-times visit this place of trade and commerce.

"In conclusion, Mr. President and gentlemen of the Exchange, permit me to say that the last years of the life of this good man were yet more worthy of admiration than those of the period of his more active and busy life. Calmly and with a most perfect composure he looked back on his long life and saw nothing to regret, and with a humility sublime in its simplicity he thanked God for the favors he had received during his long stay in this world, and with a high religious hope he pressed to his bosom the cross which had been sent to him late in life, and thus he prepared himself to leave the world and its troubles, its cares and its anxieties, and begin the journey of eternity. Fully prepared and fully conscious of his duties and his responsibilities to his Maker, he died full of religious hope and with all the sweet consolation of the Catholic religion.

"Mr. Web. M. Samuel, president of the Exchange, responded as follows:

"*Col. Bogy and Gentlemen:*

"It affords me great pleasure in behalf of the members of the Union Merchants' Exchange, to accept from you this portrait of the late Henry Von Phul, an old and honored merchant of our city, and to return to you their sincere thanks for the gift of this beautiful work of art. I can assure you that it will be prized by our members, not only as an ornament to this chamber and to the more magnificent one which we expect soon to enter, but as a faithful image of one whose character is worthy of their emulation and ambition. The universal expression of sympathy and sorrow at the death of Mr. Von Phul, which is still fresh in our memory, the more than customary honor paid by this Exchange and by our citizens generally at his funeral services, attest more eloquently than any words which it is in my power to command how highly they appreciate the life of a man who, although not distinguished for any brilliant deeds, yet achieved that which is worthy of the highest renown, a character founded upon public and private virtue. The feeling of admiration for such a life and character springs from the highest and purest impulse of the heart. We trust that this speaking likeness of this good man will keep bright in the memory of all those who frequent this busy mart of trade the principles of integrity and rectitude in all the walks of life which have commanded the admiration and love of those who knew him through a long and eventful life."

That portrait still hangs in the Merchants' Exchange of St. Louis, and the honest face of their dead brother is to-day an incentive to the crowd of merchants there assembled to deeds of daring for their city, and to vigorous, honest endeavors to maintain its reputation for commercial integrity.

The first ordinance was one "prescribing the emblems and devices of the common seal of the city of St. Louis." It provided "that the device for the common seal of the city of St. Louis shall be a steamboat carrying the United States flag, and the seal of the said city shall be so engraved as to represent by its impression the device aforesaid surrounded by a scroll inscribed with the words, 'the common seal of the city of St. Louis,' in Roman capitals, which seal shall be circular and not more than one and a half inches in diameter."

The first license was levied on dogs. Among the earlier ordinances were two for the prevention of unlawful gaming, and to prohibit the running of horses in the streets of the city. An ordinance was also passed providing "that a person of known ability, discretion, and knowledge be appointed by the board of aldermen as a street commissioner within the city of St. Louis, who shall be *ex officio* superintendent of the streets, and whose tenure of office shall be one year."

John Bobb was appointed to fill the office, but as he refused to accept, Joshua C. Laveille was substituted. David E. Cuyler was appointed notary public for the county of St. Louis. There being a vacancy in the board of aldermen, Joshua Barton was elected, but as he was killed shortly afterward (July 2, 1823) in a duel with Thomas C. Rector, Joseph V. Garnier was chosen to fill the vacancy. At a meeting of the board of aldermen held July 10th appropriate resolutions concerning the death of Mr. Barton were adopted, and they resolved to wear crape on their left arm for one month, in "testimony of their exalted respect for his memory."

An ordinance for the grading of "Main and Locust Streets" compelled the inhabitants to pave sidewalks in front of their lots. The trustees before the act of incorporation by the Legislature had made several futile attempts to improve and pave the streets, but the neglect of the inhabitants had rendered them abortive. The "unfathomable mud of St. Louis" was, according to a letter of that date, fit "only for a frog or a tortoise."

The location of streets, lanes, and alleys was provided for by an ordinance approving the report of the jury selected to inquire into "the true situation of the streets and lanes and alleys of the city," and adopting "the same as the principle upon which the said streets, lanes, and alleys shall be permanently

fixed." It was also ordered by the board that the city surveyor "shall within six months from this time place or cause to be placed in the centre of the intersection of every two streets of the said city a cedar post four inches square and eighteen inches long, the top of which post shall be even with the surface of the street, and it shall be the duty of the city surveyor to return to the board of aldermen a plat of the city."

The report under this resolution was as follows:

"The committee to whom was referred the resolution by which the jury on the subject of the streets and alleys in the city of St. Louis has been selected beg leave to report that they have had the subject under consideration, and recommend to the jury the adoption of the following general principles as the basis of their report to the mayor and aldermen:

"1st. That they are of opinion that all the streets running north and south were originally laid out and ought to be thirty-six French feet wide; that the cross streets, or those running east and west, were laid out and ought now to be thirty feet wide, like measure.

"2d. That although they are of opinion the above are the just dimensions of the said streets, yet, as many valuable buildings and other permanent improvements of ancient date have been made so as to encroach on those dimensions, they cannot now be removed, but ought to be left in the occupancy and possession of their respective owners until they be destroyed by time and accident or removed by the proprietors, in which case they recommend to the city authorities to restrain owners of lots from again encroaching on the limits of the streets as above set forth. Also, that no lot-owner in the said city be hereafter permitted to build or fence so as to leave less width to the streets than that above mentioned.

"3d. In all cases where there are no valuable and lasting improvements made prior to the 20th of December, 1803, to prevent the opening of said streets to the size aforesaid, that the same ought to be done; that the general dimensions of the squares or blocks of lots in said city are two hundred and forty by three hundred feet, French measure; that the market square as well as that whole range of lots is larger, being three hundred feet square; that the square on which Peter Chouteau resides, as also that where Dr. Saugrain resided, are likewise larger than the common size; that it is believed that the generality of lot-owners had concession for their lots of the aforesaid dimensions, and that the possession taken since the 20th of December, 1803, of such as have no concession, order, or warrant of survey ought to correspond to the aforesaid limits.

"4th. That the market square and that whereon Col. Chouteau resides be assumed as the basis of a survey of plats of said city; that in taking said squares for the basis of survey the course of the front wall of Col. Chouteau, if necessary, ought to be so altered as to give a straight direction to the western edge of the front on Main Street as far as practicable.

"5th. The committee are therefore of opinion that it is impracticable at the present time to make the city conform to the plat made of the same, and submitted to the jury by the city surveyor, and that the said surveyor ought not to be considered as the legal surveyor thereof.

"6th. That, not being immediately chosen by the inhabitants of the city, the committee are of opinion that the jury ought merely to ascertain facts for the information of the mayor and aldermen, leaving them to cause the survey of the city to be made, and the limits of the streets and alleys to be fixed and designated.

"Adopted, St. Louis, July 5, 1823.

"A. McNair.	Antoine Chenie.
"Aug. Chouteau.	Ant. Soulard.
"Jeremiah H. Connor.	Geo. Morton.
"Wilson P. Hunt.	M. P. Leduc."
"Bernard Pratte.	

The administration of Dr. William Carr Lane from the beginning of his term of office was an able one. On the 9th of June, 1823, the board of aldermen passed an ordinance allowing him for his services for the year commencing the 14th of April the sum of three hundred dollars, payable semi-annually, including office rent. Though this salary was small, he applied himself earnestly to the duties of his office, and manifested a zeal and judgment which were inseparable from his character, and which secured to the city the benefit of proper municipal regulations.

At the election for city officers held on the 5th of April, 1824, the following officers were elected: Mayor, William Carr Lane; Aldermen, from the South Ward, Matthew Kerr, Joseph C. Laveille, J. L. Sutton; from the Middle Ward, Bernard Pratte, Joseph V. Garnier, Hugh Richards; from the North Ward, Pierre Chouteau, Sr., John Shackford, David V. Walker.[1]

It will be observed that none of the former aldermen were re-elected except Messrs. Garnier and Pratte. Most of them refused to be candidates, the office imposing considerable trouble and responsibility without any emolument. No one offered for the mayoralty against Mayor Lane. Ordinances prohibiting the burning of bricks or tiles within the limits of the city, increasing the mayor's salary to six hundred dollars, compensating the treasurer for his services with a commission of one per cent. upon all moneys paid into the treasury, confirming the survey of the city by R. Paul,[2] made in accordance with the ordinance of

[1] Upon the death of Mr. Walker, William K. Rule was elected.

[2] René Paul was born at San Domingo, of French parents, and was educated in France. In early youth he was a lieutenant in the French navy, and at the memorable conflict of Trafalgar evinced great courage and daring. He soon after emigrated to the United States, and in 1809 settled in St. Louis, where his conduct soon won for him the esteem of the community, and in a short time he married the daughter of Col. Auguste Chouteau. Mr. Paul filled some of the most important offices of the town and city of St. Louis, and acted for years as its civil engineer. He was also for many years employed in the capacity of civil engineer, to make some of the most important surveys of the government in the Indian Territory, under circumstances of great difficulty and danger. He died May 20, 1851.

Mr. Paul's brother, Gabriel Paul, was born in the city of Cape François, San Domingo, in 1781. His father, Eustache

July 10, 1823, and for its preservation, and laying out a street on the bank of the Mississippi were passed. John K. Walker was elected sheriff of St. Louis in 1826, and being re-elected at the end of his term filled that office for four years.

William Carr Lane was re-elected in 1825, with Philip Rocheblave, Hubert Guion, Elisha S. Beebe, Louis T. Honore, Jacob Hawkens, Pierre Chouteau, Joseph Charless, Sr., Hugh Richards, Alfred Skinner, Charles Bosseron (in place of Alfred Skinner, resigned), aldermen.

At the municipal election held in April, 1826, the following city officers were elected: Mayor, William Carr Lane; assessor, Peter Ferguson; aldermen, North Ward, William K. Rule, Thornton Grimsley, and Asa Wilgus; Middle Ward, Henry Von Phul, Archibald Gamble, Joseph V. Garnier; South Ward, Joseph C. Laveille, Thomas F. Riddick, David B. Hill.

Paul, a native of France, had settled in the island some few years previously, and was in prosperous business. In the year 1792, Mr. Paul, Sr., sent his wife and family to Paris for the education of their children. At the insurrection of the blacks and conflagration of the city and plantations in June, 1793, E. Paul, Sr., left the island in a small vessel, with as many as could crowd on it, for Philadelphia. He died on the passage, with others, from exposure and privations, and was buried at sea.

Mrs. Paul and the children continued to reside in Paris for nearly three years, and emigrated to the United States in 1802. The oldest daughter was married in Paris in 1801, to Fleury Genereilly, of Lyons, who brought the family over, and in subsequent years removed to New Orleans, where, after a residence of many years, he died, leaving several children residing in that city. Two of the Pauls, Gabriel and René, came to St. Louis, and both were prominent in their day. They married cousins, the daughters of Auguste and Pierre Chouteau. Capt. Gabriel Paul arrived in St. Louis from Baltimore in 1817, and was united in marriage to Miss Marie Louise Chouteau by the Right Rev. Bishop Dubourg on the 30th of March, 1818. The youngest sister of the Pauls was married in 1808 in the city of Baltimore, and died there in 1834. Her only daughter was the late Mrs. Henry Chouteau, of St. Louis.

Capt. Gabriel Paul left one son, Adolphe Paul, who died in March, 1882, and two daughters, Mrs. George R. Taylor and Mrs. Richard W. Ulrici.

Mrs. Gabriel Paul at her death in 1832 left a very large estate, being one-seventh of the immense landed property of Col. Auguste Chouteau. After the death of his wife Capt. Gabriel Paul, by his judicious management of her estate, added to the great increase in the value of real estate in the interval and his own acquisitions, had so increased his estate that at the period of his death, 1847, each of his three children came into possession of large wealth.

Capt. G. Paul built the original hotel on the spot now occupied by Barnum's Hotel, which for long years was known as the Paul House.

Adolphe Paul left a widow and two children,—a grown son by the first wife, Miss Mary Reed, and a young daughter by his second wife, Miss Menkens, a niece of the late Wilson Primm.

The naming of streets was the subject of an ordinance passed in this year. Since 1809 all the streets running east and west, with the exception of Market Street, had been known by the letters of the alphabet. Market Street was the dividing line between north and south, and the next streets on either side were known as North A and South A, and so on. The French names of streets were retained until 1809.[1]

William Carr Lane was re-elected mayor in 1827, with Christopher M. Price, Edward Charless, Frederick L. Billon, John D. Daggett, Wm. K. Rule, John Mullanphy, John L. Sutton, David B. Hill, and Joseph C. Laveille, aldermen.

For the erection of a market and town hall, ordinances were passed in 1827 creating a loan of thirteen thousand dollars for the building, to be situated on the old *Place d'Armes*, between Market and Walnut Streets. Ordinances were also passed for the paving and grading of Chestnut and Olive Streets from Front Street to the river, and for the widening of "that part of Market Street between Main and Fourth Streets sixteen feet, by adding to it four feet on the north and twelve feet on the south, thereby making the whole width forty-eight feet one inch, English measure," as well as for grading and paving part of Pine Street. The city officers in 1828 were William Carr Lane, mayor; John Smith, John L. Sutton, Jabez Warner, Michael Riley, Samuel Hawkens, Frederick L. Billon, George Kennerly, Joseph C. Laveille, and Edward Charless, aldermen. During this year the grading and paving of Fourth Street were provided for "in the manner following, to wit:" Beginning at the southwest corner of Block No. 34; thence southwardly, of the width of forty feet, and in continuation of the eastern edge of Fourth Street, as laid out in Lucas' and Chouteau's additions, to Plum Street; thence in a direction parallel, or nearly so, to Third Street, in such a manner as that the blocks or squares between Third and Fourth Streets be nowhere less than three hundred feet, French measure, in depth, to Lombard Street; and the city surveyor is thereby directed to survey the said streets accordingly, and to affix the necessary landmarks."

The street commissioner was directed to "proceed without delay to graduate and pave that part of Second between Vine and Olive Streets, according to the requisition and provisions of an ordinance for graduating and paving of Olive Street, approved June 23, 1827."

The offices of city surveyor (created in June, 1823) and street commissioner were united by ordi-

[1] Edwards' "Great West."

nance in 1829, and the work of laying out and widening Fourth, Fifth, Sixth, and Seventh Streets continued. Mayor William Carr Lane retired from the mayoralty, and was succeeded by Daniel D. Page, with John L. Sutton, Hubert Guion, Herman L. Hoffman, Edward Charless, Joseph C. Laveille, Thomas Cohen, Michael Riley, John Mullanphy, George H. Kennerly, and Jabez Warner, aldermen. The paving and grading of streets was continued. Seventh Street was extended to the northern boundary, and Fourth Street was graded from Market to Lombard Street, and Second Street between Olive and Vine; a part of Locust Street was also graded and paved. Dr. Robert Simpson was re-elected sheriff over Frederick Hyatt.

On the 9th of June, 1829, Archibald Gamble, county commissioner, and Jabez Warner, Thomas Cohen, and John L. Sutton, street commissioners, gave notice that sealed proposals would be received "for turning an arch bridge across Mill Creek at the foot of Second Street, this city," and in March, 1830, an ordinance was passed for the erection of a bridge across Mill Creek at the intersection of Fourth and Fifth Streets.

The amendments to the city charter passed Jan. 15, 1831, provided for the appointment of an assessor, exempted the people of St. Louis from working on any road outside of the city, gave power to regulate, pave, and improve streets, to take a census, to impose taxes and licenses, and to annex outlying tracts of land to the city under certain forms.

At the election in 1830, Daniel D. Page was re-elected mayor, and Edward Dobyns, Herman L. Hoffman, John D. Daggett, William K. Rule, Edward Charless, Thomas Cohen, Joseph C. Laveille, Elkanah English, and Hubert Guion, aldermen.

Again, in 1831, Daniel D. Page was re-elected mayor, Michael Rourke, John Piggott, Robert Simpson, Colton M. Tabor (to fill vacancy of John Piggott, deceased), Edward Charless, Joseph C. Laveille, Peter Ferguson, Jesse Colburn, Robert N. Moore, Hugh O'Neil, Solomon P. Ketchum, and Edward Dobyns, aldermen.

Daniel D. Page, the second mayor of St. Louis, was born March 5, 1790, in Parsonsfield, York Co., Me. Having procured a limited education, he found employment in a store in Portland, and also learned the trade of baker. Shortly afterwards he removed to Boston and established a bakery. Having married Miss Deborah Young, of Boston, he emigrated West, and finally established himself in the tobacco trade in New Orleans. The health of his wife having begun to fail in the new climate he sold his stock of goods, and in 1818 removed to St. Louis, where he entered the grocery business, and afterwards added a bakery. In 1833 he established the first steam flour-mill erected in the city. In all his business affairs he was eminently successful, and soon became one of the largest landowners in the city. In 1829, as previously stated, he was elected mayor, and during his administration the affairs of the city were so well managed that he was re-elected four consecutive terms. He was one of the incorporators of the Boatmen's Savings Institution and of the Pacific Railroad, and aided largely in the construction of the Ohio and Missis-ippi Railroad. In connection with Henry D. Bacon, he established the banking-house of Page & Bacon, a full history of which is given elsewhere. Mr. Page died in Washington, D. C., April 29, 1869.

The Broadway Market in the North Ward was built in 1831, and the city water-works provided for by an ordinance authorizing "the mayor to borrow, on behalf of the city, twenty-five thousand dollars at any interest not exceeding six per cent. per annum" for that purpose, and "to pledge the revenues of the city, the water-works and their appendages for the payment of the principal and interest." The war on the dogs, inaugurated by the first board of aldermen, was vigorously continued by an ordinance requiring

"that all dogs kept in the city shall be registered on the books of the city register on or before the 15th of July, and wear brass collars with their owner's name engraved upon them; that each family of the city be allowed to keep one dog thus registered, etc., free of tax, and for every extra dog a tax of two dollars shall be paid; that any person who shall suffer a dog to remain about his premises which is not thus registered and accoutred shall be subject to a penalty for every such offense of ten dollars."

The salary of the city auditor was fixed at two hundred dollars a year, and the treasurer at one hundred dollars. The registration of all carts and drays was also provided for by ordinance. During the year John R. Walker was re-elected sheriff over James C. Musick, David E. Cuyler, and George M. Moore, and John Bobb was elected coroner over Jesse Colburn and Thomas Hobbs. Considerable improvement in the streets began to be visible, and Third Street was widened, graded, and paved.

At the election in April, 1833, for municipal officers Dr. S. Merry was chosen mayor by a majority of 36 votes: for Merry, 304 votes; for Pratte, 268 votes.

In the South Ward, Robert Simpson, S. Blood, and Caleb Lockwood were elected aldermen; in the Middle Ward, Joseph C. Laveille, Peter Ferguson, and Edward Charless; and in the North Ward, Edward Dobyns, H. O'Neal, Jr., and Robert Moore.

M. P. Leduc and Josiah Spalding, in the Middle Ward; Edward Bates and J. P. Riley, in the South

Ward; C. Campbell and H. O'Neal, Sr., in the North Ward, were elected school trustees.

The election of Dr. Merry was contested on the ground of unconstitutionality, he being at the time of election a United States receiver of public moneys. The decision of the Supreme Court, rendered in October, being against his eligibility, his election was declared void, and another election was ordered by Mayor Page, who continued to act as mayor, to be held on the 9th of November, at which election Col. John W. Johnson was chosen mayor. Col. Johnson was succeeded in 1835 by Hon. John F. Darby, "a young, efficient, enterprising, and energetic man," under whose administration Congress was memorialized by the citizens of St. Louis for the construction of the extension of the National road through St. Louis to Jefferson City and farther western regions. In this year the initiatory steps for the great railroad convention were taken, and the sale of the "commons" was consummated, realizing more to the city than the most sanguine expectations had hoped for. Mayor Darby's first term of office was also signalized by the energetic enforcement of the law against gambling, and so vigorous was the mayor's course in this matter that there was a general exodus of the gambling fraternity.

By an act of the General Assembly of Missouri, approved Jan. 16, 1833, the city was divided into four wards, the boundaries of which were to be fixed by the mayor and board of aldermen, and authority was given to establish other wards whenever, in the opinion of the authorities, the interests of the inhabitants required them. All acts relating to St. Louis were declared public laws, and to be recognized as such in all courts and places, without requiring proof other than that regarding other public laws.

By ordinance of March 10, 1834, the city was divided into four wards, bounded as follows:

"All that part of the city which lies south of Elm Street shall constitute one ward, and shall be denominated the 'First Ward;' all that part of the city which lies north of said Elm Street and south of Pine Street shall constitute one ward, and be denominated the 'Second Ward;' all that part of the city which lies north of said Pine Street and south of Laurel Street and Washington Avenue shall constitute one ward, and be denominated the 'Third Ward;' and all that part of the city which lies north of Laurel Street and Washington Avenue shall constitute one ward, and shall be denominated the 'Fourth Ward.'"

The act approved Feb. 26, 1835, to incorporate "the inhabitants of the town of St. Louis," after enlarging the limits of the city, constituted it a body politic under the style of the "mayor, aldermen, and citizens of St. Louis." This charter enlarged the powers of the corporation, and greatly extended the corporate duties.

In accordance with the provisions of the charter the city was divided into four wards, for each of which three aldermen were to be elected, in whom with the mayor were vested all the powers of the corporation. The mayor was to be elected for one year. He was to be at least thirty years of age, a citizen of the United States, a resident within the city for at least two years preceding his election, possessing a freehold estate within the city, and not to hold at the time of his election any office of honor, trust, or profit under the United States. The Revised Ordinances, prepared by Wilson Primm, provided a complete code of laws for the government of the city, prescribing the duties of the register, the mode and manner of holding city elections, and for registering free negroes and mulattoes; for gauging and inspecting domestic liquors; for the inspection of flour, beef, pork, etc.; for weighing hay and stove coal; for the suppression of riots, routs, etc.; concerning the police; registering and restraining dogs; providing fire-buckets; restraining hogs; concerning breaches of ordinances; establishing a treasury department; regulating wagons, carts, drays, and carriages; establishing the health department; appointing a city attorney and a night-watch; suppression of gambling; restraining the assembling of negroes and mulattoes; regulating the revenue and taxes; regulating the water-works, regulating the harbor of St. Louis; establishing quarantine and vaccination; lighting the city with gas; regulating the care and improvement of streets and highways, city market, etc.

John F. Darby was re-elected mayor in 1836 and 1837. In 1838 he was succeeded by Dr. Wm. Carr Lane.

In 1836 the ordinances were printed in pamphlet form. In 1838 the ordinances passed since that revision were printed in pamphlet form, but few copies of these are now to be found.

The first ordinance was supplementary to an ordinance regulating the harbor of St. Louis. If goods were allowed to remain ten days on the harbor they were to be disposed of by the harbor-master, and the owner to pay a fine of five dollars per day.

On Aug. 23, 1837, an ordinance was passed authorizing the mayor to borrow one hundred thousand dollars of Martin Thomas at seven per cent. interest. On payment made to the treasurer of the amount he issued to the lender as many certificates of one thousand dollars each as would amount to the sum paid to him, and the certificates were not redeemable until Dec. 1, 1852. For the payment and redemption of

each of the certificates the faith and revenue of the city was pledged irrevocably.

By ordinance St. Louis cemetery was located in Block 3, bounded by Almond, Spruce, Levee and Main Streets, and was in five divisions, marked off with stones as follows: Family burying-ground, citizens' burying-ground, paupers' burying-ground, and the people of color's burying-ground.

The assessor, in addition to his other duties, used to take the city census, for which he was allowed an extra one hundred dollars.

In 1838 politics in St. Louis were very animated, and the Whigs organized a Vigilance Committee composed of the following:

Samuel Gaty, E. T. Christy, John Goodfellow, J. A. Sire, George Sproule, L. A. Cerré, John Lee, I. A. Letcher, John Calvert, Asa Wilgus, William G. Pettus, Stuart Matthews, O. Paddock, Bernard Pratte, John R. Shaw, August Kerr, A. Gamble, H. N. Davis, J. T. Sweringen, B. Cleland, C. Rhodes, C. P. Billon, William Whitehill, Edward Brooks, George Morton, John Finney, John Leach, S. M. Strother, Charles Collins, John Barclay, J. B. Sarpy, J. S. Pease, J. H. McMillen, D. Tilden, George Corwin, D. B. Hill, William Martin, J. B. Lesperance, James F. Comstock, L. Dumaine, N. E. Janney, William A. Lynch, A. G. Edwards, T. H. West, Edward H. Beebe, Benjamin Ames, T. S. Wilson, George Trask, John Barnes, John Simonds, Jr., Henry Maxwell, William Morrison, Alfred Tracy, Dennis Marks, John Ford, J. W. Paulding, P. A. Berthold, C. D. Burrus, M. Stitz, William Hayward, Jotham Bigelow, L. B. Shaw, J. B. Girard, J. J. Anderson, Lewis Bissel, M. C. Clark, W. S. Randolph, Noah Ridgely, Lewis Clark, George Knapp, Hiram McKee, Edward Chouteau, L. Farwell, William Risley, Daniel Smith, J. Christy, John Young, John Bingham, H. A. Carstens, H. Papin, George W. Lewis, John P. Morris, Samuel Daniels, Jonas Moore, Henry Phillips, P. Bartlett, John D. Dagget, Conrad Foulk, Richard B. Dallam, John Lux, Lewis Newell, William Andrews, J. Pritchett, John McDonald, Robert S. Freeland, N. C. Studley, George H. Callender, John Bobb, and D. H. Chapman.

The salaries paid to the municipal officers in 1838 were but a pittance compared with the amount now paid, though it must be remembered there was also as great a contrast in the actual amount of work required. Then the mayor was paid $800 per annum; now the salary is $5000 per year. The aldermen were paid two dollars and the president of the board three dollars for each meeting which they attended. All fines against absent members were placed in a fund to be used in giving a dinner. The city register received but $800 per year, and if there were any deputies their salaries were not mentioned; the city register at present is paid $3000 per annum for his services, and he appoints a deputy at $1500, a chief clerk at $1200, one clerk at $900, and as many others as may be needed at $750. In old times members of aldermanic committees were paid one dollar and fifty cents per day when serving only, and the chairman two dollars. The clerk of the market was paid $400 for a year's work. The auditor received only $600, which was increased to $800, Dec. 7, 1838; now that official receives $3500 per year, his deputy $2000, and he employs as many more clerks as necessary, subject to the approval of the mayor. The treasurer managed the financial affairs of the city in 1838 and took care of the funds for the small consideration of $400 per year for his services; now that official gets $4000 per annum, his assistant $2000, teller $1500, and he has as many clerks as he needs to carry on the work of the office.

The city attorney received a salary of only $400 yearly. The health officer's salary was only $700 per annum, and he had to do all the vaccination besides. The city surveyor was paid $800 per annum for his services.

The police force was very small, and an ordinance was passed to appoint "a theatre policeman," but he was not paid by the city. The rules were strict, the fines heavy, and he received his remuneration from this source and the proprietors.

July 17, 1838, the mayor was authorized to execute a deed of trust to St. Louis County for block No. 80, on the St. Louis commons, on which to erect a poor-house.

Another ordinance of interest was that which related to the opening of Pine Street between Third and Fourth, passed first Oct. 9, 1832. The damages to aggrieved persons were appraised by a jury of twelve. A former ordinance to widen Fourth Street to eighty feet occasioned a protest by the president and directors of the St. Louis public schools as being prejudicial to the interests committed to their charge, as some of the ground was school land. On this account the bill was repealed.

The night-watchmen, but few in number, were required to stop all persons found in the streets after ten o'clock to inquire their business, and, if necessary, to escort them to their homes, if they had any, and if not, to lodge them in the watch-house until an early hour next morning.

The following clause is rather peculiar reading now:

"It shall be the duty of the night-watch also to apprehend all slaves that may be found in the streets, lanes, or alleys, or on the private property of persons other than their owners, or the persons under whose control they are at the time, after the hour of nine o'clock at night from October 1st to April 1st, and after ten P.M. from April 1st to October 1st."

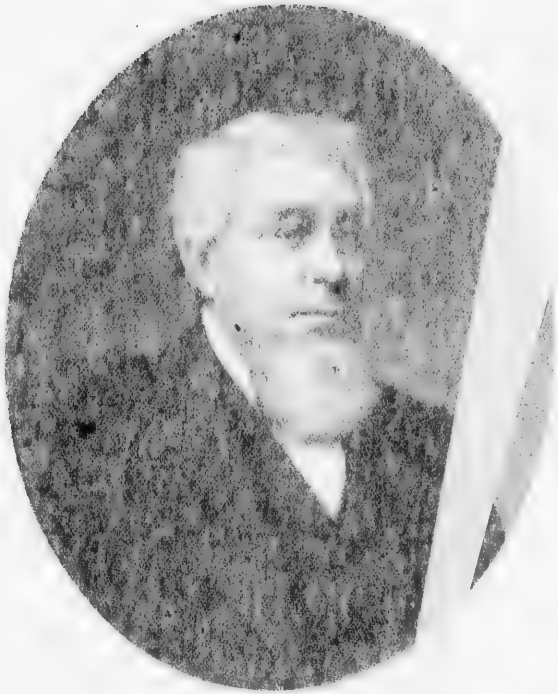
The owner had to pay a fine of three dollars, or else the slave received not exceeding twenty-five lashes, "well laid on."

The mayor's proclamation of this year gave notice to masters of slaves that "the recent extensive distribution in this city of incendiary abolition newspapers, tracts, and pictures, effected secretly in the night-time by casting packages into yards and other places where they would be found by servants, compels all officers who are concerned in maintaining the public peace to deny the colored people some of their usual privileges until those enemies of the human race the abolitionists (who have evidently done this deed) are discovered and dealt with according to law."

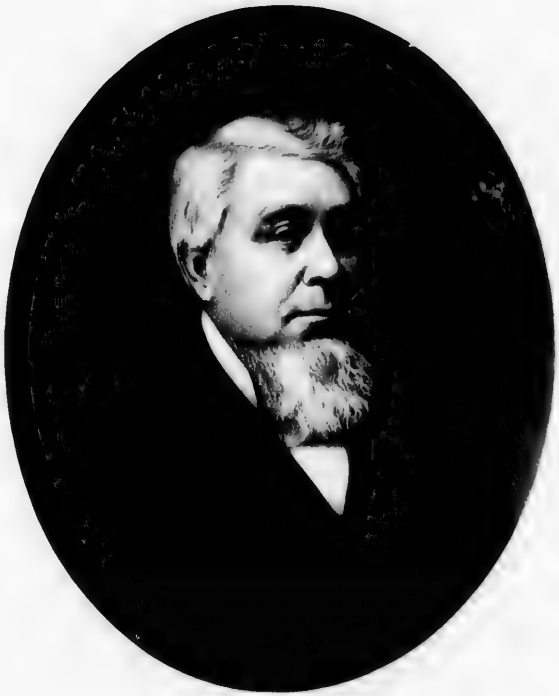
It closes as follows: "The usual permits from this office to colored people for social parties and religious meetings after night will be withheld until information is given of the hiding-places of the incendiaries, which must be known to some of our colored people."

By the act to incorporate the city of St. Louis, passed by the General Assembly of Missouri, Feb. 11, 1839, the corporation boundaries were defined as follows: "Middle main channel of the river, due east of the mouth of Mill Creek; thence due west to the mouth of said creek; thence up the centre of the main channel of said creek to a point where the southern side of Rutger Street produced shall intersect the same; thence westwardly the southern side of said street to the intersection of the same with the western line of Seventh Street produced, northwardly along western line of Seventh Street to north line of Biddle Street; thence eastwardly with the northern line of Biddle Street to the western line of Broadway; thence northwardly with the western line of Broadway to a point where the southern boundary of survey No. 671 produced shall intersect the same; thence eastwardly along the south boundary of said survey to the Mississippi River; thence due east to the middle of the main channel of the Mississippi River; thence down with the middle of the main channel of the river to the place of beginning."

This city charter of 1839 relieved the judges of election from much doubt and difficulty as to the proper qualifications of a voter. Its requirements were very explicit. The voter must be a citizen of the United States, he must be twenty-one years of age, must have resided in the city twelve months next preceding the election, and must have paid a city tax within a year next preceding such election. Nothing was to be regarded as a tax except a regular assessment upon persons and property made taxable by law for State purposes, or the tax upon licenses to auctioneers, merchants, retailers, grocers, taverns, ordinaries, bankers, brokers, peddlers, pawnbrokers, and money-changers. The name of the voter was to be indorsed upon his ballot. Inhabitants of the State, but residing out of the city, who owned a freehold estate within it, and who had paid a tax within twelve months preceding, were allowed to vote at any election in the ward where his property lay.

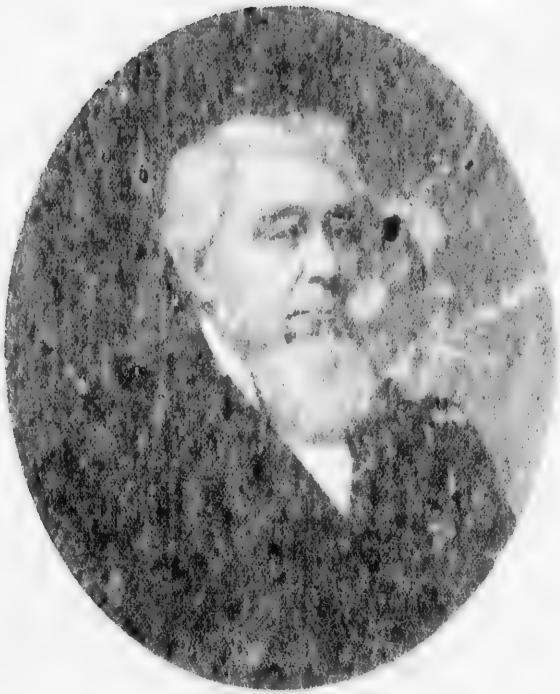


By this charter the City Council was to consist of a board of aldermen and a board of delegates. The latter was to be composed of three delegates from each ward chosen for one year, and the board of aldermen was to consist of two members from each ward chosen for two years. Four stated sessions of the Council were required to be held each year. The executive and ministerial officers were the mayor, the register, the auditor, the treasurer, the marshal, and the engineer.

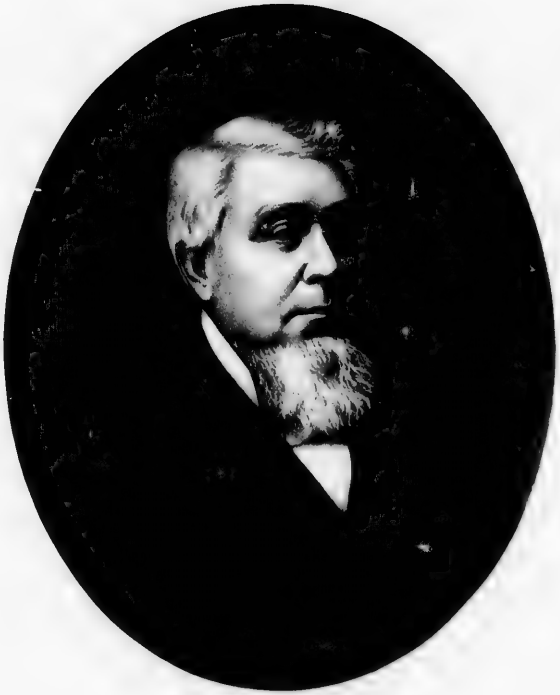


The municipal officers under the new charter of 1839 were William Carr Lane, mayor; aldermen, Benjamin W. Ayres, James G. Barry, Beverly Allen, Edward Tracy, George Collier, John B. Sarpy, John Lee, and Archibald Carr; delegates, Elkanah English, Charles Coutts, William Horine, William Glasgow, Theodore Papin, David B. Hill, Basil W. Alexander, Asa Wilgus, George Trask, George K. Budd, Abel G. Furwell, and Samuel Gaty.

In the early days of St. Louis, as has been seen, the best men in the community represented the people in the municipal councils. About 1839 no one took a more active part in building up the growing metropolis than Samuel Gaty, and the busy interest he has always manifested in the business and social affairs of the city entitles him to particular mention. Samuel Gaty was born in Jefferson County, Ky., Aug. 10, 1811. His ancestors, who were of German origin, settled in Pennsylvania before the Revolution (some of them taking part in the war) and founded the town of Gettysburg. The name was *Getty*, but when Samuel went to school his teacher wrote and pronounced it "*Gaty*," and he did not learn of the mistake until he had been some years in business for himself. The seven months' "schooling" from this teacher comprised all the educational privileges that Samuel Gaty ever enjoyed, and they were of the most primitive kind.



When he was three and a half years old his mother died, and at seven he lost his father. The family was very poor, and the boy's sole riches were those of a well-formed body, a strong constitution, and a well-balanced mind.



Just before his father's death he was "bound out" to a farmer, who cared little for the welfare of the boy, and when about ten years old the lad took his fortune into his own hands and ran away to Louisville, where he indentured himself to Prentice & Beckwith, machinists and iron founders. Here he worked under the immediate oversight of his sister's husband (who

David Gray

Daniel Gay

was foreman) for about two years and a half, until Mr. Prentice's death. Then he went with his brother-in-law into the foundry of a Mr. Richards, and a few months later, when his relative went to New Orleans, Samuel, though a lad of less than fourteen, was made foreman of the foundry, and held that position for about a year. But he was not satisfied with his attainments in the trade, and apprenticed himself for two years to Mr. Keffer, successor to Prentice & Beckwell, and during this term received three dollars a week and one hundred and fifty dollars at the end of the time. By extra work he had earned an additional one hundred dollars, so that at the end of the apprenticeship, when about sixteen years of age, he had saved two hundred and fifty dollars, a large sum in those days for a boy of his age, and this two hundred and fifty dollars was his money capital on establishing himself in St. Louis.

Upon the completion of his apprenticeship he worked for several months in New Albany, Ind., for John A. Morton, and in October, 1828, removed to St. Louis with John A. Morton, Jr., and a young Welshman named Richards. When they arrived in St. Louis there was no foundry in the city. There was, however, a frame building which parties from Cincinnati had erected with the intention of starting a foundry, but not being able to work the coal had abandoned the project. In this building, near Second and Cherry Streets, Gaty and his friends started a small foundry; but the partnership (for which Gaty furnished the cash capital) was not fortunate, and in a few months Gaty and Morton were induced to sell out to Col. Martin Thomas, who subsequently leased the works to Peter McQueen, of New York. Gaty was out of work for a while, for McQueen had a poor idea of Western mechanics and preferred (as he said) skilled men from the East, yet on two occasions Gaty showed his aptness and skill in a remarkable way. McQueen was asked to make a new shaft for the steamer "Jubilee." He said his men could make the pattern and mould one, but having been used only to a cupola, could not well melt the iron in an air-furnace. Gaty, however, undertook the job of melting the iron and got a fine casting. But it was then found that there was not a geared lathe in the city to turn the shaft with. Gaty was again appealed to, and with two cog-wheels he very soon rigged up sufficient power to turn the shaft by hand. This fertility of resource in the presence of a great emergency was a distinguishing characteristic of Mr. Gaty's career.

Towards the close of 1829, Gaty returned to Louisville and worked a while as a journeyman; but Louis Newell (one of the best blacksmiths that St. Louis ever had) had become greatly impressed with his ability, and in November, 1830, induced him to come back, with the understanding that he would assist him in building a foundry. During the winter Gaty prepared the foundation for the intended building, and in the spring he, with his own hands, dug up the fire-clay for the brick for his furnace, moulded them himself, and built the furnace, and on July 4, 1831, took the "first heat." The first castings were for Capt. John C. Swon, of the steamer "Carrolton," and were of excellent quality. The furnace was a success, and was in active use for twenty years afterwards.

Subsequently Felix Coonce became a partner, the firm being Gaty & Coonce, and later it was changed to Gaty, Coonce & Morton, next to Gaty, Coonce & Beltshoover, then to Gaty, Coonce & Glasby, and then to Gaty, McCune & Glasby. In 1849, Gerard B. Allen was admitted to the firm, which then became Gaty, McCune & Co. Later, James Collins, William H. Stone, and Amos Howe were admitted, and this firm continued until July, 1862, when it dissolved, and Gaty and McCune retired from the foundry business.

In all these changes Mr. Gaty, although surrounded by very capable men, was at the head of the establishment and was its controlling mind. He started with a little air-furnace of four tons' capacity, and presided over the development of a business which in a few years grew to enormous proportions, the foundry being in its day one of the most extensive manufacturing establishments of its class in the whole valley of the Mississippi, and occupying a whole square, bounded by Main, Second, Cherry, and Morgan Streets. Much of this block of land Mr. Gaty still owns, and it is covered with large and costly buildings.

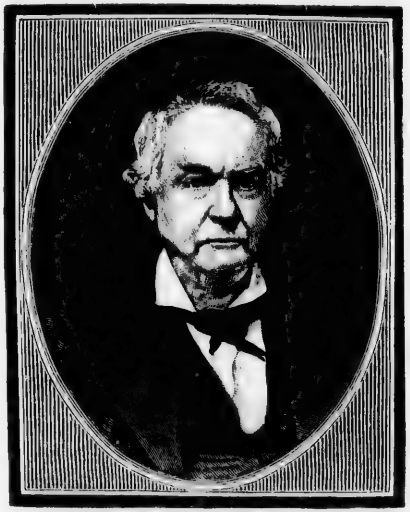
Mr. Gaty not only made the first casting in St. Louis, but he was always a pioneer in other particulars of his business. He built the first engine that was ever made west of the Mississippi, and also aided in building the first steamboat at St. Louis, the "Eagle," which plied between St. Louis and Alton. There had been an attempt at boat-building before this, but the "Eagle" was the first completed vessel. Subsequently he built many boats and had large interests on the river. Some of the finest steamboats that ever "walked the water" were his, and he was one of the originators of the Keokuk Packet Company. Not only were his boats famous, but his manufactures were known in all the cities of the West and Southwest, and it may truthfully be said that no one man, living or dead, contributed more in iron-work to build up the

proud city of St. Louis, its railroads and steamboats, than Samuel Gaty.

Upon retiring from business in 1862, Mr. Gaty became president and manager of the Western Division of the Ohio and Mississippi Railroad, and some years were consumed in getting the concern out of the financial difficulties into which it had fallen. He subsequently became president of the Hope Mining Company, which he relieved of certain heavy embarrassments, so that its mine (in Montana) is now earning money for its stockholders. This company and the St. Louis Transfer Company, of which he is president, are the most prominent of the corporations with which he is actively connected, and despite his years (for he is now seventy-one) he attends to the duties of these enterprises with alacrity, and with no less active and accurate judgment than characterized his younger days.

From 1838 to 1842, Mr. Gaty was a member of the board of aldermen and of the City Council, and assisted in much important legislation, by which many public institutions were established and permanent improvements projected for the benefit of the infant city. It was a critical period in the history of the place, for intelligence, judgment, and foresight were demanded in order to wisely plan for the growing city. Water, gas, pavements, sewers, etc., all the essentials of civilization in fact, were to be provided on a suitable scale, and Mr. Gaty's voice and vote were ever on the large and public-spirited side. None had more implicit faith in the "manifest destiny" of St. Louis, and it is now his pride, in the mellow autumn of his days, to point to the marvelous realization of his predictions.

In 1843, Mr. Gaty was married to Miss Eliza J. Burbridge, and is the father of thirteen children, eight of whom are living. The oldest son, Edward W. Gaty, is prominent in business. Theodore, aged twenty-one, is a graduate of Washington University, and is now in Montana in the mining business. Of the daughters, Emma was married to L. M. Rumsey, of the L. M. Rumsey Manufacturing Company, and Lizzie is married to S. B. Pallen, son of Dr. M. M. Pallen, a leading physician of the city. Mrs. Gaty is still living, sharing with her husband in a large and comfortable home in North St. Louis an affluence sufficient for the demands of royalty, yet employed in their closing days in a simple and unostentatious manner.



Personally, Mr. Gaty is modest, retiring, and unobtrusive, and much of the prominence he has enjoyed has been thrust upon him by his appreciative fellow-citizens. The fine mind and clear determination which he has always exhibited in public capacities prove how much better his neighbors have judged him than he himself. In April, 1881, the citizens of St. Louis paid him a beautiful compliment. Pursuant to a request of the Missouri Historical Society, he consented to have a portrait painted, and on the 21st of that month the picture (one of Covenant's masterpieces) was presented to the society by the Hon. John F. Darby, mayor of the city when Mr. Gaty was a councilman, and for fifty years his intimate friend. The portrait was accepted by the Hon. Albert Todd on behalf of the society. Both speakers eulogized Mr. Gaty in the highest degree for his innumerable services, public and private, to the city of St. Louis, and joined in regarding him as a singularly attractive example of success won by dauntless moral courage, indomitable will, and independent self-reliance, and as a character that signally deserves to be held in honor and remembrance by generations to come as one that has contributed much in a stanch and solid manner to the honor and renown of St. Louis.

In 1840 John F. Darby was again elected mayor.

John Fletcher Darby was born in Person County, N. C., on the 10th of December, 1803, and was the son of John Darby, a native of Lancaster County, Pa. The elder Darby had settled in North Carolina in his youth, and had there become a cotton- and tobacco-planter. In 1818 he removed with his family to Missouri and purchased a farm in St. Louis County, on which his son, John F., labored for five years. The youth had received the elements of an education in North Carolina, and now devoted all his spare time to increasing his stock of knowledge. About 1823 (in which year his parents died) he began the study of Latin, without a teacher, and in the intervals of farm-work learned in a single summer to enjoy the beauties of Virgil. With a hundred dollars in his pocket he returned to North Carolina, lived with his grandparents, and studied with Rev. William Bingham, of Orange County. In 1825 he began law studies at Frankfort, Ky., and pursued them for a portion of the time under John J. Crittenden, having "Tom" Marshall, the poor, erratic, brilliant orator, as his room-mate and companion.

His means failing, he obtained work at copying, studied all day and wrote half the night, obtained his license to practice, returned to Missouri, read a little law with Judge Gamble, and in May, 1827, was fairly launched in his profession, in which his success was immediate and remarkable. He was a growing man, extending his practice into new fields as years elapsed, and always with credit and profit. But the people soon began to call him to important offices

trust. He served as alderman, became a favorite stump-speaker, and in 1835 was elected for the first time to the mayoralty. The administration of this office at the time was a task which demanded peculiar energy and efficiency, and Darby had both. He established the mayor's court, rid the city in large degree of its dangerous classes, laid out public squares and parks, and in every way justified the people's confidence. In 1836 he called a meeting of citizens to memorialize Congress on the subject of completing the National road to St. Louis, and in accordance with his official communications of the same year urging the importance of railroad development, an address to the people of the State was issued, and in April, 1836, a great convention was held in St. Louis, composed of delegates from eleven of the richest counties in the State. Two railroads were projected, one to Iron Mountain, the other westward north of the Missouri River. When, however, in 1838 Mr. Darby, then State senator, introduced a bill to charter the first-named road, it failed, because Illinois was at the time suffering from the collapse of her railroad mania. The time for Missouri had not yet arrived.

HON. JOHN F. DARBY.

In 1850, Mr. Darby was sent to Congress, and much was expected from his solid qualities, but an accident on a boat on the way to Washington for a time paralyzed his extremities. He slowly recovered in large degree, and did good work for the State during his congressional career. For some time he was engaged in a banking business, the firm being Darby & Poulterer, but finally returned to his original profession, the law, and enjoyed an extensive practice until nearly the day of his death. In 1880 he published a volume of "Personal Recollections," containing a varied store of reminiscences relating to the early history of St. Louis and many of the individuals who figure in it. Hardly another man in St. Louis, with the exception of Frederick L. Billon, knew as much of the city's past.

Familiar with each old landmark and honored name, proud of his loved city, and amiably garrulous, no name occurs oftener in the reports of bar meetings, and during the later years of his life no important public meeting seemed complete without his presence. He was a "walking cyclopædia" of legal anecdotes, many of which have perished with him. In 1878 the St. Louis Law Library made him an honorary member. He was then the only surviving originator of the library residing in St. Louis, and for forty years had been a member. Montgomery Blair and Charles D. Drake, also of the original members, had removed to Washington, and Warwick Tunstall to Texas. But it would be impossible to keep record of the number of times during his later years that John F. Darby was the "connecting link" between the younger and the elder St. Louis.

His married life began in 1836, his wife being Mary M. Wilkinson, daughter of an army captain. She was born in 1818 in Washington County, Mo., and died in July, 1875. Mrs. Darby was educated at the Perryville convent, where at that time many of the most cultivated and refined young ladies of Iowa and Missouri attended school. Her family on both sides were among the first settlers on the continent. Her father's ancestors were English, and settled in Calvert County, Md., in the early part of the seventeenth century. Her mother was Emilia Vallé, daughter of Francis Vallé, commandant at Ste. Genevieve. At the time the country was transferred to the United States, Francis Vallé was the grantee under the Spanish government of the Iron Mountain property, with several thousand arpens of land attached, which was confirmed to his children by the United States government. The Vallé family were among the first settlers in the Mississippi valley, and Mrs. Darby's great-great-grandfather, also Francis Vallé, was an officer in the French service and commandant at Fort De Chartres.

John F. Darby died in 1882, the last of those with whom his early days at the St Louis bar had been passed. Heartily and eloquently he had paid a kind tribute to the memory of one after another of them

all, and it was from those who had been of a younger generation that he received like honors.

A new contract for lighting the city with gas was concluded with the "St. Louis Gas-Light Company" on Dec. 4, 1840. The first directors of the company were Theodore L. McGill, M. L. Clark, R. S. Tilden, P. R. McCrary, N. E. Janney, H. B. Shaw, I. D. Daggett, and N. Paschall. For the more regular distribution of water from the water-works, the superintendent was directed by ordinance to set up fire-plugs of six inches diameter at the intersection of the streets therein designated. The expenses of the water-works for 1841 amounted to four thousand six hundred dollars. An act providing for the reports of overseers and sextons of public graveyards adjoining St. Louis to be made each week to the register of the city was designed to ascertain the mortality of the city and its suburbs. The City Guard "appointed to keep watch and guard every night throughout the year," consisted of a captain, three lieutenants, and twenty-eight privates. The confusion which was occasioned at fires by the assembling of spectators in the vicinity, as well as the great destruction of goods occasioned by their careless removal, caused the City Council to create the "fire wardens and property guards of the city of St. Louis," whose duty it was made to attend all fires and to remove all goods, wares, and merchandise, and to take charge and be responsible for the same. Out of this precautionary legislation sprang the present excellent system of "the salvage corps." An inspector of weights and measures was provided for by ordinance, and was charged with the duty of testing and proving the accuracy of all weights and measures. The erection and regulation of a work-house was provided for for the punishment of "all persons legally committed by due course of law for any violation of ordinances for which a fine shall be imposed and the convict shall refuse or be unable to pay such fine and costs." The municipal officers in 1841 were John D. Daggett, mayor; aldermen, Robert Cathcart, James H. Lucas, A. E. Orme, Thomas Cohen, Adam L. Mills, B. W. Ayres, Samuel Gaty, James C. Lynch, John Corcoran, and Stewart Mathews; delegates, J. M. Mahegan, D. H. Donovan, Thomas Denny, E. English, Hiram Shaw, Henry McKee, H. S. Cox, Edward Brooks, H. E. Stone, Thomas H. West, G. Trask, E. Young, T. O. Duncan, Thomas Le Beaume, and A. R. Corbin.

In 1841, John D. Daggett was elected mayor. Mr. Daggett was born in Attleborough, Mass., Oct. 4, 1793. His father, Benjamin Daggett, a merchant of that place, dealing in West India and British goods, died in 1807, leaving a wife and four children. John remained with his mother, assisting her in the store until it became necessary to close up the business, when, the estate being small, he was apprenticed, at the age of sixteen, to learn the trade of machinist. He worked as apprentice and master until the close of the war of 1812, when, in view of the general depression of business, he left Attleborough, hoping to better his fortune elsewhere. He found employment at Philadelphia at his trade of lock-making, but hearing favorable accounts from Pittsburgh, he went thither, spent a few months there as salesman, etc., and then agreed with Reuben Neil, a friend of his father's family, to go with him to St. Louis. On the way Mr. Daggett stopped at Vincennes, Ind., and sold a stock of goods, and arrived in St. Louis in October, 1817. For nearly three years he had charge of Mr. Neil's business, and then associated himself with P. Haldeman in the commission business, but the venture not proving profitable, the concern was closed in 1822, and he then went into the auction and commission business with Walsh, Johnson & Co. The business not being attractive or sufficiently remunerative he withdrew in 1823, and engaged alone in retail merchandising, which proved moderately successful.

In February, 1821, he was married to Miss Sarah Sparks, daughter of Samuel Sparks, a native of Maine. This union resulted in twelve children.

In 1823, Mr. Daggett established a general merchandise business, which he conducted with fair success, and in 1826 engaged with others in an attempt at lead-mining at Sandy Mines, near Herculaneum, and opened a branch store there; but the business was a losing one and was soon abandoned.

In April, 1827, Mr. Daggett was elected alderman in St. Louis, during the administration of William Carr Lane, first mayor of the city. Among his colleagues were John Mullanphy, Wm. K. Rule, Frederick L. Billon, Christopher Price, Edward Charless, Joseph C. Laveille, John Sutton, and David B. Hill. He was re-elected in 1831.

In 1830, Mr. Daggett established a branch store at Sangamon, Ill., but the venture was not remunerative and was soon discontinued. During the same year he purchased an interest in the steamer "St. Louis," the first boat of that name on the Western waters, and for several years continued in the steamboat business, which, like everything he had yet undertaken, yielded him a moderate profit. The bulk of his business was done between St. Louis and New Orleans, and he was master of some of the best steamers of that period.

sectional docks, which he retained until his death, and during a large portion of the time he took a leading part in the management of the corporation as accountant, cashier, and general agent. In 1838 he was appointed street commissioner, and in the fall of that year organized the Floating Dock Insurance Company, of which he was president. He was also a director in the Citizens' Insurance Company. Both these companies went out of existence in consequence of the financial troubles of 1842.

In February, 1839, he obtained a charter for the St. Louis Gas-Light Company, of which he became a director, and in December, 1842, was elected president, retaining the position for several years. His connection with the company lasted until 1849.

In April, 1841, Mr. Daggett was nominated by the Whigs for mayor, much against his own inclination, and was elected, but declined a re-election.

From 1846 to 1848 he was secretary of the board of public schools.
